23 בקול יי אלהיך והישר בעיניו
24 תעשה והאזנת למצותיו ושמרת
25 כל חוקיו וכל המחלה אשר שמתי
26 במצרים לא אשים עליך כי אני
27 יי רופאיך מרמראות
28 ועדנת שמירות קרובי

In the margin:

לברו יתיה תסגוגא רפא ותיאו ותיאו ותי(נ)או וי(ר)גיה

At the top, inverted:

והוא נעורה אה אה סלה
לעולם ועד אמן (אמן)

This fragment too does not seem to require translation. In the following some comments on points of interest will be made.

3 **wyz'**: We should have expected a verb meaning "to save", like **ṭwlw wšyzbw** in line 11. It is possible that **wyz'** is a corruption of **šyzb**. On the other hand it could belong to the verb attested in similar contexts under the forms: **wtyzh mnh mbklt'** (Bowl 1:11 and Montgomery 1913, No. 32:2); **dyzh wytrḥq mynyh dyw' byš' wsṭn' byš'** (Montgomery 1913, No. 3:2). Montgomery 1913, p. 130, explains this verb as derived from **ZḤḤ** or **ZW'**, but it is also possible to regard it as deriving from **'ZL**, with the *lamed* dropped, as frequently in Eastern Aramaic (see Epstein 1960, pp. 58 f.). In that case the phrase would mean: "May the bearer of this writing go away from all illness...". The difficulty about this interpretation is that it does not form a good parallel with lines 11–12 and that it is not built around any otherwise attested formula, for the bowl-texts use this verb in relation to the evil things which should depart from the person. In addition it would be strange to find here an East Aramaic form. Our suggestion that **wyz'** is a corruption of something like **wyštzyb** seems therefore preferable.

7 **yḥyšh**: Cf. Commentary to Amulet 3:2.

11–13 The syntax here is confused. Read טולו ושיזבו נושא הכתב הזה מן חרשין בישין ומכל לווטין.

17 **wšhry'**: This is a Hebraism in Aramaic.

21 **mwḥṣ wrwp'**: See Commentary to Amulet 1:20 and Geniza 7:2–3.

GLOSSARY*

In the following, all the words and names occurring in the Amulets and Bowls published in this book are indexed. The Geniza texts have not been included in this Glossary. The main Glossary is followed by an index of divine names, names of angels and *nomina barbara*, and by an index of personal names. Biblical quotations are listed in a separate index. The individual words in such quotations are not included in the glossary.

Numbers in italics indicate that the reference is to a text in Syriac (this applies to A*6*, B*1*, and B*10*).

Verbs are placed under their root forms. Nouns are arranged in principle according to their spelling, usually in the definite form. *Matres lectionis* are ignored in the alphabetical arrangement, unless they form part of the root or of the basic nominal form. This rule has not been strictly observed in foreign words.

Restored words have not been listed. Words partly restored are indicated by parenthesis around the line number.

אבא father B 13:12. אבוכון B *1:9*
אבד to be lost. יבד B 9:4
אבל to mourn. אבילין B 6:7
אבנא stone. אבן B 6: 5,8
אברא limb. אברין A 9:3. אבריה (H) A 4:17. איבריה B 13:5
אברא lead B 13:11
אגנא chalice. אגני B 13:18. אגנהו B 13:16
אדונא furnace. אדוני B 13:5
אדמסא steel B *1:12*

Song of Solomon 3:7–8 B 12a:XI

INDICES

As the Glossary gives all the words occurring in the Amulets and Bowls published in this volume, the Indices are in principle restricted to the Introduction and Commentary. Two exceptions have been made: the General Index includes divine names occurring in our Geniza texts, and the Index of Quotations incorporates references to the Amulets and Bowls as well.

The alphabetical order follows that of the roman alphabet, the two signs for *alef* (ʾ) and *ʿayin* (ʿ) coming first when used in consonantal transliterations. Greek is here given in transcription.

ADDITIONS AND CORRECTIONS

The following notes incorporate suggestions made by several scholars: Benjamin Elizur, Simon Hopkins, Charles Meehan and Mordecai Mishor. They were kindly communicated to us in a note written by Mr Benjamin Elizur, where individual authorship was not indicated; references to "Elizur" in the following should therefore be understood to refer to the whole group. These notes also contain a selection from the suggestions made in a number of reviews and publications, as indicated, but other important notes that were given in some of the reviews should not be ignored. The main substantial reviews of which we are aware are the following: Gordon 1987a; 1987b; Morony 1988; Oelsner 1989; Puech 1988; Segal 1986.

Beyer 1984 contains editions of the following amulet texts: A 2 (p. 397), 4 (374), 5 (383), 7 (371), 8 (395). Beyer 1994, contains editions of A 1 (p. 258), 3 (260), 4 (249), 5 (253), 7 (248), 8 (258), 10 (238), 11 (235 f.), 12 (236), 13 (237), 15 (263).

Page 8, Plates 5 and 6. Amulets 6 and 7 were published by courtesy of the Archives de l'Académie des Inscriptions et Belles-lettres, from the bequest of Dupont-Sommer. Their shelf-mark is G 6.

Page 22, n. 23. This amulet was edited in our *Magic Spells and Formulae* (*MSF*) as A 27.

Page 32, last paragraph. Read: Besides the older form of the possessive suffix of the third person singular masculine attached to a plural noun, **-why**, which is attested in forms like **ḥzwhy** (Bowl 9:4), we have the younger form **-yh**, e.g., **gybryh d'r'h** (Bowl 6:4), **šqyh** (Bowl 9:3), etc.

A 1:1–3. Similar formulae, enumerating an angel for each side of the person to be protected, occur also in Coptic. Cf. Kropp 1931, p. 71, n. 1; Polotsky 1937a, pp. 236 ff. The Jewish formula occurs also in *Seder Rav Amram Gaon*, p. 55a (a prayer for the safety of a journey).

A 1:11. For יומא read: יומה (Elizur).

A 1:14. Read: רקיעה דהוא מ(קב)ל (ת)מידה בכל יום [ ] (based on Elizur).

A 3:4–5. Read: דלה תיחטין "that you should not sin" (Wesselius 1991, p. 711).

A 2:2. Further discussion of the terminology for fevers in the Aramaic magic texts, and its relation to the relevant Greek terminology, is to be found in our second volume, *MSF*, pp. 36f., and in the commentary to A 19 (p. 64).

A 3:8. For the figure of Ṣuriel cf. Polotsky 1937a. The Coptic tradition renders this name (also in Arabic) by a simple s, but it seems possible to assume that it is the same angel as Ṣuriel. If it is, it may be interesting to check on the relationship of this name of angel, who is said in the Christian tradition to be "the trumpet blower", with the Arabic word for "trumpet" in the Koran, *ṣūr*, for which Duchesne-Guillemin 1979 has suggested an Iranian derivation.

A 5:3. In the translation, correct Samriel to Šamriel.

A 6. The figures of the three deities (?) that stand in the water and direct the water and the world are reminiscent of the midrashic passage: אמר ר׳ לוי יש מן הדרשות שהן דורשין כגון בן עזי ובן זומא קולו שלהקב״ה נעשה מיטטרון על המים הדה היא קול י״י על המים (*Bereshit Rabba* 5:4; the spelling according to the Geniza fragment in Sokoloff 1982, p. 89), "Rabbi Levi said: There are certain (types of) exegesis that they make, like Ben ᶜAzzai and Ben Zoma, (viz.), The voice of God became a leader over the water, that is (the meaning of the verse), 'The voice of Lord is upon the water' (Ps. 29:3)".

A 6:1. We suggested that Rabbā may be the name of a deity. This idea may get some support from an inscription from Taymāʾ, where it is said: **[h]qym krsʾʾ znh qdm ṣlm zy rb** (see Aggoula 1985, pp. 66 [No. 8:6], 75; Cross 1986). Aggoula translates this phrase, "il a érigé ce podium devant le Maître de l'édifice"; but it seems more natural to translate, "has erected this stool in front of this statue (or idol) of Rab". One should recall in this connection that in the Islamic usage, Arabic *rabb* is one of the prominent epithets of God. On the other hand we have the formula בישמיה דיהוה קדיש אילאה רבא דישראל (Isbell 1975, No. 66:2–3), where *rabbā* seems to occur as a mere adjective. Puech 1988, p. 586, regards A 6 as a good Christian text, and interprets **rbʾ ḥsynʾ qdyš ʾylʾ** as three epithets of Bar-Theon "the Son of God".

A 6:8. **rbw**: Segal 1986, p. 97, refers to the unpublished bowl BM 91771, where he quotes **rbwty wšylṭny**.

A 7:15 ff and A 7b:1. Note the correction to the reading and translation on p. 76.

A 7:22. For דאן cf. Schäfer 1984, p. 75: על האופנים שלח לי דרך דאן ברעד אן (T-S K 21.95 I). The text there is far from clear, but it seems to bear witness to the use of דאן as a magic word.

A 9:8. Perhaps read, following Qimron 1993, p. 270: קו[ו]מוי טוריה וקלמתה [מזד(ע)וע(ין].

A 10. For a new reconstructed reading based on a Geniza recipe (G 22) see *MSF*, p. 219. For the commentary on pp. 88 f. it may be noted that there are several other occurrences of injunctions in magic recipes to use a new vessel, or an unburnt piece of pottery. *Sefer ha-razim* provides us with two good examples: צלוחית חדשה (I:96, p. 72), בשבע נבלי חרש שלא נכנסו באור (I:53, p. 69).

A 11:3. For Barqiel cf. Henning 1935/7, p. 583. Also 3Enoch 14:4; 17:1.

A 11:5. For an angel appointed over headache cf. the Geniza fragment CUL Or. 1080.6.19 קורא אני למלא[ך] (שהו) ממונה על מחוש ראש (for this fragment see *MSF*, G 29, p. 2:14–15). A demon *di'u*, a name that denotes some head ailment, exists in Akkadian; cf. von Soden 1959–1981, *Akkadisches Handwörterbuch*, s.v. As a parallel expresssion, Segal 1986, p. 97, quotes **kybr'šh** 'headache' from the unpublished bowl BM 91771.

A 11. Read, following Beyer 1994, pp. 235 f., in line 5: ועלא בכורכורי אדניא; in line 10: תעקרו מן כורכורי אדניה[ו](א). The word כורכור should signify, as Beyer suggests, the auditory passage in the ear.

A 11:6. It may be noted that כביש could equally well be an active participle.

A 14:8. Further references for this formula are given above, in the Addendum to A 1:1–3. Cf. also Gollancz 1898, p. 88: גבריל מן ימינה ומיכאיל מן סמלה אשרה (=אהיה אשר אהיה) אלשדי אדוני לעל מן רשה וכוֹבא מן קדמוהי וסוֹפא מן בסתרה. The theme of the angels on all sides is discussed in Krämer 1928/9, pp. 119 f.

A 15. Further references for the Semamit story are: Barb 1966; Spier 1993; Greenfield 1989, where the variants of the Greek Gylou story are studied in great detail (no reference is given to *Amulets and Magic Bowls*). Cf.

also the long and detailed study (from an ethnographic point of view) by Sorlin 1991. Other versions of the Semamit story were published by Oelsner 1989; and by Müller-Kessler 1994.
For the lizard in magic, cf. Nock 1972, pp. 271–276.
To p. 121, note 23, on the use of iron in magic, add also Canaan 1914, p. 51.

A 15:8. Read: וני[ס].

A 15:24. For קים (אל) read: אלהים (Elizur).

B 1:11–12. For the Greek *adamas* and its Iranian counterpart, cf. further Schaeder 1926, pp. 228f.

B 2. Segal 1986, p. 97, mentions three other unpublished BM bowls with similar texts, more specifically BM 91713.

B 2:5. **wbyt ʾylhy wbyt knyšt**ʾ: According to Segal 1986, p. 97, the same basic formula occurs in two unpublished BM texts, 91713 and 91758.

B 2:8. **wkwl dlrʿ qryʾ wkwl dlšmyʾ mṣytʾ**: According to Segal 1986, p. 98, this could be translated "all that calls to earth and hearkens to heaven".

B 10:11. In the commentary, p. 183, the reference to the Peshitta to Ps. 88:2 should be emended to read 68:3.

B 12:VII. אדריכו = "they overtook". For a comparable Hebrew usage see Judges 20:43 כתרו את בנימן הרדיפֻהו מנוחה הדריכֻהו עד נכח הגבעה ממזרח שמש

B 13:4 ff. The physical description of the demon has several further parallels. In Coptic magic such a description occurs in the British Library text, Ms. Or 5987, published by Kropp 1931, I, p. 25; II, p. 152, for which cf. Polotsky 1937b, pp. 123 f. Kropp's text reads in Polotsky's translation: "Dessen Vorderteil löwengesichtig ist, dessen Hinterteil bärengesichtig ist, der mit der Falkengestalt, der mit dem Drachengesicht". A Manichaean source contains a description of Satan in physical terms somewhat reminiscent of the description given here: "His head is like that of a lion, his body is like that of a serpent, his wing is like that of a bird, his tail is like that of a fish, his legs are like those of beasts of burden" (Ibn al-Nadīm, *Fihrist*, p. 329, lines 12 f.). For this cf. Polotsky 1935, col. 250. An old model for this kind of description occurs in Akkadian: cf. Köcher 1953, pp. 64 ff. On various figures of demons which are composed of different animals see further Ebeling 1938, pp. 110a, 111a; Unger 1938, pp. 114a ff.

B 13:10. Correct the printing error: בני ריגותא וזינותא.

B 13:12. In the commentary to this line (p. 210) cross out the words "plural", "pl.".

B 13:15. **zrgwn**ʾ: Cf. the Pahlavi word *zargōn*, in *Dēnkard* VII, 2:28, where it seems to mean "green, fresh".

G 2, p. 1:0. Read (in Arabic characters): בסם אללה אלרחמן אלרחים אלחמד ללה חק חמדה (Elizur).

G 2, p. 1:12. דרנא: This word may be interpreted as the Aramaic word for some kind of worm, or as the Arabic word **drn** "dirt" (Elizur), though these interpretations do not seem likely.

G 3:6. צ״א: This is written over וצאיף (Elizur).

G 4:3. Read at the end of the line perhaps: כל רוחין בישין (וכל) [שדין?] (Elizur).

G 4:6. שאמר והיה העולם. Compare the formula in the Jewish morning prayer, ברוך שאמר והיה העולם.

G 4:8. Read at the end of the line: השבעתי (אתך) (Elizur).

G 4:15. Read: פיאל[אל ושר]לו כרוביו[ ](ו) (Elizur).

G 4:17. Read: [ ] שלמה על (כ)ל (רוח)ין ושדין (Elizur).

G 5, p. 2:2–4. The phrase from Gen. 32:3 occurs also in the prayer for the safety of a journey.

G 6, p. 1:1–2. Read: עד [ז]מן דיעבד צביוני (Elizur).

G 6, p. 4:19. Read: o אמן אמן סלה ה.

G 7:34. Correct the printing error: יארי יי פניו אליך ויחנך פסתם.

G 8:9. Read: ושמתיה אינון (Elizur).

Ancient Jewish Magic (1898, Strassburg)

A modern précis of the work of Ludwig Blau

(Jehuda Arje Blau, 1861-1936)

The original work (in German and Hungarian, with Hebrew and Greek key words) offers a detailed analysis, documentation and assessment of the ancient borderlines of superstition and Judaism, with respect to monotheist ethics. Prof. Rabbi Blau clearly states that Jewish and pagan magic have common cultural roots, are an inter-confessional and international phenomenon, although many Hebrew formulae (e.g. tetragrammaton, יהוה) are circulated as symbols. His view of the good luck charm (amulet, קמיע) is relatively neutral and sees its Hebrew origin in the attributed healing power by the ancient physicians, who were also priests, i.e. benevolent apotropaic function. The overall drivers of every ancient magic practice are hate (malevolent) and love (benevolent), resulting always in death and adultery. L. Blau locates the mentioned ancient magic practices in the Talmud and Midrash to the land of Egypt, except some few Babylonian (Chaldean) customs. As in all times and among all peoples, performing certain magical practices was performed as business by women within Jewish communities and the legal warning of Exodus 22:18 (מְכַשֵּׁפָה, sorceress) ***is not gender-neutral; this also refers to comments of Baraitha Sanhedrin 67a. In the deeper sense of all these ancient human practices of gaining control over destiny and randomness, classical magic and symbolic art may have been the beginning of culture, in terms to 'create' by sensual media supernatural effects. According to L. Blau, with respect to magic practices, ancient human paganism has (had) a greater influence on Judaism (than vice versa); the originality of Judaism is only grounded in the creative awareness (realization, insight) of a single (united-only) creator.***

Introduction: The Leaven of Kabbalah

And my speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power: That your faith should not stand in the wisdom of men, but in the power of God. 1 Corinthians 2:4-5

Paradigm Shift – an important change that happens when the usual way of thinking about or doing something is replaced by a new and different way; a fundamental change.

Reading the title of this book, one might ask, why do Christians need to know the secrets of Kabbalah? For the last several decades the Church has been the particular target of a massive flood of books and teachings on mysticism, specifically in the form of Jewish mysticism or Kabbalah. The result of this demonic campaign has been a "departure from the faith," as many Christians are now looking to the *wisdom* of the rabbis for answers to their spiritual questions.

Like the gnostics, the kabbalists view *secret knowledge* as the path to immortality. Mingled with biblical terminology, these secrets are subtly presented as a means of discovering one's hidden destiny and as a way of becoming more like God. Even as mystical teachings are being covertly brought into the Church, what is more astonishing is that many rabbis are openly proclaiming Kabbalah as the only salvation of the world and that this salvation can only be brought about by a global adherence to the law.

This book will attempt to uncover the deception by giving a detailed description of what Kabbalah is and equip believers to recognize it in its morphed form of Christianity. It will also demonstrate that the *god* of today's Babylonian and kabbalistic Judaism is not the God of the Bible and that the current convergence of Christians coming under rabbinic authority will bring them, not to the one true God of the Bible, but to the subservience of the *god* of Kabbalah – *Ein Sof* – and to its hierarchy of gods.

The two main sources for Jewish doctrine are *The Babylonian Talmud* and Kabbalah. The *Babylonian Talmud* is a commentary on the *Mishnah*, an extensive collection of Jewish legends, fables, and oral law which is considered in some branches of Judaism as divinely inspired as the Old Testament. Kabbalah has been defined as a mystical commentary on the Torah. The word Kabbalah means *to receive* and may be viewed as the umbrella under which all Jewish esoteric books are contained. The primary texts of Kabbalah are the *Zohar* (The Book of Splendour) and the *Sefer Yetzirah* (The Book of Formation). There are also lesser writings with such titles as *The Book of Mysteries*, *The Gate of Reincarnations*, and the widely known third *Book of Enoch* (3 Enoch).

The *Babylonian Talmud* has aptly been called *the sea of Talmud* for its endless debates on Torah interpretation, as every word and every letter can have seventy meanings. As an extension of the *Talmud*, Kabbalah is sometimes referred to as the *wine* of Torah, so named for the *distillation* process of knowledge whereby the initiate undergoes a spiritual transmutation process likened to the art of the medieval alchemist in his secret laboratory. What is important to understand is that Kabbalah cannot be separated from its Babylonian origins and is considered a vital part of Judaism:

"Some modern exponents of the Kabbalah claim that it is a separate religion, distinct from Judaism. This claim is not only untrue, it is self-destructive…The Kabbalists call Jewish mysticism the Pardes, meaning 'The Garden'… Kabbalah is a living, breathing spirituality that is nourished by the rich soil of Jewish wisdom and practice… While one can taste the teachings of Kabbalah even without being particularly observant of Judaism, you can't detach it from its source. *Kabbalah is the heart of Judaism*." (i)

This book will further show that the *god* of Kabbalah is none other than Lucifer, the *serpent* and angel of *light*, whom the sages prophesy will restore knowledge to humanity on a global scale, just as he did in Genesis. The Kabbalah reveals the identity of its *god* as an imposter and usurper from the beginning, as seen in this quote from the *Zohar*:

“He is the great Beginning, the mystery of all mysteries… the great source of all being and creation, the primal light that *enlighteneth every man that cometh into the world*.” (ii)

While there are many forms of Jewish mysticism entering the Church, none stand out more than Rabbi Itzhak Shapira’s book, *The Return of the Kosher Pig*. Before reading the book, I had yet to encounter a more overtly kabbalistic objective of the *Kingdom of God* as presented by Shapira and set forth by the rabbis of Kabbalah, who sadly for the most part rejected Jesus Christ as the Messiah.

I first heard of Rabbi Shapira in a video interview discussing his book. Many of his statements were deeply disturbing, such as the claim that when *Yeshua* returns He will destroy Edom; those Christians who are not aligned with the current state of Israel. I found this statement by Shapira to be completely unwarranted because the security of the believer in Jesus rests on the testimony of Christ and His atonement on the cross for sin, not on an individual’s political alignments in this world.

Much of the subject material in Shapira’s book is deeply rooted in the kabbalistic tenets of past Jewish sages. Since reading the book, my concerns have only increased. Among his strange doctrines, Shapira draws on an array of rabbinic sources to show that *Yeshua* is *Metatron*; the (fallen) angel who gives knowledge to mankind and a prominent figure in the writings of Kabbalah and the *Babylonian Talmud*. Equally disturbing is Shapira’s consistent use of *gematria* (Jewish divination) and his definition of *redemption*, which echoes the voices of the rabbis before him, as will be explained in the book.

Since the time I saw that first interview, Shapira has shared platforms with some of today’s leading Evangelical Christian personalities, all of whom adhere to the popular message of a political Zionist Israel-centered gospel versus the incorruptible gospel of Jesus Christ, Who is the fulfillment of all Scripture (See Luke 24:44-47).

As with any work on this subject, many will label the book as anti-Semitic, when in reality it is simply a compilation of kabbalistic methods of

enlightenment which are based on doctrines of demons. If the book bears any label, it is anti-Babylonian mysticism, anti-Kabbalah, and most of all, anti-luciferian.

In 1 Corinthians 1:19, the Apostle Paul referenced the prophecy of Isaiah 29:14 that the "foolishness" of preaching the cross is the power of God to both "destroy the wisdom of the wise" and to "save them that believe."

Therefore, behold, I will proceed to do a marvellous work among this people, even a marvellous work and a wonder: for the wisdom of their wise men shall perish, and the understanding of their prudent men shall be hid.

The *wisdom* of Kabbalah cannot be *received* without drinking from the cup of Babylon, as Kabbalah imposes a mystical, esoteric interpretation into the Scriptures. It is chilling to note that the rabbis repeatedly relate stories from kabbalistic literature – the same sources Shapira references in his book – which describe degrees of initiation in which the adept must journey past the *seven heavens* and through the doorways of the *seven palaces* by means of "secret names and seals…either upon his person or in his mind." (iii)

The Church today is at a crossroads, as one of the best-selling Bibles among Christians is *The Israel Bible*; a Bible without Jesus. (iv) The Bible warns of false prophets and teachers secretly bringing in heresies to the point of denying the Lord Jesus. (2 Peter 2:1) 1 John 4:1-6 tells us that we are to test the spirits of truth and error, because many false prophets are gone out into the world. In Revelation 2:2 Jesus commended the church of Ephesus for "testing" those who claimed to be apostles and found them to be liars.

The same holds true today. Growing within the Church is a wide body of rabbis who impress audiences with their extensive knowledge of ancient mysteries that are hidden in Scripture. What is not easily discerned is that these *mysteries* are rooted in the traditions of Babylonian and kabbalistic doctrines which arose out of Egyptian and Chaldean occultism. It stands to reason, therefore, that these same teachers, "illuminated" in esoteric Judaism, must also understand the "dark sentences" of the craft of Kabbalah.

Step by step we are witnessing a gradual *META-morphosis* – a transformation – of the Gospel in which the centrality of the position of Jesus Christ in Scripture is slowly being replaced by another *gospel*, another *spirit*, another *Jesus*, another *kingdom*; and the voice of the Bridegroom still calls, “Come out of her My people.”

Chapter 1

The Transformation

I will praise You with my whole heart; Before the gods I will sing praises to You. I will worship toward Your holy temple, and praise Your name. For Your lovingkindness and Your truth; For You have magnified Your word above all Your name.
Psalm 138: 1-2

***Transform* – mětaschēmatizō; (from the root word měta), to transfigure or disguise; a metamorphosis, to change, convert, transmute; an alchemical change in substance.**

But I fear, lest somehow, as the serpent deceived Eve by his craftiness, so your minds may be corrupted from the simplicity that is in Christ. For if he who comes preaches another Jesus whom we have not preached, or if you receive a different spirit which you have not received, or a different gospel which you have not accepted—you may well put up with it…For such are false apostles, deceitful workers, transforming themselves into apostles of Christ. And no wonder! For Satan himself transforms himself into an angel of light.

Paul, Apostle of Jesus Christ – 2 Corinthians 11:3-4, 13-14

“In the six hundredth year of the sixth millennium (5600 = 1840 C.E.) the gates of wisdom above [Kabbalah] together with the wellsprings of wisdom below [science] will be opened up, and the world will prepare to usher in the seventh millennium.” ***Zohar*** **(*VaYeira* 117a)** 1

The Moshiach of Kabbalah = *Yeshua* = *Metatron* = *Another Jesus*

The Return of the Kosher Pig by Rabbi Itzhak Shapira is one of the latest attempts to initiate Christians into Kabbalah by disclosing Jewish mysticism in an orthodox light. The premise of the book is to reveal the divine nature of the Messiah, *Yeshua*, concealed within the rabbinic writings of Jewish sages, including the *Babylonian Talmud*, the Kabbalah, the *Midrash* and other extra-biblical writings. In his presentation of *Yeshua* as the prophesied divine Messiah, Rabbi Shapira delves deep into the occult teachings of Kabbalah and the antichrist writings of the *Babylonian Talmud*. The inevitable course of this approach will inherently lead to another gospel and another *Jesus*.

In 2 Corinthians 11:3 the Apostle Paul warns the church of another Jesus and another gospel. In Galatians 1:8 Paul wrote, “But though we or an angel preach any other gospel, let him be accursed.” As ministers of the Gospel, neither Paul nor any of the apostles ever wavered from the sure foundation of Moses and the prophets having their complete fulfillment in Jesus Christ, the Messiah. There was no trading off or compromise with doctrines of demons such as those presented in *The Return of the Kosher Pig*. When Kabbalah speaks of the coming *Moshiach* (Messiah) it is never speaking about Jesus Christ, nor is Jesus Christ the Messiah spoken of in the *Babylonian Talmud*. The “prophecies” of the sages that Shapira references in his book all point to the coming of a Messiah that is not Jesus Christ, therefore he is antichrist.

In the first section of the book titled, “To the Reader,” Shapira introduces himself as a rabbi holding a rabbinic ordination through IAMCS (International Alliance of Messianic Congregations and Synagogues) but stresses the point that he has “no connection or relationship to Christianity other than following the same Messiah.” (p. xi) Using “holy Hebrew

manuscripts and traditions" as his foundation, Shapira says his desire is to present a "Kosher Yeshua"…'The Pig,' "through a Jewish lens," stating that "there is great significance in the name Yeshua rather than Jesus." (pp. xi-xii)

In the introduction to his book, Shapira begins by building a kabbalistic frame of reference on how the "Kingdom of God" will be manifested on earth. Kabbalists believe that there is a divine spark (*nitzotz*) of God within every person and within all of creation. This is New Age panentheism – God in everything and everyone. The Kabbalah teaches that at the fall in the Garden of Eden, the divine sparks were scattered and that the Messiah will only come when the sparks (specifically the scattered Jews) are gathered back to the land of Israel. Shapira explains:

"…the two conditions needed to bring ***the Kingdom of God to earth*** and to bring Jewish souls or "sparks" back to God. In Jewish thought, the Messiah will only appear when the truth ("lights") presents itself in the ***proper context*** ("tools")…The restoration and salvation of all of Israel and ***the entire world*** is dependent upon the restoration of the ***divine Jewish sparks*** back to *HaShem*…The ***truth by itself***…about the nature of the Messiah will not bring him and his kingdom to us. His kingdom will be established when all of the Jewish sparks will be gathered again." (p. 4; Emphasis, italics added)

It is clear that Shapira is steeped in the traditions of Jewish mysticism, the same traditions for which Jesus condemned the religious Pharisees of His time. And while Shapira presents this kabbalistic fable to his readers as "kosher," he fails to reveal the full spectrum of this false teaching; that at the fall, the *Messiah* of the Kabbalah himself fell into the abyss, that he too is in *exile*, and will only be released from the pit when there is a critical mass of "sparks" calling for him to come forth on the earth!

Shapira also infers that we need the mediation and mystical writings of the rabbinic sages of old in order to properly understand the Bible. He states, "In my opinion, the method of presenting Yeshua as the Jewish Messiah needs to be reevaluated…Some believe that proclaiming the words of the Bible itself is sufficient…I do agree that the Bible holds the ultimate truth,

but are we to ignore external resources [Kabbalah, Babylonian Talmud, etc.] that describe the nature of the Messiah…In searching out these truths, I suggest that the **proper context** is completely lost unless we use **an approved understanding of the word**." (p. 8, Emphases added)

After establishing an *approved framework* for his readers to better understand messianic prophecy, Shapira then sets the stage for the case of the *Kosher Pig* by quoting rabbinic sages whose writings say that in the Messianic era the pig will become kosher again. In other words, "The pig will return to Israel," *Yeshua* will be welcomed by the world and will rule the nations from a utopian Jewish kingdom on earth. (p.12)

To support his thesis, Shapira introduces his readers to *Pardes*, also spelled PaRDeS. On page 27 of his book he asks, "…how are we to interpret the Hebrew Scriptures?" He answers this question, saying, "…the Hebrew Bible has left much room for interpretation…Judaism has defined a systematic method of interpreting the scriptures over the course of centuries known as *Pardes*," adding that "it [*Pardes*] represents the keys to understanding the kingdom of heaven."

The word *Pardes* means paradise or garden and refers to the Garden of Eden (PaRaDiSe). It is an acronym for the words *p'shat*, *remez*, *drash* and *sod*. According to Orthodox or Hasidic Judaism, there are four levels or layers of interpreting the Bible. *P'shat* is the first layer and refers to the surface or plain meaning of the text. *Remez* relates to hints or what is implied below the surface. *Drash* or midrash means to dig deeper while focusing on the writings of the sages. *Sod* is the fourth level. The word *sod* means "secret" and refers to the hidden, esoteric meaning. The practice of *sod* requires immersion into the occult practices of Kabbalah and Shapira does not hesitate to reveal this to his readers:

"The word *Sod* literally means 'a secret'…One example of the 'Torah of *Sod'* is Gematria…the Kabbalah and the Zohar are *Sod* terms that are familiar to those within Orthodox circles. According to Orthodox Judaism, *Sod* represents the highest pinnacle of Jewish study and requires great care…the main contributor to what later became known as the book of the *Zohar*, Rabbi Shimon Bar Yochai, introduced midrash and *sod* (secrets) to

bring a unique perspective and Jewish understanding to the concept of the Messiah…Kabbalah is a generic term for the Torah of *Sod* or the secrets, which includes the Zohar, among other resources." (p. 31)

While Shapira is careful to stress to his readers that the "words of the Hebrew Bible are the only authoritative words that are divinely inspired," he contradicts himself later by saying, "However, our tools must be expanded beyond the *Tanach* (Torah, Prophets, and Writings)…**In order to understand the Scriptures and come into the kingdom of God, one has to apply these four methods of interpretation**." (pp. 27, 29, Emphasis added) So, in order to come into the kingdom of God, we must apply this secret method of biblical interpretation?

Shapira also informs us that there is a 5th level of *Pardes* called *Remez HaRemezim* – the "secret of secrets" – and that this level will only be revealed by the Messiah upon his return. "This level of Torah understanding will remain locked until the Messiah's arrival." (pp. 31-32) To illustrate this system of *secret wisdom*, Shapira provides us with the occult image of the Kabbalah tree of knowledge with its roots penetrating below the surface of the earth; the esoteric symbol of *As Above, So Below*. A Hasidic Jewish website explains:

"One of the promises regarding the Messianic Redemption concerns the Torah we will then study: "A new Torah will emit from Me" (Midrash Rabbah Leviticus based on Isaiah 51:4. In fact, "The Torah which we study in this world is naught in comparison to the Torah of Moshiach"… Nevertheless, while there is only one Torah, this Torah is multi-layered… **The deepest of the four general dimensions of the Torah is sod, the esoteric teachings of the Torah, also known as kabbalah. Moshiach will teach a hitherto untapped level of kabbalah**." 2

How do these claims by Shapira and other "rabbinic sages" compare with Jesus Christ, who is the same yesterday, today and forever? Do they stand up to the incorruptible Word of God? No, they do not!

And when they say to you, "Seek those who are mediums and wizards, who whisper and mutter," should not a people seek their God? Should

they seek the dead on behalf of the living? Isaiah 8:19

Jewish mystics refer to *Sod* as the *Torah of Sod*; *sod* meaning secret. This is because in Orthodox Judaism the word *Torah* encompasses not just the Torah of the Bible, but all of the writings of the Jewish sages throughout history and Shapira references these occult writings on a consistent basis to defend his case for the "kosher pig" Messiah.

The *Torah of Sod* is Kabbalah. Simply stated, Kabbalah is sorcery. It is consulting with demons to obtain secret knowledge, a practice forbidden by God in Deuteronomy 18. It is man's vain attempt to return to the paradise of the Garden of Eden through the kabbalistic tree of knowledge of good and evil. On page 27 of his book, Shapira states, "Pardes usually refers to the 'Secrets of Torah' within Judaism – the things that are hidden. The sages believed that in order to get to Paradise (PaRaDiSe), one must get more deeply into the Torah and understand its deepest meaning." (Parentheses added)

Because the knowledge of *sod* comes from the "serpent" and is satanic at its root, it is no surprise that the rabbis give a stern warning regarding the spiritual dangers involved. The occult practice utilizes gematria (numerology); changing and rearranging the order of the letters and words of Scripture to find a hidden meaning within the text. *Sod* also involves a transformation of one's consciousness through mystical meditation, breathing exercises and repetition of "*the divine name*." The name that is primarily used to ascend the Kabbalah *Sefirot* tree of knowledge is Metatron. Metatron is a fallen angel and this is who Shapira – through rabbinic writings – identifies as *Yeshua*.

And they shall turn away their ears from the truth, and shall be turned unto fables. 2 Timothy 4:4

Having established a thoroughly kabbalistic "framework" for the case of the kosher pig, Shapira attempts to validate the authority of the Babylonian *Oral Torah*. Using a 19th- century Hebrew translation of the New Testament, Shapira misleads his readers by telling them that the word "traditions" in 2 Thessalonians 2:15 is the word *kabbalot*, which is the

plural of kabbalah. This is a prime example of twisting the Scriptures in order to deceive. (2 Peter 3:16)

In his letter to the Thessalonians, the Apostle Paul tells the church to "stand fast, and hold the traditions" which they have been taught either by word or by letters. The word which Paul used is the Greek word *paradosis* and refers specifically to the Jewish precepts and ordinances given to them by God, not man. In his letter to the Corinthian church, Paul speaks of renouncing the hidden things of dishonesty, not handling the Word of God deceitfully. **(2 Corinthians 4:2)** However, in sharp contrast to Paul's words, Shapira notes:

"The Hebrew word that Delitzsch used to translate 'traditions' here is קבלות (*kabbalot*). The word *kabbalot* (plural of kabbalah) literally means 'to receive'…some of the kabalot were passed, not only by the written word, but also by the words that were spoken and the traditions passed by word of mouth...We often refer to that in Judaism as…(the Oral Torah)." 3

The Talmud is the oral tradition endeared by the Pharisees, for which Jesus so harshly rebuked them. In Mark chapter 7 Jesus, quoting the prophet Isaiah, said to the Pharisees, "Howbeit in vain do they worship Me, teaching for doctrines the commandments of men. For laying aside the commandment of God, you hold the tradition of men…Making the word of God of no effect through your tradition, which you have handed down." (Mark 7:7-8, 13) Michael Rodkinson, author of *The History of the Talmud*, states, "The Talmud then, is the written form of that which in the time of Jesus was called the Traditions of the Elders, and to which he makes frequent allusions." 4

The warnings Jesus gave to His disciples apply to us today: "Then Jesus said to them, Take heed and beware of the leaven of the Pharisees and the Sadducees…Then they understood that He did not tell them to beware of the leaven of bread, but of the doctrine of the Pharisees and Sadducees." (Matthew 16:6 & 12) Yet, on page 45 of his book, Shapira encourages his readers to treat the Oral Torah – the *Babylonian Talmud* and Kabbalah – with "great respect." This brings us to the most disturbing part of Shapira's book.

Chapter 2

Enter Metatron, Prince of the Kabbalists

Let no man beguile you of your reward by delighting in false humility and worshipping of angels, intruding into those things which he hath not seen, vainly puffed up by his fleshly mind. And not holding fast to the Head.
Colossians 2:18

In his "Glossary of Hebrew Terms" Itzhak Shapira defines Metatron as "One of the names of the Messiah based on rabbinical writing." (p. 289) Drawing from the mystical interpretations of the Oral Torah, Shapira introduces the fallen angel, Metatron – the *Messiah* of Jewish Kabbalah.

Part Four of *The Return of the Kosher Pig* is a lengthy exposé proffering the angel Metatron as the Messiah. To prepare his readers for this deceptive doctrine, Shapira writes, "I encourage all of you to continue to put on 'Jewish glasses' and to examine these pieces of evidence critically." (p. 227) He begins by stating that the primary role of the Messiah is to act as a mediator and to carry our prayers to God. To support his case, Shapira quotes Dr. Yehuda Liebes, Professor of Jewish mysticism and Kabbalah at Hebrew University of Jerusalem. Liebes' work, *The Angels of the Voice of the Shofar, and Yeshua Sar-Hapanim*, is partially quoted here:

"…in the order of the *tekiot* (sounding of the shofar) from the siddur we see the prayer to the various angels who are called to lift up the voice of the shofar to the heavens…May it be your will that at the sounding of the shofar that we blow today…As you accepted Elijah, blessed be his name, *and Yeshua the 'prince of the face' (Sar Hapanim) who is the Prince Metatron*, may you fill us with mercy." (p. 227)

Shapira explains that the term *Sar Hapanim* translates to Prince of the Presence, that this is the title given to Yeshua, and that "Metatron and Sar Hapanim are the exact same entity as the Messiah himself." He then notes,

"In essence it is because of the Mediator who is called Yeshua the Prince of the Presence, and Metatron, that our prayers will be received by God." (pp. 228-229) From this prayer in the Siddur, the occult practice of gematria (numerology) is used to decode the 72 names of the *prince of the kabbalists*. Referencing Prof. Liebes again, Shapira states, "…the term *Sar Hapanim* is equivalent in Gematria to 'Prince of the Throne' as the one who is allowed to come to the throne of God and the one who lifts up our prayers as a mediator for us with *HaShem*." (p. 230)

In his presentation of Metatron as Yeshua the Messiah, Shapira cites too many rabbinic sources to list. Some of these are the *Sefer Hayovel*, the *Hekhalot*, *Notes on the Study of Merkabah Mysticism*, the *Third Book of Enoch*, and *The Gate of Reincarnation*. On page 239 Shapira designates Metatron to be the "**Holder of God's full authority**" and "the one who will redeem Israel." On page 240 he quotes the *Sefer Hayovel*:

"And Metatron the Messenger continued and he said to me, I am Metatron, Sar Hapanim, and Michael is my name. He has placed me to be among his people whom he loves. I am the one who was with Avraham…I am the one who redeemed Yitzhak and the one who fought with Yaacov. I am the one who guided Israel in the desert for forty years…"

He then gives several passages in Genesis and inserts Metatron's name for the name of God into the Scriptures. On page 242 Shapira informs us that in Jewish literature Metatron is known as the Little or Lesser YHVH. This is an apt description, as Metatron is in fact a fallen angel posing as the Messiah. Shapira does not admit this, but quotes from the 3rd Book of Enoch, Chapter 10:

"And the herald went forth into every Heaven, saying: "This is <u>Metatron</u>, my servant. I have made him into a prince and a ruler over all the princes of my kingdoms and over all the presence and you shall speak to him now instead of me." (Advent of "Lesser YHVH")

The third book of Enoch (3 Enoch) is a pseudepigraphical work detailing visions of Metatron upon his throne by Rabbi Ishmael ben Elisha and is part

of the Jewish esoteric writings called *Hekhalot*. 5 In 3 Enoch Metatron is known as the lesser YHVH: "This version of the Book of Enoch is an account of a journey to heaven by Rabbi Ishmael ben Elisha, the High Priest. Rabbi Ishmael is first received by the angel Metatron, who proves to be the exalted Enoch…The whole text falls within the class of Jewish mystical writing known as Merkabah, or Chariot mysticism…" 6

Based on these fables of mystic rabbis who claim to have seen YHVH, are we then to assume that Enoch, transformed into Metatron, is also Yeshua and divine? Shapira gives no explanation for this. Instead he gives greater endorsement to the *Hekhalot* literature, which he esteems as, "a body of mystical writings that developed out of the visions of Ezekiel," and which contain "the greatest clues" for Metatron's identity. On pages 242-243 Shapira quotes from the *Hekhalot* what sounds more like the words of Lucifer in his pride against God than the humble redeemer of Israel who made Himself a servant to all:

"Rabbi Ishmael stated: *Metatron Prince of the Presence [Sar Hapanim]* possesses all the attributes that *HaShem* put in his hand, and he blessed me…and I was lifted and exalted…Metatron, prince of the Presence: *HaShem* **created for me a throne of glory and put upon me light and splendor and glory** and grace and mercy…and he opened the seventh Hall and he put me in this throne…Metatron Prince of the Presence said, *HaShem* has loved me more than any other **exalted ones**, so that he has **created for me clothing with different lights**, and he **created for me a coat of glory**, and he made me **a crown of the kingdom with 49 stones**. And they put it on my head and called out, "**The Little YHVH**" in front of all of the angels above."

Let's take an honest look at these words above (Emphasis added). Do these arrogant proclamations by *Metatron* sound like the words of Jesus Christ who emptied Himself on our behalf? No, rather they sound strikingly like the five self-aggrandizing "I will" declarations of Lucifer in Isaiah 14:

How art thou fallen from heaven, O Lucifer, son of the morning! How art thou cut down to the ground, which did weaken the nations! For thou hast said in thine heart,

I will ascend into heaven,
I will exalt my throne above the stars of God:
I will sit also upon the mount of the congregation, in the sides of the north:
I will ascend above the heights of the clouds;
I will be like the most High.
Yet thou shalt be brought down to hell, to the sides of the pit.

We know from John 1:1-3 that Jesus Christ is the eternal Word and God who created all things: "In the beginning was the Word, and the Word was with God, and the Word was God…All things were made by Him; and without Him was not any thing made that was made." Yet in the quote above from the *Hekhalot* we see Metatron – a fallen angel and imposter – saying that *HaShem* has *created* for him a throne of glory, clothing adorned with different lights, and a crown of the kingdom with 49 stones! It does not take too much discernment to see who the rabbis are really speaking about. Compare these statements with the description of Lucifer before his fall in Ezekiel 28:12-19:

Son of man, take up a lamentation upon the king of Tyrus, and say unto him, Thus saith the Lord God; You were the seal of perfection, full of wisdom and perfect in beauty. You have been in Eden the garden of God; every precious stone was thy covering…Thou art the anointed Cherub that covereth; and I have set thee so: you were upon the holy mountain of God; you have walked up and down in the midst of the stones of fire. You were perfect in your ways from the day that thou wast created, till iniquity was found in thee…Therefore I will cast thee as profane out of the mountain of God: and I will destroy thee, O covering cherub, from the midst of the stones of fire.

The Prince of this World: Metatron's True Identity Revealed
Metatron = Prince of the World = Lucifer

"I am the LORD: that is My name: and My glory will I not give to another."
Isaiah 42:8

It is apparent from Shapira's regard of Metatron that he puts much confidence in Jewish mystical writings, which he refers to as "deeper waters." These esoteric books deny the deity of Jesus Christ, yet give preeminence to a fallen angel and name him as equal to God the Creator. Again and again we see that Shapira has no problem relying on gematria and mysticism to support his thesis that Metatron is Yeshua, Enoch, and even El-Shaddai! On pages 242 and 244 Shapira provides us with the following formulas to illustrate Metatron's "divine nature" and equality with God:

"Sar Hapanim = Metatron = Angel of His Presence = Yeshua"

"Sar Hapanim = <u>Metatron</u> = Angel of His Presence =
Yeshua = Enoch = Shaddai"

Gematria is a mystical system within the *Zohar* used to decode the various names of God from the Torah. Through repetition of the "sacred" names of God, the initiate is transported to the "throne room" where he receives a "vision of Metatron…'the prince of the Presence'…seated on the Throne like God." Gershom Scholem was a leading authority on Kabbalah. In his book, *Kabbalah,* Scholem states, "In Merkabah literature the names of the angels easily intermingle with the secret Names of God…The formula 'the Lord, God of Israel' is very often added to the particular name, but many of the chief angels also have this added to their names…" 7

Quoting one rabbinic source after another, Shapira notes, "…the word *Metatron* in Gematria equates to the value of the word *Shaddai*. We can conclude that Metatron is El-Shaddai, the manifestation of God who is visible on earth and visible to men." (p. 244) At last, the true identity of Metatron is revealed as Shapira quotes yet more rabbinic sources:

"As we know, Metatron is the prince of the world…And he [Metatron] is the lad who serves from above as the sages explained…He is the keeper of the gate. Enoch is Metatron…Metatron is called "the Guardian of Israel…"…Cholin tractate 44 (Babylonian Talmud)… speaks about the Prince of the World…who is called the Great

Metatron...He (Metatron) has seven names." (pp. 244, 246; Parentheses added)

In John 14:30, just before His crucifixion, Jesus identified Satan as "**the prince of this world**." Paul the Apostle called Satan "**the god of this world**" who blinds the minds of those who are lost and to whom the Gospel is hidden. (2 Corinthians 4:3-4) In Ephesians 2:2 he is called "**the prince of the power of the air**." If Metatron is not Satan, aka Lucifer, then at the very least he is one of Satan's fallen angels. He is an imposter sitting on a throne in the spirit realm, posing as the *Messiah*, illuminating Christ rejecting rabbis and mystics with counterfeit visions of himself as YHVH.

Metatron, Merkabah and the Sefirot Tree of Knowledge

Within all esoteric schools of *wisdom*, the lie of Satan is that eternal life is gained through ascending levels of knowledge. In occult mythology, Metatron is the angel who gives knowledge to mankind. In Kabbalah, the experience of encountering Metatron upon his throne is known as Merkabah Mysticism or Chariot Mysticism (*Ma'aseh Merkabah*).

Throughout the centuries rabbinic sages have sought to duplicate the experience of Ezekiel's vision of God on his throne, described as wheels within wheels, carried by four living creatures. (Ezekiel 1) Unlike Ezekiel's experience, which was initiated by God, the mystic of Kabbalah uses occult methods to achieve *union with the divine* apart from faith in Jesus Christ. Merkabah mysticism is man's ascension of the tree of knowledge of good and evil, symbolized by the *Sefirot* tree and the six-pointed star, also known as Metatron's Cube:

Merkabah – the vehicle used to transport a person to the third heaven to behold the angel Metatron on his throne; **also called Metatron's Cube, it is depicted by the six-pointed star**. "The Chariot (Merkabah/Chariot ascension) was thus a kind of 'mystic way' leading up to the final goal of the soul. Or, more precisely, it was the mystic 'instrument,' the vehicle by which one was carried direct into the 'halls' of the unseen. It was the aim of the mystic to be a 'Merkabah-rider'…" 8

"Merkabah…is the divine light vehicle allegedly used by ascended masters to connect with and reach those in tune with the higher realms. "Mer" means Light. "Ka" means Spirit. "Ba" means Body. Mer-Ka-Ba means the spirit/body surrounded by counter-rotating fields of light, (wheels within wheels), spirals of energy as in DNA, which transports spirit/body from one dimension to another…MerKaBa is an interdimensional vehicle consisting of two equally sized, interlocked tetrahedra of light with a common center…it can be viewed as a three dimensional Star of David." 9

The *Encyclopaedia Judaica* (a Jewish encyclopedia resource) says the following in its article on Merkabah Mysticism: "**MERKABAH MYSTICISM**, the name given to the first chapter of Ezekiel…The term was used by the rabbis to designate the complex speculations, homilies, and visions connected with the Throne of Glory and the chariot (*merkavah*)…In Pharisaic [Pharisees] and tannaitic [rabbinic sages] circles Merkabah mysticism became an esoteric tradition…The doctrine of the seven heavens and their angelic hosts, as was developed in Merkabah mysticism and in cosmology, has also definite magical contexts…" 10

But their minds were blinded: for until this day remaineth the same vail untaken away in the reading of the Old Testament; which vail is done away in Christ. But even unto this day, when Moses is read, the vail is upon their heart. 2 Corinthians 3:14-15

Far from the divinely inspired testimony of the Gospel of Jesus Christ as presented in the Scriptures, Shapira's book is more like a magical mystery tour through the endless maze of spiritual darkness that is Kabbalah. If these esoteric writings of the sages so evidently reveal the biblical Messiah, as Shapira claims, why have we not seen more practicing kabbalists come to faith in Jesus Christ? Instead, we are seeing a literal explosion and embrace of kabbalistic doctrines permeating almost every aspect of society, including the Christian community. This is because the teachings of Kabbalah are nothing more than Jewish fables and myths "that turn from the truth" and which Paul the Apostle cautioned Christians to avoid. (Titus 1:14)

The question must also be asked, why would Itzhak Shapira go to such great lengths to write a book which is essentially a means of initiating potential followers of the *kosher pig Yeshua* into the mysteries of Kabbalah? The answer may be found in a *prophecy* from the *Zohar* – the main book of Kabbalah – and in the legacy of the father of today's Kabbalah.

Chapter 3

Prophecy, Creation and the Gods of Kabbalah

A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit…Either make the tree good, and his fruit good; or else make the tree corrupt, and his fruit corrupt: for the tree is known by his fruit.
Matthew 7:18, 12:33

Isaac Luria: Father of Modern Kabbalah

Itzhak Shapira is not the only rabbi or pastor disseminating kabbalistic doctrines into the Church today. There are many. Even the use of the title *rabbi* should raise an alarm, as Jesus told his followers not to be called rabbi. (Matthew 23:8) All things must be tested in the light of the Bible. Sadly, many Christians today are not looking past the veneer of impressive words that sound like truth; instead, they are placing themselves under the bewitchment of Kabbalah veiled in so called Judaism.

Based on a *prophecy* in the Zohar, there is a very definite and planned effort to bring the entire world into the study of Kabbalah as the necessary precursor that will usher in a false *Messiah*. This is why the true followers of Jesus Christ must be able to recognize basic terms and teachings as defined by the rabbis of Kabbalah.

Of all the rabbis referenced in Shapira's book, none has been more influential in the history and development of Kabbalah than Isaac Luria, also known as the "Ari" or the "lion." Born in Jerusalem in 1534, he was and is still known by his disciples as the master Kabbalist. His method of Kabbalah – Lurianic Kabbalah – continues to be the predominant form of Kabbalah followed by the rabbis today, as confirmed by Shapira: "…Rabbi Yitzhak Luria, who was the founding rabbi of the Pardes method…Many considered him the founder of the "Torah of Kabbalah…He is considered the father of contemporary Kabbalah." 11

This brief description of Isaac Luria from *The Return of the Kosher Pig* as the founder of the mystical Pardes method and "father of contemporary Kabbalah" lends itself to further explanation, but Shapira gives us none. Therefore I present the following excerpt on Isaac Luria from "Kabbalah Online" which publishes "Kosher Kabbalah From The Holy City of Safed, Israel" where Luria spent the last years of his life and died:

"One of the greatest kabbalists of all times, he founded a new school in Kabbalah – the so-called "Lurianic Kabbalah" – which is the basis of almost all mystical works that followed him… undisputedly the greatest practitioner and expounder of Kabbalah since Rabbi Shimon bar Yochai, author of the *Zohar*… On numerous occasions Elijah the Prophet revealed himself and taught the Ari the mysteries of the Torah. Every night his soul ascended into the heavenly realms. Troops of angels would greet him to safeguard his way, bringing him to the heavenly academies. These angels would ask him which academy he chose to visit. Sometimes it would be that of Rabbi Shimon bar Yochai, and other times he would visit the heavenly academies of Rabbi Akiva or Rabbi Eliezer the Great. On occasion he would also visit the heavenly academies of the ancient prophets…In 5330 (1570), after he had attained an extremely exalted rung of holiness in Egypt, Elijah told him the time had come to move to Safed, a city in the Galilee in the north of Israel. There he would meet Rabbi Chaim Vital, the man to whom he was destined to transmit the keys to the ancient knowledge…The Ari overflowed with Torah. He was thoroughly expert in Scripture, Mishnah, Talmud…and *maaseh merkavah* (esoteric disciplines). He was expert in the language of trees, the language of birds and the speech of angels. He could read faces in the manner outlined in the *Zohar* (vol. 2, p. 74b). He could discern all that any individual had done, and could see what they would do in the future. He could read people's thoughts, often before the thought even entered their mind. He knew future events, and was aware of everything happening here on earth, and what was decreed in heaven…**He knew the mysteries of *gilgul*** (reincarnation) **– who had been born previously, and who was here for the first time. He could look at a person and tell him how he was connected to higher spiritual levels, and his original root in Adam. The Ari could read wondrous things** [about people] **in the light of a candle or in the flame of a fire. With his**

eyes he gazed and was able to see the souls of the righteous, both those who had died recently and those who had lived in ancient times. Together with, and from, these departed souls, he studied the true mysteries. From a person's scent, he was able to know all that he had done. (See Zohar, vol. 3, p. 188a.) It was as if the answers to all these mysteries lay dormant within him, waiting to be activated whenever he desired. He did not have to seclude himself to seek them out. All this we saw with our own eyes. These are not things that we heard from others. They were wondrous things that had not been seen on earth since the time of Rabbi Shimon bar Yochai. None of this was attained through magic, heaven forbid. There is a strong prohibition against these arts. Instead, it came automatically, as a result of his saintliness and asceticism, after many years of study in both the ancient and the newer Kabbalistic texts. He then increased his piety, asceticism, purity and holiness until he reached a level where Elijah would constantly reveal himself to him, speaking to him "mouth to mouth," teaching him these secrets." 12

From this account of Luria's life, we can get a pretty clear idea of how a future *Moshiach* (Messiah) of Kabbalah might appear, complete with *Elijah the false prophet* as his forerunner – in this case, a familiar spirit! In fact, another authoritative source notes that "Certain allusions made to his disciples suggest that he [Luria] believed himself to be 'the Messiah, the son of Joseph,' destined to die in the fulfillment of his mission." 13 Like Simon the sorcerer in Acts chapter 8, Luria's ability to perform signs and wonders greatly impressed his contemporaries and his teachings continue to influence the followers of Kabbalah today.

The Kabbalah Sefirot Tree of Knowledge and its Roots

As seen in *The Return of the Kosher Pig*, Itzhak Shapira has provided extensive references to the heavenly journeys of the rabbis by way of mystical meditation and angelic encounters that result in strong delusion. On page 206 he has included an illustration of the *Sefirot* tree. In Kabbalah, the *Sefirot* tree is referred to interchangeably as the tree of life and the tree of knowledge of good and evil. It is the bridge connecting heaven and earth and represents man's ascent by degrees of knowledge, back to the paradise that was lost and ultimately to his own divinity before the fall.

Shapira refers to the *Sefirot* tree of knowledge and its relation to *Yeshua* multiple times in his book. Describing the role of *Messiah* as the last redeemer he states, "…he will serve as a connector between the heavens and the earth by the spark of life." (p. 205) Quoting again from "Mystical Jewish" sources, Shapira then attempts to show that the **female sphere of *binah*** on the *Sefirot* tree is a manifestation of *Yeshua*, "the son of God." In his explanation of "The Ten S'firot" as the "ten manifestations of God," Shapira states the following:

"The left side of the ten manifestations represents the feminine attributes, while the right side represents the masculine attributes...the feminine manifestation of God represents the part of God that we can see and remain alive…*HaShem* reduced himself to the "middle point" or "middle pillar during Creation…Amazingly, the middle pillar is referred to as the Messiah himself as the Binah or the Son of Ya…The responsibility of the middle pillar ["the mediator"] is to join heaven and earth together (called in Judaism "connection of the worlds")… The last redeemer is known as the Binah (the son of God), Elyon (the one from above), the "firstborn" and as a "bull." 14

Contrast these statements of Shapira with those of 33rd degree Freemason and occultist, Manly P. Hall:

"The Sephirothic Tree consists of ten globes of luminous splendor arranged in three vertical columns and connected by 22 channels or paths… analogous to the first 32 degrees of Freemasonry, which elevate the candidate to the dignity of a Prince of the Royal Secret…*Aima*, the

***Great Mother,* is the name by which Binah, or the third Sephira, is generally known….According to the mysteries of the Sephiroth, the order of the Creation…From AIN SOPH, the Nothing and All…AIN SOPH, corresponding to Kether, the Crown of the Sephiroth, gives birth out of Himself to the nine lesser spheres…From this eternal and ancient androgyne--Kether--come forth Chochmah, the great Father, and Binah, the great Mother…the first male and the first female, the prototypes of sex."** 15

As a master Mason and mystic, Manly Hall understood the secret teachings of Kabbalah, revealing in riddles those mysteries related to cosmology (the origin of the universe) and the *god* who rules from the top of the *Sefirot* tree, *Ain Sof.* In Kabbalah, the concepts of creation, the fall of man, redemption, and especially the coming Messiah are vastly different from the biblical view, and Shapira introduces his readers to many of these cryptic ideas. Based on his wide scope of rabbinical knowledge, Shapira must also know the diametrical opposites of Christianity and Kabbalah. Therefore, whatever connections he is trying to make between Jesus Christ and the *Messiah* of Kabbalah are simply not there.

According to the *Zohar* – the main book of Kabbalah – the *god* who created the universe is not the God Elohim of Genesis 1:26, but *Ein Sof*, an infinite, formless, unknowable force. *Ein Sof* (also spelled *Ain Soph*) may be defined as "the Supreme Diety…the eternal state of *Being*…the Absolute Not Being…without substance, essence or intelligence...the Most Ancient of all Ancients." 16 In the Genesis account of creation Elohim is the creator, but in kabbalistic theology *Ein Sof* is the creator of Elohim!

The Zohar's account of *Ein Sof* creating Elohim:

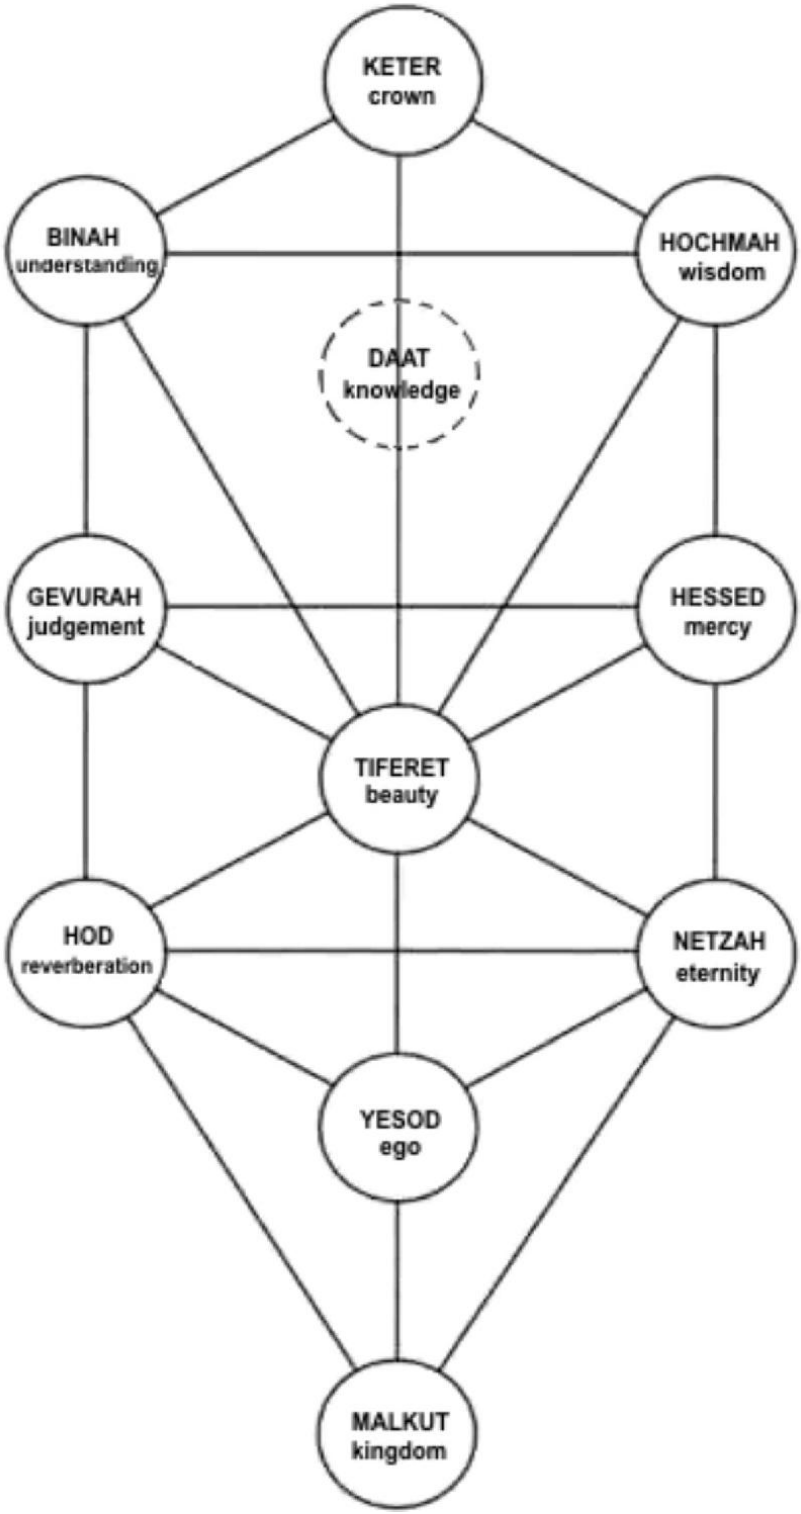
"Now the pillars stand firm!...The Blinding Flash…the '**Creation of *Elohim***'…This is the Zohar's name for the first impulse of emanation proceeding from *Ein Sof*, the Infinite, through *Keter*…one spark…A pure aura emerged from *Keter*…the aura of *Ein Sof*…the **Creation of *Elohim***…" (*Raba Zohar* 3 128b) 17

Because that, when they knew God, they glorified Him not as God… Professing themselves to be wise, they became fools…Who changed the

truth of God into a lie, and worshipped and served the creature more than the Creator. Romans 1:21, 22, 25

Ein Sof is not the God of the Bible, but the *god* of the Jewish mystics and sages; the same mystic sages that Itzhak Shapira praises in *The Return of the Kosher Pig*. Gershom Scholem was the first Professor of Jewish Mysticism at Hebrew University of Jerusalem and wrote volumes on the subject of Kabbalah. 18 In his book, *Kabbalah*, Scholem relates that *Ein Sof* and the *Sefirot* "are not differentiated." There is a unity between the creator and his creation; a oneness between the "Emanator" and the *Sefirot* that cannot be known to the "uninitiated." In Kabbalah God is "immanent within creation." Scholem notes, "…the *Sefirot* do not constitute "intermediary beings" but are God Himself." 19

As a professor of mysticism, Scholem admitted that the system of Kabbalah cannot be explained in a "simple and straightforward fashion." 20 In Kabbalah, the *Sefirot* and its doctrine of "divine unity" represent a "new plane of mystical experience and contemplation" that "can be fathomed only in the practice of mystical meditation." 21 More importantly, Gershom Scholem observed that despite the wide range of traditions used in approaching mystical Judaism, the symbols and ideas of "Lurianic Kabbalah" have "dominated kabbalistic thinking from the 17th century until recent times." 22



Many Christians today assume that Jesus Christ and the awaited *Moshiach* of Judaism are one and the same. Therefore, it is important to understand the kabbalistic doctrines on the fall of man and redemption, as these remain the central messianic themes in rabbinic Jewish thought today. These esoteric ideas were kept hidden for hundreds of years, but are now being released on a global scale according to a *prophecy* in the *Zohar*:

"In the six hundredth year of the sixth millennium (5600 = 1840 C.E.) the gates of wisdom above [Kabbalah] together with the wellsprings of wisdom below [science] will be opened up, and the world will prepare to usher in the seventh millennium." *Zohar* (*VaYeira* 117a)

"What was forbidden to investigate and to expound upon the day before now becomes permissible the day after…This is because the

gates of human understanding below have been opened up as a result of the steadily increasing Divine revelations above." 23

"Until the time prior to the dawn of the Industrial Revolution, it was forbidden for Jews to learn the secret side of Torah unless they understood the whole of the Talmud…Many secrets of Torah are embodied in a volume known as "The *Zohar*" which contains these traditions…The teachings of this book were withheld for a thousand years with a prophecy that at a time when required it would be revealed…These secrets have been whispered and then articulated more and more loudly by the Rebbes of Lubavitch (*Chabad*)…With this information a Jew can soar into the heavens." 24

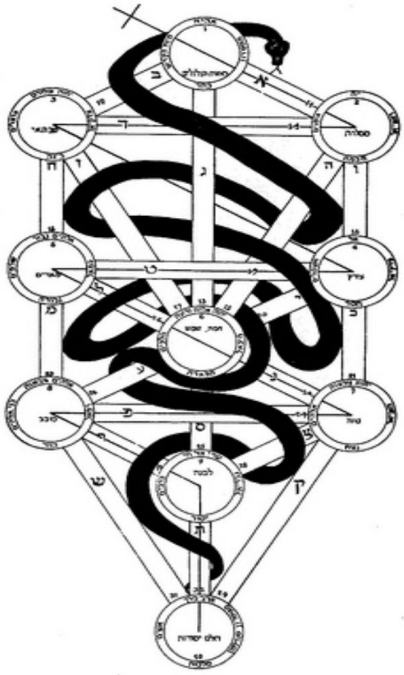
Every true Christian knows and believes that *Elohim*, the Creator in Genesis, *is* God and that Jesus Christ is God, the "Word made flesh." (John 1:14) But as we have seen, one of the secret teachings of Kabbalah is that *Ein Sof*, through *Keter*, created the biblical God, *Elohim*. Again, *Ein Sof* is the kabbalistic conception of the *god* who sits above the *Sefirot* tree. The following quote explains, "The hidden, infinite aspect of God is called "the Infinite" (*Ein Sof*, "without end"). This name was understood as the proper one for the hidden aspect of God…**The s*efirot,* not *Ein Sof,* is the God of the Bible**. Therefore, a Kabbalist can justifiably claim that, '***Ein Sof* is nowhere mentioned in the Bible**.'...The Bible refers only to the ***sefirot***, the knowable God, not **the hidden God**." 25

Bearing in mind that Itzhak Shapira says *Yeshua* is the (created) *Binah* in the *Sefirot* tree of Kabbalah, we will look at the core doctrines of mystical Judaism found within Lurianic Kabbalah.

According to Isaac Luria, *Ein Sof* emanated from himself ten spheres or vessels of light called sephirah (singular for *Sefirot*). The first was *Keter*, the Crown, the androgynous *god* who is both male and female, also known as *Adam Kadmon*. Because *Keter* is both male and female, the right side of the tree represents the masculine potencies of *god*, while the left side represents the feminine aspects of *god*. The remaining nine sephirah or spheres emanate from *Keter* through a process of mystical sexual union known as "*hieros gamos*, the holy union of male and female powers." 26 This synthesis of male and female is esoterically communicated in the union of the two triangles forming the six-pointed star; an occult symbol whose meaning is known and understood by those initiated into the secrets of Kabbalah. Since *Keter* is androgynous, the first two sephirah emit from him. These are *Hochmah* and *Binah*, located just below *Keter*. At this point is should be clear that Jesus Christ is not *Binah*, the result of an androgynous sexual act and *creation* of *Ein Sof*!

In this evolving process, *Keter*, *Hochmah* and *Binah* form a trinity from which emanates or gives birth to *Hessed* (male), and from *Hessed* emanates *Gevurah* (female). The next union – *hieros gamos* – then produces *Tiferet*. This mystical sexual union of the sephirah continues all the way down to *Malkut* (also spelled *Malchuth*) the lowest sphere on the *Sefirot* tree. 15



Malkut means *kingdom* and *Shekhinah*; and whereas all of the other sephirah are located in the spirit world, *Malkut* represents the physical, material world in which we live and the *Shekhinah glory* or dwelling of *god*.

The word *Shekhinah* is not found in the Bible. In Kabbalah *Shekhinah* is the final sephirah to emanate from the *Sefirot* tree. She is the female counterpart of *Ein Sof* and the "divine presence" of *god* in the earth. She is the daughter conceived in the "sacred marriage" of *hieros gamos*. She is the *gateway* of man's ascension to knowledge, the "bride" and "queen" of *Tiferet*. She is the "mother" who is *One* with the children of Israel. 27 But something went wrong in this cosmic drama. There was a crisis, a shattering of "*God's dream*" in which man is now left to work and pick up the pieces.

The Breaking of the Vessels, Exile and Tikkun
The Fall and Redemption of Gods and Kings

And he [Jesus] said unto them, I beheld Satan as lightning fall from heaven. Luke 10:18

In Kabbalah, the entire process of creation through emanation is described as a "Divine Lightning Flash" from *Ein Sof* which zigzags through each of the nine sephirah all the way down to *Malkut*, the *kingdom of god* on earth. 28 These nine sephirah are also called worlds. In his book, *Kabbalah*, Gershom Scholem states that the *Sefirot* are also depicted as *powers* and *crowns* "since they are the celestial crowns of the Holy King." 29 Through the *lightning flash* of *Ein Sof*, these *crowns* rise out of the sea of the abyss, revealing the *unity* of creation in the number *six* and symbolized in the reflection and union of two triangles, the six-pointed star, from which comes the Egyptian maxim,
As Above, So Below:

“The Ain Soph at first was filling All and then made an absolute concentration into Itself which produced the Abyss…the Waters or Crystalline Chaotic Sea…Each of these worlds has ten powers, or spheres…AIN SOPH established His first point or dot in the Divine Sea…the face of God, crowned with light, rose over the vast sea and was reflected in the waters thereof. His two eyes were manifested, radiating with splendour, darting two beams of light which crossed with those of the reflection. The brow of God and His eyes formed a triangle in heaven, and its reflection formed a second triangle in the waters. So was revealed the number six, being that of universal creation.” 30

THE GREAT SYMBOL OF SOLOMON

But thou art cast out of thy grave like an abominable branch, and as the raiment [garment] of those that are slain, thrust through with a sword, that go down to the stones of the pit, as a carcase trodden under feet.
Isaiah 14:19

The kabbalists say that in order to make room for creation, *Ein Sof* had to contract himself to a single point, making room for the worlds of the *Sefirot*. This is called *tzimtzum*. As the *lightning flash* descended, each sphere was formed, one after another, each serving as a vessel for receiving and containing the light. These vessels are also referred to as *levushim*, the "garments of *Ein-Sof*." 31 But the vessels could not contain the "divine light" and this resulted in what Kabbalah calls *shevirah*, "the breaking of the vessels." 32

As the vessels shattered the *light* dispersed and scattered in the form of "sparks." Some of these sparks rose back up to their "source." Others descended, becoming trapped in matter. Still others fell down into the abyss and are trapped there still; and because *god* is in everything and everyone, *god* himself is in the pit, waiting to be released. This is the *Zohar's* version of "the fall" and since the time of Isaac Luria, has served to explain the diaspora (dispersion) as a cosmic event: not only Israel, but all of humanity, the entire universe, and even God himself is in exile (*galut*). Once again, Gershom Scholem, late professor of Jewish Mysticism explains:

"The divine light…is no longer in its proper place because the vessels were broken…There is nothing that was not damaged by the breaking. Nothing is in the place appointed for it; everything is either below or above…all being is in Galut. And this is not all. **Into the deep abyss**…there fell, as a result of the breaking of the vessels, forces of holiness, sparks of divine light. Hence there is a **Galut of the divine itself**, of the 'sparks of the Shekhinah:' 'These sparks of holiness are **bound in fetters of steel** in the depths of the shells, and yearningly aspire to rise to their source but cannot avail to do so **until they have support**' – so says Rabbi Hayyim Vital, a disciple of Luria." 33

This “breaking of the vessels” is only the first stage in the fall of *Ein Sof’s* creation. It is the shattering and falling of the androgynous *god* of Kabbalah into the pit, “bound in fetters of steel! Scholem calls this “a cosmic picture of Galut…a Galut of the divine itself.” 32 This cosmic fall is also the fall of the first Adam, *Adam Kadmon*. In Kabbalah *Adam Kadmon* is the first emanation or creation of *Ein Sof*. He is *Keter*, the first sphere on the *Sefirot* tree. He is also *Elohim*, the “King.” He is the “crown” of the *Grand Man of the Zohar*, which is the entire Sefirot tree. He is not the man Adam, created in Genesis, but is the “Primordial Man”; the celestial *Adam* through which all other souls are created. The spheres of the *Sefirot* are not just worlds but are also portrayed as *powers* and *crowns*. The “breaking of the vessels” is the fall of the ancient *kings*, *princes* and *powers*:

“The Zohar holds the concept of two Adams: the first a divine being who, stepping forth from the highest original darkness, created the second, or earthly, Adam in His own image.” 34 **“This is the *Grand Man of the Zohar*…The science of equilibrium is the key of occult science. Unbalanced forces perish in the void. So passed the kings of the elder world, the princes of the giants. They have fallen like trees without roots, and their place is found no more.” (Eliphas Levi, *The History of Magic*)** 35

Chapter 4

Repairing the World:
The Secret Law of Tikkun and the Tree of Knowledge

For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: Not of works, lest any man should boast. Ephesians 2:8-9

So let no one judge you in food or in drink, or regarding a festival or a new moon or sabbaths, which are a shadow of things to come, but the substance is of Christ. Colossians 2:16-17

"The secret must be kept inside the circle of the initiates…The Sefiroth were revealed to Adam in the shape of the Tree of Life and the Tree of Knowledge." 36

"The rabbis have always taught that the Tree of Knowledge and the Tree of Life are one and the same…whose roots are now in "Heaven" leading all the way back to the future to the never-ending source of the Light of the *Ain Sof*." 37

There are many secrets in the "occult science" of Kabbalah. Concealed in the shattering of the vessels of the *Sefirot* tree is the fall of Lucifer and the *powers* of his kingdom. But the kingdom must be restored. The universe and its broken vessels must now be repaired. This is "the secret law of *tikkun*." 38 From the dust of this cosmic catastrophe the universe is reconstructed through the Primordial *Adam Kadmon*, who is the creator of the earthly Adam. From *Ein Sof*, "healing, constructive lights" go forth from the forehead of *Adam Kadmon*. 39 The spheres of the *Sefirot* are reconfigured on a "new plane;" Father, Mother, masculine, feminine, the "Impatient"…"God of revelation in traditional Judaism" and "his feminine complement, the *Shekhinah*…the last stage of the world of emanation." 40

With the reconstruction of the *Sefirot*, there is once again a balance of male and female forces; there is unity between *god* and the re-created universe.

Emerging from *Shekhinah* is the *one tree* and it is here that we see the creation of man by *Adam Kadmon*. In the secret tradition of the rabbis, Adam the man is a microcosm of the upper worlds, a divine reflection of the image of *Adam Kadmon* above. In Kabbalah, the sin of Adam is not attributed to his disobedience to God in eating from the tree of knowledge of good and evil, but is the premature separation of the unity of the *Sefirot* tree. Gershom Scholem notes that in "the Original Sin…the fruit was separated from the tree, or as another Kabbalist puts it, the Tree of Life from the Tree of Knowledge." 41 Far from the biblical Christian view, Scholem reveals in detail the esoteric belief system of the Jewish sages concerning these doctrines in the Book of Genesis:

"In the opinion of the Jewish mystics both trees are in essence one. They grow out into two directions from a common trunk…out of the common matrix of the divine world…The sin of Adam was that he isolated the Tree of Life from the Tree of Knowledge to which he directed his desire. Once the unity of the two trees in men's lives was destroyed, there began the dominion of the Tree of Knowledge." 42

What happened before happens again. The *matrix* shatters; the singular tree becomes the tree of "Duality." 43 Now begins the work of *tikkun*. Adam's job was to complete the work of repairing the worlds begun by *Adam Kadmon*. Instead, the "divine light" departed from Adam's soul and the worlds descended into chaos (*tohu*). The female *Shekhinah*, now separated from the masculine, descends again into exile, destroying the *dream of god*:

"And so, it shattered. The very core of reality is G-d's shattered dream, waiting for us to pick up the pieces…The fire of the sun, the air we breathe, the roaring waves of the oceans and all that lives in them; the Earth and the plants and animals that live upon it; even the human flesh, its vital soul and the angels above…all are no more than artifacts of the sparks that fell in the explosion of that primordial world. But the essence of the human being, the breath of G-d within us, that is G-d Himself, gathering, refashioning and piecing back together an impossible dream…it is humankind, not the angels, who can pick it up and reveal it…That the Infinite Light is everywhere is an axiom of the

Kabbalah…held captive within every object…even within evil itself." 44

The concept of shattered and fallen "sparks" comes from the Kabbalah system of Isaac Luria which, as stated above, is still the most influential form of Kabbalah today. The same website quoted above also states: "The most common Jewish liturgy today follows the form of the Ari's custom." Embedded within this system are the secret laws of *tikkun* and *mitzvot*, the main channels through which the "redemption" (*geulah*) will come according to Kabbalah.

The word *tikkun* means reparation, to repair. It is through *tikkun* that the world will be *healed* and brought "closer to the harmonious state for which it was created." 45 The rabbis of Kabbalah believe that the final redemption and the messianic era will only be brought about through *mitzvot*; observing Torah, keeping the commandments and performing good deeds. The word *mitzvot* is defined as: "commandments; one of the Torah's 613 Divine commandments; a good deed or religious precept." 46

The work of repairing the worlds, of restoring the fallen *Shekhinah* to her *king*, and of ushering in the *Moshiach* (Messiah) is now left to man. This is called *raising the sparks*:

"But the essential function of the Law, both of the Noahide law binding on all men and of the Torah imposed specially upon Israel, is to serve as an instrument of the *tikkun*. Every man who acts in accordance with this Law brings home the fallen sparks of the *Shekhinah* and of his own soul as well. He restores the pristine perfection of his own spiritual body…In redemption everything is restored to its place by the secret magic of human acts…every commandment has its mystical aspect whose observance creates a bond between the world of man and the world of the *Sefirot*…Thus fundamentally every man and especially every Jew participates in the process of the *tikkun.*" 47

The *Babylonian Talmud* is the basis for the seven Noahide laws. Sanhedrin 56a of the *Babylonian Talmud* states: **"One additional element of greater severity is that violation of any one of the seven laws subjects the**

Noachide to capital punishment by decapitation." 48 This is another disturbing secret contained in the writings of the Jewish *sages*: Mitzvot for non-Jews or Noahide laws. I mention it here for its close connection to *tikkun.* While Jews, specifically the Jewish *sages*, see themselves as the main conduit of the *light* of *Ein Sof*, gentiles also have a role to play in the *mitzvot* of *tikkun* by "obeying" the seven Noahide laws. I will not list them all here but preeminent among them is the prohibition of idolatry. Therefore, under Talmudic law, if a Christian acknowledges that Jesus Christ is the Messiah, the Son of God, or God manifest in the flesh, he or she is guilty of the crime of idolatry.

The seventh or last Noahide law is the injunction to establish a legal system to execute the other six Noahide laws, which are punishable in the severest extreme by capital punishment. The *Encyclopaedia Judaica*, in its article on "Noachide Laws" states, "Except for the last, all are negative, and the last itself is usually interpreted as commanding the enforcement of the others." 49 While these laws are not yet in effect, they are already considered "binding on all men" and have been written into the legal system under Public Law in the United States:

On March 26, 1991 the U.S. Congress, under the presidency of George H.W. Bush, established the Seven Noachide Laws as Public Law 102-14 in honor of Rabbi Menachem Schneerson, leader of the Chabad-Lubavitch. 50

A website dedicated to the teachings of the Chabad-Lubavitch rabbis confirms:

"The perfection of the world requires the spreading of the seven Noahide commandments…This implies a level of civilized conduct, which can be achieved only when non-Jews also observe their mitzvot. Indeed, the perfection of the world that leads to the Messianic Era requires the spreading of the seven commandments that G-d through the Torah provided for all the nations of the world...See also, the U.S. Congressional Declaration: H. J. Res. 104, Public Law 102-14, March 20, 1991." 51

The Path of the Mystic: Knowledge through Ascension

And no man hath ascended up to heaven, but He that came down from heaven, even the Son of man which is in heaven…And He said unto them, You are from beneath; I am from above: you are of this world; I am not of this world. John 3:13, 8:23

In kabbalistic Judaism the primary work of *tikkun* – the repair of the world – is dependent on the Jewish sages ascending the *Sefirot* tree so they can transmit the *knowledge* of the *kingdom of god* to the nations of the world:

"It is the task of the People of Israel to bring the glory of G-d's kingdom to all of creation, even to the nations of the world…Divine influx…flows into the world through the spiritual leaders of Israel to the People of Israel to the nations of the world to all of Creation." 52

The Zohar teaches that at the separation of the *Sefirot* tree, a chasm was formed between the creation and *Ein Sof*. Everything in the cosmos descended. Therefore, there must be a way to return to the "source" through the portals of the *Sefirot*.

Each sephirah on the tree of knowledge is a gateway through which the "mystic" must pass through on the path of enlightenment. As stated before, these spheres or gateways are designated as *powers*. Through deep contemplation and visualization, the initiate is mystically transported through the "gates" of the *Sefirot*, from level to level, hoping to merit a vision of the *divine*. It is not by chance that this form of contemplative prayer has now entered the Church at a phenomenal rate. This has resulted in an elevation of seeking mystical experiences with God over faith in Jesus Christ, the Word of God.

The word *Zohar* means radiance. The full title is *Sepher Ha-Zohar* or *The Book of Light*. In rabbinic Judaism the *Zohar* is considered "the masterpiece of Kabbalah" and divinely inspired. In Kabbalah, the contemplative practice of meditation is said to draw down the rays of light that emanate from the *Sefirot*. The rabbis explain that, "It is through action accompanied by speech and fervent meditation directed towards a particular thing that a person can draw down a force from above and cleave to that

object." 53 In ascension, the *heavenly visions* of the mystics are invoked through repetition of the *divine* or *sacred names* of the *gods of* Kabbalah. Gershom Scholem explains *prayer* and the *mystic way*:

"**The main path…the mystic way involved the ascent of the soul to a state of ecstatic rapture through a process of concentrated thought and meditation…the…hierarchy of the spiritual worlds reveals itself to the kabbalist in the time of prayer as one of the many Names of God…it is the name of the appropriate *Sefirah* on which the mystic concentrates when reciting the prayers and into which he is, as it were, absorbed… prayer has an aspect of 'inward magic' by which it is empowered to help order and restore the upper worlds…"** 54

The name *Lucifer* means light bearer. The Apostle Paul in 2 Corinthians 11:14 tells us that Satan transforms himself into an angel of light, deceiving today just as he deceived Eve in the Garden of Eden; with knowledge and the prospect of becoming "as God." (Genesis 3:5) The rabbis of Kabbalah believe themselves to be more than mere men, elevated above the rest of humanity; a microcosm of the *Sefirot* of the godhead, which is the macrocosm. Like cause and effect, every action below impacts the worlds above. The Zohar calls this "an unalterable law."

"Now you must know that everything has an inner aspect and an outer aspect. In the world as a whole, Israel, the seed of Abraham, Isaac and Jacob, is considered to be the innermost aspect. The seventy nations are considered to be the outer aspect of the world…There is an unalterable law that the macrocosm [the totality] and the microcosm [the individual] are as like to each other as two drops of water…. through the study of the *Zohar* and the practice of the true wisdom, we can bring about an end to our state of exile and a complete redemption…the redemption of Israel and all the worth of Israel is dependent on the learning of the *Zohar* and the innermost aspect of the Torah." 55

The true "unalterable law" is that all have sinned and fall short of the glory of God. All are in need of the true redemption and salvation that only comes through faith in Jesus Christ, the "true Light." This includes every rabbi and every Jew, from the least to the greatest, as well as every non-Jew. This lie of the superiority of the Jewish race is leading the way in one

of the greatest deceptions in the history of the church; the coming of a false *Messiah* through the Hebrew Roots and Sacred Name movements.

At its inception, the Hebrew Roots movement seemed to begin innocently enough as a means for those wanting to identify with the Jewish roots of their faith. Today it has completely morphed into *another gospel* of works built on the foundation of “Jewish fables” which we are warned about in the Bible. It is common today to hear Christian ministers say that the Jewish people do not need to come to faith in Jesus Christ because they have their own covenant with God. But it is a covenant with death and hell that will not stand (Isaiah 28:18), because it is rooted in the satanic lies of Kabbalah.

Chapter 5

The Dark Chambers of Initiation
Daat, Leviathan, "Six" and Transmigration

Then said he unto me, Son of man, hast thou seen what the ancients of the house of Israel do in the dark, every man in the chambers of his imagery?
Ezekiel 8:12

"Before one can approach the secret of Leviathan one must first be initiated into the secret…the secret of Leviathan has been kept well-hidden by the sages and mystics of Israel for thousands of years. It is only now in our generation that permission has been granted to begin to conceive of its deeper truth and imminent relevancy." 56

"We have learned…that the world is Divinely controlled in all areas except for moral decisions where human beings have been delegated free choice Jews in relation to 613 matters and non-Jews in relation to 7 matters. We have learned that Jews are functionally different from non-Jews in that they have a *neshomah*, a part of G-d Himself; the *neshomah* undergoes a descent into the body for the purpose of an ascent higher than the level it was before its descent…every descent is for a purpose of an ascent…" 57

Despite this elevated god-like status of Jews, Gentiles are encouraged to take part in the *tikkun* of ascent or *aliyah*. Now that the rabbis have been "granted permission" to reveal the secrets of the *Zohar* – no doubt by the *angel of light* – it is permissible for Gentiles to study Kabbalah! 58 We can all do our part in the work towards the *final redemption*. But the way back is not easy. The path of navigating the spirit world is fraught with dangers. There are demons and menacing angels demanding knowledge of secret passwords and sacred names in order to be admitted to the *heavenly mansions*. 59

According to the sages of Kabbalah, very few souls ever reach the ultimate level of complete union with *the divine*. This is because there are "infinite degrees" in the *kingdom* of *Ein Sof*. Only those rare spiritual masters (*tzadikim*) who have attained precise knowledge of the secret names of *god* may enter into the "celestial paradise" of the *Sefirot*. In the pantheon of the *gods* of the *Sefirot* tree, Metatron sits supreme at the top of *Keter*, the *crown*. It is Metatron that the sage mystics encounter "seated on the Throne like God." 60

These things saith He that is holy, He that is true, He that hath the key of David, he that openeth, and no man shutteth; and shutteth, and no man openeth. Revelation 3:7

Another name for Metatron is the Opener, holder of the keys of knowledge. At the center of the universe of the *Sefirot* tree stands Metatron, the opener of the gates of wisdom:

"This is the meaning of the Midrash: "*One celestial creature with its name "Israel" engraved on its forehead stands in the center of the universe*"…Who is this "*One celestial creature with its name "Israel" engraved on it forehead, standing in the center of the universe*...The celestial creature in question here is none other than Metatron…the guiding light for the stimulation of all human knowledge." 61

Although Metatron may be going by the alias *Yeshua*, he is not Jesus Christ. Jesus Christ alone possesses the "key of David." Only Jesus has "the keys of hell and of death" and it is only through faith in Him that anyone can understand the true "mystery of godliness" hidden in Christ Jesus before the foundation of the world. The chamber doors opened on the *Sefirot* tree of knowledge by Metatron lead only to the darkness of the abyss.

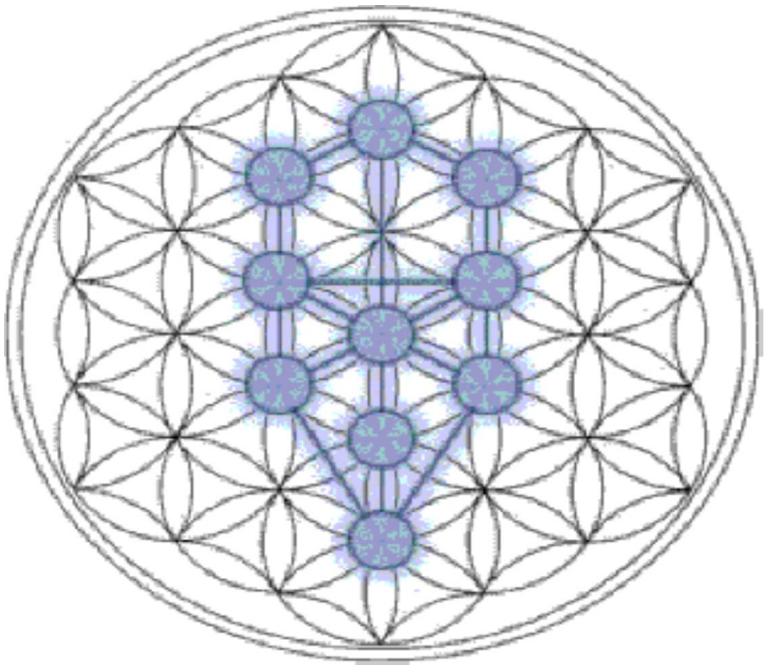
But there were false prophets also among the people, even as there shall be false teachers among you, who privily [secretly] shall bring in damnable heresies…even denying the Lord that bought them….These are wells without water, clouds that are carried with a tempest; to whom the mist of darkness is reserved forever. 2 Peter 2:1, 17

Just as there are infinite degrees of rank within Kabbalah, there are also endless pathways one may ascend on the *Sefirot* tree. In the twisted and never ending quest for knowledge, the pinnacle of enlightenment comes by passing through the darkness. Hidden just below the first three spheres of Keter, Hochmah, and Binah is the sphere of Daat, the abyss that separates the initiate from the *crown*.

"The Abyss and the Veil are two 'obstacles' to overcome when ascending the Tree of Life…Kether, Chochmah and Binah form a trinity, the supernal triad, which resides above the Abyss…Only by riding the mercabah (=the wagon, vehicle) of mystical experience…will he be able to traverse the Abyss and contact the supernal triad…It is said that Daath is the child of Binah and Chohmah…Daath is seen as entering the mysterious blackness. This void or emptiness…ultimately leads to the Brilliance of the White Light of Kether." 62

The word Daat means knowledge, awareness, or connection. 63 In Kabbalah, the abyss of Daat represents mankind's loss of knowledge and it is Leviathan, the "Holy Serpent," who will restore knowledge to humanity. The Jewish sages say that Leviathan is a "Torah-code word for universal consciousness and never-ending knowledge." 64 One contemporary rabbi says Leviathan is "the Light of pure consciousness," and that this "God consciousness" of Leviathan will return "full circle" to "the original light of Genesis." This will come in the form of the "New Torah" at the "ultimate Feast of Knowledge" in *the time to come*. 65

“In the World to Come the righteous will recline with their crowns *in* their heads basking in the pleasure of the radiance of God’s presence.” 66



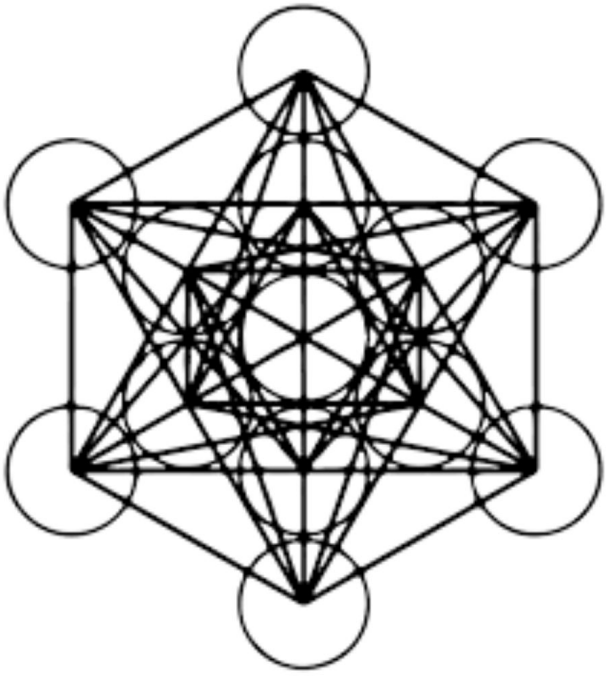
This “Holy Serpent,” say the rabbis, “is the fountainhead, root and essence for all of God’s sacred, revelatory Light.” 67 “The Primordial Serpent, the “snake” of *Gan Eden*, the Leviathan, the penetrating Ray of Light emanating from the *Ain Sof*, and the Supernal *Da’at* of the Godhead, are different dimensions of… Divine Consciousness.” 68

Leviathan is depicted as the ouroboros, the serpent with its tail in its mouth and represents the devouring serpent covering the Earth. It signifies the completion of an age and the return to *Tikkun Olam*, the repair of the world. The Theosophical Society’s website (an esoteric branch of Kabbalah) states, “The area inside the serpent’s circle represents the whole universe and everything in it.” 69

In the book of Job, Leviathan is called “**a king over all the children of pride**.” (Job 41:34) In Kabbalah Leviathan is worshiped as the “Sacred Serpent” and is the “bridge” across the *abyss* of Daat that connects man to the *divine*. But in Isaiah 27:1 the Lord says He will punish the piercing and crooked serpent and slay the dragon that is in the sea. In the cosmology of Kabbalah, the *Sefirot* tree and all of creation is said to emanate out of the cosmic sea of the abyss, destined to return to the nothingness of *Ein Sof*, the *god of forces*:

“[In]…the World to come…Those creatures whose work is complete, now free of their destiny, pass beyond the seventh Heaven of Arabot and rise up out of the vast sea of Creation, crying ‘I AM’ as they ascend through the Abyss-Daat of Azilut and into union with the Crown of Crowns…into the knowing and being of God.” 70

In Revelation 9:1 & 11 we see a beast rising out of the sea of the abyss: "And the fifth angel sounded, and I saw a star fall from heaven unto the earth: and to him was given the key of the bottomless pit…And they had a king over them, which is the angel of the bottomless pit, whose name in the Hebrew tongue is Abaddon, but in the Greek tongue hath his name Apollyon." This bottomless pit is the abyss, derived from the word *buthos* which refers to the sea, the deep, or the mysterious depth. 71



Further in Revelation 13:16-17 we read, “And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads. And that no man might buy or sell, save he that had the *mark*, or the *name* of the beast, or the *number* of his name. Verse 17 tells us that the *mark* is also initiated in the form of the *name* of the beast

and the *number* of his name. Many Christians are unaware that Freemasonry is a branch extending from the tree of kabbalistic Judaism and that the name *Abaddon* is considered a sacred name in Freemasonry.

"*We know still more, viz. that Masonry is a Jewish institution whose history, degrees, charges, passwords and explenations* (sic) ***are Jewish from the beginning to the end…it is impossible to be well posted in Masonry without having a Jewish teacher.*"**
Rabbi Isaac Mayer Wise (1819 – 1900), 32nd Degree Freemason. "America's outstanding Jew and leading rabbi during the 19th Century." 72

In the seventeenth degree…after the candidates have completed the initiation…after revealing the password…and the Sacred Word (Abaddon)…another clue to the true identity of the Masonic Deity is revealed in the Sacred Word of the ritual, ABADDON. 73

It is also well known in schools of Kabbalah that the angel Metatron is closely associated with the number "six." Both the *Sefirot* tree and Metatron's cube contain the six-sided hexagon and are representative of "**the six-sided celestial creature**" Metatron. 74 In Kabbalah Metatron is the spiritual force that is accelerating *the redemption* through the channel of Leviathan, the "holy serpent." As the "holder of the keys," Metatron is the entity who will bring balance to the opposing forces of the shattered *Sefirot* tree, as quoted above, "**The science of equilibrium is the key of occult science…So was revealed the number six, being that of universal creation**." (See footnote 35)

Ever learning, and never able to come to the knowledge of the truth.
2 Timothy 3:7

It has been over 5000 years since the *serpent* first spoke the lie to Eve in the Garden of Eden, "**Ye shall not surely die**…**you shall be as God, knowing good and evil**." From that time until now Satan continues to deceive millions into believing that *knowledge* is the path to life and that *tikkun* – man's good works – is the way to redemption. In Isaiah 14:13 we read that Lucifer rebelled against God, saying *in his heart*:

"I will *ascend* into heaven, I will exalt my throne above the stars of God."

As the “father of lies” and deceiver of nations, it is Satan, the fallen angel Lucifer, that is able to deceive *the hearts* of those who do not love the truth and this is certainly the case with those who teach and follow the mystical teachings of the *Zohar*:

“Da'at or Daas…is a Hebrew word that means Knowledge. In the branch of Jewish mysticism known as Kabbalah, Da'at is the location (the mystical state) where all ten *sefirot* in the Tree of Life are united as one…In the Zohar…Da'at is referred to as “*the key that includes six*.” The “*key*” of Da'at opens *all six chambers* (attributes) *of the heart and fills them with life-force*.” 75

The rabbis of Kabbalah say that in *the time to come* all humanity will *know* the unity of God as *One*; but for now this revolutionary paradigm shift is evolving through the kabbalistic teachings of ascension and the secret of *Gilgul* or transmigration. *Gilgul* means cycle or wheel and is the kabbalistic concept of reincarnation. 76 *Gilgul*, also known as “the law of transmigration,” is a central doctrine in kabbalistic Judaism and is critical in the process of *tikkun*, the repair of the world:

“According to this, everything in the world is constantly changing form, descending to the lowest form and ascending again to the highest…Every man amends his own soul, and by the process of transmigration that of his neighbor. This is a crucial item in the doctrine of the ‘selection’ of goodness from its exile in the spheres of evil…Every living being is subject to the law of transmigration from form to form…We all work, or are at least expected to work, for the amendment of the world and the ‘selection’ of good and evil.” 77

Once again we see the influence of the serpent; exile is not a result of man’s sin, but the means to perfect the fallen creation through man’s ascension. According to Kabbalah, only those who perfect themselves through many lives are selected out of exile. Based on the writings of the *Zohar*, the rabbis of today believe that all of the Patriarchs, from Moses to the prophets, have returned in every generation to assist in the process of lifting the sparks and repairing the worlds through *mitzvos*, or good works.

"Reincarnation may be necessary to complete rectification of all aspects of each level of the soul…As we go, it will become common ground that Moshe received the Torah on Mount Sinai, comprising 613 *mitzvos* (commands) which were to be carried out by 600,000-odd male souls who, together with their wives and children, amounted to three million people. These souls (or their fragments) have been coming back through various *gilgulim* (cycles) ever since, in order to complete those 613 *mitzvos*." 78

As noted previously, Itzhak Shapira in his book, *The Return of the Kosher Pig*, references *The Gate of Reincarnation* to substantiate his claim that Metatron is the Messiah, as presented through the writings of the sages. *The Gate of Reincarnations* is based on the teachings of Rabbi Isaac Luria, the "master kabbalist" and premier sage of contemporary Kabbalah. 79 Hebrews 9:27 says it is appointed for men once to die once, but after this the judgment. Nowhere does the Bible teach reincarnation of the soul, yet today we see Christians seeking the wisdom of the rabbis' "inner Torah" for spiritual direction.

"Every Jewish *neshomah* (soul) in its *gilgul* (life cycle) in a particular body has descended in order to afford it the *opportunity* to do certain specific *mitzvos* and thus realize its potential. Its *yeridah* (decent) is for the sole purpose of a subsequent *aliyah* (ascent) and, as we will see, as everything physical is a reflection of its spiritual counterpart, so it is with everything. Every descent is for the purpose of an ascent…This is staggering information." 80

Staggering information indeed! The Chabad rabbis of Kabbalah tell us that it is Metatron – "**the six-sided celestial servant**" – who dispenses judgments and punishments in the form of ***six*** lifetimes to give each soul "an opportunity to fix him/herself through reincarnation." An article based on the teachings of the *Zohar* from a *Kosher Kabbalah* website explains that every soul arising from the side of the "spiritual force" known as "the Hebrew slave" is allotted "up to six reincarnations to rectify its blemishes, and needs to work and suffer problems and sickness, poverty and confusion until rectified." The article states, "These are the maximum allowed for it to complete all six levels from the place from which it was hewn…The Torah it learns, and the mitzvot it performs, rectifies such a soul." Yet for those enlightened souls lucky enough to be from the higher level of the

Shechinah side of the force and born on Shabbat, this does not apply as, “Certainly this soul will "go out free" of servitude because it is a righteous soul, free of any servitude.” 81

Kabbalah is said to be the “inner soul” of Torah which claims to reveal the innermost hidden aspects of God’s Word. The secret doctrine of *Gilgul* – reincarnation – is the same lie of the serpent in Genesis 3:4-5: “You shall not surely die…you shall be as gods, *knowing* good and evil.” As in the days of the prophets, the rabbis of mystical Judaism continue to blend the dictums of ancient Babylonian worship with the Holy precepts of the Bible, resulting in a departure from truth. In their desperation to establish a “king” for themselves in Jerusalem, they have succumbed to *the lie*. Professing themselves to be wise, they have become fools. They have changed the glory of God into an image of worship and for this reason God Himself has given them over to a “reprobate mind.”

Chapter 6

The Cup of Babylon: Paradigm for the Nations

For all nations have drunk of the wine of the wrath of her fornication… For by thy sorceries were all nations deceived. Revelation 18:3, 23

"After 3307 years, everything necessary has been done. The table is set – and we are sitting at it. The feast of Moshiach is being served with the *Ancient Wine*, the *Leviathan*, and the *Wild Ox*…All that is left is for us to open our eyes and see." (Rabbi Menachem Mendel Schneerson, The *Rebbe*) 82

Throughout all the writings of Kabbalah there is one central theme: That Israel is to be a light to the nations and that in *the time to come* all nations will *know* that *Hashem is One*. According to the rabbis, "It is the task of the Jewish people to teach and disseminate the Torah of the Noahides to all of mankind." In what is being called "The Fourth Revolution," the rabbis say we are now entering a *paradigm shift*; a time of "Mass Torah Study for Gentiles." 83 This, we are told, is a fulfillment of Biblical prophecy:

"I will also give thee for a light to the Gentiles, that thou mayest be my salvation unto the ends of the earth." (A prophecy of Jesus Christ, not Israel; Isaiah 49:6)

"And Hashem shall be King over all the earth; in that day shall Hashem be One and His name one." Zechariah 14:9 (The Israel Bible™) 84

The rabbis of Kabbalah say that the world is now "ready for a global awakening of consciousness." 85 They tell us that this awakening will only come by way of illuminating the nations through *Torah* study – chiefly Kabbalah – and that without this *revolutionary shift* in consciousness, Messiah will not come. But what is Torah? To Christians Torah is simply understood to mean the Holy Scriptures of the Bible. But in today's

Judaism Torah encompasses the Bible as well as the traditions and mystical teachings of the sages throughout time:

"We have entered the age of the innermost aspect of Torah…the secrets of the Torah, that is to say, the Kabbala… we are close to the completion of the last period of the world… From our generation onwards, the words of the Zohar will begin to be revealed more and more until their whole measure is revealed according to the will of G-d."

"Torah – (lit. teaching) (a) The Five Books of Moses (The Bible); (b) the overall body of Jewish religious teachings encompassing the whole body of Jewish law, practice and tradition… If at least the people who are the spiritual leaders of our generation would occupy themselves with the innermost aspect of Torah, the Kabbala, they would draw to themselves a complete light from the *Ein Sof*…" 86

Here again we see that what was once forbidden is now miraculously permitted through the *light* of the *Zohar* as revealed by the rabbis! This awakening of consciousness is nothing more than a global paradigm shift towards the *god* of Kabbalah – *Lucifer* – as the "light" of the nations. What is evident is that this shift of consciousness in Christians represents a contemporary fulfillment of the Apostle Paul's prophecy that in the latter times there shall be a "departing" from the faith by those who do not love the truth, but turn their minds over to doctrines of demons. (1 Timothy 4:1, 2 Thessalonians 2:10)

As also *prophesied* in the satanic *Zohar*, there is occurring among many Christians a shift away from the central focus of Jesus Christ – Who *is* the Word – to another *gospel* that places earthly Jerusalem center stage in the fulfillment of prophecy. As one Israeli news source confidently stated, "Christians are realizing that the Bible is a work that's all about the Jewish people in the Land of Israel and it's taken a long time for this all to crystalize." 87

"…there are spiritual tectonic shifts of historic magnitude happening both within the Jewish people as well as the world around us…One of the most shocking and curious of these shifts is happening within Christianity, as hundreds of thousands of Christians around the world

are connecting to the Jewish roots of their faith, keeping many of the Biblical holidays, Torah commandments, and Jewish rituals." 88

The prophecy of a departing from the faith in 1 Timothy 4:1 was spoken "expressly" by the Spirit to impress in the minds of believers an unparalleled and distinctly noticeable phenomenon. In the same context the Apostle Paul exhorts Timothy to continue in the ministry of "faith and good doctrine," but to reject "profane" fables. (Verses 6-7) The word profane used here is the Greek word *bebelos* and means to *cross over*, as by crossing through a doorway and Paul uses this word specifically and "by implication" to mean not crossing over into "Jewish notions." 89 In his second letter to Timothy Paul states that the time will come when people will "heap to themselves teachers" and will turn away from the truth, and will turn to fables.

For we have not followed cunningly devised fables. 2 Peter 1:16

The Bible says in Titus 1:14 that Jewish fables and commandments of men *turn from the truth*. The word "fable" used in these verses above is the Greek word *muthos* which means fiction, a tale, myth or fable. The word *muthos* is from the word *mueo* which means to initiate, teach or instruct. The word *mueo* comes from the base of the word *musterion*. *Musterion* is the Greek word for *mystery* and means *to shut the mouth*; a *secret* or *mystery* through the idea of *silence* imposed by *initiation* into religious rites. 90

Musterion is the word used in Revelation 17:5 to describe "MYSTERY, BABYLON THE GREAT, THE MOTHER OF HARLOTS AND ABOMINATIONS OF THE EARTH." It is also the word used in 2 Thessalonians 2:7 to describe "the *mystery* of iniquity." At the time Paul wrote his letter to the Thessalonians, he said that this *mystery of iniquity* was already at work but was hidden. Paul said the "work" or energy (*energeo*) of this *mystery* was being restrained, "For the mystery of iniquity doth already work: only he who now letteth (restrains) will let (will restrain), until he be taken out of the way." 91

In verses 3 and 8 of 2 Thessalonians Paul said there will come a *falling away first*, and "then shall that Wicked (man of sin) be revealed…Whom the Lord shall consume with the spirit of His mouth and shall destroy with

the brightness of His coming." Like the *mystery of iniquity*, the mysteries of Kabbalah – once hidden – are now being unleashed on the world and to unsuspecting Christians. Concealed in the counterfeit light of signs and lying wonders, the secrets of Kabbalah are being presented as a way of coming closer to God and becoming like God, but are in reality the spiritual root of a strong delusion.

The Last Paradigm: Blueprint for Mystery Babylon

The gates are now open. The initiation of *illumination* is underway. The *musterion* of Kabbalah is being disclosed on a global scale, resulting in a *falling away* of many Christians into the "Hebrew Roots" of the *Babylonian Talmud* and the demonic doctrines of Kabbalah. From a critical mass of the sea of nations, tongues and peoples the *Moshiach* of the seventh millennium will rise; the *Messiah* of the *Zohar*:

"Thus, from 1840 onwards, permission has been granted for those who truly desire to enter within. The Kabbalah is no longer the private domain of the initiated masters."
(The *Leshem* (1841-1925), master kabbalist) 92

And I stood upon the sand of the sea, and saw a beast rise up out of the sea…and upon his heads the name of blasphemy…And it was given unto him to make war with the saints, and to overcome them: and power was given him over all kindreds, and tongues, and nations…And he saith unto me, The waters which thou sawest, where the whore sitteth, are peoples, and multitudes, and nations and tongues.
Revelation 13:1, 7; 17:15

“In the six hundredth year of the sixth millennium (5600 = 1840 C.E.) the gates of wisdom above [Kabbalah] together with the wellsprings of wisdom below [science] will be opened up, and the world will prepare to usher in the seventh millennium.” *Zohar* (*VaYeira* 117a)

According to the rabbis, this prophecy from the *Zohar* necessitates a convergence of Kabbalah and science that will usher in the *Messiah* and a thousand years of peace. This will result in a restoration of “Adamic Consciousness” when all humanity will *know* the *oneness* of the creation with the creator. In order for this to happen there must be a critical mass of initiates brought into the secrets of Kabbalah through stealth and deception; “nothing less than a worldwide conspiracy.” 93

And the LORD said unto me, A conspiracy is found among the men of Judah…they are turned back…and they went after other gods to serve them.
Jeremiah 11:9-10

“The collective soul of observant Judaism is mostly *unknowingly and unassumingly* becoming saturated with little bits and pieces of Kabbalah – a book here, a lecture or study group there, etc. – until it will reach a point of *critical mass*…The collective Jewish soul, as well as *the world at large,* is *unknowingly being seeded* with kernels of divine knowledge falling from the Gates of Wisdom above…Out of the silicon chips and theories of evolution on one side and from the dialectics of the Talmud…will emerge the Hidden Light of the Supernal Torah. Corresponding to the four alphanumeric digits of the sacred formula of Y-H-V-H these are the reunion of the Twin Messiahs, the resurrection

of the Sacred Serpent, the Feast of Leviathan and the revelation of Metatron." 94

What began as a trickle has become a flood of kabbalistic and Babylonian mysticism into the Church through the process of overlap; "a book here" and a conference there, planting seeds of *another gospel* and *another Jesus*. *The Return of the Kosher Pig* is only one of many such books disseminating Kabbalah into the Church. Christian media is being inundated with teachings and books that contain "code" words in the titles, chapter headings and text that are designed to attract the innate curiosity for secret knowledge that is latent in the human race.

Words are important and according to the Bible words are seeds. When Jesus was tempted in the wilderness, He defeated Satan by speaking the Word of God with authority. Revelation 13:7 speaks of the beast making war with the saints and overcoming them. Just as with Christ, ours is a war of the words of Truth versus words of deception. Jesus said let no man deceive you! *Paradigm, blueprint, ancient wisdom, book of mysteries, secret codes, law of attraction, god's dream, illuminating, secret teachings of all ages, mysteries of the ages, keys to your destiny, unlocking mysteries, hidden keys that unlock doors, encrypted code, your destiny blueprint, sacred name, paradigm shift, quantum shift, quantum physics of heaven, harbinger, ascension*; these are the words that make for bestselling books in today's Christian market. More importantly, these seed-words are the language and building blocks of Satan's counterfeit *kingdom of god on earth* and the *Blueprint* for Mystery Babylon:

"We live in a special time when the entire world is going through very big and rapid changes…As Kabbalists explain, this is a sign that the world is approaching the general correction…*The only remaining obstacle is language*. If we do not speak the same language, it is difficult to communicate because we are still in Babylon. The ancient Babylonians started with one language, then began to speak different languages, and as a result, ceased to understand each other. We, accordingly, have to come from many languages to one…the shattering, which occurred in the ancient Babylon and is being revealed only today, manifests even more clearly. This will further push us to unite.

After all, we have to return to Babylon so that the entire world becomes one village." 95

According to Rabbi Michael Laitman quoted above, all of humanity is one "Ancient Babylonian Family" that must unite and return to Babylon through the "language" and "light" of Kabbalah. Relating to the current state of civilization and referencing the Creator as a *force*, he states, "Today, having "departed" from Babylon 3,500 years ago, we again feel that we are back in the same place, in ancient Babylon…We have to be connected with the Creator in our studies and activities. The Creator, the force of the Light, the property of bestowal, that corrects us and without whom we are unable to cope with the task, has to be implied in everything we do." 96

In denouncing the evils of society and proclaiming the solution to *rectification*, the rabbis of today echo the voices of those who came before them. They say our only hope is in the study of "inner" Torah – Kabbalah – and that this will bring *light* to the nations and *unity* to mankind. One of Judaism's most revered rabbis of the medieval period, Maimonides, is quoted as saying that in the messianic era of *Moshiach* "all the nations of the world will be preoccupied studying the deep kabbalistic insights of who God is and what God is…in a world that is just and a world that is at peace." 97

"The Tree of Life is viewed as a graphic representation of the blueprint of creation." 98

"Some things which have required faith to believe will no longer require faith, for it will be proven to be scientific fact." (*Quantum Faith*) 99

The so called *science* of Kabbalah is said to contain the ancient "***Blueprint***" that reveals the secrets of the universe. It is the *key* that unlocks consciousness to the awareness of *oneness* between creation and the creator. According to Kabbalah, the source of this interconnection of all things is the *light* of *Ain Sof* that emanates from *Kether*:

Kether is the first manifested Sephirah, the first condensation of the light of Ain-Soph. Kether means 'the Crown'…"Kether is the source of light rising up from the darkness. It is a monad of pure energy…In Kether is the blueprint of the entire universe." 100

As in Kabbalah, today's science of quantum physics is the study of the *interconnectedness* of all things. Matter and energy are said to be held together in a unified field of light. In simple terms, quantum physics is the observation of "invisible" particles – atoms, electrons, monads, quarks, super strings, frequencies, vibrations – in another dimension and the effect of those particles on the material world *by the observer*. Because everything is made of atoms, we are all *one* at the sub-atomic level. We are all part of this *force of light* that connects and holds everything together. Thus, it is said the new science of quantum physics will *prove* what Kabbalah has always taught; that *god* is in every person.

Son of man, say unto the prince of Tyrus, Thus saith the Lord GOD; because thine heart is lifted up, and thou hast said, I am a God, I sit in the seat of God…yet thou art a man, and not God, though thou set thine heart as the heart of God. Ezekiel 28:2

Quantum *science* appears to be a manipulation of forces in the invisible spirit world by *observer-participants* in the physical, material world, be they scientists or mystics. The Apostle Paul warned in 1 Timothy 6:20 about the spiritual deception behind "science falsely so called." New Age teachings of false science have been making steady inroads into the Church for years through books like *Quantum Faith*, *Quantum Spirituality*, *The Physics of Heaven* and more recently, *The Paradigm*, which the author claims to be a blueprint of mysteries connecting past and present events. What is not widely understood is that the root of every New Age concept and term can be traced to ancient Babylonian mysticism and kabbalistic writings, especially in the area of occult science. The same can be said of Freemasonry with its rites, initiations, sacred passwords and symbols.

Johannes Buxtorf, known in the 16th century as the "Master of the Rabbis," wrote the *Lexicon of the Talmud* in which he "defines the ***Kabbalah*** to be a ***secret science***, which treats in a mystical and enigmatical manner of things divine, angelical, theological, celestial, and metaphysical; the subjects being enveloped in ***striking symbols*** and ***secret modes of teaching***. Much use is made of it in the advanced degrees, and entire Rites have been constructed

on its principles. Hence it [Kabbalah] demands a place in any general work on Freemasonry." 101

The role of Freemasonry and its connection to Kabbalah cannot be underestimated as a major contributor in the global initiation of the masses. Long before the current flood of mysticism into the Church, New Age occultist and channeler of demons, Alice Bailey, wrote about the future research into atomic particles and its impact on the basic doctrines of Christianity, as science would prove the unity and oneness of mankind and all creation. Her blueprint image of the Hierarchy of ascended masters and their lodge on the spiritual plane is just another configuration of the *Sefirot* tree of Kabbalah which is now breaking through the veil to the world we live in. The *new* discoveries in quantum physics are the externalization and manifestation of those entities.

Bailey called this release of atomic energy a "saving force" that will "bring about an entirely new economic world structure." Bailey noted that "planetary initiation" and the soul's "liberation" will come through the discoveries of atomic energy, as well as investigations into light, color, and the "magic" of sound (vibrations) as a creative energy; all aspects of so-called quantum science. She also stated that "adjustments" would be made so that "At the head of certain of the great occult groups, of the Freemasons of the world, and **of the various great divisions of the church**…will be found initiates or Masters," adding that this *work* was already underway. 102

Just like Kabbalah, Bailey's Theosophy incorporates the necessity of global initiation in order to bring forth the "Lord of the World," also known as *Metatron*. Like Kabbalah, initiation takes place through a radical *shift* in consciousness, resulting in a new paradigm or worldview. According to Bailey the "link" between the spiritual and physical planes is human consciousness and it is important to quote her here, as the initiation process in Theosophy is an exact mirror image of that in Kabbalah:

"At all initiations the Lord of the World is present…the flashing forth of the *star* before the initiate is the signal of His approval…At the sixth initiation, the initiate, functioning consciously as the love-aspect of the

***Monad*, is brought (via his "Father") into a still vaster recognition, and becomes aware of *that Star* which encloses his planetary *star*, just as *that star* has earlier been seen enclosing his own tiny "*Spark*"…His *oneness* with his brothers is *proven*, and he realises *the indissoluble link which binds him to his fellow-men everywhere*. Brotherhood is no longer a theory but a *proven scientific fact*…He realises the meaning and *source of energy*, and can begin to wield power with *scientific accuracy* and direction."** 103

This is the great *mystery* of the *Star* which is *Metatron's* cube: the "**six-sided celestial creature**" and the *Yeshua* of Kabbalah who holds all things together with his number "**six**" of "**universal creation**." This is the "**key**" of the occult "**science of equilibrium**" that will bring all things into the balance. This is the "**secret**" link that binds together the divine *Sparks* of humanity to the *source of energy*, the *light* of the "Lord of the World" of the *final redemption*.

The main purpose of Kabbalah is to achieve a direct *experience* with the *divine*, revealing to the initiate the *light* of the creator and the *oneness* of creation. The false prophets say that when the world will see the *light*, things that once required faith will no longer require faith. This is the *gospel* of Kabbalah. But Hebrews 11:6 says without faith it is impossible to please God.

Chapter 7

The Return of the Kosher Serpent

Take heed therefore that the light which is in thee be not darkness. Luke 11:35

Just how Satan will attempt to achieve this global shift in consciousness into *the light* is not clear, but based on the prophecy of the *Zohar* the convergence of Kabbalah and science is the "key" in returning the nations to Babylon. What is clear is that the *light* of Kabbalah with all its occult branches is not the true light of God, but that of Lucifer.

"Albert Pike is yet another well-respected Mason avowing the central place of cabala within the craft. He wrote: "Masonry is a search after Light. That search leads us directly back, as you see, to Kabalah…not only is cabala 'the key of the occult sciences', but that this key turns on *the secret science of numbers*." 104

We have seen how the new *science* of quantum physics will play a role in the self- fulfilling prophecies of the *Zohar*. Now we will look closer at the identity of the *one* who is to restore the essential unity of the nations through the *light* of Kabbalah. The rabbis teach that the connecting force of creation is the *light* that emanates from *Ein Sof.* Another secretly shared tradition of the rabbis is that the serpent (*nachash*) that deceived Adam and Eve in Genesis 3 is considered *sacred* and was to be a partner with Adam in the *tikkun* or repair of the shattered dream of *Ein Sof.* This *sacred* serpent of light is referred to as the "kosher serpent" that will rise from the ashes as *Moshiach* and assist humanity through technology in the process of *rectification*.

"Furthermore, the original *Nachash* was completely "kosher"…This is especially true of the *Nachash*, for under Adam's subjugation it had a very sacred mission to perform…it was to be a partner with Adam in bringing about the final *tikkun* – completion and transformation – of all

Creation…The power of the original, kosher *Nachash* turned evil…Is it possible that this bizarre life form, after having gone "underground" and lying dormant for thousands of years, is preparing to rise again from the dust of its curse?...As prophesied in the *Zohar*, however, the two greatest forces for spiritual and physical planetary change – Adam and the *Nachash* – were destined to meet again in a prophetic rendezvous…Along with the curse of humanity, the curse and the enmity of the *Nachash* is also being removed." 105

"The essence of the *Nachash* <u>is</u> *Mashiach ben Yoseph*!" 106

This secret doctrine that the serpent will become *kosher* again is based on the rabbinic writings of the *Babylonian Talmud* and the Midrash; the same sources Shapira cites to build his foundation for the coming *new Torah* and the return of the *kosher pig* in the world to come. These prophecies are dependent on divination using the occult numerology system of *gematria*; "the secret science of numbers." According to the sages, there is a secret rabbinic formula which reveals the numeric equivalency between the *nachash* and the *Moshiach* of Kabbalah, as explained by Rabbi Joel David Bakst:

"There is a well known, yet confusing, rabbinic formula that points out that the words *nachash* (serpent) and *mashiach* (messiah) share the identical numerical value." 107

Bakst explains that this secret of the "Holy Serpent and its role in Torah cosmology" has "always been known to the sage-mystics of the Talmud, Midrash and Zohar." 108 Emphasizing that illumination is necessary to understand this mystery, he quotes the late master kabbalist, Rabbi Elyashiv, also known as the *Leshem*:

"Prior to Adam's collapse the *Nachash* was not yet composed of the actual essence of evil…Its root was the *Holy Nachash*, which exists in the highest transcendent state of holiness (lit., "*Holy of Holies*")…The Holy [macro] Serpent is the fountainhead, root and essence for all of God's sacred, revelatory Light…This [serpent] is the secret of the

Cosmic Balance…Its root is from the penetrating and surrounding Light of the *Ain Sof*." 109

The secret of the *kosher serpent* is cryptically and purposefully concealed in occult language that is similar to the so called science of quantum physics, advancing the idea that all things are connected. In Kabbalah the *microcosm* (man below) is merely a *fractal* (a part) of the *macrocosm* (the serpent above). As quoted previously, the *unalterable law* of Kabbalah is that the macrocosm and the microcosm are as two equal drops of water. This is what is conveyed in the occult axiom "*As Above, So Below*" or to state it plainly, it is the lie, "Ye shall not surely die…ye shall be as God, knowing good and evil."

Because everything is connected, matter and spirit exist in one continuous reality, an "endless spectrum of Divine Consciousness." 110 This conscious singularity, constantly expanding and contracting from evil to good and from darkness to light, is *Ain Sof*, the *god* of Kabbalah. Interwoven into this twisted *Torah* script is *Metatron*, the *Messiah* of the kabbalists, and the *kosher serpent* – whom the rabbis say will return but whom Jesus Christ in Revelation 12:9 calls the *great dragon*, that *old serpent*, the *Devil* and *Satan* which deceives the whole world.

The *Sefer Yetzirah* (The Book of Creation) is the earliest known text in Jewish Mysticism and states the following:

"In two and thirty most occult and wonderful paths of wisdom did JAH the Lord of Hosts engrave his name…Ten are the numbers of the ineffable Sephiroth, ten and not nine…conjoined, even as is a flame to a burning coal: for our God is superlative in his unity…He fixed these as testimonies…the twelve constellations rulers of the world, the *Dragon* (THELE) Tali which environs [surrounds] the universe, and the microcosm, man…Tali, the Dragon, is above the Universe, as a king on his throne…" 111

The secrets of Kabbalah that are being disclosed by the rabbis are nothing less than astonishing! Yet this is exactly what God said would occur concerning the false leaders of Israel. In Jeremiah 29:8-9 God spoke

through the prophet Jeremiah to the captives of Babylon saying, “Let not your prophets and diviners, that be in the midst of you, deceive you…For they prophesy falsely unto you in my name: I have not sent them, saith the Lord.” God compared these false prophets to rotten figs that cannot be eaten. The Lord Himself said that He was a witness against them and because of their lying words spoken in His name they would be a curse, not a light, to all nations!

And I will persecute them with the sword, with the famine, and with the pestilence, and will deliver them to be removed to all the kingdoms of the earth, to be a *curse*, and an *astonishment*, and an *hissing*, and a *reproach*, among all the nations whither I have driven them: Because they have not hearkened to my words, saith the Lord. Jeremiah 29: 18-19

In Genesis chapter three the word serpent is *nachash* and means a snake (from its hiss). It also means to *whisper* a (magic) spell, to prognosticate, to divine, enchantment and to learn by experience; i.e. initiation. In Kabbalah the *nachash* is also called the *shining one*. Throughout the centuries, the mystic sage rabbis have incorporated the use of divination to equate the *nachash* (serpent) with *Moshiach* (Messiah), just as Itzhak Shapira has relied on *gematria* to equate *Metatron* with *Yeshua* and *El Shaddai*. In the cosmological order of Mystery Babylon, built on the foundation of Kabbalah, the *kosher serpent*, the *dragon* and *Metatron* are *one,* inseparably connected by the *light* of *Ain Sof* and this is a well known secret!

“Another astounding secret that is revealed is that the Teli [serpent] is the Moshiach (Messiah), often referred to as the Holy Snake (Nachash Ha’Kodesh), as the Hebrew words “Moshiach” and “Nachash” share the same Gematria (numerical value) of 358. So the Moshiach is the Pole Serpent. Since the association of Teli has already been made with the Pole Serpent, and the Pole Serpent with Draco [the dragon], and Draco with Zeir Anpin; it is now clear as to the fact that Metatr-n, the Angel who governs Zeir Anpin, is “the likeness before the Holy One Blessed Be He.” Since Moshiach is interconnected with Angel Metatr-n, it is now also clear as to whom is depicted as the Young Man with

locks (peyot and a beard), which then leads to the connection with the Primordial Torah." 112

The Primordial Torah referred to above is the *oral Torah*. It is Satan's *blueprint* which has been concealed until the necessary time according to the prophecy of the *Zohar*. This timeline – initiating the debut of the *Moshiach* and the return to all things *kosher* – is based on yet another mystery entwined in the synthesis of Kabbalah and technology that is to accelerate the *redemption*. So guarded was this secret that 18th century kabbalist, Rabbi Eliyahu, wrote in his commentary on the *Zohar* concerning the *Final End*, "I adjure the reader in the name of the God of Israel not to reveal this." 113

In the *macro-micro* universe of Kabbalah the original six days of creation represent a *macrocosm* of earth's six millennia of history, which is reflected in the *microcosm* below. Space and time are said to be one seamless continuum, albeit a fractured one. Because of the fall, creation is broken into dimensions called fractals. Thus, creation and the *final redemption* are mirrored in time. Just as the *kosher* serpent was to be Adam's partner in the *tikkun* of a utopian Eden, the events of Genesis are to recur on the "*macro-micro* timescale" of Kabbalah: man and beast working together to usher in the *Moshiach* of the millennial utopia:

"What is clear, however, is that together scientific discovery and technology are an actual living entity with a collective consciousness of its own. It is a "beast" – and a very powerful one. It is the "King of Beasts"…The *TechnoSerpent* has risen from the dust, and Adam's higher consciousness will, directed by the providential force of Mashiach ben Yoseph, ride it out to the finishing line of the Sixth Millennial Day…into the Seventh Cosmic Day of Creation – a real and fully rectified higher dimension of existence and consciousness." 114

From the very beginning of creation, God has warned His people of the subtle ability of the serpent to deceive. The Word of God tells us in Genesis 3:14 that God has cursed the serpent above every beast of the field. By the seed of the woman, the head of the serpent has been bruised. Through the cross of Christ, Satan is truly a defeated foe, yet his greatest aim and desire

remains to be like God and to be worshiped as God and he accomplishes this through deception. Of all the *secrets* of Kabbalah currently being disseminated, none is more ominous than the attempt to distort the Word of God and stamp out the name of *Jesus Christ*. As spoken by the Apostle Peter in Acts 4:10-12, "Jesus Christ of Nazareth…whom God raised from the dead…This is the stone which was set at nought of you builders, which is become the head of the corner. Neither is there salvation in any other: for there is none other name under heaven given among men, whereby we must be saved."

In Matthew 21:42-43 Jesus spoke of himself as fulfilling this prophecy, saying to the chief priests and Pharisees, "Did ye never read in the scriptures, The stone which the builders rejected, the same is become the head of the corner: this is the Lord's doing, and it is marvellous in our eyes? Therefore say I unto you, The kingdom of God shall be taken from you, and given to a nation bringing forth the fruits thereof."

Jesus Christ is the fulfillment of the prophecy of the Psalmist, the chief cornerstone of the Temple and the only *gate* through which the righteous may enter by faith in Him:

Open to me the gates of righteousness: I will go into them, and I will praise the LORD: This gate of the LORD, into which the righteous shall enter. I will praise thee: for thou hast heard me, and art become my salvation. The stone which the builders refused is become the head stone of the corner. This is the LORD's doing; it is marvellous in our eyes. Psalm 118:19-23

Hebrews 1:3 says that Jesus Christ is the *brightness* of God's glory and the *express image* of the Majesty on high. The *light* of Kabbalah is the counterfeit light of the *transforming* angel. Therefore it is no great thing if his ministers also transform themselves into ministers of righteousness. (2 Corinthians 11:15) Through sorcery and the divination of Kabbalah, Satan has sought to manipulate the Word of God, usurp the name of Christ, and assume the image of Jesus, which will be shown in the next chapter.

Chapter 8

Tetragrammaton: The Name, the Number, the Image

I am come in my Father's name, and ye receive me not: if another shall come in his own name, him ye will receive. John 5:43

But if our gospel be hid, it is hid to them that are lost: In whom the god of this world hath blinded the minds of them which believe not, lest the light of the glorious gospel of Christ, who is the image of God, should shine unto them.
2 Corinthians 4:3-4

"That the Infinite Light is everywhere is an axiom of the Kabbalah, but the Ari made that light immanent, almost tangible, by declaring it to be held captive within every object, every event, even within evil itself… But to piece together all that infinity and reconnect it to its source—for that, we must have access to the *encryption code* of the manufacturer. Which is exactly what we were provided when we received the Torah at Mount Sinai." 115

The real secret of every secret religion or secret society is that there is an exterior level of worship for the people of the group and a concealed level for the initiated members of that same group. The exoteric form is for the masses, while the esoteric is held in the strictest confidence until the time required. According to the prophecy of the *Zohar*, the time has come for global initiation into the secrets of Kabbalah, as humanity is now in the "footsteps" or "heels" of *Moshiach*, the time of *Ikveta DiM'shicha* when all will *know divine connection* with the *creator* through the *sacred name*.

"This period is designated the *ikvot*/heels (i.e., "footsteps")…all the conditions for the final redemption are brought about in a roundabout manner. This is based on the meaning of the root *akev*…because of its etymological affinity with *akef*, "to circumvent," means "to deceive." The redemption process must proceed in a circuitous manner in order

to deceive the "shells of impurity" [the *external forces*] and prevent them from interfering." 116

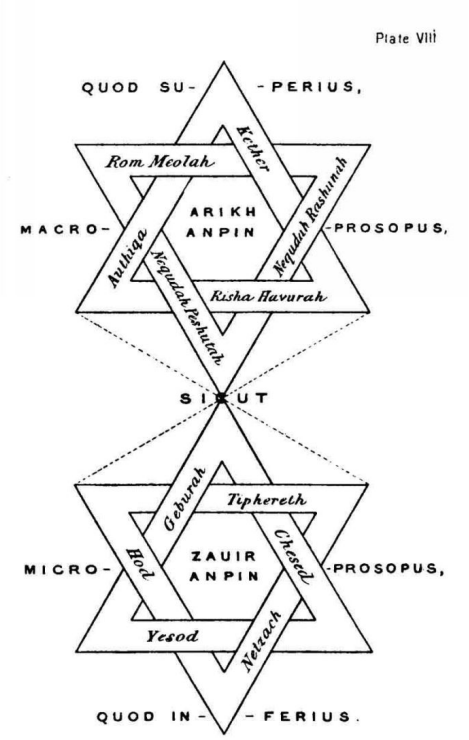
In Kabbalah, the entire cosmological order – from creation to the *final redemption* – is based primarily on the number "six." Concealed in the writings of the *Zohar* are a myriad of numeric equations which must be ciphered and decoded using gematria. The system is based on letter/number combinations of the Hebrew and Chaldean alphabet of ancient Babylon. There are endless methods of arranging letters, all for the purpose of confusing the uninitiated; just as *Babel* and *Babylon* mean *confusion* through mingling.

The late British occultist, S. L. Macgregor Mathers, translated several books contained within the *Zohar*. One of these was *The Book of Concealed Mystery*. In the 1912 edition of his book, *The Kabbalah Unveiled*, Mathers states the following, "As in the present work a great number of Hebrew or Chaldee words have to be used in the text…There are no separate numeral characters in Hebrew and Chaldee…*every word is a number, and every number is a word*…and on this correspondence between words and numbers the science of Gematria (the first division of the so-called literal Qabalah) is based." 117

Mathers also relates that in the "Unwritten Qabalah" there are secrets that have never been committed to writing but are only passed down orally, especially the secret of the *divine name* – IHVH or YHVH – which he notes is "a most **secret arcanum**, and is a **secret of secrets**," and that it is "the name which rusheth through the universe." 118 From these statements and other similar sources, we can understand – and should understand – that there is a hidden esoteric meaning contained in the name of the deity of Kabbalah.

Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is Six hundred threescore and six. Revelation 13:18

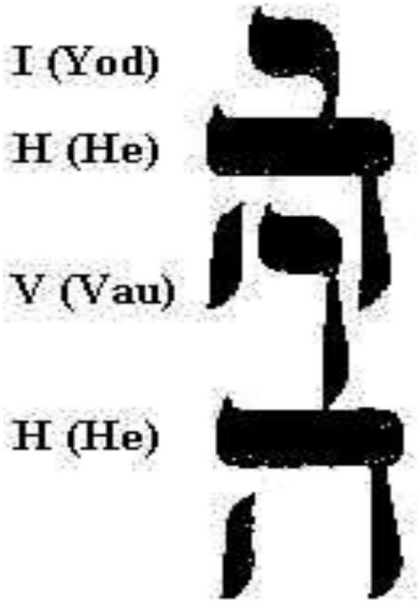
In the cosmology of the *Sefirot* tree there is a six-sided cube or hexagon located just above the tenth sephirah, *Malkut*. As noted previously, *Malkut* is the material earthly kingdom, the *kingdom of god* on earth. This hexagon above *Malkut* is comprised of the six lower sephirah which are *Hesed*, *Gevurah*, *Tiferet*, *Netzach*, *Hod*, and *Yesod*. At the top of the hexagon is the hidden sephirah of *Daat* or knowledge. These seven sephirah form the *Zeir Anpin* or the Small Face, also known as the Lesser Countenance or Microprosopus. In Kabbalah this is *Metatron's Cube* and as we have seen, *Metatron* is called the Lesser YHVH. This is the construct or blueprint of the macrocosm/microcosm universe of the kabbalists. At each of these sephirah stands six entities or *light-bearers* but it is *Metatron* who guards the way to the *tree of life*.



"Metatron, as a Shekinah Diety, is the Divine Voice of YHWH, divine speech of the Holy Spirit…This Face of God, the *Almighty*, is also known as the "lesser YHWH" and *Metatron*…Metatron is the "keeper of the way" to the Tree of Life. From the Zohar." 119

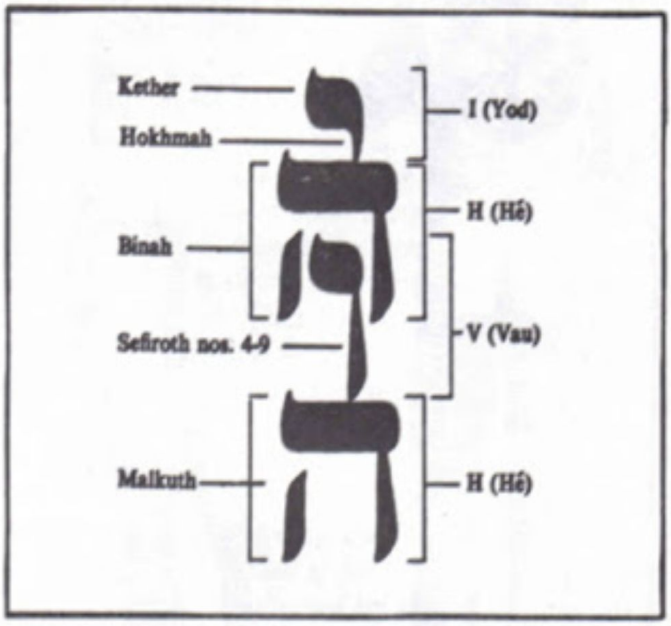
In the system of Kabbalah the spheres that make up the *Sefirot* tree are viewed as ten literal dimensions or spiritual planes. These ten dimensions constitute what is called "the *Shiur Komah*, the "Stature of the God-Image," *Adam Kadmon*, the "Archetypal Man." 120 Just above the *Zeir Anpin* hexagon sits *Arik Anpin*, or Macroprosopus. This is the Vast Countenance or the Limitless Face, the Crown of *Keter*, the Head of the ten heads of the *Sefirot* image. *The Book of Concealed Mystery* reveals that the entire *Sefirot* tree is the *god-man* image of the primordial *Adam Kadmon*, the first emanation of *Ein Sof*.

"The whole ten Sephiroth represent the Heavenly Man, or Primordial Being, ADM OILAH, *Adam Auilah*…In their totality and unity the ten Sephiroth represent the archetypal man, ADM QDMVN, *Adam Qadmon*, the Protogonos." 121



The word Protogonos here speaks of a *deity* because in Kabbalah *Adam Kadmon* is the creator of the earthly Adam, as discussed above. This *god-man* image of the heavenly *Adam Kadmon* is also known as the *Divine Presence* which manifests or reflects itself in all the spiritual dimensions of

the *Sefirot* tree through the *divine* name YHVH, the Tetragrammaton. Thus the Microcosm hexagon image *below* is a reflection of the Macrocosm image *above – As Above, So Below –* based on the numerical value of the number "six" which, according to the *Zohar,* is the number of the man, *Adam Kadmon*.



“Microprosopus is as it were the reflection of Macroprosopus, for as Macroprosopus has six principal titles, so is Microprosopus composed of six of the Sephiroth…ShITh, Shith, is the Chaldee form of the Hebrew ShSh, *Shash*, six.” 122

As *Adam Kadmon* is the *creator* of earthly Adam, man is also a reflection and extension of the *heavenly* man, the *perfected god-man image* of the Tetragrammaton:

“Now it must not be forgotten that these forms in Ezekiel's vision support the throne of the Deity, whereon the Heavenly Man is seated--the Adam Qadmon, the sephirotic image…And "the mystery of the earthly and mortal man is after the mystery of the supernal and immortal One;" and thus was he created the image of God upon earth. In the form of the body is the Tetragrammaton found. The head is I, the arms and shoulders are like H, the body is V, and the legs are represented by the H final. Therefore, as the outward form of man corresponds to the Tetragrammaton, so does the animating soul correspond to the ten supernal Sephiroth…This perfection upon earth is relative to the universal soul of the earth (*i.e., as the macrocosm or greater world, so the microcosm or lesser world, which is man*).” 123

In Kabbalah the Tetragrammaton is regarded as the *divine name* and is composed of the four Hebrew letters Yod, Hé, Vau, and Hé, spelled as YHVH or IHVH. Written vertically, the Hebrew letters take the form of the *Sefirot* tree in the image of a man representing the heavenly *Adam Kadmon*. As quoted above, the letters I, H, V and H represent the different parts of the image. The letter V (Vau) has the numerical value of 6 which corresponds to the six sephirah which form the six-sided cube or hexagon of Microprosopus. The final H (Hé) represents Malkut, the *Bride* of Microprosopus, who is *Metatron*, the *god of this world* posing as the *Logos*.

"Just so, Malkuth is the 10th Sephiroth, but as the "Bride of Microprosopus" or Tetragrammaton, who is hexamerous – Malkuth, or the material limb, is the seventh.

She is the fourth letter IHVH, or He, but the Logos, or son, is only the letter V (Vau)…Microprosopus – Tetragrammaton – the "Son" or Logos, is the triangle in a square…the six-faced cube." 124

To clarify, in Kabbalah Microprosopus or *Metatron* as the "Son" or "Logos" is the result of sexual union between *Chokmah* and *Binah*, the *divine father* and *mother* and the first two emanations of *Keter*, the crown. The *bride* of *Metatron* is collective Israel in the kingdom of *Malkuth*, the *kingdom of god* on earth. The *bride* – mankind – is perfected in the image of the Tetragrammaton through *knowledge* and *ascension* of the six-sided cube, the *V* or *Vau* whose number is 6:

"The Tetragrammaton IHVH is referred to the Sephiroth, thus: the uppermost point of the letter Yod, I, is said to refer to *Kether*, the letter I itself to *Chokmah*, the father of Microprosopus; the letter H, or "the supernal *He*," to Binah, the supernal Mother; the letter V to the next six Sephiroth, which are called the six members of Microprosopus (and six is the numerical value of V, the Hebrew Vau); lastly, the letter H, the "inferior *He*," to Malkuth, the tenth Sephira, the bride of Microprosopus." 125

In his book, *The Kabbalah Unveiled*, Mathers notes that, "The Book of Concealed Mystery is the book of the equilibrium of balance." 126 This equilibrium of balance is man's realization of his *divine* constitution through comprehension of the universal number ***six*** of creation. The *Zohar* states, "So, then, as man is a ***microcosm***, a copy or ***paradigm*** of the universe, he is in his constitution ***a reflection of the divine nature***, the Supreme Wisdom. The ***nephesh and ruach are the two angles at the base of a triangle and with that of the apex form a whole or perfect figure***…he becomes holy and divine, because he then begins to conform himself to ***the image*** or likeness of the Holy One… ***symbolized by the hexagon***, that indicates the harmony and union of the higher and lower self with the Divine…***This union with the Divine is the mystery of all mysteries***." 127

Rabbi Eliyahu, also known as the Gaon of Vilna, was regarded among his 18th century contemporaries as a genius in the art of gematria divination. In his commentary on the *Zohar* he is quoted as saying, "the number 666 contains hidden within it exalted and lofty messianic potential." 128 The following rabbinic quote elaborates on the Gaon's *genius* and the centrality of the number six in the cosmology of the *Zohar*:

“**We do know that the number six represents the physical world. The Torah describes the creation of the universe as a six part, six day, process. Our ancient sources describe the universe as emanating in six directions -- north, south, east, west, up, down…All physical space and all physical objects have these six dimensions…666 is six repeated three times. Repeating a concept three times represents the affirmation and strength of that concept. The number 666 could thus represent the strength and perfection of the physical world, which Judaism teaches will occur in the messianic era, when the physical world will reach its ultimate purpose, to be a vehicle through which the *created* experience the Creator.”** 129

The Gaon of Vilna is also noted to explain that the letter V (Vau) of the *divine name* Tetragrammaton “is the collective channel that connects the lower and upper realms.” 130 The numerical value of “6” in the letter V of the Tetragrammaton – IHVH or YHVH – as revealed in the gematria of Kabbalah is symbolic of *hieros gamos* and the result of the sexual union of the *divine father* and *mother*, producing the Vau (V), the Microprosopus, the six-sided, six-faced cube of *Metatron* through which man must pass to reach his *divine* potential. Ascending the Tetragrammaton, the *illumined* initiate – having his conscience seared as with a hot iron – is mystically sealed with the sign of Macroprosopus.

“But *Vau*, V, is produced by *adding* the numerical values of I and H (the father and the mother of the Tetragrammaton), and then taking the *last number* of the result, thus: I + H = 10 + 5 = 15, and by adding the digits of 15 together, 1 + 5, we obtain 6 = V, *Vau*. By the phrase ‘with H, *He*, the pentad (5), with V, *Vau*, the hexad (6), ascend,’ is implied the numerical value of those letters *taken as symbolical sephirotic glyphs*.” 131

“Therefore, then do they ascend within the equilibrium…But behold, how in balanced power ascend the letters of Tetragrammaton.” 132

In addition to the nine spheres of the *Sefirot* tree, the cosmology of Kabbalah divides the universe into four worlds or elemental realms. These are Atziloth, Briah, Yetzirah, and Asiah. The four letters of the

Tetragrammaton represent and correspond to the four elemental forces of earth, air, fire and water which are believed to contain the principle material of all things visible and invisible.

"Now, there are four secret names referred to the four worlds of Atziloth, Briah, Yetzirah, and Asiah; and again, the Tetragrammaton is said to go forth written in a certain manner in each of these four worlds…Here then we have the four worlds--Atziloth, the deific form; Briah, the throne; Yetzirah, the firmament; Asiah, the kerubim. Therefore the kerubim (cherubim) represent the powers of the letters of the Tetragrammaton on the material plain; and the four represent the operation of the four letters in each of the four worlds. Thus, then, the kerubim are the living forms of the letters, symbolized in the Zodiac." 133

This kabbalistic creation myth – that everything was formed from a subtle ethereal substance – is the core teaching of Babylonian and Egyptian mysticism. Comparing the *Zohar's* creation myth with that of the Egyptian *Emerald Tablet*, the author of *The Kabbalah Unveiled* notes:

"That which is below is like that which is above, and that which is above is like that which is below, for the performance of the miracles of the *one substance*." This is the fundamental principle of all the ancient mystic doctrines, whether qabalistical, mythological, alchemical, or magical; and in this formula all are contained. As is God, so is the universe: as is the Creator the Supernal Man, so is the created the inferior man; as Macrocosm, so Microcosm; as eternity, so life! 134

Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after Christ.
Colossians 2:8

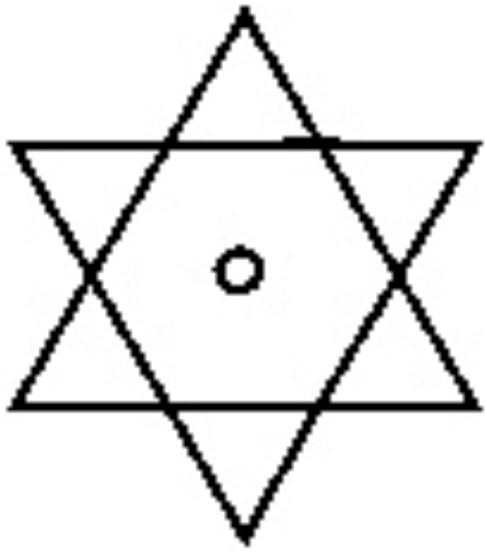
Unlike the Genesis account of creation, the kabbalists relate that from the ethereal substance of the four elements *Ein Sof* made *engravings* which issued forth from the forehead of *Keter* or *Adam Kadmon*. Within this kabbalistic doctrine of creation is concealed the mystery of the seal or the

sign, the engraved *mark* symbolized in the four elements of the Tetragrammaton coursing through the spheres of the *Sefirot*:

"In each human being we find a model of the universe as well as a model, a copy, of the *Deus revelatus*, the *Sefirot*…Within *Keter* are the "engravings," or code, for everything that is to be. These engravings, as the *Zohar* calls them, are the potential for all that is to unfold in the world of divinity, or the *sefirot*…*Keter* is the vehicle whereby the divine is activated, whereby the engravings begin their transition from potentiality to actuality…according to the *Zohar*, we can know one thing that *Ein Sof* did, that is, that *Ein Sof* "made engravings in the supernal purity," or *Keter*. From these engravings, the *Sefirot* below *Keter* begin to emerge…For the kabbalists, the doctrine of *creatio ex nihilo* [creation from nothing] refers primarily not to the creation of the world from nothing, but to the unfolding of the *Sefirot* from *ayin*, or No-Thing…For the kabbalists, the biblical text has many levels of meaning. On one level, it can be read as a narrative about human beings…Abraham, Isaac, Jacob, Moses, and so forth. However for the mystics, a deeper, secret meaning of the biblical text emerges…as a narrative about the *sefirot*…*Hokhmah* is also referred to as a "point" that emanates out of *Keter*…Indeed, some contemporary scholars have noted a similarity between the role of *Hokhmah* and that of the small, extraordinarily condensed bit of matter from which, according to the big bang theory, the entire universe emerged…In *Hokhmah* we also find the beginning of the sexual symbolism that permeates medieval Jewish mystical literature. *Hokhmah* is the first "male" emanation...*Binah* is the first "female" *sefirah*…"the supernal mother"…She eventually gives birth to the lower *sefirot*, her children. She is known as the source (*makor*), the origin of the life of all that emerges. Here we see how the *Zohar* reads the Bible as a story of the interaction of the *sefirot*." 135

The Kabbalah explains that from the elemental forces of fire and water *Ein Sof* emanated *Chokmah* and *Binah*. These are the *divine father* and *mother*, the "I" and the "H" whose sum is the "V" – numerical value of 6 – of the Tetragrammaton name. They are the elements of *fire* and *water* that produce the *Son* and the *bride* through *engravings*. From *beginning* to *end*,

from *above* to *below*, from “potentiality to actuality,” these *engravings* reflect the *image*, the *mark*, the *name*, and the *number* of the *name* throughout the kabbalistic universe.



Chokmah is the fire. I, and Binah is the water, H, the Father and Mother who, conjoined, produce the Son. Now the fire is symbolized by a triangle with the apex uppermost  , and water by  , these two together united form  the sign of the Macrocosm, the external symbol of Vau, V, Microprosopus." 136

And that no man might buy or sell, save he that had the *mark*, or the *name* of the beast, or the *number* of his name. Revelation 13:17

"And the *seal of the Macrocosm, the six pointed star, is the emblem of Microprosopus,* the Tetragrammaton – Vau of IHVH, who stands within the seven light-bearers of Malkuth…the six Sephiroth which compose Microprosopus." 137

Revelation 13:17 reveals that there are three elements to the *mark* of the beast: the *mark*, the *name* and the *number*. All of these aspects can be seen in the occult kabbalistic interpretations of the Bible, codified by the mystic sages to symbolize man's oneness with IHVH. Revelation 13:14-15 and 14:9, 11 both speak about the *image* of the beast. In Kabbalah the *sephirotic god-man image* is represented by *Adam Kadmon*, who in turn reflects his divine nature through man in the lesser world, as quoted above, "And the mystery of the earthly and mortal man is after the mystery of the supernal and immortal One…thus was he created the image of God upon earth."

The *Sefer Yetsirah*, also known as *The Book of Formation* or *The Book of Creation*, is considered the major text of Kabbalah on the formation of the universe by *Ein Sof* through *engravings* and states:

“Jehovah, through thirty-two Paths, engraved his name using the three forms of expression called Letters, Numbers, & Sounds.” (*The Sepher Yetzirah*)

“From the simple letters three were chosen & sealed so that they may be formed into a Magnificent Name, *IHV*. With this name was the universe sealed in six directions by Him.” 138

The *Sefer Yetsirah* explains that *Ein Sof* created the cosmos in the image and form of the primordial *Adam Kadmon* by numbers, sounds and through the twenty-two letters of the Hebrew alphabet. These twenty-two letters are divided into three groups. The first three letters are the “mother” letters. These are א מ ש (*Aleph*-A, *Mem*-M, *Shin*-Sh) and are the elements of air, water and fire; the primal substance or *prima materia* of the universe. From the elements fire, water and air were formed the head, abdomen and breast of *Adam Kadmon* which were then *sealed* and fashioned into the Tetragrammaton name, IHVH.

These three *mothers* or *elements* then gave birth to the next group of seven letters. These seven are considered double letters and are ב ג ד כ פ ר ת (B, G, D, K, P, R, Th). With these seven letters *Ein Sof sealed* the six directions of the universe with combinations of the name, IHVH: Above, Below, North, South, East and West. This is the *seal* of the *Macrocosm – As Above, So Below –* the six-pointed star and emblem of *Microprosopus* or *Metatron*. The point in the middle of the star depicts the *holy temple*. Satan, the dragon sits above, with the world and man fixed below.

“In the midst of this star is the Invisible Throne of the Most Ancient of the Ancients--the Supreme Definitionless Creator.” 139

‘Above is the Dragon, below is the world, and lastly the heart of man; and in the midst is God who regulates them all…The Dragon (Tali) is in the universe like a king upon his throne.” (*The Sepher Yetzirah, The Book of Formation; Chapter Six*) 140

The remaining twelve letters in the creation myth of the *Sefer Yetsirah* are said to constitute man in all of his senses, organs, feelings, thoughts, and emotions, even his occupation. Each Hebrew letter with its numerical value corresponds to a part of the physical human body and the psyche of man which flows out of and is sealed with the “V” of the *Great Name*. In this way man is said to be one with the creator and the universe:

“He selected three consonants (I, H, V)…He sealed them with His spirit and fashioned them into a *Great Name* and with this sealed the universe in six directions…The twelve simple letters ה ו ז ח ט י ל נ ס ע צ ק (H, V, Z, Ch, T, I, L, N, S, O, Tz, Q) symbolize the twelve fundamental properties: speech, thought, movement, sight, hearing, work, coition, smell, sleep, anger, taste (or swallowing), and mirth. The simple letters correspond to twelve directions…They diverge to all eternity and are the arms of the universe… There are twenty-two letters by which the I AM (YAH), the Lord of Hosts, Almighty and Eternal, designed and created by three Sepharim (Numbers, Letters, and Sounds) His universe, and formed by them all creatures and all those things that are yet to come.” 141

Here again we see the perfected image of man in the *Microcosm*; for in Kabbalah, just as *Metatron* is the lesser YHVH, he is also the *Lesser Adam*, a reflection of the *Macrocosm* above, *sealed* with the *divine name* YHVH through the emanations and engravings of *Ein Sof*. From the roots downward, from *above* to *below*, this *seal of perfection* is then reflected throughout the worlds of the *Sefirot* tree to the sphere of *Malchuth*, the *Shekhinah mother* and dwelling place of the human man *Adam*, recipient of the *sacred* name containing the Vau or “six.”

“According to the original conception, from the union of the Divine Father and the Divine Mother is produced *Microprosophus*…and corresponds to the letter ו, or *V*, in the Great Name…The dwelling place of Malchuth is in the fourth world--Assiah--and it is composed of all the superior powers reflected into the elements of the terrestrial sphere. Thus it will be seen that the Qabbalistic Tree extends through four worlds, with its branches in matter and its roots in the Ancient of Ancients--*Macroprosophus*…The *Tetragrammaton*, or the four-lettered Name of God, written thus יהוה, is pronounced Jehovah. The first letter is י, *Yod*, the Germ, the Life, the Flame, the Cause, the One, and the most fundamental of the Jewish phallic emblems…from which it goes forth to impregnate Binah, which is the first ה, *He*. The result of this union is Tiphereth, which is the ו *Vau*, whose power is 6 and which symbolizes the six members of the *Lesser Adam*. The final ה, *He*, is

Malchuth, the *Inferior Mother*, partaking in part of the potencies of the *Divine Mother*." 142

This reference from *The Secret Teachings of all Ages* by Manly P. Hall also states that *Microprosophus* – the *Lesser Adam* – is *Elohim*, the created offspring of *Chochmah* and *Binah*: "The six powers of *Microprosophus* flow from and are contained in their own source, which is Binah, the Mother of the *Lesser Adam*. These constitute the spheres of the sacred planets; their name is Elohim, and they move upon the face of the deep." As noted previously, Kabbalah teaches that *Ein Sof* created *Elohim*. The *Zohar* interprets the first verse of Genesis as "With beginning, [*Ein Sof*] created God [*Elohim*]" which is also translated by the rabbis of Kabbalah to read "He created *six*."

The Word of God tells us that *Elohim* is the true God and Creator in Genesis, but here we see Satan usurping the Word of God and inserting himself into the biblical text as *god* and creator of the Most High God! This explains how the initiates of Theosophy like Bailey and Blavatsky, or the Grand Masters of Freemasonry like Pike and Hall, or the priests of Kabbalah throughout history could believe and teach that *Lucifer* is the hero and *god* of Genesis because of his gift of *illumination* to mankind.

Manly Hall was no novice. He gave many of clues for the reader to piece together the *secret*. In the chapter already quoted above titled "The Tree of the Sephiroth" Hall disclosed that "In the Qabbalah it is declared that the *Yod* is in reality three *Yods*, of which the first is the *beginning*, the second is the *center*, and the third is the *end*." In other words, the *Yod* in the IHVH Tetragrammaton actually represents three *Yods*. Using a simple Hebrew letter chart and adding the numerical value of *Elohim*/אלהים we deduce the following; where א = 1, ל = 30, ה = 5, י = 10, ם = 600, the sum is 646. By adding in two additional *Yods*, 10 + 10 + 646, 666 = the mystical *number of the name*.

The *Zohar* alludes to Genesis 1:1 as containing the secret of secrets and the supernal mystery of the *divine name* which spans the universe through *engravings* of the number "six." According to Kabbalah everything in creation, from beginning to end, is sealed with the *V*, the *Vau*, which is the

six. Therefore it should come as no surprise to find Satan exalting himself as God in the very first verse of Genesis, from the beginning! It will be further shown that the *sage mystics*, in step with their *god* Lucifer, have gone to great lengths to manipulate the Word of God by imposing the numbers 6 and 666 into the Scriptures through the sorcery of Kabbalah.

These same rabbinic sages, some of which are listed in *The Return of the Kosher Pig*, see the *science* of Kabbalah and the magical power of Hebrew letters to effect spiritual transformation and alter world events as the necessary harbinger and forerunner of the sixth millennium that will precede the coming of their *Moshiach*. As disciples of Jesus Christ, we must be able to differentiate between the true Biblical interpretation of Scripture and the gnostic exploitation of God's Word as mystically translated by the kabbalists.

In Revelation chapter one Jesus said, "I am Alpha and Omega, the beginning and the ending…the first and the last." He did not say 'I am the Aleph and the Tav' nor is there any *sacred name* to be found hidden in the codes of the Hebrew alphabet. It is my hope that every Christian reading this information will hold fast to the Word of life and to the *name which is above every name*, Jesus Christ, the real Yeshua, and to say like Paul:

For I know whom I have believed, and am persuaded that he is able to keep that which I have committed unto him against that day. 2 Timothy 1:12

Chapter 9

Secrets of the Millennium: The Two Messiahs of the Final Redemption

I am Alpha and Omega, the beginning and the ending, saith the Lord, which is, and which was, and which is to come, the Almighty.
Revelation 1:8

"And at the end of the Formless and the Void and the Darkness (that is, at the end of the exile this saying shall have place: Isa. ii. 11). And the Tetragrammaton alone shall be exalted in that day (that is, in the time of Messiah)."
(*Zohar, The Book of Concealed Mystery*) 143

"This [final] redemption will come only as a result of Torah study, chiefly the study of Kabbalah." (Rabbi Eliyahu of Vilna, from his commentary on the *Zohar*) 144

According to the prophecy in the *Zohar*, the purpose of releasing the mysteries of Kabbalah globally is to prepare the world for the seventh millennium and the coming of *Moshiach*. As noted above, this period is called the footsteps of *Messiah – Ikveta DiM'shicha* – and is based on the *Shiur Komah*, the god-man image of *Adam Kadmon* in the *Sefirot* tree. The rabbis refer to this as the *Netzach-Hod paradigm*, as *Netzach* and *Hod* are the seventh and eighth sephirah and represent the legs of the image. The *Netzach-Hod paradigm* marks the time just before the *final redemption*. The ninth sephira, *Yesod*, is representative of the male phallus which channels the *life force* of *Ein Sof* to *Malkut* the feet, the *Shekhinah* bride and *kingdom* of the god-man image.

"Netsah and Hod are the right and left legs respectively…Jesod is the generative system, or the foundation of form; and Malchuth represents the two feet, or the base of being." 145

"*Yesod* is the channel through which Tiferet strives to unite with Shekhinah and pass on the creative and benevolent divine forces…This *Sefirah* is symbolized as the male phallus, sanctified through the covenant of circumcision." 146

According to the *Zohar*, the mystery of *six thousand years* is based on an esoteric interpretation of the first words of Genesis chapter one and the six days of creation. In Kabbalah, the six days of creation correspond to the six *sefirah* that form the six-pointed star of *Microprosopus* or *Metatron's* cube; the *Shiur Komah* god-man image. Each of the six *sefirah* represents 1,000 years and combined they form the six directions of the universe. The seventh millennium is the age to come, the final *Shabbat*, the antichrist *kingdom of god* on earth. The seventh millennium also represents *Malkut*, the tenth *sefirah* who is also *Shekhinah*. As noted previously, it was *Shekhinah* who fell into the abyss at the shattering of the *Sefirot* tree, yet is destined to rise from the pit.

"Six thousand years depend from the six first. This is what the wise have said, that the world shall last six thousand years, and it is understood from the six numbers of Microprosopus…Hence are the "six thousand years" deduced from the six first words, which also are said to refer to the six Sephiroth of whom Microprosopus is formed;" 147

"…thousands signify the future…the idea of six being extended into as many thousands, to symbolise that number on the plane of a future age… so also the Schechinah, or Kingdom, is itself exiled…By the same rule, the millennium is deduced from the seventh word. The seventh space here means Malkuth, the kingdom, or the queen, which together with the six of Microprosopus, makes up the seven lower Sephiroth." 148

The word *Bereshith* is the Hebrew word for *beginning* in Genesis 1:1, "In the beginning God created the heaven and the earth." *Bereshith* is said by the sages to contain the greatest mystery of creation from beginning to end and, as noted above, is translated by the kabbalists as "he created six." The following excerpt from the *Zohar* describes the initiation of Rabbi Hiya into the secret of the *six* encoded in the word *Bereshith*. Note that *Metatron*, the

angel of the presence, and the directions of the six-sided cube are mentioned:

“Bereshith, "In the beginning," said Rabbi Ionda, "what is the signification of this mystical word? It is hochma—wisdom…Like a globe it includes the six directions of space, viz., north, south, east and west, high and low, from which emanate six streams of existence, all of which flow at last into the great ocean of primal life. Another occult signification of Bereshith is this, *Bara sith* (*he created six*)…Rabbi Hiya and Rabbi Jose were walking together in the country and when they reached their destination, said Rabbi Hiya: "This *occult meaning* of bereshith is undoubtedly correct, since we find in the Book of Genesis that the creation of all things occurred and took place in six days and not more. In an *ancient occult work* on Genesis we have found many references to this account… Rabbi Hiya heard a voice from heaven exclaiming: "Fall back! make room for the King Messiah coming to the school of Rabbi Simeon, whose students are all initiates and master teachers of the secret doctrine." Then came Messiah and visited all the celestial schools and confirmed the teachings and expositions of the mysteries given by their appointed instructors…Turning to Rabbi Simeon...Messiah spake and said: "Blessed art thou, Rabbi Simeon, for thy mystic teachings are of the highest worth and valued and cherished by all. They only, along with those of Hesekiah, King of Judah, and Achiya, the Solonite, are *marked and sealed* with the approval of the holy one. I have come hither because I know that *the angel of the presence* visits no other school save yours." 149

Another bizarre twist of Scripture by the rabbis relates the events of the flood in Noah’s day to the rise of technology in our current sixth millennium. In this strange scenario Genesis 7:11 is taken completely out of context to represent future events which correspond to the global release of kabbalistic knowledge that will precede the coming of *Moshiach*. We know that the opening of the windows of heaven in Noah’s day brought the total destruction of the world. One can only imagine what ominous plot is lurking behind the self-fulfilling prophecies of the *Zohar*.

"What does the future hold? There is a Talmudic statement that the world will exist for 6000 years and then enter a new state…The Kabbalah explains that each millennium is a Divine day, and as we approach the seventh millennium we are actually approaching the Divine Sabbath…As the world nears the era of *Mashiach,* knowledge in all areas of life is rapidly expanding. This concept is found in the Zohar, which comments of the verse, "In the six hundredth year of Noah's life…the windows of Heaven were opened" (Genesis 7:11). According to the Zohar, the six hundredth year is also the sixth millennium, and the "windows of Heaven" are opening to allow knowledge and discovery to flow into our world at an unprecedented rate. To illustrate: the year 5600 (the six hundredth year of the sixth millennium) corresponds to the year 1840 in the Common-era. A cursory inspection of that period reveals that it was in the late 1800s that the Industrial Revolution began." 150

According to the *Zohar* the illumination of the nations and the revelation of *Moshiach* in Israel will not be an instantaneous event but will unfold as a gradual process. Based on the mystical timeline of the rabbis, this process began in the year 1840. In the current *Netzach-Hod paradigm* the left and right pillars of the *Sefirot* tree also represent the two messiahs of Kabbalah, the *Trein M'shechin*. These two messiahs are *Mashiach ben Joseph* and *Mashiach ben David*. Until recently, the mystery of two messiahs has remained largely unknown outside of kabbalistic circles, but is now being revealed in small increments to accelerate the *final redemption*.

"The two meshichim are the guards and defenders of the existence of Israel throughout all the generations, even during the exile. Their main place is at the gates of Jerusalem, the opening of the walls. This is revealed by the words: "our feet were standing in the gates of Jerusalem." "Our feet" refers to the two meshichim in the line of Netzach and Hod." 151

Typical of rabbinic Judaism, there are dark sexual overtones hidden deep within this mystery which revolve around the sphere of *Yesod* and its phallic imagery; another reason this secret has been long concealed from the masses. However, what is important is the end-time agenda of this

millennial script. In the tradition of Kabbalah there was a split in the last two sephira, *Yesod* and *Malkut*, at the time of the shattering of the *Sefirot* tree. This cosmic split brought about the necessity of two messiahs and two stages of *tikkun* – the repair of the world. Messiah ben David is traditionally viewed as the messianic ruler of the seventh millennium, but it is Messiah ben Joseph that has been the guiding force of Israel throughout history. Messiah ben Joseph is viewed as the predecessor of Messiah ben David. In his present-day role he is the revealer and disseminator of Kabbalah during the *Ikveta DiM'shicha* or footsteps of *Messiah*, as noted by Rabbi Hillel Rivlin:

"According to our master, the Gaon, all activities and all efforts – in all their particulars, down to the most minute details – that are directed to the ingathering of the exiles, the building of Jerusalem, the expansion and resettlement of the Land of Israel, and the return of the *Shechinah* (Divine Presence), are dependent upon the mission and destiny of the Messiah of the Beginning, the first Messiah – Mashiach ben Yoseph. He is the supra-natural force that aids every activity, which is "aroused from below"…During the period of *Ikveta DiM'shicha* the revelations will begin little by little…[It is specifically through the learning of the Kabbalah] that the mysteries of the Torah will be revealed. This is part of the sacred mission of the Messiah of the Beginning, Mashiach ben Yoseph." 152

Digging deeper into the secret doctrine of the sages, one is not surprised to discover the fallen angel *Metatron* at the root of this mystery. Within the rabbinic writings we find that *Metatron* is the "oversoul" of Messiah ben Joseph. 153 He is the "supranatural force" that will unify and bring balance to the left and right pillars of the *Sefirot* tree, the twin messiahs. Moreover, *Metatron is* Messiah ben Joseph who will defeat the enemies of Israel and raise *Shekhinah* from the abyss. Recalling *Metatron's* association with the number 6 and *Yesod* as the "channel" for knowledge, I quote the following based on the Kabbalah school of Rabbi Eliyahu from the book, *Kol Hator*:

"Mashiach ben Yoseph is the meta-archangel known throughout the Talmud (including the standard commentaries of Rashi and Tosafot),

Midrash, and Zohar, as Metatron." 154

"Yosef is still alive…the Mashiach ben Yosef from above is Metatron, the Minister of Interior; *as is known, Yosef is Metatron*. Both of them are from the light from above, and both are in the sefira Yesod…there will be a unification of the Holy one blessed be He and the Shechina through the unification of the two meshichim…The purpose of gathering in the exiles is to wage *God's war* against Amalek, which was the main mission of Joshua, in line with Mashiach ben Yosef…It is also intended to remove the spirit of impurity from the Land, and to bring Knesset Israel and *Shechina from below, from the earth…A person must elevate himself spiritually and by performing good deeds, with the assistance of the might and secret of "Metatron, Minister of Interior"* to the level of the upper lights, the level the sounds of the shofar reach. [999 in gematria] is the angel of Mashiach ben Yosef. His name equals 999 in the sefira Yesod…"Metatron Minister of Interior" the one who brings the sound of the Shofar to Heaven…The abundance of lights which is the ! [999] *sperm of the sefira Yesod*… The unity of the Holy One blessed be He with the Shechina…Engaging in the war against Esau and Ismael…"then the land will be appeased." 155

In this section of *Kol Hator* we see many disturbing elements of rabbinic eschatology. As Messiah ben Joseph, it is *Metatron* who is the mediator between man and God. As *Minister of Interior* it is *Metatron* who brings prayers before the throne in the sound of the shofar. I have already referenced this as one of Itzhak Shapira's teachings from his book, *The Return of the Kosher Pig*, but I mention it here again to show that these esoteric traditions remain the bedrock of Talmudic and kabbalistic millennialism. Shapira can be seen teaching this heretical doctrine in a video presentation titled "Are you Born Again??" where he states that it is through *Yeshua/Metatron* that our prayers are heard. 156

Next we see that Messiah ben Joseph's gematria is 999. In *Kol Hator* this is called "Formula 999" and represents the *unity* of the "Holy One" with "Shechina" through three combinations of letters. The number 999 also relates to the beginning of creation as well as the exact year when *Moshiach* will arrive on the earth. Through the manipulation of numbers using

gematria, the kabbalists have determined the new world order to begin in 2019: this is based on the computation that 2 x 999 and 3 x 666 both equal 1998, then by further adding and subtracting the value of other Hebrew letters to 1998 they arrive at the year 2019, the sum and predicted date of *Moshiach's* arrival. 157

Both contemporary and ancient rabbinic writings such as *Kol Hator* repeatedly cast Messiah ben Joseph as engaging in a war against Esau and Ismael (Ishmael) in order to appease or cleanse the land. Now it is no secret who Ishmael is, but who is Esau? The sages tell us plainly. Esau is Edom and Edom is Rome, specifically Christianity.

"Edom is Esau…Esau/Edom's descendants since Biblical times have been identified with Europe, specifically the empire of Rome. According to the Torah understanding, ancient Rome never actually fell thus leaving the public scene. It was only replaced by the Church… As we know the head of the Church always has been in the city of Rome. Therefore Edom is Rome, Rome is Christianity and thus Edom is all those domains to which the Christianity of Rome has spread." 158

Together, Esau and Ishmael are the *external forces,* the "shells of impurity" that must be deceived – along with the mixed multitude – during the redemption process, as quoted previously:

"The redemption process must proceed in a circuitous manner in order to deceive the "shells of impurity" [the *external forces*] and prevent them from interfering." 159

"The purpose of our work in ingathering the exiles is to set up people of Truth who will promote the unification of both meshichim in the gates of Jerusalem so that the Shechina will return…In all generations, the major tasks of the two meshichim together, Mashiach ben Yosef and Mashiach ben David, are self-defense and to wage war against *the three heads of the outer shells or layers*: *Esau, Ismael and the mixed multitude*. The special task of Mashiach ben Yosef is to counter Esau, the outer shell on the left. The special task of Mashiach ben David against Ismael is to counter Ismael, the outer shell on the right. The two

meshichim together are duty-bound to operate against Esau and Ismael, who are likened to an ox and a donkey of impurity…we must destroy the might of the mixed multitude, the layer of the wicked Armilus, and drive them out of Israel…The mixed multitude is our greatest enemy, for it separates the two meshichim…The two meshichim…are "a scepter and a lawgiver."…They are the holy ox and holy donkey who wage war against the impure ox and impure donkey, i.e., Ismael and Esau…They are the "'feet of God'" that are in Netzach and Hod. They stand firmly in the gates of Jerusalem…The Redemption of Truth can occur only after destroying the *klipah shell/ layer of Esau* that appears in the form of Armilus, the epitome of the truth-hater." 160

Buried deep in the writings of the Mishnah sages, there is yet another mystery concerning Edom or Esau. This is the secret of "The Head of Esau" or "The Beheading of Esau" and refers to the Jewish fable that Esau's death was by decapitation. 161 This tradition is based on a rabbinic commentary of Genesis 50:13 which states, "*In the Cave of Machpelah in Hebron (the burial place of the Patriarchs). . . Esau's head lies in the bosom of Isaac.* (Targum Yonatan, Genesis 50:13) 162 The Targum Yonatan gives no explanation for the addition of this story in relation to the actual events recorded in Genesis 50. However, in the coded language of the rabbis we see that it is closely connected to the ongoing war against Esau/Edom in the *final redemption* process.

"If one wishes to understand the future then one must understand the past; for the future is just its reflection…The great pre-Messianic Tikkun does not occur exclusively in the invisible spiritual dimensions. It has its parallel fulfillments here in our physical world…
Our Sages relate a legend about the death of Esau, who is Edom. The legend states that when Jacob was taken to be buried in Makhpelah that Esau and his clan came to block his interment. This led to a war between the sons of Esau and the sons of Jacob. In this war, Esau himself was killed and decapitated…In the end times, the great battle between Jacob and Esau is to come to its final fruition. Biblical prophecies speak of the resounding defeat of Edom and everything related to it…This does not mean that everyone literally dies, but

rather, that everyone finally is able to *see and receive the Light of Truth* and thus *a new dawn for humanity arises*." 163

In his book, *The Messianic Idea in Judaism*, Gershom Scholem relates the course of apocalyptic events as foretold in the *Zohar*. Following the legends of the Aggadah in the *Babylonian Talmud*, Scholem describes the *redemption* as a process of "gradual illumination of the world by the light of Messiah" that culminates in a *mystic utopia*:

"At the time when the Holy One, blessed be He, shall set Israel upright and bring them up out of Galut He will open to them a small and scant window of light, and then He will open another that is larger, until He will open to the them the portals on high to the four directions of the universe…so shall it be and not at a single instant…" 164

According to the *Zohar*, this same light will be a destructive force to the nations as Israel is propelled to world domination. Scholem continues:

"The Gentiles (who are designated Esau or Edom), however, will suffer the opposite fate. They received their light in this world at a single stroke, but it will depart from them gradually until Israel shall grow strong and destroy them. And when the spirit of uncleanliness shall pass from the world and the divine light shall shine upon Israel without let or hinderance, all things will return to their proper order – to the state of perfection…The worlds will all be joined one to another and nothing will separate Creator from creature. All will rise upward by ascents of the spirit, and creatures will be purified until they behold the Shekhinah 'eye to eye'." 165

The expectation of a golden age of peace and prosperity on earth can be found in nearly every religious system, including some denominations of Christian eschatology. This idealistic dream of an earthly utopian millennium, widely promoted by New Age leaders, has long been the focus of investigation by the church to unlock the identity of *Mystery Babylon* in Revelation 17 and 18. However, its roots can be traced back to ancient Babylon from where it was adopted by the blind leaders of Israel during

their captivity and later codified in the writings of the *Babylonian Talmud* and Kabbalah.

Nearly ten years ago when the Holy Spirit began to reveal to me out of the Scriptures the mysteries of *the great city* Jerusalem, I made efforts to share this information with pastors. In every instance I received the same answer: they could not or would not acknowledge the Biblical evidence pointing to Jerusalem as *Mystery Babylon*, the mother of harlots. This overwhelming response is based in tightly held traditions of men and is often rooted in fear.

Another frequently repeated answer I heard from church leaders was that the city in Revelation 17:18 and chapter 18 is described as reigning over the kings of the earth and governing the wealth of commerce between the nations. Therefore the harlot of Revelation could not possibly be "tiny" Jerusalem. Only New York or some other metropolis could fit the description. Just ten years ago Israel was not considered a global power in the eyes of many. Today this is no longer the case. According to the rabbinic timeline, the *New Age* is upon us. Jerusalem is rising and the entire world is witnessing Israel's technological quantum leap to become the head of the kingdoms of this world.

Chapter 10

The Utopian Kingdom of Kabbalah

Jesus answered, My kingdom is not of this world: if my kingdom were of this world, then would my servants fight, that I should not be delivered to the Jews: but now is my kingdom not from hence. John 18:36

Then the devil, taking Him up on a high mountain, showed Him all the kingdoms of the world in a moment of time. And the devil said to Him, All this authority I will give You, and their glory; for this has been delivered to me, and I give it to whomever I wish. Therefore, if You will worship before me, all will be Yours. And Jesus answered and said to him, Get behind Me, Satan! For it is written, You shall worship the LORD your God, and Him only you shall serve.
Luke 4:5-8

The opening of the war against Gog and Magog will start with the first redemption before the coming of the righteous mashiach - Mashiach ben David… Anyone who does not participate in the war…is actually becoming a partner of the "layer" of the mixed multitude. Whoever he is, he would have been better off had he not been born." 166

"Jerusalem will become the ideal capital of the new Universal State… Hence, with the advent of the Messiah, who will usher in the ideal era, all the national ensigns and laws, which are barriers to genuine international peace, brotherhood, and the happiness of mankind, will *gradually disappear*. Only the *Messianic flag*, the symbol of knowledge, peace, tranquility of the individual mind, will remain, and all the nations will center round that emblem…All will recognize one flag or standard, bearing *the name of God*…The world will, therefore, unite in praising the Lord for Israel's universalism." Rabbi Michael Higger, *The Jewish Utopia* 167

One of the most revealing contemporary sources concerning the millennial reign of the *Moshiach* in the world to come is Rabbi Michael Higger's controversial book, *The Jewish Utopia*, published in 1932. Higger was a Talmudic scholar and his book is based on rabbinic interpretations of biblical prophecy as set forth in the *Babylonian Talmud*, the *Palestinian Talmud*, the *Midrash* and other apocryphal writings. Many Christians have been alarmed by Higger's Jewish supremacist vision of a future utopian kingdom in which only the *righteous* will be allowed to exist in the *ideal era* on earth; the word *righteous* refers only to those who support a politicized global domination of all other nations by Israel. On page 41 Higger wrote:

"Only those who are convinced of Israel's divine purpose in the world, will be welcome to join Israel in the upbuilding of an ideally spiritual life on earth. Israel, the ideal, righteous people, will thus become spiritually the masters of the world."

The Jewish Utopia is full of such conceptions of a future kingdom which Higger repeatedly describes in terms like the *new order*, the *new age*, an *ideal society*, the *new social order*, the *ideal World*, the *Universal State*, the *super-structure*, *paradise on earth*, a *new economic order*, *universal Israel*, the *Messianic age*, the *Kingdom of God* and the *Rabbinic Utopia*, the supposed seventh millennium. 168

Higger's utopian vision is a call for *reconstruction* which he says can only come from "the Talmud and cognate rabbinic literature." In his opening statements, Higger laments that the kingdom promised by the prophets has not yet been fulfilled on the earth, stating that, "Dogmatic Christianity has come, dogmatic Christianity will be gone." 169 In agreement with the predictions of the *Zohar*, Higger noted that the *redemption* will be a process of "important reforms and changes" in which "wicked people" and "unrighteous nations" – "traditional Edom and Rome" – will "disappear from the earth," eventually ushering in the millennium and the establishment of the *Kingdom of God*. 170

Similarly, as presented in the writings of Kabbalah, according to Higger it is *Leviathan* that will symbolize a new world order of socialism in which "the

righteous will prosper and the wicked suffer." As a rabbinic voice of the Talmudic sages, Higger decreed that *righteousness* alone will be the currency of the coming kingdom.

> **"The Leviathan is thus a universal symbol of the new era in which the *righteous* will prosper and the *wicked* suffer. The Leviathan, furthermore, is the emblem of the ideal age, when *this world will become the home of the righteous*. It is an ideal symbol of *a new economic order in the world*, when *righteousness* will be one's only requisite for acceptance unto the realm of happiness and prosperity."** 171

What is most notable about Higger's *Jewish Utopia* is that he understood what many Christians today do not: the diametric opposition of a future earthly kingdom of God in Israel as hoped for by the rabbis to that of the Kingdom of Jesus Christ who said to Pilate before His crucifixion, "My kingdom is not of this world." In the final chapter of his book, Higger discusses the "Jewish conception of the Kingdom of God" versus the "dogmatic doctrine of the Kingdom in the New Testament." 172

To show the conflict between these two kingdoms, Higger in fact quoted the very words of Jesus to Pilate in John 18:36, "My kingdom is not of this world," as well as those of Paul the Apostle who said in 1 Corinthians 15:50, "Now this I say, brethren, that flesh and blood cannot inherit the Kingdom of God; neither doth corruption inherit corruption."

Blinded by his rejection of Jesus Christ as the Messiah, Higger wrote that there is no "continuation of the prophetic hope" in the Kingdom Jesus offered, but that "rabbinic Judaism is directly following the footsteps of the prophets, with regard to their ideology of the Kingdom of God on earth." 173 Higger was right about one thing: the Babylonian Talmudic worldly kingdom of Kabbalah is at enmity with the true Kingdom of God, of which Jesus Christ was the complete fulfillment. In his misappropriation of Biblical prophecy Higger, like the rabbis before him, has fulfilled the Apostle Paul's words in Acts 13:

For they that dwell at Jerusalem, and their rulers, because they knew Him not, *nor yet the voices of the prophets* which are read every sabbath day, they have fulfilled them in condemning Him…And we declare unto you glad tidings, how that the *promise which was made to the fathers*, God hath fulfilled the same. Acts 13:27, 32-33

Little by little, one *footstep* at a time, we are witnessing the gradual transformation of the Gospel with the central focus and position of Jesus Christ in Scripture slowly being replaced by another *gospel*, another *spirit*, another *Jesus*, and another *kingdom*. Like Rabbi Higger, Rabbi Itzhak Shapira places earthly Jerusalem, along with the sacrificial system of the old covenant, front and center in his *kingdom* eschatology.

In a video presentation titled "The Fullness of the Gentiles" Shapira states that "King Messiah will be ruling in Jerusalem" and that "they [the nations] will receive correction" as they are "restored fully into the Hebraic faith." He states this will be "a Jewish worship experience" that includes animal sacrifices in the temple with a remnant of Gentiles from the nations – "those who are left" – coming to Jerusalem to bow down to the "lord king" and "celebrate" the sacrifices. Shapira says this is the "one new man" (Ephesians 2:15) when God will judge the nations and they receive a "new revelation" as "the Jewish people will teach the world how to worship the Messiah." 174

Jesus said to her, Woman, believe Me, the hour is coming when you will neither on this mountain, nor in Jerusalem worship the Father. You worship what you do not know; we know what we worship, for salvation is of the Jews. But the hour is coming, and now is, when the true worshipers will worship the Father in spirit and in truth; for the Father is seeking such to worship Him. God is a Spirit, and those who worship Him must worship in spirit and in truth. John 4:21-24

It may come as a shock to many Christians to discover in Revelation 11:8 that Jesus refers to earthly Jerusalem as "the great city, which spiritually is called Sodom and Egypt, where also our Lord was crucified." In Galatians 4:25-26 the Apostle Paul makes clear that Jerusalem "which now is" is in bondage, but that Jerusalem which is above is free, the "mother of us all."

This truth is further explained by Paul in Hebrews 11-13 where he writes of the heavenly city which Abraham sought and that *here we have no continuing city*, but we seek one to come; the city of the living God, the heavenly Jerusalem, whose builder and maker is God. Yet how many today have set their eyes and their hearts on earthly Jerusalem as the eternal capital city and future kingdom of God?

The rabbis of Kabbalah teach that the seventh millennium will be the great *Shabbat*, a time of peace when all nations will worship the *divine presence* in Jerusalem; but at what cost? In *The Jewish Utopia* Jerusalem is called the dwelling place of glory, "the holy city" where the temple will be established "in the midst thereof." In the *ideal era* to come Higger stated, "Israel, having attained perfection, must ultimately have a far reaching influence on the course of the destiny of nations. In the rabbinic terminology, *the spiritual fire of Israel will devour the wicked nations*." 175 In a chilling statement that sounds like something out of the Book of Revelation, Higger wrote the following:

> **"To understand the rabbinic conception of an ideal world it will help us if we imagine a hand passing from land to land, from country to country, from the Persian Gulf to the Atlantic Ocean, and from the Indian Ocean to the North Pole, marking "righteous" or "wicked" on the forehead of each one of the sixteen million inhabitants of our earthly globe. We should then be on the right road toward solving the major problems that burden so heavily the shoulders of suffering humanity. For mankind should be divided into two, and only two, distinct and unmistakable groups, namely, righteous and wicked…Consequently, in the ideal era, *there will be no people who will believe in the division of the Godhead into two or more parts, or persons. Only those peoples who believe in one God will survive in the ideal world.*"** 176

Higger's rabbinic conception of an ideal society, as outlined in the *Babylonian Talmud* and Kabbalah, is a call for the complete destruction of those individuals and nations who will not assist in the "upbuilding" of a utopian kingdom in Israel; namely Esau and Edom, Christianity and Islam. Rabbi Shapira appears to agree. Relying on rabbinic commentary, he stated

in a message that in the future *Hashem* will take revenge on Edom and the nations, not on Israel, and his clothes will be red from the blood of the nations being poured out. 177 According to Shapira, Esau represents "the spirit of Christianity today," while "Islam is the spirit of Edom." Shapira then tells his audience they better make sure they are "grafted into Israel," adding that "if you reject the revelation of Israel, you in essence join yourself to Edom." 178

In a 2017 interview with Rabbi Jonathan Bernis and Benny Hinn, Rabbi Shapira gave a similar message, stating that at the great and terrible day of the Lord, the Lord will come out of Edom and crush Edom, which is Christianity. Not only does Shapira tell his audience that Christianity is Edom, but that *Yeshua* is also Esau. He deduces this through a configuration of gematria by "flipping" the letters of Esau around to form the name *Yeshua*. According to Shapira, *Yeshua* has been a prisoner in a foreign land, in Edom with the Christians, but will soon come out of Edom, crush Christianity, and return to Zion. Therefore, he says we need to make sure we get the "real" *Yeshua* and hasten his return by *relearning the story of the gospel*. It is noteworthy that Jonathan Bernis adds that Israel is becoming the head, not the tail, through technology, cyberwarfare and through military export, implying that this is the means through which *Yeshua* will fight against the Gentile nations. 179

For I determined not to know any thing among you, save Jesus Christ, and Him crucified…And my speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power.
1 Corinthians 2:2, 4

It is not surprising that some Christian leaders have described Itzhak Shapira as a modern-day Apostle Paul, having been impressed by his "encyclopedic knowledge of rabbinic sources." *The Return of the Kosher Pig* is endorsed by an equally impressive list of rabbis and Christian ministers like Dr. Michael Brown who praises the book, while ignoring its obvious propagation of Babylonian Jewish mysticism and Kabbalah. 180 However, there are many in the Jewish community who are at odds with Shapira's application of the *kosher pig* to *Yeshua* as the Messiah.

One Orthodox Jewish writer – Menashe Dovid – states in an online review of Shapira's book, "Nowhere is there a connection between any Messiah and a pig in any writings of the Lubavicher Rebbe and the writings of the Sages." Dovid goes on to explain that the Midrash contains multiple interpretations in reference to the pig becoming *kosher* in the messianic era; some literal, some allegorical. He then notes, "However, the major personality who was associated with the pig was Esau in particular, and, eventually, the Romans (his descendants) in general." Citing the Midrash, he writes, "Some of the Rishonim [early Hebrew scholars] explained that the return of the pig does not refer to eating pork, but rather to the restoration of the Jewish government in place of the Christian one." 181

An alternative explanation of the pig becoming *kosher* as expounded by 13th Century Rabbi Bachaya has Edom – Rome – "returning" to build a Third Temple as an act of recompense for their destruction of the Second Temple. Yet another opinion of the rabbis reads, "Why is this nation [Edom – Rome] compared to a pig? Because G-d will, in the future, turn (lit. return) upon them the attribute of judgment." 182

Menashe Dovid then asks the rhetorical question, "What has the above got to do with the kosher pig being Jesus/Yeshua and Jews having to accept Jesus as a divine messiah?" He explains, "The answer is that there is no connection between a messiah let alone a divine messiah and the return of the pig or that the pig is the messiah." 183 It is obvious that neither Dovid nor the Talmudic rabbis over the course of history ever associated the idea of the pig becoming *kosher* to a future divine messianic figure. The opposite is true. If there is any common theme in the rabbinic literature concerning the mysterious identity and future of the *kosher* pig, it is that the Christian faith will undergo a *transformational shift* through the rejection of Jesus Christ as the Messiah!

One of Judaism's most admired rabbis and scholars was Moses Maimonides, also known as the Rambam and author of the *Mishneh Torah*. In a lecture presented by Jews for Judaism, Rabbi Michael Skobac stated, "Maimonides wrote in the 12th Century that Christianity and Islam are actually preparing the world for the ultimate truth and this will lead to either the universal embrace of the Noahide path or potentially conversion to

Judaism." 184 A staunch opponent of the writings of the Apostle Paul, Skobac believes that the only "acceptable spiritual path" for non-Jews envisioned by Judaism is the "*default*" universal spiritual path of the Noahide Code; another Babylonian tradition of the rabbis which is nowhere found in the Bible! 185

As much as some Christians would like to believe in the return of a *kosher pig* named *Yeshua*, it is certain that this will not be Jesus Christ, the Son of God of the New Covenant. It is also clear in the Talmud and Kabbalah that the rabbis did not have Jesus in mind as the Messiah in their codified writings, though they may have conferred such a title on *Metatron*.

What is paramount in these ancient oracles of the *kosher pig* is a collective vision of the destruction of Christianity that has long been held in secrecy. It is hard to overlook the recurrent theme of war that the sages say must precede the peaceful *Shabbat* of the 7th millennium. Either way one views the return of a *kosher pig*, the picture is a dim one at best. What much of apocalyptic rabbinic literature does signify is a plan concerning the *influence on the course of the destiny of nations* that includes a global paradigm shift as a result of the transformation of the Christian faith through the rejection of Jesus Christ as the Messiah.

"In fact if the midrashim are anything to go by, Esav is the pig which represents in a historical time line: pagan Rome, Christian Rome and *present day worldwide Christianity at large* which includes messianic Judaism, which *in the end undergo a transformation which renders them Kosher by their rejection of Yeshua*." 186

Nevertheless when the Son of man cometh, shall he find faith on the earth?
Luke 18:8

Chapter 11

The Testimony of Jesus: The Seal of Truth

I am thy fellowservant, and of thy brethren that have the testimony of Jesus: worship God: for the testimony of Jesus is the spirit of prophecy. Revelation 19:10

But when the Helper comes, whom I shall send to you from the Father, the Spirit of truth who proceeds from the Father, He will testify of Me. John 15:26

Some Christians know that Satan is forming a world government (New World Order) which he plans to rule from modern Israel through the coming false Jewish Messiah…What most Christians don't know is that the apostate Church will not only be a partner in this New World Order, but is even now working toward its creation. 'Evangelical churches will be the chief instrument to bring the New World Order to birth.' " 187

The four Gospels of the New Testament record the complete fulfillment of the ministry and testimony of Jesus Christ in His death, burial and resurrection. 2 Corinthians 15:1-4 tells us exactly what the Gospel is according to the scriptures. "Moreover, brethren, I declare to you the gospel which I preached to you, which also you received and in which you stand, by which also you are saved, if you hold fast that word which I preached to you—unless you believed in vain….*that Christ died for our sins according to the Scriptures, and that He was buried, and that He rose again the third day according to the Scriptures.*"

As Jesus was hanging on the cross, the accusation for His death was placed over His head: THIS IS JESUS THE KING OF THE JEWS. Those standing by, including the chief priests and scribes, scorned Him with their words. If He would come down from the cross and save Himself, then they would believe in Him. How could this man be the Son of God, who dared

to say “Destroy this temple, and in three days I will raise it up.” This was not the political *Messiah* of Israel they were looking for. Where was the kingdom? Had not Moses and the prophets foretold it? Had not God promised earthly dominion to Israel and appointed Zion as a *light* to the Gentiles? (Isaiah 49:6)

The *Spirit of prophecy* testifies that Jesus Christ is the Son of God and the fulfillment of all the promises of God. In Luke 1:41 upon hearing Mary’s greeting, Elisabeth was filled with the Holy Spirit and prophesied, saying, “Blessed is she that believed, for there will be a *performance* of those things which were told her from the Lord.” This word *performance* means *the act or completion of prophecy, verification of, absolution*, and *perfection*; a perfect and complete work that continues to this day. Mary’s response to Elisabeth was, “He hath holpen (helped) His servant Israel, in *remembrance* of His mercy; As He *spoke to our fathers, to Abraham*, and to His seed for ever.”

Continuing in Luke, we read the prophecy of Zacharias, priest of the Temple service and father of John the Baptist. “Blessed is the Lord God of Israel, for He *has visited and redeemed* His people, and *raised up a horn of salvation* for us in the house of His servant David; As He spoke by the mouth of *His holy prophets*, who have been since the world began: To perform the mercy *promised to our fathers*, and to *remember His holy covenant*; *The oath which He swore to our father Abraham*.” (Verses 68-70, 72-73)

There is also the prophecy of Simeon in the Temple who said, “Lord, now You are letting Your servant depart in peace, According to Your word; For *my eyes have seen Your salvation*, Which You have prepared before the face of all peoples; *A light to bring revelation to the Gentiles*, and the glory of Your people Israel.” (Luke 2:29-32) And at that moment when Simeon spoke, the prophetess Anna testified of Christ “to all them that looked for redemption in Jerusalem.” (Verse 38) All of these were waiting for and saw the promise of God’s redemption.

For this cause therefore have I called for you, to see you, and to speak with you: because that for *the hope of Israel* I am bound with this

chain. Acts 28:20

When the Apostle Paul was brought before King Agrippa at Caesarea, he informed the king that he was being judged for *the hope of the promise made of God unto our fathers* and that it was this *hope* for which he was accused of the Jews. (Acts 26:6) Recounting his own testimony of meeting Christ in a vision on the way to Damascus, Paul confessed in defense of his charges that he had said nothing except those things *which the prophets and Moses* said should come; That Christ would suffer, that He should be the first to rise from the dead, and that He would proclaim light to the people – Israel – and to the Gentiles. (Acts 26:22-23 in fulfillment of Isaiah 49:6 & 60:3)

Standing before the high priest Ananias and the Jewish council, Paul testified, "Men and brethren, I am a Pharisee, the son of a Pharisee: concerning *the hope and resurrection of the dead* I am being judged." (Acts 23:6) Then at his trial before Felix the governor, accused of sedition and defiling the Temple, Paul affirmed his faith in the God of his fathers and those things written in *the law and the prophets*; the hope toward God of the resurrection of the dead. (Acts 24:15, 21; Daniel 12:2)

Christian author Philip Mauro noted that this *hope*, repeatedly testified of by Paul, is the true *Hope of Israel* and that it was for this *hope* that the Apostle was accused, tried and sent to Rome in chains. Mauro's book, *The Hope of Israel*, was published in 1929 as a biblical response to this very question: *What is the true hope of Israel*? For Mauro, the answer to this question concerned the vital truth of the gospel of Christ and the salvation of men and women, both Jew and Gentile:

"Jewish fables (literally, *myths*) are no new thing. Paul has plainly warned the household of faith not to give heed thereto…it is well known that the one [fable] that was most fondly cherished, and that constituted the gravest menace to the truth of the gospel, was the notion that the leading purpose of the mission of the coming Messiah would be the reconstitution of the Jewish nation and its elevation to the highest pinnacle of earthly dominion and glory; for that fatuous doctrine was the cornerstone of orthodox Judaism in Paul's day; and because of his

sturdy opposition to it he was persecuted, his enemies plotted to take his life, and he was sent a prisoner to Rome. No wonder that, during the term of his imprisonment there, he wrote to Titus his plain-spoken warning against 'Jewish fables.' " 188

This Jewish fable of an earthly *kingdom* and a return to the Old Testament sacrificial system in an earthly temple is still the cornerstone of today's Orthodox Judaism, having taken firm root in Evangelical Christianity decades ago through the Scofield Study Bible.

The Scofield Bible was first published in 1909 by Oxford University Press and then disseminated into American seminaries and churches. It has since swept many Christians under its spell through Scofield's heretical notes and false teachings of *two covenants*, *two kingdoms* and *two brides*: "The Lamb's wife…the Church, identified with the heavenly Jerusalem and to be distinguished from Israel" and "the wife of Jehovah, yet to be restored, who is identified with the earth [Israel]." 189 What is not commonly known is that Scofield's book was financed by high-level Zionist bankers and socialists, including Jacob Schiff. It was then liberally circulated in American seminaries and Bible colleges throughout America, a fact that should be critically pondered as to why. 190

Philip Mauro specifically challenged the Scofield Reference Bible as the "leading authority for this new system of teaching" which states "When Christ appeared to the Jewish people, the next thing in the order of revelation as it then stood should have been the setting up of the Davidic Kingdom." 191 Yet as Mauro points out, this radical statement subverts the Word of God in that it "removes the sacrifice of the Lamb of God from its central place in God's eternal plan" from the foundation of the world! (Revelation 13:8)

It should not be difficult to see the mark of Satan in these doctrines. And while the Scofield Bible may be a dated book used by ministers long gone, its fruit continues to be a main staple of evangelical eschatology, reproducing a false Israel-centric gospel that attempts to supersede the centrality of Jesus Christ in the Scriptures. For anyone who insists on clinging to the fable of a future glorious kingdom in today's earthly

Jerusalem, it should be noted that Scofield's reference note to Zechariah 9:9 states that Jesus was "*so little deceived*" by His apparent reception as King, that this caused Him to weep over Jerusalem, which in turn led Him to announce the destruction of the city for Israel's rejection of their Messiah, as if this was an afterthought brought on by deception!

At the end of his ministry in Rome, Paul called the leaders of the Jews together where he explained to them the *Kingdom of God* as concerning Jesus Christ, *both out of the law of Moses, and out of the prophets*. (Acts 28:17-23) While some believed, others did not and there was a division among them. Had Paul spoken of an earthly kingdom through which Israel would rule the nations, they would have gladly received his testimony. But the Kingdom which Paul spoke of is a spiritual kingdom, one which *flesh and blood cannot inherit* and into which none can enter or ever see apart from being born again, from above, by the *Spirit*; for that which is born of the flesh is flesh, and that which is born of the Spirit is spirit. (1 Corinthians 15:50, John 3:3-6) This is the true *mystery of godliness*, that every person born of the *Spirit* has been delivered from the power of darkness – out of the jurisdiction of the *god of this world* – and translated into the Kingdom of His dear Son, Jesus Christ! (Colossians 1:13, 1 Timothy 3:16)

He that cometh from above is above all: he that is of the earth is earthly, and speaketh of the earth: he that cometh from heaven is above all…He that hath received his testimony hath set to his seal that God is true. John 3:31, 33

The maxim of the kabbalistic kingdom of god on earth is *As Above, So Below* and denotes that man is divine through the *spark* of the creator within. This subtle lie of the serpent, first appearing in Genesis chapter three, has never changed. In Kabbalah it is expressed in the ascending spheres of the *Sefirot* tree and the interconnection of man below with *Ein Sof* above. The kingdom above and the kingdom below are *one*. All that is needed to merge these two kingdoms outwardly is for an enlightened humanity to repair the world through *tikkun olam*. This is the *correction* that Kabbalah will bring.

“The wisdom of Kabbalah, as defined by the greatest Kabbalists, is a method to correct man and the world… If Kabbalah will spread amongst people, then we will avoid all the catastrophes, we will merit both this world and the world to come, and both of these worlds will unite into one…Only the dissemination of Kabbalah will save the world.” 192

This doctrine of an interconnected universe (*olam*), rooted in the philosophical systems of ancient Egypt and Babylon, is the explicit teaching of the rabbis referenced in *The Return of the Kosher Pig*. Shapira himself has stated “That the reason the Messiah has not come yet is because the kingdom below has not been established, and only when the kingdom below is being established, then the kingdom above can be merging into the kingdom below…There has to be some sort of connection of the two kingdoms from above and below.” 193 In other words, our works (*mitzvot*) determine the time of Messiah’s arrival.

The rabbis agree. The overspreading of Kabbalah on a global scale will hasten the coming of *Moshiach*. In his “Appendix List of Rabbis,” Shapira includes Rabbi Yehuda Leiv Halevi Ashlag and Rabbi Michael Lietman (aka Laitman). Rabbi Ashlag, known as the Baal HaSulam (1884-1954), is most revered in Judaism for his commentary on the *Zohar* and dedicated his life to the dissemination of Kabbalah throughout Israel and the nations. 194 In a work titled *The Horn of Messiah*, Ashlag wrote:

“And the dissemination of the wisdom in the masses is called a *Shofar*. Like the *Shofar*, whose voice travels a great distance, the echo of the wisdom will spread all over the world…the nations will hear and acknowledge that there is Godly wisdom in Israel.” 195

Ashlag also said that this revelation of Kabbalah to the masses is the proclamation of Elijah the prophet, forerunner of the *Moshiach*.

“And that role was said about Elijah the prophet, that the disclosure of the secrets of Torah, is always referred to by the name: The disclosure of Elijah. As our sages said…until Elijah comes and the Tishbite would answer questions and problems. Therefore they said that three days

(which is a famous hint) before the coming of the Messiah, Elijah shall walk upon the summit of the mountains and blow a great horn etc. and you shall understand that the horn is nothing but the divulgation of the wisdom of the hidden in the masses, which is a necessary precondition that must be before the complete redemption." 196

The parallels between these words and those of Daniel 7:25 and Revelation 13:5-13 are striking. Surely the prophets of Kabbalah speak great words against the *Most High*!

Rabbi Laitman is listed in Shapira's Appendix of Rabbis as the founder and director of Bnei Baruch Kabbalah Education & Research Institute which is "dedicated to teaching and sharing the wisdom of Kabbalah." 197 Laitman refers to Yehuda Ashlag as "the greatest Kabbalist of the 20th century" and a "special tool that creates a connection between us, those who are below and those who are above." 198 On his web profile page Laitman notes that he was the personal assistant and student of the late Yehuda Ashlag's son, Kabbalist Rav Baruch Shalom Ashlag (the Rabash), for twelve years. I have previously quoted Michael Laitman above as forecasting that the world is approaching *the correction* and that mankind, through the *one language* of Kabbalah, will unite by returning to *Babylon*. As host of "the largest website on Kabbalah" Laitman states, "I am committed to continue in the footsteps of my teachers, Baal HaSulam and Rabash, to publicly and openly disseminate Kabbalah to anyone who wishes to know it…This process is of the utmost importance to the future of Israel and the world at large." 199 In his article, *The Horn Of The Messiah Is A Call For Unity*, Laitman writes:

"[The] system we live in is being revealed as a network that lacks the right interconnection…Today, the whole world is beginning to work for the Creator. The whole world – which comprises one soul – must ascend up the spiritual degrees all the way to the World of Infinity… This is called, 'the coming of the Messiah,' and the dissemination of the wisdom of Kabbalah to the whole world is called, 'the horn of the Messiah.' " 200

This is a faithful saying and worthy of all acceptance, that Christ Jesus came into the world to save sinners, of whom I am chief. 1 Timothy 1:15

The true hope of Israel and the nations is the blood of the covenant of the Lamb of God, Jesus Christ, which He fulfilled in His death, burial and resurrection. It is not the false ideology of an occult kingdom unified and built on the foundations of sorcery and vain prognostications of soothsaying rabbis like those listed in Shapira's book. Yet Shapira has told his followers that "the New Covenant is yet to be fulfilled, and it will be only completely fulfilled when Yeshua's glorious return," adding that ***"nobody in the room should be very excited now and say I'm saved, because covenant is not done with an individual, covenant is done with the corporate."*** 201

Relying heavily on rabbinic testimonies cited in his book, Shapira has stated, "The key message of the good news is not the gospel of salvation, but rather the gospel of the kingdom." 202 In a "Message to the Church for the last days" Shapira told his audience, "The message is the message of a *kingdom*" as he prayed over those in attendance who "understand that they are in the business of the kingdom, they are not in the business of salvation." 203 After announcing that the New Covenant is yet to be fulfilled, Shapira encouraged his listeners to imagine what will happen "if one billion Christians will *hold and return* to the covenants…an *awakening* from the Christian world, a real awakening to *return* to the covenants. *Yeshua* will surely come. This is your purpose." 204

Reinforcing the *purpose* of the nations to bring the *Moshiach* to Israel, Shapira once again clarifies the identity of the kosher pig *Yeshua*, stating, "…but if you bring Jesus, you bring the wrong guy. Don't bring us Jesus… Bring the real *Yeshua*, the Jewish Messiah." 205 Concluding his message to the Church, Shapira then affirms those who know the time and hear *the sound of the shofar*! 206

It is remarkable that the rabbis referenced in Shapira's book equate the global initiation of humanity into Kabbalah with the coming of Elijah as prophesied in Malachi 3:1-3 and 4:5-6. In doing so, they are desperately

trying to fulfill prophetic events that have already occurred by attempting to produce a prophetic forerunner to their *Moshiach*.

Behold, I will send my messenger, and he shall prepare the way before me: and the Lord, whom ye seek, shall suddenly come to his temple, even *the messenger of the covenant,* whom ye delight in: behold, he shall come, saith the LORD of hosts. Malachi 3:1

Based on the plainly spoken testimony of Jesus, John the Baptist was the fulfillment of this prophecy in Malachi. In Matthew 17:10-13, having just witnessed the transfiguration of Jesus, His disciples asked Him, "Why then do the scribes say that Elijah must come first?" Then Jesus answered them, "Indeed, Elijah is coming first and will restore all things. But I say to you that *Elijah has come already*, and they did not know him but did to him whatever they wished. Likewise the Son of Man is also about to suffer at their hands." Then the disciples understood that He spoke to them of John the Baptist.

In Luke 1:16-17 the angel of the Lord appeared to John's father, Zacharias, declaring John's ministry to prepare the way of the Lord as the fulfillment of Malachi 4:5-6, "And many of the children of Israel shall he turn to the Lord their God. And he shall go before him in the spirit and power of Elias, to turn the hearts of the fathers to the children, and the disobedient to the wisdom of the just; to make ready a people prepared for the Lord." This prophetic fulfillment is further revealed in Matthew 3:3, "For this is he that was spoken of by the prophet Esaias, saying, The voice of one crying in the wilderness, Prepare ye the way of the Lord, make his paths straight," and in the words of John who proclaimed the baptism of fire, fulfilling Malachi's prophecy that the Lord Jesus would be "refiner's fire" and a "purifier of silver." (Matthew 3:11-12, Malachi 3:2-3)

In Matthew 11:10 Jesus quoted Malachi 3:1 concerning John the Baptist, "For this is he, of whom it is written, Behold, I send My messenger before thy face, which shall prepare thy way before thee." In verses 13 and 14 He said, "For all the prophets and the law prophesied *until John*, and if you will receive it, *this is Elias,* which was to for come. He that hath ears to hear, let him hear." In saying this, Jesus was publicly confirming Himself as the Messiah of Israel who came exactly as the prophets had said, with John the

Baptist, *the messenger and forerunner*, going before Him to prepare the way! As the forerunner of the Messiah, John the Baptist was rejected by the elite rulers of the day, thrown into prison and beheaded. If the leaders of Israel could not accept Jesus, they surely could not accept John as Elijah. Elijah came and they knew him not!

The idea that Elijah will come again in the future, before the second coming of Christ has been deeply embedded into Christian eschatology, but has it source in rabbinic literature. We have seen how "Elijah" is woven into the mystical experiences of rabbis like Isaac Luria, where it is said the prophet appeared to him as the revealer of Torah secrets. We also saw that there is a "famous hint" that alludes to a three-day time period when Elijah will appear before the *Moshiach*. According to Jewish tradition, this mythical Elijah is repeatedly referred to as *The Harbinger*. 207 As forerunner and disseminator of Kabbalah, he will herald the *redemption* in the *footsteps of Moshiach* and execute the destruction of Edom:

"On the second day Elijah comes and stands on the mountains of Israel and says: 'Goodness has come to the world,' as it is said, *The Harbinger of goodness*." 208

"When the time for Redemption arrives, it is Elijah who introduces the Messiah to the people…In the critical period of forty-five days between the death of Messiah ben Joseph and the appearance of Messiah ben David…three days prior to the coming of the Messiah, Elijah announces the advent of the Redeemer from the mountains of Israel, slaughters the celestial prince of Edom (Rome), becomes the spokesman of Moses, settles all the disputes, and pleads Israel's case before God." 209

The magic of Kabbalah has been described as *matter manipulation*; the ability to recast the course of events in the physical realm through sorcery. Jesus referred to this as false prophets showing great signs and wonders. There is nowhere in the Bible that states we have to do anything to bring Jesus back, much less merge the kingdom above with the kingdom below. Revelation 18:23 says, "For by thy sorceries were all nations deceived." If the prophets of Kabbalah are ever successful in producing a forerunner to

their *Moshiach*, he will be more akin to the false prophet of Revelation 13:13 who makes fire come down from heaven *above*, causing those on earth *below* to worship the beast; as also prophesied by Rabbi Higger, "In the rabbinic terminology, *the spiritual fire of Israel will devour the wicked nations*."
In an attempt to fulfill prophecy that has already been fulfilled, the rabbis of Kabbalah and Talmud, of necessity and at the behest of *Ein Sof* (Lucifer), must always push prophecy into the distant future; for Satan has said, "I will be like the Most High God!" In so doing, they shut up the kingdom of heaven against men: they neither go in themselves, nor do they allow them who are entering to go in! (Matthew 23:13) They proclaim a false *redemption* that will never come, because it has already come!

In Luke 16:16 Jesus said, "The law and the prophets were until John: since that time the kingdom of God is preached, and every man is pressing into it." The Kingdom of God continues to advance by the working of the Holy Spirit and the response of faith by those – Jew and Gentile – who believe the gospel as preached by John the Baptist and fulfilled in Jesus Christ, the true Messiah from beginning to end.

The Seal of Righteousness versus the Mark of Death

Blessed be the God and Father of our Lord Jesus Christ…*In whom we have redemption through His blood*, the forgiveness of sins, according to the riches of His grace...In whom also we have obtained an inheritance…in whom also after that ye believed, *ye were sealed with that holy Spirit of promise*.
Ephesians 1:3, 7, 11, 13

There is a fantastical fable in the *Zohar* that tells the story of creation according to the Kabbalah. When the "*Divine Being*…willed to create the world" each letter of the Hebrew alphabet appeared before him in reverse order, requesting to be the first one used in the creation process. 210 As the last of the twenty-two letters, *Tav* presented first:

"The letter Tau advanced in front and pleaded: May it please Thee, O Lord of the world, to place me first in the creation of the world, seeing

that I am the concluding letter of EMeTh (Truth) *which is engraved upon Thy seal*, and seeing that Thou art called by this very name of EMeTh, it is most appropriate for the King to begin with the final letter of EMeTh and to create with me the world. The Holy One, blessed be He, said to her: Thou art worthy and deserving, but it is not proper that I begin with thee the creation of the world, since thou art destined to serve as *a mark on the foreheads of the faithful ones* (vide Ezek. IX, 4) who have kept the Law from Aleph to Tau, and *through the absence of this mark the rest will be killed*; and, further, thou formest the conclusion of MaWeTh (death). Hence thou art not meet to initiate the creation of the world… ת*Tav is the end of the seal* of the Holy One, blessed be He…'The seal of the Holy One, blessed be He, is emeth [truth]…It denotes the people who fulfilled the Torah from א alef to ת tav.' " 211
One by one the letters ascended:

"*TZ* then went before him, saying: 'Because I mark the *Zaddikim* (the righteous), and thou thyself nearest me in thy name, Zaddik (righteous), and also it is written "*The righteous Lord loveth righteousness*,"…it will become thee to create the world by me'…Then said the Holy One: "Zaddi, Zaddi, thou art truly righteous, but thou must keep thyself concealed, and thy occult meaning must not be made known or become revealed; and therefore thou must not be used in the creation of the world." 212

This legend of the *mystical alphabet* reveals the secrets of the se*al* and *mark* of Satan who is a murderer *from the beginning* and the father of lies! (John 8:44-45) The *Zohar* plainly states that the *righteous* are those who keep the law from *Aleph* to *Tav*, from beginning to end. The fairy tale ends with *Ein Sof* choosing *Beth* (B) to create the world, yet *Aleph* (A) is honored as the seal of *unity*, added to every created thing to signify the *oneness* of *Ein Sof* with his creation from the *beginning*.

"Then came B and said: 'Create the world by me, because I am the initial letter of beracha (blessing) and through me all will bless thee, both in *the world above as in the world below*." "Truly, Oh B," said the Holy One, "I will surely create the world by thee only."

“Aleph, Aleph! Thou shalt be the first of all letters and *my unity shall be symbolized* only by thee. In all conceptions and ideas human or divine…shalt thou be the first, the beginning.”

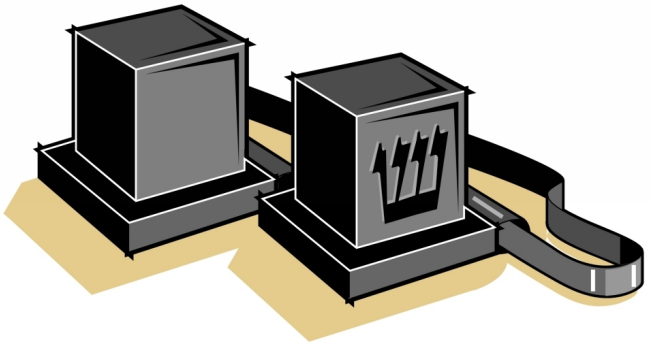
“Therefore did the holy one make the letters of the celestial alphabet… Therefore also the Book of Genesis begins with two words…Braeshith, Bara (in the beginning created) followed by two others, whose initials are A…Alhim, ath (God, the substance of) to show that the letters of these alphabets celestial and earthly are *one and the same* by which every creature and thing in the universe has been formed and produced.” 213

The *Zohar* further reveals that “the redemption of Israel will come about through the mystic force of the letter *vav*, namely, in the sixth millennium.” 214 Recalling that the Hebrew letter *Vav* has the numerical value of 6, we will now see how the *Vav*, in the form of ו ו ו or **666**, has been mystically inserted into the *Shema Yisrael* prayer and is engraved in the Tefillin, the cube-shaped phylactery worn on the head while reciting the *Shema*.
The *Shema* is a traditional Jewish prayer taken from the following four texts: Exodus 13:1-10, Exodus 13:11-16, Deuteronomy 6:4-9 and Deuteronomy 11:13-21. The verses are recited twice daily, in the morning and the evening, and are a testament to the glory of God and His enduring faithfulness to His people. The most well known verse of the *Shema* is in the sixth chapter of Deuteronomy. When Jesus was asked by a Pharisee, which is the greatest commandment, He quoted Deuteronomy 6:5, “Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind.” The plain meaning of the verse could not be clearer. However, like the Pharisees, the kabbalist rabbis imposed their traditions and interpretations into the Scriptures long ago as a secret link to *god*, thereby elevating themselves above the people and nullifying the Word of God.

In Kabbalah the *Vav* represents the complete connection of everything in the universe and is symbolic of the first six words in the Genesis account of creation. The sixth word in Genesis is ואת, *Vav*, *Aleph*, *Tav*; “the *Vav* connects the heavens and the earth.” 215 On the sixth day of creation God

created man in his own image. (Genesis 1:27) The opening verse of the *Shema* in Deuteronomy 6:4 also contains six words (ד אח יהוה אלהינו יהוה ישראל עשמ) and according to Kabbalah, the prayer has a gematria of **666**, denoting the time of *Moshiach's* arrival.

"The significance of this lies in the Zohar's explanation of the coming of Moshiach and the end of the 4th exile at the end of the 70 years… from Israel's statehood in 1948…The Shema is about bringing Mashiach Ben David…In this case the word value 50 is coupled with word for "the time" or "the days"…[and] has the numerical value of 666. Thus, together, they give us the equation 50 x 66.6 jubilee years= 3330 years, which, as we've said, is the exact period of time from the first exodus and the reception of the Torah at Sinai when the tree-of-life was last offered to us in 2448 to the year 5778 [2018], which the *tzaddikim* have long known will be the next cosmic window for the Tree-of-life reality." 216



Tefillin are a set of two black cubes containing the Scripture passages of the *Shema*. The cubes are bound to the forehead and arm while reciting the *Shema* in an outward display of obedience to Deuteronomy 6:8, "And thou shalt bind them for a sign upon thine hand, and they shall be as frontlets between thine eyes." (See Matthew 23:5) The ritual of putting on Tefillin is a *mitzvot* and binding seal on the person which connects the worlds above with the world below, as well as the world to come. 217

The cube is symbolic of the occult image of *Zeir Anpin*, the six-sided celestial creature *Metatron*, and represents the six directions of the universe; *above*, *below*, *north*, *south*, *east* and *west*. According to Kabbalah, all physical objects, including man, have these *six* sides. As the number 6, the *Vav* represents the completion of man, as seen in the *god-man* image of the Tetragrammaton shown above where the *Vav* connects the upper *Hé* and the lower *Hé* in the name YHVH.

"The elemental cube was constructed of a *Vav* (ו) in its length, width and height and thus numerically 6 x 6 x 6…when the Zohar refers to this cube shape…it most often describes it as the 6 directions… referring to the 6 directions of *Zeir Anpin* formed by the letter *Vav* (ו) of the Tetragrammaton (יהוה) as it entered and created our 3-dimension space." 218

Tefillin is a sign or mark of "connecting to the Infinite" through *mitzvot*. 219 The ritual of Tefillin also completes the *unification* of *Zeir Anpin* and *Shekhinah*, that part of *god* waiting to be redeemed from the pit by the assistance of those who invoke her in unison! The following excerpt from kabbalahsecrets.com explains:

"The last word of the 6 word verse is *Echad*…if we sum their standard gematria value (YHVH, YHVH and Echad) we get…the numerical value of Adonai, the pronounceable aspect (counterpart) of the YHVH, thus completing the all-important unification of Zeir Anpin and Malchut (Heaven and Earth if you will) and/or of G-d and the Shechina, the male and female aspects of G-d. This is the spiritual unification, which if injected into our lives and our daily dealings will help bring about the end of exile and the final redemption. This is why the complete (ordinal plus standard gematria) value of the initials of all 6 words is 385, the numerical value of the Shechina, the female or earthly (divine presence) aspect of G-d. It is also one of the reasons why the Shema verse begins with the letter Shin from Shechina (*ShCYNH*) and ends with Dalet or numerical value 4, kabbalistically signifying the 4 letters of the YHVH…This will bring about the transition into the tree-of-life…If there is one prayer that ALL (*kol*) Israel says it is the *Shema Ysrael*. Let it be with the consciousness to bring Oneness and Moshiach." 220

In Judaism Tefillin is known as the “Mark of HaShem” and “an intimate connection between HaShem and His people.” 221 This connection is symbolized in the *vav*, *vav*, *vav* (**666**) that is engraved in the Tefillin cube worn on the forehead. On one side of the cube is the Hebrew letter *shin* ש. On the other side of the cube there is a four-headed *shin*, which is not a letter, but a mystical sign that conceals the number **666**.

Rabbi Zamir Cohen, chairman of Hidabroot, the world’s largest Jewish TV network, explains the meaning behind Tefillin. 222 In a television presentation titled “Tefillin – What is their Meaning and How Do We Wear

Them?" Cohen describes the black boxes in spiritual and scientific terms. He states that the brain is the "entrance gate of man's spiritual illuminations," therefore the head Tefillin acts as a "receptor…for the reception of the spiritual illumination from the eternal light" which he identifies as *Ein Sof*. 223

Addressing the structure of the head Tefillin, Cohen reveals the *vav, vav, vav* or **666** hidden in the four-headed *shin,* stating:

"I will briefly say that it possesses a big secret. When we look at the background, not the bulge, but rather, the background, we have a "vav", another "vav", another "vav", meaning, inside these four heads we have 3 "vavs" and 3 heads, and when you take the line in the background that's on the bottom, you have an internal Shin, that's basically concealed inside the four headed Shin." 224

Cohen implies that by wearing Tefillin a man may be transformed [by energies] to a higher spiritual level. He states, "That when a person wears tefillin, the color of his aura changes to a higher level" and that "These things are proven today" as "new research studies are revealing new things." 225 In another teaching Cohen affirms the omen of the *Zohar* that states Israel "will be redeemed under the secret of the letter 'vav'. And it will be in the sixth millennium." 226 The rabbis testify: **6** is the number of redemption, **666** the number of *divine illumination*.
The *Babylonian Talmud* relates the *Zohar's* creation fable of the mystical mark of *Tav* as a future and climactic event in Israel's *redemption*. This is based on the kabbalistic principle of interconnection which states, "The beginning is wedged in the end, and the end is wedged in the beginning." 227 The following commentary on the *Talmud* reveals that ו ו ו (**666**) is concealed in the Hebrew letter *Tav*, the mark of Hashem, written as ת:

"Tefillin being a mark of HaShem is also mentioned in the Talmud… According to our Sages, at the battle of Gog and Magog every human in and around the Holy City will be given the mark of the Hebrew letter, tav, upon their forehead. According to the Tanakh {in Ezekiel 9} and the Talmud {in Shabbath 55a}, the Mark of HaShem's sign – the, tav - will be placed upon everyone in and around Jerusalem. Those

that receive the mark in ink will be the righteous and those that receive the mark in blood will be condemned."

"18 = ו 6 (right) ו 6 (top) ו 6 (left)…The Gematria construction of the Tav is a ו Vav = 6 on the right plus a ו Vav = 6 on the top plus a ו Vav = 6 on the left. The constructed Gematria is 18…When we examine the Hebrew text of Ezekiel 9:4 we find that the English word "mark" is used to translate the two Hebrew characters תו, which spell out *tav*… ת." 228

Tractate Shabbath 55a of the *Babylonian Talmud* recounts the rabbinic discussion on which the above scenario is based:

"The Holy One, blessed be He, spake thus to them; Commence [destruction] from the place where song is uttered before Me. And who were the six men? — Said R. Hisda: Indignation [Kezef], Anger [Af], Wrath [Hemah], Destroyer [Mashhith] Breaker [Meshabber] and Annihilator [Mekaleh]. And why a ת tav? — Said Rab:, Tav [stands for] tihyeh [thou shalt live],* ת *tav [stands for] tamuth [thou shalt die]…*ת *Tav is the end of the seal of the Holy One, blessed be He. For R. Hanina said: The seal of the Holy One, blessed be He, is emeth [truth]…It denotes the people who fulfilled the Torah from* א *alef to* ת *tav." 229

For those familiar with the Jewish legend of the *golem* – also recorded in the *Talmud* – it will not be difficult to recognize the dark undertones reflected in this dialogue. The *Babylonian Talmud* records how the rabbis created a man from clay through the magic of Kabbalah by using the secret names of *god* (a permissible form of sorcery according to the *Sefer Yetsirah* and the *Babylonian Talmud*, Sanhedrin 65b and 67b). 230 The most well known fable in this series is the golem of Prague. The word *emet*, or *truth*, was inscribed on the forehead of the creature to keep him alive. By erasing the first letter *aleph* (which represents oneness with *Ein Sof*) only the word *met* (death) remained, resulting in the destruction of the mindless manservant. This twisted concept of *truth* is a continuous theme postulated in the rabbinic writings of Kabbalah by those who have actually rejected the truth:

“In English we express the concept of total truth by saying that something is true “from A to Z.” In Hebrew the word for truth is א מ ב **(EMeT). Its first letter is the very first letter of the Hebrew alphabet, the** א **(alef). The last letter is** ב **(tav), the end of the *Alef-Bet*. The exact middle of the 22 letters of the Hebrew alphabet is the** מ **(mem)…Truth demands total accuracy from start to finish, including every point in the middle as well…Truth requires for its essence the first letter** א **(alef), the “One” standing for the Almighty. Remove the initial letter in** א מ ב **(EMeT) and all that remains is** מ ב **(MT). Without God there can be no truth. In its place only death and destruction remain...God makes Himself manifest through His law. In its three forms, Decalogue, Mishnah, and Talmud, its opening letters make the word** א מ ב **(EMeT), as *seal of its truth*.”** 231

The *Zohar* interprets the *Shema* as the “supernal mystery” of the *oneness* of *Ein Sof* emanating through the “seed” of the “engraved letters” from *aleph* to *tav*, from beginning to end. 232 According to the *Zohar*, reciting the *Shema* with ritualistic intention unifies the spheres of the *sefirot* tree: “The third commandment: to realize that God exists – vast and controlling the world – and to unify Him fittingly each day in those six supernal directions, unifying them through the six words of שמע ישראל (*Shema Yisra’el*), *Hear, O Israel*! (Deuteronomy 6:4).” 233 The commentary on the Pritzker Edition of the *Zohar* explains, “The first line of the *Shema* contains six words in Hebrew…These six words symbolize the unity above…The second line of the *Shema* (a nonbiblical response) also contains six words…These six words symbolize *Shekhinah* (…*Malkhut* [“Kingdom’]) and Her accompanying powers. The two realms correspond and eventually unite.” 234

Once more we see the kingdom *above* uniting with the kingdom *below* and becoming *one*. Anyone who is not *one* with the *god* of the coming *kingdom* on earth will not be part of the *kingdom*. Only those who keep the law from *aleph* to *tav* will remain alive in the 7th millennium of *shabbat*! By their own testimony, in the words of the sages of Kabbalah, the *mark* of the converging kingdoms is the letter of the law, by which those who keep the law are conformed to the *image* of their *god*:

"The word *One in the Shema should be equal in the duration of its pronunciation to the six words*…The third space or section contains the Shema. "*Hear Oh Israel, the Lord our God is one God,*" and is a commentary on the letter V (vau) which proceeds from the two letters before it and unites them…From these observations we may gather *the occult meaning of the phylacteries*. They are really explanations of the letters of the Tetragrammaton or divine name…Whoever wears the phylacteries bears the divine likeness, for as the divine essence is expressed in the Tetragrammaton, so *man becomes bearer of his image*." 235

In an age driven by technology and sensationalism, Christians can sometimes get caught up in the script. But in God's universe nothing changes. Salvation, the true *redemption*, has always been by faith. Romans 4:3-11 tells us that Abraham *believed* God and it was accounted to him for righteousness; the sign of circumcision being a *seal* of the righteousness imputed to him by God through faith.

The enticement of knowledge as the pathway to the Creator is very tempting. The rabbis of Kabbalah say that in the future, technology will make it possible for everyone to know the mysteries of creation:

"As the world nears the era of *Mashiach*, knowledge in all areas of life is rapidly expanding. This concept is found in the Zohar…prophesied in the Zohar that scientific revelation—the knowledge from below—will converge with the knowledge from "Above"—the rapidly exploding revelation of mysticism and Hassidism. In a sentence, one may summarize the Zohar by saying that science and religion will converge. As time goes on, science will reveal the profound secrets of creation as already described in the mystical tradition, and it will provide the technological means for all to access that information." 236

Those who adhere to the *Babylonian Talmud* and Kabbalah believe that when all nations are observing the law then God will be appeased and *Moshiach* will come to set up his kingdom. According to them, the Gentiles from the nations who keep the seven Noahide laws – **Universal Moral Code** – become *righteous* Gentiles and will have a place in the

world to come. The Kabbalah rabbis of Chabad insist that this is "the most crucial last stage before the arrival of Messiah: for Jews to teach the Seven Noahide Laws to the nations." 237

"'Why Are the Noahide Laws Especially Important Today?' Today, we are on the verge of a new era for humankind, a time when we will finally live together in peace and the world will be filled with divine wisdom. *Those who keep these basic rules will have a share in that world,* since, after all, they took part in making it possible." 238

The first Noahide law codified in the *Babylonian Talmud* states, "Do not profane G-d's *Oneness* in any way." 239 The *Brit Olam Noahide World Center* has even published a *Prayer Book for Noahides* as a means for non-Jews to help hasten the *redemption*. In an online interview featuring the book, Rabbi Cherki, who directed the project, stated, "The nations may say the first line of the Shema which is a declaration of faith that God is one… According to Jewish sources, in the future, God will be one throughout the world." 240 Based on the information presented in their own sources, which *god* are the rabbis referring to? Is it *Ein Sof*, *Shekhinah*, *Metatron*, *Leviathan*, the *holy kosher serpent*? Which *god* are we to be unified with by obedience to the law? And let's not forget that disobedience to any one of the Noahide laws incurs the death penalty by decapitation!

In his letter to the Galatians the Apostle Paul wrote, "Just as Abraham *believed God, and it was accounted to him for righteousness*. Therefore know that *only those who are of faith* are sons of Abraham. And the Scripture, foreseeing that God would justify the Gentiles by faith, preached the gospel to Abraham beforehand, saying, *In you all the nations shall be blessed*. So then those who are of faith are blessed with believing Abraham. For *as many as are of the works of the law are under the curse*; for it is written, *Cursed is everyone who does not continue in all things which are written in the book of the law, to do them*. But that no one is justified by the law in the sight of God is evident, *for the just shall live by faith*." (Galatians 3:6-11)

This is basic Christianity 101. Therefore it can only be concluded that there is a supernatural force at work in this movement and it is the spirit of

antichrist and strong delusion. In the final analysis, there is no doubt that the message of the *kosher pig*, the *sound of the shofar*, the *harbinger*, the *moral code* – whatever label they put on it – is the *Clarion Call* for Christians to *turn* from the grace that is in Christ through faith and *return* to the law and covenants which Jesus abolished in His flesh:

Even the law of commandments contained in ordinances; for to make in Himself of twain one new man, so making peace; And that He might reconcile both unto God in one body *by the cross,* having slain the enmity thereby.
Ephesians 2:15-16

The Greek word used for "mark" in the Book of Revelation is *charagma* (5480). Strong's Concordance defines it as: a scratch or etching (to sharpen, to a point), i.e. stamp (as a badge of servitude), or sculptured figure, graven, mark. The word *mark* is used a total of eight times in the Book of Revelation in reference to the *mark of the beast*. The same Greek word – *charagma* – is used in Acts 17:29. The English word there is *graven*, and refers to the inscription that was engraved on the altar *to the unknown god* which Paul came upon in Athens. Paul used this word to explain to the men of Athens that God who made all things, the Lord of heaven and earth, does not dwell in temples; neither can His Divine Nature be expressed through any *graven image*.

Revelation 13:11-14 says the beast coming up out of the earth exercises the power of the first beast so that he *causes* those on the earth to worship the first beast through deception by the miracles he performs. As the *god of this world*, Satan manifests himself in the external religious and political systems of this world. The *Babylonian Talmud* and Kabbalah set forth the *mark* of the *righteous* as a name or number which represents *truth* or EMeT; the *seal of truth* of a fleshly, earthly kingdom. This is a counterfeit of the *seal* that is set upon those who believe the testimony of Jesus Christ.

He that hath received his testimony hath *set to his seal* that God is *true*.
John 3:33

The word *seal* used in John 3:33 is *sphragizo* and means to *stamp* (with a signet or private mark) for security or preservation; to set a seal upon; a signet (as fencing in or protection from misappropriation); a stamp of genuineness. It is the same word used in John 6:27 where Jesus said God the Father has *sealed* the Son to give everlasting life through the *true work* of God, which is to "believe on Him whom the Father has sent.

Ephesians 1:13 says that after hearing the Word of *truth* and believing the gospel of salvation we were *sealed* with the Holy Spirit of promise which is the earnest – the security deposit – of the purchased possession! (Ephesians 4:30, 2 Corinthians 1:22) The price of our redemption has been paid by the blood of Jesus Christ. "And as we have borne the image of the earthy," the first man Adam from the dust, "we shall also bear the image of the heavenly," the last Adam, Jesus Christ from above, who was made a life-giving Spirit. (1 Corinthians 15:45-49)

Now this I say, brethren, that *flesh and blood cannot inherit the kingdom of God*. 1 Corinthians 15:50

These verses from 1 Corinthians 15 clearly set forth that the Kingdom of God established by Jesus Christ is not the earthly kingdom that is being heralded by the Kabbalah rabbis of today's Judaism. Corruption cannot inherit incorruption. A perishable body bearing the image of Adam can never attain to the imperishable image of the resurrected Christ through the works of the flesh. Paul shows us the *mystery* that was prophesied in Isaiah 25:8 and Hosea 13:14; that time when we shall be changed, when the corruptible will put on incorruption, when this mortal shall put on immortality and death is swallowed up in victory.

In this most important chapter on the resurrection, Paul concludes with a profound statement in verse 56: "The sting of death is sin; and the strength of sin is the law." So powerful is the strength of sin that it is impossible for the natural man to overcome it by the works of the law. "But thanks be to God, Who gives us the victory through our Lord Jesus Christ…and this is the victory that overcomes the world, even our faith…that believes that Jesus Christ is the Son of God!

Do not be deceived. There will never come a time when believers in Christ must choose to take a *mark for God* in opposition to *the mark of the beast*, which some are teaching today. The foundation of God stands sure, having this *seal*; The Lord knows those who are His. (2 Timothy 2:19)

Be not thou therefore ashamed of the testimony of our Lord…Who hath saved us, and called us with an holy calling, not according to our works, but according to His own purpose and grace, which was given us in Christ Jesus before the world began…now made manifest by the appearing of our Savior Jesus Christ, who hath abolished death, and hath brought life and immortality to light through the gospel. 2 Timothy 1:8-10

After the crucifixion of Jesus, His apostles were in hiding, perplexed by the apparent loss of their Messiah. In their minds they were sure that it was Jesus who should have redeemed Israel. (Luke 24:21) After the report by the women that the tomb was empty, two of His disciples went to the village of Emmaus. As Jesus approached them on the way, they did not know Him because their eyes were restrained. After telling Him all that had happened, Jesus said to them, "Oh fools, and slow of heart to *believe all that the prophets have spoken*," and beginning at Moses and all the prophets, He expounded to them in all the Scriptures the things concerning Himself. Verse 32 says He *opened* the Scriptures. As Jesus continued with them and sat down to eat He broke bread – symbolic of His body which had been broken in death – and gave it to them and *their eyes were opened and they knew Him*.

Immediately after this the two disciples returned to Jerusalem, testifying to the eleven and those who were with them "how He was known to them in the breaking of bread." And as they were speaking, Jesus appeared to them in His resurrected body and *opened their understanding, that they might understand the Scriptures*:

These are the words which I spoke unto you, while I was yet with you, that *all things must be fulfilled*, which were written in the law of Moses, and in the prophets, and in the psalms, concerning Me. Luke 24:44-45

Though they had walked with Him and sat under His teachings for three years, the disciples did not even know Jesus until He opened the eyes of their understanding. How much more do we, who have never seen Him, need our eyes opened by the Holy Spirit of Truth in these days of such great deception? How would we know Him if He were to come to Jerusalem?

In Matthew chapters 23 and 24 the disciples asked Jesus, Tell us, when shall these things be? And what shall be the sign of your coming and of the end of the age? Jesus did not say, 'Hey guys, when you see all these things happening, get ready, because I'm coming back. You will know that I am the Messiah and we're going to set up the kingdom in Jerusalem!' Instead, He warned them, "Then if any man shall say unto you, Lo, here is Christ, or there; **believe it not**…if they shall say unto you, Behold, he is in the desert; **go not forth**: behold, he is in the secret chambers; **believe it not**.

If the rabbis of Kabbalah tell you the *Moshiach* is here, believe it not! If they say he is in the temple, go not forth!

Appendix

Mystery Babylon*: *The Great City Jerusalem

And upon her forehead was a name written, MYSTERY, BABYLON THE GREAT, THE MOTHER OF HARLOTS AND ABOMINATIONS OF THE EARTH…And I heard another voice from heaven, saying, Come out of her, My people, that ye be not partakers of her sins, and that ye receive not of her plagues.
Revelation 17:5, 18:4

Revelation 11:8 Reveals the Identity of the Great City

- Revelation 11:8 - And their dead bodies (the two witnesses) shall lie in the street of ***the great city***, which is spiritually called Sodom and Egypt, ***where also our Lord was crucified*** (Jerusalem).

Jesus was Crucified in the City of Jerusalem, the Great City

- Matthew 20:17-19 - And Jesus going up to ***Jerusalem*** took the twelve disciples apart in the way, and said unto them, Behold, we go up to Jerusalem; and the Son of man shall be betrayed unto the chief priests and unto the scribes, and they shall condemn him to death, And shall deliver him to the Gentiles to mock, and to scourge, and to crucify him: and the third day he shall rise again.

The Scriptures Refer to Mystery Babylon as the Great City

- Revelation 17:18 - And the woman which thou sawest is ***that great city***, which reigneth over the kings of the earth.
- Revelation 14:8 - And another angel followed, saying, Babylon is fallen, is fallen, ***that great city***, because she made all nations drink of the wine of the wrath of her fornication.
- Revelation 18:16 - And saying, Alas, ***that great city***, that was clothed in fine linen, and purple, and scarlet, and decked with gold, and precious stones, and pearls!

The Great City is Unique among the Cities of the Nations

- Revelation 18:18 - And (they) cried when they saw the smoke of her burning, saying, What city is like unto ***this great city***!
- Revelation 18:10 - Alas, alas ***that great city Babylon***. That mighty city! For in one hour is thy judgment come.

- Revelation 16:19 - And ***the great city*** was divided into three parts, and the cities of the nations fell: and great Babylon came in remembrance before God, to give unto her the cup of the wine of the fierceness of His wrath.

Mystery Babylon is Drunk with the Blood of the Prophets and Martyrs of Jesus Christ

- Luke 13:33 - ...***for it cannot be that a prophet should perish outside of Jerusalem***.
- Revelation 17:6 - And I saw the woman drunken with ***the blood of the saints, and with the blood of the martyrs of Jesus***: and when I saw her, I wondered with great amazement.
- Revelation 18:24 - And in her was found ***the blood of prophets, and of saints, and of all that were slain upon the earth***.
- Revelation 18:20 - Rejoice over her, thou heaven, and ye holy apostles and prophets; for ***God hath avenged you on her***.
- Revelation 16:6 – For they have ***shed the blood of saints and prophets***, and thou hast given them blood to drink; for they are worthy.

Jesus Identifies the Harlot with the Blood of the Righteous Prophets Upon Her Hands

- Matthew 23:37-39 - ***O Jerusalem, Jerusalem***, ***thou that killest the prophets***, and stonest them which are sent unto thee. How often would I have gathered thy children together, even as a hen gathereth her chickens under her wings, and ye would not! Behold, ***your house is left unto you desolate*** (Jerusalem is now seen in the eyes of God as desolate; as Sodom and Egypt!). For I say unto you, Ye shall not see me henceforth, till ye shall say, Blessed is He that cometh in the name of the Lord.
- Matthew 23:34-35 - (Jesus speaking to the Pharisees) Wherefore, behold, I send unto you prophets, and wise men, and scribes: and some of them ye shall kill and crucify; and some of them shall ye scourge in your synagogues, and persecute them from city to city: ***that upon you may come all the righteous blood shed upon the earth, from the blood of righteous Abel unto the blood of Zacharias son of Barachias***, whom ye slew between the temple and the altar.
- Luke 11:49-52 - (Jesus speaking to the Pharisees) Therefore also said the wisdom of God, I will send them prophets and apostles, and some of them they shall slay and persecute: ***that the blood of all the prophets, which was shed from the foundation of the world, may be required of this generation; From the blood of Abel unto the blood of Zacharias, which perished between the altar and the temple***: verily I say unto you, it shall be required of this generation.

Mystery Babylon is Burned with Fire in Judgment

- Revelation 17:16 - And the ten horns which thou sawest upon the beast, these shall hate the whore, and shall make her desolate and naked, and shall eat her flesh, and ***burn her with fire***.
- Revelation 18:17-19 - For in one hour so great riches is come to nought...And (they) cried when they saw ***the smoke of her burning***, saying, What city is like unto this

great city!

- Ezekiel 16:41 - And they shall ***burn thine houses with fire***, and execute judgments upon thee in the sight of many women: and I will cause thee to cease from ***playing the harlot***, and thou also shalt give no hire any more.

Old Testament Scriptures Identify the Harlot

- Isaiah 1:21 - How is ***the faithful city become a harlot***! It was full of judgment; righteousness lodged in it; but now murderers. (Compare with Jesus' words to the Pharisees, "You are of your father the devil...He was a murderer from the beginning...because there is no truth in him. John 8:44)
- Ezekiel 16:35 - Wherefore, ***O harlot***, hear the Word of the Lord.
- Ezekiel 16:15 - But you trusted in your own beauty, and ***played the harlot*** because of your fame, and poured out your harlotry on everyone passing by who would have it. (See verses 16 & 28)
- Deuteronomy 31:16 - And the Lord said to Moses, Behold, you will rest with your fathers; and this people will rise and ***play the harlot*** with the gods of the foreigners of the land, where they go to be among them, and they will forsake Me and break My covenant which I have made with them.
- Deuteronomy 31:29 - (Moses speaking to the elders before his death) For I know that after my death ***you will become utterly corrupt***, and ***turn aside from the way*** which I have commanded you. And ***evil will befall you in the latter days***, because you will do evil in the sight of the Lord, to provoke Him to anger through the work of your hands.

The Harlot is Clothed with Babylonian Scarlet and Purple

- Revelation 17:4, 18:16 - And the woman was arrayed in purple and scarlet colour, and decked with gold and precious stones and pearls, having a golden cup in her hand full of abominations and filthiness of her fornications…The merchants of these things, which were made rich by her…saying, Alas, alas that great city, that was clothed in fine linen, and purple, and scarlet, and decked with gold, and precious stones, and pearls!
- Jeremiah 4:30 - And when thou art spoiled, what wilt thou do? Though thou clothest thyself with crimson, though thou deckest thee with ornaments of gold…in vain shalt thou make thyself fair. (See Ezekiel 23:14-19)

The Voice of the Bridegroom Heard no More in the Great City

- Jeremiah 7:34 - Then will I cause to cease from the cities of Judah, and from the streets of Jerusalem, the voice of mirth, and the voice of gladness, ***the voice of the bridegroom, and the voice of the bride***: for the land shall be desolate.
- Jeremiah 16:9 - For thus saith the LORD of hosts, the God of Israel; Behold, I will cause to cease out of this place in your eyes, and in your days, the voice of mirth, and the voice of gladness, ***the voice of the bridegroom, and the voice of the bride***.
- Jeremiah 25:10 - Moreover I will take from them the voice of mirth, and the voice of gladness, ***the voice of the bridegroom, and the voice of the bride, the sound of the millstones, and the light of the candle***.
- Revelation 18:21-23 - And a mighty angel took up a stone like a great millstone, and cast it into the sea, saying, Thus with violence shall ***that great city Babylon*** be thrown down, and shall be found no more at all. And the voice of harpers, and musicians, and of pipers, and trumpeters, shall be heard no more at all in thee; and no craftsman, of whatsoever craft he be, shall be found any more in thee; and ***the sound of a millstone*** shall be heard no more at all in thee; And ***the light of a candle*** shall shine no more at all in thee; and ***the voice of the bridegroom and of the bride*** shall be heard no more at all in thee: for thy merchants were the great men of the earth; for ***by thy sorceries were all nations deceived***.

New Jerusalem is the Great City of God

- Isaiah 65:17 - ***For, behold, I create new heavens and a new earth***: ***and the former shall not be remembered, nor come into mind***.
- Isaiah 66:22 - For ***as the new heavens and the new earth, which I will make***, shall remain before me, saith the LORD, so shall your seed and your name remain.
- John 14:2-3 - In my Father's house are many mansions...***I go to prepare a place for you***. And if ***I go and prepare a place for you***, I will come again, and receive you unto myself; that where I am, there ye may be also.
- 2 Peter 3:13 - Nevertheless we, ***according to his promise***, look for ***new heavens and a new earth***, wherein dwelleth righteousness.
- Hebrews 11:10, 16 - For he (Abraham) looked for ***a city which hath foundations, whose builder and maker is God***...But now they desire ***a better country, that is, an heavenly***: wherefore God is not ashamed to be called their God: ***for he hath prepared for them a city***.
- Revelation 21:2, 10 - And I John saw ***the holy city, new Jerusalem***, coming down from God out of heaven, prepared as ***a bride adorned for her husband***...And he carried me away in the Spirit to a great and high mountain, and shewed me ***that great city, the holy Jerusalem***, descending out of heaven from God.
- Revelation 21:23-24 - And ***the city had no need of the sun***, neither of the moon, to shine in it: for the glory of God did lighten it, ***and the Lamb is the light thereof***. And the nations of them which are saved shall walk in the light of it.

This is a partial list of Scriptures which identifies Jerusalem as *Mystery Babylon*, the *Great City* and *Mother of Harlots*. There are over 80 Scriptures in the Old Testament that refer to Jerusalem as a harlot and many more that denounce her for her harlotries and whoredom with the *gods* of the surrounding nations.

YEA, YE TOOK UP THE TABERNACLE OF MOLOCH, AND THE STAR OF YOUR GOD REMPHAN, IMAGES WHICH YE MADE TO WORSHIP THEM: AND I WILL CARRY YOU AWAY BEYOND BABYLON.
Acts 7:43

But ye have borne the tabernacle of your Moloch and Chiun your images, the star of your god, which ye made to yourselves.
Amos 5:26

The six-pointed star has a history dating back to ancient Babylon. In Kabbalah it has long been regarded as an expression of the sacred name, the Tetragrammaton; the seal of the divine image of God connecting heaven and earth and a sign of universal redemption. The following quote is from the Israel Ministry of Foreign Affairs. 241

"The legend of King Solomon's Seal, of the wondrous signet ring which he received from heaven, is common to Judaism, to Christianity and to Islam. King Solomon's Seal, whose base is on the ground and whose tip reaches heaven, symbolizes a harmony of opposites…It relfects the cosmic order, the skies, the movement of the stars in their spheres, and the perpetual flow between heaven and earth…The seal, therefore, represents super-human wisdom and rule by divine grace…the abstract element of the figure and its geometrical completeness make it a universal symbol…The symbol of the hexagram, the star-like figure formed by two triangles, has many connotations, especially when it is enclosed by a circle. The magic drawings of the hexagram and the pentagram were known as seals, in keeping with the idea that a person 'stamps himself' with these signs in order to protect himself from harmful spirits. This term is connected to the legend of King Solomon who controlled the demons by means of a special signet ring on which was engraved the Tettragrammaton. The seal only had power for one thing to provide protection from malevolent forces."

Texts and Commentary

I. Amulets from Palestine and Syria

For Amulets 1-15 see *AMB*.

Amulet 16. Horvat Marish (ancient Meroth?). Bronze. Yose son of Zenobia seeks power over the townspeople. Israel Antiquities Authority, 84-317 43

Amulet 17. Tiberias. Silver. Healing Ina daughter of Ze'irti from fever and other sickness. Institute of Archaeology, Hebrew University, Jerusalem, No. 2028 50

Amulet 18. Provenance unknown. Gold. Removing an evil spirit from Klara daughter of Kyrana. Bernard Gimbel Collection, Saddle River, N.J. 57

Amulet 19. Horvat Kannah. Bronze. Removing various kinds of fever from Simon son of Kattia. Private collection 60

Amulet 20. Provenance unknown. Silver. Removing (evil) dreams from... and from Maximion. Bernard Gimbel Collection, Saddle River, N.J. 67

Amulet 21. Provenance unknown. Silver. Healing for Melekh son of Guzu. Geoffrey Cope Collection, Herzlia 68

Amulet 22. Provenance unknown. Silver. Amulet for Theodosius son of Theodora. Bible Lands Museum, Jerusalem 73
Amulet 23. Provenance unknown. Bronze. Healing for Teo daughter of Matrona from excrescence. Leonard A. Wolfe Collection, Jerusalem 77
Amulet 24. Provenance unknown. Silver. Healing for Qaduma son of Cyrill. Geoffrey Cope Collection, Herzlia 80
Amulet 25. Provenance unknown. Bronze. Removing the evil spirit from Nonn[a] daughter of Megale. Geoffrey Cope Collection, Herzlia 85
Amulet 26. Provenance unknown. Copper. For Ḥabibi son of Ḥerta against evil encounters. Skirball Museum, Hebrew Union College, Los Angeles, California 87
Amulet 27. Irbid. Silver. For the protection of Marian daughter of Sarah and her foetus. New York Public Library 91
Amulet 28. Irbid. Silver. For the protection of Marian daughter of Sarah and her foetus. New York Public Library 95
Amulet 29. Irbid. Bronze. For the protection of Georgius son of Megautes from the evil eye. New York Public Library 99
Amulet 30. Irbid (?). Bronze. For Surah daughter of Sarah, against premature delivery. The Metropolitan Museum of Art, New York 101
Amulet 31. Provenance unknown. Silver. Healing for Cassianus son of Domitia. Leonard A. Wolfe Collection, Jerusalem 105
Amulet 32. Provenance unknown. Christian Palestinian Aramaic. Bronze. Healing for Makaria and Timop... Geoffrey Cope Collection, Herzlia 107

II. Incantation Bowls from Mesopotamia

For Bowls 1-13 see *AMB*. No precise provenance is known for any of the following bowls.
Bowl 14. Protection for the house of Dabara son of Shelam with seven seals. Fiorella Cottier-Angeli Collection, Geneva 113
Bowl 15. Removing spirits from Goray son of Burzandukh and his family. Bible Lands Museum, Jerusalem 115
Bowl 16. Syriac. Expelling demons from the house of Yoyi'a son of Rašnendukh. Leonard A. Wolfe Collection, Jerusalem 118
Bowl 17. Syriac. Confounding the evil eye that smote Yoyi'a son of Rašnendukh. Bible Lands Museum, Jerusalem 120
Bowl 18. Removing the Tormentor from Panahurmizd son of Rašndukh and his household. Leonard A. Wolfe Collection, Jerusalem 122
Bowl 19. Healing and protection for Mihroy son of Ghušnay and others. Einhorn Collection, Tel Aviv 124
Bowl 20. Healing for Karkay son of Abaroy. Einhorn Collection, Tel Aviv 126
Bowl 21. Protection for Duday d. of Immi and others, using the story of an egg that runs after humans. Einhorn Collection, Tel Aviv 127
Bowl 22. Incantation for Marutha d. of Duda, to be protected by four angels on all sides. Einhorn Collection, Tel Aviv 130
Bowl 23. Amulet to protect Sergius son of Barandukh. Alexander L. Wolfe Collection, Jerusalem 132
Bowl 24. Wine-charm for Burz-Bahrām son of Dutay. Geoffrey Cope Collection, Herzlia 133
Bowl 25. Healing for Mahoy son of Imma, named Barshuti. Smithsonian Institution, Washington D.C. 137
Bowl 26. Syriac. Protection for Khusro son of Qaqay and Shelta daughter of Qayumta. Smithsonian Institution, Washington D.C. 139
Bowl 27. Protection for Berikhishi (?) son of Ahata. Leonard A. Wolfe Collection, Jerusalem 142

III. Amulets and Fragments of Magic Books from the Cairo Geniza

For Geı iza 1-8 see *AMB*
Geniza 9. T-S K 1.15. Four pages from a book of magic recipes: for easy birth, hatred, and for other purposes 147
Geniza 10. T-S K 1.18 + T-S K 1.30. Amulet on paper for a pregnant woman, Ḥabiba daughter of Zahra 152
Geniza 11. T.-S. K 1.19. Four pages from a book of magic recipes: for a barren woman, for opening locks, and for other purposes 158
Geniza 12. T-S K 1.42. Amulet against ʿAlī b. Nūḥ the Ishmaelite 164
Geniza 13. T-S K 1.57. Fragment from a book of magic recipes: For entering the presence of a sultan and for a safe journey 166

Geniza 14. T-S K 1.58. From a book of magic recipes: For shutting the mouths of enemies, for repelling scorpions 169
Geniza 15. T-S K 1.80. Formulae for overcoming one's enemies, for divination, and for other purposes 172
Geniza 16. T-S K 1.91 + K 1.117. Formulae for healing, for sleep, for making peace between a man and his wife, etc. 174
Geniza 17. T-S K 1.132. Recipes for divination, for being influential, for ease of learning, and for other purposes 181
Geniza 18. T-S K 1.143. "The Book of Guidance": a twenty-page fragment of a magic book 189
Geniza 19. T-S K1.167. Amulet for Sitahm daughter of Sitt al-Ahl 209
Geniza 20. T-S 12.41. Imprecations against anyone who unlawfully takes possession of a sacred book 212
Geniza 21. T-S Arabic 1c.36. Verses from the Book of Psalms for a headache, for gaining access to the sultan and for a safe journey 214
Geniza 22. T-S Misc. 27.4.11. From a book of magic recipes, with a recipe by R. Shimeon b. Yoḥay 216
Geniza 23. T-S Arabic 44.44. From a book of magic recipes: Formulae against forgetting, for love, and for other purposes 220
Geniza 24. T-S Arabic 44.127. From a manual of magic recipes: For repelling insects 222
Geniza 25. T-S Arabic 49.54. From a book of magic recipes: For a lame woman, for difficulty in childbirth, and for other purposes 227
Geniza 26. T-S Misc. 10.35 + Misc. 10.122. A collection of recipes: For love, for all purposes 230
Geniza 27. T-S Misc. 29.4. Amulet against Abū l-Karam al-Khazzāz the Christian 233
Geniza 28. T-S NS 246.32. Magic recipes for love, for finding favour with people, and for other purposes 235
Geniza 29. Or. 1080.6.19. Amulet to heal Sa'īda daughter of Sitt al-Ahl 238

PREFACE

In 1985, when the Magnes Press and E.J. Brill published our *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* (= *AMB*), we believed that we had used all extant Palestinian Aramaic amulets. In the years that have elapsed, however, many additional texts have come into our hands, and it was felt that the time had come to assemble a new collection of metal amulets, accompanied by Babylonian incantations on earthenware bowls and magic texts from the Cairo Geniza. This was partly due to the increased interest of collectors, who were kind enough to place their items at the disposal of the authors and to colleagues who drew our attention to the existence of further pieces in different collections.

In *AMB*, 15 Palestinian amulets, 13 Babylonian incantation bowls and 8 Geniza texts were published. The present volume contains additional texts in all three categories: 17 new amulets (A 16-32), 14 bowls (B 14-27) and 21 Geniza texts (G 9-29). Among the 52 new texts, the Palestinian amulets, incised on gold, silver or bronze plates, are of special importance. Until 1985 our knowledge of this field was very limited. Six previously known amulets were republished with new readings in *AMB* (A4, A5, A6, A7, A8 and A9). Three amulets from Irbid, published in 1911 by Montgomery (kept in the New York Public Library), were not incorporated in that book, as it was not possible to arrive at reliable readings on the basis of the photographs then available. Thanks to Dr. Roy Kotansky, who specializes in Greek amulets, and who provided us with better photographs, we were able to improve on Montgomery's readings. These are given in the present volume (A 27, A 28 and A 29). The other amulets that Dr. Kotansky brought to our attention are A 26, A 30 and A 31 (A 26 is in the Skirball Museum, in Los Angeles and A 30 in the Metropolitan Museum of New York). A relatively large number of amulets were in the possession of Mr. L. Alexander (Lenny) Wolfe; some are owned by Dr. Geoffrey Cope of Herzlia. The publication

of A 16 and 19 was made possible by the permission of the late Dr. Zvi Ilan. A 17 is in the Collection of the Institute of Archaeology at the Hebrew University. A 22 is now in the possession of the Bible Lands Museum, Jerusalem.

Some further items which have recently come to light have not been included in the present volume: two Aramaic amulets from the Paul Getty Museum were published by Kotansky 1991, and a bilingual one in Aramaic and Greek, from the Ashmolean Museum of Oxford (see Kotansky, Naveh and Shaked 1992). Some additional Aramaic and Syriac amulets are now being studied by the authors for future publication.

The majority of the magic bowls included in this volume are in private collections (Wolfe, Jerusalem; Einhorn, Tel Aviv; Cope, Herzlia; and Cottier-Angeli, Geneva) and in the Bible Lands Museum Jerusalem. B 25 and B 26 are in the possession of the National Museum of Natural History, the Smithsonian Institution, Washington D.C.

In recent years several other bowl texts have been published. Mention may be made here particularly of the articles by Smelik 1978, Franco 1978/9, Gordon 1984, Geller 1986, and Gawlikowski 1988. A Mandaic amulet was published by Greenfield and Naveh 1985. In *AMB*, reference to Stübe 1895 was omitted by an oversight from the bibliography, and this is rectified in the present volume.

The magic texts from the Cairo Geniza manuscripts were neglected for close to a whole century. Our attention to this material was drawn by Professor Yaakov Sussmann about ten years ago. Thus, after the edition of a number of such texts in Gottheil and Worrell 1927, Mann 1931/1935, pp. 90-94, and Margalioth 1966, the first systematic treatment of texts from the Cairo Geniza was done in Schäfer 1984 (from the point of view of the Hekhalot literature) and in *AMB*. Schäfer in collaboration with S. Shaked have now undertaken to publish an exhaustive collection of texts from the Cairo Geniza in the series Texte und Studien zum Antiken Judentum, and Schiffman and Swartz have also prepared a volume of Geniza texts.

The amulets and magic books in the Geniza were written in the Middle Ages, mostly between the tenth and the fourteenth centuries, but they follow the tradition of Palestinian Jewish magical texts of Late Antiquity. The Geniza texts reflect the language (Palestinian Jewish Aramaic) and formulae of Palestinian Jewish magic. They contain elements of Hebrew, as do also the Palestinian amulets, and they are influenced by Jewish Arabic, and possibly also by Babylonian literature. In the selection of

the Geniza material we have been guided primarily by the desire to find parallel texts to those of the Palestinian amulets included in this volume. Such parallels sometimes make it possible to reconstruct the texts of the amulets which are often damaged or incoherent, and make their reading and understanding in general much easier. Thus, the Geniza material, which essentially belongs to the Palestinian idiom of magic, is important for the decipherment of Palestinian magic in Late Antiquity. The selection of these texts was done partly from microfilms at the Jewish National and University Library in Jerusalem, and partly by working directly on the Geniza collection in Cambridge. Their study was based largely on photographs obtained from the Genizah Research Unit at the Cambridge University Library. The photographs included in this volume are reproduced with their kind permission.

All the texts are published here, as in *AMB*, with transliteration, translation and commentary. They are accompanied by the best available photographs (many of them done by Zeev Radovan); the metal amulets are also illustrated by facsimile drawings done by Ada Yardeni.

The Introduction examines some specific problems of Jewish magic in Late Antiquity, such as the relationship between magic and medicine on the one hand, and magic and other types of Jewish religious expression on the other, in particular the magic formulae occurring in standard Jewish prayers, especially the biblical verses used in magical texts.

A number of important surveys and studies of the magic material have been published in recent years. Particular mention may be made of the collection of Greek magical papyri in English translation prepared under the general editorship of Betz (1986). Alexander 1986 provides a comprehensive view of the whole field. One special focus of attention has been the relationship between the Merkava and Hekhalot literature, the Qumran writings, and Jewish liturgy and magic. In this general field, which is partly touched upon in our introduction, several studies have been published. We should like to mention in particular Halperin 1988; Schiffman 1982, 1987; Schäfer 1988b; Weinfeld 1976, 1979, 1982, 1990; Nitzan 1986; and Bar-Ilan 1985, 1987. This list is far from exhausting a subject which currently draws a great deal of scholarly attention.

We should like once again to express our gratitude to Dr. Ada Yardeni, who prepared the drawings included in the volume, and as usual her drawings reflect an independent view of the text, which contributed to our reading and understanding. The reader should be warned that the drawings are not always in perfect harmony with our readings.

It is a pleasant duty to thank Mr. Yuval Harary, who worked on the glossary. Prof. H.D. Betz made observations on some of the texts. Prof. Y. Sussmann helped to solve talmudic problems. Mr. Dan Benovici, Director of the Magnes Press, and his staff, especially Mr. Ram Goldberg, took every effort to bring the book out in the most satisfactory manner. The various collectors and directors of institutions who allowed us free access to documents in their possession deserve particular thanks.

The Research Committee of the Faculty of Humanities at the Hebrew University and the American Academy for Jewish Research have generously contributed towards the costs of the printing.

Texts and Commentary

I. Amulets from Palestine and Syria

For Amulets 1-15 see *AMB*.

Amulet 16. Horvat Marish (ancient Meroth?). Bronze. Yose son of Zenobia seeks power over the townspeople. Israel Antiquities Authority, 84-317 43

Amulet 17. Tiberias. Silver. Healing Ina daughter of Ze'irti from fever and other sickness. Institute of Archaeology, Hebrew University, Jerusalem, No. 2028 50

Amulet 18. Provenance unknown. Gold. Removing an evil spirit from Klara daughter of Kyrana. Bernard Gimbel Collection, Saddle River, N.J. 57

Amulet 19. Horvat Kannah. Bronze. Removing various kinds of fever from Simon son of Kattia. Private collection 60

Amulet 20. Provenance unknown. Silver. Removing (evil) dreams from... and from Maximion. Bernard Gimbel Collection, Saddle River, N.J. 67

Amulet 21. Provenance unknown. Silver. Healing for Melekh son of Guzu. Geoffrey Cope Collection, Herzlia 68

Amulet 22. Provenance unknown. Silver. Amulet for Theodosius son of Theodora. Bible Lands Museum, Jerusalem 73
Amulet 23. Provenance unknown. Bronze. Healing for Teo daughter of Matrona from excrescence. Leonard A. Wolfe Collection, Jerusalem 77
Amulet 24. Provenance unknown. Silver. Healing for Qaduma son of Cyrill. Geoffrey Cope Collection, Herzlia 80
Amulet 25. Provenance unknown. Bronze. Removing the evil spirit from Nonn[a] daughter of Megale. Geoffrey Cope Collection, Herzlia 85
Amulet 26. Provenance unknown. Copper. For Ḥabibi son of Ḥerta against evil encounters. Skirball Museum, Hebrew Union College, Los Angeles, California 87
Amulet 27. Irbid. Silver. For the protection of Marian daughter of Sarah and her foetus. New York Public Library 91
Amulet 28. Irbid. Silver. For the protection of Marian daughter of Sarah and her foetus. New York Public Library 95
Amulet 29. Irbid. Bronze. For the protection of Georgius son of Megautes from the evil eye. New York Public Library 99
Amulet 30. Irbid (?). Bronze. For Surah daughter of Sarah, against premature delivery. The Metropolitan Museum of Art, New York 101
Amulet 31. Provenance unknown. Silver. Healing for Cassianus son of Domitia. Leonard A. Wolfe Collection, Jerusalem 105
Amulet 32. Provenance unknown. Christian Palestinian Aramaic. Bronze. Healing for Makaria and Timop... Geoffrey Cope Collection, Herzlia 107

II. Incantation Bowls from Mesopotamia

For Bowls 1-13 see *AMB*. No precise provenance is known for any of the following bowls.
Bowl 14. Protection for the house of Dabara son of Shelam with seven seals. Fiorella Cottier-Angeli Collection, Geneva 113
Bowl 15. Removing spirits from Goray son of Burzandukh and his family. Bible Lands Museum, Jerusalem 115
Bowl 16. Syriac. Expelling demons from the house of Yoyi'a son of Rašnendukh. Leonard A. Wolfe Collection, Jerusalem 118
Bowl 17. Syriac. Confounding the evil eye that smote Yoyi'a son of Rašnendukh. Bible Lands Museum, Jerusalem 120
Bowl 18. Removing the Tormentor from Panahurmizd son of Rašndukh and his household. Leonard A. Wolfe Collection, Jerusalem 122
Bowl 19. Healing and protection for Mihroy son of Ghušnay and others. Einhorn Collection, Tel Aviv 124
Bowl 20. Healing for Karkay son of Abaroy. Einhorn Collection, Tel Aviv 126
Bowl 21. Protection for Duday d. of Immi and others, using the story of an egg that runs after humans. Einhorn Collection, Tel Aviv 127
Bowl 22. Incantation for Marutha d. of Duda, to be protected by four angels on all sides. Einhorn Collection, Tel Aviv 130
Bowl 23. Amulet to protect Sergius son of Barandukh. Alexander L. Wolfe Collection, Jerusalem 132
Bowl 24. Wine-charm for Burz-Bahrām son of Dutay. Geoffrey Cope Collection, Herzlia 133
Bowl 25. Healing for Mahoy son of Imma, named Barshuti. Smithsonian Institution, Washington D.C. 137
Bowl 26. Syriac. Protection for Khusro son of Qaqay and Shelta daughter of Qayumta. Smithsonian Institution, Washington D.C. 139
Bowl 27. Protection for Berikhishi (?) son of Ahata. Leonard A. Wolfe Collection, Jerusalem 142

III. Amulets and Fragments of Magic Books from the Cairo Geniza

For Geı iza 1-8 see *AMB*
Geniza 9. T-S K 1.15. Four pages from a book of magic recipes: for easy birth, hatred, and for other purposes 147
Geniza 10. T-S K 1.18 + T-S K 1.30. Amulet on paper for a pregnant woman, Ḥabiba daughter of Zahra 152
Geniza 11. T.-S. K 1.19. Four pages from a book of magic recipes: for a barren woman, for opening locks, and for other purposes 158
Geniza 12. T-S K 1.42. Amulet against ʿAlī b. Nūḥ the Ishmaelite 164
Geniza 13. T-S K 1.57. Fragment from a book of magic recipes: For entering the presence of a sultan and for a safe journey 166

Geniza 14. T-S K 1.58. From a book of magic recipes: For shutting the mouths of enemies, for repelling scorpions 169
Geniza 15. T-S K 1.80. Formulae for overcoming one's enemies, for divination, and for other purposes 172
Geniza 16. T-S K 1.91 + K 1.117. Formulae for healing, for sleep, for making peace between a man and his wife, etc. 174
Geniza 17. T-S K 1.132. Recipes for divination, for being influential, for ease of learning, and for other purposes 181
Geniza 18. T-S K 1.143. "The Book of Guidance": a twenty-page fragment of a magic book 189
Geniza 19. T-S K1.167. Amulet for Sitahm daughter of Sitt al-Ahl 209
Geniza 20. T-S 12.41. Imprecations against anyone who unlawfully takes possession of a sacred book 212
Geniza 21. T-S Arabic 1c.36. Verses from the Book of Psalms for a headache, for gaining access to the sultan and for a safe journey 214
Geniza 22. T-S Misc. 27.4.11. From a book of magic recipes, with a recipe by R. Shimeon b. Yoḥay 216
Geniza 23. T-S Arabic 44.44. From a book of magic recipes: Formulae against forgetting, for love, and for other purposes 220
Geniza 24. T-S Arabic 44.127. From a manual of magic recipes: For repelling insects 222
Geniza 25. T-S Arabic 49.54. From a book of magic recipes: For a lame woman, for difficulty in childbirth, and for other purposes 227
Geniza 26. T-S Misc. 10.35 + Misc. 10.122. A collection of recipes: For love, for all purposes 230
Geniza 27. T-S Misc. 29.4. Amulet against Abū l-Karam al-Khazzāz the Christian 233
Geniza 28. T-S NS 246.32. Magic recipes for love, for finding favour with people, and for other purposes 235
Geniza 29. Or. 1080.6.19. Amulet to heal Sa'īda daughter of Sitt al-Ahl 238

PREFACE

In 1985, when the Magnes Press and E.J. Brill published our *Amulets and Magic Bowls: Aramaic Incantations of Late Antiquity* (= *AMB*), we believed that we had used all extant Palestinian Aramaic amulets. In the years that have elapsed, however, many additional texts have come into our hands, and it was felt that the time had come to assemble a new collection of metal amulets, accompanied by Babylonian incantations on earthenware bowls and magic texts from the Cairo Geniza. This was partly due to the increased interest of collectors, who were kind enough to place their items at the disposal of the authors and to colleagues who drew our attention to the existence of further pieces in different collections.

In *AMB*, 15 Palestinian amulets, 13 Babylonian incantation bowls and 8 Geniza texts were published. The present volume contains additional texts in all three categories: 17 new amulets (A 16-32), 14 bowls (B 14-27) and 21 Geniza texts (G 9-29). Among the 52 new texts, the Palestinian amulets, incised on gold, silver or bronze plates, are of special importance. Until 1985 our knowledge of this field was very limited. Six previously known amulets were republished with new readings in *AMB* (A4, A5, A6, A7, A8 and A9). Three amulets from Irbid, published in 1911 by Montgomery (kept in the New York Public Library), were not incorporated in that book, as it was not possible to arrive at reliable readings on the basis of the photographs then available. Thanks to Dr. Roy Kotansky, who specializes in Greek amulets, and who provided us with better photographs, we were able to improve on Montgomery's readings. These are given in the present volume (A 27, A 28 and A 29). The other amulets that Dr. Kotansky brought to our attention are A 26, A 30 and A 31 (A 26 is in the Skirball Museum, in Los Angeles and A 30 in the Metropolitan Museum of New York). A relatively large number of amulets were in the possession of Mr. L. Alexander (Lenny) Wolfe; some are owned by Dr. Geoffrey Cope of Herzlia. The publication

of A 16 and 19 was made possible by the permission of the late Dr. Zvi Ilan. A 17 is in the Collection of the Institute of Archaeology at the Hebrew University. A 22 is now in the possession of the Bible Lands Museum, Jerusalem.

Some further items which have recently come to light have not been included in the present volume: two Aramaic amulets from the Paul Getty Museum were published by Kotansky 1991, and a bilingual one in Aramaic and Greek, from the Ashmolean Museum of Oxford (see Kotansky, Naveh and Shaked 1992). Some additional Aramaic and Syriac amulets are now being studied by the authors for future publication.

The majority of the magic bowls included in this volume are in private collections (Wolfe, Jerusalem; Einhorn, Tel Aviv; Cope, Herzlia; and Cottier-Angeli, Geneva) and in the Bible Lands Museum Jerusalem. B 25 and B 26 are in the possession of the National Museum of Natural History, the Smithsonian Institution, Washington D.C.

In recent years several other bowl texts have been published. Mention may be made here particularly of the articles by Smelik 1978, Franco 1978/9, Gordon 1984, Geller 1986, and Gawlikowski 1988. A Mandaic amulet was published by Greenfield and Naveh 1985. In *AMB*, reference to Stübe 1895 was omitted by an oversight from the bibliography, and this is rectified in the present volume.

The magic texts from the Cairo Geniza manuscripts were neglected for close to a whole century. Our attention to this material was drawn by Professor Yaakov Sussmann about ten years ago. Thus, after the edition of a number of such texts in Gottheil and Worrell 1927, Mann 1931/1935, pp. 90-94, and Margalioth 1966, the first systematic treatment of texts from the Cairo Geniza was done in Schäfer 1984 (from the point of view of the Hekhalot literature) and in *AMB*. Schäfer in collaboration with S. Shaked have now undertaken to publish an exhaustive collection of texts from the Cairo Geniza in the series Texte und Studien zum Antiken Judentum, and Schiffman and Swartz have also prepared a volume of Geniza texts.

The amulets and magic books in the Geniza were written in the Middle Ages, mostly between the tenth and the fourteenth centuries, but they follow the tradition of Palestinian Jewish magical texts of Late Antiquity. The Geniza texts reflect the language (Palestinian Jewish Aramaic) and formulae of Palestinian Jewish magic. They contain elements of Hebrew, as do also the Palestinian amulets, and they are influenced by Jewish Arabic, and possibly also by Babylonian literature. In the selection of

the Geniza material we have been guided primarily by the desire to find parallel texts to those of the Palestinian amulets included in this volume. Such parallels sometimes make it possible to reconstruct the texts of the amulets which are often damaged or incoherent, and make their reading and understanding in general much easier. Thus, the Geniza material, which essentially belongs to the Palestinian idiom of magic, is important for the decipherment of Palestinian magic in Late Antiquity. The selection of these texts was done partly from microfilms at the Jewish National and University Library in Jerusalem, and partly by working directly on the Geniza collection in Cambridge. Their study was based largely on photographs obtained from the Genizah Research Unit at the Cambridge University Library. The photographs included in this volume are reproduced with their kind permission.

All the texts are published here, as in *AMB*, with transliteration, translation and commentary. They are accompanied by the best available photographs (many of them done by Zeev Radovan); the metal amulets are also illustrated by facsimile drawings done by Ada Yardeni.

The Introduction examines some specific problems of Jewish magic in Late Antiquity, such as the relationship between magic and medicine on the one hand, and magic and other types of Jewish religious expression on the other, in particular the magic formulae occurring in standard Jewish prayers, especially the biblical verses used in magical texts.

A number of important surveys and studies of the magic material have been published in recent years. Particular mention may be made of the collection of Greek magical papyri in English translation prepared under the general editorship of Betz (1986). Alexander 1986 provides a comprehensive view of the whole field. One special focus of attention has been the relationship between the Merkava and Hekhalot literature, the Qumran writings, and Jewish liturgy and magic. In this general field, which is partly touched upon in our introduction, several studies have been published. We should like to mention in particular Halperin 1988; Schiffman 1982, 1987; Schäfer 1988b; Weinfeld 1976, 1979, 1982, 1990; Nitzan 1986; and Bar-Ilan 1985, 1987. This list is far from exhausting a subject which currently draws a great deal of scholarly attention.

We should like once again to express our gratitude to Dr. Ada Yardeni, who prepared the drawings included in the volume, and as usual her drawings reflect an independent view of the text, which contributed to our reading and understanding. The reader should be warned that the drawings are not always in perfect harmony with our readings.

It is a pleasant duty to thank Mr. Yuval Harary, who worked on the glossary. Prof. H.D. Betz made observations on some of the texts. Prof. Y. Sussmann helped to solve talmudic problems. Mr. Dan Benovici, Director of the Magnes Press, and his staff, especially Mr. Ram Goldberg, took every effort to bring the book out in the most satisfactory manner. The various collectors and directors of institutions who allowed us free access to documents in their possession deserve particular thanks.

The Research Committee of the Faculty of Humanities at the Hebrew University and the American Academy for Jewish Research have generously contributed towards the costs of the printing.

ANCIENT JEWISH MAGIC

This is a pioneering attempt to write a broad history of ancient Jewish magic, from the Second Temple to the rabbinic period. It is based both on the ancient magicians' own compositions (and products) in Aramaic, Hebrew, and Greek, and on the descriptions and prescriptions of non-magicians, in an effort to reconstruct a historical picture that is as balanced and nuanced as possible. The book's main focus is on the cultural make-up of ancient Jewish magic, with special attention paid to processes of cross-cultural contacts and borrowings between Jews and non-Jews and to inner-Jewish creativity. Other major issues are the place of magic within ancient Jewish society, contemporary Jewish attitudes to magic and the identity of its practitioners. Throughout, it seeks to explain the methodological underpinnings of all sound research in this demanding field, and to point out areas where further research is likely to prove fruitful.

GIDEON BOHAK teaches in the Department of Jewish Culture, University of Tel Aviv. He is author of *Joseph and Aseneth and the Jewish Temple in Heliopolis* (1996).

Scholarship is an eminently social thing, and the present study is no exception. Its ultimate origins lie in my Princeton days, when John Gager initiated me into the study of ancient magic. Its initial growth took place in Ann Arbor, when I was allowed to teach several courses on ancient magic and to curate an exhibition of ancient magical artifacts from the University of Michigan's rich archeological and papyrological collections (see Bohak 1996). But the book itself began to take shape here, at Tel-Aviv University, while teaching at the Department of Jewish Philosophy and the Program in Religious Studies and enjoying constant feedback from colleagues and students alike.

Many people have helped me along the way, with criticism and advice, and it is both a duty and a pleasure to thank them here. Ithamar Gruenwald, Yuval Harari, Reimund Leicht, and Dan Levene have been arguing with me on different aspects of ancient Jewish magic for many years now, and have commented on several chapters of this book when still in draft form. Shaul Shaked shared with me his unpublished work on the Genizah magical texts, without which this study would have been much the poorer, and provided helpful advice on numerous other occasions. And the anonymous readers of the original manuscript, who have left no stone unturned in their searching criticism, have surely helped me build a sounder scholarly structure. Finally, my students Ortal-Paz Saar and Bar Belinitzkey read the entire manuscript and improved it with many useful comments and suggestions, and my colleague Meir Shahar read it and assured me that some of it would make sense even to a Sinologist.

Many other scholars have helped me with specific advice, and shared some of their extensive knowledge with me. I am especially grateful to Tzvi Abusch, Avriel Bar-Levav, Jeffrey Chajes, Jacco Dieleman, Edna Engel, Esther and Hanan Eshel, Chris Faraone, Alexander Fodor, Mark Geller, David Jordan, Hagai Misgav, Matthew Morgenstern, Michael Morony, Shlomo Naeh, Arpád Nagy, Joseph Naveh, Bill Rebiger, Stefan Reif, Robert

Ritner, Ishai Rosen-Zvi, Peter Schäfer, Jeffrey Spier, Jacques van der Vliet, and Ada Yardeni. And if I have forgotten anyone, it was with no malice in mind, for I am forever grateful to all those who helped me in word or deed.

During the many years in which this book has been growing, I also had the occasion to present parts of my work on ancient Jewish magic in lectures, seminars, and conferences in Israel, Europe, and the USA. Listing all the places and occasions where I presented my work would make for a very tedious reading, but I would like to thank all these audiences for their helpful comments, criticism, and additional references, most of which have been incorporated into the present study. I would also like to thank the staff of the Tel-Aviv University Library and of the Institute of Microfilmed Hebrew Manuscripts in Jerusalem, for permission to study the microfilm copies of many Genizah fragments, and to the staffs of Cambridge University Library, the Library of the Jewish Theological Seminary, the Bodleian Library, and the British Library for granting me access to the actual fragments.

Finally, four institutions deserve special thanks. The Israel Science Foundation funded my research project on "Jewish Magical Recipe Books From the Cairo Genizah" (Grant no. 725/03). With this money, and the help of dedicated research assistants (Irena Lerman, Shani Levy (who also compiled the index for the present volume), and Karina Shalem), I have been able to survey hundreds of unpublished Genizah magical texts, and while the full results of this project shall be published elsewhere, they have done much to enrich my understanding of ancient and medieval Jewish magic, as shall be seen from the many references to unpublished Genizah fragments throughout the present study. The German Academic Exchange Service (DAAD) funded a month-long stay with Peter Schäfer and his research team at the Freie Universität, Berlin (September 2002), which enabled me to coordinate my research efforts with theirs. And the Institute for Advanced Study, at the Hebrew University, sponsored a research group on ancient magic (headed by Shaul Shaked, Yuval Harari, and myself) from March to August 2006. It was during that half year, among magic-oriented colleagues and friends, that the final version of this study was revised for publication.

Last, but by no means least, I wish to thank the Rothschild Foundation (Yad ha-Nadiv) for that fateful phone-call on 13 May 2001, informing me that I had won the Michael Bruno Award (sometimes seen as the Israeli version of the MacArthur Fellowship). This prize enabled me to take a leave of absence from all my university obligations for eighteen months, during which much of the research that went into this book was conducted. It also gave me that confidence which only comes with recognition and with

financial security, and enabled me to write the kind of book I have always had in mind. At a time when young academics are often forced to prostitute their half-baked wares to the goddess of productivity, I have been blessed with the challenge to produce the kind of monograph that would justify a prize I have already won, and with the opportunity to do so. I will always cherish the experience, but whether the final product indeed justifies the initial investment is only for you, the reader, to decide.

For Suzanne

Preface

This study began as my doctoral dissertation, "Liturgical Elements in Early Jewish Mysticism: A Literary Analysis of *Ma'aseh Merkavah*," presented to the Department of Near Eastern Languages and Literatures of New York University in May 1986. I have added an introduction and revised several chapters. In the introduction, which is based on the textual analysis carried out in the body of the study, the implications of *Ma'aseh Merkavah* for the study of the history of Judaism are assessed.

My interest in *Ma'aseh Merkavah* grows out of my longstanding interest in the language and history of Jewish prayer and in the history of Judaism in Late Antiquity. Upon reading Gershom Scholem's compelling account of Merkavah mysticism, I became interested in the possibilities the Hekhalot texts held for these areas and for examining the relationship between religious experience and literary expression. Upon confronting the texts themselves, and in light of the work done by Peter Schäfer and others on these texts, I became aware that methods needed to be developed for dealing with the historical and textual problems presented by the literature. This study is an effort to address such questions.

Portions of Chapter 11 appeared in my article, "*'Alay le-Shabbeaḥ: A Liturgical Prayer in Ma'aseh Merkavah*" (JQR 77 [1986–87]). Portions of Chapter 16 appeared as "Patterns of Mystical Prayer in Ancient Judaism: Progression of Themes in *Ma'aseh Merkavah*," in *New Perspectives on Ancient Judaism*, edited by Paul V. M. Flescher (Lanham, MD: University Press of America, 1990).

Many teachers, colleagues, and friends have contributed to my work. I have had wise and attentive advisers at New York University. Professors Baruch A. Levine, Francis E. Peters of New York University, Ross R. Brann, now of Cornell University, and Martin A. Cohen of Hebrew Union College-Jewish Institute of Religion, served as readers of my thesis. As my principal adviser and as a colleague, Professor Lawrence H. Schiffman, has been exceptionally generous with his time, advice, and knowledge. I am especially grateful for his counsel and encouragement. My research has also benefited from conversations and communications with the late Professor Alexander

Altmann and with Professors Peter Schäfer, Martin S. Cohen, Elizabeth Waller, Carol Newsom, Morton Smith, and David Blumenthal. At the University of Virginia, my colleagues Professors Gary Anderson, Benjamin Ray and Robert Wilken have made helpful suggestions and criticisms. My thanks also to Professor Schäfer for his interest in this book, and to Ms. Leslie Kobayashi for preparing the indexes. Of course, I alone am responsible for any errors or shortcomings in my work.

This book is also a product of deeper influences. Rabbi Elihu Schagrin, Emeritus of Temple Concord in Binghamton, New York, is responsible for much of my interest in Jewish religion and its sources. I will always be grateful to my parents, Bernard and Marcella Swartz, for their support, and to my brother Steven for his friendship. It is my hope that my work reflects their integrity and love of learning. This book is dedicated to my wife, Suzanne Silver, whose work and life continue to enrich mine immeasurably.

Jerusalem, November 1990 Michael D. Swartz

Introduction

Prayer is an important part of religious discourse and practice. Yet apart from the disciplines of liturgical history or theology, the study of prayer as a phenomenon in the history of religions has not often received systematic attention. In recent years, scholars have begun to ask how prayer functions in the context of a religious culture. New emphasis has been placed on examining the active or performative function of the language of prayer as against its informational or expressive function. Prayer, we have learned, is not only to supposed to say something; it is supposed to do something.

This study is a form-critical and historical analysis of *Ma'aseh Merkavah*, an anthology of Jewish mystical prayers of Late Antiquity. It is primarily an evaluation of the place of this text and of the forms of religion it reflects in the history of Jewish religion, and of the relationship of its ideas and literary forms to other liturgies and themes of ancient Judaism. But it is also an inquiry into the changing functions of prayer texts within a tradition of visionary mysticism, and how their literary forms reflect these functions.

I. Prayer and Religious Traditions

Contemporary students of prayer have done much to revise the views of the role of prayer in religion proposed by earlier historians of religion, notably by Frederich Heiler. Heiler, in his classic comparative study *Prayer*,[1] distinguished personal prayer from ritual prayer as set forth in prayer texts and liturgies. He considered the former to be true, authentic prayer, the latter secondary developments, artificial and of little value for the study of the dynamic relationship of the individual to God:

---

[1] F. Heiler, *Prayer: A Study in the History and Psychology of Religion*; trans. S. McComb and J.E. Park (1932).

> Prayer is at first a spontaneous, emotional discharge, a free outpouring of the heart. In the course of development, it becomes a fixed formula which people recite without feeling or mood of devotion, untouched both in heart and mind.[2]

Theorists such as Heiler saw such features as the use of repetition, stock formulae, and scriptural citations as marking the degeneration of prayer from the purely spiritual to the merely ritual. In fact, these very characteristics of the language of prayer actually constitute important evidence for the religious meaning and purpose of prayer. Such formulae are essential components of the cultural vocabulary of participants in traditional religions, often inseparable from their common vocabulary. Carl Keller, evaluating the place of prayer in mystical texts, observes:

> Prayers always give voice to a deep sense of God's presence, but they are formulated in traditional religious and theological language, and the praying believer never separates himself from the solid conceptual framework of his spiritual life.[3]

Not only are such formulae integral components of religious expression, they fulfill important functions in achieving the goals of prayer. Current studies of prayer have assigned a new importance to the formulaic language of prayer. Influenced by J. L. Austin's categories of performative language,[4] these scholars stress the power of words and formulae to do what the speaker intends over the information conveyed by those words.[5] A prayer not only expresses the worshipper's state of mind, or proclaims or teaches doctrine; it is an actor in a ritual context.[6] A given prayer is often intended to alter the

[5] For a survey of current research on prayer, see Gill, "Prayer," in *The Encyclopedia of Religion*. An very useful recent consideration of the problem of prayer and its poetics in anthropology is P. Metcalf, *Where are you, Spirits* (1989); see especially the introduction, 1–27. The following studies are based on fieldwork and are primarily concerned with the function of ritual language in nonliterate societies: R. Finnegan, "How to Do Things with Words: Performative Utterances among the Limba of Sierra Leone," *Man*, n.s. 4 (1969) 537–52; S. Gill, "Prayer as Person: The Performative Force in Navaho Prayer Acts," *History of Religions* 17 (1977), 143–57; Gill, *Native American Religious Action: A Performance Approach to Religion* (1987); *Sacred Words: A Study of Navaho Religion and Prayer* (1981); B. Ray, "Performative Utterances in African Ritual," *History of Religions* 13 (1973), 16–35; see also S.J. Tambiah, "The Magical Power of Words," *Man*, n.s. 3 (1968) 177–208; cf. W. Wheelock, "The Problem of Ritual Language: From Information to Situation," *JAAR* 50 (1982), 49–71. On the study of Jewish prayer, see below, n. 8.

[6] On this point see especially Gill, "Prayer as Person."

mood or state of mind of the worshipper or community of worshippers; it may also be intended to affect the relationship between the worshipper and God, the Divine forces, or the world. Analysis of rhetorical and conventional features of a prayer text can uncover these functions.

The role of prayer in mysticism bears on these questions in significant ways. For as mysticism is seen as having its roots in an individual's experience, prayer in mysticism is often seen in terms of its effect on this experience.[7] Prayer may express a mystical state, but it may also serve to engender a mystical state. As we shall see, the latter function has been ascribed to prayer in ancient Jewish mysticism by earlier scholars of the phenomenon. This hypothesis is questioned and tested below in the case of *Ma'aseh Merkavah*.

II. Prayer Texts in Judaism and Diachronic Analysis

The earlier views of prayer described above have also come under criticism from students of ancient Jewish prayer. R. Sarason argues that prayer in classical Judaism, far from being the "very hearthstone of all piety,"[8] must be seen in the context of the Rabbinic system of worship, which stresses study and the performance of statutory obligations. T. Zahavy argues for a distinction between the study of prayer texts and the treatment of and evidence for prayer as an act.[9]

---

[7] It is not the purpose of this study to address the problem of the terms mysticism and magic. For our purposes the term mysticism will be used heuristically to refer to the active effort of a person or persons to apprehend God directly, especially by means of a vision. The term magic in the context of ancient Judaism will refer to the use of ritual procedures involving divine names for practical purposes. On the problem of magic in ancient and medieval Judaism, see briefly M.D. Swartz, "Scribal Magic and Its Rhetoric: Formal Patterns in Medieval Hebrew and Aramaic Incantation Texts from the Cairo Genizah" *HTR* 83 (1990), 163–80 and L.H. Schiffman and M.D. Swartz, *Hebrew and Aramaic Incantation Texts from the Cairo Genizah: Selected Texts from Taylor-Schechter Box K1* (in press), Introduction. There an argument is made that the term magic is useful in the context of ancient and medieval Judaism as a category describing a distinct set of rhetorical and literary forms. It is not supposed here that there is an essential dichotomy between magic and religion.

[8] Heiler, *Prayer*, quoted in R. Sarason, "Religion and Worship," in J. Neusner (ed.), *Take Judaism, for Example* (1983), 49–65.

[9] T. Zahavy, "A New Approach to Early Jewish Prayer," in B. Bokser (ed.), *The History of Judaism: The Next Ten Years* (1980), 45–60. Gill also urges the consideration of prayer as an act. See "Prayer;" *Religious Action*; see especially pp. 89–146 on the problem of textuality in relation to prayer acts; and *Sacred Words*. On methodology in the study of Jewish prayer, see R. Sarason, "The Modern Study of Jewish Liturgy," and "Recent Developments in the Study of Jewish Liturgy," in J. Neusner (ed.), *The Study of Ancient Judaism*, vol. 1 (1981),

These scholars argue rightly for an approach which stresses placing the texts of prayer in the context of systemic analysis. Yet if the prayer in its legal or liturgical context plays its part in expressing the system of the community doing the praying, the prayer texts themselves often express something different. They express, among other things, the dynamics of the perceived relationship between the worshipper and God. God is referred to in one set of rules of discourse or activity – those of theology or law. But He is approached, addressed, entreated, praised, threatened, or thanked in another – the rhetorical canons of prayer.[10] Texts of prayer can have their own histories, and their own intrinsic formal and substantive characteristics which allow them to be set into their various contexts. The internal rhetoric of a prayer allows it to do something, while subsequent use of the text often makes it do something quite different. In such cases this disparity between a prayer's rhetorical dynamic and its contextual function is often manifest in how that prayer has been altered, truncated, or ornamented to serve its new role.

This problem calls for a distinction between the prayer and its rhetoric on the one hand, and its legal or literary context on the other. Such a distinction is made in the case of an ancient anthology of prayers such as *Ma'aseh Merkavah* through diachronic form-critical analysis of the text. By separating prayer passages from their redactional context, such an analysis can reveal the criteria and purposes for which the prayers were initially composed, and go on to describe how they were used in the system of the redactors. In addition, this analysis yields evidence for discrete layers of development of a religious phenomenon. It will be seen that prayer was used in *Ma'aseh Merkavah* for several distinct purposes, and that these purposes stand in significant contrast to the role of prayer in classical Rabbinic Judaism.[11]

Ma'aseh Merkavah also provides evidence for the use of literary units of prayer in contrasting contexts, that of Merkavah mysticism and that of the statutory liturgies of Rabbinic Judaism. The text contains parallels to prayers known from the traditional Jewish Babylonian and Palestinian liturgies. The value of these parallels is both historical and phenomenological; they allow us to determine whether the prayers originated in the mystical or liturgical tradition, and they allow us to see how the prayers operate in both contexts.

The purpose of this analysis of *Ma'aseh Merkavah* is thus twofold. It is an effort to illumine the historical question of the development of Merkavah

---

107–187; see also S. Reif, "Jewish Liturgical Research: Past, Present, and Future," *JJS* 34 (1983), 161–170.

[10] On this problem cf. the discussion in Metcalf, *Where are You, Spirits*, 3–4.

[11] On the form-critical methodology employed in this study and its implications for the study of Hekhalot literature, see Chapter 1 below.

mysticism as a system of apprehension of and communication with the Divine in Judaism of Late Antiquity. It is also an assessment the role of prayer in this process of development.

III. Merkavah Mysticism

Ma'aseh Merkavah is a central example of the texts of Merkavah mysticism, the visionary Jewish mysticism which flourished in Palestine and Babylonia in the second through eighth centuries, C. E. These texts are known as Hekhalot literature. The significance of Merkavah mysticism was first brought to the attention of scholars by Gershom Scholem in his *Major Trends in Jewish Mysticism*[12] and *Jewish Gnosticism, Merkavah Mysticism, and Talmudic Tradition.*[13] Scholem demonstrated its importance in the context of Judaism of Late Antiquity and suggested its implications for the study of classical, Rabbinic Judaism. As Scholem demonstrated, the Hekhalot texts contain some of the earliest evidence for Jewish mysticism and theurgy. Unlike other contemporary texts of Rabbinic religion, these texts center not on law, theology, or biblical exegesis, but on journeys purportedly undertaken by their authors through the *Hekhalot*, the seven heavenly "palaces" or chambers, to the Divine Chariot-Throne, the *Merkavah*. This journey, how to achieve it, and its dangers and rewards, are the heart of the literature, its organizing principle.

In *Ma'aseh Merkavah* prayer plays an active role, more so than in any other Hekhalot text. Prayers are seen in the text as the instruments by which the protagonists ascend, experience the vision of the upper realm, and protect themselves from the dangers of that vision. Because of the centrality of prayers and the qualities claimed for them in the text, *Ma'aseh Merkavah* can illuminate the question of the relationship of prayer to religious experience and mysticism in ancient Judaism.

Ma'aseh Merkavah also provides evidence for the changing function of prayer within the Hekhalot tradition. The form-critical analysis undertaken here demonstrates that the text underwent a process of evolution from a collection of prayers to be recited in community with the heavenly hosts, to a prescription for the active cultivation of the individual's ascent to and vision of the upper realm – that is, an evolution from liturgy to theurgy.

---

[12] Second ed. (1954).

[13] Second ed. (1965). For an account of the modern study of Merkavah mysticism, see chapter 1 below.

IV. Prayer in Hekhalot Literature

Prayer is generally regarded as an important testimony to the experiential, mystical character of Hekhalot literature. Merkavah prayer has been seen to be characterized by the use of repetition of synonyms, a hypnotic rhythm, and a numinous quality. P. Bloch first advanced the idea that Merkavah prayer employed these qualities to induce a trance.[14] He noted that strings of synonyms appear in the prayers without reference to specific concepts or deeds of God, and without any logical progression. These passages were, according to Bloch,

> Purely pleonastic and unisonous words which do not in the least assist the process of thought but merely reflect the emotional struggle.[15]

These characteristics were thus seen as more important to the prayers than semantic and theological considerations.

Scholem took this idea further in his description of the prayer of Merkavah mysticism. Inspired by Rudolf Otto's category of the numinous,[16] Scholem saw in the strings of synonyms and what he termed the "pompous" rhetoric of the prayers a "polylogy" directly intended to aid the mystic in his vision of God.

> Almost all the hymns from the Hekhaloth tracts, particularly those whose text has been preserved intact, reveal a mechanism comparable to the motion of an enormous fly-wheel.
>
> In cyclical rhythm the hymns succeed each other, and within them the adjurations of God follow in a crescendo of glittering and majestic attributes, each stressing and reinforcing the sonorous power of the world. The monotony of their rhythm – almost all consist of verses of four words – and the progressively sonorous incantations induce in those who are praying a state of mind bordering on ecstasy.[17]

Several of the precise patterns which comprise this style have been analyzed in an important series of articles by Johann Maier.[18] Maier shows that the specific forms utilized in *Hekhalot Rabbati* and related texts – simple repetition, litanies of attributes, short clauses describing God, and the like – generate an

---

[17] Scholem, *Major Trends*, 59–60.

[18] J. Maier, "'Attah hu 'Adon (Hekhalot Rabbati XXVI 5)," *Judaica* 22 (1966), 209–33; "Hekhalot Rabbati XXVII, 2–5," *Judaica* 21 (1965), 129–33; "Poetisch-liturgische Stücken aus dem 'Buch der Geheimnisse'," *Judaica* 24 (1968), 172–81; "Serienbildung und 'Numinoser' Eindruckseffekt in den poetischen Stücken der Hekhalot-Literatur," *Semitics* 3 (1973), 36–66.

accumulative rhythm which, according to Maier, aids in the process Scholem describes. The literary forms can thus be positively identified by these conspicuous features.

The descriptions of the character and function of Merkavah prayer described above were based to a great extent on *Hekhalot Rabbati*, the text which has been used most often as evidence for Merkavah mysticism.[19] Prayers in *Hekhalot Rabbati* may indeed have been composed for the purposes of engendering a mystical trance. *Ma'aseh Merkavah*, however, exhibits a rather different set of stylistic dynamics, with different implications for the role of prayer in Merkavah mysticism. The prayers which formed the basis for *Ma'aseh Merkavah* were not meant primarily to lift the worshipper from earthly contemplation to heavenly ascent, but to express his participation in an earthly liturgy corresponding to the angelic liturgy. Thus their primary purpose was evocative rather than instrumental. Only later did the authors of the narrative of the text attribute to the prayers the function of producing a vision of the Divine world.

In order to explain this process of evolution, it is necessary to describe *Ma'aseh Merkavah*, its subjects, themes, and strata of redaction. Once this has been accomplished, the character and function of prayer in the text will be analyzed, and the role of the text in the phenomenon of Merkavah mysticism will be evaluated.

V. *Ma'aseh Merkavah*

In 1946, Alexander Altmann published, from an important manuscript of Hekhalot literature, excerpts of a previously unpublished Hekhalot text.[20] Later Gershom Scholem published the entire text in *Jewish Gnosticism*,[21] giving it the name *Ma'aseh Merkavah*, "the work of the [Divine] Chariot" on the basis of a citation from Eleazar of Worms' *Sode Razaya'*.[22] *Ma'aseh Mer-*

[20]. A. Altmann, "*Shire Qedushah be-Sifrut ha-Hekhalot ha-Qedumah*," *Melilah* 2 (1946), 1–24. Scholem, however, did not acknowledge Altmann's prior publication.

[21] Pp. 103–17. On the manuscripts used by Altmann and Scholem, see Chapter 2 below.

[22] See *Gnosticism*, 76, 101. On this title, see Chapter 1, n. 18 below. The term *Ma'aseh Merkavah* is used in Rabbinic literature to denote the study and description of the great Chariot-throne of God, first described in the prophetic visions of Isaiah and Ezekiel. This throne is described in great detail in several of the Hekhalot texts, especially *Hekhalot*

kavah is included in Peter Schäfer's definitive synoptic edition of Hekhalot literature. Schäfer's edition forms the basis for this study.[23]

Altmann understood *Ma'aseh Merkavah* as an anthology of Hekhalot prayers to be recited in conjunction with the liturgical *qedushah*, the "sanctification," in which Isa. 6:3 is recited. He pointed out the longstanding relationship between visionary literature and hymn, and emphasized the liturgical references in the hymns.[24] He also dated the hymns in the first section of the text[25] to an earlier stage of Hekhalot literature, preceding the second section and preceding the prayers in *Hekhalot Rabbati*.[26]

A discussion of *Ma'aseh Merkavah* appears in I. Gruenwald's *Apocalyptic and Merkavah Mysticism*.[27] Gruenwald distinguishes between two types of prayers in *Ma'aseh Merkavah*: that type which "lacks the ecstatic quality of the hymns we meet in *Hekhalot Rabbati* and thus resembles common religious poetry," and those at the end of the text (§ 586–596) which contain extensive magical names and thus "expose their magical function." Gruenwald differed with Altmann's view of the priority of the former type and suggests that the latter type may "represent a more original phase of *Hekhalot* hymnology than do their counterparts in *Hekhalot Rabbati*."[28] Gruenwald's case is in part built on Scholem's assertion that theurgic elements of the Merkavah phenomenon are as old as other elements[29] and on the idea described above that the primary purpose of Merkavah prayer is to induce a mystical trance. It will be seen that this study comes to different conclusions about the history and function of prayers in *Ma'aseh Merkavah*.

Ma'aseh Merkavah is the subject of a recent study by N. Janowitz.[30] In *Poetics*

Rabbati and the later treatise *Massekhet Hekhalot*. But paradoxically, this description is not prevalent in *Ma'aseh Merkavah*.

[23] P. Schäfer, *Synopse zur Hekhalot-Literatur* (1981). *Ma'aseh Merkavah* extends in the *Synopse* from § 544–596. All references to *Ma'aseh Merkavah* in this study will follow the numbering of the *Synopse*. Other references to Hekhalot literature will also follow the *Synopse* unless otherwise noted. On the implications of Schäfer's edition and his methods for the study of Hekhalot literature, see Chapter 1 below.

[24] Altmann, "*Shire Qedushah*," 4–5.

[25] On the divisions of the text, see below.

[26] Altmann, "*Shire Qedushah*," 8. This dating is based on Scholem's opinion (*Major Trends*, 46–47) that the term *'aliyah*, "ascent [to the Merkavah]," which is prevalent in the first part of *Ma'aseh Merkavah*, preceded the term *yeridah*, "descent." Scholem's judgment is based on his unproven theory of the antiquity of *Hekhalot Zutarti*, where *'aliyah* is used, in relationship to *Hekhalot Rabbati*, in which *yeridah* predominates. In chapter 18 of this study the dating of *Ma'aseh Merkavah* is based primarily on stylistic criteria.

[30] N. Janowitz, *The Poetics of Ascent: Theories of Language in a Rabbinic Ascent Text* (1989).

of Ascent, methods developed in structural and ethnographic linguistics are brought to bear on *Ma'aseh Merkavah* for the purposes of examining the theories of language in the text. Janowitz sees *Ma'aseh Merkavah* as expressing a distinct ideology of language in which the employment of the name and the reciting of the hymns accomplishes ascent. In the narrative, which frames reported speech, Rabbis Ishamel and Akiba serve as models for the reader, allowing the reader to participate in the act of ascent.

Janowitz's study is notable for its analysis of how magical language and divine names are used in the text as a whole, and of the implications of these conceptions for linguistic and ritual theory. It does not primarily address questions of the historical implications of the literary nature of *Ma'aseh Merkavah*, of the prior development of the text or of the immediate context in which the prayer materials arose.[31] As is explained in Chapter 1 below on the textual study of *Ma'aseh Merkavah*, such questions are occasioned by the composite nature of the Hekhalot literature, reflected in the literary evidence for the text. It will be shown that gross variations between the recensions and the inner dynamics of individual units allow us to look into the redactional – and thus the historical – process. In addition, it will be seen that the literary style of the prayers, such as parallelism and the accumulation of synonyms, reflect specific poetic techniques consciously employed by their composers.[32]

Although Janowitz acknowledges that textual variants and the presence of component materials do characterize *Ma'aseh Merkavah*,[33] her focus is on

---

[31] Janowitz notes that *Ma'aseh Merkavah* is "a contextless text that cannot be placed in a specific historical community" (*Poetics of Ascent*, 15). Her approach to this problem is to see the text as "context creating" by virtue of the speech constructions in the narrative which attribute the power of ascent to the name of the deity in the prayers (ibid., 16). While this makes possible her analysis of the narrative's view of the function of the prayers and their magical names, it leaves open the question of the immediate context (the form critic's *Sitz im Leben*) in which the prayers arose. Cf. her discussion (ibid., 10–11) of Silverstein's distinction between purposive function and indexical function, based on M. Silverstein, "The culture of language in Chinookan narrative texts; or On saying that ... in Chinook," in J. Nichols and A. C. Woodbury, *Grammar Inside and Outside the Clause* (1985), 132.

[32] J. Fox, "Roman Jakobson and the Comparative Study of Parallelism," in D. Armstrong and C. H. van Schooneveld (eds.), *Roman Jakobson: Echoes of His Scholarship* (1977), 59–90, following R. Jakobson, "Parallelism and its Russian Facet," in S. Rudy (ed.), *Roman Jakobson: Selected Writings* (1981), 98, distinguishes between the idea of parallelism as a way of structuring rhetorical language and "canonical parallelism" as a specific poetic technique. Although the parallelism used in *Ma'aseh Merkavah* is not "compulsory," that is, not strictly followed, the term will be used in this latter sense. This analysis will thus deal with the implications of the canonical parallelism of Hebrew poetry in Late Antiquity for *Ma'aseh Merkavah* in its cultural context. Cf. Janowitz, *Poetics of Ascent*, 11–12.

[33] *Poetics of Ascent*, pp. 4 and 22. Manuscript variations and problems of internal coherence are discussed in an appendix, pp. 113–26.

analyzing those materials in the narrative context of one manuscript's recension. Thus *Ma'aseh Merkavah* is treated in effect as a unitary document, reflecting a coherent ideology. In Janowitz's view, all elements and genres within the text – prayers, names, and narrative – contribute to this ideology.[34] Janowitz thus sees homologies between the various stylistic elements of the text and its ideological aspects – for example, between the poetic parallelism of the hymns and the framing structure of the narrative which reflects the text's concept of ascent. Likewise, synonyms are piled up in the name formulae and poetry in the way the heavens are piled up in the cosmology.[35]

The present study takes a different approach. Its goals are to uncover the process of development of the text, place *Ma'aseh Merkavah* primarily in historical context, and from there to consider the contrasting ways in which prayer is used by its composers and redactors. *Ma'aseh Merkavah* is therefore analyzed here form-critically and diachronically, with particular attention to the role of liturgical literature in the text. Literary and text-critical questions are thus placed at the center of this study. In addition, literary forms and styles, particularly of the prayers in *Ma'aseh Merkavah*, are analyzed in comparison with their proximate sources in Jewish liturgical literature, the Hekhalot corpus, and the poetry of the Rabbinic period. It will be shown that these corpora are directly relevant for understanding the function of the prayers in *Ma'aseh Merkavah* as their composers understood it. The results and implications of this inquiry are described in this Introduction below.

A. The Development of the Text

Ma'aseh Merkavah actually consists of three texts, each composed of sayings attributed to Rabbis of the second century C. E. These texts are designated as Sections in this study. These texts consist of prayers framed by narrative. The narrative purports to tell how the these Rabbis acquired Divine visions and secrets. Section I tells how Rabbi Akiba learned the secrets of ascending through the layers of heaven, the Hekhalot, to witness God in His heavenly court and His Merkavah. Sections II and III tell how Rabbi Ishmael conjured the angels who imparted to him the secrets of acquiring wisdom. These angels are known as the "Prince of the Torah" (*Sar ha-Torah*) and the "Angel of the Presence" (*Mal'akh ha-Panim*).[36]

---

[34] On Janowitz's approach to the problems of composite composition and historical context, see *Poetics of Ascent*, 15–16. Janowitz sees many of the components as reflecting "different tactics but similar general strategies" (p. 16).

[35] ibid., 87–88.

[36] On The *Sar ha-Torah* traditions see Scholem, *Major Trends*, 77–78; and Gruenwald, *Apocalyptic*, 143–44, 185–86.

Preface

This is the second of an envisaged seven volumes of Jewish Babylonian Aramaic magic bowls from the Schøyen Collection. It contains texts JBA 65 to JBA 119. Various factors delayed the appearance of the present volume, but it is hoped that subsequent volumes will appear in a more expeditious manner.

As with the first volume, we are grateful to Dr Naama Vilozny for providing illustrations and descriptions of the images contained in the bowls. We are grateful to Professor Matthew Morgenstern for his generous advice on various linguistic problems in the texts and for permission to use his photographs, both in this volume and on the Virtual Magic Bowl Archive (VMBA). The VMBA is in the process of being updated and upgraded; hopefully, there will be a full update on this in the next volume. We are also grateful to Siam Bhayro's erstwhile student, Dr Anne Burberry, for producing the Glossary and Lists, as well as checking the editions. Finally, we would like to thank our publisher and typesetter for their patience and expertise, particularly Erika Mandarino, Katelyn Chin, and, more recently, Emma de Looij and Bart Nijsten.

It was with great sadness and a profound sense of loss that, as this volume was being typeset, we learned of the passing of our friend, colleague and mentor, Professor Shaul Shaked.

AN ARAMAIC INCANTATION TEXT*

BAHAA AMER AL-JUBOURI

UNIVERSITY OF BAGHDAD

Abstract

Incantation bowls are generally written in a formal standardized literary Eastern Aramaic. The present article publishes a new incantation bowl that is written in Hebrew square characters and is directed against various types of malevolent forces. Its text runs from the bottom of the vessel to the top in spiral form in eight lines. It is part of a collection housed in the Iraq Museum (IM 212092). Its provenance is unknown.

In this article I wish to add a new Aramaic incantation bowl (IM 212092) to the body of texts presently known. Unfortunately, its provenance is not known, but it is now located in the Iraq Museum (IM 212092). The text runs from the bottom of the vessel to the top in spiral form.

The text asks for protection from various evils for a man and his wife, their children (sons and daughters), his house, his threshold, his residence, his dwelling, his seed, all his property and his whole household.

It is necessary to bear in mind that the forms of the letters *h* and *ḥ* are identical, and they were probably pronounced alike.[1] It is often hard to distinguish *d* from *r*, and *b* from *k*. Most troublesome are *w*, *y* and final *n*, all of which are similar.

In the following transcription, line numbers are in parentheses ( ) and restorations are enclosed in square brackets [ ].

Description

15cm × 6cm flat-based bowl with simple rim inscribed in a spiral from the centre outwards, enclosed in inner and outer circles. Provenance unknown.

* I would like to express my sincere thanks to Dr Sebastian Brock for kindly discussing with me the text studied here.

Translation

(1.) By your great name I act; may there be healing and sealing and arming and guarding from heaven for Narseh son of Ginbod (2.) and for Hormizat Anahîd his wife, and for his house and his sons and his daughters; that they may be healed and sealed and guarded by the mercy of heaven from Liliths and monsters (3.) and curses and vows and all evil sorceries and all powerful magic practices and all species of dispatches of night and day, I adjure you (4.) Seraphiel, the angel who is appointed over all the roots of the world in the name of Yahweh, Lord of Hosts, God of Israel, that dwells between the cherubim, stay firm, keep uprooting and annulling all malice and demons and she-demons and hateful (5.) dreams and evil visions and Liliths and monsters and curses and vows and sorceries and magic practices and escorts from Narseh son of Ginbod and Hormizat Anahîd his wife and sons and his daughters, that they have and that they shall have, (6.) from his house and his dwelling and his residence and his seed and his property in the name of Gabriel, captain of the host, and Michael, the chief of holy ones, and Raphael, the master of cures, and Nuriel, the master of the head of fire, and ʻAqalqiel, the angel, the great frightener of all the children of the Heights; (7.) you, seal and arm and guard Narseh son of Ginbod and Hormizat Anahîd his wife, and his sons and his daughters and his residence and his dwelling

Downloaded from http://jss.oxfordjournals.org/ by guest on March 19, 2013

and his seed and his property and all of his house from escorts and demons and she-demons (8.) and Liliths and monsters and curses and vows and all evil sorceries and all powerful magic practices and all species of dispatches of night and day and dreams and evil and hateful apparitions, Amen, Amen, Selah.

Commentary

Inscribed bowl with eight lines for a man and his family against all evil spirits.

L.1. **לישמך הגדול אני עושה**: this is a frequent Hebrew formula indicating God's support.
זרזתא: this occurs especially in Mandaic incantation bowls.
נרסה: Persian name.[2] It appears in one of the McCullough Mandaic bowls as ***n'rs'y***.[3]
גינבוד: the masculine name **גינבוד** is new in the bowls. We could read it as **גינבור** because of the similarity of the letters *d* and *r*.

L. 2. **הורמיזת אנהיד**: this is a compound feminine Persian name.
הורמיזת: female proper name commonly found in the Montgomery texts as the masculine *Hormiz*.[4] **אנהיד** is the Iranian name for the planet Venus, found in an incantation published by Gordon.[5]
די[ת]סון: in the original, **ת** was first omitted, then added supralinearly.

L. 3. **שדראתא**: 'dispatches' or possibly 'emissaries'.[6]

L. 4. **שרפיאל**[7]: this angel appears in Montgomery's bowls as **סרפיאל** (Nos 14, 5 and 19, 8).[8]
יושיב הכרובים: biblical phrase used as an epithet of Yahweh, e. g. 1 Sam. 4:4, 2 Sam. 6:2, and 1 Chron. 13:6. The second *yod* in **יושיב** represents *ṣere*.

[7] The original **שׂ** merged with **ס**, see W. Wright, *Lectures on the Comparative Grammar of the Semitic Languages* (Amsterdam 1966), 58, 74 and S. Moscati, et al., *An Introduction to the Comparative Grammar of the Semitic Languages* (Wiesbaden 1969), 35–6.

[8] Montgomery, op. cit, 272.

Downloaded from http://jss.oxfordjournals.org/ by guest on March 19, 2013

L. 5. **מלויאתא**: an active participle pa'el in feminine plural of the root **לְוָא**, **לְוִי** meaning 'to escort'.[9] It is, probably equivalent to the female demon in Arabic *Tābi'ah* 'she who accompanies'. **מלויתא** describes Lilith, the childbirth-afflicting demoness, on Jewish Aramaic bowls.[10]

L. 6 **שר הצבא**: an angelic title in Josh. 5:14 (though the angel is unnamed there).

In this incantation we have a list of five angels' names: Gabriel, Michael, Raphael, Nuriel and 'Aqalqiel.[11]

שר הקדישים: the reference to Michael as *sar ha-qaddīshīm* is based on Dan. 10:13, where Michael is 'one of the *sārīm*'.

נוריאל בעל ראש נורא: 'Nuriel master of the head of fire' appears in another incantation bowl (IM 212103) as **נוריאל איסרא דנורא** 'Nuriel angel of fire'.[12]

עקלקיאל: this is probably the name of an angel. It has appeared in one other Aramaic incantation bowl (IM 2929).[13] The second element is El.

מזיע: participle active af'el of the root **זוּעַ** meaning 'frighten'.[14] It appears in the Gordon bowls (Text H, 3).[15]

L. 7. **זירזוה**: the root **זרז** is found elsewhere in the Montgomery bowls.

כוליה: signifies 'whole'. It is known in the Montgomery bowls (No. 7, 15).[16]

L. 8. [**מי**]**ני שדראתא דליליא**: the incantation bowl has been physically damaged, but the first two letters are very clear. The lost letters can be restored from **מיני שדראתא דליליא**, which also appears in line 3.

MAGICAL AND RELIGIOUS LITERATURE OF LATE ANTIQUITY 8
SERIES EDITORS *Shaul Shaked and Siam Bhayro*

Aramaic Incantation Bowls in Museum Collections

The Frau Professor Hilprecht Collection of Babylonian Antiquities at Friedrich-Schiller-Universität Jena houses one of the major European collections of incantation bowls. Forty bowls bear texts written in the Jewish, Manichaean Syriac or Mandaic scripts, and most of the rest (some twenty-five objects) in the Pahlavi script or in various pseudoscripts. The present volume comprises new editions of the Aramaic (and Hebrew) bowl texts based on high-resolution photographs taken by the authors, together with brief descriptions and photographs of the remaining material. New readings are often supported with close-up photographs. The volume is intended to serve as a basis for further study of magic in late Antiquity and of the Late Eastern Aramaic dialects in which the texts were composed.

James Nathan Ford, Ph.D. (2003) in Ugaritic magic, the Hebrew University of Jerusalem, is Associate Professor in Semitic Languages at Bar-Ilan University. His research interests include Semitic philology and ancient Near Eastern and Jewish magic.

Matthew Morgenstern, Ph.D. (2002) in Babylonian Aramaic, the Hebrew University of Jerusalem, is Professor in Hebrew and Semitic Languages at Tel Aviv University. His research interests include Eastern Aramaic grammar and lexicography and the Hebrew and Aramaic of the Dead Sea Scrolls.

Title: Aramaic incantation bowls in museum collections / James Nathan Ford, Matthew Morgenstern.
Description: Leiden ; Boston : Brill, [2020– | Series: Magical and religious literature of Late Antiquity, 2211016X ; volume 8 | Includes bibliographical references and index. | Contents: Volume one. The Frau Professor Hilprecht Collection of Babylonian Antiquities, Jena | Summary: "The Frau Professor Hilprecht Collection of Babylonian Antiquities at Friedrich-Schiller-Universität Jena houses one of the major European collections of incantation bowls. Forty bowls bear texts written in the Jewish, Manichaean Syriac or Mandaic scripts, and most of the rest (some twenty-five objects) in the Pahlavi script or in various pseudoscripts. The present volume comprises new editions of the Aramaic (and Hebrew) bowl texts based on high-resolution photographs taken by the authors, together with brief descriptions and photographs of the remaining material. New readings are often supported with close-up photographs. The volume is intended to serve as a basis for further study of magic in late Antiquity and of the Late Eastern Aramaic dialects in which the texts were composed"—Provided by publisher.

Preface

The present study presents a new edition of all of the legible Aramaic incantation bowl texts in the Frau Professor Hilprecht Collection of Babylonian Antiquities at Friedrich-Schiller-Universität Jena. The preparation of such an edition, which was undertaken over the course of several years, would not have been possible without the collaboration and support of many colleagues, whose assistance we would like to acknowledge here.

First and foremost, Professor Dr. Manfred Krebernik, the curator of the Frau Professor Hilprecht Collection, welcomed both authors on separate occasions to Jena and kindly granted us access to the original artifacts and permission to photograph and publish them. As a scholar with wide experience in publishing ancient inscriptions, Professor Krebernik graciously supported our endeavours to improve the readings of the *editio princeps* and to produce a new edition of the texts. We deeply appreciate his dedication to critical scholarship.

One item in the collection, HS 3005, is currently on loan to the Kultur- und Stadthistorisches Museum Duisburg. We would like to thank Dr. Andrea Gropp and Ms. Sylvia Stark for facilitating the photographing of the bowl.

The largest documented collection of unpublished incantation bowls is that of the Martin Schøyen Collection of Oslo and London. To date, one volume of this collection has been published, while others are in advanced states of preparation. We wish to thank Professor Shaul Shaked and Professor Siam Bhayro for permission to cite from the unpublished editions, which are being prepared in collaboration with one of the present authors, J.N. Ford. Other scholars who have generously shared their unpublished work with us include Professor Dan Levene, Professor Marco Moriggi, Dr. Alexey Lyavdansky, Dr. Katherine Blanchard and Dr. Ortal-Paz Saar. In a field where many of the texts are damaged or fragmentary, and much of the material remains unpublished or uncollated, good collaborative relationships between scholars make a substantial difference to the quality of the editions.

We would also like to express our deep gratitude to a number of people who generously gave us access to their unpublished magic bowls. In particular, Ms. Lisa Marie Knothe allowed us to photograph and study a large number of bowls formerly in her possession. Mr. L. Alexander Wolfe likewise granted us access to his large collection and facilitated our access to other private collections. We are similarly indebted to Steve Adler J.D., Mr. Maher Aweidah, Mr. Fayez Barakat, Mr. Gil Davidovitz and Ms. Ester Davidovitz, Hajj Nabil al-Hroub, Dr. David Jeselsohn, Mr. Yosef Matisyahu, the late Dr. Shlomo Moussaieff, Mr. Akram Sawalha, Mr. David Sofer and Mr. Sami Taha. Access to these bowls has been of inestimable benefit to our work and they are cited on almost every page.

Dr. Ohad Abudraham made a substantial contribution to this volume. He not only prepared the Glossary and most of the other lists, but also read the entire manuscript and offered many valuable comments. Some have been cited in his name and others incorporated anonymously. We are also grateful to Professor Gideon Bohak for reading the manuscript and sharing with us from his vast knowledge of Jewish magic. Dr. Domenico Agostini kindly provided us with an analysis of the cursive scripts of the bowls in section IV. Our comments on the Pahlavi and Pahlavi-like scripts are based on his evaluation.

With the generous permission of Professor Krebernik, high-resolution close-up digital photographs of the entire collection taken by the authors will be made freely available for academic study and teaching at the Virtual Magic Bowl Archive, maintained under the auspices of the University of Exeter (http://humanities-research.exeter.ac.uk/vmba/).

This research was supported by Israel Science Foundation grants 1306/12 (Ford) and 329/17 (Morgenstern).

Introduction

In 2005, the collection of Aramaic incantation bowls from the Frau Hilprecht Collection was published in an *editio princeps* by Christa Müller-Kessler (henceforth: MK). This ground-breaking work presented full transcriptions (into Latin script) and translations into German of all the legible texts in the collection accompanied by introductory notes listing for each item its dimensions, state of preservation, script, language, text-layout, number of lines, illustrations, client names and contents (including lists of parallels from other bowl texts). Previous publications of the text or photographs thereof were noted, as well as extensive literature relating to the text. The text and translation were furnished with a philological commentary. Black and white photographs of the texts of reasonable quality were printed at the end of the book. MK supplemented the volume with first editions or re-publications of a considerable number of parallel bowl texts (25 bowls), most known with certainty to have come from Nippur, as did the bowls in the Hilprecht collection. She also included a first edition of a section of a late Mandaic magical text from the Drower Collection and a re-edition of part of an early Mandaic lead amulet.

MK is to be commended for having published the entire corpus of the Hilprecht collection of incantation bowls, while previous scholars (e.g. Gordon) had merely selected for themselves some of the more legible texts. Every re-edition of a textual corpus seeks to build upon the accomplishments of previous editors, and in the present case our edition is particularly indebted to the work of MK.[2] The reader will immediately note that in most texts the greater part of our readings concur with those of MK. Nevertheless, in our opinion, her edition suffers from a number of weaknesses which justified the production of a new edition of the texts.

First and foremost are the numerous speculative emendations which mar almost every transcription (see already Morgenstern 2010a: 283 and *passim*). No one doubts that the practitioners who wrote the bowls sometimes made errors; they themselves occasionally corrected the texts that they wrote. Nevertheless, in our opinion, many of MK's emendations are gratuitous and are based on an idiosyncratic view of what *should* be written, rather than an attempt to understand what *is* written, both in terms of grammar and formulation. Other emendations stem from misreadings; the need for any emendation disappears when the text is correctly read. The following are representative examples; others are presented in the commentary throughout the book.

1. Gratuitous emendations:

HS 3001:1: וממי אינתה ו{ל}⟨ד⟩ממי אינתה "und seiner Frau Mamay." The preposition **l**- here provides valuable rare testimony to a colloquialism in Eastern Aramaic, which is lost when the text is unnecessarily emended.

HS 3003:8: מדד בשעולו מים {שמדד}{ב}מ⟨י⟩ "bei demjenigen, der das Wasser mit seiner hohlen Hand mißt." In the parallel passage in IM 114987:7 (TMHC 7, 4a), MK transcribes the identical text as במ⟨י⟩ שמדד {מדד} בשעולו מים "idem." The repetition of מדד is obscure, but the colloquial spelling of **m**- for **my** "who" is otherwise attested in rabbinic sources and need not be emended. The adaptation of biblical verses (here Isa 40:12a: מִי מָדַד בְּשָׁעָלוֹ מַיִם) to the context of the magic text is a common phenomenon in Jewish magic and there is no reason to delete the relative pronoun **š**-, whereas the preposition **b**- at the beginning of the expression is required by the preceding verb.

HS 3003:6 and 8: {נגדו וארתיקו}. By interpreting these words in line 4 of the text as verbs, MK is forced to propose that they appear in lines 6 and 8 as scribal errors that are to be deleted. However, when these words are regarded as names of supernatural beings or parts thereof in accordance with the interpretation of Naveh and Shaked 1985: 196 (an interpretation now unequivocally proven by additional parallels), there is no need to emend the text.

HS 3005:2–3: דרוח⟨א וד⟩לוטתא "der (bösen) Ruh⟨a⟩ ⟨und des⟩ Fluches." The emendation is unnecessary, since the construction רוח לוטתא "a curse spirit" is entirely legitimate and, moreover, is attested in other magic bowl texts.

HS 3012:1: MK transcribes וזירקנים וזירקנים וזירק{ט}נים ושם מ⟨יט⟩טרון. The words are part of an enumeration of magic names, some resembling names of angels. MK adduces no parallel and it is not clear to the present authors on what basis she determines that וזירקטנים is an error for וזירקנים. The words are preceded by a series of five magic names that similarly show slight variations (MK reads עדריאל ועדרים עדריאל עדראל). MK also discerns the name of the angel Meṭaṭron based on an emendation of מטרון to מיטטרון. Here, too, the emendation is not convincing. The basic reading of the word is uncertain due to the difficulty of distinguishing between *bet*/*kaf* and *dalet*/*resh*, but מטרון is paleographically

2 The basic transcriptions and translations of the Syriac bowls were completed before we had access to Moriggi's 2014 study. We have since revised some of our readings. In cases where our reading or interpretation is dependent upon Moriggi's study we have endeavoured to acknowledge our debt. In other cases we merely note the correspondence between the two studies.

© KONINKLIJKE BRILL NV, LEIDEN, 2020 | DOI:10.1163/9789004411838_002

impossible. We would read מטבלון or מטכלון. The reading מטרלון appears less likely. In any case, the material reading does not invite an emendation to מיטטרון. Nor is there any specific contextual evidence in support of a reference to Meṭaṭron in this text. Note that there is no paleographic basis for the initial *waw* in the first occurrence of וזירקנים (we transcribe זורקניס).

HS 3016:1: בר{י}ה "ihres Sohnes." There is no compelling reason why this word must be interpreted as "her son" rather than "his son." Furthermore, the use of the -**yh** pronoun for 3 f. sg. is well attested, and so no emendation would be necessary even if this interpretation were to be favoured.

HS 3019:1: ציתתון "ihr hört." Since additional examples of 2 m. pl. participles written without the *yod* can be adduced, there is no reason to emend the spelling of our text. The *scriptio defectiva* reflects a different *scribal practice*, rather than a *scribal error*.

HS 3022:3: {קניסס}. It is unclear how an emendation can be proposed to a portion of text containing meaningless magical words, since there are no criteria for establishing what the "correct" or coherent text may be (cf. above, HS 3012:1).

HS 3023:1: ⟨כי ביה⟩ יהוה צב[אות צו]ר עולמ⟨י⟩ם "⟨denn in YH⟩ YHWH Ṣeb[aot (= YHWH) ist der Fel]s der Ewig⟨k⟩eit." MK emends the text on the assumption that we have here a biblical quotation (Isa 26:4b: כִּי בְיָהּ יְהוָה צוּר עוֹלָמִים). In fact, it appears that we are dealing with a series of divine epithets, "YHWH Saba[oth], the Eternal [Ro]ck." With respect to the *scriptio defectiva* עולמם, cf. above, note to HS 3019:1.

HS 3026:5: [י]ק⟨ד⟩ר "männlich[en] … Kleinkinder." MK emends the text, though the form דדקי may be easily explained as the well-attested by-form דעדקי "little boys" with the loss of the *ʿayin* (the transcriptions of the second letter as *dalet* and *resh* are paleographically equivalent). MK reconstructs the final *yod*, but it is clearly visible in the photograph.

HS 3027:2: ⟨ד⟩בדרכ "auf deinem Weg." There are no grounds for emending the text of Deut 6:7. The bowl text's reading, בדרך "on the road," accords with all traditions of the text of the Hebrew Bible.

HS 3034:1: [ידי]דש הון⟨י⟩מלכ "König ⟨d⟩er Š[edas]." MK unnecessarily emends the text, as מלכהון "their king" is an entirely legitimate form. She presents the same reading מלכהון in a parallel text (IM 141802:1; TMHC 7, 12a) without emendation (similarly, p. 62, n. 24).

HS 3034:6: ⟨ו⟩גליף דציר "dem eingeritzt und eingraviert ist." The asyndetic writing of the two passive participles דציר גליף is widely attested in this formula and can hardly be a scribal error.

2. Emendations based on misreadings:

HS 3008:2: מן ⟨…⟩ ⟨א⟩לילית "Lilit ⟨…⟩ aus." The correct reading is מן דילות "who accompanied."

HS 3015:2: {י}ה כותכ(!)ה "den Brei." The correct reading is כיהכהי "in the same manner."

HS 3015:3: נני⟨ל⟩{ו}ה "der Nanay." The correct reading is לה יותי "to her, Yōṯay."

HS 3019:5: מעור דיתכטם ⟨ת⟩לילית דלפת "Lilit, an der sich der Blinde festklammerte…." The correct reading is לילית דלוית מני ודרית בבתי "the lilith who accompanies me and dwells in my house."

HS 3022:6: יהי {לא} אסו⟨תא מן שמיא⟩ "Wohler⟨gehen vom Himmel⟩ (möge) … (sein)." The correct reading is יהי לאסו "let it be for healing."

HS 3022:9: ⟨בד⟩{דלא} ויגער יהוה. The correct reading is יגער / ו[י]גער) יהוה בכא with the non-standard *plene* spelling בכא for MT's בך.

HS 3027:1: לב⟨נ⟩{ב}ך. The text in fact reads לבבך.

HS 3034:4: {מן} ובכל דימון "und in allen Abbildern." The correct reading is ובכל דימוניו "idem."

HS 3034:5: וגלח⟨י⟩ "und rasiere." The correct reading is וגלה "and be banished," a III-*y* f. sg. imperative form which requires no emendation.

HS 3018:3: 𐡀𐡋𐡀𐡄 𐡀𐡋⟨𐡀𐡅𐡄⟩{𐡄𐡅𐡄}𐡀𐡋𐡄 "und Armut ⟨…⟩ der Götter." MK's emendation gives a semantically inappropriate text, which leads her to posit the omission of part of the original formula. The correct reading is 𐡀𐡋𐡀𐡄 𐡀𐡋𐡄𐡀𐡋𐡄𐡅𐡄 "and prostrations to (lit. of) gods." The same expression appears in HS 3039, where it was correctly read and interpreted by MK.

HS 3018:3: 𐡆⟨𐡄𐡅⟩{𐡄}𐡅 "männlich." The text reads 𐡆𐡄𐡅 and does not need to be emended.

Other misreadings are either infelicitously incorporated into the translation, or left untranslated without emendation.

3. Inaccurate readings (selected examples):

HS 3003:5: וניעול עלה. The text reads וניעול עול עלה. The writing omitted in MK's transcription appears to be a dittography.

HS 3005:9: [……] קבסx. For MK's meaningless transcription read קים ושריר "established and sound."

HS 3019:1: כל ערין. For MK's unlikely reading, which she tentatively analyses as a plural of ערתא "Aufruhr," read כל נידרין "all vows."

HS 3022:8–9: וי[…]ה ומא לה […ויאמר יהוה אל הסטן יגער יהוה ב]ך הסטן. The obscure words left untranslated at the beginning are actually the beginning of the biblical quotation that MK restores in the lacuna. The text reads וי[אמר יי]הוה אל ה[סטן … בכ]א הסטן.

HS 3023:8: יהי סבחו "mögen … sein." The correct reading is יהו סבהו "Yaho Sabaho." The same magic name appears

in the parallels Istanbul 5363 and OIM N-IV, where it was correctly read and interpreted as (two) magic names by Isbell 1976: 23.

HS 3023:9: ואלהא מפכר לאיסרא "und Gott band das Band." The correct reading is ואלהא מרי כולא יס(א) "and God, the Lord of All, will heal." The same basic reading appears in the parallel Istanbul 5363:8, where it was accurately read and translated by Jeruzalmi 1963: 128. If we understand MK correctly, she proposes emending the latter text in accordance with her misreading of HS 3023.

HS 3027:4: [יכם][לה][א]. The correct reading of the fragment is [היכם][אל].

HS 3032:2: זיריבדוך "Ziribdux(t)." The text reads זורונדוך "Zurvāndukh."

HS 3033:4: ליה בהמנדר ב{ר}ר אחת "dem Bahmandar bar Aḥat." The text reads לות בהמנדד בני אחת "to Bahmandād, sons of Aḥāṯ."

HS 3034:2: מכנא "aus dem Schoß." Here MK translates the context correctly, but misreads the text. The correct reading is מכנף.

HS 3041:2: ביתה הדין דדודה בר אחת "dieses Haus des Dude bar Aḥat." The text reads ביתה דהדן עורא בר אחת "the house of this ʿŌrā son of Aḥāṯ."

HS 3041:5: שורבתה "seiner … Horde." The correct reading is שורפתה. MK's reading misses this evidence for the devoicing of *b* > *p* in JBA. In line 8 she misreads the corresponding form שרפתך "your tribe" as שך פתכ, which she divides between two different words.

HS 3042:10: וגיורא מרתא ד[…]כ/בין ודעבדין "und der Ehebrecher (und) die *Herrin*, die … und etwas antun." The correct reading is וקרותא (/ וקריתא) מרתא דעבדו ודעבדין "and severe imprecation, that one has performed and that one will perform."

HS 3046 + HS 3069:6: דתידושון "Ihr sollt .. treten." The correct reading is זהיר ונטיר "guarded and protected."

HS 3047:1 יסביט דיתסריא[ʾ] "denjenigen, der Yasbiṭ." The correct reading is ביתה דאדורביט "the house of Ādur-beṭ."

HS 3047:1: אחי תלמא לך שי דעʾשx "…, da mein Bruder, der Zwillingsbruder, für dich." The correct reading is שיר תשבאחות למאלך "A song of praise to the King."

HS 3058:5: דיבחשבה עיני. For MK's "die mit einem Gedanken, meine Augen" read דמחשכה עיני "who dims eyes."

HS 3018:1: 𐡀𐡕𐡓𐡌𐡀 𐡀𐡌𐡓𐡀 𐡀𐡕𐡒𐡋 𐡀𐡄 "dieses Amulett und Band und Gürtel." MK claims that the meaning of 𐡀𐡕𐡓𐡌𐡀 "ist nur von den vorangehenden Begriffen her zu deuten" and proposes a derivation from Middle Persian *hamyān* "belt, girdle." The derivation seems *a priori* unlikely, both because of the unexplained position of the *yodh* in 𐡀𐡕𐡓𐡌𐡀 and, in our opinion, the semantic incongruence with the preceding terms. The correct reading of this formulaic phrase is 𐡀𐡕𐡒𐡋 𐡀𐡄 𐡀𐡕𐡓𐡌𐡕𐡀 𐡀𐡌𐡓𐡀 "this trustworthy amulet and charm" (see also Moriggi 2014). The same formula appears in HS 3056:1–2, where MK again misreads the word in question as 𐡀𐡕𐡓𐡌𐡀 "und Gürtel."

HS 3062:1: 𐡌𐡕𐡒𐡀 𐡌𐡕𐡒𐡀 𐡌𐡕𐡐[𐡀𐡎𐡌𐡓𐡀] "[der Türschwel]le und der Wohnung und des Hauses." MK translates the otherwise unattested word 𐡀𐡕𐡒𐡀 "der Wohnung" without comment. The word would appear to be a "ghost word," as the formulaic text here reads 𐡀𐡕𐡒𐡀 𐡌𐡕𐡒𐡋𐡀 𐡌𐡕𐡒[𐡕𐡀] "[and the sea]ling and the protection of the house."

HS 3054:2: **n'rsyd[wk]** "Narsayd[ux(t)]." The name of the client is **n'rqys** (**narqis**) "Narqis."

HS 3054:8: The second half of the line has been omitted from MK's transliteration.

In many cases we have had the good fortune to have access to unpublished or newly-published parallels that were not available to MK when she prepared her edition. One cannot understate the value of parallel texts for the study of incantation bowls and the reader should bear this firmly in mind when comparing our editions. In many cases, letters that are illegible, questionable or missing entirely in one copy of a text may be totally legible in another. In particular, unpublished or newly-published parallel texts have had a major impact on our decipherment of HS 3008, HS 3019, HS 3026 and HS 3046 + HS 3069. Nevertheless, in some cases MK appears to have not taken full advantage of published parallels that were available to her.

4. Insufficient use of available parallels (selected examples):

HS 3041 parallels Moussaieff 6:15–20, published in Shaked 1995. The scribe uses dots to indicate the end of several of the lines (written in concentric circles). The same method of line division is employed in Istanbul 5370 (Jeruzalmi 1963), written by the same hand. Nonetheless, MK has divided the lines erroneously and misunderstood the general structure of the spell.

The fragmentary bowls HS 3047 and HS 3052 both parallel Istanbul 5361, published in Jeruzalmi 1963. HS 3047 and Istanbul 5361, moreover, were both written by the same hand. The Istanbul bowl provides the key to deciphering the two HS bowls, but the relationship between the bowls was not recognized in MK's edition.

HS 3015 partly parallels B 16087, published in Montgomery 1913 (Bowl 15). Although Montgomery's edition requires some collation and improvement, this important parallel provides the key to understanding the first half of the HS text. It was overlooked in MK's edition.

HS 3054 parallels B 85–48–910, B 9016, B 16011 and B 16016, all edited in MK's volume. However, insufficient attention to the parallels led to MK's misplacement of a fragment of HS 3054 that is detached from the main bowl.

5. Insufficient attention to parallels and joins within the corpus:

HS 3069 is a fragment of HS 3046 that was not attached to the main body of the text when the bowl was repaired, even though there is a direct and continuous join in line 4. MK's edition did not recognize this join, and the two parts are published separately.

One of the small fragments stored in the box of fragments HS 3070 appears to fit into a lacuna in HS 3041. MK's edition did not recognize this join and left the fragment unedited.

The fragmentary bowls HS 3047 and HS 3052 bear the same basic formula, a fact that was not recognized by MK. Nor did she note the similarities with HS 3023, which bears a related formula.

6. Untenable reconstructions (selected examples):

HS 3023:2: MK reconstructs ומל[כא] at the end of the line, but there is physically no room for the additional letters (the text is written in concentric circles). The following line begins with a final *kaf*, which gives the reading ומלך in accordance with the published (and unpublished) parallels.

HS 3027:3: MK reconstructs תשמע [אם] at the beginning of a quotation of Deut 11:13, but does not mention that the MT reads והיה אם שמע תשמעו, and that the lacuna is too large to have contained the word אם alone.

HS 3046 + HS 3069:6: MK reconstructs בסיפר ת[ירוכ]יכון ואיגרת שיבו[קיכון יהוה צבאות יהו]ה ישראל "mit eurem En[tlassungsschreiben] und mit eurem Tren[nungs] brief. [YHWH Ṣebaot YHW]H Israel." According to the photograph in TMHC 7, there is not enough room for the reconstruction ת[ירוכ]יכון, nor is it supported by the parallels. The reconstruction [יהוה צבאות יהו]ה ישראל does not accord with the material evidence of the bowl, which reads וישראל ה[...], nor is the epithet יהוה ישראל attested, to the best of our knowledge, elsewhere in the magic bowls. In light of the published and unpublished parallels which close with the standard legal expression כדת משה וישראל "according to the law of Moses and Israel," the correct reconstruction is undoubtedly בסיפר ת[י]רוכין ואיגרת שיבו[קין ... כדת מש]ה וישראל "by a document of divorce and a writ of dismis[sal ... according to the law of Mos]es and Israel."

HS 3046 + HS 3069:7–8: MK reconstructs בשימיה דחתומ[א חתימ]תי לשמיא וארעא "Mit dem Namen des Siegel[s versiegelte] ich den Himmel und die Erde." As in the case of ת[ירוכ]יכון in line 6 (see above), there is probably not enough room for the reconstruction. MK (p. 34) cites the passive participle חתימתי "du (böse Lilit), versiegelt bist" in B 2976:10 (TMHC 7, 11b) as the basis for her reconstruction of תי[חתימ], but with the exception of the general reference to "sealing" the two contexts are quite different. Both forms are indeed listed together as passive participles in the glossary (p. 178), but according to MK's translation in the Hilprecht bowl תי[חתימ] must be a 1 c. sg. *pa.* perfect form. An unpublished parallel suggests that the correct reading is ברז[י] ה[לין] דחתימ[ן ב]הון שמיא וארעא "by th[ese] myste[ries by] which heaven and earth are sealed."

HS 3026:1: MK reconstructs קבילי שמתא מן שמ[יא] רבי יהושע בר פרחיא "Empfange (!) den Bann vom Him[mel]! Rabbi Jehuša' bar Peraḥiya." The reconstruction gives a semantically awkward text, a fact that leads MK to posit that an element of the text has been lost between שמיא and רבי יהושע. Recently published parallels from the Schøyen collection show that the correct reconstruction is קבילי שמתא מן שמ[א ד]רבי יהושע בר פרחיא "Accept the ban from the na[me of] Rabbi Joshua son of Peraḥia!" and that the text is otherwise complete.

HS 3042:10: MK reconstructs the name of the client as [וגושנזוי] "[und Gušnazoy]" under the assumption that the client is identical with that of HS 3046, but in the latter bowl the client's name is to be read גושנזדד "Gušnazdād," rather than MK's גושנזוי. Irrespective of the correct reading of HS 3046, however, in HS 3042 the name of the client is in fact legible and reads אדרבהרם "Ādar-Bahram."

In the course of our study of the HS texts, we have discerned a number of Aramaic lexemes that were not previously recognized in the corpus (some of uncertain meaning). Some of them are otherwise well attested in their respective dialect, whereas others are new to the dialect or appear with previously unattested meanings. On the other hand, we have found reason to exclude a number of lexemes which are listed in the vocabulary of these bowls in MK's edition. The following are selected examples of each category. For more detailed discussions, see the commentaries *ad loc.*

1. Additions to the JBA and Syriac lexicons from the HS bowls (new lexemes and new meanings in the respective dialect):

-א "O" (HS 3003:6); the existence of this vocative particle, not recorded in *DJBA*, was posited by Naveh and Shaked (1985) for the parallel context in NLI JER Heb. 4°6079.

אלהין "rather" (HS 3034:5); is not recorded in *DJBA*, but has been previously identified in JBA bowl texts by Montgomery (1913) and Levene (2003).

בישראה "human" (HS 3022:5); a nominalized form of the adjectival **bisrāy* "of the flesh," not previously attested in Aramaic.

גבולא "border, territory (?)" (HS 3023:5); MK also reads גבול, but takes it as a place name, "Gebul." If our interpretation of this obscure context is correct, this is the first attestation of the common noun גבולא in JBA. Compare JPA גבול "border."

גובא "pit" (HS 3015:7); if correctly interpreted, this is the first attestation of this common Aramaic lexeme in JBA.

דבובתא "(hostile) speech" (HS 3012:2); possibly a loanword from Akkadian *dababtu* "word; faculty of speech" (*CAD* D, 2).

דרא (< *dərāʿā*) "foreleg (of animal)" (HS 3015:5); this sense has been previously recorded in Syriac, but was unknown in JBA.

הקדישא "consecrated object" (HS 3015:5); a previously unattested JBA loanword from Hebrew. Cf. JPA הקדש "consecrated object."

טלף שאר "bolt (of a door)" (HS 3015:6); the term is undoubtedly related to Syriac ܫܐܪܐ "bolt (of a door)," but the etymology of both forms is enigmatic.

מוה "unit of hundred (soldiers)" (HS 3041 + HS 3070x:4); although attested in various dialects, this is the first attestation of this sense for the common word מאה "hundred" in JBA.

סווסיה "healing" (HS 3015:7); the new JBA term appears to be cognate with Syriac ܣܗܝܕܘܬܐ / ܣܗܕܘܬܐ "tending, care of the sick."

סק״ר *af.* "to regard with malice" (HS 3032:1); we tentatively interpret אסקרא as a verb "she regarded with malice." The verb is new to JBA, but compare Syriac ܐܣܩܪ "to regard with malice or malignity" (Payne Smith 1903: 389). The same verb or its derivatives appear in JPA amulets and in an incantation from the Cairo Genizah.

פו״ט *pa.* "to scorn" (HS 3032:2); MK suggests that "zu erwarten ist eine Tierbezeichnung" (p. 81), in accordance with her dubious interpretation of אסקרא as "Heuschrecke," but a verb paralleling אסקרא "she regarded with malice" (see above) appears more appropriate for the context. Cf. Syriac ܦܛܠ "to utterly scorn" (Payne Smith 1903: 436).

שינתא / שנה "dream"; this new meaning for the common JBA word שינתא "sleep" can be shown to occur in many bowl texts and anticipates a semantic shift found in Neo-Mandaic, likely under Persian influence.

פארי(ש) "flatterers" (HS 3015:4); the reading is somewhat uncertain; if correctly read, the word may be compared to Syriac ܦܣܐ "flatterer."

אבא *pa.* "to lead astray, confuse" (HS 3056:9); the usual Syriac form of this verb is ܐܒܐ, but the form with *bet* is well attested in JBA.

2. Deletions from the vocabulary of the HS bowls[3]

אסון "eine Pflanze" (HS 3015:2); in her edition of the text MK tentatively proposes the reading *ʾszʾn*, whereas the term appears as *ʾswn* in the glossary. The correct reading is אסה "myrtle."

אסקרא "Heuschreckenart" (HS 3032:1); as a reference to a "grasshopper" does not appear appropriate in this context, we tentatively interpret the word as a 3 f. sg. perfect *af.* stem from the root סק״ר and translate "(she) regarded with malice" (see above).

גיברא (HS 3026:6; HS 3034:3); MK translates "Gibra" and treats the term as a variant of גברא, which she takes as a type of demon, "Gabra, hoher Dämon" (p. 197). An analysis of the term as the common noun/adjective גיבר "strong, mighty" appears more likely.

גיורא "Ehebrecher" (HS 3042:10); the correct reading is קרותא (or קריתא) "imprecation."

גל״ח *pa.* "rasieren" (HS 3034:5); the correct derivation is גל״י *pe.* "be banished." The proposed interpretation of the verb is supported by its similar use in other published and unpublished bowl texts.

גל״י *pa.* "offenbaren, enthüllen, aufdecken" (HS 3005:6; HS 3010:5; HS 3033:6); the form תיגלא appears in a sequence of unintelligible magic words.

דו״ש "treten" (HS 3046:6); although this verb is otherwise attested in the JBA magic bowls, in HS 3046 the correct reading is זהיר ונטיר "guarded and protected."

הברא "Blei" (HS 3030:5); MK takes הברא as a new phonetic variant of אברא "lead," but the text in fact appears to read אברא.

חו״ס "sich sorgen um" (HS 3023:7 [2x]); in this context, יחס is a magical name, not a finite verbal form.

חמ״ץ "sauer werden" (HS 3005:5; HS 3010:4; HS 3033:5); the element מץ is a divine name. The interpretation of these passages has been discussed in detail in Morgenstern and Ford 2017: 203–206.

חשבתא "Gedanke" (HS 3058:5); for MK's דיבחשבה "die mit einem Gedanken" one must read דימחשכה "she who dims."

חש״ש "sich kümmern" (HS 3023:8); in this context, יחוש is a magical name, not a finite verbal form.

חתומא "Versiegler" (HS 3046:8); as indicated by several parallels, the word is to be read as part of a passive participle [ן]דחתימי "that are sealed."

3 Note that the glossary of TMHC 7 includes lexemes found in texts from other collections as well, but they are not discussed here.

טר״ד *pa*. "stoßen" (HS 3047:2); the correct reading is פריס (as part of **פריסשתא** "wondrous [lit. wonders]").

טרפא "Blatt" (HS 3015:2); the lexical entry should read אטרפא, as the attested reading is אטרפי, not טרפי as read by MK.

כנא "Schoß" (HS 3034:2); MK takes the term as a phonetic spelling of חנא, but the correct reading is כנף "idem."

כנ״ע *itp.* "erniedrigen" (HS 3046:4); the correct reading is [ו]איתבזע "they were split."

לפ״ת *pe./pa.* "sich festklammern" (HS 3019:5); the correct reading is לוית "accompanies."

מעורא "Blinder" (HS 3019:5); the correct reading is מני וד (as part of **מני ודרית** "with me and dwells").

סאליקא "gekochtes Gemüse" (HS 3015:2); the material reading appears to be correct, but the parallel indicates that סאליק is a verb "ascends" (< סל״ק). The final *ʾalef* is part of the following word (אטרפי "leaves"—see above).

סכינא "Messer" (HS 3041:6); the correct reading is סטנא "satan."

עסתא "menschlicher Körper" (HS 3012:3); phonetic spelling of עיצתא "counsel, advice."

ערא "…" (HS 3019:1); in her commentary MK tentatively analyses ערין as a plural of ערתא "Aufruhr," but the correct reading is נידרין "vows."

פריזילאה "eisern" (HS 3046:6); the word is part of an untranslatable sequence of magic names and should be read אפרודיטא.

צמצ״ם *pal.* "zerquetschen" (HS 3005:7; HS 3010:5; HS 3033:6); the forms מצמצים and צמצים(י) are magic names.

קיצתא "Ende, Teil" (HS 3005:7; HS 3010:5; HS 3033:6); the form קיצתם appears in an untranslatable sequence of magic names.

רכיכתא "Weichheit" (HS 3012:2); in light of the parallelism with מליה "her words" // עסתיה "her counsel" // מחשבתיה "her plan(s)," we read the paleographically equivalent דבובתיה "her (hostile) speech."

רת״ק *af.* "klopfen" (HS 3003:4, 6, 8); although originally a verb in the JPA sources to this formula, in the present context ארתיקו functions as the name of a supernatural being; see Naveh and Shaked (1985) and Ford (2016).

שורא "Mauer" (HS 3046:6); the correct reading is שום א (as part of **על שום אפרודיטא** "by the name of **ʾprwdyṭ**").

שינא "Fels" (HS 3047:2); the correct reading is שתא (as part of **פריסשתא** "wondrous [lit. wonders]").

שמרא "Beachtung" (HS 3019:2); the correct reading is שמתה "ban."

שת״ך "rosten" (HS 3015:6); the correct reading is שאר (as part of **טלף שאר** "bolt").

תלמא "Zwillingsbruder" (HS 3047:1); the material reading is correct, but the letters are in fact part of שיר **תשבאחות למאלך** "a song of praise to the King." Although appearing in several other Aramaic dialects, תלימא "twin brother" does not at present appear to be attested in JBA.

 "Anstieg" (HS 3056:11); the correct reading is  "she made them ascend."

 "Gürtel" (HS 3018:1; HS 3056:2); the correct reading is  "trustworthy" (see also Moriggi 2014).

 "Tisch" (HS 3056:13); the correct reading is  "semen."

 "Verwirrung" (HS 3056:9); the form is a verb  *pa*. "lead astray, confuse" (see above).

 "Wohnung" (HS 3062:1); the lexeme does not appear to exist. The correct reading of the context is  "its protection."

The format of our edition differs somewhat from that of the *editio princeps*. Like MK, we group the bowls according to dialect (JBA, Syriac, Mandaic), but within each group MK places parallel texts together, whereas we present the texts in the order of their museum number. The reader should nevertheless be able to easily locate the parallels within the collection, since they are noted in the preliminary comments. We transcribe the texts into standardized versions of the native scripts—Jewish, Syriac (Estrangelo), Mandaic, rather than MK's unified Latin transcription. Although the unified Latin transcription admittedly facilitates the comparison of texts in various dialects, it also obscures certain features of the writing system, in particular the final letters. This turns out to be an important issue for several bowls in the corpus. Our choice, however, is determined mainly out of respect for the great Aramaic literary dialects in which the texts are written. Nevertheless, in the philological notes quotations of Mandaic texts have been transcribed into Latin script (following the method used by Drower and Macuch), both for typographical reasons and for the convenience of readers unfamiliar with the Mandaic script. Furthermore, in the apparatuses Latin script has been used for all languages for typographical reasons. A unicode Manichaean font is presently unavailable and an Estrangelo font is therefore used for the Syriac bowls, although those in the Hilprecht Collection were all written in the Manichaean script. The Jewish bowls often contain Hebrew elements. Although Hebrew words are noted as such in the Glossary, we have not found any benefit in specifically marking these elements in the transcriptions of the bowls; they should usually be readily identifiable to the reader of Aramaic. Moreover, in cases such as the formulaic אמן אמן סלה or certain divine names and epithets one may legitimately ask if the distinction between Hebrew and

Aramaic is relevant. Biblical quotations, however, are italicized in the translation and provided with footnotes identifying the verse(s).

Several items are omitted in the preliminary comments to the text. In particular, we did not re-measure the bowls and thus refer the reader to the *editio princeps* (see MK, pp. 5–7 and the individual editions). As the texts are generally short and accompanied by a translation, we usually do not summarize the contents of the incantation, but we do try to list all the published parallels (with their main editions) and generally as many unpublished parallels as possible, with the hope of facilitating the future use of the book after the publication of the new material. We note the previous editions of the edited text and the major editions of parallel texts, but the reader is further referred to the extensive bibliography of each text in the *editio princeps*. With respect to the Jewish bowls, MK classifies them according to dialect as either "standard-literarisch-babylonisch-aramäisch" or "koine-babylonisch-aramäisch." While we are aware of the dialectal differences between the bowl texts, we have refrained from classifying them in this manner because of the problematic nature of the classification. We intend to address the question of the linguistic classification of the Jewish bowl texts in detail in a forthcoming study. As is well known, the language of the Syriac bowls shows important differences from Classical Syriac. We refer to the language in the Glossary as "Babylonian Syriac" (MK: koine-syrisch), but refer to the bowls themselves simply as "Syriac."

The main purpose of this volume is to provide a linguistically reliable edition of the magic bowls in the Hilprecht Collection. It is hoped that it will serve as a basis for further study of the various dialects of Late Eastern Aramaic recorded therein. To this end, we present the transcriptions without emendations; when we feel that an emendation is warranted we propose it in a footnote and translate the text accordingly with the addition of an exclamation mark in parentheses (!). The same sign is used when we do not propose an emendation, but cannot adequately explain the non-standard orthography. Other footnotes to the transcription deal with strictly paleographic issues. Reconstructions of the text are put in square brackets. We generally refrain from extensively reconstructing the text, especially when parallel texts are lacking. Philological discussions of lexical or grammatical issues, or of magical and literary motifs are placed after the transcription and translation according to line number (as in MK's edition). We try to support our interpretation with quotations of relevant passages from published and unpublished bowls. When quoting published bowls, we include references to the main editions of the text. New readings are based on examination of photographs and are often presented without comment.

We do not discuss every new reading of the HS bowls proposed in our study, but for the convenience of the reader an apparatus with previous readings is appended to the edition of each text. The reader is urged to verify each reading with the photographs. Although we mark partially preserved letters in the apparatus, we do not include new readings which differ only in the degree of preservation of one or more legible letters, as the differences in marking a complete and partially preserved letter are often subjective. The apparatus includes proposed reconstructions and emendations. The reader should note that, in the case of unintelligible magic words, the differences between our transcription and that of the *editio princeps* are sometimes due to an arbitrary preference for a paleographically equivalent reading. When the words have no recognizable meaning and are not attested in manuscripts that clearly distinguish between the letters in question, it is impossible to determine with certainty what the scribe intended to write. For this reason we have not included apparatuses for wholly unintelligible texts. When more than one previous edition exist, only readings that differ from that proposed in our edition are cited. When MK's (or another editor's) reading is not cited, it may thus be assumed to be identical to that of our edition (except for the marking of the degree of preservation of legible letters). The apparatuses deal specifically with editions of the HS texts. Short quotations of one or several words in a text, such as the those in *DJBA*, are not included in the apparatus, but are discussed in the commentary when relevant. One should bear in mind that in some cases new readings proposed in our study have been anticipated in the editions of duplicate texts by other scholars. These are discussed in the commentary, but are not noted in the apparatus.

The lack of adequate photographs in many early editions of magic bowls has severely impeded their continued study. Even the reasonably legible photographs in many recent editions sometimes do not suffice to clearly see certain parts of the text, either due to the curvature of the bowl or to the condition of the writing. The recent advances in digital photography, however, have revolutionised the study of magic bowls, as it is now possible to make and reproduce large numbers of high-resolution close-up photographs at minimal cost. Almost all the bowls in the collection were digitally photographed twice at high resolution, first by Morgenstern (ca. 700

PREFACE

The primary purpose of this publication was to edit, with translation and necessary notes, the incantation texts inscribed on bowls from Nippur, now in the possession of the Museum. But it soon became apparent that full account should be made of all other published texts of like character, both for my own advantage in securing a larger material for collation and also for the convenience of scholars by presenting in one work a survey of a rather remote and scattered field, in which many have labored but none has attempted a treatment of the subject at large. I have accordingly not only given a description of all the earlier material but also collated it as fully as possible both in the Glossaries and in the references of Introduction and Commentary. The Introduction, thus extended beyond the field of the Nippur texts, has grown to still greater dimensions with the enlarging perception of the intimate relations between the bowl-inscriptions and the broad fields of ancient magical literature. Previous editors, working before the present great development of the study of magic, had taken little notice of these connections with a wider world. Analogies with the Talmud and possible connections with the Kabbalistic lore had been pointed out, but the bowls still remained without definite place or links in the general field of ancient magic. Withal the relations of Jewish magic to the larger whole have not yet been ascertained.

But within the last few decades an immense advance has been made in our knowledge of ancient magic and of its prime importance as a study in the history of mankind. The chief

stimulus to this has come, first, from the anthropologists and the students of comparative religion, who have taught us not to ignore the most primitive or most degraded manifestations of the human spirit. Then there have been the rapid strides in the advance of Egyptology and Assyriology, where at every step the student faces the problem of the identities and differences of magic and religion. Further, the classical philologists have at last condescended to examine the vulgar magical records in the Greek and Latin tongues, and have found an interest in them as revealing how the ancient "man of the street," and wiser men as well, actually talked and thought, in modes different from the traditional standards of the classical civilization. Of this large increase in material and understanding I have been fortunately able to avail myself, with the result of the discovery of innumerable clues proving that the bowl-magic is in part the lineal descendant of the old Babylonian sorcery while at the same time—and this is the more important because a less expected discovery—it takes its place in that great field of Hellenistic magic which pervaded the whole of the western world at the beginning of the Christian era. My chief contribution to the study has been in these two directions, the relations with the cuneiform religious texts and the Greek magical papyri. The writer's knowledge of Egyptian magic was wholly at second hand, and in any case that earlier influence was mediated to this special field through Hellenism. The Christian Syrian literature is shown to have its close connections, being thoroughly infused, as was the early Church, with magical ideas. Magic within Judaism has been the subject of capital monographs by competent Jewish scholars, and in that direction I have not been able to do much more than to appropriate their results, except so far as to show the absolute

community of ideas and terms and practice between Jewish and Gentile sorcery. It remains a subject for an interesting investigation to discover just what Judaism gave to, and what it received from, the Hellenistic magic, but probably a hopeless study, for, as someone has remarked, in the history of magic we must pursue not the genealogical but the analogical method. As a result of these comparisons, the conclusion must be drawn, as indicated in § 15 of the Introduction, that the magic of the bowls, and in a general way, all Jewish magic, has come out of the crucible of the Graeco-Roman world, which, on account of its dominating civilization, we call Hellenistic; it is not Jewish but eclectic.

However, with this broadening of the scope of the work, it has been the fixed purpose not to attempt any general study of magic; this would have been but to confuse my work and cloud my results. With a single eye, the facts of the texts have been illustrated in as objective a way as possible from the phenomena of locally inherited and contemporaneous magic, with the intent of establishing the immediate bonds of connection. My work would be a contribution from a very small and limited field to the study of magical thought and practice within a definite age and region. At least there has come to the writer the satisfaction of finding a place for the *membra disjecta* of these out-of-the-way texts in the huge colossus of that system of magic which was once almost the actual religion of our western civilization.

If I appear to have gone into much detail in the treatment of these non-literary texts, I trust that the results will justify my undertaking; the expansion of the work has proceeded naturally and subtly much beyond the editor's desire and convenience. From the philological point of view these vulgar inscriptions are of as much interest to the Semitist as are the

magical papyri to the classicist. Careful study shows that, with the exception of intentionally unintelligible passages, mystic phrases and the like, the words and the syntax of the texts are the autograph representatives of the language of their writers. Three different Aramaic dialects, each with its own script, and one script a peculiar variety of the Edessene, are offered in the bowls from Nippur, and they are of importance as original documents of the dialectic forms of the speech of Babylonia about the eve of the rise of Islam. Other original monuments are well-nigh lacking for this field; we are confined almost entirely to the school-literatures of religious sects, of the Jews, Christian Syrians and Mandaeans, whose books are preserved mostly in late manuscripts. The Jewish magical literature is all documentarily late or uncertain as to age, and our texts have a historical worth as almost the earliest records in that line which can be exactly dated. Further, the obscure and crabbed condition of the texts compelled an exact philological examination in order to test hypotheses of interpretation. And as to matters beyond philology, it will not, I hope, be set down to wilful acriby if I have attempted to work out very small clues. In such work as this there is no immediate compensation on the surface, and it is only by following out the fine tendrils of connection that results worth while can be obtained. The writer's experience in his study is well expressed by some words of Professor Deissmann: "It may be that hundreds of stones, tiresomely repeating the same monotonous formula, have only the value of a single authority, yet in their totality, these epigraphic results furnish us with plenty of material—only one should not expect too much of them, or too little" (*Bible Studies*, 82).

In regard to the representation of the texts it might have been technically more correct to present them in their several

scripts. But apart from the difficulty of procuring two of these types in American printing houses and compositors who could set them, it must be patent that the general convenience is far better subserved by presenting the texts in the well-known Hebrew character, while those who desire the original scripts can satisfy themselves with the facsimiles published in the second volume. The peculiar Mandaic relative particle is represented, according to convention, by the diacritical ד̄; but I have departed from the usual custom of editing Mandaic texts by representing the pronominal suffix in *-h* by ה and have used ה for the radical ה or ח, which two sounds fall together in the dialect. In the Glossaries words containing this common character are arranged according to its etymological distinction as ה or ח. In the transliterations inferior points indicate doubtful readings, superior points are used for the diacritical marks of the Syriac texts. The numbered lines of the texts represent the spiral lines, taken as beginning from the radius where the inscription begins.

The Prefatory Note to the Plates describes how the facsimiles were made. I have to express my deep obligation to my friend and colleague, the Rev. Dr. R. K. Yerkes, for his careful reading of the volume in proof.

JAMES A. MONTGOMERY.

THE UNIVERSITY MUSEUM, February 2, 1912.

I. SURVEY OF THE MATERIAL

§ 1. The Material in the Museum

The University Museum contains a large number of inscribed earthenware bowls found at Nippur belonging to the category of the so-called "Incantation Bowls." These vessels are generally of the size and shape of a modern porridge-bowl, except that in most cases the bowl is somewhat cone-shaped, so that when set down it balances itself in a state of unstable equilibrium. Some few have the boss expanded into a rim, thus giving a flat surface at the bottom of the bowl. The most common size is of about 16 cm. diameter at top, by 5 cm. full depth. There is one large bowl, 28 x 16 cm.[1]

The bowls are made of a good clay, and are wheel-turned and kiln-dried; they have no surface, slip or glazing of any kind.[2] They were a domestic ware, intended for foods, and in no way differ from the simple vessels which to this day are made in the Orient for household use.

The bowls in the Museum were excavated at Nippur, in Babylonia, by the University of Pennsylvania Expedition; so far as I know, they are finds of the first two campaigns, conducted by Professor Peters in the years 1888, 1889. According to Peters' account,[3] these bowls were found on the top, or in the first strata of the mounds, in several places. They appear generally to have been discovered in the ruins of houses, amidst what Peters suggests were Jewish settlements; the whole surface of one hill, he says "was covered with a Jewish settlement, the houses of which were built of mud-brick, and in almost every house we found one, or more,

[1] Many such large specimens are in the British Museum and at Constantinople.

[2] I am indebted to Mr. D. Randall-MacIver, late of the Museum, for the characterization of the pottery.

[3] See his *Nippur*, the Index to which, *sub* "Jewish incantation bowls" gives the references.

Jewish incantation bowls."[4] At least in one case bowls were found in connection with a cemetery; "we found ourselves in a graveyard..... It was interesting to find, between one and two metres below the surface, in the immediate neighborhood of slipper-shaped coffins, inscribed Hebrew bowls."[5] As for the chronological light thrown upon these bowls, Cufic coins were found in the houses of these "Jewish" settlements,[6] and one of the most extensive finds of inscribed bowls was in the strata above the "Court of Columns," a Parthian building.[7] Peters holds the seventh century to be the latest date for the Jewish settlements where Cufic coins were found.[8]

The Museum Catalogue counts over 150 numbers of this class of specimens, but the enumeration includes a large number of fragments. About 30 of the bowls are what I would call "original fakes"; they are inscribed with letters arbitrarily arranged, or with pot-hooks, or even in some cases with mere scrawls, and I judge that these articles were palmed off on the unlearned public as "quite as good" as true incantations.[9] A still larger number of the bowls are so broken and their inscriptions so defaced, that I have not been able to use them. Others again were inscribed by so illiterate scribes that so far as they can be made out, they offer only some magical jargon, which adds nothing to our knowledge. Again there are a few texts which are fairly written and without those self-betraying combinations of letters that suggest a mock inscription, but which nevertheless are not Semitic. They may be in some non-Semitic tongue, whether, for example, in Pahlavi, I am not able to say. One of the neatest of the bowls, No. 2954, containing only four circular lines of inscription, interested me as presenting a novel alphabet; but I soon came to the conclusion that this is but another "fake," produced we may suppose by some learned impostor—or wag.

[4] ii, 182 f.; cf. p. 194.

[5] i, 245.

[6] ii, 183. On the following page the writer says that Arabic bowls along with Jewish and Syriac were found; but the Museum contains no Arabic specimens.

[7] Hilprecht, *Explorations in Bible Lands*, p. 447.

[8] ii, 153, 183, 186. For further discussion of the date, see § 14.

[9] In many cases the inscriptions were written by laymen, who thus saved themselves the exorcist's fee. Schwab notices some forged bowls at Constantinople, *PSBA*, xiii, 595.

All the relics from Nippur came to the University as the gift of the Sultan of Turkey, and in the matter of these incantation bowls I understand that the best specimens, the largest and fairest, have been retained in the Imperial Museum at Constantinople. At all events those in Philadelphia in almost all cases prevent complete decipherment because of mutilation.[10] A large segment of the spherical surface may be missing, or an extensive portion of the interior, a side, or the upper or lower portion of the bowl may have become illegible, probably through the action of water. The inscription being spiral, such mutilations intrude their annoyance into every line. The damaged nature of this collection has added much to the toil of decipherment, for every break in the text and every effacement necessitates speculation as to the missing contents. On the other hand it is cause for remark and gratitude that these fragile vessels have been preserved as intact as they are, and that the scribes used such excellent ink that what they wrote has largely survived in defiance of "the powers of the air," the elements and the corroding chemical agents.

As a result of the investigation of the whole collection I have selected 40 bowls for publication, to which number should be added the one published earlier by Myhrman (accompanying No. 7). The remaining bowls and fragments are on the whole too illegible or too undecipherable to make it worth while to add them to this material. The languages of the inscriptions are three Aramaic dialects:— (1) the language with which we are familiar from the Babylonian Talmud, to which belong Nos. 1-30; (2) a Syriac dialect, Nos. 31-37; the Mandaic, Nos. 38-40. Each of these has its own script. As an appendix, I publish, as No. 41, a human skull inscribed with a magical inscription of like character to those on the bowls, and No. 42 is a text of peculiar magical contents which has come to my hands, but with its original now lacking in the Museum.

[10] With few exceptions, all the bowls I have deciphered have been put together from fragments into which they had fallen, in the Museum.

§ 2. The Material Hitherto Published, and in Other Collections[1]

The first publication of Mesopotamian incantation bowls appeared in Layard's notable volume, *Discoveries in the Ruins of Nineveh and Babylon.*[2] In describing his finds at Tell Amran, near Hillah, the great explorer tells of discovering "five cups or bowls of earthenware, and fragments of others, covered on the inner surface with letters written in a kind of ink" (p. 509). He notes that like material had been discovered before. Two from the collection of a Mr. Stewart had been deposited in the British Museum, which had also acquired through Colonel Rawlinson eight specimens obtained at Bagdad, their provenance however being unknown. In a later passage (p. 524) Layard records the discovery of a similar bowl, along with many fragments, at Nippur,—the precursor of the collection in Philadelphia.

Layard committed his bowls to Mr. Thomas Ellis, of the staff of the British Museum, whose results are given in Layard's work, appearing pp. 509-523.[3] Layard himself takes up the discussion p. 523 ff. with criticism of Ellis's results. The latter presented five Judaeo-Aramaic bowls, and one in Syriac, with summaries of fragments of others. Of these only four were given in facsimile, nos. 1, 3, 5, 6.[4] Subsequent scholarly investigation has proved not only that Ellis was wild in his interpretations of the bowls, but also that the facsimiles were unreliable. Hence the latter can only be used with caution or with the aid of later

[1] Stübe, *Jüdisch-babylonische Zaubertexte,* 1895, gives a good review of the literature up to date, although requiring some corrections and additions. See also Wohlstein, in *ZA,* viii (1893), 313 f.

[2] London, 1853. There is a German translation by Zenker, the bowls appearing there in Plate xx.

[3] Layard leaves it somewhat indefinite which bowls were treated by Ellis.

[4] Ellis's first bowl turns out to be a duplicate of our No. 11, under which I am able to present the restored text of the former. Was this the bowl which Layard reports was found at Nippur?

copies, while the bowls published without facsimiles are absolutely worthless as scientific copy. Layard's publication therefore did little more than attract the attention of scholars to a fresh field of philology and religious lore.

The first scientific treatment of this new material came from M. A. Levy, of Breslau, who devoted a long essay to Ellis's bowl, no. 1, in the *Zeitschrift d. Deutschen Morgenländischen Gesellschaft* for 1855 (ix, 465).[5] He was the first to grasp the peculiar *lingo* of the inscription, and in his commentary drew largely from Judaistic and Mandaic stores of learning. He also gave an elaborate treatment of the palaeography of the bowl, overthrowing the claims that had been advanced for a pre-Christian origin.

Twenty years later J. M. Rodwell published a bowl from Hillah that had been procured by the British Museum, under the title, *Remarks upon a Terra-Cotta Vase,* with a photographic facsimile.[6] This second English venture at decipherment was no better than the first, its sole merit lying in the fact that the French scholar J. Halévy was induced to take up the same bowl on the basis of the facsimile, and to give it a scholarly transliteration and translation, with commentary, under the title, *Observation sur un vase judéo-babylonien du British Muséum.*[7] Four of the bowls that had been published were presented by the great Hebrew epigraphist Chwolson in his monumental *Corpus inscriptionum hebraicarum.*[8] The first (Chwolson's number, 18) is Ellis no. 1, the second (no. 19) is Ellis no. 3, the third (no. 20) is the bowl published by Rodwell and Halévy; and the

[5] *Über die von Layard aufgefundenen chaldäischen Inschriften auf Topfgefässen. Ein Beitrag zur hebräischen Paläographie u. z. Religionsgeschichte,* with Ellis's facsimile. Levy again treated the same inscription under the title "Epigraphische Beiträge zur Geschichte der Juden," in the *Jahrbuch f. d. Geschichte d. Juden,* ii (1861), 266, 294.

[6] In *TSBA,* ii (1873), 114.

[7] In *Comptes rendus de l'Académie des Inscriptions et Belles-Lettres,* series iv, vol. v (for 1877; Paris, 1878), 288. He re-edited his material in his *Mélanges de critique et d'histoire,* 229.

[8] St. Petersburg, 1882, col. 113 f. The facsimiles are reproduced at the end of the volume. The Russian edition of this work (St. Petersburg, 1884) publishes five bowls and considerably varies from the German edition (so Wohlstein, *ZA,* viii, 315). For nos. 19, 21, Chwolson made use of improved transcripts prepared for him by Halévy. In his review of the *Corpus* in the *Göttingische Gelehrte Anzeige* for 1883, Landauer comments on these bowls (p. 507).

fourth (no. 21) is Ellis no. 5. Chwolson adopted a skeptical position toward the speculations and guesses of his predecessors, and his commentaries are valuable as a restraint upon their theories. Of special interest is his discussion of the age of the bowls from the palaeographic point of view—a subject which I take up in § 5.

The most extensive editor of the material under discussion has been Moise Schwab, the author of the French translation of the Talmud. In 1882 he published, in collaboration with E. Babelon, a bowl in the possession of the French government, under the title *Un vase judéo-chaldéen de la Bibliothèque Nationale*,[9] along with a facsimile and commentary. In 1885 he published a bowl at the Louvre in an article entitled *Une coupe d'incantation*,[10] without facsimile. He then presented a large series of bowls in the *Proceedings of the Society of Biblical Archaeology*, for the years 1891 and 1892.[11] He included several bowls already published, with the old facsimiles, but failed to offer photographic copies of the bowls he brought to light. It seems strange that the English scholarly world rested content with the poor facsimiles of the relics in the British Museum, made almost forty years before, and that Schwab did not avail himself of better texts than his predecessors had used. Between the articles appearing in the two volumes of the *PSBA* Dr. Schwab contributed studies of two bowls to the *Revue d'assyriologie*, etc., under the title, "Deux vases judéo-babyloniens."[12] These he numbered F and G so as to align them with those appearing in the other publications. The material thus presented by Schwab is as follows:

A, in *PSBA*, xii = Ellis, no. 1; Levy; Chwolson, no. 18.
B, in *PSBA*, xii = Ellis, no. 3; Chwolson, no. 19.
C, in *PSBA*, xii = Rodwell; Halévy; Chwolson, no. 20.
D, in *PSBA*, xii = Ellis, no. 5; Chwolson, no. 21.

[9] In *Revue des études juives*, iv (1882), 165.

[10] In *Revue de l'assyriologie et d'archéologie orientale*, i (1886), 117.

[11] In vol. xii, 292: *Les coupes magiques et l'hydromancie daus l'antiquité orientale*, with introductory remarks, and, p. 296, a description of the 22 bowls then in the British Museum; in vol. xiii, 583: *Coupes à inscriptions magiques*. This material was first presented to the French Academy of Inscriptions in the years 1883, 1885, 1891. At the end of the first article is a glossary to the bowls published therein.

[12] ii (1892), 136.

E, in *PSBA,* xii; a bowl in the National Library at Paris, also in *REJ,* iv, (without note in the *Proceedings* that he had published it before).

F, G, in *Rev. d'ass.,* ii; bowls in the Louvre. The exterior inscription on G is given under G in *PSBA* (p. 327).

H, in *PSBA,* xii; a bowl in the British Museum.

I, in *PSBA,* xii; a bowl in the Louvre, also in *Rev. d'ass.,* i (without note that he had published it before).

L, in *PSBA,* xiii; a bowl in the Lycklama Museum at Cannes (other than that published by Hyvernat).

M, in *PSBA,* xiii; a bowl in the Louvre, acquired by Heuzey.

N, O, P, in *PSBA,* xiii; three bowls in the collection Dieulafoy from Susiana.

Q, in *PSBA,* xiii; a bowl in the Musée de Winterthur.

R, in *PSBA,* xiii; a bowl in the coin department of the Bibliothèque Nationale.

Meanwhile there had appeared, in 1885, a study of a bowl in a provincial French museum by H. Hyvernat (now professor in the Catholic University, Washington): *Sur un vase judéo-babylonien du musée Lycklama de Cannes (Provence).*[13] Unfortunately the accompanying photographic facsimiles are barely legible as published; however there is little doubt as to the text and its meaning. [14] Schwab also refers[15] to a bowl published by B. Markaug in the *Zapiski* of the Imperial Russian Society of Archaeology, iv, 83, which I have not been able to procure.

A few years later the collection of incantation bowls at the Royal Museum in Berlin was made the subject of study by two young scholars, working contemporaneously but independently. J. Wohlstein published, under the title, *Ueber einige aramäische Inschriften auf Thongefässen des königlichen Museums zu Berlin,* five bowls, with introduction to the general subject and commentary.[16] And R. Stübe published a Berlin bowl in his

[13] In *Zeitschrift f. Keilschriftforschung,* ii (1885), 113.

[14] This publication received criticism from M. Grünbaum on a subsequent page of the same journal (p. 217), especially for its dependence upon Kohut's notions of Jewish angelology; and on p. 295 Nöldeke expressed some comments on the text, especially animadverting on its age.

[15] *Rev. d. Assyriologie,* ii, 137.

[16] *ZA,* viii (1893), 313, and ix (1894), 11, In vol. viii appears no. 2422; in vol. ix, nos. 2416, 2426, 2414, 2417.

Jüdisch-babylonische Zaubertexte.[17] The text he published, the longest yet edited, is the same as the second given by Wohlstein; his treatment is fuller than that of his contemporary, to whom he is able to refer in his printed notes. Stübe gives a description of nineteen bowls in the British Museum. Unfortunately neither publication is enriched with facsimiles. Subsequently S. Fraenkel contributed some notes to Wohlstein's bowls in the same journal, in part on the basis of his own transcription.[18]

Pognon, French consul at Bagdad, broke the ground of a fresh dialect of bowl-inscriptions with the study of a Mandaic bowl—*Une incantation contre les génies malfaisants en mandaite,* appearing in 1892.[19] The bowl was purchased from Arabs at Bismaya. In 1898 the same scholar published an elaborate work upon bowls found at Khuabir 55 km. NW of Musseyib, on the right bank of the Euphrates; he visited the locality but was unable to reach the site where the bowls were found. His work, entitled *Inscriptions mandaites des coupes de Khouabir,*[20] contains some valuable appendices, of wider interest than the title suggests, and is furnished like the earlier monograph with full apparatus. Five more Mandaic bowls were published by Lidzbarski in his *Ephemeris,* i, 89, "Mandäische Zaubertexte." The fifth of these texts is a duplicate of my No. 11 and is given there in parallelism. Three of the texts are in the Berlin Museum, and two in the Louvre.

Professor Gottheil contributed to Peters' *Nippur* (ii, 182) a translation of one of the bowls at Pennsylvania (= No. 12 below). Dr. Myhrman, of Uppsala, published from the same collection no. 16081, with commentary; his monograph appeared in *Le monde orientale,* Uppsala, 1907-8, and with revision as a contribution to the Hilprecht Anniversary Volume[21] under

[17] Halle, 1895.

[18] *ZA,* ix, 308.

[19] In the *Mémoires de la Société de Linguistique* (Paris), viii, 193, and in separate print.

[20] Paris, 1898, with facsimiles and full glossary; reviewed by Nöldeke, *WZKM,* xii, 141; Lidzbarski, *TLZ,* 1899, col. 171; Schwally, *OLZ,* ii, 7, iii, 458; Chabot, *Revue critique,* xlvi, 43, xlix, 484. Pognon also saw some bowls in the square character, some in Estrangelo, and some which he presumed might be in Pahlavi (p. 1). In my citations to Pognon, I cite his two books as A and B respectively.

[21] Leipzig, 1909; p. 342.

the title *An Aramaic Incantation Text;* this text is given below in parallel with No. 7.

It is in place here to notice the location of incantation bowls in the various museums. Despite a query addressed over a year ago I have not received any information from the authorities as to the number and character of the bowl-texts at the Imperial Museum in Constantinople; its collection from what I hear must be large and fine, and has been particularly enriched from Nippur.

Dr. L. W. King has kindly informed me that the British Museum contains 61 bowls of our class, exhibited in the Babylonian Room. Some of the specimens, I also learn, are of very large size. The texts are in the square script, Syriac, Mandaic and Arabic.

Schwab thus sums up, for the year 1906, the bowl-texts in the French museums:[22] 2 in the National Library, 7 in the Louvre, 2 in the Museum Lycklama, Cannes; also one in private hands.

Through Professor Ranke's kindness I learn that in the Berlin Museum there are 69 bowls with "Hebrew" (i. e. Aramaic?) inscriptions, 9 with Syriac (presumably inclusive of Mandaic). Stübe gives a description of 19 of these. In the same museum there are two inscribed skulls, similar doubtless to the one published below as No. 41.

At the National Museum in Washington are found five bowls, four in square script, one in Estrangelo; but from photographs kindly lent me by Dr. Casanowicz, two of the former are to be designated as "fakes" in the sense used above. These bowls are said to have been found at Hillah. The German *Orient-Gesellschaft* has recently announced the discovery of three bowls at Asshur,[23] and Koldewey, *Tempel von Babylon u. Borsippa,* 58, speaks of numerous Aramaic bowls found at Borsippa.

Of bowls in private hands, I note one unpublished Syriac text in the possession of Professor Hyvernat, of the Catholic University, Washington; and three which Mr. Wm. T. Ellis purchased at Nippur in 1911, one of them containing a Syriac text similar to those published in this volume; this text I have prepared for publication in the Journal of the American

[22] *Journal asiatique,* X, vii, 8.

[23] *Mittheilungen,* no. 43, p. 13.

Oriental Society, where it will shortly appear. A few citations of this text are given in the glossaries under the abbreviation "Montg."[24]

The provenance of this material is thus confined to a small region, extending from Nippur and Bismaya on the south to Asshur on the north, and lying on both sides of the Euphrates.

[24] The "Roman bowl from Bagdad" described by O. S. Tonks in the *Am. Journal of Archaeology*, 1911, 310, on which he would find some magical syllables, has been proved by A. T. Olmstead (*ib.*, 1912, 83) to be a late Arabic forgery. A Pahlavi bowl inscription reported by A. V. W. Jackson, *JAOS*, xxviii, 345, does not belong to our category.

§ 3. Some Notes on the Texts Hitherto Published

I offer in this section some critical notes on the texts described in the last section. The texts would in many cases have been simplified if the editors had recognized that there is no distinction in the script between ה and ח, and most often none between ו and י. The glossary will indicate emendations of simple words, but here I present corrections necessary for the construction.

Ellis 1 has been recovered, as remarked above, through a duplicate in the Pennsylvania collection; see to No. 11. No facsimile is given for Ellis 2.

In Ellis 3 the opening lines should read:[1] דיזחון די פתכרי וי סטני ופתיכרי (2) כולהון מן מהפירוז בר הינדו . . . כל פתיכרי דיכרי ואיסרתא (3) לטתא אסרן נוקבתא ופום כל בני אינשא אסרן כולהון מן מהפרוז בר הינדו ניד[ר]י ולטתא וג'. The discovery of the proper names, Mehpêrôz[2] son of Hindû (see Glossary B), clears up these lines. איסרתא = איסתרתא? but see Glossary C under latter word. After the first word the scribe intended to write דיוי; inadvertently he broke into the word with פ', and then leaving the error uncorrected (as is the rule of these scribes) continued with the first word.—Read in l. 4, משכוניהון (?) for משריניהון; cf. משכונתא in glossary.—In l. 4 f. there is a parallelism to the opening lines of Schwab G:

Ellis 3	Schwab G
בשום הפכה הפיכה סורה (?) שמיה הפיכי	הפכה הפכה הפכה שמיה הפיכה ארעה
כוני והפכי מזלי הפיכה שעיהון דכל בני	הפיכה כוכב הפיכה מזלי הפיכא לוטתא
אנשא תשריה (?) לוטתא דאבא וג'	הפיכה שעותא הפיכא לוטתא דאבא וג'

בשום introduces a magical formula which can accomplish the *bouleversement* (הפיכה) of all things and hence of evil arts. כוני = כוכב, and must

[1] The numbers in the text represent the spiral lines.
[2] This reading is certain in l. 8.

be the Assyrian *kêwân* (biblical כיון), used in the general sense of planet. שעותא, שעיהון, are used in the sense of *derisio*, etc. (see Payne-Smith, *Thes.*, col. 4249 f.).—What follows is to be read thus: "The curse of father and mother, of daughter and daughter-in-law and mother-in-law is loosed (שריא), what is far and what is near, what is found in country or city—what is found in the country is loosed, and what curses (?) in the city is loosed, and what falls by the way."

In Ellis 5, l. 2, read ביתא (for במיא) and the following word possibly מן דשומיה, and translate—"a house, whatever its name (i. e. whoever owns it), let them read and depart from it (ליקרו ליקרו וליפוקו יתיה), even all who dwell in it—(i. e.) any vows," etc.; that is, the evil spirits are to read the *kamea* and depart. The jussive with ל is exceptional.

For the bowl edited by Rodwell, Halévy, Chwolson and Schwab, I give the following transliteration: כל חרשין בישין ועובדין תקיפין ולוטתא ונידרי ואשלמתא ומללתא דרחיקין ודקריבין דלילא ודימאמא דנברי ודינשי דעבדו[3] ליה ודעבדין ליה לברחאיי ולחיותיה[4] ולקיניניה דכוליהון בדלאלה מן יומה דנן ועד עלם וכולהון אילין ואילין משמתין ומנידין[5] נזירין ותבירין עקירין ומפקין ומבטלין מן גופיהון ומן כל הדמי קומתיהון ומן מדרתיהון דחיותיה ודברחאיי ועמיה (for דברחאיי ודעמיה) בדלאלה על אורח חוצי אוי[6]. So much is clear.—Then follows an apostrophe to a certain star, which appears also in Schwab E. With this parallel to our aid I read: אוי כוכבא דעליה רכיבא אסות ניהוא[7] מלפא חרשי לחרשיתא: i. e. "Oh (or, woe), the star on which rides salvation (healing),[8] the one which teaches arts to witches;" that is, some star potent in medicine and black arts, which may be invoked for good or evil.—Towards the end is to be read: בישמיה בר מסוסיא שמא רבא מפורש. "in the name of Bar Mesôsiâ (a master-conjurer evidently), the great Ineffable Name."

For Schwab E, see notes on the bowl just discussed.—In the middle of the inscription for חרמי קומתיה, read הדמי ק'.

[3] Perfect, followed by futuritive ppl.

[4] Not an Arabism, as Halévy suggests.

[5] Pael pass. ppl.

[6] A Syriac interjection; or do these characters belong to חוצי? In the parallel, Schwab E, we have חוציא ל.

[7] Cf. the Rabbinic ניהו.

[8] Cf. *Mal.* 3: 20.

A new collation might contribute much to the understanding of Schwab F. In l. 1, שרירי ("strong one") is an epithet of the "evil spirit." Read אשבעית at end of line.—L. 2, read עליכי אנתי אנפרת, אנ' being the name of the demon, and occurring again below.—L. 3, read כמשחא, "like oil they (the spirits) are dipped into the vessel of his heart," i. e., the man's inwards are suffused with diseases as with oil.—L. 9 again הדמי for חרמי.—L. 10, תהומי for תחומי.—L. 11, עד נמירו זמן ואדן דאבא בינא: "(ye angels go forth from him) until the consummation of time and that time is known,"—with reference to the day of judgment.

In Schwab G, l. 9, עלמא קלה שמעית וג' = "wherefore have I heard a voice? I have heard the voice of a man, Mešarsiâ," etc.

Schwab I, l. 1, read פתיכרי ופתי[כ]רן נוקבתא.—L. 5, כישוף מומין, "sorcery I exorcise."—L. 12, read רשים שמא וג'.: "inscribed is the name whereby heaven and earth are bound."

The transliteration of Schwab M is almost untranslatable. As the first word read מומינא, "I adjure," which disposes of one of Schwab's proofs that these bowls were used in hydromancy.

In Berlin Museum no. 2416, l. 4 (Stübe = Wohlstein, l. 5)* and repeatedly below, דלטיתהון = "whom I have cursed." In l. 20, etc. the demons are bidden to depart from the sorcerer's client and transfer themselves to any persons he has cursed.—For דביה, l. 6 (W. 8), see below, to 2 : 2, and for דיהביה = "of Yahwe," l. 15 (W. 22), see 13 : 7 and 26 : 4.—על רזא, l. 22 (W. 31) = "on ground of, in the name of the Mystery."

In Wohlstein, no. 2422, l. 16, טעותא is plural of the Targumic טעו, "false deity;" the same plural is meant in טעתא, no. 2426, l. 5.—In no. 2417, ll. 3, 6, for דבתי read רבתי. Then אמי רבתי = "my grandmother," and אלהתא ר' = "the great goddess."

* Stübe's text is much the better.

II. SCRIPT AND LANGUAGE

§ 4. Introductory

In the following notes I shall confine myself almost entirely to the bowls at Pennsylvania. The absence of facsimiles or of good ones in a large number of the published texts prevents a proper control over those texts. Moreover there is some advantage in confining the study to a single collection of texts whose age and provenance can be exactly fixed as in the case of the bowls from Nippur. At the same time what is true of these texts is found to hold good for other published inscriptions.

Our material may be divided epigraphically and dialectically into three classes: (1) Of the "Rabbinic" dialect in the square character; (2) of a Syriac dialect, in a novel form of Estrangelo script; (3) of the Mandaic dialect in its peculiar alphabet. Bowl inscriptions of the first and third classes have been published; but so far no Syriac text has appeared with the exception of one essay noted p. 16 and in § 6.

Some apology may be necessary for the term "Rabbinic" dialect. As used here, it does not imply that the rabbis or the Jews in Babylonia had a special dialect,—they spoke the native dialects; nor that there is any unity in the language of the Talmud, which is alive with dialectic varieties.[1] But the Talmud is practically our only source for a certain family of Aramaic dialects in Babylonia, easily distinguished from the two other literary dialects, the Syriac (Edessene) and Mandaic. The name chosen is a convenient handle.[2]

[1] Our texts themselves, as the discussion will show, are frequently of non-Jewish origin.

[2] "Babylonian" or the old-fashioned "Chaldaic," might be used, but each is equally indefinite and the former would be most confusing.

§ 5. The Rabbinic Texts

A. Script and Orthoepy

Ellis, who made the first attempt at decipherment of bowls in the square character, was inclined to find in them a very primitive script, antedating the Christian era.[1] Levy proceeded in a scholarly fashion and analyzed each character—to be sure, with rather scanty epigraphical resources;[2] he came to the conclusion that the bowl he was treating was to be assigned to the seventh century. Chwolson severely criticized Levy's method, and on the basis of the palaeographical material in his *Corpus* assigned the bowls of Ellis to various early dates (col. 118). Ellis 1 he assigned to the first Christian century; for three others he gave a graduated chronology, placing them in the second, third and fourth centuries respectively. But Chwolson's own method is somewhat of a *reductio ad absurdum*.[3] It is hazardous to assign a date for these bowls on palaeographical grounds; it is impossible to relate the various variations of script to each other by a chronological scale. For instance the contemporaneous character of many bowls at Nippur is shown by the recurrence of the same persons and families in the texts; indeed the same persons appear in texts of different dialects, yet these inscriptions differ greatly in script. But there is no reason, at least in the Nippur bowls, to assign them to different ages; from the interrelations between them, personal and phraseological, I am inclined to assign them to the same period. Indeed they might all have been written in the same year, so far as palaeography may say anything. The differences are chirographical, not palaeographical. Some of the scribes wrote a neat, even a beautiful hand; but many were written by careless scribes, and many by illiterate ones, probably often by

[1] In Layard, *op. cit.*, 510; so Layard himself for no. 1, p. 525.

[2] *ZDMG*, ix, 474.

[3] See Hyvernat, p. 140, on Levy and Chwolson's arguments.

laymen, who affected to write their own prescriptions. The comparative plate of characters presented by Levy offers a large number of variations in the forms of many letters: for ב and ר eleven each, for ט eight, for כ and ש six, etc. Now when one short text offers so many varieties in forms, it is impossible for palaeography to give any nice chronological estimate. In fact the ruder the letters are, the more archaic they appear; yet they may be mere degenerations of the standard type or survivals of an elder one persisting in obscure quarters.

One need but take a glance at Euting's alphabetic tables at the end of Chwolson's *Corpus* to recognize that the Hebrew square character has remained essentially the same since near the beginning of the era. The earlier evidence is drawn from monuments, the later from manuscripts, while in the long centuries of scribal reproduction the Jews have developed as it were a conventional *ductus*, whereas earlier there was far more room for variation when this family of the alphabet was not confined as a vehicle of a school of religious scribes. Thus נ is one of the most Protean of forms, but apparently all varieties are found in almost every century of the first millennium, according to Euting's showing.

In the palaeographical table attached to this work I give specimen alphabets drawn from the bowls. But a fine analysis for chronological results would be unprofitable. For a round date the bowls might be placed on palaeographical grounds at about 500 A. C., but this date might be carried further back or further down according as other evidence might be adduced.

The finial letters are used, but with few instances of finial צ. A phenomenon that presents some difficulty is the practical identification of ו and י and of ה and ח. In the case of the former pair, they are often distinguished, the י being then represented by a short stroke or sometimes by a small angle, the ו by a long stroke; but there is no consistency in this differentiation, and the י is easily prolonged into a stroke like ו; within the same text or line or even word, the י may be written both ways. This confusion has led to the barbarous appearance of many of the edited texts, on which Nöldeke has animadverted.[1] The confusion throws doubts on certain vocalizations,—e. g. is it שובטא or שיבטא?—and it is of grammatical

[1] *Zeits. f. Keilschriftforsch.*, ii, 296.

moment in the verbal endings ן and ין, where, because of the recession of the stroke of the ן, the vowel letters are not at all distinguished.

There is no distinction between ח and ה in the Nippur bowls, and the same is true of the other published bowls, so far as I can observe. The ח includes ה. It is the same phenomenon that appears in the Mandaic, where ה has been retained only as a pronominal suffix. This identification is the representation of actual speech, in which our scribes no longer distinguished between the two gutturals, even as in the Mandaic. As the Babylonian Talmud distinguished between them in its text, we may surmise that the better educated preserved the difference at least in spelling.[5]

The final *â*-vowel is expressed by א, less frequently by ה. Some texts use the latter consistently, and there is hardly a text which does not give an instance of this spelling. It is used regularly for certain common words, e. g. לילי‌ה; and especially when the word contains an א, e. g. אנה, אפרה. This is a primitive type of Aramaic orthoepy, but the Samaritan dialect has preserved it, and an early Palestinian amulet, published by me elsewhere, shows the same features.[6] The phenomenon is unique in late Eastern Aramaic.

The vowel letters ו and י are used abundantly, always in terminal syllables and for long vowels, and very commonly for short vowels. Yet there is variation in this respect, even in the same text. On the whole א is sparingly used as a vowel letter, preferably to indicate the feminine plural, e. g. לילי‌אתא, yet indistinguishable לילי‌תא is as frequent.

It goes without saying that there are no vowel points. In one bowl (No. 13) a kind of pothook has been used to separate words, and here and there a point has been used, but this is the extent of the punctuation. Sometimes a scoring is found between the lines of script and by means of vertical lines phrases are blocked off; these are generally magical combinations. In No. 22 one word is written in a clumsy Syriac script and in one of Ellis's bowls a Syriac ח is once used. Quite a peculiar script is found in No. 30, and פ has a unique form in No. 22.

[5] In the elder type of ח, the left leg was attached to the upper bar, hence the confusion with ה was easier. The Rabbis preferred this form; see *Men.* 29b. The close assimilation of the two letters appears in the Assouan papyri of the fifth century B. C.

[6] *JAOS*, 1911, 272.

B. The Language

The grammatical phenomena in the bowls from Nippur can for the most part be exemplified from the Babylonian Talmud, and like the latter they present various dialectic types. On the one hand they have close connections with Mandaic and on the other they show some Syriac idioms.

As in the Mandaic orthoepy the *šewā* is frequently designated by י, a circumstance which throws light upon the minor vocalizations. I may notice אימיהון, ביתיהון, "their mother, house," etc.; ניקיבתא, pl., אילהא; with prefixes: ביפתכרי; לימרומא; דישמלהון, "their left hand;" and with ו, ויבנתא, "and daughters;" וידלא, וילשלהבון (a punctuation appearing also in Targum Onkelos, see to 3: 3).

In the consonants there is the yielding of the harder sounds, e. g. איספנדרמיד, איסכופתא, varying with איסק, איצ; indeed צ has become a very rare character. In general the gutturals are preserved, though ה and ח are no longer distinguished. In one bowl, No. 6, which has other Mandaizing characteristics, are found אחא = עחא, ניפקא, √ פקע; ניבר, √ עבר. The same bowl offers תישילטון, with the intrusion of a new vowel, as is particularly characteristic of Mandaic.[1]

For the pronouns I may refer to the lists at end of Glossary C. For their suffixal forms may be noted בניה, 2: 4, and even בנה, 11: 9 (etc), "his sons," עלה = עלוהי in duplicate texts (see to 11: 9), as common in Mandaic, and appearing also in the Talmud. For the 2nd per. pl. fem. כי- is used for כין-(see to 7: 3).

The masculine plural is in י- and ין- indifferently, even in close association. טוריא 8: 6 and the nouns in 13: 1 ending in יה are probably Mandaic forms of spelling, *ê*.

As for the verb, along with י as dominant prefix in the impf., נ takes its place in Nos. 6, 13 (along with two cases in י), 19, 25, 28. A Nifal with Aramaic ending appears in 25: 2, נסתרתו, along with the ppl. ניסתרין. In 28: 1 appears a Syriac Ethpai'al, נישתיחן. The ת of the reflexive is rarely lost, yet e. g. תירחקון, תיחתמון.

The 1st pers. sing. appears as קטלת or קטלית, for a verb of *i*-stem we have סליקית. There is found a perfect plural, אישתכחון, as in Syriac.

[1] Nöldeke, *Mand. Gram.*, § 25.

Second feminine plurals, which are lacking in the Talmud, are found; unfortunately as the notes show, it is not always possible to decide whether a form is singular or plural, and there is the awkward confusion of ן- and ין-. In 6: 9 תיתכבשון is certainly plural, and doubtless the masculine plural termination (as in Hebrew) is to be understood in preference to *-in,* which would be the singular. It is uncertain whether שקוכי, 11: 8, 26: 6, is fem. singular or plural; in the duplicate text to No. 11, the plural is evident.

For the few cases of the quiescence of ע in verbal forms, see above. In פ"א roots we have, e. g., אתאסרו, תיתסי. Unique is the final loss of the ל of אזל in the participal form אזינא, 6: 6. For forms of הוא we have תיהוי, תיהי (both in the same text), spelt elsewhere תהוי, תהי. The masc. plural of the participle appears as הון, הוי; cf. מחן, רמן, from מחא, רמא.

As to the prepositions there is the interchange of ל and על, as in Mandaic. Also observe the occurrence in the same line of קדמוהי and קדאמיה, 3: 7.

There is almost nothing peculiar in the syntax. I note the occurrence of an old-Aramaic idiom in ביתלהון, "their house," 1: 6; also the unique idiom, if the text is correct,— ו- ועים, "and also," 1: 3 (cf. Latin, *simul ac*).

[8] See Levias, *Grammar of the Aramaic Idiom Contained in the Bab. Talmud,* § 188.

§ 6. The Syriac Texts

In our collection appear seven bowls of Syriac script and language,—the first of this category to be published with the exception of the poor facsimile of a probably similar bowl, accompanied with an unintelligible transliteration, in Layard, *Nineveh and Babylon*, p. 521 f.[1]

A. Script and Orthoepy

The script reveals itself as belonging to the Palmyrene-Syriac type, and that we are dealing not with a mere autographic "sport" is clear from the fact that two or three hands have written our seven texts. It agrees with the Palmyrene and Edessene in pointing ר, and with the former in not distinguishing ד. The Seyâmê or double points are used; this mark is generally written on the last letter, but occasionally, generally for reasons of space, on an earlier character. Once the two points are written vertically, 33: 5; they may include the points of ר, and in 34: 6 ר appears to have the two points one above and one below. The script provides the pronominal fem. suffix ה with an upper point, an ancient distinction in literary Syriac.[2] But there is marked distinction from the Edessene type in the absence of ligature; letters may touch one another, but they are not purposely written together.

In examining the individual characters (see my Alphabetic Tables) we find that נ, ז, ח, ע agree with the types of the Estrangelo alphabet, and ב and מ approximate the latter; but evidently our novel alphabet has had a history independent of Estrangelo.

[1] Chwolson thinks that the script of this bowl is of older type than that of the Edessene MS. of 411 (*CIH*, col. 116).

[2] In 34: 4 מושא, "Moses," is written with a point over א —to represent the *ê* sound?

It reveals a family likeness with the types found in early Edessene inscriptions[3] (where the characters are independent and no points used). But the genealogy for the peculiarities of our script is to be found in the cursive Palmyrene script, with which the Estrangelo is also to be connected. See Euting's alphabetic tables, cols. 17-28, in Chwolson *CIH;* his tables in Nöldeke, *Syrische Grammatik;* the atlas to Lidzbarski's *Handbuch z. nordsem. Epigraphik,* and for the history of the cursive Edessene script, the latter work, p. 193.

This relationship appears in ב (n. b. the curving stroke of the head); in ה (the type in No. 36 is identical with the Palmyrene); in ו (with the head at almost a right angle); in ח (our character is practically identical with the Estrangelo, but the origin of the type is to be found in Palmyrene, and a type in No. 32 is the replica of the angular form presented by Euting, col. 26); in מ; in י reduced to a small stroke or coarse round mark on the line; in ל (with parallels in Euting's table only in cursive Palmyrene, see cols. 24-28); in מ, which tends to a closed figure, and ם; in פ (a small half-oval figure, primitive in form, corresponding most closely to the cursive Palmyrene); in ק; in ש (preserving the ancient type against the Edessene development). צ is not found.

Of the remaining letters, ר is distinguished from ד by the diacritical point as in Palmyrene, but the figure of both characters faces to the right, a unique phenomenon. The character כ is unique, with its long curve extending far to the left, so that this feature becomes the characteristic and the head degenerates to a point;[4] but here again the Palmyrene type may be compared. The letter נ is *sui generis,* the medial character may be related to the Palmyrene; the finial with its long stroke recalls the Estrangelo finial ג, but terminates in a fork. ת also stands by itself. There is a general resemblance between it and the Syriac types presented by Euting, in Nöldeke, cols. viii-xiii, representing the fifth to the seventh century. But those Syriac forms have arisen from the tendency to ligature, whereas our ת is innocent of any such purpose. I am inclined to think

[3] E. g. Sachau, "Edessenische Inschriften," *ZDMG,* 1882, 142; n. b. no. 8.

[4] The nearest approach to this type appears in a similar character with a long tail in the Syriac MS. from Turkestan published by Sachau in the *Sitzungsberichte* of the Berlin Academy, 1905, 964.

that it is to be related to a rather primitive form of ת which consisted of a downward stroke to the left with a crosspiece near the top. Our type has simply reversed this, making the stroke downwards to the right, while the crosspiece comes at the bottom.

This analysis of the script presented in our Syriac bowls exhibits accordingly an older type than the literary Estrangelo and the Edessene inscriptions; its most pronounced relationships are with the cursive Palmyrene, and it is to be regarded as an independent sister of the Edessene script. Withal no character shows a distinctly late type.

Epigraphically then this script is of much interest, as exhibiting an early local form of Aramaic alphabet, of Palmyrene type, existing in Babylonia. It may have been a commercial script which spread from the metropolis Palmyra.[5] In § 14 the age of the bowls will be discussed; the script itself does not stand in the way of an early age, perhaps the fourth century, though other evidence may induce us to date the texts some centuries later.

Since the above paragraphs were finished and regarded as closed, my attention has chanced upon the Turkish Manichaean fragments from Turfan in Chinese Turkestan, and I find a striking resemblance in many characters of the alphabet there used (which is an offshoot of the Syriac script) to those of the Syriac type before us. I may refer here to the discussion of the script by F. W. K. Müller in the *Sitzungsberichte* of the Berlin Academy, 1904, 348 ff., and the facsimiles published in subsequent volumes of the same journal, e. g. that facing p. 1077, in the volume for 1905. In my Alphabetic Tables at the end of this work I shall present the correspondence in parallelism. The Turkish script is very much younger than ours, but has steadfastly preserved the type inherited from Babylonia. Mani came from Babylon, a few miles distant from Nippur, and we must suppose that our script was the local use of that region, which came to be adopted by Mani and his sect as the vehicle of their literature.

[5] It may be worth while to suggest that we possess in this peculiar script the script of the Harranian pagans, vulgarly known as the Sabians. As Chwolson has shown in his monumental work, *Die Ssabier und der Ssabismus*, these heathens spoke a pure Syriac (i, 258 f.), although the peculiar alphabets assigned to them by Arabic writers are fictitious or kabbalistic (ii, 845).

The history of our script is thereby carried back to the third century, by which time it was well established. What was thus a local script came to be perpetuated as the literary instrument of the Manichaean sect,—a fate which has so often happened to various forms of the Aramaic alphabet. I have given further discussion of this matter in articles now in press for the *Museum Journal* and the *Journal of the American Oriental Society*. It may be added that there are no Manichaean traces in the bowls.

In the matter of orthoepy, while the forms without *matres lectionis* abundantly appear (e. g. לילית, plural; פתנמא, etc.), *plene* writings are also frequent, e. g. מלאכא, אימא, מיתקרא, תיזה, חילמא, כאסא, etc. There also occurs at times the confusion of ה and ח, characteristic in the square Aramaic texts and in the Mandaic: ה for ח in מהילין 31: 5, תיזה 38: 3, פרהיא 32: 4; and ח for ה in אימחתהון and אבחתהון 36: 5, איתחפיך 36: 1. The same sorcerer or family appears to have written bowls in both the Rabbinic and Syriac dialects (see Nos. 33-35), and hence the natural contamination of the one by the other.

The extensive use of the *Seyâmê* in all plurals is to be noted: in the pronoun הלין 31: 5, the plural of the verb e. g. נחיין 31: 6, the participle אתין 37: 8, etc.

B. The Language

The dialect belongs to the Edessene type; this is evident from the forms of pronouns and verbs. But there is extensive corruption from the type of dialect which has been literarily preserved in the Mandaic. This appears, as we have seen, in the Mandaic confusion of ה and ח. The 3rd sing. masc. or fem. suffix to a plural appears as ה; e. g. בנה, "his sons," 33: 13 (with *Seyâmê*), the same for "her sons" (with single point over ה), עילוה (with *Seyâmê*), 37: 8, etc. We have observed the same phenomenon in the Rabbinic texts.

For other similar Mandaisms we may note: the equivalence of ל and על, 34: 10; the verbal form נעילון (from עלל), 34: 10 (see my comment); the pronoun עילוה, 37: 8; בירא for בעירא, 34: 8, cf. פורא for פוחרא; אבוכון for אובכין, 37: 10; the construct שום, e. g. 34: 6. There are also some peculiar

forms, e. g. חתומין 34: 1, משכונתא 34: 2, סוטיטא 35: 4; and a few rare or unknown words: דיאבולא (*διάβολοι*), דסתבירא, דרמנא. The numeral with the suffix תרויהון 34: 4, is not classical, but is found in Targumic, Palmyrene, and Neo-Syriac. In 33: 10 לאפקכן is Afel infinitive of נפק.

§ 7. The Mandaic Texts

A. Script and Orthoepy

The script of the Mandaic bowls is exactly similar to that of those published in facsimile by Pognon. The peculiarities of certain characters distinguishing them from those in the MSS. of the fifteenth and following centuries, as noted by that scholar (*Une incantation,* 12 f.), appear likewise in these bowls.[1]

The ב is a large letter dropping its shaft obliquely below the line and recovering itself by an up-stroke at an acute angle. נ is a zigzag figure, or has an open, round flourish at the top. Following the traditions of the early alphabet ד and ר are similar, often indistinguishable; the former tends to a smaller head and a square angle at the top, the latter to a curving form like the end of a loop. ז is ligated at the top with the preceding letter. ח has, in Nos. 39, 40, a long leg to the right. ט appears in angular form, and also in a balloon-shaped figure. כ is a large letter rising well above and dropping below the line, sometimes in a free curve. Except that the drop is vertical, it is similar to ב; we may compare the like similarity in the Palmyrene. In No. 39 ל has the primitive form of two strokes at an angle, but leaning backward, and so allowing of ligature to the left by the foot. The left foot of מ projects itself obliquely in a straight line, and the extended stroke at the top distinguishes the character from ת. In No. 39, ס has the later form, similar to the Arabic ص; with others, the body is fuller, approximating the ק. ע is generally an angle lying upon the line, but in No. 39 it drops below the line, in two rough curving lines. פ has a large head, but does not drop below the line. צ is not found in these

[1] Compare now the early Mandaic amulet published by Lidzbarski in the de Vogüé Memorial Volume, p. 349, and the editor's notes, p. 350. His facsimiles are too indistinct to permit satisfactory comparison.

bowls. ק appears as a closed figure, like a roundish Estrangelo ק, with the left stroke failing to reach the upper line and curving back—probably for distinction from ם. The ש consists of two rough loops, which lie on top, or below, or on opposite sides. The ת has often the simple form of the Hebrew ח.

The suffixal ה (which I represent by the same character in my transliteration) occurs at the beginning of No. 38, and is then dropped by the scribe; it may perhaps be intended in one or two other cases in these bowls. Otherwise it cannot be distinguished from א; however, following the general practice I have always indicated the suffix by ה. A similar uncertainty of distinction appears in Lidzbarski's amulet; in Pognon's bowls the distinction is generally preserved.

The peculiar sign for the relative, דַ, has the shape known from the MSS., except that the vertical stroke at the left hand is often written without attachment to the first part. It always appears as a separate word, as is the case in Codex B of Petermann's edition of the Ginza, and apparently in Lidzbarski's bowls. I have followed the common editorial use of attaching it, like the Aramaic relative in general, to the following word. See the arguments of Nöldeke, *Mand. Gram.*, 92, for regarding the sign as a peculiar development of ד, not as a ligature of די. But it must be asked why such a special sign should have been used. It appears to be a survival of the older Aramaic די, and I would argue that the pronunciation *di* had survived until the formation of the Mandaic script. In these texts, as in the MSS., the relative when internal (e. g. after ו) is expressed by ד; but this does not prove that דַ = ד, only that with the support of a preceding vowel the vowel of the relative was rejected.

The characters are spaced unevenly and in the case of unligated characters it is often difficult to ascertain with which word they are to be combined. The ligation is haphazard, there is no consistent attempt at consecutive chirography as in the later texts.

Apart from the bowl-inscriptions and Lidzbarski's amulets, all the Mandaic texts are preserved in late texts; the former are therefore important as the earliest monuments of the script. In § 14 I give evidence to prove that the Nippur texts are to be dated *circa* 600; at that period then the Mandaeans had elaborated their own alphabet with its peculiarities.

Investigations, which I may not expatiate on here, have led me to the belief that for the most part the Mandaic alphabet represents an early type of the "Syriac" alphabets; it is indeed often closely connected with the Palmyrene and Nabataean scripts. The sect itself must have arisen in the age when Gnosticism was rife in the Orient and before the domination of Christianity, and we have to suppose that it early developed its own peculiar calligraphy, after the wont of the various oriental sects of that age. Compare the remarks on the Manichaean alphabet, § 6.

As Pognon says of his text from Bismaya,[2] the language of the bowls is identical with that of the Ginza and Ḳulasta. The only difference is formal, in the sparse or varying use of the *matres lectionis*.[3] I may cite: חיוניאתא, תלתמא; עבוריא, עי; עמא; חיא; חתמתא, נטרתא, where later א was used in the first or second syllable or both; we actually find זרוזתא, זא, זרא.[4]

B. The Language

We may note the following syntactical peculiarity: the apparent use of the anticipatory pronominal suffix ה without the following relative particle דַּ, the suffix itself creating a kind of construct case-ending, the regimen being in apposition to the suffix. E. g. 40: 3: מנלתה פת פתה ב' "the word of B's granddaughter." A similar construction occurs throughout Nos. 21, 22, 23 (*q. v.*); also a parallel instance in the Palestinian amulet published by the writer in *JAOS*, 1911, see note there, p. 278. In 40: 24 such a "construct" form in ה is used before a plural noun: ביניאנה חיואניאתה. Was it in the way of becoming a stereotyped case?

Apart from the references to "Life," these bowls are not specifically Mandaic in religion. Pognon's bowls are much more colored with Mandaeism. Under No. 11 it is to be observed that the Mandaic text there compared is secondary to the Rabbinic texts; probably in the Nippur community the Mandaeans got their magic from the peoples of other dialects. In Pognon's texts the spirit of the ancient Babylonian magic appears more strongly than in any other of the bowl-inscriptions.

[2] *Une incantation*, 13.

[3] Which Pognon strangely enough regards as "errors."

[4] Nöldeke's expert judgment, in his review of Pognon, p. 143, that the language of the bowls is later than that of the Mandaic classics, may be noted here.

III. THE MAGIC OF THE TEXTS

§ 8. The Purpose of the Inscribed Bowls

The incantation bowls belong, with few exceptions, to one very specialized form of magic. They spontaneously suggest the art of "bowl magic," which, in various forms, is spread over the world, and which has a straight genealogy from Joseph's drinking cup to the spinster's teacup of our own day.[1] Ellis, the first commentator on the bowls, advanced the theory that, following an ancient and widespread therapeutic device, they were filled with a liquid which was drunk off by the patient who thus absorbed the virtue of the written charm.[2] This explanation has been generally given up. Layard objected that then the inscriptions would have been effaced by the liquid,[3]—which argument, though repeated by subsequent scholars, is not conclusive, for the magic vessel may have been preserved as itself a permanent prophylactic. Layard himself thought that they were used in places of sepulture and were charms for the dead, apparently relating them to the utensils placed in primitive graves. A number of Pognon's bowls are in fact endorsed with דבית קבוריא, "for the cemetery,"[4] and Wohlstein's no. 2417 appears to be directed against the ghosts of the dead. But the bowls at Nippur were found in ruined houses, and in no case is a bowl intended for the service of the dead.

Schwab argued for the hydromantic use of the bowls.[5] He makes reference to Babylonian hydromancy,[6] and proceeds to quote a number of

[1] Rodwell expatiates on this kind of magic, *TSBA*, ii, 114.

[3] *Op. cit.*, 526.

[4] *Inscriptions mandaites*, nos. 5, 7, etc., and p. 3.

[5] *PSBA*, xii, 292 f.

[6] Cf. Hunger, "Becherwahrsagung bei d. Babyloniern," 1903 in *Leipziger Semitische Studien*, i.

Talmudic passages referring to Joseph's cup, magical beverages, etc., but he shows no connection between his numerous inscriptions and the method and purpose of hydromancy, which affects to give an oracle to men by the movements of oil or other floating objects in the liquid contained in the cup.[7]

Wohlstein attempted another explanation in the line of a kabbalistic dictum that no work of magic can be effected without the aid of a vessel (כלי).[8] It was Hyvernat however who first, from the field of Jewish demonology, obtained the clue to the right interpretation of the practice we are considering.[9] He refers to the Jewish legends of Solomon's magical ability to confine demons in vases, etc., and the parallel fables in Arabian lore of bottled up jinns, etc.[10] As we shall immediately see, this is the correct explanation.

Pognon did not himself see *in situ* the large collection of bowls which he published in his *Inscriptions mandaites,* but he learnt from a native that such bowls were found buried just below the surface of the earth, and, generally, reversed, the bottom of the bowl uppermost, while at times bowls were found superimposed upon one another, the mouth of the one fitted to the mouth of the other (p. 1 ff.). Pognon does not guarantee the truths of these statements, but suggests in accordance with them the theory that the inverted bowls were prisons for the demons, who were confined by the virtue of the magical praxis. The expeditions of the University of Pennsylvania to Nippur have corroborated this theory by ocular evidence. Referring to the find of bowls above the Parthian temple, Hilprecht reports that "most of the one hundred bowls excavated while I was on the scene were found upside down in the ground,"[11] and he gives a photograph showing some of the bowls in this position. He draws the same conclusion as Pognon concerning the magical use of the vessels.

Finally, one of the Pennsylvania texts demonstrates that this was the conscious purpose of the bowl magic. No. 4 opens thus: מיטלי דלמיכל

[7] For the correction of his hydromantic interpretation of כשוף מומין, see above § 3.

[8] *ZA,* viii, 325, quoting from the book *Raziel,* 32.

[9] *Sur une vase judéo-babylonien,* 137 f.

[11] *Explorations,* 447.

מלאכין קדישין וכל רוחי בישתא וג׳: "covers to hold in sacred (accursed) angels and evil spirits," etc.[12] The same inscription announces to the demons that they are "bound and sealed in each one of the four corners of the house."[13] This magical method in fact gives a special name to the bowls; it is called a כיבשא, which literally means a "press." The same term appears in No. 6, which opens as follows: כיבשא דכבשין להון לשידי וג׳ "a press which is pressed down upon demons," etc. The theme is continued throughout the text: "This *press* I press down upon them" (l. 4); "who ever transgresses against this *press*" (l. 11), etc. In a word we have to do with a species of sympathetic magic, the inverted bowls symbolizing and effecting the repression and suppression of the evil spirits.[14]

The quadruple use of the bowls also explains the frequent recurrence of identical inscriptions, e. g. Nos. 21, 22, 23, all made out for the same client. The four charms thus placed at equidistant points, which as cornerstones represented the security of the house, formed a circle of magical influence about the dwelling.[15]

In the Babylonian magic we find a similar use of phylacteries buried under the pavement of the house. Botta, Layard and George Smith discovered under the pavement of buildings small receptacles in which were placed magical figurettes, of composite human and animal form.[16] The use of the circular lip of the bowl is also in line with the magic circle which appears to have been practised by sprinkling a circle of lime, flour, etc. around a group of small images of the gods.[17]

[12] See the commentary to the text.

[13] The binding at the four corners of the house appears also in Pognon, B, nos. 1, 2, 3, 4, 24.,

[14] If my interpretation of the introduction of Nos. 9 and 14 be correct, we have also a reference to the formal depositing of the bowls.

[15] Cf. the cylinder and prism texts deposited at the four corners of great buildings in ancient Mesopotamia.

[16] Botta, *Monument de Nineve*, v, 168 f.; Layard, *Nineveh and its Remains*, ii, 37; Smith, *Assyrian Discoveries*, 78. See Fossey, *La magie assyrienne*, 114 f. For a like Jewish and Christian use, see Reitzenstein, *Poimandres*, 30.

[17] Zimmern, *Beiträge z. Kenntniss d. bab. Religion*, 169, no. 54, and cf. Thompson, *Semitic Magic*, p. lxiii, translating *uṣurtu* "circle" (Zimmern, "Gebilde"). Cf. the charm with a circle made by a ring presented in the Papyrus Anastasi, Wessely, Vienna *Denkschriften*, hist-phil. Classe, xxxvi, 2, p. 34, and further *PSBA*, xiii, 165. The circle of the magical seal possessed the same efficacy.

But there is proof that the praxis of bowl magic existed in ancient Babylonia. In a passage of the magical *Utukki* series presented by Thompson,[18] we read a ban on an evil spirit: (a demon) "which roameth loose in an upper chamber, with a bason (*kakkultu*) without opening may they cover it." The editor in his note has recognized the form of magic indicated, without comparing it to the later bowls.[19]

The bowl is then primarily a domestic phylactery, to be classed with the abundant forms of this species of magic, e. g. the Jewish Mezuzoth. An exorcism given by Wessely[20] from the papyri recalls much of the very wording of our texts: that evil spirits may not injure the wearer of these exorcisms, hide not "in the earth,"[21] nor under the bed nor under the door nor under the gate nor under the beams nor under vessels nor under holes. The lurking of devils in the house (e. g. 1: 6), in the beams and on the thresholds (e.g.6:4), frequently appears in our texts, as also in the Talmud, Especially is the threshold named as guarded against the intrusions of evil spirits (e. g. 37: 2). The means of entrance are extravagantly detailed in a Babylonian text: by gate, door, bolt, etc., lintels, hinges, etc.;[22] and door and bolt and threshold are exorcised.[23] The bedchamber is the special object of care, and the endorsement on No. 12, "of the room of the hall," may refer to a bowl which was deposited in that apartment.

A different application of the same magic is found in the bowls published by Pognon, which were found in a cemetery, many of them being inscribed "for the cemetery" (דבית קבוריא). This is the worldwide practice of laying the graveyard ghosts. I am inclined to think that duplicate inscriptions were made out, some for the house and some for the

[18] *Devils and Evil Spirits of Babylonia*, ii, 124.

[19] I must leave it open whether the phrase in *B. Meṣ.* 29b (= *Ḥull.* 84b), כסא דחרשין ולא כסא דמשרין (the last word is variously spelt), is a reference to our magical art; it could be translated "the cup of the sorcerers and not the cup of those who break sorcery," i. e. of bowls used for malicious (cf. § 12) or for preventive magic. *Tanḥuma* makes the second cup mean an ill-prepared brew which is ground for divorce; see Levy, *Hwb.*, iv, 151a.

[20] *Denkschriften*, xlii, 2, p. 66.

[21] Was there a duplicate buried in the house?

[22] Jastrow, *Religion Babyloniens u. Assyriens*, i, 377, where the full translation is given.

[23] E. g. Tallquist, *Maqlu*, p. 93, l. 10; Thompson, *Devils*, ii, 123.

graveyard; this would explain the reference to the four corners of the house in Pognon, nos. 1, 2, etc. None of the Nippur bowls are so marked. Wohlstein's bowl no. 2417 is a detailed exorcism of ghosts.

But Nos. 13 and 28 pass from prophylactic to aggressive magic; they are love charms such as we meet in an early age only in the Greek world. I leave their consideration to the commentary, and only note here that a love charm is as much a *κατάδεσμος* or *defixio,* to use the words of classical magic, as a ban of evil spirits. It is interesting to note that the Greek charms for *defixing* a rival in the circus or a lover were often buried in cemeteries, for the powers of evil were in any case invoked.[24]

The bowl itself is called simply, כסא or כוסא, also occasionally קמיעה amulet = *φυλακτήριον*, applied secondarily to a phylactery that is not suspended or worn (√ קמע).[25] For other terms applied to it as a magical instrument, see § 11.

The tradition of this species of bowl-magic has lasted down into Islam, to fairly modern times. In his *Monumens arabes, persans et turcs,* Paris, 1828, Reinaud has given (ii, 337 ff.) a careful description of several Arabic magical bowls of brass and glass, contained at his day in private French collections and at the Vatican. They are talismans (to quote one of the bowls) against snakes, scorpions and dogs, against fever, pangs of childbirth and maladies of nursing, enteric diseases, sorcery and dysentery.[26] They are introduced "in the name of the merciful and compassionate God" (cf. the similar formula in our texts, e. g. 3: 1 and note), and are elaborately provided with quotations from the Koran and with references to holy legend and the power of God (cf. § 11). One reference indicates that they were inscribed at the propitious astrological moment, cf. below, § 11.

This is the only literary reference to bowls of this character I have been able to discover. In the possession of the Hon. Mayer Sulzberger of Philadelphia is a small, finely engraved brass bowl, with Koran quotations in Nashki. The text has been translated by Dr. B. B. Charles, Fellow of

[24] E. g. the Cypriote charms published by Miss L. Macdonald, *PSBA,* xiii, 159, and the Hadrumetum tablet, discussed in No. 28.

[25] See Blau, *Das altjüdische Zauberwesen,* 87, and "Amulet" in *Jewish Encyc.*

[26] So in Schwab L and Q charms against dog-bites, and a reference to scorpions is found in Pognon B; see Glossary C, *s. v.* עקרב.

the University, who has kindly allowed me to present his rendering, as follows:

"This blessed bowl wards off all poisons, and in it are assembled tried virtues; and it is for the sting of the serpent and the scorpion, for fever, for dysentery (?), for indigestion, for the mad dog, for stomachache and colic, for headache and throbbing, for fever of the liver and spleen, for facial contortions, for lack of blood (insufficient blood supply), for annulling magic, and for the eye and the sight, and for use in giving to drink of water or oil, or for harm to enemies and for poison in the conclave of (two) lands, when the imâms of the religion and the orthodox caliphs are thereon agreed for the advantage of the Muslims."

Probably many such phylacteries are to be found in oriental households. Evidently the peculiar practice of the inversion of the bowl has disappeared; the vessel itself with its magical inscription has become "blessed," an efficient phylactery. But the use of the bowl is doubtless a survival of the magic we are discussing.

§ 9. The Exorcists

The exorcist is in general anonymous; his personality is lost in his professional possession of occult powers which range far above personal limitations. By the age of our texts he had long been differentiated from the temple priest, or maintained connection with a cult only in out-of-the-way shrines or in the new theosophic circles that sprang up in the Hellenistic age.[1] A few points however may be noted.

Several of the Nippur texts[2] contain magical formulas worked in the name of Rabbi Joshua ben Perahia (Syriac, Rab Jesus bar P.), who is none other than one of the early Zugoth or Pairs who handed down the Tradition from the Great Synagogue to later ages (see to No. 32). Whether this magical tradition concerning the venerable Joshua be authentic may be dubious;[3] but the case is illustrative of the tendency in magic to appeal to ancient great masters of sorcery, and to use their names as though their full powers were possessed. We may compare the many references in the magical papyri to such ancient masters, whose spells have become the stock in trade of their successors.[4] The assumption of these quacks is well illustrated by a Jewish mortuary charm in which the magician thus introduces himself: "With the wand of Moses and the plate of Aaron and the seal of Solomon and the shield of David and the mitre

[1] For the Babylonian *âšipu* and *mašmašu*, see Zimmern, *Beiträge*, 91; Thompson, *Semitic Magic*, 21.

[2] Nos. 8, 9, 17, 32, 33, 34.

[3] For the Talmudic doctors and others who practised "legitimate" magic, see Blau, *Das altjüdische, Zauberwesen*, 23. In 34: 2 the sorcerer claims to be a "cousin" of Joshua and there is reference to his "house," i. e. school in 8: 11. Compare the inherited magical powers of Choni the Circle-maker, *Taan.*, 19b, 23.

[4] See the list of such magical authorities in Wessely, Vienna *Denkschriften*, xxxvi, 2, p. 37; cf. xlii, 2, p. 10 (I shall hereafter refer to these volumes simply as xxxvi and xlii). Also Apuleius gives a similar list, including Moses, xc, 100, l. 10 (ed. Helm), see Abt, "Die Apologie des Apuleius," 244, in Dieterich and Wünsch, *Religionsgeschichtliche Versuche v. Vorarbeiten*, iv, 2.

of the chief priest" (I perform this spell);[5] and this Palestinian charm has its parallel in our text No. 2: "I Pabak come, clad in iron and fire, vested with garments of Hermes the Logos, and my strength is in him who created heaven and earth." In 7: 12 the authority of Prangin bar Prangin is exercised—some sorcerer of the hazy past, if not a figment of the imagination. 'The great Abbahu' in l. 9 is to be explained in the same way, if it is not a misunderstanding of a Gnostic term, and so too Barmeštael in l. 13, literally the 'son of the oracle-giver.' In some cases, e. g. the latter two and instances in No. 19, it is difficult to decide whether we have to do with men or divinities; the line was not drawn between the sorcerer and the deity, as in the Hermetic identification of Moses with Hermes[6] and in the lively incident in *Acts* 14, where the people of Lystra deify Barnabas and Paul.

In one case, the pagan text No. 36, the exorcist presents his commission from the deities: "The lord Shamash has sent me against thee, Sina (the moon) has sent me, Bel has commanded me, Nannai has said to me..... Nirig has given me power." This is the survival of well known old Babylonian formulas, e. g. the *Maḳlu* series, i, l. 52 ff:[7] "Anu and Antu have commissioned me, ... I am ordered, I go, I am sent, I speak, Against the might of my sorcerers Marduk the lord of incantation has sent me."

I am inclined to think that some of the texts, especially the more illiterate ones, were written by lay people. The "word of power" had become the essential element (see § 11), and like a physician's prescription might be copied by anyone, or even invented—for along with the belief in sorcery always goes a subconsciousness of its hocus-pocus. For instance, No. 2 is a mutual charm in which two men, in the respective halves of the text, exercise each his powers for the other. Are they

[5] Montgomery, *JAOS*, 1911, 272. For the identification with Moses cf. the Hermetic phrase, *ἐγώ εἰμι Μωσῆς*, Wessely, xxxvi, 129, l. 109 ff.; also see Dieterich, *Abraxas*, 68, and Reitzenstein, *Poimandres*, 279. For the Egyptian use, cf. the Harris papyrus, "I am Amon," Brugsch, *Religion u. Mythologie d. alt. Aegypter*, 725. Or the sorcerer may identify himself with some mighty demon; e. g. *Giṭ.*, 69a, "I am Papi Shila son of Sumka," cf. Blau, *op. cit.* 83. Also cf. 27: 9 with 2: 6.

[6] Dieterich, *l. c.*

[7] Tallquist, p. 37. Cf. the commission of the Old Testament prophets, e. g. *Jer.* i, and the adoption of soothsaying formulas; cf. *Num.* 24: 4 and *Is.* 50: 4.

professional magicians or not rather laymen who felt they could make a stronger defence against the powers of evil by standing shoulder to shoulder? The texts are often indited in the first person, e. g. Pognon 24; in No. 27 the clients of No. 7 appear as making the charm, and use the form of No. 2. But in general there is a breaking down of the distinction between personalities in magic; compare the Babylonian rituals, in which priest and suppliant appear to fuse in one another.

In one place Wohlstein calls attention to what appears to be an attestation of the incantation, inserted into the middle of the text.[8] The obscure passage is: קימא דהוא כתיב לי אנן הכא ידעינן אותו. It may be translated: "It is correct for it has been written for me (or קי = קמיעא?), we recognize it here." Cf. the attestations of the scribe in the Babylonian magical texts, e. g. the *Maḳlu* series.

[8] *ZA*, ix, 36.

§ 10. The Clients

Most of the inscriptions are of domestic character, being made out for a married couple, their children, their house, and their property, cattle, etc. Frequently it is the wife and mother who procures the charm, with or without reference to the husband. In many of the inscriptions there is special intention against the evils that disturb the domestic sexual life. And so No. 36 gives an exorcism for the bridal-chamber, No. 24 is a charm for the safe delivery of a pregnant woman. The bed-chamber is often specified (בית מישכבא). There is frequent reference to the demons that slay the unborn babes (e. g. Nos. 36, 37), the charm is often made out for the children that shall be, as well as for those that are. It would seem that where women are concerned, the greater part of magic has to do with the mysteries and maladies of the sexual life. The Lilis and Liliths which predominate in the categories of demons are personifications of sexual abnormalities.

At times the idea of the family is extended to a wider scope, so as to include a large household; No. 29 is a good example; from the long list of male names enumerated, some of them of foreigners, it appears that the woman who procured the charm was landlady of a lodging house. On the other hand sometimes a single individual feels that a whole bowl is necessary for his own maladies; so in the case of the invalid who is the client of Schwab's bowl F.

As the individuals must be exactly specified we have a rich list of names, which is enlarged by the required naming of the mother, more rarely the father of the client.[1] In the Rabbinic texts we find the Aramaic names

[1] *Shabb.* 66b: כל מנייני בשמא דאימא: "all repetitive incantations are in name of the mother." The "sacred" name of a person includes that of his mother with the Mandaeans (Brandt. *Mand. Religion,* 116). The same rule appears in the Greek magic; see Wünsch *Antike Fluchtafeln* (Lietzmann's *Kleine Texte,* no. 20), p. 9 for examples and literary references. The practice is now attributed to the original

familiar in the Talmud, etc., Persian names, probably more frequent than the former, and but few typical Jewish names. In the Syriac and Mandaic texts the names are by a large majority Persian.[2] My texts contain one evidently Greek name, אסטרובא, Astrobas, and a Christian name, בת סהדא, Martyrofilia; the former is paralleled in a text of Lidzbarski's by טימאתיוס, Timotheos, the latter by סעבריא ליעשו, 'His-hope-in-Jesus' in a text of Pognon's. Some of the names of obscure etymology may be of Indian origin; cf. the frequent name Hinduitha.

The large proportion of Persian names even in the Rabbinic texts might lead us to think that the clients were non-Jewish. The argument is somewhat fallacious as the Jews by no means stickled for their native names, in fact seem to have adopted foreign names with great avidity.[3] And so in one family of nine souls the names are Persian, and only one son bears a Jewish name (No. 12). But as we shall have reason to conclude (§ 15), the magic of our bowls is so eclectic that even a "Jewish"-Aramaic text does not imply a Jewish exorcist, nor Jewish clients. We have to think of a *clientèle* partly Jewish, partly non-Jewish, to which the religious affinities of the magic were indifferent.

But the power of the charms is also extended beyond the actual house and its inmates so as to include the whole property of the client. Not only are house and mansion detailed, but also the cattle and possessions in general (קנינא). In like manner Greek phylacteries provide a general property insurance, e. g. that the demons "shall not injure or approach N. or M. or his house or his vineyards or lands or cattle."[4]

matriarchal condition of society rather than to the elder principle, *pater incertus, mater certa.* Naming of the father probably occurs where the mother is unknown; for instances see to 10: 1.

[3] See Glossary B; also Pognon, B, p. 97.

[3] See Zunz. "Die Namen d. Juden," in his *Gesammelte Abhandlungen*, ii.

[4] Reitzenstein, *Poimandres*, 294; such charms are frequent in the Graeco-Italian exorcisms published by Pradel, in *Religionsgeschichtliche Versuche u. Vorarbeiten*, iii, no. 3. For amulets worn by cattle, see Blau, *Das altjüdische Zauberwesen*, 86.

§ 11. The Incantations.

I have discussed in § 8 the particular praxis of our magic—the inversion of the inscribed bowl. There remain for consideration many details, for elaborateness is characteristic of magic and even in our comparatively simple field there are many phenomena which are suggestive links binding it with more complicated magical science.

Magic consists of two elements: the physical operation or praxis, and the incantation, or to use the Egyptian term, "the word of power."[1] They are distinguished in the Babylonian as the *epešu "work"* (also *kikittu*[1a]), and the *šiptu,* words which appear rubrically in the magical texts. In the Greek the terms for the practice are *πρᾶγμα, πρᾶξις, χρεῖαι*; for the incantation (*ἱερὸς*) *λόγος*.[2] So in Latin *facere* is the word for the operation, and it has had an interesting history through *factura, fattura, feitigo* (Portuguese), into *fetich.*

The same distinction and similar terms are found in our magic. The root עבד, "work, serve"[3] (late Hebrew עשה (cf. 14: 1), מעשה) is used of the practice.[4] It is the common root also for the service, the worship of the gods in West-Semitic, and this fact illustrates the parity, often equivalence of religion and magic. Hence the technical terms עבדא (*'ăbâdâ*), עובדא

[1] Budge, *Egyptian Magic,* 26 f.

[1a] E. g. in the Labartu texts, Myhrman, *ZA,* xvi, 141.

[2] For the first two words see indexes in Wessely's two volumes in the *Denkschriften;* for *χρεῖα* , Dieterich *Abraxas,* pp. 136, 160. All three words occur close together in Dieterich's text p. 204 f. For *τελετή* (Dieterich, p. 136) = the אשלמתא of our texts, see § 12.

[3] Cf. Latin, *colo, cultus.* This Hebrew-Aramaic root is more religious than *epešu,* etc., with its idea of service. N. b. Arabic *umrâ,* used of the cult at Mecca, Wellhausen, *Skizzen,* iii, 165.

[4] A magical connotation of this root may exist in *Is.* 28: 2: לעבד עבדתו נכריה עבדתו , where the divine operation is contrasted to the magic arts of the necromancers.

(*'ubbâdâ*), עבודא, מעבדא (*ma'bâdâ*), occurring frequently in the bowls, and in such expressions as עבידנא עבדא (9: 2), and עבודא דעביד הוהו.[5]

The spoken *Word* is represented by מלתא, מילין, "words," etc., also technically by קריתא, once בת קל דקריא 16: 10, = the Greek *ἐπίκλησις* (also *κλῆσις*) used both in magic arts and also in the Christian liturgy (in baptism, eucharist, exorcisms),[6] though as we shall see, most of these words came to be regarded as part of black magic and were avoided by our exorcists. The incantation as written is called a כתיבתא and by the unique word *dastabîra*,[7] and also a רזא, "mystery," 3: 1.[8]

A very large number of terms is used to express different practices and *nuances* of magic, but most of them only in the lists of dreaded black magic (see § 12), and hence they are avoided by our exorcists.[9] The exorcist gives himself none of the technical names, e. g. from the roots כשף, אשף; he speaks of his עבודא, but מעבדא is avoided. His adjuration is a מומיתא, the Babylonian *mamîtu, "ban,"* and he employs the corresponding verb מומינא; a more frequent equivalent is שבע, Afel. Once he uses the root אשף: אשישפנא באישפא דימא, 2: 3. But his favorite terminology for his own practice is derived from אסר, "bind," exactly equivalent to the Greek *καταδεῖν*, Latin *defigere;* the charm is an איסרא, איסורא. Also the synonymous roots are used less frequently: צור, קטר, יסר, מסר, מצר, פכר, חבר. The last root is used of magical practices in this sense in the Old Testament,[10] where also the obscure בסחות, *Eze.* 13: 18, is probably from a Babylonian root of like import.[11] In the Babylonian the "binding" power of magic is as prominent as in the western magic; I cite such passages as

[5] For מעבדין and the Syriac use see Nöldeke, *Z. f. d. Keils.-forsch.*, iii, 296, and Fränkel, *ZA*, ix, 308. A frequent attributive is תקיף.

[6] After summing up the various terms used for exorcism Heitmüller concludes, in his *"Im Namen Jesu,"* p. 212: "Der Ausdruck *κατ' ἐξοχήν* ist *ἐπικαλεῖσθαι τὸ ὄνομα*. Our word קריתא is the liturgical equivalent in the Syriac for *epiklesis*.

[7] See 32: 4, and Kent's discussion in *JAOS*, 1911, 359.

[8] The original use of this word (= *τελετή*) appears in its designation of black arts; see § 12.

[9] Cf. the modern fine distinctions between magic, sorcery, witchcraft, etc.

[10] See Davies, *Magic Divination and Demonology*, 55, as against W. R. Smith's view in *Journ. of Philology*, xiv, 123.

[11] Friedr. Delitzsch, in Baer and Delitzsch' text, p. xiii.

the *Maḳlu*-series iv, l. 9; vii, 66, in which this idea is expressed by several synonymous verbs.

The roots בטל, Pa., "annul," גזר, "prohibit," חרם, "be in taboo," שמת "lay under ban,"[12] frequently appear. Also חתם, Peal and Pael, is frequent with the sense of sealing the demons with the magic word or device engraved on a seal—often with explicit mention of Solomon's Seal; hence the reference to the 70 seals of Solomon (Hyv.), or the seal of the house of Enoch, 19: 17, the seals of the angels of the Most High (Hyv.).[13] Our magicians will work only white magic, and their whole effort is for the אסותא,[14] *salus* of their clients.[15] The great magician Joshua b. Peraḥia is an אסיא רבא, "great healer," 17: 12 = 34: 2. In this prophylactic nature of the magic, our texts differ favorably from the western *κατάδεσμοι* and *defixiones*. The incantations largely consist in the monotonous repetitions of these equivalent roots.

As to the praxis of our magic we have little information additional to that presented in § 8.[16] From Pognon's texts we learn that the bowl was a new one (B. no. 24) and that the sorcerer sat upon an uncleft rock, a survival of primitive religion.[17]

The rude figures and designs which can hardly be said to adorn the bowls are part of the praxis. They come down from the earlier and more realistic age when gods and demons were represented by simulacra and in this wise were manipulated so as to do the sorcerer's will.[18] Most of the

[12] Stübe explains the equivalent שיפורי in his text as denominative from שופר the horn of excommunication.

[13] For sealing as equivalent to placing the magical name on the object, see Heitmüller, *op. cit*, 143, 249, etc.

[14] The charm itself is called an אסותא.—Cf. the New Testament *σώζειν. σωτηρία* is used in the papyri, e. g. Wessely, xlii, 31, l. 341.

[15] This includes their defence, מטרתא, and supernatural arming זרזתא (cf. "the panoply of God," Eph. 6: 13), and involves the breaking of counter charms and wiles of the devils: עקר, שרא, אפך, כרך, בטל, סמר, פשר, etc.; אשכב, "lay a spirit"; כבש, etc. In the Talmud פשר is the technical opposite to אסר; Blau, *op. cit.*, 157.

[16] In No. 12 is a bit of rubric for forming a figure of an angel; see the commentary. And probably at end of No. 13 occurs an aphrodisiac recipe.

[17] Cf. the unhewn altar, *Ex.* 20: 25, and for the primitive aversion to iron, see Elworthy, *The Evil Eye*, 220 ff.

[18] Budge describes how as far back as the third millennium in Egypt pictures came to be used in place of material objects in the magic of the dead (*op. cit.*, 107).

figures represent the demons, generally as bound and hobbled—i. e. רגיל, אסיר, etc., to use the words of the incantation.[19] Especially the liliths are so represented, e. g. No. 8, but also there are masculine figures like the military-looking demon, in Persian style, of No. 3. Some of the gruesome caterpillar-like designs are intended to "raise the hair" as did the demons of elder Babylonia.[20]

In one specimen, No. 15, the figure is the design of the serpent with its tail in its mouth. This is surely of Egyptian origin, doubtless through a Hellenistic medium. Such a figure is described in the "Book of Apep," of Ptolemaic compilation,[21] and prescriptions for drawing this magical figure are found in the Greek papyri.[22] Very common—so in the Syriac bowls—is a circle with a cross in it; or the circle is divided into segments with a cross in each. These signs probably represent the magical seal. There also occur rough rectangular figures divided into compartments, representing the walls of protection which magic casts about the client.[23] Wessely gives a facsimile of such a magical design:[24] a square within a square, the former being divided into three compartments; I suppose after the plan of a double-walled and many-chambered castle, indicating the protective character of the charm.

In one case, no. 8835, a cross-shaped figure may represent a dagger, and so indicate one of the magical forms of *defixio* or fastening down of the evil spirits.[25]

[19] Cf. the operation performed on the figure of the Labartu, Myhrman, *op. cit.*, 150. For Palestine, see the figurettes found in the Seleucidan debris of Tell Sandahannah, in Bliss and Macalister, *Excavations in Palestine*, 154. For Egyptian usage, e. g. Budge, *op. cit.*, 83.

[20] See the description in Myhrman, p. 148; also the seven evil Utukki, Thompson, *Devils*, tablet 16, and ii, p. 149.

[21] Budge, *op. cit.*, 79, 83.

[22] Wessely, xlii, 39 f., 69. The like design appears in a bowl depicted by Hilprecht, *Explorations*, opposite p. 447. Within the circle so formed are a number of magical figures, the most elaborate that appear in the bowls. The specimen is presumably at Constantinople.

[23] For similar sympathetic magic in old Babylonia, see Jastrow, *op. cit.*, i, 303.

[24] *Ibid.* 64.

[25] Pauly-Wissowa, *Real-Encyc.*, "Defixio," col. 2373; Thompson, *Sem. Magic*, 17. For modern instances of this kind of sorcery, see Elworthy, *The Evil Eye*, 53.

In No. 4 it is evidently the sorcerer who is depicted, waving in his hand a magic bough. This is the use we find in Babylonian magic, in which a branch of the datepalm or tamarisk was held aloft to repel the demons.[26]

One detail of universal magic appears in the praxis of our bowls: the assumption of a suitable season for the exorcism. So 6: 5: "this day out of all months, this year out of all years"; cf. the mutilated (and probably misunderstood) form of this formula in 17: 1. In Wohlstein 2422 a day is given: "If you come on the first of Nisan, go away," etc. Nisan 1 was an auspicious day for expelling demons;[27] this was probably due to the belief that the great turning points of the year, the solstices and equinoxes were times of supernatural determinations of human fate, when responsive action on the part of man was especially effective; in the Babylonian calendar Nisan 1 was the day of Destinies, the Jewish New Year's day in Tishri has the same character, and compare the magic time of midsummer night and the Christmas season in more modern superstition.[28] In old Babylonia certain days were propitious for exorcism, and they are listed, as personified, in a Šurpu text, among them the 7th, 15th, 19th, 20th, 25th, 30th, of the month.[29] We have fuller information of this notion from Egypt; papyri are preserved giving all the days in the year according to their character as propitious or unpropitious for magical rites.[30] The same use of seasons appears in the Hellenistic papyri, those continuators of Egyptian magic. Among the numerous passages I note the following: *ἐνιαυτοὺς ἐξ ἐνιαυτῶν, μῆνας ἐξ μηνῶν, ἡμέρας ἐξ ἡμερῶν, ὥρας ἐξ ὡρῶν, ὁρκίζω πάντας τοὺς*

[26] Thompson, *Devils*, p. xlix, and instances pp. 23, 111, 197. Compare the religious use of the *bareçma*, a bunch of datepalm, pomegranate or tamarisk, in the Persian religion; Spiegel, *Eranische Alterthümer*, iii, 571. Thompson in his note draws attention to our design.

[27] Wohlstein, p. 399, with references.

[28] See Carl Schmidt, *Aberglaube des Mittelalters*, 1884, 205 ff. (on *Die Tagewählerei*).

[29] Zimmern, tablet viii, 24 ff. Cf. the exorcism of a demon at full moon, in Lucian, *Philopseudes*, 16.

[30] Budge, *op. cit.*, 224 ff.; *Gods of the Egyptians*, ii, c. xix, for lists of the deities of times and seasons. The earliest appearance of this system among the Jews is the angelic calendar system in *Enoch*, 82.

δαίμονας [31] This is exactly the equivalent of the passage cited above, 6: 5: יומא הדין מיכולהון יומי וירחא הדין מיכולהון ירחי ושתא הדא מיכולהין שני ועידנא הדין מיכולהון עידני, and there can be no reasonable doubt that we have here the reminiscence of the Hellenistic formula. So again in the papyri: ἐν τῇ σήμερον ἡμέρᾳ, ἐν τῇ ἀρτι ὥρᾳ.[32] At least the later magical calendar is connected with astrology; one Greek exorcism adjures "by the God who has the power of the hour."[33] These references to an appropriate magical time are in our texts however quite conventional; we may judge that no horoscopes were cast by our sorcerers.

But the praxis is a minor part of the bowl-magic. In this it differs from the Babylonian in which the praxis was primary, the texts being illuminative of the action. The reasons for this shifting of the center of gravity I shall touch upon in § 15. In the bowls the incantation, the spell, is almost the all in all. It consisted in the utterance or writing of certain phrases, words, syllables, which possessed in themselves a magic power to bind equally the favorable powers and the demons.[34] This use of spells has gone so far that magic appears to have divorced itself from religion; the inversion of the bowl and the monotonously repeated declaration that the demons are "bound, sealed, countersealed, exorcised, hobbled, silenced," etc., e. g. Nos. 2, 4, is in itself sufficient, without invocation of, or reference to, the divine powers.

Generally however appears the formal adjuration of Deity or of deities and other favorable genii, the invocation of their name securing their assistance.[35] This may be specifically the Jewish deity, e. g. No. 14,

[31] Wessely, xxxvi, 53, l. 341 ff. My colleague Professor Heffern sagaciously notes the illumination thus cast upon the difficult reference in *Rev.* 9: 15 to the angels appointed for an hour, day, month, year; the verse is reminiscent of magical phraseology. Note also the phrase, "in a good hour and a good and auspicious day," in the Paris Magical Papyrus, l. 3000 (given by Deissmann, *Light from the Ancient East*, 251, 255).

[32] Wessely, xxxvi, 92, l. 1932 ff. = xlii, 42, l. 665 ff. N. B. the like stress laid upon "this day" in the Babylonian exorcisms, e. g. *Šurpu*-series, iv, l. 65.

[33] Wünsch, *Antike Fluchtafeln*, no. 3, l. 20.

[34] The conscious manipulation of words, phrases, pronunciations to extract their magical sense, appears in 9: 5 = 32: 6.

[35] Even as in earlier times the images of the gods were used; e. g. Fossey, *La magie assyrienne*, 315.—The magical value of the use of the name in religious rites

"in thy name YHWH"; or it may be quite indefinite as in the recurrent introductory formula, "In thy name, O Lord of healings, great Healer of love"; the same form also appears in the pagan text No. 19. I discuss under No. 3 the origin of the phrase.

There is nothing new in the adjuration of many angels[36] or deities along with the appeal to some one Name;[37] the former is the Jewish phase of polytheism, while even with polytheistic adjurations there may be recognition of "God," as in the pagan text No. 19 with its reference to "the one true God," l. 17. Noticeable is the easy passage from the invocation of celestial beings into that of mere names or words; but this illustrates the arrant nominalism into which magic had fallen, losing the religious phase of divine personality. So Abraxas is invoked—though probably here we have a very ancient divine name, inherited from Egypt.[38] Of this "the holy Agrabis" may be a perversion, 14: 2. In 7: 9, as noted in § 9, "the Great Abbahu" may be a magically deified sorcerer.[39] Many of the odd names which are invoked may be kabbalistic (gematriac, etc.) names of angels or gods (see § 13). They may soon have worn down into unintelligible words—just as Αβραξας = 365 becomes אברכים (and other forms) without reminiscence of the numerical value of the letters.[40] We have the

has been established in late years by a series of discussions from scholars working in various fields. I name: K. Nyrop, *Navnets magt* ("the power of the name"), 1887, noted and analyzed by Giesebrecht (see below); F. v. Andrian in *Correspondenzblatt d. deutsch. Gesellschaft f. Anthropologie, Ethnologie u. Urgeschichte,* xxvii (1896), 109-127; F. Giesebrecht, *Die alttestamentliche Schätzung des Gottesnamens u. ihre religionsgeschichtliche Grundlage,* Königsberg, 1901; W. Heitmüller, *'In Namen Jesu,'* Göttingen, 1903 (especially Part II). Cf. also, on the use of the name, Jacob, *"Im Namen Gottes," Vierteljahrsschrift f. Bibelkunde,* i (1903), Heft 1 seq. (which I have not seen in full); J. Boehmer, *Das biblische 'Im Namen,'* Giessen, 1898. (on the philological origins of the baptism formula); and an essay by W. Brandt, "Ὄνομα en de doopsformule in het nieuwe testament," *Theol. Tijdschrift,* 1891.

[36] For the adjuration of angels in Judaism, see Heitmüller, *op. cit.,* 176 ff.

[37] See § 13.

[38] According to Budge, *Egyptian Magic,* 180, originally the name of a form of the sungod; according to Wiedemann, *Magie u. Zauberei* (*D. Alte Orient,* vii, 4), p. 23, the Egyptians from of old worshipped as god "the Magical Formula."

[39] Cf. the early and frequent use of the name Jesus in the papyri magic; and cf. *Acts* 19: 13. For Jesus as a sorcerer in the Talmud, see Blau. *op. cit.* 29.

[40] See Pognon, *Inscr. mand.,* 107. In 34: 19 he is "mighty lord."

same unintelligent invocation of names in the magical papyri, e. g. the exorcism "in the name of Abraham, Isaac, Jacob, Jesus Chrestos, Holy Spirit."[41] This is not Jewish magic, any more than we can say that the erotic charm from Hadrumetum is Jewish in its present form with its barbarous spellings for the patriarchs: Αβρααν, Ιακου, Ισρααμ.[42] These are specimens of eclectic magic with pagan and Jewish elements, overlaid with Christian.[43] It is in this eclectic character of our texts, as in all so-called Jewish magic, that they part company from the old Babylonian magic and relate themselves to occidental conjuration.

The invocation of angelic names in Jewish magic may be regarded as in part the parallel to the pagan invocation of many deities, and in part as invocation of the infinite (personified) phases and energies of the one God.[44] Both Jewish and pagan magic agreed in requiring the accumulation of as many names of the deity or demon as possible, for fear lest no one name exhaust the potentiality of the spiritual being conjured. The aggregation of divine epithets in the Old Testament, as also in the Christian liturgy, goes back to the root-idea of the efficiency of a knowledge of all the names if possible; the fifty names of Marduk, the hundred names of Allah, are similar cases. In the Babylonian magic[45] and also in the Egyptian[46] this practice was established. For Hellenic magic may be cited the many names of Hekate, the λόγοι ἑκατίκιοι.[47] In this accumulation

[41] Wessely, xxxvi, 75, l. 1227. Cf. the list of invocations in a "Christian" amulet: Adonai, Thodonael (= Toth + Adonael), Sabaoth, Emanuel, the holy angels, etc. (Reitzenstein, *Poimandres*, 293).

[42] For the text and literature see to No. 28.

[43] I suppose the formula read originally: "in the name of the God of Abraham," etc. See Heitmüller, *op. cit.*, p. 180 for the invocation of the patriarchs, etc. Origen (*c. Cels*, iv, 35) appears to admit its efficacy.

[44] Cf. the Gaonic maxim that there are many things in which the angels are independent of God, Blau, *op. cit.*, 92; with which contrast the notion of the ephemeral existence of the angels who proceed from the *Dinûr* of God; Weber, *Jüd. Theologie*, 166, Eisenmenger, *Entdecktes Judenthum*, ii, 371—all but Michael and Gabriel according to a dictum of *Bereshith R.* (Lueken, *Michael*, 39). For the equivalent efficiency of divine and angelic names see the magical text, *The Sword of Moses*, published by Gaster, 1896.

[45] Jastrow, *Religion Babyloniens u. Assyriens*, i, 291.

[46] Budge, *op. cit.*, 171.

[47] Wünsch. *Ant. Fluchtafeln*, 6.

of divine names there lurks the uncertainty whether they are names of one being, or, as so many potencies, names of as many beings. This confusion appears in the parallel texts under No. 11, where the second (Myhrman's text) turns the three names of the Jewish God in the first into a polytheistic trinity. But except in the case of accumulated magical syllables, the "barbarous names" of Greek magic, the Deity is not in our texts given many names; this is due to the fact that the reference to the Deity is not much more than a passing compliment. However the names of the demons must be exactly known, and especially is it the Lilith who receives an extravagant accumulation of designations; she is akin to Hekate and the "Hekatian names" are showered upon her. For the demoniac names I refer to § 12.

The use of so-called kabbalistic names—letters,[48] syllables, phrases—as potent charms, may next claim our attention. The roots of this usage are many, and the origin or etymology of specific cases mostly defy explanation. The practice is rare in Babylonian magic,[49] but is common in the sorcery of ancient Egypt[50] and in its lineal descendant the Hellenistic magic,[51] and hence it was reflected to the Jewish sorcery, the Talmud abundantly illustrating the use of these *barbarica onomata*.[52] One primitive source of this usage is the mystery which is thrown about magic rites; "the wizards that squeak and gibber" (Is. 8: 19) are universal; the Babylonian priest generally whispered his formulas (cf. the title *mašmašu*); the solemn parts of Christian rites have likewise tended to inaudible pronounciation. There exists a tendency toward intentional obscuration of the formulae, which by psychological necessity would tend to even greater corruption. But magic is in its purpose a scientific exercise, and we must suppose that in general something intelligible was once expressed by the now unintelligi-

[48] For the mysticism connected with letters see Dieterich's interesting discussion, *Rhein. Mus.*, lvi, 77, "ABC—Denkmäler."

[49] A case in Myhrman, *ZA*, xvi, 188 (cf. Jastrow, i, 339), for the text of which see 15: 4.

[50] Budge, *op. cit.*, c. 5, e. g. p. 172.

[51] See Heitmüller, *op. cit.* 197 ff.; Abt, *Apuleius*, 152. For the *Ephesia grammata*, see Kuhnert, in Pauly-Wissowa, *s. v.* (the papers of Welcker in his *Kleine Schriften*, iii, and of Wessely in *Program* of the Franz Joseph Gymn., Vienna, 1886, I have not seen).

[52] Blau, *op. cit.*, 61 f.; Grünbaum, *ZDMG*, xxxi, 269 f.

ble term. Much of the later nonsense was the survival of phrases of the lost tongue in which the charms had their rise.[53] Such a part may have been played by Sumerian phrases in later Babylonia, and the great western sorcerer Apuleius recognizes the origins of his magical lingo as *magica nomina Aegyptio vel Babyloniaco ritu,*[54] and the Hellenistic sorcerer is said to *αἰγυπτιάζειν.*

Some of the phrases are still intelligible, such as חוש, "quick" (off with you), with abundant parallels in the Babylonian and the Greek magic (the repeated *ταχύ*),[55] also brief imperatives, as זע, זח, or זה, from זעע, etc., "fly away." But the great majority of the forms are unintelligible. It is to be observed that raucous sounds, e. g. קץ (*ḳaṣ*) and especially sibilants are very frequent; in Pognon's texts ש (*sh*) is often inserted between words.[56] May we compare the hissing implied by the ancient Hebrew sorcery terms, לחש and נחש?

Many such syllables or letters are surrogates for the divine name יהוה, which especially lent itself to this treatment.[57] So we find the changes rung on this word: יה, יוה, יהו, אהעה, etc. Or abbreviations are used like the repeated א, = אדני אל אלהים;[58] in 20: 2 it is extravagantly repeated six times, in 31: 8 eight times. In יאהיהו, 31: 6, we have a play on the three vowels as in Greek magic.

Then there enters in the use of the principle of *Athbash,* in all its various forms, e. g. מצפץ (Stübe, l. 66) = יהוה. Such *prima facie* unintelligible forms themselves became corrupted in course of time; perhaps MṢ MṢ, PṢ PṢ, 14: 2, are from the former theme. Probably too the

[53] See Deissmann's remarks on the distinction between hocus-pocus and survivals of Egyptian and Babylonian magic in the vocabulary of the papyri; *Bibelstudien,* 1 ff.

[54] Abt, *Apuleius,* 152.

[55] See to 14: 4.

[56] In our texts cf. 1: 13, 3: 5, 14: 2, 25: 5, 29: 10.

[57] For extensive magical formulas based on the Name, see Nos. 3, 6, 31, 35. I give a list of these terms at the end of Glossary A.

[58] Cf. the introduction to Schwab's *Dictionnaire d'angélologie;* Blau, *op. cit.,* 117-146. Against Jewish orthodox use, our texts do not hesitate to write יהוה; cf. the Samaritan usage. In one case it is vocalized in a proper name, בריכיהביה, 36: 4, *q. v.* The reminiscence of the ancient pronunciation survived in the lower classes and certain sects, e. g. among the Samaritans, and in magic, cf. the forms Ια*βε*, etc.

principle of (mathematical) gematria may be supposed,[59] of old standing in Judaism,[60] but also found in the theosophy and current use of the Greeks.[61] The passage in 9: 5 f. which speaks of "letter out of letters, name out of names, interpretation out of interpretation," doubtless refers to the abstraction of such hidden meanings and values out of words.

In one case, 15: 4 f., occurs a rhyming "nonsense" couplet used with magical intention. For this as noticed to the passage there is one example in the Assyrian magic. Assonance of succeeding words is found, e. g. 35: 5.[62] Both assonance and rhyme are found in the western magic; e. g. *adam alam betur alam botum;*[63] and

ορθω βαυβω νοηρε κοδηρε
δυσηρε συρε συροε πανκιστη δωδεκακιστη.[64]

Rhyme appears in the lines:

τοῦτο γράφε : εἰς[65] Θυριήλ,
Μιχαήλ Γαβριήλ, Οὐριήλ,
Μισαήλ, Ἰρραήλ, Ἰστραήλ.[66]

I do not find much proof of intentional misspelling; most of the apparent cases are cleared up on inspection of the text. In fact a good deal of care is exercised in this regard (n. b. a case in 4: 4), and erroneous letters or words are often erased or repeated correctly; in form most of the texts compare favorably with the magical papyri.

[59] Schwab, I; a case in No. 42.

[60] Found by ancient tradition in Eliezer = 318; cf. *Gen.* 15: 2 and 14: 14.

[61] Deissmann, *Light from the Ancient East*, 275; Wünsch, *op. cit.*, 23.

[62] The Talmudic *shabriri briri riri ri* is different in character; the gradual peeling off of the word finally destroys the demon.

[63] See Wessely, xlii, 13, from Marcellus, xxviii, 72.

[64] Wessely, xlii, 45, l. 747, = l. 964.

[65] This identification of the angels recalls the assimilation of the gods in the famous Babylonian passage; "Ninib the Marduk of strength, Nergal the Marduk of battles," and similar astrological identifications; see A. Jeremias, *Monotheistische Strömungen*, 26.

[66] Wessely, xxxvi, 90, l. 1814 ff. For assonance and rhyme in Greek magic, see Heim, in Fleckeisen's *Jahrbücher f. classische Philologie*, Supplementband xix (1903), 544 ff.; M. C. Sutphen, "Magic in Theokritos and Vergil," in the *Studies in Honor of B. L. Gildersleeve* (Baltimore, 1902), 318; Abt, *Apologie d. Apuleius*, 154. For similar cases in our texts see 19: 18, 25: 5, 35: 5.

An important part of the Word of Power in developed magic is the use of sacred scriptures, the epics, legends of the people, and the citation of appropriate precedents. Babylonian, Egyptian, Jew, Greek, each had his thesaurus of sacred legend, which age had consecrated as veritable words of Deity and hence in themselves potent.[67] These are "the ancient runes," שירא קדמיא, of 32: 9.[68]

Early house amulets have been found in Assyria inscribed with quotations from the legend of Ura the pest-god;[69] and there are other traces of the use of epic myth in the Babylonian magic.[70] In the same way that portion of the Book of the Dead known as "The Chapters of the Coming Forth of the Day," largely consisting of myth, and the Legend of Ra and Isis, were used in Egypt as magical texts.[71] In the Greek magic we have the prophylactic and divinatory use of the Homeric verses.[72] Nor were the Jews behind their neighbors, with their fast fixed canon of sacred scripture. The book of Deuteronomy ordered or at least suggested the use of the weightiest "word" in the scriptures, the Shemá, as a phylactery to be inscribed on the hands and between the eyes (in place of totemistic tattoo-marks)[73] and on the sideposts and gates of the house (where earlier prophylactic amulets like the Babylonian had hung). Or certain passages appeared palpably appropriate, just as the Ura-legend was used as a prophylactic; so *Ps.* 91, especially v. 5 f.; or the divine *scolding* of the evil spirit, "YHWH rebuke thee, Satan," in *Zech.* 3: 2. A few of the bowls published by Schwab, G (exterior),[74] H, K, O, are mostly or largely

[67] Cf. *Is.* 55: 11.

[73] Cf. *Eze.* 9: 4, *Is.* 44: 5, *Gal.* 6: 17, *Rev.* 13: 16 f., etc. The practice was continued into Talmudic times, *Sabb.* 120b, etc.; see Blau, *op. cit.*, 119.

[74] *PSBA*, xii, 327.

composed of scripture verses.[75] We find in them the Aaronic blessing, *Num.* 6: 24 ff., *Is.* 44: 25, *Cant.* 3: 7; K contains the whole of *Ps.* 121, *Ex.* 22: 18, *Cant.* 3: 7 f., *Ps.* 16: 1, 17: 8, 32: 7. O is an amalgam of *Dt.* 6: 4 and *Ps.* 91, with the first word of the former followed by the first of the latter, etc. G reads *Dt.* 29: 22 and then reverses the order of the words.[76] But these genuinely Jewish effusions are exceptional, and may be comparatively late. The Nippur bowls are marked by their lack of scriptural quotation and reference. Very frequent is "The Lord rebuke thee, Satan,"[77] at the end of the inscription. No. 26 opens with the first words of the Shemá, followed by *Num.* 9: 23 and *Zech.* 3: 2. *Num.* 9: 23 is of value as containing the root שמר, a frequent and potent theme in Jewish magic. Biblical and of good magical tradition is the use of Amen (generally twice or thrice repeated), Selah,[78] Halleluia. These are also used in Talmudic charms, e. g. *Yoma* 84a: "kanti, kanti, kaloros, Yah, Yah, YHWH, Sabaoth, Amen, Amen, Selah." The magical Halleluia recalls the probable use of Hallel-like forms in incantations.[79] These Jewish terms are not found in the Mandaic texts, in which the sectarian doxology, "Life is victorious" replaces them. In the Greek papyri *αμην* and *αλλελουια* are frequent,[80] and we have a case of syncretism such as this: *φοβηθέντα τὸ ἀμὴν καὶ τὸ ἀλλελουία καὶ τὸ εὐαγγέλιον.*[81]

But this use of scripture is not such as we should expect to find from any Jew even moderately versed in the Old Testament. The spelling is

[75] For biblical verses of prophylactic power approved by the Talmud, see Blau, *op. cit.*, 70 f., 93 f., and his article "Amulets," in *Jewish Encyc.;* also Kayser, "Gebrauch von Psalmen zu Zauberei," *ZDMG,* xlii, 456, presenting a Syriac MS. containing the Psalm verses useful in magic and divination. For the use of Psalms (especially *Ps.* 91) in the late Italian magic, see Pradel, *Griechische u. süditalienische Gebete,* 69.

[76] On this practice in Jewish magic, called מפרץ, see Blau, *op. cit.,* 85; the practice reversed the hostile charm. With the attempt at disguising the plain meaning, cf. the intentional confusion of lines in a Greek *defixio,* published in Wünsch, *Antike Fluchtafeln,* no. 4.

[77] A formula recommended in the Talmud, *Berak.* 5a.

[78] This magical use of Selah is not, I think, noticed in the several modern studies of the word. It appears also as *Σαλα* on an Abraxas gem, *Dict. d'archéologie chrétienne,* i, 144.

[79] Cf. Blau, *op. cit.,* 94 f.

[80] E. g., both together, Wessely, xlii, 28, l. 279.

[81] *Ib.* 66, l. 31.

not Massoretic, the quotations are not exact.[82] There are but two references to the supreme history of the Exodus, 14: 2, 34: 4, and the latter is confused. In the Greek papyri there is far more citation of the sacred history; cf. the "Jewish" text of the Great Magical Papyrus at Paris, published most recently by Deissmann.[83] This contains a brief summary of God's great acts for Israel, although the crossing of the Jordan precedes the passage of the Red Sea.[84] The "Judaism" of our bowls is often less than that of the papyri.[85]

There are several references to ancient myth and apocrypha, especially in the citation of great spells. So 2: 4, "the spell of the sea and the spell of the monster Leviathan"; l. 6, "the curse, etc., which fell on Mt. Hermon, Leviathan, Sodom, Gomorra"; 4: 4, "the seal with which were charmed the Seven Stars and the Seven Signs"; 10: 3, 5, "the seal with which the First Adam sealed his son Seth," or "with which Noah sealed the ark";[86] also see 34: 4 f.

All sacred and legendary history is a series of spells, just as the Babylonian epic literature is magically used, Ea or Marduk appearing as the high priest of exorcism. So also in Egypt the epic of the gods gives assurance of present magical help. "My two hands lie upon this child, the two hands of Isis lie upon him, even as Isis laid her two hands upon her son Horus." "O Isis, save me .... even as thou didst save thy son Horus."[87] And so in the Greek papyri the adjuration is often by the wonderful works of the God of Israel, which are regarded as spells; see the great Magical Papyrus.

[82] I cannot agree with Blau, p. 110, that this paraphrasing and variation in scriptural quotation was intentional; magic which perpetuated the pronunciation of the Great Name would not have hesitated at using the exact words of scripture. The quotations have often come through eclectic mediums.

[83] *Light from the Ancient East*, 250 ff.

[84] Cf. the Talmudic charm against the toothache, *Sabb.* 67a, in which portions of the pericope of the Bush were recited; Blau, *op. cit.*, 69.

[85] "Man kann den Aberglauben der Kaiserzeit nicht in die verschiedenen Kategorieen *heidnisch jüdisch und christlich* einteilen.....Der Aberglaube ist seiner Natur nach synkretistisch"; Deissmann, *Bibelstudien*, 25.

[86] Cf. "the seal which Solomon laid on the tongue of Jeremia," in the great Magical Papyrus, l. 3039, Deissmann, *Light*, p. 257; which has its parallel in the charm with which Enoch's brothers charmed him, 3: 4.

[87] Wiedemann, *Magie u. Zauberei bei den alten Aegyptern*, 1905, 22, 26.

In this connection may be noted a few passages which appear to be derived from apocryphal or kabbalistic literature, fragments snatched to decorate the lean skeleton of incantation. E. g. 8: 13: "holy angels, hosts of light in the spheres, the chariots of El-Panim before Him standing, the beasts worshipping in the fire of His throne and in the water, the cohorts of I-am-that-I-am"; 14: 3: "I adjure you by Him who lodged His Shekina in the temple of light and hail"; or the poetic description of the angels in 12: 7: "They are filled with glory who endure and keep pure since the days of eternity, and their feet are not seen in the dances by the world, and they sit and stand in their place, blowing like the blast, lightening like the lightning."—beneficent Annunaki! These passages, reminiscent both of the Apocalypse and the later kabbalistic literature, are recited with magical intent.[88] An important part of magic was the epic of the god and the praise of his glory; compare the insertion of the Hermetic Κοσμοποιία in the Leyden magical papyrus,[89] and the epic of the attack of the rebel spirits against the gods in the 16th tablet of the *Utukku* series. The story of the god's power or the praise of his glory were "words of power" against the fiends.[90]

There is a dreary monotony in these texts, yet much variation of details. After possibly an invocation, comes the name of the client and family, and then the categories of detested demons and ills. Then follow the various Names in which the spells are invoked. Noticeable is the frequent repetition of the same form, even three or more times (e. g. No. 3). This insipid use has its parallel in the κατάδεσμοι; cf. the examples in Wünsch. *op. cit.*, nos. 3, 4, 5, where with slight changes the exorcism is repeated at least three times. Multiplication increased the efficiency of the charm; it is the βαττολογία of the Gentiles (*Mt.* 6: 7). But the relig-

[88] Cf. the amulet in Reitzenstein, *Poimandres*, 294, where the ranks of the celestial hierarchy are enumerated as standing by the great and lofty Deity.

[89] Dieterich, *Abraxas*, 182. Herodotus notices the use of a theogony or divine history in the incantation of a magus (i, 132); see in general Conybeare, *JQR* ix, 93 f.

[90] Cf. Fossey, *op. cit.*, 96; and for the western magic, Wünsch, *op. cit.*, 13. Scriptural and legendary narratives are found in the Syriac charms published by Gollancz, *Actes du 11ème Congrès International des Orientalistes*, 1887, sect. iv, 77. Cf. also the similar Syriac charms published by W. H. Hazard in *JAOS*, xv (1893), 284 ff.

ious imaginativeness and poetic invention of the ancient Babylonian and Egyptian magic has disappeared. The spell, the ἱερὸς λόγος has suffered its *reductio ad absurdum,* personality human and divine is thrown out of doors.

§ 12. The Objects of Exorcism; the Demons, Etc.

The magic of the bowls is of too late an age to require here a dissertation on the rise and spread of the belief in evil spirits. Our sorcery is *fin de siècle*. When the old-world religions began to decay, and the gods that once were near to men disappeared in the political convulsions which marked the passing of ancient tribe or city and the domination of a world-empire, or suffered under the strokes of philosophy and skepticism, the spirits of ill were not banished, and the superstition that feeds on the fears of men, came to occupy the center of the stage of the spiritual drama. Nor did the rise of the great spiritual religions counteract the tremendous development of the superstition concerning the powers of evil, for they did not deny them, but recognized their existence, often regarded themselves in the negative light of prophylactics and antidotes against the great outstanding fact of evil agencies. The Persian faith was boldly dualistic and magical in its rites for overcoming the powers of ill. Jewish monotheism was too tense, and the cardinal doctrine of the one God was saved by that unfortunate, though possibly necessary, salvage from antique polytheism, in the shape of angels and devils who were nearer and more real to man than distant Deity.[1] The Christian Church followed the tuition of her mother and her pagan converts brought along with them the superstitions of the Graeco-Roman world; the doctrine of the Incarnation seemed to entail the foil of embodied demons, and diabolology entered into the formal Christian theology to an extent unknown in official Judaism.[2]

[1] Cf. Bousset, *Die Religion des Judentums im neutestamentlichen Zeitalter*, 313 ff., 326 ff.

[2] For the diabolology of the Hellenistic world, see the works of Heitmüller, Reitzenstein, Abt, Tambornino, cited in the previous section; also in general P. Wendland, *Die hellenistischrömische Kultur in ihren Beziehungen zu Judentum u. Christentum*, 1907; for Jewish and Christian demonology, see n. 35 for literature.

Our magic is a degenerate survival of the religious and magical developments of ancient Egypt and Babylonia, of the Hellenistic world, of Judaism, and in the study of its demonology, we are dealing with a mass of time-worn and banal demons, which do not promise much for fresh investigation. Nevertheless the analysis of the different kinds of demons may produce here and there a note of interest.

I have noticed above the magical efficacy ascribed to naming the names of deities and demons (§ 11).[3] Personal names for demons, it is true, are not very common; they are generally epithets or generic terms, e. g. "the Killer, the Demon, the Satan," etc. One class of demons however seems always to have enjoyed the privilege of a long list of names which it was the sorcerer's duty to know and to conjure. This is the female demon represented in the old Babylonian texts by the Labartu, in the Jewish by the Lilith, in the Greek by the Gello or Baskania. Our text No. 42 is an exorcism of the evil Lilith and its virtue consists in the knowledge it gives of her many names; I refer to that text for comparative details. Likewise the Labartu has her six (seven?) names, which are to be carefully pronounced.[4] We may also compare the accumulation of epithets attached to demons in 2: 2 f., 8: 2, 24: 13, etc., and recall a like process in the names of Satan in Rev. 9: 11, 12: 9, while Egyptian magic similarly amassed the names of the demon Apep.[5] Also for further identification of the demons the names of their parents, or even granddams are given,[6] for every specification enhances the power of the name. Also the personal description is efficacious, for this indicates that the sorcerer knows exactly whom he is exorcising. Such magical descriptions sometimes rise to almost epic tones, as in the delineation of the Seven Spirits in the Babylonian *Utukki*-series.[7] A reminiscence of these hair-raising pictures appears in the Mandaic bowls published by Pognon and Lidzbarski, in which

[3] Cf. also Origen, *C. Celsum*, i, 24 f., v, 45 f., and the summary of his argument given by Conybeare, *JQR*, ix, 65 f.

[4] See the opening of the Labartu texts as published by Myhrman, *ZA*, xvi, 154; cf. a similar text on an amulet published by Weissbach, *Bab. Miscellen*, 44.

[5] Budge, *Egyptian Magic*, 171.

[6] See below under (1)b.

[7] Thompson, *Devils and Evil Spirits of Babylonia*, i, 51.

the hurtling, scolding, fighting of the Lilith-witches is depicted in uncanny terms. But in general our texts do not extend much beyond the mere registration of categories; this decadent sorcery made up for the lack of poetical imagination by a mathematical tabulation. Superstition in order to be comprehensive encyclopaedically accumulated all the terms of evil; not only the inherited demoniac categories, but all which new races and faiths had to offer were gladly accepted. Hence in our texts the naming of the devils and ills results in the registration of an indefinite number of species.

An analysis of our general category may start from a threefold division, namely: (1) evil spirits, in the strict sense of the term, as personal beings; (2) evil agencies, especially the species of black magic, which have been potentized into almost personal existence; (3) natural evils, especially physical maladies, but also such mental and moral affections as loss, shame, etc.—which are regarded as instigated by demons, or as themselves evils with personality, although often the demoniac element is vague.

This is the order we find generally in our present texts. And it is antique. It appears in the Babylonian, e. g. in a text where the several evil spirits are named (Utukki, etc.), then "the enchantments, sorceries, witchcrafts," then "sickness."[8] All the three categories do not so often appear in the Babylonian magic, more frequently those under (2) and (3) are paired, but here again we find the same order—the bans (*mamîtu*) and then the various human ills.[9] This order appears also on the whole in the Byzantine charms published by Vassiliev:[10] *τὰ ἀκάθαρτα πνεύματα, ἢ βασκανία ἢ φαρμακεία ἢ φοβερισμὸς ἢ φρίκη ἢ πυρετὸς ἢ ἐπίβουλον ἢ συνάντημα πονηρὸν ἢ νοσηρὸν ἢ κωφὸν ἢ τυφλὸν,*— and so on with a list of diseases. Compare a papyrus list, in which are all celestial and terrestial spirits, sins, dreams, bans, witchcraft.[11]

This is the natural order of the evolution of magic: first the animistic fear of demons, then the opposition to mortals who have bound the evil spirits to their malicious purpose, finally the more exact diagnosis of the maladies which are specified in secular terms. At the end of the develop-

[8] Fossey, *La magie assyrienne*, 161.

[9] E. g. *Šurpu*-series, v, l. 55 ff., Zimmern, *Beiträge z. Kenntniss d. babylon. Religion*, 23.

[10] *Anecdota graeco-byzantina*, i, 332.

[11] Wessely, Vienna phil.-hist. *Denkschriften*, xxxvi, 81, l. 1443.

ment this last category may alone remain, as in the Babylonian medical texts or the modern Jewish and Arabic charms. It may here be remarked that the never-ending enlargement of categories of evil spirits, apart from eclectic causes, may be due to Persian influence, although hardly any of the details can be traced to that source.

(1)

(a) The most honorable place in the first division is to be assigned to the ancient gods and the spirits still haunting their temples, which the development of religion and especially the monotheistic trend had depotentized and turned into demons. The religion of yesterday becomes the superstition of to-day. Polytheism died hard. Even with the triumph of the One God in the Old Testament, there survived the belief in the many deities who appear as lieutenants of Yahwe, the בני האלהים (Job, 1), as capable of disobedience and subject to divine wrath (*Gen.* 6: 1 ff., *Ps.* 82), as the planetary spirits (*Dt.* 32: 8 [Greek], *Is.* 24: 21 ff.), as angels,—a more thoroughgoing assimilation with monotheism, though the angels at first have an independence and sovereignty recalling the Sons of God (e. g. *Dan.* 10: 13, 21, and Satan), or finally as evil spirits. The supreme declaration of Second Isaiah that the gods are naught and nothing, unfortunately was not sustained, and even onetime beneficent gods, when banished, returned as demons to vex the faithful. A classic expression of this demonology is found in Paul: "the things which the Gentiles sacrifice, they sacrifice to demons (*δαιμονίοις*,) and not to God" (I *Cor.* 10: 20).[12] The fullest development of this theory is found in Mandaism, where the ancient spirits of the planets have become the chief devils. So also Mohammed reduced the pagan gods to Jinns.

These discarded deities may therefore head the list of evil potencies, and so we find in 38: 8: "Charmed be all gods (אלהיא)[13] and temple-spirits and shrine-spirits and idol-spirits and goddesses (עסתראתא)." The old proper name of the goddess Ištar had already in the Assyrian become a common

[12] So אלילים had become *δαιμόνια* in the Septuagint, and cf. *Baruch* 4: 7: *προσκυνεῖν τὰ δαιμόνια καὶ τὰ εἰδωλα* (also *Rev.* 9: 20).

[13] Cf. the Babylonian *ilâni limnûti.*

name of goddesses in general (*ištarâti*).[14] In the heathen text No. 19 we learn of the sixty gods and the eighty goddesses (l. 8); the former figure is a survival of the ancient sacred number for the fulness of deity, hence the number of Anu;[15] the "eighty" is merely cumulative.[16] Once the rare feminine אלהתא (in the Syriac, Pesh., etc.) is found, used of a female spirit (Wohlstein, 2417: 5).[17]

Probably it is under Mandaic influence that we find the planets regarded as baneful spirits; n. b. the old myth of their fall cited in 4: 6 and the charms against sun, moon, stars, planets, 34: 6. For other demons of Mandaic origin[18] see Pognon's list, *Inscriptions Mandaites*, 93; to these may be added from Ellis 1: 3 נירינ, the Mandaic form of Nergal = the unlucky planet Mars, and אבטור,[19] who here is transformed into an evil genius.[20]

Under this head there is one interesting species, that of demons which are the spirits of the pagan shrines and simulacra, and so are regarded as haunting them.[21] Again the forceful protest of Second Isaiah, of *Ps.* 115,

[14] So *ilâni u. ištarâti*, *KAT*[2], 180. Cf. Heb. עשתרת צאן, *Dt.* 7: 13, etc., of ewes. Also n. b. *Ju.* 2: 13, with Moore's comment.

[15] For the survival of this mystical number in Judaism, see Grünbaum, *Zeits. f. Keilschr.-forsch.*, ii, 222. A list of 50 gods is given in one Babylonian hymn, see Reisner, *Sumerisch-babylonische Hymnen*, no. iv, l. 152 ff.; cf. the *Šurpu*-series (Zimmern, *Beiträge*), no. iv, l. 68 ff., viii, 1 ff. Sometimes the number alone (6, 10, 15, 60) sufficed by way of abbreviation; Jastrow, *Rel. Bab. u. Ass.*, i, 289. In No. 38 are mentioned the 360 broods of evil spirits; cf. the 366 Uthras in the Mandaic religion and the 360 gods which Islamic tradition claimed were housed at Mecca. According to *Pesaḥ.* 111b, seq., a service tree near a city has not less than 60 demons in it.

[16] According to old Semitic use, cf. *Mic.* 5: 4, *Prov.* 30: 15 ff. N. B. "the 7 sealers and the 8 brothers" in the Mandaic amulet published by Lidzbarski in the *Florilegium* to de Vogüé (l. 7 f.). Cf. 19: 4.

[17] I find אלהת in Sayce-Cowley's Elephantine papyri, and two Nabataean inscriptions, see Lidzbarski's glossary; also notice the Arabian goddess al-Lât, = the Babylonian Allât, goddess of the nether-world. For occurrence of אלת in Phoenician, see Baethgen, *Beiträge*, 58 f.

[18] See Brandt, *Mandäische Religion*, 43, n. 2.

[19] Brandt, *ib.*, 51, 199; *Mand. Schriften*, 184.

[20] For a list of these planetary spirits in the Mandaic cf. Lidzbarski's amulet just cited, l. 247 ff.

[21] Cf. Origen, *C. Celsum*, vii, 35 and 64: the localities especially haunted by the demons are temples and shrines where they can enjoy the incense, blood, etc. Also

the satire of Bel and the Dragon, had failed; there was a virtue in the cults and sanctuaries of the old religions. So the *êkûrê* appear in our bowls, as in the Mandaic books,[22] as established deities. The word *ekurru*, once the name for a temple had already in the Assyrian become applied to deities, *ekurrâti*.[23] The temples themselves were personified and practically deified;[24] later superstition retained the idea by regarding the *êkûrê* as the gods of the temples, and so as gods in general; e. g. Lidz., iv: בשום שיתין עבוריא זיכריא, where as the number 60 shows, עבוריא = אלהיא (cf. 19: 8).[25] Of like character are the פתכרי, or פתיכרי, = פאתיכרי (once, in Schwab Q: 5 פתקרי),[26] properly "images, idols," but used at large of gods in general; e. g. we read of "invocations of the gods, פ', and the goddesses."[27] There are פ' of the upper, lower and middle regions.[28] In some of the lists they appear rather far down; e. g. 5: 2, שידי ודיוי ואסרי ופ' ונידרא; cf. the Mandaic passage, quoted from the Ginza, in Pognon B, p. 75, where they occur after the demons, devils, spirits, amulets, liliths, being thus much reduced in grade. Levy translates the word by *Gespenster*;[29] in the eclectic magic of the time the word may have come to be identified with *εἴδωλον*, = both phantasm or ghost, and idol.[30] There is the distinction

in the Talmud the reality of oracles at those shrines is admitted, although explained apologetically; see the argument in *Aboda Z.* 55a, cited by Joel, *Der Aberglaube*, i, p. 86. Cf. I *Cor.* 10: 28.

[22] Brandt, *Mand. Schriften*, 81.

[23] Delitzsch, *Ass. Hwb.*, 21.

[24] Reisner, *Sum.-bab. Hymnen*, iv, l. 165; Jastrow, *op. cit.*, i, 282. *Beth-el* appears in the same use in West Semitic: the god Bait-ilê, *KAT*[2], 437 f., the name Bethel-shar-ezer, *Zech.* 7: 21 and now the many similar names in the new Elephantine papyri published by Sachau.

[25] The word also survived in its original sense, e. g. Pognon, B, no. 13.

[26] For the form, see Nöldeke, *Mand. Gram.*, § 25.

[27] 2: 7, Lidz. 4, Wohls. 2422: 5.

[28] Pogn. B, no. 25, er.d.

[29] *ZDMG*, ix, 467, n. 5.

[30] The Persian word was early introduced into the occident. According to one MS. and Symmachus's testimony (margin of Cod. Marchalianus) *παταχρα* (+ *ειδωλα* as gloss) translates the אלהיו of *Is.* 8: 21, where the unintelligible *πατρια* is generally found. See Nestle in *Transactions of the IXth International Congress of Orientalists*, (1892), ii, 58.

between male and female פ׳ : פתכרי ופתכרתא and פתכרתרין נוקבתא (Schwab I).[30a]

I am inclined to associate with these *patkâras* the פריכיא of 38: 8 and 40: 19, where they are listed between the עבוריא and פתיכריא or the עבוריא and עיסתראתא. The word would then mean "shrine-spirits" (Syriac *p^erakkâ*, Ass. *parakku*). The change of the first vowel (*a* to *i*) is possible.[31] But another etymology may be proposed—from the Persian *pairīkâ* = Pahlavi *parîk* (the modern Persian Perî).[32] These creatures are described as beautiful seductive witches, are connected with comets, and also according to de Harlez are companions of certain genii invoked by magicians. Philologically, this would be the most fitting etymology for our word; but its precedence in the lists indicates a higher rank than that assigned to the little known (so Spiegel) and insignificant Pairîkas.

For the false gods also appears טעתא ,טעותא (sing. טעו), = "error," —used like אליל, etc. in the Old Testament.

(b) I pass now to those groups of demons which immemorially had stood as the evil spirits *par excellence*. Like the *utukki* of the Babylonian religion[33] they mostly appear in tribal groups, without personal distinction. Most constant among these classes are the דיוין and שידין, which may be expressed by "devils and demons," with as much or as little of a definite idea as these English words convey to us. The שדים occur in the Old Testament, the word having an obscure history in connection with the Assyrian *šêdu;* in function the שד is the Babylonian *šêdu limnu*, "evil *šêdu*."[34] In the later Jewish demonology the שידין are the hobgoblins, the

[30a] With פ׳ = a deity or demon, cf. the use of *σῆμα*, "tomb," as grave-demon; so in a Greek amulet published by Reitzenstein, *Poimandres*, 293, and see his note 2. Also in the Syriac גניתא, "shrine" comes to mean a god, a false god, and in Peshitto of I *Sa.* 7: 3 translates עשתרות. In Islam the false gods were called *aṣnâm*, "idols."

[31] Cf. Nöldeke, *Gram. d. neu-syr. Sprache*, § 6, or *Mand. Gram.*, § 20; cf. תליתיכון, 8: 3. Or an assimilation to פתיכרא?

[32] See Spiegel, *Eranische Alterthumskunde*, ii, 138; A. V. W. Jackson in Geiger and Kuhn, *Grundriss d. iranischen Philologie*, iii, p. 665; C. de Harlez, *Manuel du Pehlevi*, 1880), *s. v.* in Glossary.

[33] See, for the Babylonian demons, Fossey, *La magie assyrienne*, c. 2; Jastrow, *Rel. Bab. u. Ass.*, i, c. xvi; Thompson, *Semitic Magic*, 43 ff.

[34] See, *inter al.*, Baudissin, *Studien z. sem. Religionsgeschichte*, ii, 131, and his art. "Feldgeister," in Hauck's *RE*[3]; H. Duhm, *Die bösen Geister im Alten Testament*,

prevailing class of demons; they are the *δαιμόνια* of the Greek, for which the Peshitto returns to the Jewish term.[35]

As Judaism has its feminine שידות, so once we find reference to the שידניאתא, 7: 14.[36] In 11: 5 = 18: 4 = Ellis 1, = Lidz. 5, we learn of a "king of demons and devils," with which compare Asmodaeus, the king of the demons.[37] But in these texts his name is given as אבונדאנא, בנדנא, which is found in 19: 10 as name of an evil deity (בר חבאל), while the plural in the same text, ll. 6, 13, has evidently the meaning demons or deities. In a broken text (Pognon B, no. 24, l. 19), a מלכא דשידיא occurs. In 29: 9 the *šêdîn* are described as בני טולא, "sons of shadow," cf. the טלני of the Targum.

The דיוין inherited a good name from the old Aryan theology (= gods), were depotentized in the Persian system, and came into Semitic currency through the Mandaic and Syriac. (The word does not occur in Targums and Talmud.[38]) In the Peshitto use of the term it appears to apply to the demons of mental and moral disorders, thus indicating something distinct from the *šêdîn*.[39]

The "spirits" or "evil spirits" (רוחין בישין, רוחא בישתא, רוח רעה — both masc. and fem.)[40] form a triad with the preceding species. Levy

49, 20; Thompson, *Semitic Magic*, 43; and the discussions by the students of Assyriological magic, Zimmern (*Beiträge* and *KAT*[3]), Tallquist, Jastrow, Fossey. Fossey, p. 50, quotes IVR 6a, 26, to the effect that the *šedu* is the demon of the evil eye—another proof that demons and their functions were interchangeable.

[35] For these and the following demoniac species in Judaism, see Eisenmenger, *Entdecktes Judentum*, ii, 408 ff.; Grünbaum, in his admirable "Beiträge z. vergleichenden Mythologie aus d. Hagada," in *ZDMG*, xxxi, — esp. 271 ff.; Weber, *Jüdische Theologie*, p. 242 ff.; Edersheim, *Life and Times of Jesus*, ii, 759 ff.; Blau, *Das altjüdische Zauberwesen*, 10 ff.; Levy, *ZDMG*, ix, 482; T. Witton Davies, *Magic, Divination, and Demonology among the Hebrews and their Neighbors* (London, n. d.); the art. "Demonology" in *Jewish Encyc.*; Conybeare, "Demonology of the New Testament," *JQR*, viii, ix; Everling, *Die paulinische Angelologie u. Dämonologie*; also v. Baudissin and H. Duhm as cited above, note 34.

[36] Cf. *δαίμονες δαιμόνισαι*, of the Leyden Papyrus, Dieterich, *Abraxas*, 194, l. 10.

[37] Also simply the king, מלכא, Eisenmenger, *op. cit.*, ii, 422 (a tradition of the "Molek" of the Old Testament?).

[38] According to Levy, not found in Jewish literature, *op. cit.*, 488.

[39] Acc. to Baudissin, *op. cit.*, 131, the Harclean version replaces שאדא of the Peshitto w. דיוא.

[40] Cf. Ellis 5: 4, זכר ונקבה.

and Blau regard them as ghosts,[41] but without warrant, as the Rabbinic, Syriac and Mandaic use of the word shows. They are the *πνεύματα πονηρά*, or *ἀκάθαρτα* of the New Testament, the equivalent of the Babylonian *utukki limnûti*. This development of רוח we may trace in the Old Testament where "a spirit of evil," "the evil spirit," appears as an agent of Jahwe; like the Satan such potencies easily passed into malicious demons.

The *Mazzîḳîn* which are prominent in Jewish lore, where they are the general category for all demons,[42] appear but seldom.

These *devils, demons* and *evil spirits* in their juxtaposition recall the several species so frequently enumerated in Babylonian demonology; e. g. as listed more than once in the *Maḳlu*-series, the *utukku, šêdu, râbiṣu, ckimmu, labartu, labaṣu, aḥḥazu,* followed by the liliths.[43] But beyond the registration of several categories there is no equivalence in name (with one exception), in definite character.[44] A certain amount of distinction can be drawn in the Babylonian field, but in our texts no differentiation exists. Indeed the three species are rather tokens of the several sources of our particular magic, the Hebrew (רוח), Babylonian (שד), Persian (דיוא). The only reference to the "seven spirits" of Babylonian magic is in connection with the מבבלתא (see below).

But it is the Liliths which enjoy the greatest individual vogue in our demonology. Many of the charms culminate in that objective; the other evil spirits are most often merely generical, anonymous, to whom the general compliment of a spell must be paid, but the Liliths are definite terrors, whose malice is specific and whose traits and names are fully known.

[41] *Opp. cit.*, p. 482, p. 14. The view that demons were ghosts of the dead indeed existed; see Justin Martyr, *Apol.*, i, c. 18 and for later Judaism, Eisenmenger, ii, 427. They may have been specialized as the spirits of demoniac possession and moral temptation (see Blau). For the relation of רוחין and *πνεύματα*, see Baudissin in Hauck's *RE*³, vi, 12 f.

[42] So Weber, Blau.

[43] Tallquist, *Die ass. Beschwörungsserie Maqlu*, 1894, no. i, l. 136, v. l. 77, N. B. just seven species.

[44] For the distinctions between the Babylonian spirits, see Jastrow, *op. cit.*, i, 278; Thompson, *Devils*, i, xxiv, *Semitic Magic*, 1, Fossey, *op. cit.*, c. 2.

The genus appears in the Babylonian incantations, as masculine and feminine, *lilu* and *lilit*, along with an *ardat lili*.[45] The two former words survived in Jewish demonology and both occur abundantly in our bowls, though the *Lîlîn* are only pendants to the Liliths. The origin of the word, whether Semitic from לֵיל = "nightmare, nighthag," etc. with Schrader, Halévy, *et al.*, or from the Sumerian *lil*, "storm," with Sayce,[46] Zimmern,[47] R. C. Thompson,[48] lies beyond my present scope. Probably as others have suggested, the resemblance of Sumerian *lil* to לֵיל, "night," may have had its part in shaping the phantom of Lilith and her troop among Semitic-speaking peoples; but I would suggest that the prime connection is not etymological but semantic: *lil* = wind = רוּחַ = spirit;[49] Lilis and Liliths are specialized forms of רוּחִין.[50]

In the Babylonian the Lilith (*ardat lili*) is the ghostly paramour of men, and her realm is the sexual sphere; hence women in their periods and at childbirth, maidens, children, are the special objects of her malice.[51] Hence in the bowl inscriptions, made out for the protection of homes and the peace of family life, most often in the name of the women concerned, it is an amulet against these noxious spirits that is particularly desired. We may say that the Lilis and Liliths are the demons of the family life.

Texts Nos. 1, 6, 8, 9, 11, 17, may be referred to especially for the Liliths. They haunt the house, 1: 6, lurk in the arches and thresholds, 6: 4, one dwells in the house concerned, 11: 5. So in the Talmud they dwell in the beams and crevices, the cesspools, etc.,[52] even as in Greek magic demons

[45] Acc. to Zimmern, *KAT*[3], 459 = paramour of *lilu*. Better Thompson. (*Devils*, etc., i, p. xxxvii, *Semitic Magic*, 65), who regards the *ardat lili* as the more specialized (e. g. marriageable) lilith, hence the original of the Jewish Lilith.

[46] Hibbert Lectures, 145.

[47] *KAT*[3], 460, n. 7.

[48] *Semitic Magic*, 66: if Semitic, from root לָלָה, "be abundant, lascivious."

[49] Cf. רוּחַ in *Job* 4: 15; the wind-draught easily passes into a ghost.

[50] The single appearance of Lilith in the Old Testament, *Is.* 34: 14, represents a more primitive stage of the fable than the Babylonian Liliths. She is just one of the spirits haunting waste ruins.

[51] See Thompson, *l. c. et seq.*, who discusses the demonology of marriages with Jinns, etc.

[52] *Jewish Encyc.*, iv, 516b.—In 29: 6 f. (cf. l. 9) occurs לִיליתָא בִישתָא וכשירָא, "the evil and the decent lilith"; this recalls the good demons of Jewish lore, שִׁידִין טוֹבִין,

are given the like habitat.[53] In No. 1 they are described as generating offspring with human folks, appearing as phantom men and women to women and men by night. Hence the interesting phenomenon of the magic *get*, divorce-writ, by which the sorcerer, like a Jewish rabbi, separates these obscene beings from their prey.[54] Especially do they vent their rage on little children as the detested offspring of human wedlock; they plague them, throttle and devour them, suck their blood (e. g. 11: 8, 18: 6, 36: 9, Lidz. 5). The name for one of these demons, in No. 36, is "Murderess daughter of Murderess," and "strangler." In the Jewish demonology the Liliths have the like fiendish character; *Bemidbar Rabba* 16 affirms that they kill children.[55] In No. 11 the Lilith is associated with the personifications of barrenness and abortion. The figure on No. 8 gives the picture of a typical obscene Lilith; she is depicted with loose tresses, one of the characteristics of the species, cf. 8: 3; cf. *Nidda* 24b, *Erub.* 100b. The later Lilith thus partakes of the nature of the elder *lilit* and of the Labartu, the enemy of children.[56]

The Liliths are intimately known, their own and their parents', even the granddam's names are given, e. g. Nos. 8, 11. At the beginning of Wohlstein's text 2416 (= Stübe) a whole brood of demons is named.[57] Especially in the case of this species most exact descriptions are given of their foul ways and apparitions,[58] for the Liliths were the most developed products of the morbid imagination—of the barren or neurotic woman,

Eisenmenger, ii, 431 f., and the good and bad *šêdu* of the Babylonian—also so the *utukku*, Fossey, *op. cit.*, 449.

[53] Wessely, xlii, 66, l. 19: they are bidden "not to hide in this earth nor under the bed or gate or beams or vessels or holes."

[54] See to 8: 7. The separation had to be legally effected, for the Lilith had her nuptial rights or powers. Cf. the tales of the female Jinns in Arabic folklore.

[55] Cited by Weber, *op. cit.*, 255. So also in the Testament of Solomon, ed. Conybeare, *JQR*, xi, 16. But not in the Talmud, according to Grünbaum, *Zeits. f. Keilschr.-Forsch.*, ii, 226.

[56] See Myhrman, *ZA*, xvi, 147 ff.

[57] See Wohlstein's note; the mother's name אימי, "little mother," throws light on a passage in *Pesaḥ.* 112a. In general these names are epithetical; cf. the demon Ahriman bar Lilit, *B. Bath.* 73a.

[58] See above.

the mother in the time of maternity, of the sleepless child.[59] Somewhat of the elder and biblical notion of the Lilith as denizen of the desert appears in the expressions בנתא דברא, לילית דברה, 17: 3, 27: 7.[60]

A further development of the Lilith is her assimilation with the witch; the descriptions of the species in the Mandaic bowls recall the uncanny scenes of the witches' nights which are the theme of still existent folklore. The Lilith is the Baskania, (i. e. witchery) of the Greek charms.[61] The epithets "cursing," and "undoing," e. g. 34: 13, belong to this phase of the Lilith-idea.

Very interesting is the similarity of the Semitic Lilith, and in course of time her assimilation to the psychological horrors which haunted men elsewhere, especially to the identical forms in the Graeco-Roman demonology. I refer to the Lamia,[62] the Empusa,[63] the Gello,[64] the Marmolyke and Gorgons, and the *incubi* and *succubae*.[65] In connection with the text No. 42 which presents the legend of the Lilith-witch, I take occasion to present the parallel forms of this conception as found in the western world. This developed myth is a later accretion to the ancient inchoate ideas of these monsters.

[59] For the psychological basis and subjective fact of these apparitions, see Roscher, "Ephialtes" c. 1, in *Abhandlungen* of the Saxon Academy of Sciences, vol. xx (1900).

[60] Cf. *ekimmu ḫarbi*, *Maḳlu*-series iv, l. 22 (Tallquist, p. 66), and the exorcism, "evil spirit to thy desert," Thompson, *Devils*, i, 152, ii, 26; cf. i, 167, 191 ff. The banning of the demons into the desert and mountains (cf. *Mt.* 12: 43) is frequent in the magical papyri, e. g. in an amulet published by Reitzenstein, *Poimandres*, 294: *ἵνα ἀπέλθατε ἐν ἀγρίοις ὄρεσιν καὶ ἐκεῖσε φυγαδευθήσετε*. Cf. Wohlstein 2422 (l. 28), "go and fall on the mountains and heights and the unclean beasts." As Wohlstein notes, the latter clause is a most interesting commentary on the anecdote of the Gadarene devils which asked the liberty to enter the swine, *Mt.* 8: 28, etc.

[61] See at length under No. 42.

[62] Daremberg and Saglio, *Dictionnaire*, *s. v.*

[63] Pauly-Wissowa, *RE*, *s. v.*

[64] For Gello as a lilith-name and as probably equal to Ass. *gallu*, see notes to No. 42.

[65] For the *incubi* see Roscher, *Ephialtes*, 60. The special demon which is the subject of this classic treatise corresponds to the male Lili of our texts, but his vogue is far more extended. He is in form goat, satyr, faun, etc., a rural as well as a domestic terror.

A long list of species of demons still remains to be considered, most of which are not much more than names. One of the most frequent and evidently most dreaded is the class of the מבכלין or מבכלתא. Once they are spoken of as the "seven מ׳ of night and day," 16: 7, recalling the Seven Spirits of Babylonian mythology.[66] Stübe (p. 59) suggests derivation from כבל, "bind," and Myhrmann (p. 350) compares Assyrian *kabâlu* used in incantations. I venture to suggest metaplasis with the Syriac לבך, "hold, seize," i. e. "take demoniac *possession* of," so that we may compare this species with the Babylonian *aḥazzu*.[67] Cf. *καταλαμβάνειν*, *Mk.* 9: 18, and the terms *κατεχόμενοι* and *κάτοχοι*. indicative of supernatural possession.[68]

There are the evil angels,[69] who are called קדישין = *sacri*, in 4: 1; the "angels of wrath and the angels of the house of assembly."[70] We read of the ראזי מלאכא, 37: 8, rites in which angels were bound to hellish operations. The word is used of pagan deities in 36: 5 (cf. 19: 13), even as *ἄγγελοι* appears in the papyri.[71] The angel of death who shudders at the Great Name appears in 3: 6, Schwab F.

"The Satan" appears and also "the Satans," as in *Enoch* (40: 7) and Rabbinic[72] and Arabic lore. There is no amplification of the doctrine of

[66] Cf. Thompson, *Semitic Magic*, 47.

[67] *Ibid.*, p. 43, etc.

[68] See Tambornino, *De antiquo daemonismo*, 56.

[69] Cf. *Mt.* 25: 41, *Rev.* 12: 7, "the devil and his angels," and the absolute use of the word in this sense in I Cor. 11: 10, with reference to the myth in Gen. 6. Blau notes, without citation, an evil spirit רוח הקדש, p. 10, n. 2. For evil angels, see Volz, *Jüdische Eschatologie*, § 23.

[70] Wohlstein 2422. The editor makes no comment on this or the parallel phrase in l. 7: איסרי דביה כנישתא. איסרי evidently equals מלאכי (see below, note 112). The "house of assembly" recalls the ancient Semitic idea of the הר מועד, *Is.* 14: 13, the assembly of the gods on the Semitic Olympus,—Walhalla having become a conventicle of demons! (Demons are located in the north by Jewish legend, *Pirḳe R. Eliezer*, iii, and other reff., in Eisenmenger, *op. cit.*, ii, 438.) Or ב׳ כ׳ = *συναγώγη*, *ἐκκλησία*, may refer to the conventicle of a magical cult (cf. "the synagogue of Satan," *Rev.* 2: 9). But the phrase is probably to be interpreted from a passage in a "Christian" amulet published by Reitzenstein, *op. cit.*, 295, top: *ὁρκίζω ὑμᾶς τὰ ἐνακόσια ἑξήκοντα πνεύματα τῆς ἐκκλησίας τοῦ πονηροῦ*.

[71] E. g. Dieterich, *Abraxas*, 192, l. 10; so also in the LXX, e. g. *Ps.* 96: 7, and an inscription cited by Cumont *Oriental Religions*, n. 38, p. 266: *diis angelis*.

[72] *Debarim R.*, c. 11: "Sammael the head of all the Satans," quoted by Weber, *Jüd. Theol.*, 253.

the individual Satan. Once with the Satans (35: 4) are associated the סוטיטא and דיאבולא, the former a class of seducing spirits (metaplasm of √ סטא ?),[73] the latter the almost unique Semitic transliteration of *διάβολοι*. In 2: 3 are mentioned the סני ובעילדבבי, the Fiends and Foes.

The זיקין[74] appear in association with the מזיקין. The Rabbinic and Syriac זיקא is a meteor, blast of wind, etc.; in the Mandaic it has the more general sense of a plague.[75] The Mandaic has inherited an old Babylonian idea of the *zaḳiḳu*, "blast," as a demon, and then death-demon.[76] The Satyrs, שעירים, appear once, 5: 4, a reminiscence, as the form shows, of the Old Testament.[77] The שחורין of Schwab G are *black* devils; cf. the title of Satan *ὁ μελάς*, in Epistle of Barnabas, 4: 9.

In Hyvernat's text occurs the phrase גינא דשלמוה, which Grünbaum most plausibly translates "the Jinn of Solomon."[78] The word would then be one of a few terms in our texts which suggest Arabic connections (see שלניתא, שיקין, below). But the reserve is to be made that, as Nöldeke maintained, the root is common-Semitic, and the spread of the word may well have antedated the Muslim Conquest. We may compare the god Gennaios cited by Cumont in Pauly-Wissowa, vii, 1174. The גנדא of 37: 6 is to be explained from the Mandaic גונדא (Syriac גודא Arabic *jund*), "troop"; devils molest their victims in bands, cf. the name "Legion" assumed by the demoniac in the Gospel, and the "tribes" (שורבתא) of demons in 38: 6; also cf. 13: 1.

[73] Cf. 1 *Tim.* 4. 1, "seducing spirits and doctrines of devils."

[74] So probably read for עקין in Hyvernat, l. 4; in 19: 13, זעקי.

[75] Norberg, *Lexidion*, 55.

[76] Muss-Arnolt, *Dict., ad voc.*, cf. the *šunu ziḳiḳu*, "roaming windblast," Thompson, *Devils*, ii, 4, l. 27. For the simile of demons to storms, see *ibid.*, i, 89, and compare the etymology of lilith (see above). For the word see 12: 8.

[77] But the idea of the hairy goatlike demon which obsesses its victim with mischievous or obscene purpose is universal. Cf. the Arabic *ifrit, azabb*, with the same root-meaning; Wellhausen, *Reste des arabischen Heidentums*, 135; Baudissin, *Studien*, i, 136. The same phenomenon is abundantly vouched for in the Greek demonology; see Roscher, *Ephialtes*, 29 f., for the goatlike form of the Ephialtes, and p. 62 for its epithet *pilosus;* and compare Pan and the Fauns. See Roscher, note 285b, for similar representations in the superstition of India. In 5: 4 the satyrs are represented as haunting a particular stretch of road.

[78] Probably to be read in 37: 10.

In 15: 6 and Myhrman l. 2 are found the ירורין. The second ר is sure in my text; Jastrow's and Levy's lexicons give the word as a variant to ירודא, "ostrich," but doubtless the former is the correct spelling;[79] the root is onomatopoetic (cf. ילל, and English "howl" and "roar"), connoting a howling creature and was applied to the ostrich—so the Tosefta (see Jastrow); but in the Targums it generally translates the Hebrew ציים, תנים, the uncanny creatures typical of desolation. In the Syriac, ירורא is jackal, translating תנים. But the Rabbinic references indicate that it was rather a fabulous than a zoological species, akin to the liliths, satyrs and vampires that haunt ruins, and this connotation appears in the Syro-hexaplar to *Is.* 34: 17, translating לילית by ירורא, while Symmachus gives λαμία.[80] This equation gives the key to our present word. The Babylonians represented their demons in uncouth shapes of birds and animals.[80a]

Besides the use of certain generic terms, such as עשמא, "oppressors," there remain several rare or obscure species: the לטבי, also לטאבי, probably metaplastic for *baṭṭâlâ*, "undoer"; the לטאנא (alongside סטאנא) No. 20, probably from root לוט "curse,"[81] or a form of the Targumic טלנא, "shade-demon." The שפטין in Hyvernat, l. 3, for which Grünbaum (p. 221) cites the Arabic *šifût, species daemonis,* is probably to be read שבטין, "plagues" (see p. 80). For the ניסי, possibly "familiar spirits," see to 6: 2.

There are also names of individual demons. Some can be identified: the חטפיתא, corresponding to the Arabic ghûl (see to 8: 2); מר a depotentized deity.[82] Some are recognizable epithets: אבדא 3: 2, מדובינא 37: 10, שרירי Schw. F. Others defy etymology: אשתקותקוף Pogn. B, דמקר 34: 10 (*q. v.* for a possible interpretation), דנחיש 3: 2, חמועית Schw. G. Long lists of such obscure names are found in Schwab F and G; these are probably on a

[79] According to Jastrow, Lagarde's editions of the Targums have everywhere this form; ילולין appears as a variant in one place.

[80] See Field's Hexapla. N. B. the interpretations of the uncanny creatures in this passage as demons by both the Greek and the Targum.

[80a] This word is to be distinguished from וריר, an eye-disease (see below); because of the uncertainty of the spelling of the two words the וירי at end of Schw. G may be the one or the other word.

[81] Cf. the Syriac שאדנא.

[82] Stübe, l. 4. See Pognon, *Inscriptions sémitiques,* 82; Clay, *Amurru,* 162.

par with the mystical names of the angels (see § 13).[83] Finally we may note the blanket-formulas for demons who are named and who are not named, and which have their parallel in the Babylonian,[84] and in the Greek magic.[85]

There are comparatively few certain references to ghosts; the רוחין, etc., as spirits of the dead, may include them.[86] One case in point is found in No. 39: "charmed the lilith that appears to her .... [in some shape]; charmed the lilith that appears to her in .... [the shape of ?] Tâtâ her niece; charmed all the defiling ghosts, דמואתא, that have entered, which appear to her in dreams of nights and visions of day." Here a definite ghostly apparition is really a diabolic delusion. Also Nos. 20, 25 contain general charms against ghosts. One technical term for ghost possibly appears, שלניתא (see to 8: 2). The last of Wohlstein's series, 2422, appears to be directed against ghosts and is an interesting example of necromantic spell. Familiar names are given to the spirits and they are cajoled to do no harm. Also in Wohlstein, no. 2422 appears the רוח בית קיברא ור' מיתו. There is constant reference to dreams (חילמא) and apparitions (דמותא, חזינא),[87] which are the *milieu* of demoniac and ghostly apparitions, cf. 7: 13; hence ח' שנושי, "disturbing dreams," in which phrase the noun is practically personified—a category of evil spirits. We have such a combination as: חראריא ושואריא וחיזוניא (Pognon A), in which חר' are impure conceptions of the night (cf. חלם in Syriac); the second word, which Pognon does not explain, is doubtless the Talmudic שוור, "leaper," exactly the Ephialtes of the Greeks, a kind of *incubus*.[88] This distinction of the dream from ghost or demon represents a later psychology. Charms against dreams are frequent in the Greek papyri; thus against ὀνείρους φρικτούς,[89]

[83] This giving of unintelligible names to demons may be in imitation of Persian diabolology; see Jackson in Geiger and Kuhn, *Grundriss d. iranischen Philologie*, iii, 659, listing 54 individual demon names.

[84] Thompson, *Devils*, i, 153.

[85] E. g. δαιμόνιον καὶ μὴ ὀνομαζόμενον, Pradel, *Griech. u. südital. Gebete*, 22, l. 2.

[86] For a typical Babylonian incantation against ghosts, see Thompson, *Devils*, i, 37.

[87] For oneirology in later Judaism, see Joel, *Der Aberglaube*, i, 103.

[88] See Roscher, *Ephialtes*, especially p. 48 f. for the etymology.

[89] Wessely, xlii, 31, top.

or a *φυλακτήριον σωματοφύλαξ πρὸς δαίμονας, πρὸς φαντάσματα, πρὸς πάσαν νόσον καὶ πάθος*;[90] another against enemies, robbers, etc. and *φόβους* and *φαντάσματα ὀνείρων*.[91] These dreams and the similar panic fears of day and night are also referred to *in extenso* in Gollancz's Syriac charms..

(2)

Respectable or "white" magic includes not merely the laying of evil spirits but counter magic[92] against the machinations of hostile sorcerers. Just so the Babylonian *Maḳlu*-series devotes itself to the rites of destroying the witch by means of simulacra which are consumed in the fire; the Greek magic has the same defensive purpose. The Mandaic texts recall somewhat of the ancient dread of witches with their description of those uncanny and obscene persons, and, as I have noted above, the witch and the lilith are practically identified.

It was most efficacious if the sorcerer were known so that he could be named and the "tables turned" upon him by casting upon him his malign arts, for no curse "returns empty." Such a case appears in Schwab G; all the evils that have fallen on the victim are bidden to fall on the head of אוסרא בר אמא. But examination of the name reveals that it is fictitious; אוסרא means "spellbinder" and אמא simply means "mother." The writer of the bowl has satisfied his client by assuming that he knows the adverse sorcerer's name. It is nothing else than the legal "John Doe." In like manner, in Wohlstein 2416, all evil works, etc., are commanded to return against their instigator.

But inasmuch as the sorcerer's names are not generally known, the incantations content themselves with listing the various kinds of magical practices and putting them under the potent spell. The *Šurpu*-series illustrates the prophylactic practice; for instance, its third tablet[93] is con-

[90] *Ib.*, 42.

[91] *Ib.*, 64. Dream-magic was highly developed among the Greeks; we have charms for sending dreams, *ὀνειροπομποί*, e. g. Dieterich, *op. cit.*, 191, l. 15. Magic is required as an antidote. Hence dreams are listed with other maleficent agencies, e. g.: *πνεύματα χθόνια, ἁμαρτίαι, ὄνειροι, ὅρκοι, βασκανία*; Wessely, xxxvi, 81, l. 81.

[92] Probably technically expressed by קיבלין.

[93] Zimmern, *Beiträge*, 13.

cerned with breaking every possible kind of ban (*mamît*) that may have befallen a person. Hence a recurring phrase in the praxis of the fifth tablet: "may the curse, the ban, the pain, the misery, the sickness, the grief, the sin, the misdeed, the impiety, the transgression, the sickness, which is in my body, be peeled off like this onion." We mark here the union of curses, etc. with evils of the flesh, just as they occur in our bowls.

Accordingly we find exorcism effected with this prudent intention against מעבדין, etc.;[93a] חרשין (+ בישין),[94] "black arts," perhaps generally with the sense of poisoning, = *φαρμακοποιία*;[95] סחריא, "sorceries," 39: 4;[96] קריתא, "invocations," (the singular קריה in 16: 10), the *ἐπικλήσεις* or *ἱεροὶ λόγοι* of maleficent magic,[97] also termed the בתקלא דק'. There are the various terms or kinds of curses, the *mamît* of the Babylonian, the *ὅρκοι* of the Greek magic; the לוטתא, especially in Pognon's Mandaic bowls, where the authors of these bans are specified, e. g. no. 15: father, mother, prostitute, foetus, laborer, master who has defrauded him, brothers; also the frequent נידרי, maleficent "vows" and the חרימא, which is the Syriac Christian equivalent of *ἀνάθεμα*, perhaps also אלתי (Wohlstein, 2426: 5).[98] This listing of the bans and their originators has its abundant parallel in the Babylonian magic; e. g. the third tablet of the *Šurpu*-series, already cited, in which all possible kinds and origins of curse are listed in 165 lines: of father, mother, grandfather, grandmother, brother, sister, etc., posterity, infant.[99] The unborn child, naturally regarded as homeless and miserable, hence a malignant wraith, is classed in the Babylonian magic

[93a] For this and following technical names for sorcery, see § 11, beginning.

[94] Cf. the Latin equivalents, *nefaria sacra, maleficia, artes nefandae, malae artes;* see Abt, *Die Apologie des Apuleius,* 30.

[95] So in the Syriac, also in 7: 13. But *φάρμακον* survived in a good sense in literature with magical tinge, e. g. in no. 30 of Bishop Serapion's prayers, "Thy name be a *φ.* for health and soundness." For an extensive discussion of the word, see Abt, *Apuleius,* 112. It is formally impossible to distinguish between the words "sorcerers" and "sorceries," except in the Mandaic. Cf. the use of the adjective חוראשא, 39: 6.

[96] For these words see the convenient summary in T. W. Davies, *Magic, Divination and Demonology among the Hebrews and their Neighbors,* 44 ff.

[97] See above, § 11. Pognon was the first correctly to interpret this term, B, p. 19.

[98] In 2: 6 we find גזירתא, שמתא, אחרמתא, used of the "white magician's" own work.

[99] A similar list in Ellis 3 = Schwab B. In the later magic these classes are listed in exorcism of the evil eye.

as in the Mandaic citation with the causes of ban, and so too the hierodule or prostitute.[100] The difference between the Babylonian *mamît* and these לוטתא is that the former has rather the sense of taboo, the latter of a malicious curse effected under foul auspices.[101]

Then there are the "names," e. g. 16: 8, שומהתא, of hostile invocations,[102] and the מילין, "words," curse formulas, including the informal imprecation. Compare "the evil word" of the witch in Babylonian magic,[103] and the current Babylonian phrase, "the evil mouth, the evil tongue, the evil lip."[104] The Talmud has the principle, "None open his mouth to Satan."[105] By a natural passage of thought the tongue and the mouth come in for exorcism, e. g.: "Bound and held be the mouth, and bound the tongue, of curses. .... Bound be the tongue in its mouth, held be its lips, shaken .... the teeth and stopped the ears of curses and invocations."[106] The binding of the tongue is a frequent element in the Greek magic; some thirty of the *κατάδεσμοι* in Wünsch's Appendix of *defixiones* to the *Corpus Inscript. Attic.* are for binding this "unruly member."[107]

Further objects of exorcism are the רזי, "mysteries," the sacramental rites of maleficent cults; the אבמרתא (Stübe, l. 2) and כמרי (Wohlstein, 2426: 5), enchantments effected by priests (כומרין).[108] A unique word in its use in the bowls is אישלמתא, found coupled with the above terms. Halévy and Wohlstein[109] compared form IV of the Arabic verb and rendered it as a delivery to evil. But it is to be compared with the Targumic אשלמו, used

[100] Jastrow, *op. cit.*, i, 367, 373.

[101] So the Greek *κατάδεσμοι*, and the Jewish collection of charms in Thompson, "Folk Lore of Mossoul," *PSBA*, xxviii-ix.

[102] Cf. the names of Hecate in the Greek *κατάδεσμοι*, e. g. Wünsch, *Antike Fluchtafeln*, no. 1.

[103] See Jastrow, *op. cit.*, i, 285.

[104] Fossey, *op. cit.*, 50, with citations.

[105] *Berak.* 19a, 60a, *Ketub.* 8b; see Joel, *Der Aberglaube*, i, 70 (but rationalizing), and Blau, *op. cit.*, 61, with Talmudic instances.

[106] L'dz., 4.

[107] Deissmann, *Light from the Ancient East*, 307. An amulet of later age (Reitzenstein, *Poimandres*, 295) analyzes the evil tongue into the lie, accusation, magic, sycophancy.

[108] So rightly Stübe; the heathen priest was, and at last appeared exclusively to be, a magician. On the second of Wünsch's *Fluchtafeln* is the design of an altar.

[109] *Comptes rendus*, IV, v, 292; *ZA*, viii, 336.

in *Targ. Jer.* to *Lev.* 8: 28, etc., in sense of dedication, = חנוך. Its counterpart is found in the Mandaic system, where the שלמאניא are the *τέλειοι*,[110] and it is the exact equivalent of the Greek *τελετή*, the (magic) rites.[111] Also the usual terms, the איסרי,[112] the קיבלי, "countercharms," the קיטרי, etc., all are listed for exorcism.

More obscure are the סתרתא (Ellis 3: 10) = "hidden arts" —with which may be possibly compared the שדרתא of Schwab R, and Wohlstein, 2426: 6.[113] Also the שיקופתא (once אשתקופתא) have aroused question. Schwab proposed שקף, "envisager," of the evil eye; Stübe, Wohlstein, Lidzbarski, connect with the root "to knock" (cf. שקף used of a Lilith, 11: 6).[114] This meaning is corroborated by the amulet of Lidzbarski's just cited, where it is parallel to חרבא and קריא (l. 11 ff +), wasting and mishap. But from its peculiar intensive form I think the word must have some connection with magic arts; cf. the modern spiritualistic knockings and rappings.

Probably the exorcism in the fragment published by Schwab, *PSBA*, xii, 299, from sin and guilt (חטאתא, אשימא), immediately after "arts" and

[110] Brandt, *Mand. Rel.*, 120, 170; *Mand. Schr.*, 8, n. 5, 36, n. 1; Nöldeke, *Mand. Gram.*, p. xxviii.

[111] Dieterich, *Abraxas*, 136. Stübe (p. 37) first offered the explanation given above. Pognon discusses an obscure phrase in his bowls פתיכרי ואשלמתאנון (B, p. 49), translating "and their adherents." Lidzbarski treating the same phrase (*Eph.* i, 94) rightly takes exception to such a form and translates, "I deliver them," which is unsatisfactory. Probably our noun is to be understood here, reading the nominal suffix ן—for the verbal ינן—. Our word may be a translation of the Greek *τελετή*; but n. b. Robertson Smith's note on the mystery idea involved in *aslama* (he might have added the Hebrew שלמים), *Rel. Sem.*, 80.

[112] Nöldeke, *Z. f. Keils.-forsch.*, ii, 299, animadverting upon Hyvernat holds that איסרא, translated "prince, angel," always means "charm." Now the parallelism in Wohlstein 2422 between איסרי דבית כנישתא, l. 7, and מלאכי דכ' כ', l. 15 (see above, n. 70), appears to approve Hyvernat, while in the Talmud א' = "genius, angel" (e. g. א' דמזוני, angel of nourishment). But Nöldeke's etymology is doubtless right; a genius to be invoked was himself called an *incantamentum*. A proof of this is found in the Mandaic amulet published by Lidzbarski in the *Florilegium* dedicated to de Vogüe, p. 349, in l. 29 f. (not understood by the editor—cf. l. 210), where Hibel Ziwa is the גטרא דכושטא, "the True Charm"; ג' = קיטרא = איסרא. Cf. the Mandaic genius "Great Mystery."

[113] Wohlstein: "böse Schickungen"; or it may be related to Assyrian *satâru, sadâru*, "write," of a written charm.

[114] So in a Babylonian text, of demons: "The man they strike, the women they hit," Fossey, *op. cit.*, 282.

"vows," with which compare the אשעם ביש in his text M 18, is exercised against practices which magically placed "sin" on the shoulders of some innocent person. Compare the symbol in Zecharia's vision of the removal of wickedness and its curse to the land of Shinar (*Zech.* 5). But there is doubtless a reminiscence here of the old Babylonian forms in which a sense of personal guilt appears in the incantations; so frequently in tablets 5 and 6 of the *Šurpu*-series, e. g. 5, l. 77 ff., where the summary is made of "the curse, the ban, the pain, the misery, the sickness, the ailment, the sin (*arni*), the misdeed (*šerti*), the offence (*ḫablati*), the transgression (*ḫiṭiti*)." The above would be the only case then of a sense of sin in our texts, but from the point of view that the sin has been inspired by a demoniac force. Heitmüller pertinently remarks:[115] "Die Sünde ist ein Art Besessenheit." And so sins are listed in the Greek objects of exorcism, e. g. *πνεύματα χθόνια, ἁμαρτίαι, ὄνειροι, ὅρκοι, βασκανίαι.*[116]

The malice (סינתיא = סנאתא) of Lidz. 4 is the enmity which magic could conjure up against an enemy, a dreaded means of revenge, and very frequent in ancient magic. Compare the Jewish charms from Mossoul having this specific object,[117] and for the Greek world the Cypriote leaden tablets published by Miss L. MacDonald,[118] in which the gods are constantly invoked to suppress the wrath and anger and power and might of the adversary.[119] A tablet to provoke such malice against an enemy is no. 2 in Wünsch's small collection.[120] The חיל ביש or חיל בישין (30: 4) is a summing up or personification of all this kind of evil potency.

Particularly dreaded were the material means of sorcery, amulets, etc., which themselves came to be personified into evil spirits. The most frequent of these objects of exorcism are the חומרי (sing. חומרתא),[121] small stones, beads, etc., carried singly, or on strings and necklaces, primarily used as amulets, but coming to possess at least in the Mandaic superstition

[115] *Op. cit.*, 307.

[116] Wessely, xxxvi, 81, l. 1443 ff. (the Paris Papyrus).

[117] Thompson, *PSBA*, xxviii, 106, 108, etc.

[118] *Ib.*, xiii, 160.

[119] Cf. the charm in Wessely, xlii, 60 f.

[120] See the editor's comment, p. 8.

[121] For their character as spirits, see Nöldeke, *Mand. Gram.*, 76.

a baneful influence.[123] We might think of the manipulation of, for instance, an opal to bring another ill-luck; but probably the objects are more obscene, joints of dead men's bones, etc. Their standing epithet is "impious,"—חי זידניתא, and we read of their "tongue," e. g. 2: 7.[123] The ענקתא, "necklace charms" are exorcised in like manner,[124] also the שיבין (15: 6, *q. v.*);[125] כיפא, "pebble," Ellis 3: 11, would belong to the same class, but it is probably to be read כוסא.

The magic bowls themselves are among the evil influences (7: 13, perhaps Ellis *l. c.*), and so the magic knots, קיטרי, 7: 13, and עיקדי (?) 34: 10. There is one reference to the magic circle of the doctors of sorcery, חזאר רבאניא,[126] and to the use of wax, קירא, both in 39: 7 (*q. v.*). The סרני of 7: 11 (*q. v.*) and the גרגלי of Pognon B, no. 27, may be explained like חזאר = circles. The זיפי of 7: 13 (*q. v.*), entered between the "arts" and "bowl," may be the hairs of the victim as used in magic.

[123] The museums of antiquities possess many such necklace charms, which are often composed of stones of the shape of a drop or an eye—prophylactic against the evil eye? See for example, the illustrations to the art. "Amuletum" in Daremberg and Saglio, *Dictionnaire des antiquités grec. et rom;* Elworthy, *The Evil Eye,* fig. 21. For the use of stones in Babylonian magic, see the 3d tablet of the *Labartu*-series and Myhrman's note thereon, *ZA,* xvi, 151; cf. Jastrow, *op. cit.,* i, 338, and Thompson, *Semitic Magic,* p. lxiii. In Syriac חומרא is also used of the joints of the vertebra = the *sappu* of the ass as prescribed in the *Labartu* texts. With this cf. the prescription of *parvum asini freni anulum in digito portandum,* Cyranides ii, 15. 6, ed. Mély and Ruelle, *Les lapidaires grecs,* Paris, 1898, quoted by Tambornino, *De ant. daemonismo,* 83. The mystical properties of stones in Egyptian lore is well known, and they were associated with the metals and planets; see Berthelot, *Les origines d'alchimie,* Paris, 1885, 47, 218 ff., etc. For the use of stones and bones as prophylactics against the evil eye, see Seligmann, *Der böse Blick,* ii, 24, 141 ff. For Hellenistic references and bibliography, see Abt, *Apuleius,* 115. Buxtorf and Levy, in their dictionaries, *s. v.,* and Grünbaum, *ZDMG,* xxxi, 263, understand these charms as pearls or corals.

[123] Cf. the *λίθος μάγνης πνέων*; see Abt, *op. cit.,* 115, 121, and n. b. the *baitulia* described as *λίθοι ἔμψυχοι* by Philo of Byblos, Eusebius, *Praep. evang.,* i, 6.

[124] Once, as though misunderstood, masculinized. אנקי, 12. 9; also אנקתא.

[125] For these articles see Krauss, *Talmudische Archäologie,* i, 203 ff.; Blau, *op. cit.,* 91.

[126] For the Babylonian ideas of the virtue of the circle, see above, § 8. Choni, the famous rainmaker in the Talmud, was called המעגל, the circle-drawer, because of his use of this device, *Taanith* 3: 8; see Blau, *op. cit.,* 33. According to Joel, *op. cit.,* i, 33, Choni was an Essene, but he appears to have stood in good repute with the orthodox.

To that very malignant potency, the Evil Eye—Nature's endowment of sorcery—there is comparatively little reference in the bowls, although in the later magic of East and West it is often the chief, if not the sole object of exorcism.[127] The longest pertinent passage in the Nippur texts is 30: 3 f.: "the eye of man or woman,[128] the eye of contumely, the eye that looks right into the heart." By the word רמאוא Pognon, B, p. 41, thinks is meant one who casts the evil eye. Or from its idea of "beckoning" may it be connected with the malicious "putting forth of the finger," e. g. *Is.* 58: 9 and cf. possibly Code Hammurabi, § 123. Grünbaum is doubtless right in holding[129] that among the Jews the evil eye was of a different character from the western Jettatura, referring rather, as also in the Old Testament (cf. also *Mt.* 20: 15), to the moral powers of envy, hatred, and so forth; the evil eye is rationalized and moralized. Wellhausen also notes the connection of the evil eye and envy in early Arabian thought.[130]

(3)

We come now to those objects of exorcism which to modern science and "common sense" appear as natural physical or psychical maladies, but which ancient thought regarded as actuated by demons, even to the extent that the malady in question was personified as an evil spirit. It is a question how far we have in this phenomenon the survival of ancient animism which peopled the universe with spirits good and evil, and how far in the *fin de siècle* magic of these bowls we have the result of a (poetical?) personification of evil which comes to be taken as real by the superstitious mind. The ancient demonology survives but it is reinforced by the hypostatizations and personifications of the play and fancy of the later mind, working sometimes in the field of a worse superstition, sometimes at the service of the free and philosophic imagination.[131] In the Old Testament the Word, the

[127] For Talmudic notions, see Blau, *Zauberwesen*, 152; Joel, *Aberglaube*, i, 74.

[128] A Palestinian amulet published by the writer in *JAOS*, 1911, 281: "from the eye of his father, mother, women, men, virgins .... ailment and shame and spirit and demons."

[129] *ZDMG*, xxxi, 260 f.

[130] *Reste arab. Heid.*, 143.

[131] Cf. the issue of the Platonic Ideas into the Gnostic Aeons.

Spirit of Yahwe, even his Sword (*Am.* 9: 4, cf. *Gen.* 3: 24), are personified; the evil spirit of Yahwe (1 *Ki.* 22) becomes in the end an evil spirit antagonistic to its origin; the sevenfold gift of the Spirit in *Is.* 11, 2, Greek text, issues in the Seven Spirits about the throne of God, *Rev.* 1: 4. And so the Chariot and the Wheels and the Beasts that accompany God's theophany came under the same treatment of mystical personification.[132] It is a similar phenomenon that we find in the Testament of Solomon; the seven demons brought to book by Solomon give their names as "Deception, Strife, Battle," etc. or the thirty-six elements (στοιχεῖα) are hypostatized into moral essences;[133] and in the same manner the Church personified the Seven Deadly Sins, which the Protestant Spenser dramatized in his perfect poetry. For various psychological reasons there was an increasing multiplication of the evils against which exorcism might be practiced; not only specific demons, like Tiu the Babylonian fiend of headache, but diseases under other names, and social evils such as enemies, loss of property, shame, might be exorcised. Probably the more intelligent man regarded this as a rational substitution for the elder demonology, while to the superstitious it merely meant more demons. At all events in the later magic we find more of the hypostatization of natural ills—how seriously it is to be taken is not always certain, and their commonplace names are simply given, whereas the old Babylonian magic would name the demoniac germ of the malady. Hence in our lists of exorcised ills we have in addition to the actual devils, already catalogued, series of evils which are somewhat on the borderland of diabolology. The old exorcisms still are effective but the old demonology is not ample enough; a man wants to exorcise headache, while he may be skeptical as to the existence of Tiu. Probably too as the exorcist ("medicine man") was also the physician, and medicine was born out of magic rites. we may observe in the naming of the actual maladies an intrusion of the rational spirit.[134]

[132] So the "thrones, dominions, principalities, powers," of Paul (*Col.* 1: 16); not only Gnosticism worked out this line of thought but also the Church took this heavenly hierarchy seriously.

[133] *JQR*, ix, 24, 34. So in Hermas, the vices of the tongue are called δαιμόνια (καταλαλία, etc.) *Mand.*, ii, 2: 3; cf. v, 2: 7; xii, 2: 2.

[134] *Aḫḫazu* becomes the name of a certain fever (a "yellow" fever), Küchler, *Beitr. z. Kenntniss d. ass.-bab. Medezin*, 61. N. B. the assignment of the several

In the Babylonian we find cases in the magical texts of the summarizing of specific maladies along with the demons. A long and interesting example is presented by Jastrow.[135] The series is introduced by a list of physical ills—contortions, broken limbs, affection of liver, heart, gall-bladder, etc. Then follow the evil eye, curses, calumny, etc., and then certain named demons; the text is an interesting predecessor of our inscriptions except that it places the maladies first. Is this the consequence of a rationalistic tendency? In the texts published by Küchler we find semi-magical prescriptions for diseases alone.

The New Testament gives a first-hand insight into the popular demonology of a representative portion of the oriental world at the beginning of our era. We find there devils of dumbness and deafness and blindness (*Mt.* 12: 22,*Mk.* 9: 17, etc.); one woman had "a spirit of infirmity," *πνεῦμα ἀσθενείας*, *Lu.* 13: 11; Simon's mother-in-law was seized with a great fever and Jesus rebuked the fever, *ἐπετίμησεν*[136] *τῷ πυρετῷ*,[137] even as in another case he rebuked the wind. And Jesus gave his disciples power "over unclean spirits to cast them out and heal every disease and every malady," Mt. 10.[138]

In the Egyptian magic there is the like identification of diseases with demons,[139] and the Greek magical papyri are full of it. Cf. the title of a charm given by Wessely, *φυλακτήριον σωματοφύλαξ πρὸς δαίμονας, πρὸς φαντάσματα, πρὸς πάσαν νόσον καὶ πάθος*,[140] So in the samples of Syriac charms published by Gollancz[141] we have the same summarization of "all manners of diseases" along with the demons, e. g. p. 79: Exorcised, etc. be "all demons, devils, phantoms, every practice, all temptations, unclean spirits, cruel dreams, dark

demons, *asakku, namtaru,* etc., to the different parts of the body, head, throat, etc.; Myhrman *ZA,* xvi, 146.

[135] *Rel. Bab. u. Ass.,* i, 367 ff. As Jastrow says, we gain here "a further insight into the connection between the medical calling and that of the exorcist." Other examples, Thompson, *Devils,* i, 17, 145, etc.

[136] = Hebrew גער.

[137] An angel *ἄγγελος*, of fever, *et al.,* appears in Byzantine charms; see Reitzenstein, *Poimandres,* 19. It is the Rabbinic איסרא, discussed above, n. 112.

[138] See at length Conybeare, *JQR,* viii, 583, etc.

[139] Cases cited by Budge, *Egyptian Magic,* 206 ff.

[140] xlii, 39, l. 589.

[141] *Actes du 11ième Congrès des Orientalistes,* Section 4, 77.

apparitions; fear[142] and trembling, terror and surprise, dread, anxiety, excessive weeping; fever-panic, tertian fever, all kinds of fever, febrile ills, inflammations, etc.; when a child troubles its mother with pains of travail;[143] tumors, pestilences, ... all pains and all sicknesses, all wounds and all oppositions, surprises, revenges .... the nine sicknesses," etc. And Vassiliev has published a number of Byzantine charms directed especially against specific diseases,[144] the first of which is a general panacea: *ὁρκίζω ὑμᾶς πάντα τὰ ἀκάρθατα πνεύματα, ἢ βασκανία, ἢ φαρμακεία, ἢ φοβερισμὸς, ἢ φρίκη, ἢ πυρετὸς, ἢ ἐπίβουλον, ἢ συνάντημα*[145] *πονηρὸν, ἢ νοσερὸν, ἢ κωφὸν, ἢ τυφλὸν, ἢ ἄλαλον, ἢ σεληνιακὸν, ἢ μηθεις* (*sic*) *θάνατον, ἢ ἀλλοιούμενον, ἢ μορφούμενον, ἢ ἄρσεν, ἢ θῆλυ, ἢ νοσημάτων* (*sic*).[146]

The most common of the demoniac categories bearing upon physical maladies are those with the general significance of "stroke, plague": נגעא especially epidemic disease, שובטא; פנעי, and n. b. פנעית 16: 10; מחותא, Mand. מחיתא; שיט (שוט?) 34: 10, 39: 4;[147] also the חססא, "sufferings."[148] Cf. *Ps.* 91: 5, a psalm and a verse which the Jews regarded as a valuable phylactery, and *Ps.* 89: 33. The שיקופתא treated above may be included here, = *ῥάπισμα*.

It is a minority of the bowl inscriptions which refer to special diseases. Of our texts Nos. 11, 16, 24, 29, 34, are of this character; so also a clause in Lidzbarski 5; lists of diseases appear in Wohlstein 2422, apparently mostly cutaneous affections,[149] and at the end of Schwab G.

[142] Fears are a frequent object of exorcism in the Greek magic, e. g. Wessely, xlii, 64, l. 25, and collation of the subject by Tambornino, *De ant. daemonismo*, 58, 65 f.; see also Dieterich, *Abraxas*, 86 f.

[143] This in earlier magic would have been ascribed to the jealous Lilith.

[144] *Anecdota graeco-byzantina*, i, 332.

[145] Cf. Dieterich, *Abraxas*, 196, l. 21, etc.; explained by Pradel as of a demon's occurrence, *Süd-ital. Gebete*, 96. So in Schwab G, קריתא, and cf. use of verb = קרא.

[146] For a survey of the Hellenistic personifications of disease, see Tambornino, *op. cit.*, 62 ff.; e. g. insanity = *Mania; Febris*, etc.; also see Reitzenstein, *Poimandres*, 19, Wendland, *Die hellenistisch-römische Kultur*, 125.

[147] Cf. the prayer of the Bishop Serapion directed against *πᾶσα πληγή, πᾶσα μάστιξ*, ... *ῥάπισμα*, in Wobbermin, *Altchristliche liturg. Stücke*, in *Texte u. Untersuchungen*, N. F., xvii, 2, p. 13.

[148] The חסאתא, Schw. M: 17, right after "arts" and before אשעם ביש may refer to tortures inflicted by magical operations.

[149] See Fränkel's criticism of readings, *ZA*, ix, 308.

We find listed general names of diseases, e. g. מארעין, כיבי, כורהני קשיי; a large number of cutaneous diseases: חרסא, חפפותא, חכרכה, חזיזית, גרבא, חרסום;[150] a series in 24: 2: אישיתא, אונא, אזיתא, probably fevers. In Schwab G we read of איקדי (= Wohlstein, יקדי, "fevers"), חבלא, עלמא, אישתא and אישתא (neo-Syriac, malarial fever),[151] ערומא ("swelling"?), שחופתא ("consumption," Rabb. ישחפת) מי ביישי (?).[152] שערתא, 11: 2, is possibly "fever." The demons referred to in 34: 10 (*q. v.*) may be the spirits of cancer, tumor of the eye, dysentery, and in l. 13 palsy of hand and foot.[153] A long list of fevers is presented in the first of Gollancz's Syriac charms.

In the Berlin bowl 2416 Wohlstein reads a certain affection as וריר ביישתא, translating it "böser Fluss"; Stübe reads it וריד ב', interpreting it, by a desperate solution, as the sacrificial jugular vein which he supposes was used as a maleficent charm. Jastrow in his Lexicon gives both וריר and ירוד, = leucoma of the eye (again the same confusion of ד and ר as in the word ירורא discussed above),[154] The correct spelling is וריר and it is closely related to סנורים, "blindness," *Gen.* 19: 11, 2 *Ki,* 6: 18. The root is parallel to ברר "be clear, bright" (cf. the Assyrian);[155] the sense of blindness in connection with this root arose from the fact that the sun produces blindness (eye-diseases are most common in the Orient), or from the dazzling sensation suffered by those affected with certain optical diseases.

No. 29: 7 we have a characteristic magical prescription for a woman who is exorcised from the various categories of devils and charms (ענקתא)

[150] For these and the following terms, see Glossary C.

[151] A disease *ašû* in Assyrian, Küchler, *op. cit.,* 131, 197.

[152] Wohlstein, 2422: 20, dropsy or urinary affection? Fränkel (*ib.,* 309) cft. *Ḥull.* 105b, and explains as "water from which a demon has drunk." It may be the eye-disease known to the Jews as "water," see Preuss (cited in next note), p. 305.

[153] For the diseases in the Bible and Talmud see *Jewish Encyc.* art. "Medicine," and iv, 517 f. for demons of diseases, with bibliography, viii, 413 f.; noteworthy treatments that have since appeared are Krauss, *Talmudische Archäologie,* i, § 104, J. Preuss, *Biblisch-talmudische Medezin,* 1911 (with extensive bibliography), while Fishberg, *The Jews,* 1911, cc. 13-15, may be consulted with profit. Many of the medical terms in the bowls are not to be found in the Jewish literature.

[154] For this "Yarod" disease, see Preuss, *op. cit.,* 308. He notices also the eye-disease ריר, a form of our word, p. 310.

[155] The Talmudic formula against blindness, *Shabriri, briri, riri, ri, Ab. Z.* 12b, etc., is formed from this root.

and then from כיפסא, a menstruation malady (?); then are mentioned מבכלתא ובנתא דברא which are evidently the causes of feminine irregularities, followed by טומי, "pollutions" (fluxes?), and the בר ניפלא, probably epilepsy. In a badly arranged series in No. 16 we find (l. 9) the רוח כרי ונאלי, literally "the spirit (= breath?) of stench and asthma," i. e. of the foul or labored breath symptomatic of diseases (see *ad loc.*). In 11: 3 f., again a charm for a woman, after the list of demons appear עקרתא and תכלתא which we should translate "barrenness" and "bereavement," understanding them as personified.[186] But in the parallel Mandaic text of Lidzbarski's (see to No. 11) bereavement has become a Lilith (תאכלתא ליליתא, ת' = *takkâltâ*). Which is the original of these forms? In 34: 10 אבערן וקמתא might be rendered, "ugliness and distortion," with which compare the charms of the Greek youths in the papyri for health, good looks, etc.[187]

Another class of evils are those of a social nature. So poverty מיסכינותא, figures in 34: 12, but from two other passages we see that it is the hostile witchcraft that would effect poverty in the victim's life which is exorcised: אסרה דמ', "the genius of poverty," 16: 10, and Lidz., 4: תיפוק אקריתא אקתא ומ', where "distress" and "sickness" are epexegetical to "invocations." Again in 34: 12 is found an exorcism against all kinds of losses: זינא יצערי. חורסנא ותוכא in 7: 11 are troubles involving shame.[188]

We mark that the rationalization of maladies had not gone very far; the decadent Babylonians were satisfied with the exorcism of devils and witchcraft and avoided the diagnosis of diseases. For modern magical practice in this field see the collection of Jewish charms published by R. C. Thompson, "Folklore of Mossoul," *PSBA*, 1906-7. In these the spirits have fled, but the ancient magical practices remain effective.

[186] Cf. the constant personification in Greek magic of *βασκανία*.

[187] E. g. Dieterich, *Abraxas*, 197, l. 3.

§ 13. Propitious Angels, Deities, Etc.

In the Babylonian exorcistic system the beneficent gods and spirits were arrayed and invoked against the demons and ills that affected human kind. Jastrow gives a specimen of such an invocation of some twenty deities[1] and discusses at length these various lists and their orders.[2] In another example, given by Reisner,[3] fifty great gods, seven gods of destiny, 300 Annunaki of heaven and 600 of earth, are invoked. It is not inevitable then that we must go to Persian dualism to discover the origin of the Jewish angelology. Absolute monotheism with its desire that the one God be exalted alone broke down before the specious and alluring argument that there must be more who are with us than those who are against us (*2 Ki.* 6: 16).

It is to be premised that in many of our texts the religious element is very deficient; reliance is placed upon bans and formulas with often no reference to Deity or other personal agencies of friendly character. Those inscriptions in which such supernatural agencies apart from God are invoked may be divided into three classes, representing so many distinct origins. There are those in which the well known names and name-formations of the Jewish angelology appear; although, as remarked above, § 12, the word "angel" is not used in all cases in the usual Jewish sense (often = deity). Then there are the genii of the Mandaic religion, mostly with names of outlandish formation. And finally there are the invocations of evidently pagan origin in which deities are named, although unfortunately most of their names are obscure or perverted by the text tradition. Further these different elements are confused and what appears like a good Jewish text at times admits a pagan deity into its celestial

hierarchy—somewhat as the mediaeval Church came to canonize the Buddha.

(1) We need not dwell long upon the Mandaic genii. Pognon has given a survey of those occurring in his bowls,[4] to which may be added a few more from Lidzbarski's and my texts. Some of the names are patterned after the Jewish angelic nomenclature, e. g. עורפעיל (= רופאל), or have forms in *-ai*, e. g. בעודאי, ננחנאי, called "angels" (No. 38), or we find a name קאטריאוים patterned after the obscure Mandaic principles Piriawis and Sindiriawis. A number of the names are not found in the known Mandaic literature.[5]

(2) The angelology of the apparently Jewish texts and the angelic nomenclature are not as elaborate as we find in later Jewish literature, e. g. the *Sword of Moses*[6] or the *Sefer Raziel*,[7] the bulk of which consists of lists of angelic names.[8] The majority of our texts have no such names. The most common angels are Michael, Gabriel, Raphael. As a rule the names are formed in *-el*, although other formations appear and quite un-Jewish potencies are brought in as angels. Our texts stand on the borderland of Jewish angelology and not within its orthodox development.

Taking up first the known angels, we find that Michael does not have necessary precedence.[9] He sometimes appears in the first place followed by Gabriel, Raphael, Nuriel, *et al.* (e. g. Nos. 14, 34, Hyv.), but as often the order has Gabriel first,—Gabriel, Michael, Raphael (Nos. 7, 20. Myhrman, Wohlstein 2422, 2416), or Gabriel occurs without Michael (e. g.

[4] B, p. 93.

[5] In Ellis 1 the Mandaic genius Abatur is an evil spirit, and is classed among the ghostly spirits in Wohlstein, 2417: 6. N. B. the occurrence of this name as Abyater in an Ethiopic apocryphon, Littmann, *JAOS*, xxv, 28. Afriel, *ib.*, 29, is a form of Raphael, corresponding to the form occurring in the bowls; see Glossary A, *s. v.*

[6] Gaster, *Journ. Royal Asiatic Soc.*, 1896, and in separate imprint.

[7] Composed by Eleazar of Worms, 13th cent.

[8] See, in general, Schwab, *Dictionnaire de l'angélologie*, 1897 (in *Mémoires* of Academy of Inscriptions and Belles-lettres, Series 1, vol. 10, part 2). The Essenes laid great stress on the names of angels, Josephus, *Bell. jud.*, ii, 8: 7.

[9] See Lueken, *Michael*, 1898, especially § 4.

Nos. 10, 15).[10] The latter order is of course that of their appearance in the Jewish literature (Old Testament and *Tobit*). Other angels may precede these or occur without them. Aniel appears as the fourth in a tetrad (Wohlstein 2416).

The title peculiar to Michael in Jewish lore, the Great Prince, השר הגדול (*Dan.* 12, *Aboda Z.* 42b, etc.), appears in 5: 3, but without specific reference, and at the end of No. 7 in the list of angels, which in its occurrence at the beginning of the text names Gabriel first, Armasa is "the great lord"; so the application of the epithet is uncertain. In Hyvernat's text, which appears to be comparatively late, we find Michael's full glory expressed: "the mighty, the king, genius of the law" (גברא מלכא איסרא דאוריתא). In 34: 7 he is called the "healer" (אסיא), Raphael "reliever" (מדוליא), and Gabriel the "servant of the Lord." the title "healer" suggests that the frequent opening invocation, "In thy name, O Lord of salvation (אסותא), great Saviour (אסיא) of love," which is not a regular Jewish form of address to Deity, may refer to Michael;[11] but the supposition is not reinforced by the position Michael takes in these texts. In Wohlstein 2416 kabbalistic surnames are given to Gabriel and Michael, אלפסם and דמותיה (so W. would read), the latter, "likeness of Yah," corresponding to the later Jewish notions concerning Michael as almost θεὸς ἕτερος. Cf. the kabbalistic forms in 24: 4 (of angels?) and the group of seven barbarous names in Schwab M, Dalal, Salal, Malal, etc., presumably standing for the seven archangels.[12] Reference to the latter is made once, in the introduction to Stübe's text (= Wohlstein 2416) where exor-

[10] See for early precedence *ibid.*, p. 36 f.; e. g. in *Enoch* 20: Uriel, Rafael, Raguel, Michael, Sarakael, Gabriel. For Gabriel we may note that the Mandaeans gave him high honor, identifying him with Hibel—Ziwa (Norberg, *Onom.*, 33; Brandt, *Mand. Schr.*, 21), while they appear to have ignored Michael.

[11] Lueken, *Michael*, 11, 87: M. is price of love. For the epithet referred to, see notes to No. 3.

[12] Cf. the dictum of *Sefer Raziel* (quoted by Schwab, *Dictionnaire*, 7) that in divination it is necessary to pronounce the mystic names of the planets. Cf. a form of charm in Wessely, xlii, 65, where the seven angels are named in one column, and parallel to them two rows of barbarous mystical names, the first column containing varying permutations of the seven vowels; e. g. *αεηιουω χυχ μιχαηλ νυσευ*. N. B. the many mystical or magical names of the deities or "angels" in the Harranian philosophy; Dozy and de Goeje, *Actes* of 6th Congress of Orientalists, II, i, 297.

cism is made in the name of Metatron, Hadriel, Nuriel, Uriel, Sasgabiel Hafkiel, Mehafkiel,[12a] "who are the seven angels that go and turn around heaven and earth and stars and zodiac and moon and sea."[12]

In this last series Metatron takes the place that should be given to Michael. Metatron[14] appears earlier as one of the (six) archangels, in Targum Jer. to *Dt.* 34: 6: Michael, Gabriel, Metratron, Jophiel, Uriel, Yephephia. He is really a rival figure to Michael, springing from a different religious concept; Michael is an angel, the patron of Israel, hence the Angel, *par excellence,* the representative of deity.[15] Metatron is in origin an *idea,* Platonic, Philonic, however we may call it, produced by the necessity of a Demiurge, a "second god" between Deity and man.[16] It is interesting to watch the somewhat unlike histories of the rival ideas. Michael remains an angel, but Metatron becomes more and more a mystic being; he is associated with the Enoch and Elija legends, and his identity with these human beings may be described as an assimilation of them to Metatron or as his incarnation in them; he is both divine and human.[17] To the mystic, the kabbalist, such a figure is more sympathetic than the archangel (cf. the argument of the Epistle to the Hebrews!), and so he replaces or absorbs Michael. Hence he is described in terms like those given to Michael. Eisenmenger quotes (p. 396) a long list of appellatives: he is Prince of the Presence, Prince of the Law, Prince of wisdom, Prince of kings, etc. (cf. the titles applied to Michael in Hyvernat's bowl), while elsewhere (Eisenmenger, *ibid.*) he is called the Prince of the world, cf. the title "the great prince" discussed above in connection with Michael.[18] We may

[12a] Most of these names are plays on evident roots.

[12] For references and literature on the planetary angels see Lueken, *op. cit.,* 56; add Eisenmenger, *Entdecktes Judentum,* ii, 383 ff.; Bousset, *Religion des Judentums,* 315 ff.

[14] See Weber, *Jüdische Theologie,* § 37, and for origins of the idea cf. Bousset, *op. cit.,* 348.

[15] For the extremes to which this notion went, see Lueken, *op. cit.,* 36 ff.

[16] Both ideas are associated in Philo's mind; see Lueken, § 7, on the *λόγος ἀρχάγγελος* of Philo.

[17] For later legends see Eisenmenger, ii, 394 ff and the interesting critical discussion of this later (Gaonic) development of Judaism by Joel, *Der Aberglaube,* ii, 15 ff.

[18] Cf. שלימא ברא who stands before "the true God" in the pagan text of No. 19.

suppose that on the periphery of Judaism as well as in its esoteric circles the idea of Metatron would be especially acceptable to those who were not weaned from polytheism.

Comparing Nos. 3, 19, 25, we come upon an interesting identification. ארמסא, which appears in No. 3, is the Greek Hermes, more especially the Hermes of the mystic Egypto-Grecian theosophy (see to No. 3). He is the Word, etc. (No. 19) and in 25 : 4 f., is identified with Metatron.[19] Thus we have here a welding together of the esoteric Jewish Metatron and the equally mystical Hermes of Hellenism. Whether our magicians were aware what ארמסא meant, I know not and I doubt it. It gave them one more mystical name and combination.

Just as Hermes was dragged in, so other names or words were put in the category of angels or intermediate beings. So in 7 : 8 the invocation is in the name of Gabriel, Michael, Rafael, Asiel, Hermes, Abbahu, Abraxas,[20] And so with many terms in these invocations it is impossible to decide what we are dealing with (e. g. Agrabis, 17 : 4), whether a surrogate for a divine name, an intermediate being, a pagan deity, or perhaps a sorcerer's name. The expression "in the name of" was taken seriously only so far as the name was concerned; the name, the word, was the essential thing, not the prosaic object it stood for. The same phenomenon appears in the magical papyri. There we find now an exorcism in the name of Abraham, Isaac, Jacob, Jesus Christ (*χρηστος*) and Holy Spirit (*αγιος πνευμα, sic*)[21]—wherein the exorcist shows bad orthodoxy, whether as Jew or Christian; or again an incantation in the name of *ιαω θεου σαβαωθ θεου αδωναι θεου μιχαηλ θεου σουριηλ θεου γαβριηλ θεου ραφαηλ θεου αβρασαξ, κ. τ. λ.*,[22] where gods, angels and formulas are mixed up just as unintelligently as in the incantations from Nippur.

As for the minor angels most of them can be found in other Jewish literature, and reference for them may be made to Schwab's dictionary of angelology. Glossary A lists the angelic names in the bowls. In their

[19] So Michael was identified with Hermes, Lueken, *op. cit.*, 28, 78 (with reference to Hermes-figures bearing Michael's name).

[20] For some of the angel names in the papyri, see Lueken, *op. cit.*, 71.

[21] Wessely, Vienna *Denkschriften*, xxxvi, 2, 75, l. 1227.

[22] *Ibid.*, 144, l. 144. See above § 11.

formation they follow the general rule of making the first (verbal) element express the object desired in the incantation. Thus in the love-charms Nos. 13 and 28, the angels invoked are Raḥmiel, Ḥabbiel and Ḥanniniel.

(3) It is difficult to say how many of the bowls are Jewish; the presence of Jewish catchwords is not a sufficient criterion. I would call attention to a few of the Nippur bowls which are definitely pagan. Of such nature is the last one cited, No. 28, where along with the angel Raḥmiel appear the mighty (passionate?) Dlibat (a Semitic Venus) and [blank] gods. No. 19 has the longest list of invocations of apparently heathen deities. Only a few of them can be certainly identified. Hermes appears there, probably two words (masc. and fem.) representing the Gnostic Aeons (איבול, איבולית); Bagdana, "with 70 exalted priests," who appears as a demon (Abugdana) in the Mandaic bowls.[25] Other names have a very non-Semitic sound, and we can identify some Greek divinities: Zeus, Okeanos, Protogenos (see the commentary). Also we find angelic names, Aḳzariel, etc., and again Abraxas, and reference to the 60 gods and 80 goddesses. Yet the opening invocation is "in thy name Lord of Salvation," etc., who is also the "true God," l. 17.

Of peculiar interest is No. 36, in which the exorcist declares he has been empowered by certain deities: "The lord Šameš (sun) has charged me, Sina (moon) has sent me, Bel has commanded me, Nannai has said to me [blank], and Nirig (Nergal) has given me power." In quite antique wise the sorcerer (perhaps a priest, בומרא) professes to have received oracles. Apart from the striking parallels of the prophetic commissions in the Old Testament, we find the expression of like assumption by the exorcists in the Babylonian magic. Thus from the *Utukku*-series: "The sorcerer-priest that makes clear the ordinances of Eridu am I; of Marduk sage magician, eldest son of Ea, herald am I, the exorciser of Eridu, most cunning in magic am I";[26] again: "The man of Ea am I, the messenger of Marduk am I, my spell is the spell of Ea, my incantation the incantation

of Marduk."[25] Cf. also the *Maḳlu*-series: "The god and goddess have commissioned me, whom shall I send?," and, "I go on Marduk's command."[26] In our text we have doubtless one of the latest survivals of priestly exorcism in the old forms coming down from the *âšipu* priests of Babylonia; these forms doubtless were cherished long in the Harranian religion.

IV. HISTORICAL CONCLUSIONS

§ 14. Age of the Bowls

Very diverse views as to the antiquity of the bowls have been offered by students. It is unnecessary to consider the hypothesis of their pre-Christian origin.[1] Chwolson as an epigraphical expert submitted the texts he was acquainted with to a careful examination and believed he could assign them, by comparison of the scripts, to different centuries early in this era, from the second to the fourth or fifth. But epigraphical evidence in the case of a formed script like that of the square character is fallacious. Especially in the case of rude popular texts, in which antique forms of writing have survived, no certainty from epigraphy can be obtained. And in general a chronology obtained from epigraphy is most dubious; I may refer to the current opposing arguments over the Siloam inscription and the Gezer calendar tablet, or note the remarkably fluent, almost cursive script of the potsherds from Samaria, which only their certain *provenance* compels us to ascribe to the Omride age.

But most of the students would be inclined to place the bowls considerably later, between the fifth and ninth centuries, although rather by conjecture, from the impression made by the contents, than through positive proofs. Levy and Halévy thought, but fallaciously, that they could detect Arabisms, and were inclined to date the texts after the Arabic conquest.[2] Nöldeke would place Hyvernat's bowl not earlier than the eighth century, basing his opinion on the forms of the Persian names.[3] Schwab assigned his Louvre bowls to the fourth or fifth century.[4]

[1] See above, § 5.

[2] Levy, *ZDMG*, ix, 474; Halévy, *Comptes rendus*, 1877, 292, specifying more exactly, "vers le 9ième siècle."

[3] *Zeits. f. Keilschriftforsch.*, ii, 295.

[4] *Rev. d'ass. et d'arch.*, ii, 136.

It is evident that, in the case of a large number of texts coming from different localities and in most cases not observed *in situ*, it is impossible to take a datum from any one and so fix the chronology of the whole species. Magical literary forms are peculiarly persistent; we may think of the uncertainty as to the age of the Greek magical texts, in which, for instance, a Christian theological phrase may not define the age of the magical formula, can only give a clue to that of the particular document. And so our texts, copied and recopied as precious magical prescriptions, repeated possibly by laymen long after the special school of sorcery had ceased to exist, may have extended over a series of centuries. Some bowls may be considerably later than others, e. g. Hyvernat's with its reference to "Ispandas-Dewa the Jinn of Solomon," and Schwab's H and O composed of biblical verses.

Fortunately more certainty as to a unity of time can be had for the texts from Nippur. These were found by expert scholars *in situ* at certain noted levels of the ruins. While written in three different dialects and as many scripts, nevertheless the appearance of the same persons and families in the three classes tends to show that they all belonged to about the same age. We are not therefore to suppose a stratification of Judaic, Syriac, Mandaic layers, representing so many different ages or even distinct racial elements. Nor do the variants within the texts of the square script compel us to assign them to different ages; these are but calligraphic variations. There is every reason to place the Nippur bowls within rather a brief period, and if one or a few texts threw any light upon the chronology, we could place the age of the whole collection.

The provenance of the bowls from Nippur was described in § 1; they lay above the stratum of the Parthian temple. This building had been destroyed, was covered with sand, and upon the Tell settled small Semitic communities, Jews and Mandaeans, drawn to the deserted place probably by motives of religious community life. Indeed we may suppose that these bodies, separated from the main currents of their larger societies, made a practical use and profit out of their religious prestige in the preparation of magical texts. To speak more exactly of the archaeological conditions, in the "Jewish" houses discovered by Peters an upper stratum contained Cufic coins of the seventh century, a lower stratum only Parthian coins, Jewish bowls being found also in the latter. The lowest

dating then is the seventh century, on the basis of the Cufic coins, and this dating is to be pushed back, if it be modified at all, because of the ease with which small coins slip down through the soil. The archaeological evidence then for the *terminus ad quem* of our texts is the seventh century (probably its beginning), with a fair leeway back into the preceding century.

As I have said, the epigraphical evidence is a weak reed to lean on for chronology.[5] The only new fact I can bring to bear on this feature of the discussion is the novel Syriac script exhibited in seven of our bowls. I have discussed this script in § 6 and there came to the conclusion that it is an early type of the Edessene style of alphabet, a result corroborated by its identity with the Manichaean alphabet. But again this may be a case of survival; certain evidence from epigraphy is *nil*.

There remains the philological testimony. The "Jewish" Aramaic of the texts is just such as we find in the Talmud, and with evidently like dialectical variations; a few forms appear representing the "Palestinian" dialect, remains of which occur in the Babylonian literature. The Mandaic dialect is fully formed, and has exercised its influence, at least in spelling, upon the other two, the Rabbinic and Syriac. There are many words which can be illustrated only from the neo-Syriac dialects, or from the compilations of the Syriac lexicographers. But these words may be old and only by chance have failed to make their appearance in literature. Thus the late Syriac form ʿnwʾ "goat," is now found in the Elephantine papyri. The fact that a Persian word, e. g. *dastabira,* does not appear till later or is a *hapax legomenon,* is not proof of late age unless it can be shown to be of late Persian formation. Nor do I find that any of the proper names compel us to assume a late date. The majority of them are Persian, and do not, to one who is a layman in this branch of science and who must rely mostly upon the authority of Justi's *Namenbuch,* appear to be necessarily late, say toward the end of the first millennium.[6]

[5] It is impossible to make an epigraphical examination of all the bowls published, for in the majority of cases facsimiles are not given, or they are poorly made.

[6] Nöldeke's argument that the element *-duch* for *-ducht* speaks for a late age is not at all stringent for a Semitic dialect which would naturally abhor a termination in a double consonant; the Syriac texts have *-ducht*.

There is one line of negative evidence which is the only clue to a terminus *ad quem* which I can discover on this basis. Despite the variety of names, the list of which includes two Syriac Christian names (סעבריא ליעשו, בת סהדא) and a Greek name (טימאתאיז), also probable Indian names, there is none of Arabic origin. A pair of common nouns and the use of פ for the conjunction in two cases do give us etymological connections in that direction; but פ in this usage is found in the Senjirli inscriptions and the Elephantine papyri and is a spelling *ad aurem*—it is corrected in one of Schwab's texts. As for the two words גינא, Jinn, and שיק (and possibly שלניתא), I cannot grant that these loans must have taken place after the Mohammedan conquest, when sorcery was so eager to include every possible name of evil spirits (n. b. the adoption of διάβολοι) and inasmuch as the good Semitic word may long have been at home on the Arabian frontiers of Babylonia.

My consequent conclusion is that the Nippur texts should be placed in a period not later than the sixth or the beginning of the seventh century, that is, only as a terminus *ad quem*, approximately 600 A. D. The abandonment of the Tell of Nippur may have been caused by the Arabic conquest, which, as we may assume, ultimately drove away the Jewish and Mandaean settlers to other abodes, the latter to their recesses in the south (they were not, I think, recognized as one of "the peoples of a book"), the former to the towns. As for those texts from other quarters that appear to be later, they are but the continuation, which we should expect, of the magic of the elder bowls, and as I have noticed in § 2, towards the end, late descendants of the species.

If my conclusions from the data of the Nippur bowls are justified, they afford us one result of comparative value. While the great mass of magical, and more particularly Jewish magical literature, is known to us only in late documents,—we may but speculate as to the age of the *Sword of Moses*, the *Wisdom of the Chaldaeans*, the *Seal of Solomon*, the elements of *Sefer Raziel*—our texts are contemporary and authentic documents of the late pre-Islamic period in Babylonian history.

§ 15. Origins and Relations of the Bowl Magic

"Jewish incantation bowls" is the title that has been generally applied to our species of magical texts. It arose in consequence of the fact that the first bowls interpreted, as also the majority of those now known, are written in the script and dialectic forms of the speech of the Talmud, and withal appear preponderantly to bear the earmarks of Judaism.[1] The subsequent discovery of similar supplies of texts Mandaic in composition and contents, and now the presentation in this volume of a number of Syriac texts, enlarge our vista concerning the diffusion of this special form of magic among the races and faiths of Babylonia. Further, over against texts of whose Judaism there may be no reasonable doubt, we find a number which are out and out pagan, while the majority are certainly eclectic in their theological tastes. These observations require that we extend our study beyond the domain of Judaism to discover the relations of these bowl-texts to the general field of magic, as we know it for the first centuries of the Christian era, and to the earlier strains which entered into it. What are the historical connections of our texts, and what light do they cast upon the religious or spiritistic thought of cosmopolitan Babylonia in the age of the Sassanian empire?[2]

In the magic-wild age at the beginning of our era, the Jewish magic was recognized as one of the three great schools of sorcery, along with the Chaldaean and the Egyptian. The Jews had inherited the rites and notions of primitive magic from the Arabian Hebrews and from ancient Canaan; despite the severity of an ethical monotheism, which throughout

[1] Hence our rude and vulgar texts are of philological importance as almost the only early contemporary documents of these dialects.

[2] The analogies have been set forth in the preceding sections; in the following paragraphs I can only speculate on the genealogical relations. Cf. Deissmann, *Light from the Ancient East*, 261, n. 2.

its growth had placed a unique ban upon the practice of sorcery, this feature nevertheless survived. While the Second Isaiah is deriding the sorceries of Babylon and exposing their helplessness (c. 47), we have stray glimpses of the persistence of ancient rites closely akin to magic, which still claimed the adherence of renegades (*Eze.* 8; *Is.* 65, 66). In the Book of Tobit are given magical remedies for the expulsion of foul demons with the concurrence of angels; Josephus tells of his sorcerer who could pull the demon out of the nose of the possessed with a root indicated by Solomon.[3] The New Testament gives the first extensive and intimate picture of the magical conditions in Palestine; "If I through the finger of God cast out devils, by whom do your sons cast them out?"—inquires Jesus. In *Acts* we read of well-established sorcerers who bewitched the people and even Gentiles in foreign parts, a Simon Magus and Bar-Jesus Elymas. But apart from the hoary forms of Mezuzoth and Tephillin and some mortuary charms,[4] our first literary specimens of Jewish or Judaizing magic are found in the Greek papyri of the Christian age, and there how much is Greek and how much Jewish we know not. Here appear various forms and anagrams of the Ineffable Name, quotations from the Scriptures, historical references to Solomon and especially to Moses,[5] who came, as the great mystagogue and magician, to be identified with Hermes-Thoth, and was regarded as the teacher of Orpheus.[6] He is made the author of a Hermetic book, through and through Egyptian and Hellenistic, entitled the Eighth Book of Moses, as a continuation of the Pentateuch, which Dieterich has published at the end of his *Abraxas*. Blau and Deissmann have published a delicate erotic charm, composed in true Greek spirit, and yet the former may be right in claiming its phraseology as preponderantly Jewish.[7] In which direction was the give and take, what were the connecting links? Dieterich would find in the Essenes and Therapeutae the bond between

[3] *A.J.*, viii, 2, 5. For a survey of Jewish magic and a large bibliography, see Schürer, *Gesch. d. Jüd. Volkes*, § 32, vii (ed. 3, iii, 294).

[4] See H. Vincent, "Amulette judéo-araméenne," *Rev. bibl.*, 1908, 382. (with ample bibliography), and Montgomery, *JAOS*, 1911, 272.

[7] See notes to No. 28.

Jewish and Hellenic magic.[8] But just wherein lay the peculiar type and particular contribution of Judaism to the world's magical faith, we do not know, for the reason that we have no early magical documents of unimpeachable Jewish origin. And if we possessed documents from the Palestinian life of the Hebrews, how far even then could we decide what was specifically Hebrew and not Canaanitish or borrowed from the spheres of culture to the east and west? What different origins are assigned by the commentators to the occult practices described in Eze. 8.[9]

When we pass to the eastern home of the Diaspora we have that marvellous encyclopaedia, the Talmud, with its glimpses into the common life of the people as well as into the discussions of the schools; magic holds its sway more or less over all, and its existence, if not its legality, is confessed by the spiritual masters, who, if we may contrast successively Mishna, Gemara, the Gaonic period, with one another, came more and more to recognize and legitimatize the practice of magic.[10] We catch in the Talmud and the subsequent authoritative literature some of the magical phrases, learn something of the practices and beliefs in demons, mark the superstitious fears of the people of Babylonia, of the Jews as well as of their neighbors.[11] Our bowls and their inscriptions are rude and unlovely, with none of the sombre dignity of the Babylonian incantations, or of the often lyric beauty of the Greek magical literature;[12] but these bowls are of prime interest as giving us for the first time extensive texts of the eclectic Babylonian magic of the first Christian millennium. They are degenerate successors of the elder incantations of the land, yet they are autograph evidence of the superstitions which Talmud, with caution, and Eisenmenger's *Entdecktes Judenthum,* with malice, reveal, and are precursors of that sea of magical literature which has come down to us under Jewish auspices.

[8] *Ib.,* 137 ff.

[9] See Kraetzschmar, *ad loc.*

[10] See Joel, *Der Aberglaube,* the sections C, D, E (pt. 1, pp. 55, 64; pt. 2, p. 2) for this comparison. For the Talmudic teachers who allowed and practised magic, see Blau, *Das altjüd. Zauberwesen,* 26, 54.

[11] According to Blau, pp. 23, 84, the Babylonian Jews were far more addicted to magic than the Palestinians.

[12] Cf. the noble Hermetic hymn of creation, the "holy word" in the Eighth Book of Moses, in which "God smiled seven times," and each smile was an act of creation; Dieterich, p. 182.

And withal they give a sample of the medley and fusion of peoples and religions in the land which the Jews had long since called Confusion.

The order of the day is to Babylonize, and our evident line of primary investigation is to discover the relationships of the bowls with the ancient Babylonian magic, the literature of which in the last decades has been published in large quantities by the most distinguished Assyriologists.[13] My notes to the texts and the Introduction show how apparently numerous are the connections between the object of our study and the magic of Babylonia. While there is only one instance of the specific bowl praxis in that earlier literature,[14] still its method of defixion is quite congruous with the ancient magical operations. As of yore, the sorcerer appears as the commissioner of Deity or of the gods (§ 9); he follows definite and repetitious formulas, similar to the Babylonian *šiptu* (§ 11). He invokes most frequently, or at least primarily, one chief god, "the Lord of love and healing," just as the Babylonian called on Ea or Marduk, but, as in the elder incantations, other gods or their angelic equivalents are invoked in large accumulation (§ 13). Most striking in the correspondences is the registration of the devils, black arts and maladies to be exorcised; as in the Babylonian, so in our magic these are specified in long detailed lists (§ 12). In fact our spells far outdo the Babylonian repetition of the seven classes of evil spirits. In the Mandaic texts the terror of the witches appears, in others the evil charm is reversed upon the head of the sorcerer, all as in Babylonian magic. Rites and words and the instruments of magic, which are personified, are as much the object of detestation as in the *Maḳlu*-series. Diseases and all human ills are inspired by devils, indeed are devils and are treated as personal essences. The magician's ban, the spell of the mighty god, is laid upon them all, and they are forthwith assumed to be "bound," and "tied," as in older days when simulacra sacramentally sealed the operation. Even the quotation of Scriptures and references to sacred legend have their parallels in the Babylonian incantations, which used the ancient myths as potent charms (§ 11). It is unnecessary to proceed further with the summary of general correspondences, but enough has

[13] See for the literature, Jastrow, *Rel. Bab. u. Ass.*, i, ch. xvi, and his *Religious Beliefs in Bab. and Ass.*, 296 ff.

[14] See p. 43.

been noticed to dispose our minds to the dictum of Zimmern:[15] "Diese (the incantation bowls) im Ausdruck oft überraschend an die alten babylonischen Beschwörungen erinnernden jüdischen Beschwörungstexte, bei denen unter den mit Namen angeführten bösen Dämonen auch Lilith häufig erscheint. liefern in ihrer Weise ebenfalls den Beweis für nachhaltige Einströmen babylonischer dämonologischer Vorstellungen in das Judentum."[16]

Yet the implications that may be drawn from this judgment, even if not intended by the writer, are open to criticism. In the first place, as observed in the preceding sections, similar correspondences with the Greek magic are to be noted in almost every instance. This fact compels us to recognize the possibility of eclectic as well as of immediate Babylonian influence upon the Jewish magic. And then, secondly, marked differences exist between the fields, changes in the center of gravity, omissions, accretions. There still remains a large degree of substantial reason in the opinion earlier expressed by Nöldeke, surveying the material from a different point of view: "Die Verbindung mit altbabylonischen Aberglauben dürfte also ziemlich lose sein."[17] The study of magic is still in its beginnings, and students are too prone to find a genetic relation when we have to bear in mind that we are dealing with parallel workings of the human spirit operating in a universal and amazingly uniform field, while at the same time, particularly for the age when Hellenistic culture was dominant, we must give allowance for the interfusion of factors geographically most distant.

Of the old Babylonian names of demons, only two appear in our texts, the *šedu* and Lilith (with its male counterpart), but these, if originally Babylonian, in ancient times had pervaded the Semitic world. The *utukki limnuti* are the רוחין בישתא, "evil spirits," but these have their biblical precedent.[18] The Babylonian vocabulary has been suppressed by genuine Semitic words. The extensive praxis of the Babylonian has also almost disappeared; the inversion of the bowl, some rudely scrawled designs, and

[15] *KAT*³, 463.

[16] The actual adoption by the Jews of Babylonian magical rites is portrayed in *Eze.* 13: 17 f.

[17] *Z. f. Keilschriftforsch.*, ii, 297.

[18] The שלניתא may be Babylonian, see to 8: 2.

one or two magical prescriptions[19] are all that remain in our texts of the elder practice. The use of the bowl in a love-charm has its parallel only in the Hellenistic κατάδεσμος or *defixio,* likewise buried in the earth. The sorcerer invokes the names of ancient masters (as in the Greek magic again), he no longer is professionally independent like the *âšipu* priest; even laymen borrow and lay the spells. The mere "word" or "name" has replaced the practice; in the Babylonian magic the gods were prayed to for their assistance, and we often question whether we are dealing with magic or religion; here their or the angels' names are simply used, and these are sufficient to invoke their potency, without appeal to the heart or mind of a living deity. The use of a word like Abraxas illustrates the extreme consequence; if a deity can become a name, so a word can become a deity—*numen nomen!* The formula "in the name of" can be used before letters and phrases as well as before divine names. At first sight this name-magic appears more spiritual; it actually proves to be more absurdly mechanical, because it invokes a binding of the gods and heavenly powers by a cheap and easy formula without any of the "service" of the gods, with litany and priest, which the elder rites prescribed.

There is thus a change in the spirit of the magic. The old Babylonian was religious in his incantations; it is only in the so-called medical texts that we find the passage from the religious sphere to that of entirely mechanical operation, which may issue either in empirical science or in absolute magic. The sense of sin lay heavy upon the Babylonian devotee, he needed to dress in sackcloth and wallow in ashes, while the incantation required rites of purification and confession of sins in pathetic and ethical litanies.[20] But any such religious element is entirely wanting in our texts, apart from the stereotyped introductory formula, "Lord of healing, Lord of love" and two obscure, probably traditional references to sin and guilt.[20a] We have in a word a purely magical system, that is, one whose efficacy consists in doing or rather saying certain things without a prayer or lustration or confession.

[19] See Nos. 12, 13.

[20] Cf. the "confessional" in the second tablet of the *Šurpu*-series.

[20a] See p. 86.

It may be further noticed that in the use of the Jewish Scriptures, which is very scanty, the passages of real religious import are not employed (§ 11). This is especially true of the Nippur texts, and often all that we have reminiscent of the Bible or of religion are the stereotyped Amens and Halleluias, common property of the magic of the age. Along with this unreligiousness of the magic goes a certain impression of impersonality throughout; there is a general lack of reference even to personal sorcerers; attention is paid to the operation of witchcraft, regarded itself as a potentiality, and the mechanical danger is met by mechanical means.

In these differentia from the old Babylonian magic we find much that is apparently or evidently Jewish, and again some factors that are not so categorically explained. We may think that the comparative absence of magic rite is due to Jewish influence, as also the large use of name-sorcery. The cultless condition of the Jews since A. D. 70 and the long previous term of six centuries in which the official cult was confined to one sanctuary, must have incapacitated the Jew for the rites of the magician. He dared not make simulacra, many practices were out of question because of their evidently heathen associations ("the ways of the Amorite"). But he had a holy book made up of sacred words, and a god unlike any of the pagans, who might not be seen, who once had spoken (*Dt.* 5), and who in lieu of images and many sanctuaries was revealed in his Names.[21] And so holy words and names became the province of the Jewish sorcery. His religion, when it passed out of the naturalistic or the ethical sphere, found its outlet in logology, in Rabbinism with its logomachies, in magic and kabbalism with their manipulation of words and letters. Even the angels, which were imported as a kind of humanizing mythology into Jewish monotheism, came to be but plays on roots, invocations of the attributes or activities of deity, so that finally angel was merely synonymous with charm.[22]

In these particulars the Jews may have contributed to the later Mesopotamian magic, as well as to that of the Hellenistic world. In our bowls we find Jewish families as the clients, and in the Nippur collection there is a frequent reference to the venerable Jewish master, Joshua b. Perahia, as a revealer of heaven's mysteries; but as he appears also in the

[21] Kabbalism appears as early as the present text of *Ex.* 3, 14.

[22] See § 12, n. 112.

Syriac bowls, which are probably of pagan origin, he may have already become a common traditional figure like Moses in the papyri. Nippur had been since the Exile a center of the Jews,[23] and in Talmudic times it lay just east of the famous Rabbinic school at Sura, between which and Pumbaditha to the north of Babylon the spiritual life of Babylonian Judaism circulated.[24] But Nippur does not appear to have remained a Jewish seat of importance. It is mentioned but once in the Talmud,[25] and the settlement which the Pennsylvania expedition unearthed on the top of its ruins was, at least so far as the bowls testify, a mixed folk, among whom the identical magic flourished under Jewish, Mandaic, pagan forms. This interchange of magical property precludes us from specifically speaking of many texts as certainly Jewish, even while we recognize numerous Jewish elements. It is interesting to observe that the Mandaic texts are truer to the theology of the sect than many of the so-called Jewish bowls. The Jewish magic here in Nippur, as elsewhere, was eclectic. The religion of the Jew cannot admit that it itself is eclectic, and the self-consciousness of the intelligent orthodoxy in rejecting or at least minimizing magic as part of the Jewish system, approves itself when we study our specimens of magic; their science is as much cosmopolitan as native.

I pass now to another clue for the origins of the bowl-magic. I have discussed under No. 3 the frequent references to the genius Armasa, who is identified with Metatron and called the Word, and is none else than the Hermes of the Hermetic theosophy. No. 28 is a magical philtre for a lovesick wife, the terms of which find their closest correspondence in Greek charms; No. 19 names a number of deities, among whose obscure names we can identify Zeus and Okeanos, and perhaps the names of the Aeon-pair. There are other clues of connection with the Greek magic, discussed in the Introduction and the texts; I may refer especially to the

[23] For the river Chebar hard by Nippur, the Kabar of tablets found by the Pennsylvania Expedition, see *BE*, ix, plate 84, l. 2. For the names of the numerous Jewish settlers there see Clay's Murashu texts and his summary in *Light on the Old Testament*, 404, also S. Daiches, *The Jews in Babylonia in the Time of Ezra and Nehemiah according to Babylonian Inscriptions* (Publication no. 2 of the Jews' College, London).

[24] See S. Funk, *Die Juden in Babylonien*, Berlin, 1902, ii, 153 (with no reference to Nippur).

[25] *Yoma* 10b, identified with the biblical Calneh

identical pharaseology in the choice of a certain day out of a month and a year as auspicious for working the charm.[26] Such terms as Abraxas direct our thought to the great western world and the imposing magical fabric of Hellenism.[27] And this system directs us to Egypt.

I have spoken of the permutations made on the Sacred Name as typically Jewish. And yet there was another people which equally cultivated the mystery of ineffable names, a people older than the worshippers of Yahwe, the Egyptians.[28] The Jewish development in this regard was hardly independent of Egypt. However this may be, we find in the Greek magical texts the fusion of the two theosophies, the Jewish Ineffable Name, with all its vowel permutations, and like sacred titles, Sebaoth, Adonai, etc., mixed pell-mell with those of Egyptian origin. And further the accumulation of barbarous syllables, such as appear in our texts, has no known tradition behind it hailing from the Jewish and Babylonian theologies; it must be traced back to the Egyptian magical science.[29] This phenomenon

[26] See p. 55.

[27] The recent rapid development of the study of magic and the increased application to the magical papyri have aroused in various quarters the question concerning the nature of the Jewish magic and its relations to that of the Hellenistic world. This investigation appears to have been first broached in a critical way by Blau (pp. 37 ff., 96 ff.), followed by several writers whose works have been constantly cited in the above pages: Dieterich, Deissmann, Conybeare (who considers the *Testament of Solomon* to be of Jewish origin), Gaster (in introduction to his *Sword of Moses*), Reitzenstein, Heitmüller, Wendland. Our specimens of magic hail from the eastern confines of that world, even from beyond its political borders, and are speaking proofs of the eclectic and cosmopolitan character of Hellenistic magic.

[28] Budge, *Egyptian Magic*, ch. v; Erman, *Egyptian Religion* (1907), 154. For the influence of Egypt in the Hellenistic magic, see the excursus in Heitmüller, *"Im Namen Jesu,"* 218.

[29] In addition to the observations in § 11, see Budge, *l. c.*; Wiedemann, *Religion of the Ancient Egyptians* (1897), 268, quoting Synesius's words: the Egyptian "mumbled a few unintelligible syllables"; also his *Magie u. Zauberei im alt. Ägypten* (1905), 32. The Greek papyri are faithful repeaters of this Egyptian art.—Stübe, remarking on the kabbalistic use of letters (p. 54), thinks that here we have traces of the passage from the Talmud to the beginnings of the development of the Kabbala. But as of Egyptian origin or kinship, the use is not to be dated by the Kabbala. It existed on the periphery of Judaism long before it was taken up by the Jewish doctors. Indeed Chwolson (*CIH*, col. 115) denies any special relation of these texts to Talmudic ideas (against Lenormant, *Essai*, i, 212, who held that our magic was a product of the Babylonian academies). Wohlstein was the first to observe the eclectic character of our magic, *ZA*, viii, 316 f. In matter of fact hardly a trace of technical Kabbalism is to be found in them.

is continued and flourishes with abandonment in the Greek papyri, and there again this form of magical spell falls in with the Jewish currents.

This Egypto-Hellenistic magic is one of the prime sources of our texts, and the impression made upon me in my study is that they resemble much more this form of magic than that of ancient Babylonia. The beginnings of this invasion of western sorcery into Mesopotamia may have begun with Alexander's armies; there can be little doubt but that pervasive Hellenism soon domesticated its magic, as everything else Greek, wherever it settled. It doubtless was reinforced in its development on Babylonian soil by the Hellenistic Jewish magic that had grown into luxuriant life on the theosophic soil of Egypt and thence sent forth its waves of spiritual energy to all the homes of the dispersed race.

It is difficult in the field of magic to decide which is cause and which effect, for the spirit of magic produces like fruits spontaneously everywhere. Our bowl sorcery is connected doubtless by many lineal bonds with ancient Babylonia, but it shows as unmistakable links with the Hellenistic magic, to which the Jews contributed, and from which they received still more. The problem of these texts is the same that confronts us in speculation over the Greek magical papyri. Who wrote these? Egyptian, Jew, Greek, Christian, Gnostic, all contributed each one his magical names, mysterious formulas, bits of sacred history, each outbidding the other in the effort to attain the same ends and arriving at an indistinguishable limbo of monotonous sameness. The texts were written for all who would use them, and those who received their magical traditions adapted them to the changing fancies of age and clime.

Our texts exhibit a like eclecticism. Babylonian, Jewish, Mandaic, Gnostic, Hellenistic, and indirectly Egyptian, elements are there, in various combinations. The Jew contributed a certain quality of monotheism and made it palatable by his angelology; his Divine Name, his Scriptures and apocrypha and liturgy, were storehouses of magical lore. All this was fused with like elements from parallel sources, and the product was useful to any body of magicians, even as it was in demand on the part of every class of clients, pagans, Persians, Jews, Christians, every kind of sect. And what is true of our texts is true of all the Jewish magical literature.

The bowls then are not so much illustrative of a special Jewish magic as of the eclectic religious conditions of later Mesopotamia; here the ancient magic, divorced from its content of real religion, came to be reinforced by new currents of superstition from the West. Whatever be the relation of magic and religion, whether they are twin sisters, or the one the parent of the other, or innate rivals, in our special and confined field we may observe the break-down of the ancient noble religions; gods have become names, rites esoteric and selfish and malignant, holy writings formulas. It is not Judaism we have been studying but a phase of *fin de siècle* superstition.

In recent years so much has been made of Persian origins for western religion, philosophy, and magic,[80] that I am surprised to find hardly a trace even in a word[81] of the Zoroastrian system upon our bowl-magic. This is the more remarkable as it belongs to Persian soil and flourished under the Sassanian empire, while the dualism, demonology and magical practice of Persia would have been so natural a nursing mother to the superstition we have been studying. Had the Zoroastrian influence spent itself and, after it had given itself to the world, did the more virile currents of the original stock and of the West reassert themselves and triumph in Iran's territory? Or has the influence of Persia been overrated?

As to the comparative age, in point of literary tradition, of the three classes, "Jewish," Syriac, Mandaic, it is impossible to decide; all follow common types. In the case of the Mandaic replica to No. 11, the former has the secondary text. The Mandaic charms are closest in spirit to the old Babylonian magical literature, those in the Syriac appear to be expressive of the current paganism (e. g. No. 36).

[80] See Cumont, *The Oriental Religions in Roman Paganism*, esp. nn. 37-39, p. 266 f.; Bousset, *Die Ursprünge der Gnosis*, etc.

[81] N. B. the Ispandas-dewa in Hyvernat's text, and פריכא, possibly the Persian Peri. The arguments for Persian influences advanced by Levy, *ZDMG*, ix, 471 f., are now antiquated by the Babylonian literature. The fashion of interminable lists of demons may come from Persia.

TEXTS, TRANSLATIONS, NOTES

CBS = Catalogue of Babylonian Section University of Pennsylvania.

Numerals in ( ) number the lines of the spiral inscription, starting from the radius where the text begins.

Brackets, [ ], indicate suppletion of lacunae.

Phrases in ( ) in the translation represent amplification or interpretation by the translator.

Inferior points attached to Hebrew characters indicate doubtful readings.

Points on the line indicate missing letters or words.

Superior points, in the Syriac texts, represent the diacritical marks of the original.

TRANSLATION

This the amulet of Ephrâ (2) bar Šabôrdûch, wherein shall be (3) salvation for this Ephrâ b. Š. and also (4) for this Bahmandûch bath Samâ, that there be for them (5) salvation, namely for this Ephrâ b. Š. and for this Bahmandûch b. Š. (6) Amen, Amen, Selah.

This is an amulet against the Liliths that haunt the house of (7) this Ephrâ b. Š. and this Bahmandûch b. Š. (8) I adjure you, all

species of Liliths in respect to your posterity, which is begotten by Demons (9) and Liliths to the children of light who go astray: Woe, who rebel and transgress against the proscription of their Lord; woe, from the blast (10) fast-flying; woe, destroying; woe, oppressing with your foul wounds ...., who do violence and trample and scourge and mutilate (11) and break and confuse and hobble and dissolve (the body) like water; woe, ...; and where you stand, (12) and where you stand (*sic*) fearful and affrighted are ye, bound to my ban,—who appear to mankind, to men in the likeness of women (13) and to women in the likeness of men, and with mankind they lie by night and by day.

With the formula, ṬWM (14) Š·Š GŠ GŠK, have I written against thee, evil Lilith, whatsoever name be thine. We (15) have written. And his name shall save thee, Ephrâ, forever and ever.

Commentary

A phylactery in the name of a man and wife for protection against the liliths and their broods which haunt the home. The same couple are the subjects of the charm in No. 13, in which the woman invokes the love of her husband and the blessing of children. For the general magical details I refer in this and the following texts to the Introduction.

1. אפרה: in No. 13 written with both ה- and א-. The name may be Jewish or Persian, (1) hypocoristic from אפרים, or (2) a hypocoristic reduction from one of the numerous names in *Fra-;* see Justi, *Iranisches Namenbuch,* 101 ff.; for the prothetic vowel, cf. *ibid.* 6. The Persian name of the mother by no means determines the race of the family.

שברדוך = "Sapor's-daughter" not instanced in Justi; *duch* for *ducht;* see above, p. 104, n. 6.

2. תהוי = תיהי, l. 4; both forms in the Rabbinic.

3. ועים ו : unless a scribal error, a unique adverbial development of the preposition, "and withal," = *simul ac,* or ὁμοῦ καί, e. g. Dieterich, *Abraxas,* 147.

4. בהמנדוך: see Justi, p. 374 f.; also in Pognon B.

סמא: in No. 13 also סמאי. A frequent Jewish name; see Heilpren, סדר הדורות (*Seder ha-Doroth*), ed. Maskileison, Warsaw, 1883, ii, 296 f. The two forms are hypocoristic; see Nöldeke, art. "Names," *Enc. Bib.*

§ 50 f., Lidzbarski, *Ephemeris* ii, 7 ff., 13 ff. (For the early form and history of these terminations, cf. the results of Ranke, *Early Babylonian Personal Names,* 7 ff.). The full name was סמיא, "blind," occurring in Jewish and Syriac. It occurs as a feminine name (as here) in Asseman's Catalogue, cited by Payne-Smith, *Thesaurus syriacus,* col. 2655.

6. לילית : pl., also לילאתא . The liliths are the only named objects of exorcism, but masc. ppls., etc. are found in l. 10 ff., probably by technical phraseology.

דבת : √ דבא ; cf. *Pesaḥ.* 111b: דבי פרחי רוחי : "those which haunt caperberries are spirits.

ביתלהון: the pronominal suffix expressed with the intrusion of ל; cf. in the Assouan papyri of Sayce and Cowley, ברלי ובראלי (F, 9).

8. בש[ום] : if a correct restoration, the charm would obviate the demoniac procreation described.

9. "Sons of light": נורא is primarily fire and the term would indicate the angels, expressive of the legend that the angels emanate like sparks (cf. בני רשף , *Job* 5: 7) from the *dînûr,* the stream of fire under God's throne, *Ḥag.* 14a, and other reff. in Eisenmenger, ii, 371 ff. Cf. "the hosts of fire in the sphere," 8: 13. In 16: 7 the demons are "sons of darkness." But as the reference is to demoniac unions with human flesh, the expression appears to be transferred to mankind. It is then parallel to "sons of light," a name given in the Mandaic religion to the Uthras, Brandt, *Mand. Rel.,* 30, and also to men predestined to life, Brandt, *Mand. Schr.,* 13, 19. The redeemed come to share in the light-nature of the angels, cf. *Dan.* 12: 3, *Enoch* 38-39, cf. the *vioì φωτός* of the NT. In the myth of Adam Kadmon, man was originally a being of light (Bousset, *Hauptprobleme d. Gnosis,* 202, etc.; for the Kabbala, Karppe, *Zohar,* 372 ff.). Hence we must suppose that נורא has been reduced from נוהרא "light" (cf. the Arabic), and the expression is to be correspondingly rendered. The predicates following recall the myth of Gen. 6.

מריהון, as in Syriac, but the י is only the šewâ; cf. l. 11.

10. וי מן זיקא פרח פרחין: An interesting parallel to a well-known Talmudic formula against witches, *Pesaḥ.* 110a-b: קרח קרחייבי פרח פרחייבי איבדור תבלונייבי פרחא זיקא למוריקא חדתא, generally translated: "Your head be balder, your crumbs [with which you conjure—cf. the anecdote

of Abaye in *Ḥull.* 105b, Joel, *Der Aberglaube,* i, 69] be blown away, your spices fly off, the wind carry away the fresh saffron."[1] I doubt if so much sense can be made out of the doggerel; following the Talmudic tradition our phrase would mean "your breadcrumbs away with the gust!" By itself the words could simply mean, "be blown away with a gust," with reduplication of the verb. For קרח in the Talmudic passage, see to 18: 9.

The combination in the middle of the line is obscure; a verbal middle noun from רשם? The participles מחבלין וגי portray the fiendish assaults of the demons; the same accumulations in Lidzbarski's Mandaic bowls. Cf. the action of the demon of epilepsy in *Mk.* 9: 14 ff.

11. For the ש see above p. 61.

משגריהן כמין: for the relaxing effects of disease cf. *Ps.* 22: 15, *Eze.* 7: 17.

בתריכן ובתרכון, a dittograph induced by the scribe turning over the bowl to write on the exterior and repeating the word. The ' in the first form represents the šewâ. The meaning is: stay banned where you are!

12. יסירין: metaplastic form of root אסר, found in the Targums, etc. (cf. Heb. מוסר).

מידמין: cf. *Ḳidduš.* 81a, אידמי ליה סטן כאיתתא. The climax of the description is the worst and most obscene of the plagues; the same phrase in Pogn. B, no. 27.

13. בטום: in Ellis 1: 8 טטם appears in conjunction with the Tetragrammaton.

14. ליבי, עליבי: the form is singular, and the phrase refers to the many names of a lilith (see §§ 11, 12 and No. 42).

With לילית it is difficult to determine whether the singular or plural is meant. For "lilith of whatsoever name," cf. 14: 6: demons whose names are mentioned and who are not mentioned. The same indefinite invocation in the Babylonian, e. g. *Utukki*-series (Thompson *Evil Spirits of Babylonia,* i, 153): spirits "that have no name," presenting a *blanket* formula for names not known; cf. *δαιμόνιον καὶ μὴ ὀνομαζόμενον*, Pradel, *Griech. u. südital. Gebete,* 22, l. 2.

15. אל, a Hebrew reminiscence; in general cf. *Ps.* 20: 2 f.

[1] See Blau, *Zauberwesen,* 77. The connection of this Talmudic passage with *Eze.* 13: 17 ff. has not been observed by the commentators.

No. 2 (CBS 2945)

Translation

Again I come, I Pâbak bar Kûfithâi, in my own might, on my person polished armor of iron, my head of iron, my figure of pure fire. (2) I am clad with 'the garment of Armasa (Hermes), Dabya and the Word, and my strength is in him who created heaven and earth. I have come and I have smitten (3) the evil Fiends and the malignant Adversaries. I have said to them that if at all you sin against Abûnâ bar Geribtâ and against Ibbâ bar Zâwithâi, I will lay a spell upon you, the spell (4) of the Sea and the spell of the monster Leviathan. (I say) that if at all you sin against Abûnâ b. G., and against his wife and his sons, I will bend the bow against you (5) and stretch the bow-string at you.

Again, whereinsoever you sin against the house of Pâbak and against his property and all the people of his house, in my own right I Abûnâ bar Geribtâ—or against Ibbâ bar Zâwithâi—(6) will bring down upon you the curse and the proscription and the ban which fell upon Mount Hermon and upon the monster Leviathan and upon Sodom and upon Gomorrha. In order to subdue Devils (7) do I come, I Abûnâ b. G., and all evil Sacra-

ments and the tongue of impious Charm-spirits; I have come and smitten the Demons and Devils and evil Tormentors, the Gods (Idol-spirits) and female Goddesses—standing in serried rows and encamped in camps.

Commentary

A mutual charm of two sorcerers, each invoking his powers in turn in the other's behalf. An almost exact replica of the terms of the charm is found in the first part of No. 27. The two men named appear in No. 3, where Pabak's household is the subject of exorcism.

1. תוב: apparently a formal term of introduction; cf. 26: 3. It generally connects the several members of an incantation series. Cf. the "and" introducing the mortuary charm published by me in *JAOS*, 1911, 273. It may be correlative to תוב in l. 5.

פאבק: the Persian Pâpak, Justi, p. 241; cf. Arabic Bâbek, Greek παμβεκος. The name occurs in late Babylonian, Hilprecht and Clay, *BE*, ix, 68.

כופיתאי: Syriac כופיתא is a water-flask with a small mouth. For the character of the name, cf. Hebrew בקבוק, Χοΐζας, *Lu.* 8: 39 =. כחא "wine-pitcher," etc. For the hypocoristic termination in אי—, see to 1: 4. It is parallel in meaning and form to בקבקיה. *Neh.* 11: 17.

נציצא = נציצתא, 27: 3. Comparing the Rabbinic נִין, "a shining spark," and "white earth, gypsum," and נהין, "polish." I understand this word in the sense of "polished armor."

כלה קומתי דנורא = קומת דנורא, 27: 4; the parallel marks the gradual obscuration of magical formulas. Fire is the potent element against witches and demons, as the ancient means for destroying their arts. In Babylonia the fire-god Gibil was the chief god of exorcism in such magic, Tallquist, p. 25 ff.; for other examples in Semitic magic, see Thompson, *Semitic Magic* in Index. Iron, like the other metals, and excelling them, is a potent means against devils, Blau, p. 159; Thompson, in Index; in the *Testament of Solomon* is an anecdote of a devil afraid of iron (*JQR*, xi, 18); Josephus' exorcist used an iron ring. For the western world, see Pauly-Wissowa, *Real-Encyc.*, i, 50.

2. דכיא I supply from the parallel inscription. After it appear traces of ול, which letters are repeated to make the following word; a fault in the bowl required the rewriting of the characters.

לבישנא לבושא דארמסא: the garment of a potent being carried with it his powers. Compare the assertion by the magician in the charm noted to l. 1, in which he professes to be clad with the magical paraphernalia of Moses, Aaron, David, Solomon, etc., and see above, § 9. There is also to be recalled the magical garment of Marduk in the fourth of the Seven Tablets of Creation, while the magical robe which renders the wearer invisible is common property of folklore.

ארמסא דביא וממללא. ארמסא is found in the parallel bowl No. 27 (along with the rest of this phrase); in 19: 7; in 25: 4 מיטטרון מסא[אר]; in 11: 7 in the spelling ארמים; and in 7: 8, אירמים = Myhrman, l. 4, הירמים. The forms give the clue; ארמים is one of the Syriac spellings for the Greek Ἑρμῆς, e. g. Peshitto to *Acts* 14: 12; הרמים also occurs in Syriac. ארמסא is then the Hermes about whom gathered the extensive mystical cults and literature towards the beginning of the Christian era to which is given the epithet Hermetic. Summary reference may be made here to Reitzenstein's illuminating study *Poimandres* (Leipzig, 1904), also to G. R. S. Mead, *Thrice Holy Hermas,* London and Benares, 1906. The Greek Hermes, the messenger of the gods, was identified with the Egyptian Thot, the divine agent of human illumination—in a word the Logos of the Egyptian religion. This mystical function of Hermes-Thot is evidenced, e. g., by a passage in Justin Martyr: *εἰ γεγενῆσθαι ἐκ θεοῦ λέγομεν Λόγον θεοῦ, κοινὸν τοῦτο ἐστω ἡμῖν τοῖς τὸν Ἑρμῆν λόγον τὸν παρὰ θεοῦ ἀγγελτικὸν λέγουσιν* (*Apol.* i, 22; Migne, *Patrol. gr.,* vi, 57.).

This figure was also adopted in the syncretistic mysticism of the farther East, as the expressions cited from our bowls show. He is the word ממללא (= מלילא, 19: 7),[1] and the Metatron, that mysterious intermediate agency between God and his creation in Jewish Gnosticism (cf. § 13). But this Hermetic theology was not mediated to the Orient through Judaism, but through the Hermetic schools, which appear to have held out, into the twelfth century, in that obstinate center of paganism, Harran. Chwolson has collected the evidence for the survival in that region of the Greek religious philosophies,[2] and Reitzenstein has now trenchantly pointed

[1] The Ἑρμῆς λόγιος or λόγιον: Reitzenstein, *op. cit.,* 43; Abt, *Apologie des Apuleius,* 118.

[2] In his *Die Ssabier und der Ssabismus,* 1856. See now Dozy and de Goeje,

out (p. 166 ff.) the essential Hermetic quality of this last remnant of the old pagan philosophy. The magic of the Euphrates valley has caught up probably from Harran the figure of Hermes and easily identified it with the Jewish Metratron, the biblical Enoch, etc.[3] Hermes was the equivalent of the Babylonian Nebo, and a passage in the Mandaic Ginza throws light upon the expression, "clad with the clothing of Armasa"; in the Ginza we have a tradition that the angels invested Nebo with a dress of fire.[4]

The ממללא of our text is then a proper epithet of ארמסא. What is meant by the preceding epithet דביא? It occurs in the parallel text, and also in Stübe's text, l. 5, thus: מיטטרון מלאכה דביה. I suggest that דביה (דביא) means "who-is-in-Yah," an ancient mystical expression for the Logos; cf. the Johannine *πρὸς τὸν θεόν*, and the description of the Son as "in the bosom of his Father," and, "I am in the Father and the Father in me." Compare also 7: 8, יהו ביהו, and note.

3. מרירי (cf. 4: 4), reminiscent of the biblical קטב מ׳, for which see Joel, i, 100.

אבונא: a name of two Amoras.

גריבתא: "scabby"; cf. Gareb, *2 Sa.* 23: 38, and the Palmyrene גריבא, de Vogüé, *Syrie centrale,* no. 141; also the Arabic Juraib, Jarbâ.

איבא: the same name in *Seder ha-Doroth,* ii, 45. The form is shortened from *Abba,* see Lidzbarski, *Ephemeris,* ii, 8.

זויתאי: so the probable reading of the name here and below. It is hypocoristic from זויתא, "corner"; cf. the biblical name Ribḳa = Aram. רבקא, "stall." Is there here a pious allusion to the daughters of Israel as polished corners (זויות) of the temple, *Ps.* 144: 12?

אשיפנא: the verb is found in the Aramaic only in the Syriac, and but rarely, and in the bowls occurs only here.

Nouveaux documents pour l'étude de la religion des Harraniens, in the *Actes* of the 6th International Congress of Orientalists, II, 1, 281.

[3] Bar-Hebraeus, *Chron.,* ed. Kirsch, p. 5, where Hermes and Enoch are identified "by Greek books"; also a reference in Reitzenstein, p. 172, n. 3, to a Hermetic MS. bearing the name of Idris = Enoch. For this Enoch-theosophy see Joel, *Aberglaube,* ii, 16, 19.

[4] *Ginza,* R, p. 54, ed. Petermann; see Brandt, *Mandäische Schriften,* 89.

אישפא דימא וגו׳: the spell on the sea and Leviathan was mightiest in magical history, for it was the first great act of "white magic"; cf. the Marduk legend. A survival of this mystical aspect of creation appears in *Job* 38: 8-11, which concludes: "And He said: thus far shalt thou come and no farther, and here shall thy proud waves be stayed"; cf. *Jer.* 5: 22, *Ps.* 104: 6 ff., *Job* 38: 8 ff. The subjection of the abyss is a frequent magical allusion in the papyri, e. g. the Great Magical Papyrus of Paris, l. 3062 ff. (Dieterich, *Abraxas,* 140; Blau, p. 113; Deissmann, *Light,* 258). The sealing of Tehôm is referred to in Targ. Jon. *Ex.* 28: 30.

4. חתחטתו: the scribe began to write the perfect, passed into the imperfect (which we should expect here) with the second letter and returned to the perfect termination; he amended his mistake by rewriting the word. In general the scribes aimed at carefulness. A word so corrected is sometimes deleted with a line.

איתתיה: for the various forms, see Glossary, *s. v.* אינתתא.

בבניה: a Mandaic and also Targumic idiom for בנוהי, Nöldeke, *Mand. Gram.,* § 144.

בי קשתא וגו׳: בי a form of -ב found in Targums and Talmud (also in the Palestinian charm cited to l. 1). The terms are reminiscent of Marduk's slaying of Tiamat in the Babylonian creation legend: "Marduk made ready bows .... The bow and the quiver he hung at his side"; cf. the praise of Marduk's bow in the fifth tablet (King, *Seven Tablets of Creation,* ii, 63, 83, and fragment cited, p. 207); also numerous biblical parallels: *Hab.* 3: 9, cf. v. 11; *Ps.* 7: 12-14; *Dt.* 32: 41 (where Gressmann, *Isr.-jüd. Eschatologie,* 78, would read אשפה for משפט). As in l. 1 with the clothing of Deity, so here with his magical arms the magician declares himself invested. But the phraseology may be based on magical practice, a symbolical shooting at simulacra, in the same way as these are burnt, peeled off, mutilated, etc. A very similar passage is to be found in one of the Manichaean texts discovered in Chinese Turkestan, in which the conjurer shoots with his bow and arrow at the demon, who falls dead; *Sitzungsberichte* of the Berlin Academy, 1908, 401.

ניבנא: participial form from נבב; the Peal is unique.

5. חוב: the other part of the mutual charm now begins. The contrast is further expressed by בידידי, "on my part."

או באיבא: this name was omitted in its proper place and is now inserted.

6. אחרמתא: for the prosthetic א see Nöldeke, *Mand. Gram.*, § 24.

על חירמון: a reminiscence of the myth of the confederation of the fallen angels upon Hermon (n. b. √ חרם); see *Enoch* 6: 5 f.: "they named the mount Hermon, because they had sworn and bound themselves by curses upon it"; also 14: 7 ff. Philo of Byblus also connects the Titans with the Lebanons and other mountains of Syria: "These begat sons of greatest size and superiority, whose names were given to the mountains which they occupied, so that some of them are called Kassion and Libanos and Antilibanos and Brathu."[5] And Hilary of Poitiers adds something to our knowledge of the myth: "Hermon is a mountain in Phoenicia, the interpretation of whose name is *anathema*. Moreover it is the tradition—from whose book it comes I know not,—that the angels lusting after the daughters of men, when they descended from heaven, assembled on this very high mountain."[6] Cf. the anointing of Nebo by the evil gods in the Mandaic mythology, Brandt, *Mand. Rel.*, 126 f.

7. סידרי סדרין: construct of accumulation.

רפדי מרפדי: "camping in camps." רפד is very rare in Hebrew and Aramaic, but is frequent in Assyrian, where among several meanings it is found in this sense (cf. the biblical place-name רפידים). מרפד occurs in a MS. cited by Rabbinowicz to *Megilla* 10b: בית מרפידו של אדוני, where מ' = Hebrew שכינה.[7] The variant in 27: 11, מרפדי מרפדי, parallel to סידרי ס', is probably the correct form. The allusion to the serried battalions of the demons is epical, perhaps of mythological origin.

[5] Eusebius, *Praep. Ev.* i, 10: 7; text in C. Müller, *Fragm, hist. graec*, iii, 566.

[6] Hilary to Ps. 132: 3, see *Corpus script. eccles, latin.*, xxii, 689.

[7] So on Jastrow's authority, *Dictionary of the Targumim, the Talmud*, etc., 1476, but I do not find the reference.

Translation

In thy name, O Lord of salvations, the great Saviour of love.

Designated is this spell and mystery and strong seal for the sealing of the household of this (2) Ardôi bar Hormizdûch, that from him may depart and remove the evil Demon and the evil Satan, who is called SP'SK,

the Mighty Destroyer, who kills (3) a man from the side of his wife and a woman from the side of her husband, and sons and daughters from their father and from their mother,—by day and by night *omo, omo,* walking. (4) I adjure thee that thou do not kill off this Ardôi b. H. from Aḥath his wife, and that thou do not kill off Aḥath bath Parkôi from Ardôi her husband, (5) and that thou do not kill off their sons and their daughters, whether those they have or those they shall have, from this day and forever, neither by night nor by day. In the name of Z'Z'Z', ḤSR, ḤSR, ḤSR, P'SP'SP', TMR, TMR, (6) TMR, NḴṬ, ZHZHZH, ḤSR, P'S, TMR, ḲḲ, 'STW, YWPṬ, YWPṬYH, from the burning fire, SḲSYN, SYN, SYN, SḲYWN; SḲ, his name ḲS his name. This is the great name before which the angel of death is afraid, (7) and when he hears it, frightened he flees and is swallowed up before it and (just so) before this Ardôi b. H. shall he fear and flee ..... [and from] Aḥath his wife, bath P., and from all their sons and from (8) all their daughters, whether those they have or those they shall have. PWṬSS, Amen. In the name of ḲḲ, 'STW, YWPṬ, YWPṬYH, from the burning fire, SḲSN, SḲSYN, SḲYWN, ... [This is] the great name before which the angel of death is afraid and when (9) he hears it, frightened he flees and is swallowed up before it and before this household. Moreover now in this great name of which is afraid [the angel of death, etc.—he shall flee from Ardôi b. H.] and from Aḥath his wife b. P., (10) and from sons and daughters, those they have and those they shall have. PWṬSS, Amen. In the name of 'STW, YWPṬ, etc. [This is the great name] before which the angel of death is afraid, and when he hears it (11) frightened he flees and is swallowed up; so moreover now on the authority of this great name shall fear and flee and go forth the evil Demon ..... (from Ardôi, etc.). PWṬSS. According as it is said: "And YHWH said to Satan: YHWH rebuke thee, Satan; YHWH rebuke thee, who chooses Jerusalem. [Is not this a brand plucked from the burning? Amen. Amen.]"

COMMENTARY

A charm for a man and his family against a murderous spirit. The charm consists in magical syllables constituting "this great name" and the formula is repeated four times; see p. 65.

1. מרי: construct = Syr. מרא. מרי אסואתא וג': a frequent epithet in these bowls of the deity invoked, along with אסיא רבא דרחמי, e. g. 7: 1. Cf. the frequent invocation in Pognon's bowls: אנאת אסיא, אנאת אסיא דמאסיא נישימאתא, etc. The theme אסה is equivalent to σώζω in the New Testament and Latin *salus*, German *Heil*, for which modern English offers no synonym, the good old word "health" having been specialized. The word implies a remedy against evil spirits and black magic. It is also used concretely, of the phylactery, "this א", Wohls. 2426: 1.

The epithets here used are interesting as being probably one of the few survivals in these inscriptions of the ancient Babylonian theological terminology; there we have, in the penitential and magical literature innumerable appeals to the love and curative powers of the deities; thus Marduk is god of love and life,[1] Ea is *a-si-e*.[2] And the exact equivalent of אסיא רבא is found as an epithet of Gula, the consort of Ninib: *azugallatu bêltu rabîtu*, "Great Healer, Mighty Mistress"; and of Bau, who became identified with Gula, e. g. *asîtu gallatu*.[4] Ninib was domiciled at Nippur and these epithets of his consort may have been particularly Nippurian, and so have survived in the bowls coming from that locality. I have not been able to discover the parallel masculine epithet for Ninib.[5] This invocation is doubtless pagan, being distinct from the numerous biblical epithets expressive of the love and power of God. It is never associated with the Jewish Divine Name. Σωτήρ is a common epithet of the Greek gods, Zeus, Apollo, Asklepios, Hermes, and is an epithet of the Deity in the N. T., e. g. I *Tim.* 1: 1. Cf. also the Phoenician בעל מרפא, *CIS*, i, no. 379, and *Ex.* 15: 26, אני יהוה רפאך. Also n. b. the common epithets for

[1] *La magie ass.*, Fossey, 323, 365, 369; n. b. his title *rêménû*.

[2] This reference I have not been able to verify.

[3] III R, 41, col. 2: 29; Delitzsch, *Hwb.*, 197a; Schrader, *KB*, iv, 78.

[4] R. C. Thompson, *PSBA*, 1908, 63.

[5] Radau (*BE* xvii, pt. 1, p. ix) endeavors to find the same title for Ninib in his explanation of the Aramaic rendering of NIN-IB, אנושת (see Clay, *JAOS* xxviii, 1907, 135, and Montgomery, *ibid.*, xxix, 204). He interprets it as = *en-usâti*, "lord of help," our very title (cf. Delitzsch, *Beiträge z. Ass.* i, 219, for equivalence of *AZU* with *âsû*), and with the same root. The interpretation would be very agreeable to me in view of the above remarks, but Radau omits to explain the Aramaic rendering of *s* (or *z*) by ש when the Aramaic has the root אסא, while Clay's explanation appears to me the more satisfactory.

the love of God (√ רחם) in the O. T. and Koran, also in the Palmyrene texts.[6] Pradel has collected in his *Griech. u. südital. Gebete,* 42 f., a number of the epithets denoting the healing and merciful character of God; he is there *ἰατρὸς ψυχῶν, ἐλεήμων,* etc.

מזמן וג׳: a standing introductory formula in these bowls (with כסא, etc.). זמן, Pael, appears to be used in the sense in which the Peshitto has it as the rendering of the Hebrew הקדיש, "sanctify," e. g. *Josh.* 7: 13, *Jer.* 12: 3. Cf. the religious connotation of the parallel root—יעד.

For חתמתא as a *pa"âl* formation see Nöldeke, *Mand. Gram.,* 121. Cf. the Mandaic forms and formula cited by Lidzbarski, *Eph.* i, 96, n. 1: חאתאמתא וזאראזתא ונאטארתא. The "charm, mystery, seal," are identical, and refer to the Great Name of the incantation. For the identity of name and seal, see Heitmüller, *"Im Namen Jesu,"* 143, 150, etc.

2. ארדוי: hypocoristicon in *-ôi,* abundant, with variants in *-âi* and *î,* in these texts (see Nöldeke, *Persische Studien,* in *Sitzungsberichte,* phil.-hist. Class, of the Vienna Academy, 1888, p. 387.). The name is formed from one of the numerous Persian names in *ard-* or *art-;* it occurs in Myhrman's text, see his note, p. 349.

חורמיזדוך: a frequent Persian name see Justi, p. 10.

יזה, or יזה = יזע, from זוע or זעע; but as יזה, from זחח (found in Heb., *Ex.* 28: 28, cf. the Aramaic זוח), see the forms יזרחן, 10: 6, יזחן, 12: 10, אתאזחא, Pognon, B. יזה, 31: 3.

"Demon, Satan, Destroyer," all epithets of the one demon; cf. above pp. 58, 68.

צפעסק: with reversal of the alphabetic order of the first four letters—to indicate the *bouleversement* of the demon?

אבדה גברא: *abbâda gabbârâ, abbâd* not otherwise found; for the formation cf. Nöldeke, *Syr. Gram.,* § 115. Notice that the Hebrew and Greek Abaddon is represented in *Rev.* by *ὁ ἀπολλύων,* as though the original was a noun of agent, not an abstract. The epithet = המלאך המשחית, 2 *Sa.* 24: 16, המשחית, *Ex.* 12: 23, the Samaritan מחבלא, etc.

3. ויבנן: for the vocalization of the conjunction cf. וידלא, 14: 6;

[6] Baethgen, *Beiträge,* 82 f., Lidzbarski, *Handbuch,* 153.

וילשלהיבת, 14: 7, etc. The conjunction is also similarly pointed in *Targum Onkelos,* Dt. 14: 37 (ed. Berliner), ויחלף; see Berliner's note, ii, 140.

אימיהון: the half-vowel after מ is indicated, as in Mandaic.

אומו אומו מתאלך: thus the uncanny stealthy movements of the demon are expressed.

4. אחת: probably the first element in such a name as אחתראבוה, "sister of her father," cf. אחדבוי, "brother of his father," a frequent name in the Talmud. Cf. biblical אחאב, and the Babylonian Aḥatbu, Aḥatšuna, Aḥat-immišu, etc. (Tallquist, *Neubabylonisches Namenbuch,* 3), and similar names in the Glossary.

פרכוי: hypocoristic of Persian Farruchan, Justi, p. 94 ff.

5. דהן = hâwên, cf. מחן, רמן, 6: 4, pl. ppl. with future sense, as common in Syriac.

דנן: appears only in this phrase, so 16: 13, 19: 20, is archaic and seldom in Talmud; for the pronouns see end of Glossary C.

6. "From the burning fire," i. e. of hell. For the threatening of demons with pangs of hellfire, see Pradel, 21, l. 11 ff.; for the threatening of demons in general cf. the Paris Magical Papyrus, l. 1227 ff. (ed. Wessely), and see in general Tambornino, *De ant. daemonismo,* 78.—The angel of death appears in Schw. F. The charm of which he is afraid is *à potiori* more fearful to the demon.

7. יעיריק: for the second י representing the *šewâ,* cf. the Sabbioneta text of *Targum Onkelos,* ed. Berliner, to *Ex.* 21: 13, *Num.* 35: 26. For *u* in ידחול, see Nöldeke, *Mand. Gram.,* 219. N. B. the two prepositional forms קראמוהי and קדמיה along side of each other, the latter attributed to the "Palestinian" dialect by Dalman, *Gram. d. jüd.-pal. Aramäisch,* 181.

The Great Name, or True Name, at which devils and all things created tremble and flee away, is a common thesis in the Greek magic: Wessely, xlii,[1] 65, *ad infra*: the God of Israel whom the heavens bless and (the oceans?) fear and every devil trembles; Dieterich, *Abraxas,* 140, l. 55 ff: the name at which trembles the Gehenna of fire and every mountain trembles; Wünsch, *Antike Fluchtafeln,* no. 4, l. 44 (with editor's notes), and no. 5,

[1] "Neue griech. Zauberpapyri" in *Denkschriften* of the Vienna Academy, phil.-hist. Class, xlii, 2: his earlier publication in vol. xxxvi is cited as "xxxvi."

l. 21. It is not necessarily a Jewish phrase, Wessely, xxxvi, 50, l. 244 ff: "This is the primitive (πρωτευον) name of Typhon at which trembles earth, deep, hell, heaven," etc. Cf. Heitmüller, pp. 148, 231, for citations from the Fathers, and Pradel, p. 40 f., for Greek magic. Dieterich regards this trembling before the Name as of Orphic origin, p. 141.

The bowl CBS 16093 is almost identical in text with this one, and bears the same design. It is about two-thirds as long. Its clients are the couple named in Nos. 32 and 35. Also another bowl (unnumbered) is practically the same as the present text, but shorter, with the same design. also made out for the clients of Nos. 32 and 35.

No. 4 (CBS 2923)

Translation

Covers to hold in sacred Angels and all evil Spirits and the tongue of impious Amulet-spirits. Now you are conquered, you are charmed; charmed, you are charmed and sealed in each one of the four (2) corners of his house. You shall not sin against Pâbak bar Kûfithâi, nor shall any do folly against him, against all the people of his house, either by night nor (3) by day; because I have bound you with an evil charm and a sure [seal]. Again, I have charmed you with the charm with which Enoch was charmed by his wicked brothers. Again I charm you with an evil and galling seal. Again, (4) I charm you with the seal with which were charmed the Seven Stars and the Twelve Signs of the Zodiac unto the great day (5) of judgment, and to the great hour of the redemption of your heads: you shall not ..., nor sin against them, against Abûnâ bar Geribtâ, and none shall at all do folly against them, namely the people of the household of Pâbak (6) b. K., neither by night nor by day, because well sealed is his house and well armed, and with a great wall of

bronze have I surrounded it. *I,* what I desire I grasp, and what I ask I take. (7) *You* are in the place of Abûnâ b. G. and in the place of Pâbak b. K.

Commentary

A general charm against all evil spirits, made out for the Pâbak of No. 3. The introductory lines are of interest as they definitely settle the use of these bowls (§ 8). The design represents the sorcerer waving his bough, see p. 55.

1. מיטלי דלמיכל : מ׳ is to be identified with the plural of the Syriac *mᵉṭallᵉthâ, mᵉtallê,* or *maṭṭᵉlê;*[1] the י probably represents the pronunciation *mcṭṭᵉlê.* The second word מיכל is the infinitive of כול, "contain," whose original meaning is retained in the Hebrew, even in the sense of holding in with force, e. g. *Jer.* 6: 11, over against the later meaning of "measure."

מלאכין קדישין: See p. 79; also cf. חומריא קאדישאתא, *Ginza,* ed. Petermann, p. 231, l. 10, and the Mandaic רוחא דקודשא.

ורוחי: the first letter was written by inadvertence.

זידני זידניתא : case of dittography.

אהשתא: for the prosthetic א, cf. Nöldeke, *Mand. Gram.,* § 32.

3. דאסירי ביה וג׳: we find here the idiom of the active use of the passive participle, as in Neo-Syriac; see Nöldeke, *Gram. d. neusyrischen Sprache,* §§ 103, 143. An approximate use of this participle in verbs meaning "to carry," etc., and also with אסר is found in classical Syriac (Nöldeke, *Syr. Gram.,* § 280). But in these instances the participle is middle voice in meaning; thus אסיר כלילא means, "he bound himself with a crown." In the present case the participle has assumed a completely active sense, with an object other than the subject.

אחנוך : this spelling is found in a passage from the lexicon of Karmsedinoi, quoted by Payne-Smith, col. 266, *s. v.* אנטיכריסטוס.

אחוי : "his brother" and "his brothers" have the same spelling, differing as *-ûhi* and *ôhi;* the forms in *-ûi, ôi* are Mandaic, and also Palestinian.

There is reminiscence here of a cycle of personal legends concerning Enoch which have been preserved only in the Arabic, see Weil, *Biblische*

[1] See Nöldeke, *Syr. Gram.,* § 59.

Legenden der Musselmänner, p. 62, a compilation from manuscript sources.[2] According to these legends Enoch (Idrîs), who foretold the flood, suffered at the hands of the wicked Cainites, even as Abraham was made a martyr for his faith. Our passage must refer to some spell laid upon Enoch by his adversaries. The early Samaritan theologian Marḳa (fourth century) cites a book of the Wars of Enoch, which may have contained these traditions.[3] A spell laid by the wicked on a saint was *à fortiori* potent; see above, p. 64, for other apocryphal examples. For Enoch in incantations, cf. 19: 17.

מלויאשין: the word is written twice; in the first case the scribe omitted the א, then inserted it above the line, and on second thought rewrote the word correctly. It is the Syriac and Mandaic מאלואסא. The first י is unique; it is to be classed with the phenomena noticed by Nöldeke, *Mand. Gram.*, 223, where, e. g. *-yûn* for *-ûn*.

יומא רבא, שעתא רבתי: cf. "the great day," Hexaplaric Syriac to *Is.* 1: 13, the New Testament "that day and that hour," the Syrian Ephrem's expression, "the hour of judgment" (ed. Lamy, iii, 583), and the Arabic "the hour." For the feminine form רבתי, see Nöldeke, *Mand. Gram.*, 145.

In lines 4, 5, we are introduced to an extensive and ancient cycle of myths concerning the relation of the Seven Stars (the planets with sun and moon) and the twelve zodiacal signs, with the creator of the kosmos. There were two distinct developments in this mythology; in the polytheistic development the planets became highest deities. But in what we may call the monotheistic trend of thought, in which one of the gods, like Marduk became monarch, or, as in Israel's faith Yahwe is the sole God, stress is laid upon the antithesis between the Creator-God and those celestial divinities. The present regulated orbits of the planets and the fixed positions of the zodiacal constellations signify that these beings, once autonomous, have been brought into subjection to a higher god. In process of time they came to be regarded as "spirits in prison." Thus Tiâmat became, when slain, the fixed firmament (or the zodiac?), while, according to Zimmern, *KAT*, 502, the eleven Helpers of Tiâmat are the twelve signs of the zodiac, *minus* that of the Bull, the sign of Marduk

[2] For the later Jewish Enoch literature see *Jew. Enc.* i, 676.

[3] See Montgomery, *The Samaritans*, 224.

himself. This unfavorable attitude toward the celestial bodies is thus ancient. The monotheistic trend was native to the Hebrew theology, and in line with it we have the passage in *Is.* 24: 21 ff., according to which "the host of the height on high," as well as the kings of the earth are punished, being bound in prison. For the later theology the Book of Enoch is a good witness; e. g. 18: 13 ff.: "I saw there seven stars as great burning mountains. When I inquired about it, the angel said: This is the place where heaven and earth are at end; this is a prison for the stars and the host of heaven. The stars which revolve over the fires are they which at the beginning of their origin transgressed the command of God for they did not come forth at their time. Then he became angry at them, and bound them for 10,000 years, till the time when their sin is accomplished" (cf. 21: 6). The "spirits in prison" of 1 *Pet.* 3: 18 ff. is in line with the same notion, depending directly upon *Is.* 24: 21 ff., and we may compare the invidious use of "planets" in *Jude* 13, in the expression ἀστέρες πλανῆται.[4]

But our text also bears witness to another development of the myth. The "binding" of the Seven Stars and the zodiacal signs was for a fixed term. According to the passage quoted from *Enoch,* it was for 10,000 years. In the Isaianic passage, a term is fixed: "after many days shall they be visited."[5] In *Peter* the ancient myth is revived in the notion of Christ preaching to the spirits in prison. It is left somewhat obscure what shall take place when "they shall be visited," or when "their sin is accomplished" (with *Enoch*). Exegetes differ over יפקדו in Isaiah, whether the verb is to be understand favorably (of a visitation for release) or unfavorably (of chastisement). Also the Petrine preaching to the spirits in prison is understood by commentators in equally opposite ways. In our text the term of "the great day" and "the great hour" is evidently to be one of release to the stars bound in prison. There appears to be applied here the idea of a universal Apokatastasis. Now for this notion of the redemption of the imprisoned celestial deities we have a basis in Babylonian

[4] See Bousset, *Hauptprobleme der Gnosis,* c. i, "Die Sieben." In the Mandaic system the seven planets and twelve signs have become utterly evil. In this line of thought, taken up by magic, there is, I think, an open anthesis to astrological fatalism.

[5] There is literal reference to this passage in No. 34: 6,— בפוקדנא. There is possibility of confusion between פורקנא and פוקדנא.

mythology. In Tablet vii, l. 27 f. of the Epic of Creation (King, *Seven Tablets of Creation*), among the titles given to Marduk are: "Who had mercy upon the captive gods; who removed the yoke from upon the gods his enemies." And Pinches has now published a text ("Legend of Merodach," in *PSBA*, 1908, 53 ff.) which is a late supplement to that epic, and apparently continues the theme of the release of the captive gods: "He (Marduk) goes down to the prison, he rises to approach the prison. He opened the gate of the prison, he comforts them. He looked upon them then, all of them; he rejoices. Then the captive gods looked upon him. Kindly the whole of them regarded him." The "day of redemption" of our text is therefore in line with this Babylonian myth, and probably the passages from *Isaiah* and 1 *Peter* are also to be explained in consonance with it. This mythical trace probably descends from the Enoch literature.

5. Abuna is intruded awkwardly.— אסכלי for אסכולי.

6. זרוי מזרז: the root זרז (מזרז, זריז) is found elsewhere in these bowls, and also in those of Pognon and Lidzbarski (see Glossary C). It is used in parallelism with אסר, etc., in preventive magic. The verb means in the Aramaic dialects "to arm." But Pognon (B, 74) assumes for the noun זאראזתא the meaning "admonition," and Lidzbarski (*Eph.* i, 96, n.) the sense of "binding up" a letter, etc. But there is no necessity in departing from the common meaning; it refers to the magical armament of persons and things with power to resist the forces of evil; so a passage in the *Ginza*: "Arm yourselves with arms not of iron" (ed. Petermann, p. 25, l. 20). That is, it is the magical equipment of a person or charm against evil. Paul may have been making use of well-known magical language when he exhorted the Ephesians to "put on the panoply of God," *Eph.* 6: 13. The following phrase, "a great wall of bronze," is equally parabolic;, bronze possessed atropaic use in magic, like the other metals; cf. 15: 7, and see Pauly-Wissowa, i, 50; a Talmudic instance, *Sabb.*, 66b.

אנה דבעית וגי׳: our magician displayed the same assurance in No. 2. At least this confidence had its psychological effect on the client.

אתתן בתריה: "hoist with their own petard"!

Translation

Wholly charmed and sealed and bound and enchanted [are ye], that ye go away and be sealed and depart from the house [and property?] of Farrûch bar Pušbî and Nêwândûch bath Pušbî and Abândûch bath Pušbî, and that there depart from them (2) all evil Liliths and all Demons and Devils and Spells and Idol-spirits, and the Vow and the Curse and the Invocation, and evil Arts and mighty Works and everything hostile. Ye are bound with the seven spells and sealed (3) with the seven seals in the name of Eldedabya Abi Ponan, lord of spoil and curse ..... I conjure against you in the name of the great Prince, that thou keep Farrûch b. P. and Nêwândûch b. P. (4) from the Evil Eye and from the mighty Satan, and from ... and from the many Satyrs in the road of Hamad, in the name of YHWH, 'H, B'H. Amen, Amen, Selah. (5) "According

to the mouth of YHWH they would encamp, and according to the mouth of YHWH they would march; the observance of YHWH they kept according to the mouth of YHWH by Moses." "And YHWH said to Satan: YHWH rebuke thee, Satan, YHWH rebuke (6) thee who chose Jerusalem. Is not this a brand plucked from the fire?" Amen, Amen, Selah.

COMMENTARY

A general incantation against evil spirits for a man and his two sisters. The latter half Hebraizes.

1. The duplication of the ppls. is for intensity, "twice charmed." קיטרין error for קטירין. — לחישין, the only instance of this verb in the bowl-texts.

פרוך: cited by Payne Smith, col. 3246; cf. *Farruchan* and composites in *farruch*, Justi, p. 95 f.— פושבי?

אבנדוך, ניונדוך: Justi, pp. 228, 1.

ויתּ: by heedlessness of construction; cf. l. 3.

תנזח: נזח (also Talmudic) = זחח, see to 3: 2.

2. אסרי: the place of the term in the list shows that the charms were regarded as personal entities. Cf. above, p. 86.

"Seven spells," etc.; cf. the fever-remedy in *Sabb.* 66b, "7 twigs from 7 trees, 7 nails from 7 bridges," etc., etc. For this magical number in the Talmud, see Blau, pp. 73, 86, who quotes the Jewish maxim כל השביעין חביבין.

3. אלדרביה וגי: obscure, probably name of a genius; אבי may indicate his paternal relation to another well-known genius. For רביה cf. 2: 2.

"The great Prince": the technical title for Michael (see p. 97). It is to be observed that this bowl is peculiarly Jewish in theological form, while the following adjurations are in Hebrew. The double use of אשבעית introduces a mixed construction here. The verb generally is used of exorcism, with על of the object, = ἐξορκίζω. But at the same time he *adjures* the great Prince, whom he addresses in the second person. All these terms denoting magical binding could be used indifferently of the good and evil genii. The angel is adjured in Hebrew, which according to belief was the only tongue the angels knew.

4. "The hobgoblins in the way of Hamad, the many"; cf. the Rodwell-Halévy bowl in which a geographical location is given, "upon the road to Huṣi," and Wohls. 2417, a demon who dwells in Samki. The reference is to the demons which beset some particular road. For the satyrs see p. 80. הרבים in the text is awkward.

5. Literal quotations from *Num.* 9: 23 (cf. 26: 1 f.). The applicability of this quotation lies in its triple use of the efficacious word שמר (as above in l. 3). Hence the magical use of such Psalms as the 121st, 122d, the Aaronic Blessing, etc. Later Kabbalism, found in the theme the abbreviation of שדים מזיקים רוחות, see Schwab, *Notices et Extraits* of the Paris National Library, xxxvi, 1 (1899), 288.

7. There is no evident sense in these words around the figure. אהעה and אשר are reminiscent of the interpretation of the Name, *Ex.* 3: 14; להלה = "avaunt"?, משה = Moses.

Translation

A *press* which is *pressed* down upon Demons and Devils and Satans and impious Amulet-spirits and Familiars and Counter-charms and Liliths male (3) and female, that attach themselves to Adaḳ bar Ḥâthôi and Aḥath bath Ḥâthôi—that attach themselves to them, and dwell (4) in their arch-ways, and lurk by their thresholds, and appear to them in one form and another, and that strike and cast down and kill. And this *press* (5) I *press* down upon them in days and in months and in all years, and this day out of all days, and this month out of all months, and this year (6) out of all years, and this season out of all seasons. And I come and put a spell for them in the thresholds of this their house, and I seal and bind them. Fastened up are their doors (7) and all their roof.

And this *press* I *press* down upon them by means of these seven words, by which heaven and earth are charmed: in the name of the first, *Gišmîn* and *Marbîl;* of the second, *Gišmîn* and *Marbîl;* of the third, *Marbîl;* of the fourth, *Mašbar;* of the fifth, *Môrah;* of the sixth, *Ardibal;* of the seventh *Kibšîn* (presses), with which is *repressed* (9) ..... with them are *repressed* all evil Spirits and impious Amulet spirits and Liliths male and female and Familiars and Counter-charms and Words, that they appear not to Adaḳ b. Ḥ. and to Aḥath b. Ḥ. (10) and to ..... neither in dream by night nor in sleep by day, and that they approach neither their right side nor their left, and that they kill not their children, and that they have no power over their property, what they have (11) and what they shall have, from this day and forever.

And whoever will transgress against this *press* and does not accept these rites, shall split asunder violently and burst in the midst, and the sound of him shall resound with the resonance of brass in the spheres of heaven, (12) and his abode shall be in the seventh (?) hell of the sea, from this day and forever. Amen, Amen, Selah.

Commentary

A charm in behalf of a couple (each with a mother of the same name) and their household; the incantation consists in seven magical words, and concludes with a threat against any who destroy the bowl and ignore its ban.

1. כיבשא: cf. מיטלי, 4: 1, and see § 8. Cf. the verb, l. 5. N. B. similar use of כבש in *Pesiḳta R.* 16 (Jastrow, p. 611): the sacrifices are "presses because they press down the sins."

2. ניסי, also 12: 9, in both places before קיבלי. Out of several possibilities of interpretation I suggest that of נ' in the sense of "side" (cf. 34: 4), and then one who is familiar (Jastrow, *s. v.*), hence = the πάρεδρος or familiar spirit of the Greek magic; e. g. the ὀνειροπομποί and πάρεδροι in Justin Martyr, *Ap.* i, 18, Eusebius, *H. E.,* iv, 7: 9, occurring also in the magical papyri, Dieterich, *Abraxas,* 161, n. They may be the genii invoked by manipulation or rubbing of the amulet as in the Arabian Nights. In Arabic superstition we learn of the "follower," *tâbi'u,* that accompanies the bewitched man, Nöldeke, *ZDMG,* xli, 717. And cf. the

Satan who is a "comrade" to an evil man, *Karîn,* in the Koran (e. g. 41: 24), see van Vloten, *WZKM,* vii, 182 ff., גיסא could be the Syriac word for marauding troop, an appropriate description for a demoniac species, but the meaning given above is more appropriate in the context.

3. אדק: cf. the Persian name Adaces, in Ammianus, see Justi, p. 2, and cf. Nöldeke, *Persische Studien,* 417.

חאתוי: cf. the Syriac name *Ḥâthî,* "my sister," cited by Payne Smith, col. 1408, here with the Persian diminutive ending.

גובתיהן: the Syriac גובא, "transverse beam," hence probably door lintel,—so Payne-Smith, col. 670; radically the word refers to the *arch* of the doorway. For the abodes of the demons, see p. 76.

בדמו דמו: the same phrase in the Mandaic, Nöldeke, *Mand. Gram.,* § 216, 2.

מחן, רמן: cf. *Mk.* 9: 14 ff., *Lu.* 6: 4.

5. For the selection of a special day for the exorcism, see p. 55.

6. אוינא: unique form; אזל is treated in some forms as though אזז, and here metaplastically as אזא.

חברנא: the only occurrence in the bowls of this ancient magical term. —The root צור is used here not in its Aramaic sense.

בתיהן = ביתהן, cf. l. 4.

7. אינרהן: cf. *Pesaḥ.* 111b, רבי אינרי, of the demons.

8. These magical words are wholly obscure; see § 11.

10. "Sleep by day": cf. the special term in 7: 16. The midday siesta was perilous, especially for those in the fields; in the Greek superstition this was the chosen time for attacks by the satyrs and fauns, whose place was taken in Jewish legend by the קטב מרירי a demon representing sun-stroke, etc. See Grünbaum, *ZDMG,* xxxi, 251 f., and Roscher, *Ephialtes.*

Magical protection at right and left hand is frequently referred to in Babylonian sorcery; e. g. the *Utukki*-series iii, 93 (Thompson, i, 11); or four deities surround the sorcerer, in front and back, at right and left, *ibid.,* iii, 142; the *Maḳlu*-series, vi, l. 123 f. Cf. 13: 7.

תישילטון: for the new vowel see Nöldeke, *Mand. Gram.,* § 25.

11. The penalty for infraction of the charm is bombastic enough! For the threatening of demons, see above, on 3: 6.

ניבר, ניפקא: Mandaizing spelling for נעבר, נפקע; also אחא = עחא. A dialectic formula may be used here. N. B. נ of the preformative, ניזם from Syr. זמם, and נינלי is Syriac over against the Rabbinic and Mandaic forms.

12. "In the seventh hell" (with awkward use of the numeral) in contrast to the seventh heaven. For the seven hells, see Eisenmenger, ii, 302, 328 f.

No. 7 (CBS 16007)

This bowl is a replica to that published by Dr. Myhrman of Upssala (No. 16081), see above p. 20. The latter is more perfect than my text, in fact almost the only perfect one in the collection; for this reason and also for the value of comparing the numerous variants I give the two texts in parallel, making such emendations as appear necessary in the first-published text, which amount chiefly to the proper grammatical distinction of *yod* and *waw* and *he* and *ḥeth*. It may be observed that the designs in the two bowls differ: in 16007 merely a circle enclosing a cross, in 16081, a linear figure, the stem surmounted by a head capped, at the other end a pitchfork-like termination (the forked tail of the demon?), while four rays represent the limbs. On either side of the figure are three characters like the Greek Σ, or looked at from the side like ש, with which we may compare the ש's shuffled into Pognon's texts, see p. 60. For convenience of reference I give the same line-numbering to Myhrman's text as to my own.

In the commentary I make such few notes as are necessary on Dr. Myhrman's ably edited text.

16081 (Myhrman)	16007

Translation

In thy name, O Lord of salvations, (2) the great Saviour of love.

I bind to thee and seal (3) and counterseal to thee, the life, house and property of this Yezidâd (4) bar Izdândûch; in the name of the great God, and with the seal of Shadda El, (5) and by the splendor of Sebaoth, and by the great glory of the Holy One: that all ... Demons and all mighty Satans remove and betake themselves and go out (6) from the house and from the dwelling and from the whole body of this Yezîdâd b. I.

(7) Again I bind to thee (Myhrman, to you) and seal and counterseal to thee (M. to you) the life and house and property and bedchamber of Yezîdâd (8) b. I., in the name of Gabriel and Michael and Raphael, and in the name of the angel 'Asiel and Ermes (Hermes) the great Lord. [In

the name of Yahu-in-Yahu] (9) and the great Abbahu and the great Abrakas (Abraxas), the guardian of good spirits and destroyer of evil spirits, I guard to thee (M. to you) the life, house, dwelling (10) and property of this Yezîdâd b. I. And I seal to thee (M. to you) the life, house and dwelling of this Merdûch bath Bânâi, that there sin not against you (M. them) all evil Arts (11) and all (magic) Circles and all Necklace-spirits and all Invocations and all Curses and all Losses and all ... and all sore Maladies and all evil Satans and all Idol-spirits and all impious Amulet-spirits and all mighty Tormentors, (12) which under my own hand I banish from this house in the name of Pharnagin bar Pharnagin, before whom trembles the sea and behind whom tremble the mountains, in the name of HH, HH, and in the name of (13) Bar-mešteel, whose proscription is proscribed and none trespasses upon his ward.

Lo, this mystery is for frustrating you, Mysteries, Arts, and enchanted Waters and Hair-spirits, Bowls and Knots and Vows and Necklace-spirits and Invocations and Curses (14) and evil Spirits and impious Amulet-spirits. And now, Demons and Demonesses and Lilis and Liliths and Plagues and evil Satans and all evil Tormentors, which appear—and all evil Injurers—in the likeness of vermin and reptile and in the likeness of beast and bird (15) and in the likeness of man and woman, and in every likeness and in all fashions: Desist and go forth from the house and from the dwelling and from the whole body of this Yezîdâd b. I. and from Merdûch his wife b. B., and from their sons and their daughters and all the people of their house, (16) that ye injure them not with any evil injury, nor bewilder nor amaze them, nor sin against them, nor appear to them either in dream by night or in slumber by day, from this day and forever. Amen, Amen, Selah.

And again I swear and adjure (17) thee: May the great Prince expel thee, he who breaks thy body and removes thy tribe. And by the seventy Men who hold seventy sickles, wherewith to kill all evil Demons and to destroy all impious Tormentors,—are they cast prostrate in troops and thrown on their beds. Amen, Amen, Selah, Halleluia.

Commentary

A charm made out for a man, his wife and household, against all manner of demons.

A comparison of these bowls, each written by a facile scribe with a well formed ductus, throws light on the history of the transmission and development of our magical inscriptions. Myhrman's text is shorter, in the other an appendix has also been added addressed against some particular but unnamed demon. The spelling in M. is more archaic, avoiding *matres lectionis,* the masc. pronom. suffix being represented by ה alone, ה is generally used for final *a,* the antique form מהנפיקנא is found (l. 6), as also the true reproduction of Hermes by ה. Also my text is more confused in the arrangement of the exorcised powers, M. follows the historical order. Formally then M. appears to be the elder text, in comparison with which mine is more inflated.

The most interesting point of difference is this: in M. the sealing is done "to you" throughout, but in my text "to thee" (l. 2, etc.). This plural has justly troubled Myhrman, and he suggests three possible explanations. But I believe the only explanation is that his text is polytheistic or rather a product of the common magic religion; in expressing three names of "the great God" Elaha, Shaddai and Sebaoth, the magician regarded them as a trinity of deities, just as in the magical papyri these Jewish (and other) divine names are invoked as so many deities (see § 11).[1] M's text is then of eclectic religious character. My text abjures all such polytheism, but that it is secondary to the other is shown by comparing them in ll. 9 and 10. M. retains its polytheistic plural; my text has clung to the form, but misunderstanding it has read ליבי (i. e. לבון = לבו = לבי = ליבי), and I suppose made it refer to the following feminine נפש, or to some feminine demon. For the same reason it reads, awkwardly, בבון in l. 10 for the correct להון. Thus an eclectic text, or its original, in which the deities invoked are the names of the Jewish God, has fallen into more orthodox hands and produced our monotheistic

[1] Cf., among the seven planetary spirits of the Ophites (Origen, *C. Cels.,* vi, 31) Ιαω, Σαβαωθ, Αδωναιος, Ελωαιος; the "angels" Αδωναι, Βασημμ, Ιαω, Dieterich, *Abraxas,* 182, l. 12; also in Pradel's Christian texts, *Sabaoth* and *Adonai* are found among angel-names (p. 47).

text, leaving but a trace or two of its original source. Such are the complications of this magic!

1. The opening singular invocation does not agree with the following plural in M.

יזידאד: name of a Nestorian writer, Payne Smith, col. 1586; Justi, p. 149, thinks the Syriac form an error, but our text confirms it. Our word could be Semitic = יזיד דד. Also note Izeddad in Justi, p. 147.

4. איזדנדוך: Justi, p. 146.

With אספנז, M, cf. in addition to his reference to Ašpenaz, *Dan.* 1: 3, the name Ašpazanda, Clay, *BE,* x, 41.

5. ציצי: plural, "the rays of light." This and the following term represent Hebrew כבוד.

יזעון: with expression of the half-vowel, as in cases cited earlier; cf. Stübe, l. 62. For the following Hithpalpel, s. Jastrow, p. 407.

ירורין, M: so the spelling surely, see above, p. 81.

6. "from the body": cf. the *φυλακτήριον σωματοφύλαξ*, London Papyrus, l. 589, Wessely, xlii, 39.

8. For the angels, see § 13; for four angels (cf. the four gods surrounding the magician in Babylonian magic; see above, on 6: 10) see Luekken, *Michael,* 34 f. Nuriel-Uriel is generally the fourth. In Stübe, l. 58, עניאל takes this place. עסיאל occurs in *Sefer Raziel,* s. Schwab, *Vocabulaire,* 214, and probably in a text of Pradel's (p. 22, l. 16), where *ασα* and *αφα* doubtless = Asael and Raphael. N. B. the care with which the scribe rewrites the name of Asiel; all four names are made to terminate in *-iel.*

אירמים = M. הרמים (the latter the closest to the Greek of our spellings) = Hermes, see to 2: 2. Myhrman's suggestion, which I originally (and independently) favored, that the word is Hormiz = Ahura-mazda, is ruled out by the fact that that element in our proper names is given by הורמיז.

יהו ביהו: cf. Stübe, l. 15 יהביה ביישמיה; Pognon B, no. 5, יה ביא; דביא, above 2: 2 (*q. v.*); יהו ביה, 13: 7. יהו ancient form of the divine Name, appearing (apart from biblical proper names and probable Babylonian forms) in the Assouan papyri, in the Greek magical papyri (Deissmann, *Bibelstudien,* 4 ff, Blau, p. 128 ff.) as Ιαω, surviving among the modern

Samaritans (Montgomery, *JBL,* 1906, 50, n. 5), and used in the magical texts current at Mossoul (*PSBA,* xxviii, 97). I think the doubled term here is theosophic: Yah-in-Yah; cf. the Christian Logos-doctrine and its terms, and Kabbalism. It is possible that Stübe's יהביה = Yahbēh (Ιαβη) = Yahweh. At all events this spelling-out of the full Tetragrammaton occurs in a proper name below, 26: 4.

9. אבהו, and פרנגין below, l. 12, probably correctly diagnosed by Myhrman as exalted sorcerers' names; see above p. 47. For the two Amoraim Abbahu, see *Jew. Enc., s. v.* A suggestion in another line is possible for Abbahu. King in his *Gnostics and their Remains,*[2] London, 1887, 246, says that the Pantheus or representation of the pantheistic Deity of the Gnostics, appearing on the Gnostic gems, "is invariably inscribed with his proper name ΙΑΩ and his epithets ΑΒΡΑΞΑΣ and ΣΑΒΑΩΘ and often accompanied with invocations such as .... ΑΒΛΑΝΑΘΑΝΑΛΒΑ, 'thou art our Father.'" Our Abbahu may represent this epithet and the passage would accordingly preserve three of the Gnostic designations of Deity: Yahu, Father, Abraxas. For Abraxas see above, p. 57, and for treatments of the subject and bibliographies the articles "Abrasax" in Hauck's *Realencyk., Jewish Encyc.,* and especially the splendid monograph by Leclercq, in *Dictionnaire de l'archéologie chrétienne,* etc. Variants in the bowls are אברכסיס and אברכיס. These forms represent *Abraxas* as against the original form Abrasax, hence I use the former word in the present volume. Myhrman remarks (p. 345): "As over against the view of Blau-Kohler (*Jew. Enc.* i, 130b) this would prove to be at least 'a single reliable instance' of this name occurring in Hebrew"—or at least in a Jewish document, as my text is. Abraxas is found in *Sefer Raziel,* 5a.

מחבלנא, מנטרנא: instances of the Syriac nominal formation from derived stems.

רוחי טבאתא: recalling the Jewish "good demons," see above, p. 76. The expression is also reminiscent of the Greek *ἀγαθὸς δαίμων*, frequent in magic.

מנטרנא (2d): ppl. w. suffix. It is represented by three ppls. in M., the second = מנחרנא, which M. translates, with a query, "pierce." This is impossible; I would suggest to read ה for ח, and understand the Afel,

= (Rabb.) Heb. הזכיר, of naming a person to a deity and so placing him under his protection.

10. מירדוך: Mer-dûcht, = Mithra-dûcht, Justi, p. 208, *Bemerk.*

באנאי = באנא 27: 8; a masc. name among the Jews, *Sefer ha-Doroth* ii, 84. But these names appear to be indifferently masc. and fem.; cf. 1: 4. The same name בני is found in Nabataean and Palmyrene inscriptions, Lidzbarski, *Handbuch,* 238, and = the frequent Babylonian Bâni-ia, cf. the name lists in Clay, *BE,* viii, pt. 1, pp. ix, x.

11. סרנין אפיקי, occurring frequently in the unpublished No. 2918. I interpret this from the Syriac סרנא, as of the magic circle, cf. חזאר רבאניא, 39: 7, and see p. 88. The circle was used particularly for necromancy and devil-raising. Cf. Eliphas Lévi, *Dogme et rituel de la haute magie,* Paris, 1856, ii, l. 14. The objection to this interpretation is the entire obscurity of אפיקי.

יצערי: for איצערי, *iṣ'âr,* cf. Maclean, *Dict. of Vernacular Syriac,* 193b; for the meaning, see p. 94, above.

For the epithet קשיי, cf. the epithets *χαλεπός, violentus,* etc., of the demons; cases cited by Tambornino, *De ant. daemonismo,* 15, 23.

12. "under my own hand": there is much imitation of legal forms in magical formulas.

פרנגין: evidently a Persian name; Myhrman as from *farna,* "good fortune," and *gin* (?) comparing Pharnakes, etc., Justi, p. 92-96. I may compare the Persian name Frenanh, Justi, p. 105b.

זיעין, זע, parallel to M's זעיין, זעא, in the latter as from root זעא.

13. בר משתאל = M. בר משתאיל, translated there "son of the inquirer of the oracle." We must go to the Assyrian for the explanation. There the corresponding form *muštâlu* means one who gives an oracle upon being asked, i. e. an oracle-giver, and is an epithet of deity. See Jastrow, *JBL,* xix, 99, and the reff. in Delitzsch, *Ass. Hwb., s. v.* שאל. The expression has the connotation of deciding the fates, with which cf. the following phrase in our text בר דנזירתיה נזירא may here be used like the Arabic *ibn,* without modifying its regimen. Or may the phrase = *bârû muštâlu,* "oracle-giving seer"? Some ancient phrase has been conventionalized and

personified. For the following expression concerning the inviolability of the "decree," cf. 38: 8.

מי מחראשי: ppl. pass. The root חרש came to be used particularly of poisoning. The זיפי are probably "hairs," Syriac *zeppâ*. Any portion of a person's body, especially hairs, nails, etc., as detachable, could be used in magic directed against him. See Thompson, *Sem. Magic*, Index, *s. v.* "hair," and with abundant citation of comparative magic, Abt, *Apuleius*, 179 ff.; also Blau, p. 161.

14. For the appearance of devils in animal forms, cf. the reply of the demon to St. Michael in a text of Pradel's (p. 23): "I enter their houses metamorphosed as snake, dragon, vermin, quadruped."

15. גיונין = *gᵉwânîn*, cf. l. 16, vs. M. גונין *gawwânîn* or *gaunîn* (?).

16. תיחבלן, תישנן: Paels, with י for preformative half-vowel. I understand תישנן and תיפרדן, of the demoniac bewilderment of the victim (see Jastrow, *s. vv.*), or actual insanity. M. has for these verbs "לא תידרון in their house"; Myhrman's translation, "shall not dwell," would require תדורן. It looks as if תידרון is for תיפרדן, or an error for תירדן, from פרד = רדא.

שחרתא: so also 8: 11, but generally in parallel occurrences, e. g. Myhrman's text, שינתא. The same noun is found in the Mandaic, שנתא וש' (*Ginza*, Norberg's text, ii, 18, l. 12), and the verb. שחר ושכב (*ib.*, l. 19). It means to "snore, sleep profoundly" (cf. Heb. תרדמה) = Arabic *šaḥara*. Cf. 6: 10.

17. סרא רבא: cf. 5: 31 and see p. 97. מפסים: cf. Ass. *pasâsu*.

"70 men holding 70 sharp sickles": i. e. the 70 angels or shepherds, representing the 70 nations, *Enoch* 89: 59 (originally regarded as good angels, Schürer, *GJV*⁴, iii, 198, n. 32, Lueken, *Michael*, 14, but later legend regarded them as fallen). The "sharp sickles" are an echo of *Rev.* 14: 14 ff., where the Peshitto uses the same words as here. This coincidence (cf. also *Mt.* 13: 37 ff.) argues for a common source of ideas.

שיציה: inf. of שיצי, Targumic but not Talmudic.

מסחפין: Pael pass. ppl., of the Syriac and Mandaic root "prostrate." Or possibly cf. the Rabbinic meaning "put on a cover," with reference to the inverting of the bowls, see to 4: 1, 6: 1. The "beds" are metaphorical of weakness and subjection, cf. *Is.*, 50: 11.

TRANSLATION

In the name of the Lord of salvations.

Designated is this bowl for the sealing of the house of this Geyônâi bar Mâmâi, that there flee (2) from him the evil Lilith, in the name of 'YHWH El has scattered'; the Lilith, the male Lilis and the female Liliths, the Hag (ghost?) and the Ghul, (3) the three of you, the four of you and the five of you; [naked] are you sent forth, nor are you clad, with your hair dishevelled and let fly behind your backs. It is made known to you, (4) whose father is named Palḥas and whose mother Pelaḥdad: Hear and obey and come forth from the house and the dwelling of this Geyônâi b. M. and from Rašnôi his wife (5) bath Mârath.

And again, you shall not appear to them in his (*sic*) house nor in their dwelling nor in their bedchamber, because it is announced to you, whose father is named Palḥas and whose mother (6) Pelaḥdad,—because it is announced to you that Rabbi Joshua bar Peraḥia has sent against you the ban. I adjure you [by the glory (= name)] of Palḥas your father (7) and by the name of Pelaḥdad your mother. A divorce-writ has come down to us from heaven and there is found written in it for your advisement and your terrification, in the name of Palsa-Pelîsa ('Divorcer-Divorced'), who renders to thee thy divorce and thy separation, your divorces (8) and your separations. Thou, Lilith, male Lili and female Lilith, Hag and Ghul, be in the ban .... [of Rabbi] Joshua b. P.

And thus has spoken to us Rabbi Joshua b. P.: (9) A divorce writ has come for you (thee?) from across the sea, and there is found written in it [against you], whose father is named Palḥas and whose mother Pelaḥdad, ... they hear from the firmament (10) .... Hear and they and go from the house and from the dwelling of this Geyônâi b. M. and from Rašnôi his wife b. M.

And again, you shall not appear to them (11) either in dream by night nor in slumber by day, because you are sealed with the signet of El Shaddai and with the signet of the house of Joshua b. Peraḥia and by the Seven (?) which are before him. Thou Lilith, male Lili and female

Lilith, Hag and Ghul, I adjure you by the Strong One of Abraham, by the Rock of Isaac, by the Shaddai of Jacob, by Yah (?) his name .... by Yah his memorial .... I adjure (13) you to turn away from this Rašnôi b. M. and from Geyônâi her husband b. M. Your divorce and writ (?) and letter of separation .... sent through holy Angels .... the Hosts of fire in the spheres, the Chariots of El-Panim before him standing, (14) the Beasts worshipping in the fire of his throne and in the water, the Legions of I-am-that-I-am, this his name .... And by the adjuration of holy Angels, by ....el the great angel, and by 'Azriel the great angel, (15) and by Ḳabḳabḳiel the great angel, and by 'Aḳariel the great angel, I uproot the evil Necklace-spirits. Moreover you evil Liliths, evil Counter-charms, ... and the letter of divorce (16). And again, do not return to them from this day and forever. Amen, Amen, Selah. Sealed upon him .... Gabriel (?).

Again (I adjure you), evil Lilith and evil Spirit .... (17) .... or kill .... depart from this Rašnôi b. M. And be they preserved for life! Amen, Amen, Selah, Halleluia.

Commentary

A charm for a man and his wife, particularly against the Liliths (a picture of one of which obscene creatures decorates the bowl), made out in the form of a divorce-writ. The inscription is very indistinct and towards the end becomes almost illegible. No. 17 is in large part an abbreviated and mutilated replica.

1. גיונאי: Gewânâi (cf. 7: 15), or Ge(y)ônâi (from גאון, or גון, "color"?). Cf. גיונאי appearing in Bar Bahlul's Syriac-Arabic lexicon, where it is equated with *wald*, etc., to which Payne-Smith adds, "vox corrupta ex *γόνος*," *Thes.*, col. 708.

מאמי, and below מאמאי, in No. 15 מאמא: one of the most frequent feminine names in these texts; see Nöldeke, *WZKM*, vi, 309, Lidzbarski, *Eph.* i, 75 f., 97, n. 3; ii, 419. Budge in his edition of Thomas of Marga's Book of Governors (ii, 648) gives a note contributed by Jensen that Mami is a name of *bêlit ilâni*, the mother-goddess.

2. לילית בישתא: the generic lilith is differentiated into several different species, the male and the female, the ghost and the vampire, hence "the

3, the 4, and the 5 of you" below. In the following text it is a question whether the 2d per. sing. or plur. should be read in many places. The two numbers are clearly distinguished in l. 7, end. But the obscurity consists in the equivalence of לכי and לכין, like the case of the loss of ן in the verbal forms in תין in later Aramaic, e. g. חתימיתי, l. 11; also אנתי, l. 15, is plural, as בישאתא shows. Also the confusion of ו and י in our script renders the distinction between masc. and fem. uncertain. Do the imperatives in l. 10 terminate in *î* or *û*, the latter a masculine form (inclusive of the feminine), the former possibly to be compared with the Syriac? My English "you" covers the uncertainty between sing. and pl.

בישמיה דפזר י' אל: a prophylactic "word," like the magical quotations from Scriptures; cf. a similar case at end of No. 42.

At end of l. 2 are named the five different "modes" of the lilith. שלניתא and חטפיתא are unique demoniac names, found only here and in No. 17. The probable identity of ח' with the Arabic Ghul suggests connecting ש' with the Arabic *si'lât;* Lane, *Lexicon,* 1365, and at length his *Arabian Nights,* c. 1, n. 21, and also van Vloten, *WZKM,* vii, 179, who quotes an Arabic author to the effect that the Si'lât is the witch of the feminine Jinns. (The Arabic root sa'ala, "cough," = Syriac שעל.). We have then to account for the loss of the ע. The form would be comparable to שאדניתא. Another possibility is = Assyrian *šûlû,* "ghost," Muss-Arnolt, *Dict.* 1036 (from עלה?), the formation being originally *šêlânîtu* (cf. *êlânu* from עלה). The witch or Ghûl is preferable in the context, however in No. 39 the Lilith appears as the ghost of a dead relative, so that the context does not determine the etymology.

חטפיתא, or חטיפיתא No. 17, "ravager," represents the Heb. תחמס ("ostrich"?—such is the tradition in Onkelos and LXX) in Targum Jer. to *Lev.* 11: 16, *Dt.* 14: 15 (where these two spellings also are found), among the unclean birds. Horrible bird-like forms were given to the demons by the Babylonian imagination, Jastrow, *Rel. Bab. u. Ass.,* i, 281; also cf. *Utukki*-series, B, 35 f. The ostrich itself even in the rationalizing Old Testament is half demoniac; cf. the notes on the ירורין, p. 81. Probably the ח' is exactly the Arabic Ghul, which is thus described by Doughty: "A Cyclops' eye set in the midst of her human-like head, long beak of jaws, in the ends one or two great sharp tushes, long neck; her arms like

chickens' fledgling wings, the fingers of her hands not divided; the body big as a camel but in shape like as the ostrich; the sex is only feminine. She has a foot as the ass' hoof and a foot as an ostrich," etc. (*Arabia Deserta,* i, 53, quoted by Thompson, *Sem. Magic,* 60).

3. תליתיכין : for the sharpening of the vowel, *t*^{e}*lîttâi* from *t*^{e}*lâttâi,* see my notes on פריכא, p. 73.

ערטילן: supplied from 17: 5, as also other bracketed passages. סעריכין is sing., as סתיר shows. Nakedness and dishevelled hair are standing descriptions of the lilith, witch, etc. See references above, p. 77; add Kohut, *Jüdische Angelologie,* 88, and for Arabic legend, Wellhausen. *Skizzen,* 3, p. 32. The picture presents the abandoned character of the lilith—e. g. the Labartu is called a whore—, and also her shameful, outlawed position.

שמיע עליכין: על = ל as constantly in these texts and as in Mandaic. The naming of the demon's forbears has a compelling power, as part of name-magic; see p. 58. Cf. the naming of the parents of the demon Βαινχωωχ in the invocation of his appearance in a charm of Wessely's (xlii, 60, from Brit. Mus. Pap. cxxiii). The same names distorted and applied *vice versa* appear in No. 17; similar names also in No. 11.

פוקי: often along with synonymous verbs, איתרחק, זוע, etc. Cf. the Babylonian *ištu bîti ṣî* (*Utukki*-series, iii, 158), the long series of imperatives in *Maḳlu*-series, v, 166 ff., etc.; *Mk.* 9: 25, *Acts* 16: 18; in Gollancz's Syriac charms; in the Greek, e. g. Reitzenstein, *Poimandres,* 295, 298 (where the demon is also bidden not to disobey).

4. רשנוי: probably hypocoristic from Rašnu, name of a Zoroastrian genius, see Justi, p. 259. Cf. the names ראשנינדוך, רישינדוך, in Glossary.

5. מארת = מרתא (15: 2), "Martha."

6. "Rabbi J. b. P.": see commentary No. 32, and below, l. 7.

"by the *glory* of your father": hardly an appeal to the demon's sense of honor. יקר must be equivalent to "name," cf. the parallelism and the equivalence of the Name and the Glory in the Old Testament, where כבוד is also used of the human personality.

7. ניטא נחית לנא: the separation of the lilith from her victim is expressed in terms of a divorce-writ. This was a happy thought of the

magicians, who thus applied the powers of binding and loosing claimed by the rabbis to the disgusting unions of demons and mortals. The logic of the procedure was very simple—if only the liliths were as submissive to divorce as their human sisters. The decree is frequent in these bowl incantations,, and first appeared in Ellis's bowl, no. 1. But I do not know of any case of the occurrence of this magical *Get* outside of the bowls.

The magical writ affects the same forms and formalism as that of the divorce court.[1] In the parallel bowl, No. 17, a form of date is given (l. 1 יומא הדין), which was a requisite in the legal *Get*. The names of both parties are exactly given, hence the parents of the liliths are here specifically named. The very terms of divorce are repeated in 17: 2: שביקת ופטרית ותרכית יתיבי; cf. the facsimile of a *Get* given as a frontispiece in Amram's work (פטרית שבקית ותריכית יתיבי). It was necessary that the writ should be properly served on the divorcée, hence in 26: 6, שקולי גיטבי: "take thy writ," a sentence consummating the process, and then the divorced demon must betake herself from her victim's property, as commanded by the peremptory; "Hear, obey and go forth" (l. 10). But there is a difference; against spiritual powers divine authority was necessary. And so it is affected that the writ has come down from heaven (l. 7), that is, it belongs to the category of writs from foreign countries for which there were special forms; hence the גיטא אתא מן עיבר ימא, l. 9. The commissioners and witnesses are the holy angels, etc., l. 9 f. A rabbi is also at hand to seal as notary the divine decree, none other than the famous master-magician Joshua b. Perahia. For a further phase of this "divorce-writ" see to 11: 7. In l. 7, both the sing. and pl. are carefully used, so as to include both the definite lilith and also the whole brood.

7. חידוריכין, שימועיכין: Pael infinitives with first syllable in *i*.

פלסא פליסא: the root = "split asunder."

מתיב (?) may be ppl. from תוב in sense of Latin *reddere*.

11. "the house of Joshua": i. e. of the school of sorcery; in 34: 2 the sorcerer calls himself "J.'s cousin."

[1] See D. W. Amram, *Jewish Law of Divorce* (Philadelphia, 1896), esp. c. xiii; *Jewish Encyc., s. vv. Divorce, Get.*

בשבעה: "by the Seven"?—i. e. the seven angels, genii, etc.? The seven planets are so called simply in Syriac.

12. באביר אברהם וגי: cf. *Is.* 49: 24, יעקב אי; for the Rock of Isaac, cf. *Is.* 30: 29, Rock of Israel. The "Shaddai of Jacob" is unique. The scribe was not mighty in the Scriptures. But cf. *Ecclus.* 51: 2: "give thanks to the Shield of Abraham, ... to the Rock of Isaac, ... to the Mighty One of Jacob."

13. אינרת שיבוק: another term for the divorce-writ.

From l. 13 to end the text is largely mutilated or illegible; this is the more unfortunate as there are traces of interesting apocryphal or kabbalistic passages. Viz. "the hosts of fire in the spheres"; "the chariots of El-Panim"; "the beasts worshipping in the fire of his throne and in the water," with which cf. the glassy sea of Revelation. The following term דיגלי ("banners," then "cohorts") is a common word in the Targumic literature for the angelic hosts, according to *Shemoth Rabba* 15, = צבאות. (But the phrase may mean, "who is revealed as.") The language is Hebrew and the allusions are taken doubtless from apocalyptic literature.

14. עזריאל is known as an angel of the divine chariot, Schwab, *Vocabulaire, s. v.*, and עקריאל is found *ibid.*; n. b. play with עקרית.

15. The reference to the ענקתא indicates that witchcraft is behind these devilish manifestations; the lilith and the witch are practically identical, see p. 78.

17. "may they be established for life"; cf. the finale of the Mandaic texts, "Life is victorious." The same expression in 12: 3, and the negative wish against devils in Wohlstein 2426: 9; but in his no. 2417: 22 the verb is used of the resurrection. At least the vague idea of immortality may be contained in the phrases.

Translation

The bowl I deposit and sink down, and the work (2) I operate, and it is in [the fashion of] Rabbi Joshua (3) bar Perahia. I write for them divorces, for all the Liliths who appear to them, in this (house of ?) (4) Bâbanôš bar Ḳâyômtâ and of Saradust bath Širin his wife, in dream by night and in slumber (5) by day; namely a writ of separation and divorce; in virtue of letter (abstracted) from letter, and letters from letters, (6) and of word from words, and of pronunciation from pronunciations; whereby are swallowed up heaven and earth, the mountains are uprooted, and by them the heights melt away.

(7) Oh, Demons, Arts and Devils and Laṭbê, perish by them from the world! Therefore (?) I have mounted up over them (you?) to the celestial height, and I have brought against you (8) a destroyer to

destroy them (you) and to bring you forth from their house and their dwelling and their threshold and all .... place of the bedchamber of Bâbanôš b. Ḳ. (9) and of Saradust b. Š. his wife. And again, do not appear to them, neither in dream of night nor in sleep of day .... I dismiss you (10) .... letters of separation .....

(11, exterior) In thy name have I wrought, YHWH, God, Sebaoth, Gabriel and Michael and Raphael. Thy seal is upon this besealment and upon this threshold. Amen, Amen.

COMMENTARY

A charm for a man and his wife. The inscription is illiterate, and is largely parallel to (doubtless dependent upon) the Syriac text No. 32 = No. 33; also cf. No. 8.

1. פורא רמינא ושקינא: the same phrase appears in 32: 3 and 33: 1, whence the third word in the present text can be restored. It is very obscure and I propose the following explanation. פ׳ is a synonym for כוסא "bowl," and is the Syriac and Mandaic פוחרא (*puḥrâ*) which came to mean "symposium," but goes back to the root פחר, giving the words for the potter and his art, i. e. originally it was a potter's vessel. For the loss of the guttural in our present word, cf. Mandaic שורא for שוחרא, etc. רמינא I take in the common Syriac sense of laying a foundation; the bowl was placed, as we have seen, at one of the four corners of the house. For שקינא, we must assume a parallel significance, and it is to be derived from שקע, treated as ל״א, in the similar sense "to sink" (the 1st Form is used as an active in Rabbinic). As the phrase appears in our Syriac bowls, which are largely colored by Mandaic idioms, the reference to this dialect is justifiable.

עובדא: see p. 51; in the parallels עבורא דעבוד.

2. In the lacuna מיתדמנותא might be read. הוא הוא is a Syriac idiom, taken from the Syriac parallel.

3. בהדין: awkward; probably for בהדין ביתיה ד׳; cf. 32: 5.

4. בבנוש probably באבנוש in l. 8. The first element is *bâbâ* or *pâpâ* (Persian *p* often = Semitic *b*), Justi, pp. 54, 241, the second the Persian genius-name Anôš.

קיומ[תא] : ת was legible to the original copyist of these bowls in l. 8. The name signifies *patrona*. The masc. קיומא appears in Pognon B.

סרדוסת : apparently a form of Zarathuštra; see Justi, p. 379 f., where the frequent spelling *Zaradušt* is cited in names. But strange is the application of this masculine name to a woman.

שירין: cf. the name *Sîrîn*, Tabari's Chronicles, ed. de Goeje, i, 4, p. 100, l. 3.

דניטא דפיטורין דשבוקין: the repeated ד defies construction; cf. l. 6. The terms all appear in No. 8.

5. בשום אות מתוך אות וגי: a parallel phrase appears in 32: 6; here the words are Hebrew. The general sense of these obscure phrases is clear; they refer to the magical use of letters and words and the manipulation of their pronunciations, such for instance as we find in the treatment of יהוה and in the Greek magic of the seven vowels. Cf. Pradel, p. 35, l. 9, "in the name of these angels and letters."

6. ונקב וגי : this root appears in the Bible where it passes from the physical "prick, prick out," to the sense "distinguish," that is, in speech, "pronounce clearly." It is the question in *Sanh.* 56a whether נקב שם יהוה is so used or in the sense "blaspheme." In the present case it means "pronounce," and is synonymous to the Piel פריש as that appears in שם המפורש.[1] Mystic or traditional renderings of the Tetragrammaton are doubtless referred to, but all this is only mysteriously suggested here; the magician does not offer us samples of his rare art. There is a garbled form of these phrases in 32: 6.

דיבהן יתבלעו: cf. 7: 12.

טוריא: a Mandaic spelling for the plural in *ê*.

7. לטבי a category appearing only in the bowls, see above p. 81, and Glossary.

בכין: probably the Targumic "therefore."

This and the following line are difficult by reason of an inconsequent use of the pronouns; the scribe was writing by rote. Light is thrown

[1] For this discussion see Dalman, *Der Gottesname Adonay*, 44 ff.

on the passage from 32: 8 f. (*q. v.*), where is given the tradition of Joshua b. Perahia's ascent to heaven, by which he obtained mastery over all evil powers. Our scribe boldly turns the 3d person of the legend into the first person—of himself,—an instance of the attempted identification of the magician with deity or master-magician.

לימרומא: so the parallel demands.

איתיתי: appears to be Afel; תי- is hebraizing.

8. מחבלא = המשחית, Ex. 12: 23; in the parallel the abstract חבילא.

11. For the asyndeton connection of the angelic names with that of Deity, see above, pp. 58 f, 99, and note the Greek parallels. Sebaoth appears to replace one of the four archangels; cf. the personification of S. in Myhrman's text.

No. 10 (CBS 16014)

דנא קמיעה לאסותה דהדא ניונדוך בת כפני וכפני בעלה בר שרקוי וזדו ברה וביתה ואיסקופתה כולה בשום יה יהו אה . . . . . Translation

This amulet is for the salvation of this Nêwândûch bath Kaphnî, and Kaphnî her husband bar Šarḳôi, and Zâdôi her son, and her house and her whole threshold, in the name of Yah, Yahu, Ah, ... (2) Sealed, and countersealed are this house and this threshold .... in the name of LLZRyôn and Šabiel and Gabriel and Eliel ..... (3) And sealed are these, Zâdôi and Nêwândûch, with that seal with which the First Adam sealed Seth his son and he was preserved from Demons (4) and Devils and Tormentors and Satans. Again sealed and countersealed are these, the son of Šarkôi and Nêwândûch his wife b. (5) K. and Zâdôi her son, with that seal with which Noah sealed the ark from the waters of the Deluge. (6) And may they fly and cease and go forth and remove from them and from their house and their abode and their bed-chamber, from this day and forever.

Commentary

A charm for a woman and her family. It is decorated with a figure having a beaked, bird-like face.

קמיעה: see Introduction, p. 44.

ניונדוך: for the name see to 5 : 1; the same person appears in No. 11.

כפני : probably for *Kafnâi,* "the hungry one." The woman's husband and father had the same name. This is a case of the father's name being given, against the rule; for other examples, see 12: 1, Pognon B, p. 98, and the name פאפא, in Lidzbarski 5.

שרקוי: cf. the Persian name *Serkoh* Justi, p. 296.

(י)זרוי: the full spelling appears in l. 5; for the name, *ibid.*, p. 382. A *Z*ârôi appears in 37: 3.

2. אינחור ונו': I can make nothing out of these words.

For Šabiel and Eliel, see Schwab, *Vocabulaire,* 251, 57. The first name is probably mystical.

3. בה הוא: emphatic use of הוא; cf. *Dan.* 7: 15.

For these apocryphal references to the seal of Adam and Noah, cf. p. 64, and for the Jewish legends see *Jew. Enc.,* s. v., "Seth," "Noah." It is in the Babylonian story not the Biblical that the hero shuts himself in.

5. טופנא: found in Targ. Onk. to *Gen.* 6: 17, = τυφῶν, frequent in the Greek magical vocabulary.

No. 11 (CBS 16022)

A charm for a woman and her household, in terms of a divorce from the evil spirits.

The text would be legible only for a half, but for the interesting fact that it is one of four almost duplicate inscriptions. The longest and clearest of these is the Mandaic bowl, no. 5, published by Lidzbarski. Another is, remarkably enough, the first inscription of this category ever published, Ellis no. 1, in Layard, *Nineveh and Babylon*, 512 ff.; see § 2.[1] The latter is given in poor facsimile, and none has taken the trouble to collate afresh the bowl in the British Museum, a simple task which doubtless would have allayed the difficulties.

Of this text the bowl from Nippur is practically a duplicate, and, with the help of Lidzbarski's inscription, I am able to restore almost the entire text not only of our bowl but also of that in the British Museum.

There is also a fourth duplicate, No. 18. It can be read only by comparison with the three presented here, and so I have left it in its original place in my arrangement of these inscriptions, especially as it contributes nothing further to the understanding of their contents.

I have thought it worth while to present the three texts in parallel columns. This process facilitates the verification of emendations, while the variations which present themselves throw interesting light upon the natural history of magical inscriptions. We mark how magical terms which once had a meaning become blurred and obscured at the hands of generations of sorcerers and copyists, until sense becomes nonsense, or simple word or phrase receives a kabbalistic interpretation. The Mandaic appears to have the latest type of text, having evidently transferred its material from another script and dialect. Cf. the parallel texts in No. 7.

In the following texts I have slightly abbreviated the names in the 2d and 3d columns, and omitted a few unimportant phrases in the 3d (always so noted). It is not necessary to give a translation of Ellis's

[1] As suggested in that section, n. 4, this was the bowl obtained by Layard from Nippur.

bowl, as the text is now almost entirely intelligible. The enumeration of lines in Ellis's text is according to the spiral lines.

Translation

Salvation from Heaven for this Nêwândûch bath Kaphnî, that she be saved (2) by the love of Heaven from the Lilith and the Tormentor. Amen. Amen. Again, fly and refrain (3) and remove from Nêwândûch b. K., the Lilith and the Tormentor and Fever and Barrenness (4) and Abortion; in the name of him who controls the Demons and Devils and Liliths, and in the name of "I-am-that-I-am."

For the binding of (5) Bagdânâ, their king and ruler, the king of Demons and [Devils], the [great] ruler of Liliths. I adjure thee, Lilith Halbas, granddaughter of Lilith Zarnî, [dwelling] in the house and dwelling of Nêwândûch b. K. and [plaguing] boys and girls, (7) that thou be smitten in the courses (?) of thy heart and with the lance of ...., who is powerful .... over you.

Behold I have written for thee (i. e. a divorce), and behold I have separated thee [from N. b. K. etc.], [like the Demons] (8) who write divorces for their wives, and do not return to them. Take thy divorce from Nêwândûch b. K. and do not appear to her, neither by night nor by day, and do not lie [with her]. And do not (9) kill her sons and daughters. In the name of Memintaš (?) keeper of Habgezîg (?). Yô, Yad, Yaṭ, Yaṭ, Yaṭ. By the seal on which is carved and engraved the Ineffable Name, since the days of the world, the six days of creation.

Commentary

1. Nêwândûch b. Kaphnî: the same as in No. 10; here without mention of a husband. It is also the name of the mother of the client in Ellis's bowl.

2. רחמי שמיה: cf. "the great Lord of love." "Heaven" is used here and in parallel passages as surrogate for Deity, after ancient Jewish use; the same use in 18: 1 and Wohlstein 2422: 3.

3. שערתא : a new word. I would connect it with the Arabic root *s'r* (Heb. שער, סער), with the meaning "be hot, rage," etc. See the various derivative nouns in Lane, *Arabic-English Lexicon*, 1363: *sa'r*, "burning, shooting," *su'r*, "demoniacal possession, madness, mange"; *sa'rat* (our very form!) "cough," etc. Possibly fever, or poison. The Arabic *su'r* connotes infection.

4. תכלתא: "bereavement," then used of abortion, the reference being to a mischievous killing by magic of the unborn child.

It is unfortunate that in the first line of Ellis's inscription, the name following נירך, i. e. "Nirig" is indecipherable from the facsimile. For נירך = נירנ, cf. נכל, on the Nêrab inscriptions, = Nin-gal. In אבטור טורא, the second word is a careless repetition of the first.

5. At the end of this line begins the parallelism with the two other inscriptions. Our very first word, which appears as one in a series of divine names, e. g. El-sûr, is explained from the parallel which shows that אל איסור was meant; the unusual form אל (= על) was taken to be = "god," and the passage became hopeless. The same process of corruption will be found below on the Mandaic side.

בגדנא: so in Ellis, but in the Mandaic bowl אבונדאנא (= אבונבאנא in Pognon B). See Lidzbarski's attempts at explanation. But our בגדנא is the elder form; see on 19: 6, 13, where ב' is both generic and personal.

מליכיהן: the first י is an error as the subsequent spelling shows; the second represents the half-vowel. The scribe in our text has been confused and repeated his words here. For the "king of demons," see p. 74.

חלבס = חבסלס = חלדאס, in the three texts; cf. the names in the parallel texts Nos. 8 and 17: פלחס and פלחדד, פלחדד and פלחן. Proof of the impossibility of etymologizing on these forms! The accompanying lilith in the Mandaic, תאכלת, must be connected with our תכלתא above; abortion is personified. The granddam of the lilith appears to be better known as it is identical in all three inscriptions. The two liliths in the Mandaic are interpreted by Ellis's text; they are the male and female respectively; cf. below, l. 8, לא תשכבין עימה.

7. טורפס = טופרס = טאפרוס: these various forms throw no light on the word. It looks as if it were a corrupted Greek anatomical term.

לילביכין = ליבבכי (Ellis): our text explains the reading of the elder bowl לבב = ללב, the former a metaplasis of the latter; the same form in 18: 7.

קאטריאוים = תיקס = ?: the latter has, as Lidzbarski recognizes, a peculiar Mandaic form. I am inclined again to hold that the parallel shorter forms are more original. The reading in our bowl is different from the other two. For תיקס נברא cf. אברא נ', 3: 2.

הא כתבית: explained by the second column, where *plus* בכתבא i. e. the divorce-writ. Curiously enough the Mandaic has taken the interjection הא as a pronoun[2] and rendered it by האזין.

פטרית: cf. Ass. *paṭâru*, "break a charm."

כמא שידי דכתבין ניטי: cf. 8: 7. The additional thought appears here that inasmuch as demons divorce their spouses, divorce-writs must be as effective on them as among human kind. Cf. also No. 18. It may be noticed here that the first and third texts address a special lilith in the singular, the second goes over into the plural; the same uncertainty in No. 8.

9. בנה: (= plural) Mandaism; so also below עלוהי = עלה.

בישום ממינתש = Mand. אמאתעמא, the second text obscure. Again no light! There is considerable similarity in the following magical syllables.

בעזקתיה ונ': with the help of the parallels we can make out the reading. It and Ellis's inscription are almost identical. The Mandaic gives here a striking instance of perversion. The prepositional phrase עלה (or its equivalent) was understood as "God" and turned into אלהא; this took with it the ppls. ציר and גליף, which were raised to divine dignity to accommodate the epithet אלהא. The invention appears to have been prized, as the deity *Sîr-Geliph* is also introduced above in the same inscription. The שם מפורש is thus reduced to a travesty! The well-known Jewish phrase appears also in Schwab, E.[3]

[2] Cf. Nöldeke, *Mand. Gram.* § 81.

[3] For the true explanation of this term, see Arnold, *Journ. of Biblical Lit.*, 1905, 107 ff.

Solomon's magic ring (first mentioned by Josephus) inscribed with the Tetragrammaton is the subject of Haggada in *Giṭṭ.* 68a, b. Later legend, especially Arabic, developed the wonders of this magic ring.[4] According to the end of our inscriptions this seal engraved with the divine Name was in existence since the week of creation (= בראשית). This is an addition to the ten things which according to *Pirḳê Abôth,* 5: 8, were created on the eve of the first Sabbath—among which were the alphabetic script and the tables of the Law.

Translation

Salvation from Heaven for Dâdbeh bar Asmandûch and for Šarḳôi (2) bath Dâdâ his wife, and for their sons and daughters and their house (3) and their property, that they may have offspring and may live and be established and be preserved (4) from Demons and Devils and Plagues and Satans and Curses and Liliths and Tormentors, which may appear (5) to them. I adjure thee, the angel which descends from heaven—there being kneaded (something) in the shape of a horn, on which honey is poured—(6) the angel who does the will of his Lord and who walks upon the (throne-) steps of his Lord *še'û*, and who is praised in the heavens (7) *še'û*, and his praise is in earth *semû*;—they are filled with glory, who endure and keep pure since the days of eternity, and their feet (8) are not seen in their dances by the whole world, and they sit and stand in their

place, blowing like the blast, lightening like the lightning. (9) These will frustrate and ban all Familiars and Countercharms and Necklace-spirits and Curses and Invocations and Knockings and Rites and Words and Demons (10) and Devils and Plagues and Liliths and Idol-spirits and Tormentors and everything whatsoever evil, that they shall flee and depart from Dâdbeh b. A. and from Sarkôi (11) b. Dâdâ his wife and from Ḥônîḳ and Yasmîn and Kûfithâi and Mehdûch and Abraham and Pannôi and Šili the children of Šarkôi and from their house and from (12) their property and from their dwelling, wherein they dwell, from this day and forever, in the name of YHWH Sebaoth. Amen, Amen, Selah. "YHWH keep thee from all evil, keep thy soul."

Exterior

(13). Of the inner room, of the hall.

COMMENTARY

A charm for a man and his wife and their seven named children, in the form of an adjuration of a certain potent angel. There is rubrical reference to a magical operation for compelling this angelic assistance. The same family appears also in No. 16 and the Syriac Nos. 31, 33. Prof. Gottheil has presented a tentative translation in Peters, *Nippur,* ii, 182.

1. דדבה: probably abbreviated from *Dâdbuyeh;* see Justi, p. 75.

אסמנדוך: see *ibid.,* p. 281, the Armenian name Samandûcht.

שרקוי: see 10: 1.

2. דאדה· Justi, p. 75, *Dâdâ.* The name is Semitic, e. g. Palmyrene and Syriac דאדא, from root דוד. The name looks like a masculine (for the use of the father's name see to 10: 1), but may equal דאדיא, 39: 2.

4. שובטי: for the form cf. Nöldeke, *Mand. Gram.,* § 19, and for the species, p. 80 f., above.

5. כד גביל ונ׳ (read דמות for דמת): a rubric directing an operation compelling the presence of the angel through a simulacrum and its manipulation. The insertion of the rubric into the text of incantation appears in the Babylonian magic, see King, *Babylonian Magic,* p. xxviii. It may be queried whether our sorcerer is not reciting a form unintelligible to him;

cf. the intrusion of rubrics into the Psalms. The ancient charm was for binding the good spirits as well as the evil; the incantation as well as the exorcism was a *κατάδεσμος* (see Heitmüller, *"Im Namen Jesu,"* 2d part). In the early Babylonian magic images of the favorable gods were made and used in the rites; a good example is found in Zimmern's *Šurpu* series, no 54 (p. 169 = Thompson, *Sem. Magic,* p. lviii). Probably idolatry has its basis in this magical idea. Reverence gradually obscured the idea that the gods were thus bound, it survived only in the word-magic. But in the present case a "horn" (symbol of power?), probably a cone of wax or the like is kneaded, and honey poured upon it, with which we may compare the antique anointing of the sacred stone or *bethel,*[1] wherein the suppliant literally "smooths" the face of of deity (Heb. חלה).[2] The rubric is, I think, unique in Jewish magic. For the magical use of honey, see Thompson in Index, *s. v.*

6. מרוה: for the plural, cf. instance in Jastrow, *Dict.,* 834b; or the form may be regarded as parallel to אבוהי.

We have here a bit of poetic lore about the angels, describing their worship and service of the Almighty. It appears to be a quotation from some Midrash. Who the angel invoked is, does not appear,—Michael? The terms סמו, ישאו, are probably mysterious utterances to awe the hearer; cf. *ômô, ômô,* 3: 3 (from שמע, "hear," נשא "lift up in worship"?). For the description "blowing like the blast," etc., cf. *Ps.* 104: 4.

7. ציציה: cf. ציצי דצבאות, 7: 5. The description passes to a plural subject here.

נינריהון: a Rabbinical form; נגר = לגר = רגל, "foot." For ל = נ cf. Nöldeke, *Mand. Gram.,* 54.

8. The choric dances of the angels are a pretty fancy, cf. *Job* 38: 7.

[1] Small conical stones are found in the oriental explorations, doubtless domestic *baitylia;* see Vincent, *Canaan d'après l'exploration récente,* 177, and Scheil, *Mémoires de la Délégation Perse,* vii, 103, 112 f. (Fig. 34-37, 340 ff, 374, 381).

[2] For an extensive collation of like instances in Graeco-Roman magic see Abt, *Die Apologie des Apuleius, 222* ff., *227.* May the term in Apuleius, *βασιλεύς,* the magic-god whose image is formed for purposes of sorcery, (a term much disputed by the commentators) = מלך = מלאך, the word used here?

9. For the ניסי and שיקופתא, see 6: 2 and p. 86. אנקי is a masculinized form of ענקתא (see p. 88).

11. הוניק: I cannot identify. The Glossary shows two other men of the same name.

יסמין: a Persian name, = "jasmine," cf. Justi, p. 145.

בופיתי: the same name in No. 2 (in אי-).

מהדוך: cf. Syr. מהדוכתי, Justi, p. 186.

פנוי: the Arabic Fannuyeh; see Nöldeke, *Persiche Studien,* 405.

שילי hypocoristic of שילא, name of several Amoraim; see *Seder ha-Doroth,* ii, 347. Cf. biblical שלה, from שאלה. שלא, שלי, also occurs in the Nabataean, *CIS,* ii, nos. 185, 208, 221. Nöldeke (in Euting, *Nab. Inschriften,* 74) vocalizes the name Sullai, and Berger (see to No. 208) compares the Nabataean name Sullaios. But Lidzbarski (*Eph.,* ii, 16) rejects this derivation and derives the hypocoristic from שלם.—Note that among these nine souls only one strictly Jewish name appears.

12. The scriptural quotation is from Psalm 121,—a psalm admirably adapted for a charm. Cf. note to 5: 5.

13. The two words: "of the room (recess, bedchamber, etc.), of the hall (also, cavern)" evidently refers to the place where the bowl was to be placed. The first word may be in construct state, or the two terms may be parallel, as the words might mean the same thing. אידרון = Ass. *idrânu,* and is current in the Aramaic dialects. Jastrow defines אספלידא as especially a "sitting room in the shape of an open hall"; for some discussion of its etymology, see Payne-Smith, col. 315.

Translation

Closed are the mouths of all races, legions (2) and tongues from Bahmandûch bath Samâi. (3) And the angel Raḥmiel and the angel Ḥabbiel and the angel Ḥanniniel, (4) these angels, pity and love and compassionate and embrace Bahmandûch (5) b. S. Before all the sons of Adam whom he begat by Eve, we will enter in before them; from their clothing they will clothe her and from their garments they will garb her, the garment of the grace of God. (7) With her they will sit, on this side and on that, driving away (demons?), as is right. In the name of YHWH-in-Yah, El-El the great, (8) the awful, whose word is panacea, this mystery is confirmed, made fast and sure forever and ever.

Exterior

(9) Hark a voice in the mysteries! Hark the voice of ...., the voice of a woman, a virgin travailing and not bearing. Quickly be enamored,

(10) be enamored and come Ephrâ bar Šabôrdûch to the marrow of his house and to the marrow of Bahmandûch b. S. (11) his wife; as (she was) a virgin (?) travailing and bearing not, so (may she be) fresh myrtle for crowns. Amen, Amen. (12) And made fast and sure is salvation from Heaven for Bahmandûch b. S. (13) A preparation (?) .... leaven, press it (?) .... Amen, Amen, Selah. Salvation and peace from Heaven, forever and ever and ever.

Commentary

A charm for a certain woman against the reproach of barrenness, that her husband may love her and she may have children by him. The couple is the same that figures in No. 1, which is particularly a charm against the liliths; these are supposed to have prevented the natural fruit of the human union, affecting not only the woman but also the man's love and virility. At the end probably is given an aphrodisiac recipe.

This text and No. 28 are unique among early Semitic incantations, for they are love-charms. In this they bear the closest relation to the Greek erotic incantations, on which I will speak more particularly under No. 28. But in the present text it is the barren forsaken wife who speaks, not the passionate lover, as in No. 28 and the Greek charms. The incantation has a Jewish cast in its address to certain angels, whose names are expressive of love and in its use of biblical divine names. Apparently the text is shortened from a longer model. It is illiterate in style and script, and contains numerous Hebraisms. A feature is the use of a wedge-shaped sign (indicated in the transliteration by a comma), occurring as a separator between words, but without consistency.

1. סברי : for סכירי.

עממיה תנממיה ולישניה: either antique emphatic plurals, or else = Mandaic plural in יא—(see to 9: 6). The second word is an artificial enlargement of the Syriac *tegma* (τάγμα) for the sake of assonance with ע (spelt in the usual archaic Syriac fashion). The passage is reminiscent of *Dan.* 3: 4. Do the words refer to classes of mankind, and the taking away of the woman's reproach among men? Or not rather to ranks of demons?—to whom we expect some reference; cf. p. 80. The closing of their mouths means forstalling their curses, cf. p. 85. תנמא is particularly

used of the cohorts of evil (Payne Smith, *s. v.*) and in the Peshitto translates the "legions of angels" in *Mt.* 26: 53.

3. The three angels appear (upon some reasonable emendation) to have names corresponding to the verbs in the next lines. Angels were chosen, or invented, for the pregnant meaning of their names; so Raphael became the patron of healing. Raḥmiel is the genius of love in No. 28, and in one of Thompson's Hebrew charms from Mossoul (*PSBA,* 1906-1907), which contain many incantations for love, love between man and wife, and also for breaking marital love; once we find a philtre in which the angels invoked are Ahabiel, Šalbabiel, Opiel, names signifying love and its passion (1907, p. 328, no. 80). חביאל and חננאל are found in Schwab's *Vocabulaire,* and the latter also in Stübe, l. 56.

5. The line is obscure; it appears to present a dramatic scene in which the sorcerer and his client, in the presence of the adversaries, shall obtain judicial vindication of love from the favoring angels. The reference to Adam and Eve's offspring has a sympathetic value.

6. מילבוש וגי assimilation of מן, as in Hebrew; for the idea cf. 2: 2.

מיעיל חיסדא: a common Semitic idiom; cf. *Is.* 61: 10, *Eph.* 6: 11; in the Samaritan, אלביש אימנותא, בגד כפר ללבש (Heidenheim, *Bibliotheca sam.* ii, pp. xlii. 197, § 24); actual investing with "grace" occurs in the newly-found Odes of Solomon, 4: 7: מנו גיר נלבש טיבותך.

7. מיזיה מיזי: again Hebraic. The following word may be a dittograph, or a Pael of זוח. For this protection on right and left, cf. 6: 10.

For יהוה ביה see to 7: 8. אלאל, in the Mandaic religion, epithet of the sun-deity (Norberg, *Onom.,* 9, Brandt, *Mand. Schr.,* 31), also found in the Greek magic, Wessely, xlii, 67. It may be a magical reduplication; but cf. the reduplication of אל in the South-Arabic plural, and the Hebrew אליל, probably once a divine name—to be connected with Ellil of Nippur? —see Clay, "Ellil, the God of Nippur," *AJSL,* 1907, 269.

8. כל אסו: cf. 15: 2.

דריסת: this spelling occurs also in a neo-Syriac manuscript published by Lidzbarski (*Die neu-aramäischen Handschriften der königl. Bibliothek z. Berlin,* Weimar, 1896, 447); otherwise דרוסת = צרוצת. For a discussion of the word and its origin see Nöldeke, *Neusyrische Gram.,* 386.

קים ושריר: the same formula in Lidz. 5.

At the end of this line which is on the edge of the bowl, the scribe has attempted to continue and has written a few characters; he then started afresh on the exterior.

9. קל קלא : קל is used like the Hebrew קול. The piteous plaint of the sufferer is thus expressed, to move the sympathy of the celestial ones. In the same way the Babylonian magical texts preface their rites with a description of the plight of the patient; also the biblical Psalms often commence in like manner. A similar phrase appears in a bowl of Pognon's, B 20, but there the reference is to the curses of unfortunate souls which alight on the living. There may be the reference here to such a ban—of a virgin gone to her death without children. In this case חסי (= biblical חם, Syriac חם), would refer to the stilling of her "tongue." (Cf. the magical use of *σιγή* in a text of Wessely's xlii, 60 f.). But the repetition in l. 11 inclines me to the view that the virgin who "travails and does not bear" is the wife, subject perhaps to miscarriage or feminine maladies. Then חסי would be from חום = חוש, "hasten," and so = "quickly," cf. Ass. חסא; the word would then correspond to the frequent *ἠδη ἠδη ταχὺ ταχύ* as at the end of the Hadrumetum love charm (see to No. 28), and see note to 14: 4.

נחבי נחבי וניתי: the verb used for "love" is חבא, where we expect חבב; cf. Heb. אהב. For this triple adjuration, see No. 28.

10. לגוף ביתיה וגי : I have tried in my translation to express the difficult word גוף, which primarily "body," comes to mean the essence, essential thing. The reference is sexual, and the word has such connotations (see Jastrow, *s. v.*).

11. כי אבליתי: this appears to be an error for בתולתא, as in l. 9; or possibly ppl. fem. in *-tê*, "mourner"? כי ... כי are used correlatively, and we must suppose a lacuna: as she (was) in the joyless condition of childlessness, so (her future state shall be symbolized by) fresh myrtle for crowns. Some literary form has been so rubbed down as to be almost unintelligible. For this correlation of כי ... כי, see some, as yet unnoticed cases in the Hebrew, e. g. *Gen.* 18: 20.[1] Myrtle as sacred to the goddess of love (Baudissin, *Studien*, ii, 198 f.) makes an appropriate simile.

[1] See my notes in *JBL*, 1912, p. 144.

12. אפרפרט וג׳: this line is provokingly obscure. Since a magical philtre is here prescribed, I venture to suggest that פ׳ = Latin *praeparatum* (the verb being used by Pliny for preparing drugs, foods, etc.). Or it may be the Rabbinic פרפרת, "hash, salad" (which however does not explain the ט). חאמין is leaven, which as a ferment would be appropriate to an aphrodisiac. אעיקיהי is fem. imperative, "press it." Aphrodisiac herbs, used magically or medicinally, are common in all erotic praxis.

[This bowl] in thy name do I make, YHWH, the great God. May this bowl be for the sealing of Hormizdûch bath Mehdûch. I adjure thee ..... (2) evil, in the name of holy Agrabis, in the name of MṢ MṢ, in the name of SP SP YHWḲ YHWḲ, who removed his chariot to (above?) the Red Sea ..... (3) David, the Psalm of the Red Sea. Again I adjure you by him who lodged his Shekina in the temple of light and hail, and his ..... (4) ... the exalted king. Halleluia, Halleluia. Oh avaunt, oh avaunt, avaunt! And in the name of Michael and Gabriel..... (5) in the name of Sariel, in the name of Seraphiel, Sûriel and Sarsamiel, Gadriel, Peniel, Nahriel. And all Blast-demons (6) and evil Injurers, whose names are recorded in this bowl and whose names are not recorded in this bowl,— oh, (7) oh, avaunt, sit down there! And ye shall be cast down, sitting within the glowing light and fiery flame (8). Amen, Amen, Selah.

Commentary

A charm for a certain woman, in the name of YHWH and the angels, against some definite (now obscure) demon in particular, and against the devils in general.

2. מץ מץ: the syllable is *Athbash* for יה; cf. מצפץ = יהוה, Stübe, l. 66 and p. 63. אנרביס is probably also a mathematical anagram for the divine name or power; cf. Abraxas, = אברכיס, etc. (see p. 57, and to 7: 9), of which the present form may be a corruption. The syllable סף seems to have suggested the sea of סוף. יהוק is for יהוה.

3. דויד: the lacuna makes the reference obscure; a reference to one of the Psalms of David, or, by error to the Song of Moses?

דאשרי שבינתיה: the Targumic phrase, e. g. *Dt.* 12: 5.

בהיכל נורא וברדא: hail and fire are frequently found together in the Old Testament as manifestations of the divine presence; e. g. *Ps.* 18: 13 f. *Ezek.* 38: 22. But cf. especially *Rev.* 11: 19: "Then was opened the temple of God that is in heaven; and there was seen in his temple the ark of the covenant; and there followed lightnings and voices and thunders and earthquake and great hail."

4. אחושיה, יחוש, יחוש: cf. יא חוש, l. 7; Yâ = interjection "Oh." Reitzenstein has called attention to the equivalence of these expressions (commenting on Stübe, l. 14, *Poimandres*, 292, n.), to the ἤδη ἤδη ταχὺ ταχύ of the Greek magic, as applied to demons in the sense of "at once avaunt." For examples, see the endings of nos. 3, 5, 6 in Wünsch, *Antike Fluchtafeln*, and the editor's note p. 13. Cf. a Christian charm in Pradel's, p. 72: *veniat sanatio celeriter, abeat abeat abeat malum.*

5. All these angel names are found in Schwab's *Vocabulaire*, our סרסמיאל being probably the same as the סרמיאל there. For magical references to Suriel, see Lueken, *Michael*, 71.

6. The sorcerer spares himself the trouble of naming the evil spirits by applying a "blanket" charm to them all; cf. 1: 14.

וידלא: see to 3: 3.— אידכרית: evidently a confusion between the passive and the 1st person active.

ההין: the only instance in these bowls of this rare demonstrative; elsewhere here הדין

7. תרמן: probably Etpeel.—For the curse at the end cf. 7: 17.

Bhybdyn

Wenaš lâs lâs lâ selîḳ: waṭrefê dâs enâš menâ.

I scan and rhyme (?) against you, Spirits and Goblins (6) and Plagues and Howlers and Strokes and Circlet-spirits and evil Arts and mighty Works and Idol-spirits and the evil Lilith (7)..... And I bind you with bonds of brass and iron and seal you with the figure of a seal of fire, ... (8) ..... And I banish you from Hormiz b. M. and Dôdâi b. [M. and] Bar-gelâl b. D. and Bar-šibebî b. C. (9) ..... and Mehôi bar Dôdâi, in the

name of Rophiel and Suriel and Gabriel [and ...] and Raḥmiel and .ḥatiel and Suriel .... and Serariel . And by the seal of YHWH Sebaoth is it established forever. Amen, Amen, Amen.

COMMENTARY

A charm for several persons, whose relations to each other are not definite. They may be members of one household—a kind of *Pension.* The virtue of the charm lies in the use of a doggerel couplet. The figure in the center of the bowl is a serpent with its tail in its mouth; see p. 54.

1. הורמיז: for this abbreviated form of Ahura-mazdah, see Justi, p. 98, the same name in Lidz.

מאמא = מאמאי, מאמי, as in No. 8.

דודי: 38: 4, דודאי; hypocoristicon from דוד, "friend, uncle," etc.; cf. the biblical name דודו and its variant דודי, also Dâdâ, 12: 2. The present name is feminine; may it mean the *dûdâi,* "love-apple"? Justi, p. 86, lists a Dûday.

2. מרתא: a Jewish name found in the Gospels and in a Palestinian ossuary inscription (Lidzbarski, *Handbuch,* 318) = מארת, 8: 5.

ברגלל: a proper name after Arabic formation? גלל = "round lump, excrement," etc. Galal is a biblical name.

ברשיבבי: שי is a form of necklace charm, see to l. 6. The mother has named her child after the amulet whose virtue she supposed gave to her or protects the babe.

טשיהראזד: the Persian Cihrâzâd; see Justi, p. 163. The טש is an attempt to represent the Persian hard *ch.* The name is the same as that of the famous *raconteuse* of the Arabian Nights.

3. ביתה: doubtless referring to Dodai, who appears to have procured the charm for the household.

4. לאם מן סליק וג': this and the following line contain a magical incantation expressed in a rhyming doggerel couplet. (In the first occurrence of ואטרפי, the ר was first omitted, then written above, and finally the word was rewritten that there might be no infraction of the charm.) First of all, there is a couplet rhyming at the caesuras and at the end;

then the last line is repeated in l. 5, introduced by the obscure combination ביהיבדין. A similar doggerel formula is presented by Myhrman in his edition of the Babylonian magical *Labartu* series (*ZA*, xvi, 188; cf. Jastrow, *Rel.*, i, 339). It is there called a *šiptu*, "incantation," and runs thus (following Jastrow's arrangement):

ki | rišti libiki | rišti la libiki | la libi | piš | pišti ša anzišti | ša anziš | šu anziš | anziš.|

For Greek parallels see p. 61. The repeated מנא of the couplet is taken up by כינתי ומניתי. The roots מנא and כן may refer to the scansion of the couplet.

5. שיקין = the Arabic demon *šiḳḳ*—sometimes interpreted as one-half (*šiḳḳ*) man, one-half demon, but probably a demon of weariness; see Lane, *Arabian Nights*, c. 1, n. 21, van Vloten, *WZKM*, vii 180.

6. ירורין: see p. 81; here between categories of maladies, in Myhrman between "devils" and "spirits."

שיבין: the Targumic שבבין (Jastrow, p. 1510), a feminine ornament, some kind of pendant chain, see Krauss, *Talm. Archäologie*, i, 204 and note; belonging to the category of חומרי, ענקתא, etc., see p. 87 f. Cf. the name above ברשיבבי, where the uncontracted form survives.

7. Brass, lead, fire, all potent against demons. Cf. the "chains of lead," 39: 4 f. The bonds of hell are called *catenae igneae* in a Latin charm, Wünsch, *Ant. Fluchtafeln*, no. 7; also the "adamantine chains" in Paris Papyrus, Wessely, xxxvi, l. 1227 ff.

9. Mehôi: hypocoristic, cf. Mehducht, etc.

Translation

Salvation from Heaven for Dâdbeh bar Asmandûch (2) and for Šarḳôi bath Dâdâ his wife and for Hônik and Yasmin (3) and Kufithâi and Mehdûch and Pannôi and Abraham and Šilâi the children of Šarkôi, (4) and for their house and their property, and that they may have children and may live long and be established, and that (5) no Injurer in the world may touch them.

And in his great name, whereby the holy God is called—wherein are arts (?)—(6) which suppresses darkness under light, plague under healing, destruction under construction, injury (7) under ban, anger under repose: suppressed are all the sons of darkness under the throne of God, in whose (?) name (8) are bound, suppressed Devils; gripped likewise are evil Spirits and impious Amulet-spirits and Names and Princes of (9)

darkness and the Spirit (breath) of foulness and fatigue and the Tormentors of night and day and Curses and Necklace-charms and Words and Adjurations (10) and Knockings and Rites, the Plague and the she-Plague and the voice of Invocation, and the Spell of poverty and Demons and Devils and Satans (11) and Idol-spirits and Liliths and Arts and mighty Works and the seven Tormentors of night and day. They are bound, suppressed and laid, (12) away from Dâdbeh, etc. (as in ll. 1 ff.), (13) and from all their house and from their property and from all their abode, from this day forever. Amen, Amen, (14) Selah. "And YHWH said to Satan," etc.

COMMENTARY

A charm for the large family that appeared in No. 12. It contains an extensive and repetitious list of demoniac species.

5. בישמיה וג׳: I have translated literally; the original form may have been: ב׳ ר׳ דאלהא ק׳ דקרי חרשי ליה "the great name ... which magicians invoke."

6. כביש: ppl. act.

7. "Sons of darkness": contrast the "sons of light," 1: 9.

8. רברבי דחשוכא: cf. the Pauline *τοὺς κοσμοκράτορας τοῦ σκότους τούτου*, *Eph.* 6: 12.

רוח סרי ונאלי: lit. "foul and laboring spirit" (breath; in *Bekor.* 44b (an obscure passage) there is a disease or demon called נאלא, which is interpreted as "asthma" (Jastrow, *s. v.*). Foulness of breath was cause for divorce, Krauss *Talm. Enc.* i, 256. Cf. the בר ניפלה of 29: 7, which is found in the same passage from *Bekoroth.*

10. בתקלא דקריה: see pp. 52, 84.

11. משכבין: Af.; cf. English "lay a ghost."

אסרה דמיסכינותא: cf. the Rabbinic דמזוני א׳, "genius of nourishment," and see pp. 79, n. 70, and 86, n. 112.

Translation

This day above any day, years and generations of (2) the world, I Kômêš bath Maḥlaphta have divorced (3) separated, dismissed thee, thou Lilith, Lilith of the Desert, (4) Hag and Ghûl. The three of you, the four of you, the five of you, (5) naked are ye sent forth, nor are ye clad, with your hair dishevelled behind your backs. (6) It is announced to you, whose mother is Palḥan and whose father (Pe)laḥdad, ye Liliths: Hear and go forth and do not trouble (7) Kômêš b. M. in her house. Go ye forth altogether from her house and her dwelling and from Kallethâ and Artašria (8) her children. I have warded against you with the curse which Joshua bar Perôhiâ (*sic*) sent against you. I adjure you by the honor (name) of your father (9) and by the honor of your mother, and take your divorces and separations, thy divorce and thy separation, in the ban which is sent (10) against you by Joshua b. Peraḥia, for so has spoken to thee Joshua b. P.: A divorce has come to thee from across the sea. There is found written (in it), ye whose mother is (11) Palḥan and whose father

Pelaḥdad, ye Liliths: And now flee and go forth and do not trouble Kômêš b. M. in her house and her dwelling.

I bind (12) and I seal with the seal of El Shaddai and with the seal of Joshua b. Peraḥia the healer, healing and release from Heaven for Abâ and Yazdid and Hônik sons of Kômêš. Thwarted and frustrated are all Injurers, whom we have removed by the ban upon them. Amen, Amen, Selah.

Commentary

A charm effected by a woman for herself and her children, who appear in two different groups, in the name of Joshua b. Peraḥia. It is an abbreviated and often incorrect replica of No. 8.

1. For the corrupted formula, cf. 6: 5 and see p. 55. The full form appears in no. 16020 (unpublished) "this day out of all days. I Honik," etc.

2. כומיש, l. 7 כמיש: the name obscure; cf. Κομοσαρνη, Justi, p. 165.

מחלפתא: for this name, frequent in these bowls, and its equivalents, see Nöldeke, *Encyc. Bib., s. v.* "Names," § 62.

שביקית: Peal, the following verbs Pael.

3. For the singular and plural number, see to 8: 2. The word lilith is spelt badly. For the לי דברא cf. 29: 7, and see p. 78; the parallel has לילי דיברא.

5. The correct grammatical forms are found in 8: 3; the lilith names following are also mangled.

6. תסיסון: Afel of נסס.

7. כלתא, i. e. "bride"; cf. the Babylonian name Ina-ekur-kallatu, cited to me by Prof. Clay.

ארתשריה: a form of Artachšathra, and cf. Αρταξηρις, Justi, p. 35.

8. פרוחיה: so l. 12, but the correct spelling in l. 10; probably assimilation to Persian *farruch.*

For "glory" = "name," see on 8: 8, and n. b. the equivalent πατέρων δόξαι, *Wisdom,* 14: 24.

9. סיב: f. pl. impr. of נסב; but שמעו in l. 6. The following דאת שלחתן is a perversion.

10. לכא = ליכי.

11. פמטו = מוטו, cf. פק, l. 7, *plus* conjunction פ; for another instance see Glossary; probably a dialectic survival. פ appears in the Senjirli inscriptions and the Elephantine papyri.

12. אסיא: the same title in 34: 12.

פטרתא: formation from Pael, = Rabbinic פטורא.

אבא: frequent Talmudic name, *Seder ha-Doroth,* ii, 3-18.

יודיד: probably error for יודד, see 7: 3.

13. פירקן: Pael, 1st pers. plural.

No. 18 (CBS 8695)

ברחמי שמיא אסוּתא [לנפשא ו]לביתא דאפרה בר איהי וכל (2) שום דאית ליה דיתקיומון [ליה בנין] מן איצפנדוי איתתה ויחון (3) ויתקיומון ולא יגע בהון כל מזיק [בהדין] עלמא בשום אהיה אשר אהיה (4) אל איסור בנדנא מלכא מלכיהון דשיד[י ודיוי ושליטא] רבא דליליתא אשבעית (5) עליכי בחלבם לילית בת ברתה דזרני לי[ליתא דיתבא] על איסקופת באבה דא (6) ודאביא ... ודמחיא וטרפא וחנקא ואכלא דירקי ו[דירקתא] ... מיצה מימי ציתא אשבעית (7) עליכי דתימחין בטרפס לילביכי ובמורניתא דסק . . . Commentary

This inscription is yet another duplicate to the three collated under No. 11. It is badly written and mutilated, and would be in large part unintelligible without the other texts. It presents little that is new and a translation is not necessary.

1. The name of Ephrah's father is uncertain. From what appears here, it may be איהי; cf. בראיהי, in *Seder ha-Doroth* ii, 47. In l. 9 it looks like איי, i. e. *Ayê?* But the strokes may be for abbreviation.

2. A prayer for offspring is here expressed.— איצפנדוי: hypocoristicon for איצפנדרמיד, see 26: 4.

5. בחלבם: again this name differs; but the tradition of the granddam's name is accurate.

באבה דא: i. e. דאפרה.

6. דאביה: ppl. of דבא.

דירקי: if not an error, this is a further development of a word with a history: *daḳdaḳ* = *dardaḳ* = *daraḳ*.

מיצה מימי ציתא: the probable reading. ציתא is biblical. The dirty habits of these foul demons appear in the Babylonian magic; they are compared to pariah dogs and are exorcised by the spirit of foul streets, see *Utukki* series, B, 46; cf. v. col. 5. l. 21.

8. הפטרית: for הא פ׳.

9. קרחו: if we read so, we may compare the magic formula in *Pesaḥ.* 110a, קרחייבי קרח (see to 1: 6). The verb = ערק, by transposition, common especially in Mandaic. Lidzbarski in his parallel (see to No. 11) reads קדא and translates "spring up"; but read there קרא = קרח.

TRANSLATION

In thy name, O Lord of salvations, the great Saviour (2) of love.

Charmed and sealed and countersealed is the whole (3) person and the bedchamber of this Mešaršiâ, surnamed (4) Goldsmith, bar Maḫlaphtâ, with the seven spells which may not be loosed, and with the eight seals (5) which may not be broken.

In thy name, lord Ibbôl, the great king of the Bagdâni; and in thy name, our lady Ibbôleth, (6) the great queen of the goddesses (she-demons?), and in the name of Ṭalasbôgî the great lord of the Bagdâni; and in the name of Sahnudmuk; (7) and in the name of Ibbôl son of Palag; and in the name of Angarôs; and in the name of the Lord, the Word and Leader and Armasa (Hermes); and in the name of Azpâ and 'Alîm; (8) and in the name of Naḳderôs the lord of ...; and in the name of Seraphiel, lord of judgment and of (divine) beck; and in the name of the 60 male gods (9) and the 80 female goddesses; and in the name of Ardisaba (*or* Ardî) the most ancient of his colleagues; and in the name of Anad the great lord ..... (10) cast above (him) iron and bronze, and fastened to him fetters (?) of lead and the 70 exalted priests of Bagdânâ; and in the name of Bagdânâ son of Habâl (destruction). (11) ...; and in the name of Palnînî and Mandinsan and Menirnaš ...; and in the name of Iras son of Hanas; and in the name of Abrakîs (Abraxas); and in the name of Agzariel, who is without compassion; (12) and in the name of Arzan and ..., *rôs berôs delterôs;* and in the name ... to Ariel he sent a message: "Lift up" (?), ... to the great Ruler before him; and in the name of ...; and in the name of lord Ibbôl (13) the great angel of the Blast-demons, and in the name of the great God and the great Lord of the Bagdâni; in the name of Ariôn son of Zand: Ye are charmed and armed and equipped.

Against all Demons, Devils and evil Satans, this charm (14) and bowl is sure and its seals established against them, from whose charm none ever goes forth and from whose control none sallies forth.

In the name of these charms are bound there Demon and Danḫiš and the evil Lilith (15) which are in the body of this Mešaršiâ, surnamed Goldsmith, b. M., by charms in earth and by seals in heaven.

Again, (ye are) charmed with a charm and sealed a second time away from the body of this Mešaršiâ, (16) etc., Amen.

Again, charmed are the Demon and Devil and Danḥiš and Amulet-spirit and Idol-spirit, which are upon the body of this Mešaršia, etc., by Ibbôl, (17) and sealed by Ibbôleth.

Again, charmed by Šînas and Manâ, and sealed by fire.

Again, charmed by the great gods and sealed by Ariôn son of Zand.

Again, charmed by the seal of the family of Ḥanûn, and sealed by the great ... of Zeüza (Zeus).

Again, charmed by the true God, and sealed by the great Ruler (18) who is before him, away from the body of this Mešaršiâ, etc.

In the name of Paṭragenôs, Okînoš (Okeanos), Šunḳâ, Ḳôsâ, Kapâ, Azaziel ..... (19) ..... his constellation (?), that this Mešaršiâ, etc., be sealed from the top (?) of his head to the toes of his feet ..... they shall not be, nor this house of Mešaršiâ, (20) etc., shall they enter nor approach, nor appear therein, neither by night nor by day, from this day and forever. .....

Commentary

A charm made out for a certain man whose body is infested with evil spirits; with great elaboration of incantations they are exorcised from him and his house. The inscription is thoroughly pagan, and is interesting because of its invocation, for over half its length, of an extensive list of deities. Cf. a similar long list in Wünsch, *Ant. Fluchtafeln*, no. 4. Unfortunately by reason of the coarseness of the script and its general illegibility, most of these names are obscure. Some of them are definitely Greek,—Zeus, Protogonos, Okeanos, and perhaps the Aeons, male and female, may be made out; several others are of Greek formation. Others again are of Persian origin, and some are purely charm-words, "mystical" names. Some forgotten cult may have given certain of the names; notice the reference to the 70 priests of Bagdana.

2. חיתמא: error for חתימא.

3. קומתיה: the word = "stature," then, as here, "body," as is shown by the phrase, in a similar connection, in bowls published by Schwab (E)

and Stübe (ll. 56, 64): the demon depart, etc., from the 248 הדמי קומתיה of such a one (the word is not recognized by either editor). The same word occurs in the interesting magical passage in *Eze.*, 13: 18.

משרשיה: also in Schwab, G; a frequent Talmudic name (see *Sefer ha-Doroth,* ii, p. 276).

4. דהבאי: this surname appears as a proper name in *Ḥagiga* 2a.

"Seven spells .... eight seals": for this cumulative expression, cf. Mica 5: 4; see 5: 2.

5. בשמיך: cf. 28: 1.

איבול: also below, ll. 7, 16. In l. 7 he is בר פלג, and his consort איבולית is "our lady." Professor Clay has cited to me a divine name Ubbulti appearing in a Cassite tablet, in the name *Ubbulti-lišir.* אובול might also be read, and I am inclined to make the word = Syriac *ubbâlâ,* "generation," etc., and so Αἰων. For a discussion of Aeon as supreme deity, god of time, etc., see Reitzenstein, *Poimandres,* 269 ff. The Aeons appears in the magical texts, e. g. Dieterich, *Abraxas,* 140, l. 51; 192, l. 21; 203, l. 18. The syzygies of Aeons were male and female—cf. the names in Origen's list at the beginning of his work *Adv. haer.,* and איבולית would be a formation to express the female Aeon. Derivation from Apollo also suggests itself, but the feminine is not thereby explained.

6. בגדני: Comparing what precedes, the word means some class of deities or demons. In l. 13 בגדנא is a divine name, = the demon in 11: 5 (*q. v.*). It is then a word like אלהא, etc., which can be used individually or generically. It evidently contains the Indo-European element *bâga,* "god." It is difficult to decide whether Bagdana is a propitious or maleficent demon (as in No. 11); in the latter case he is charmed to work the good of the sorcerer's client, as in the Greek incantations, e. g. Hekate. In W. T. Ellis's Syriac text (see § 2) appears שמחיזא מריא בגדאנא, "Šamhiza the lord Bagdana," or "the lord god"? The spelling gives the vocalization of the penultimate vowel. For Š. cf. the Enochian Samaeza.

7. אנגרום: the ending -ום in this and other names recalls Greek formations. May this word = ἄγγελος?

מלילא: in Syriac, "logical," etc., and used nominally = *τὸ λογικόν*. It is here associated with ארמסא, both being names of a potency; the passage is parallel to *2*: *2*, *q. v.*

מרנלא: if the reading is correct, the Rabbinic רנל, Afel, may give the interpretation,—"leader," which would be a fitting epithet of Armasa-Hermes, "the shepherd" *par excellence*. Cf. the idea in the late Hellenistic religion of a deity, especially Hermes, as a guide, *ἡγέμων*, of souls; see Cumont, *The Oriental Religions in Roman Paganism*, n. 63 p. 253. It may be noticed that מ׳ is used in the Talmud of a "traditional word or saying" (Jastrow), i. e. = *logos?*

8. סרפיאל: also 14: 8. In his epithet, רימזא appears to be used, as in the Syriac, of the divine nod or intimation, i. e. "command."

9. ארדיסבא: or the name is to be read ארדי, followed by סבא סבתא קשישא קשיש; why the fem. סבתא?

10. In this and the following line most of the words can be read, but in consequence of the failure of the context the text defies interpretation. The three metals may be referred to as having magical properties, and this may give the clue to סיליתא דאבדא (סיליתיה written first erroneously). Comparing the Mandaic text in 39: 5, בשושלאתא דאבארא (עסירא), the equation suggests that our סיליתא = "chains"; possibly סילתא "basket," and here used of a metal cage.

בר חבאל: = "Son of destruction"?; cf. בר חנם, l. 11, בר זנד l. 13; these deities are given a parentage like איבול, l. 7. Possibly חנם is הנם, the verb used in the Nerab inscriptions, and so = חבאל.

11. אירס:=Ἔρως, or Ἄρης?—אברכים: cf. 7: 9.

אנזריאל: נזריאל is found in Schwab, *Vocabulaire*. Is אכזריאל "God's cruel one," meant?

12. The accumulation of words in *ros* is a charm formula; see p. 61.

13. מלאבא = מלכה, l. 5.— זעקי: the זיקי with Mandaic spelling.

אריך בר זנד: found also in 34: 8, which determines the reading here.

אתן וג׳: the plural is problematic, as there is but one client to this charm; it may have been used inadvertently. חליצי is not Aramaic in its present sense.

14. דנחיש: this obscure demon appears again in l. 16; it is evidently the דניש listed with the planets in Libzbarski's Mandaic amulet in the de Vogüé *Florilegium*, l. 251.

17. שינאם: cf. the Mandaic סיניאוים, name of an angel, Lidzbarski, *Ephemeris*, i, 104, n. 2.

זעוא: Zeus, = Syriac זו, in Jacob of Sarug (Martin, *ZDMG*, xxix, 110, l. 50), otherwise זיוס and זום.

מנא = the Mandaic genius Mana? See Norberg, *Onom.* 96.

בית חנן: the family or school of some magician like that of Joshua b. Perahia, see p. 46.

18. אוקינוס = Ὠκεανός, the parent deity in magical theosophy (cf. Ea in the Babylonian); see index of Dieterich, *Abraxas*. The preceding name recalls Protogonos who appears with Aeon as son of Kolpia and Baau in Sanchuniathon's cosmic genealogy, Eusebius, *Praep. ev.*, i, 10.

19. לילבי: cf. 11:7. מלואשיה: an astrological reference?

טורפת רינליה ... מין: the same phrase in Pognon B, except that the word זימתא, "hair," appears there.

Ṭardi bath Onî (2) Hormisdar Ṭardi. In the name of AAAAAA, exorcised and sealed (3) are the Demon and the Devil and the Satan and the Curse-spirit and the evil Liliths (4) which appear by night and appear by day, and appear (to) Ṭardi bath [Onî, etc.]. (5) In the name of Gabriel, Michael, and Rophiel. Amen, Amen, Amen, Amen, Hallelia, Selah. According to AAAAAA.

Commentary

A charm against ghosts. The interest of this bowl lies in the figure decorating the center. It represents a demon with arms and legs manacled. On either side of the figures is an enclosed space, that on the figure's right hand bearing the inscription אסורא, that on its left, רשוא, i. e. prohibition and permission. In the lower part of the body on the former side is inscribed the names of the sorcerer's client. The pictures thus graphically presents the idea that the demon has no power over the lady in question. The picture is of better quality than the inscription, which is very illiterate. The spelling is most careless.

1. The connection of the proper names is uncertain, as also the character of the names themselves. For הרמסדר I might compare the Pahlavi Ormazdyâr, Justi, p. 10a.

2. For the repeated א, see p. 60.

3. לטאנא: probably an artificial form; cf. שידנא, טלנא, סטנא.

4. מיתחזא has Mandaic fem. pl. ending.—In באלליא the first א has a point over it—to mark error? cf. the Massoretic Niḳḳudim.

5. רופיאל: the first vowel as in *Enoch* and in Mandaic, representing the Hebrew active ppl., parallel to the equivalent Aramaic form in *Raphael*.

הלליה: for similar perversions see 24: 4, 31: 8, 32: 12; cf. *αλληλου* in the Paris Magical Papyrus, l. 3032, and הללו ליה in a Jewish charm, *JAOS*, 1911, 274.

Translation of No. 22

Sealed and countersealed are the house and threshold of Dôdî bath Aḥath from all evil Plagues, from all evil Spirits, (2) and from the Tormentors, and from the Liliths, and from all Injurers, that ye approach not to her, to the house and threshold of (3) Dôdî b. A., which is sealed with three signets and countersealed with seven seals from every kind of

Lilith and from all (4) Injurers, that ye approach not to her, to the house and threshold of Dôdî [b. A.], and from all evil Spirits and from all evil Injurers, (5) from this day and forever. Amen, Amen, Selah.

Commentary

Three identical bowls, out of the four which were deposited at the corners of the charmed house; see § 8. There are slight variations in the inscriptions; in No. 22 the writer found more room and made a longer inscription. All three are most roughly and illegibly written; the characters ו, ז, י, נ are indistinguishable, and ם has a peculiar form. The word transliterated דינן, 22: 5, is written in a clumsy Syriac script.

An interesting grammatical peculiarity is the omission of ד after a genitive with the personal suffix. This appears at the beginning of l. 3 in No. 22, and throughout, in the same combination, in the other two. This might be taken for haplography before דודי; but the same phenomenon appears in the Mandaic bowls published below; see the Introduction, § 5 B.

For the injunction in l. 4 not to approach, cf. the like prohibition in a late Greek charm (Reitzenstein, *Poimandres*, 294): *τοῦ μὴ ἀδικῆσαι ἢ βλάψαι ἢ προσεγγίσαι*, κ. τ. λ.; cf. also a Syriac charm of Gollancz's, p. 93.

Commentary

A charm for three daughters of a certain woman, made out in their names severally and for specific maladies. The misspellings are numerous.

1. הנדו: the same name appears in 40: 14; it is hypocoristic of הנדויתא 38: 3, i. e. "Indian woman."

2. אשיתא is doubtless fever, in neo-Syriac = malarial fever, cf. the general name for fever with the Jews, אשתא (Preuss, *Bib.-talm. Med.*,, 184). and n. b. the disease *ašû* in Assyrian, Küchler, *Beiträge*, 131, 197. For the next word the root אזא suggests a sweating disease. אונא may be another kind of fever. In general see above, p. 93 f.

3. קאקי: also in Hyvernat's bowl. The name occurs as that of an Egyptian sorceress in a Syriac biography of Rabban Hormizd (c. 600), cited by Budge in his edition of *The Book of Governors,* i, p. clxiv. Our word is probably the Syriac *ḳâḳâ,* "pelican," while the Egyptian name may represent *κακή* (for a similar adoption of this Greek word, see Payne Smith, col. 3709).

4. For the "disturbing dreams," see p. 82.

5. Zarinkaš: cited by Justi, p. 382.

Translation

Salvation from Heaven for Gurôi bar Ṭâṭî and for Aḥath bath Dôdâ his wife, that there vanish from them in their dw[elling the Demons and Dev]ils by the mercy of Heaven. Whoever here has dead, who shall become alive to them here, and shall approach (2) and are found to be (actually) dead—from these you are kept and these are kept (from you). In the name: Thou- ..... send (to) them, Hadarbadû bar ..... (3) .. the contentions of them all. Behold, ... Blessed art thou, YHWH on account of the name of ..... (4) Yophiel thy name, Yehiel they call thee, Šasangiel, YHWH, and so ..... names ..... [Ar]masa Metatron Yah, in the name of Tigin, Trigis, Balbis, Šabgas, Šadrapas. These are the angels who bring salvation to all the children of men. They (6) will come and go forth with the salvation of this house and property and dwelling of his, and of his sons and daughters and all the people in his house—(7) of this Gurôi b. Ṭ. from this day even for the sphere of eternity. Amen, Amen, Selah, Halleluia.

Commentary

The inscription is of interest because it is directed against the apparition of family ghosts. In this respect it is to be compared with No. 39 and Wohlstein's bowl, no. 2417; see above p. 82.

1. גורוי: identified by Justi, p. 356, as a new-Persian form of *Warôê*. The *Seder ha-Doroth* lists a number of Talmudic persons named גוריא and גוריון (ii, 89); also a famous Syriac martyr Gurias is recorded. Apart from the Persian hypocoristic ending, the word could be explained from the Semitic (גוריא, Syriac, "whelp"). Cf. also the Palmyrene גורא, Lidzbarski, *Handbuch*, 249.

טאטי: Ṭaṭâ is a feminine name found in Syriac, in Asseman's *Bibliotheca Orientalis* and Wright's *Catalogue of the British Museum;* see Payne Smith, col. 1456. Cf. תאתא, 39: 8.

2. אילי, אלי, and אילה l. 5: the Aramaic pronoun with loss of י, cf. similar cases cited to 8: 2,—if not a Hebraism.

ניסתרתו, ניסתרי: Hebrew Nifals with Aramaic inflection.

שלח להום להדרבדו: the idea apparently is that a message be sent to the dead to cause them to cease their contentions (ריביהון) with the living, then one of these departed spirits is named. The name is not recognizable as a proper name, and evidently, as in Wohlstein's bowl, referred to above, it is a fancy name. (There we have such names as *Yodid, Muth, Dabti, Ith.*)

4. יופיאל: One of the six angels in Targ. Jer. to *Dt.* 34: 6, along with Metatron, and, in Schwab, *Vocab.*, 145, a companion of M. and prince of the Law. יופי is a Talmudic surrogate for יהוה, see Blau, *Zauberwesen*, 131.

יחיאל or יהואל: cf. יהואל, Schwab, p. 141. The following name is unknown. These angels are invoked as phases or names of Deity; cf. p. 58.

Hermes-Metatron: for the identification, see to 2: 2; here identified with Yah.

5. These magical words are mystical names of the angels; see p. 97. They are dominated by sibilant terminations for which see p. 60.

מלאכיה: Mandaic plural spelling.

6. יתן = יאתון.

7. גליל עלם: cf. Syriac שנתא זבנא גינל; also of a cycle.

Translation

"Hear, Israel: YYYY our God is one YYYY." "According to the mouth of YYYY they encamped, and according to the mouth of YYYY they marched (2). The observance of YYYY they observed according to the word of YHWH through Moses." "And YYYY said to Satan: YYYY rebuke (3) thee, Satan, YYYY rebuke thee, who chose Jerusalem. Is not this a brand plucked from the fire?"

Again, bound and held art thou, (4) evil Spirit, and mighty Lilith, that thou appear not to Berîk-Yahbêh bar Mâmê and this Ispandarmêd bath H..dôrâ, (5) neither by day nor by night, nor at any evening or morning, nor at any time whatsoever, nor at any seasons whatsoever. But flee (6) from their presence and take thy divorce and thy separation and thy writ of dismissal. [I have divorced] thee, [even as demons write] divorces for their wives and return not (to them). (7, 8) .....

Commentary

This charm, against the evil Lilith, is introduced by three quotations from the Scriptures. The first is the opening sentence of the *Shemá*, which still remains the contents of the Mezuzoth, or house phylacteries of the

Jews. The other two have occurred in previous texts; see 5: 5. Unfortunately the last two lines are too broken and obscure to be read. I have merely reproduced here the evident characters. In the segments of the circle at the bottom of the bowl appear words, some of which are forms of the divine Names יה, יהו, איאה; also אילור (?) and יאיהו (?)

1. יויי: for יהוה. Cf. the common scribal abbreviation, יי or יוי; also such forms as יוו and ויו, in Schwab O.

בד משה: for ביד, as in No. 5.

3. תוב: cf. 2: 1.

4. בריכיהביה: there is no doubt as to the reading of this name and it is remarkable enough. The second and divine component of the name—which was an ordinary [ברכ]יה, [ברוכ]יה, or [בריכ]יה, has been expanded so as to give the awful pronunciation of the Ineffable Name. We cannot suppose that the name was thus ordinarily spelt or pronounced, but the scribe has taken it upon himself to give this interpretation (פירוש) of his client's name. Here then is a clear survival of the ancient magical signification and use of the personal name (cf. Heitmüller, *"Im Namen Jesu,"* 159 ff.), as also of the pronunciation of the name itself. It may be retorted that יה—would hardly be used to represent *ê*, and that the original pronunciation was *Yahwè*, not—*é* (see Arnold's valuable discussion, *JBL*, xxiv, 152). The latter thesis is right, but I think that the tradition represented here connects with the Hellenistic magic, in which, among various forms, Ιαη occurs several times (Deissmann, *Bibelstudien*, 7),[1] although I have not found a case of Ια$\beta\eta$. Further, in the Talmud (*Sanh.* 56a) יוסה appears as a surrogate for the Name, which Dietrich, *ZATW*, iv, 27, would vocalize as Yosê. Blau (*Zauberwesen*, 131) objects to *ê*, but adduces from the Mishna, *Sukk.* 45a, the surrogate יופי which he identifies with the Greek magical term $\iota\omega\phi\eta$ (citing Paris Pap. ll. 1896, 2746). This would be further proof for η in the current magical pronunciation. As for יה- = -*ê*, we have not only the masc. pron. suffix for a parallel but also the plural -*ê* represented in the same way in some of our texts, e. g. 9: 6, 12: 1, 25: 5, and also the proper name דדביה 31: 2.

[1] Also on an Abraxas gem, see *Dict. de l'archéologie chrétienne*, i, 141.

I can find no other interpretation of this unique name-form. A note upon it was published in the *Museum Journal* of the University, 1910 no. 2, which called forth some private criticisms from scholars (along with assents), but no better explanation has been offered. (Is there a possible explanation in the יהביה noticed to 7: 8?). In the first amulet in my paper "Some Early Amulets from Palestine," *JAOS,* 1911, *272,* line 16, יהביה is apparently to be read for the divine Name, a proof of western connections for the present form.

איצפנדרמיד: cf. Glossary B for other forms. The name occurs in Ellis 1, where it was first recognized by Levy, *ZDMG,* ix, 470, 486, its correct interpretation (as Spenta-Armaita, a daughter of Ahuramazda) being given by G. Hoffmann, "Auszüge aus syrischen Acten," *Abhandlungen f. d. Kunde d. Morgenlandes,* 1880, 128; see also Justi, p. 308. For the mother's name Prof. Kent suggests to me comparison with Ἑρμόδωρος, see Fick, *Griech. Personennamen,* 112.

8. פשיטנא: cf. 2: 5.

No. 27 (CBS 16041)

Commentary

After the introductory appeal, "In thy name, O Lord of salvations," etc., the inscription for lines 2b-11 is practically identical with No. 2. This portion does not need translation and commentary. The remaining lines, 13-24, are so mutilated or obscure, that I can make out but few connected passages in them, and hence I do not present them.

There are a few slight differences between the parallel texts, this one being probably more correct. The most considerable variation in text is in l. 9, where the sorcerer says that *he* laid the ban upon Hermon; cf. my note to 2: 6. The same Yezîdâd bar Izdandûch and his wife Merdûch bath Banâi, appear in No. 7. There they are the subjects of the charm, here Yezîdâd operates magic in his own name. Cf. the mutual character of the charm in No. 2. In l. 8 the wife also takes up the exorcism.

Translation

In thy name, O Lord of heaven and earth. Appointed is this bowl to the account of Anûr ... bar Parkôi, that he be inflamed and kindled and burn (2) after Aḥath bath Nebâzak. Amen.

Everlasting presses which have only been pressed upon (?) ..... a man in his heart. (3) Take *ḥrk*, and hot herbs (?) which they call sunwort (?), *mṭlln* and peppers ..... them and the rites of love which thou (?) hast sprinkled upon ..... (4) She shall sprinkle them upon this Anûr ... b. P. until that he be inflamed and burn after Aḥath b. N. ..... and in lust and in the mysteries of love, in order that ..... (5) ..... take pieces from his heart and the charm ..... his name (?). In the name of the angel Raḥmiel and in the name of Dlîbat the passionate, ... the gods, the lords of all the mysteries. Amen, Amen, ...

Commentary

A love-charm—such is the import of this sadly mutilated but interesting bowl. It belongs to the same class of magic as No. 13, but is more romantic, for there we find a charm for a childless, neglected wife, here one for a passionate woman to bring her lover to her side. For the use of a bowl for such a *defixio* see above p. 44. The first copyist was able to

read more than I can now, as, since it was in his hands, the bowl has been cracked and then repaired. The lacunae in the text are tantalizing.

So far as the text is legible, the charm which names the two parties adjures the passion of the beloved. Some praxis is described, a simulacrum is evidently used, for "his heart is to be torn in pieces," and on this image is to be scattered some kind of salad of hot herbs expressive of love's passion, while the beloved's name is to be formally pronounced.

Blau has collected the Talmudic material on philtres in his *Zauberwesen,* 24, 52, 158, 167; n. b. the recitation of Bible verses over the love-apple, p. 52, n. 2 (with literature). In the Old Testament we have mere references to this aphrodisiac (*Gen.* 30: 14 ff., *Cant.* 7: 14) without any note as to magical manipulation. For later Jewish use, see the numerous philtres prescribed in Thompson, "Folk Lore of Mossoul," *PSBA,* 1906-7.

But it is from the classical and Hellenistic field that we have most knowledge of this amatory magic, and the connections of the present text are found in that direction. Of course Theocritus's second Idyll comes to mind, in which the love-lorn maiden casts the various philtres into the fire with adjurations of Hecate. For this classical field I may refer to the monograph of O. Hirschfeld, *De incantamentis et devinctionibus amatoriis apud Graecos Romanosque* (Ratisbon, 1863); see p. 42 for aphrodisiac herbs; also see section 8 (p. 233) of Abt, *Die Apologie des Apuleius.*

In the magical papyri numerous erotic incantations are preserved, e. g. in the Paris Papyrus in Wessely, Vienna *Denkschriften* hist.-phil. Class, xxxvi, l. 2622 ff., xli, p. 52, l. 976 ff.[1] But the most graceful and famous of these charms is that inscribed on a lead plate found at Hadrumetum, N. Africa,—buried in a necropolis, just as our bowl was buried in the earth. First edited by Maspero, it has been since frequently published: Wünsch, *CIA, App. continens defixionum tabellas,* p. xvii; Audollent, *Defixionum tabellae,* no. 271; Deissmann, *Bibelstudien,* 21, and *Bible Studies,* 271; Blau, *op. cit.* 96; Wünsch, *Ant. Fluchtafeln,* no. 5. It is Blau's merit to have specially pointed out the Jewish connection of this text. Now, between this Hellenistic charm and our bowl we find an almost literal

[1] I may add now F. Boll, "Griechischer Liebeszauber aus Aegypten auf zwei Bleitafeln," in *Sitzungsberichte* of the Heidelberg Academy, phil.-hist. Class, 1910, no. 2.

correspondence in the trinity of terms for the passion adjured in the lover. With our invocation that the man "be enflamed and kindled and burn after" the girl, compare the longing of the Greek maiden Domitiana that her lover come *ἐρῶντα μαινόμενον βασανιζόμενον*, or *ἐρῶντα μαινόμενον βασανιζόμενον*, or *ἐρ. βασ. ἀγρυπνοῦντα* —repetitions like those in our texts. With this probably technical formula compare the second of the charms cited above by Wessely: May X do naught until *ἐλθοῦσα πρός με τὸν δεῖνα πληροφοροῦσα ἀγαπῶσα στεργοῦσα εμέ, κ. τ. λ.* Also in our l. 4 there is an echo of Domitiana's wish that he come *ἐν τῇ φιλίᾳ καὶ ἐρωτι καὶ ἐπιθυμίᾳ*, while the formula "to the name," l. 1, and the use of "heart," l. 2, indicate Greek connections.

How much Jewish, how much Grecian, the Hadrumetum tablet is, it is difficult to determine. Our text shows manifest ties with the love-magic of the Hellenistic world and is the eastern representative of the philtres of which the North African text is the most notable western example. The spirit of both these texts is Greek rather than Semitic; but the fame of Jewish magic appears to have made its solemn formulas eligible for the desires of passion. Our text, it is to be noticed, is not at all Jewish in religion, is of more simple original type than the African charm.

For the praxis of our text I may compare a Moorish love-charm cited by Doutté, *Magie et religion dans l'Afrique du Nord*, Algiers, 1908, p. 253: "A woman who wishes to gain the love of a man should procure the following materials from neighbors with whom she has never eaten: coriander, caraway, gum of terebinth, lime, cummin, verdegris, myrrh, some blood of an animal whose throat has been cut, and a piece of a broom hailing from a cemetery. On a dark night she is to go into the country with a lighted brazier and throw these different articles one after another into the fire speaking these words: O coriander, bring him mad! O caraway, bring him wandering without success! O mastic, raise in his heart anguish and tears! O white lime, make his heart wakeful in disquietude! O cummin, bring him possessed! O verdegris, kindle the fire of his heart! O myrrh, make him spend a frightful night! O blood of the victim, lead him panting! O cemetery broom, bring him to my side." Etc.

1. לישמיה = *εἰς τὸ ὄνομα*, and see Heitmüller, *"Im Namen Jesu,"* 95 ff., and his definition of the phrase as indicating "die Zueignung an eine Person

unter irgend welchem Gebrauch ihres Namens" (p. 107, and at length, pp. 100-110). As he shows, the usage before us is not Semitic or even Septuagintal. Cf. also Böhmer, *Das biblische "Im Namen,"* 4.

נבאזך, אנור..ך: ?

2. כבשי עלמא: I translate the words without any certain sense. For the noun כ׳ see to 7: 1. If צלמא might be read, the reference could be to a moulded (כבש, "press") figure representing the lover. Below in l. 4 the space before the man's name may have contained "image of," or the like. The latter part of the line is most obscure. The "heart" (also l. 5) appears as the seat of sexual affection. This is a Greek usage, not Semitic (with the possible exception of the Hebrew phrase דבר על לב, used five times with a woman as the object). See Andry, *Le coeur,* 5, for the Greek idea of the heart as the amatory organ, p. 15 ff., for the late Semitic use. P. 17 he quotes a Spanish Arabic poet who speaks gallantly of being wounded to the heart, but the metaphor is that of a mortal wound.[3]

3. I translate the ppl. נסבין, as also פסקין l. 5, as imperatives; cf. Rabbinic and Syriac usage.

חרך וג׳: to this list of aphrodisiacs the clue is given by גורייא (יא- = pl. ending, as in Mandaic), which is the *piper candidus* (Payne Smith, col. 2303); its pungency was evidently regarded as possessing erotic power and symbolism. Then חרך, if the reading be correct, and אחרוניתא are to be explained in the same way from their roots, חרך, חרה, "burn." ענני שימשא doubtless lies in the same circle of ideas. May מטללן be mushrooms? Loew's *Aramäische Pflanzennamen* does not contain these words. The "rites of love" are the magical practices.

4. שיחאה: I compare Syriac שיחנותא (*sub* שוח). "boldness, lasciviousness"; the ending *â'â* for *âyâ?*

5. פסקין מין ליביה: פ׳ a noun, or better a ppl. like נסבין, l. 3. The phrase is simplest interpreted as a reference to the lady's slowly tearing to pieces the facsimile of her lover's heart, with the intent that he perish of love; cf. again Theocritus's second Idyll.

[3] Cf. the phrase quoted in Lane's *Dictionary,* 782: "she has overturned my heart and torn my midriff."

דוכרניה: the lover's name is to be pronounced. For the angel Raḥmiel see to No. 13.

דליבת : one of the Mandaic forms of Dilbat, a name of the Babylonian Ishtar, especially in her stellar capacity as Venus. For the Mandaic forms, see Brandt, *Mand. Schr.*, 45, 85; also in Hesychius as Δελεφατ, and in Bar Baḥlul as דלבת.[3] For this form, see Nöldeke,, *Mand. Gram.* § 25. For the Babylonian use see Jensen, *Kosmologie,* 18, and the latest discussion by Jastrow, *ZA,* 1908, 155. As the goddess of love her patronage is appropriate. The epithet עזיזתא (cf. 38: 7) recalls the Babylonian *ezzu,* a frequent epithet of gods, while Ishtar especially appears as the raging goddess, whether of war, in Assyria, or of love, in the Izdubhar epic. The same epithet became the old Arabian name of the morning-star, al-'uzza, (Wellhausen *Skizzen,* III, 41, Nöldeke, *ZDMG,* xli, 710, the identification denied by W. R. Smith, *Rel. Sem.*, 57). The Edessene עזיז was originally the morning-star, Lagrange, *Études,*[3] 135; cf. the Aramaic names עשתרעזא and עשתרתעז (Lidzbarski, *Handbuch,* 347 f.).

[3] So also to be explained דלפת in Schwab, *Vocab.*, 403.

Translation

[This bowl is appointed in the name of?] (2) YHWH Sebaoth for the salvation [and sealing? of Metâniš] (3) bath Rêšân ..... (4) ..... and sealed (5) for Metâniš b. R.,—an amulet in the name of YHWH Sebaoth for Metâniš b. R. And bound (6) from her, from her children, from her house, from all her dwelling, are the evil Plagues and evil Demons and the evil and the decent Lilith and the Necklace-spirits and ... Menstruation and Tormentors and the Hags of the wild and Impurities and Epilepsy (?).

We adjure you (8) whatsoever evil thing lodges in the house and dwelling of Ḥaliphâi bar Šiššîn ... and Darši the foreigner and Astrôbâ ..... (9) ..... Leprosy, Plague, Stroke, the kindly and ... Lili, and the Demons, ghostly Shades, and all Goblins and evil Injurers whose names I have mentioned and whose names [I have not] (10) mentioned: I exorcise and adjure and make fast and bind and make fast (*sic*) upon you, in the name of MW, of ḲṢ, ŠṢ, MṢ, BṢ, KṢ, KṢ, BṢ, ... (11) I-am-that-I-am, the great God, Meṣôâh his name. He is God, the Lord of all Salvation, whose throne is established between the ethers and his eternity (world?)

is established for ..... (12) in YHWH and for his praise and the faith in him and his service. He is the great, the mighty God.

COMMENTARY

A charm made out for two different parties, (1) a woman Metâniš and her household, and (2) for several men and their house and quarters. These may be lodgers in the woman's house. One of the men is a "foreigner." The tone of piety in the charm is superior to that of the other texts; the incantation is in the name of YHWH Sebaoth alone, whose praises are dwelt upon in almost liturgical fashion.

1. The charm appears to have a double introduction. Most of ll. 3, 4 is unintelligible.

5. מתאניש:?—ראשן: possibly the father's name, Syriac ראשנא, "prince." One is tempted to compare the name of the famous Roxane; the masc. parallel Roxanes = Persian Rôšan, Justi, p. 262. But the *ô* should be indicated.

6. לי בי וכשירה: see above, p. 76. בי may be euphemistic and then have developed into a distinct species. Cf. the epithet טאבא in l. 9.

7. כיפסא: Syriac *kepsâ*.—בנתא דברא: cf. 17: 3.—טומי: Syriac טאומא.

בר ניפלא: one might think, in the context, of abortion. But in the Talmud בן נפילים is a demon of nervous trouble or epilepsy, *Bekor.* 44b; see Grünbaum *ZDMG*, xxxi, 332 for some discussion of the word. Epilepsy was a most common disease in antiquity; n. b. the miracles in the New Testament, and for the Hellenic world cf. Tambornino, *De antiquorum daemonismo*, 57: often equivalent to insanity. It has been generally supposed that the Jews were particularly subject to this disease; M. Fishberg in *The Jews*, London and New York, 1911, denies this, but admits the nervous pathology of the race (chap. xv). Cf. 16: 8 for another disease cited in *Bekor.* 44.

8. דרתיה: alongside of דירי, l. 6; the form appears in the Syriac and Mandaic bowls.

חליפאי = Palmyrene חלימי; for signification, cf. מחלפתא.

שישין : cf. the Persian (?) names Sisines, Sisinnios, Šišôi, Justi, p. 303; on the etymology of Sisines see Nöldeke, *Pers. Studien*, 404, no. 1.

Cf. the Jewish names שישא and שישנא, *Seder ha-Doroth,* ii, 348 f. Also in Pognon B (where שעשין) it is the name of the parent—mother or father? Is שידא an additional name? Of רשי we learn only that he is a foreigner. Also אסטרובא is evidently a Greek name.

9. אינגע: the demon offspring of Adam are called בני אדם נגעי in the Zohar, Eisenmenger, ii, 422.

חרסום: for this formation, see Levias, *Grammar of the Aramaic Idiom ... in the Bab. Talmud,* § 975. For similar eruptive diseases named in these texts, see p. 93.

בני טילא: epithet of the goblins; Rabb. טולא, Syr. *ṭellâ,* "shadow." Cf. the טלני, Targ. *Cant.* 3: 8, etc.

The lacuna at end of the line is supplied by help of 14: 6.

10. For the dominance of sibilants in these magical words cf. p. 60. At the begining and end of the series are characters enclosed in square lines.

11. בי: for בין, as also in the Talmud. There follows a lapse into Hebrew—probably a citation.

שחקים: one of the seven heavens of Kabbalism.

12. תושבחיה: for תושבחתיה?

עובריה: it is strange to find this word of magical connotation used of true worship in a Jewish text.

Bound and sealed are the house and the life of this Išpîzâ bar Arhâ, and Yandundišnaṭ bar (2) Ispandarmêd, and ... bath Simkôi, from the Sun and Heat, from the Devil, the Satan, the male Demon (3) the female Lilith, evil Spirits, the impious Amulet-spirit, the lilith-Spirit male or female; the Eye of man (or) (4) woman; the Eye of contumely; the Eye which looks right into the heart; the mystery which belongs to the evil Potency, that impious lord; from the evil hateful Potency; from disturbing Vision; from evil Spirits; from that impious Lord, in the name of .....

Commentary

A charm for two men and a woman from certain specified diseases and demons. The inscription is illiterate and the script particularly difficult, the writer using a very individual chirography; n. b. the מ, the non-distinction of ד and ר, the א which often consists of but two upright strokes, and the use of one form for internal and finial נ except in the word מן, where a finial is used.

1. אסר: for אסיר.

אישפיזא: cf. the Syriac אשפז (Ašpâz) for the Hebrew אשפנז in Dan. 1: 3. (אספנז occurs in Myhrman, l. 1, to which I cite the Babylonian

Ašpazanda.). The Persian אשפוא is "house," and אישפיזכיא "steward." May it be an abbreviated form of the latter word?[1]

ארחא: cf. the biblical Araḥ, a post-exilic name.

ינדונדישנט: so the most likely reading of the name.

2. סימכוי: the characters are uncertain. Cf. Σειμεικος in a Greek inscription from the Don, = Persian simikos, "silver"; Justi, p. 294.

שאמיש וכיטא: the first word is the Mandaic spelling for "the Sun," which also in the Mandaic religion is regarded as an evil genius. כיטא = קיטא, see Nöldeke, *Mand. Gram.*, § 42. Cf. Ps. 121: 6, 91: 6, and see Grünbaum's discussion of the קטב מרירי, the demon of the midday sun, *ZDMG*, xxxi, 251 f.

דכירא: an error for דיכרא (cf. l. 3), or intended for assonance with נקיבתא. Cf. the unabashed spellings in Samaritan literature to produce rhymes. Or is there a play on the roots, דכר and נקב being used in the sense of "name"?—i. e. the named spirits.

3. רוח לילית: cf. N. T. *πνεῦμα δαίμονος*.

עינאנא: the last two letters are dittography. There follows a list of various kinds of "evil eye," for which see p. 86.

4. עינא חאסדניתא: so the most likely reading; cf. Lidz. 4, end, עינא חוסראנא (?).

"The eye that sees (or of those that see) within the heart" is a reference to the uncanny effect of the evil eye.

In what follows some corrections are necessary. דאו = דהו ?; for חיל בישין read ח׳ ביש as farther on, and correct זנותא to זאדנותא with l. 5. There is evidently a repetition of phrases. The חיל ביש (like the עין בישא) is the personification of the power operating these psychological wonders. Cf. the Rabbinic כחות (Joel, *Der Aberglaube*, i, 80), the New Testament *δυνάμεις*.

חזינא טרודא = חלמי שנושי, 24: 4.

At the end of l. 5 comes a long series of characters which do not appear to form words.

[1] According to Karmsedin's Lexicon, quoted by Payne-Smith under the latter word; *in lingua Nabathaea est oeconomius et viatorum exceptor*, etc. Observe the accompanying name ארחא.

Translation

This bowl is designated for the sealing (2) of the house of this Dâdbeh bar Asmandûcht, (3) that from him and his house may remove the Tormentor (4) and the Curse and the very evil Dreams. Charmed; fortified and confirmed, (5) corroborated, strengthened and sealed and guarded are these bowls for the sealing (6) of the house of this Dâhbeh b. A., that they may not lodge together (with them). In the name of Yâhihû (7) NHRBTMW, S, MR'S, MRMR, 'oth Šašbiboth, Astar, Mûtâ. YŠHN'H, Ah, Ah, Ah, Ahah, (8) AAAAAAA, Amen, Amen, Selah, Hallulia.

Sealed and guarded shall be the house (9) and wife and sons of this Dâdbeh b. A., that there may remove from him and his house the Tormentor and the Curse and evil Dreams. Amen.

Commentary

For a general discussion of the epigraphy and language of this and the following Syriac bowls (Nos. 31-37), see Introduction, § 6. The crosses in l. 8 are the same as those which occur in the center "seals" of these Syriac bowls.

1. מזמן וגי: cf. 8: 1, and see to 3: 1.

2. Dâdbeh son of Asmanducht appears also in Nos. 12 and 16. Here the latter name appears in full Persian form, *-dûcht*.

3. תיזה = תיזח: see to 4: 6.

4. מזרזין: see to 4: 6.

5. מהילין: for מח׳.-באסא הלין with reference to the four duplicate bowls.

6. יאהיאו: a play on the Tetragrammaton, with the three primary vowels; cf. the magical use of the seven vowels in Greek; there αηω is also found, Paris Pap., l. 3019 ff.

No. 32 (CBS 16086)

Translation

This bowl is designated for the sealing of the house and the wife (2) and the children of Dinôi bar Ispandarmêd, that there remove from him the Tormentor (3) and evil Dreams.

The bowl I deposit and sink down, a work which has been made (4) like that which Rab Jesus bar Perahia sat and wrote against them,—a ban-writ against all the Demons and Devils (5) and Satans and Liliths and *Laṭbê* which are in the house of Dinôi b. I. Again: he wrote against them a ban-writ which is for all time, (6) by the virtue of 'TMDG, Atâtôt Atôt, within T(?), Atôt Atôt the name, a writing within a writing. Through which (words) were subjected (7) heaven and earth and the mountains; and through which the heights were commanded; and through which were fettered Arts, Demons and Devils and Satans and Liliths and *Laṭbê;* (8) and through which he passed over from this world and climbed above you

to the height (of heaven) and learned all counter-charms, a ruin to destruction, and ... to bring you forth (9) from the house of Dînôi b. I., and from all that is in his house, I have dismissed you by the ban-writ. And charmed and sealed and countersealed is it, even as ancient runes fail not, (10) and (like) ancient men who are not ... Again: charmed and sealed and countersealed is this ban-writ by the virtue of YHYHYHYHYH, YHYH, YHYH, A'. Amen, Amen, Selah.

(11) Sealed and protected are the house and dwelling of Dînôi b. I. from the Tormentor and evil Dreams and the Curse. And sealed and protected be [his wife and son] (12) from the Tormentor and evil Dreams and Curse and Vows and ..... Hallela, Amen.

Commentary

Nos. 32 and 33 certain practically identical inscriptions, except that they are made out in the name of different clients, and that No. 32 has additional matter at the beginning and the end. This identity is fortunate for the interpretation of the two bowls, for the lacunae in each one can be almost wholly supplied from the other. Also No. 35 is made out for the wife of the client of the present charm. The chirography of all three bowls is the same, being more cursive than the script of No. 31.

The charms effected in this and the following bowl are attributed to a certain master magician, Jesus bar Perahia, evidently the Joshua ben Perahia, who appears in the same capacity in Nos. 8, 9, and 17. Now Joshua ben Perahia is one of the several *Zugoth* or Pairs, who handed down the tradition of the Law from the Great Synagogue; and he flourished in the reign of Alexander Jannaeus, in the early part of the first century B. C. The Mishnaic reference to him is found in *Pirke Aboth* 1: 7, where the following *dictum* is attributed to him: "Make unto thyself a master, and possess thyself of an associate, and judge every man on the scale of merit."

Further, an interesting Talmudic tradition concerning the same Joshua appears in uncensored editions, according to which he fled into Egypt to escape the cruel persecution instituted by Alexander against the Pharisees, culminating in the crucifixion of eight hundred of that faction, *circa* 88

B. C.[1] The tradition is of added interest because it connects Joshua with a certain ישו whose identity with Jesus of Nazareth is generally recognized.[2]

The passage in *Sanh.* 107b reads as follows: The rabbis taught: The left hand should always push away, and the right hand receive favorably. Not like Elisha, who drove away Gehazi with both hands, nor like Joshua b. P. who drove off Jesus (in the Munich MS., and in *Soṭa* ישו חנוצרי, i. e. Jesus the Nazarene)..... How was that? When king Jannaeus killed the rabbis, R. Joshua b. P. and Jesus went to Alexandria of Egypt. When peace was established, Simeon b. Šeṭaḥ sent a message to him: From Jerusalem the Holy City to thee Alexandria of Egypt, my sister: My husband is lodged in thee, and I sit desolate.—He (Joshua) arose, and came, and lodged at a certain inn, where they paid him great respect. He said: How fair is this inn (*aksania*). He (Jesus) said to him, Rabbi, her eyes (as though by *aksania* the landlady was meant!) are too bleary. He replied to him: Thou knave, thou busiest thyself with such stuff! He brought forth four hundred horns and excommunicated him. He (Jesus) came in his presence many a time, and said, Receive me; he took no notice of him. One day he was reading the Shema, Jesus again presented himself, thinking he would receive him. He made a sign to him with his hand, he thought that he had utterly rejected him. He went off and erected a tile and worshipped it. Joshua said to him, Repent. He replied, I have been taught by thee that every sinner and seducer of the people can find no opportunity for repentance. And so it was said: Jesus bewitched and seduced and drove off Israel.

It is of interest that the Jesus of our texts is given a title which became the epithet of the Nazarene Jesus with whom Talmudic tradition connected him: ישוע אסיא, 34: 2, = Ἰησοῦς σωτήρ. Is there in this magical reference to Jesus b. Perahia a confusion with Jesus Christ?

We find then in these magical bowls an independent tradition concerning an early hero of the Law, who appears as endowed with magic powers, and who furthermore was able to make the ascent of the soul to heaven. He was accordingly one of the earliest to attain that spiritual

[1] See Schürer, *GJV*[4], i, 288.

[2] The anecdote is found in *Sanhedrin* 107b = *Soṭa* 47a; cf. Jerusalem Talmud *Ḥagiga*, ii, 2, *Sanh.* vi, 8. Dalman, in Laible's *Jesus Christus im Talmud*[2], Appendix, p. 8 ff., gives the texts of the first three passages, with critical apparatus, and Strack, *Jesus, die Häretiker u. d. Christen*, 1910, § 8, gives the texts from *Ḥagiga*, and the Bab. *Sanhedrin*. Through the kindness of Dr. Julius H. Greenstone, I have also had access to his rare copy of the Constantinople edition, 1585, of *Sanhedrin*. Dalman quotes the Venetian editions of the two Talmuds, and the *Jewish Encyclopaedia, s. v.* "Joshua b. P." cites the Amsterdam and Berlin edition of 1865 for the passage in *Soṭa*. On the criticism of the legend concerning Jesus, see Laible, p. 40 ff., and Strack, *ad loc.* The Jerusalem Talmud names Juda b. Tabai in place of Joshua (they were contemporaries) and omits mention of Jesus. Cf. Blau, p. 34, for some points of interpretation. The introduction of Jesus is a sheer anachronism.

privilege, which was the claim of apocalyptists from the author of *Enoch* down. See in general Bousset, "Die Himmelreise d. Seele," in *Archiv f. Rel-wissenschaft,* iv (1901), 136 f., 229 f. Such a claim is made for Akiba, who alone of four friends succeeded in penetrating Paradise, *Ḥagiga* 14b (see Bousset, p. 145), and this mystical claim was asserted by the Kabbalists for Moses and especially for R. Ishmael; see full references in Bousset, p. 151 ff., cf. Graetz, *Gesch.* v, 231 and Joel, *Aberglaube,* ii, 35. The Talmudic tradition has unfortunately not preserved for us enough of the mystical side of the early teachers; Akiba could not have been alone in his mysticism. Joshua was possibly one of the good company of apocalyptists and our magic tradition may preserve a true reminiscence of his personality and claims.

2. בנה: plural with masc. sing. suffix, as in the texts above and in Mandaic.

דינוי: s. Nöldeke, *Persische Studien,* 403.

3. פורא רמינא וג': see to 9: 1. I may now add the Syriac פוחרא, "earthenware figures" (of the gods), occurring in Overbeck, *Ephraemi Syri ... opera,* 13, l. 24. Compare also the Assyrian *pûru,* "bowl," see Zimmern, *Beiträge,* 147, note k, and *KAT*[3], 518: but my etymology contravenes that of Zimmern.

עבורא: so also in No. 33; elsewhere עברא, עובדא, מעבדא.

הוהוא: a duplicated form of the pronoun, found in the Syriac.

4. כי: a preposition appearing in the Rabbinic dialect, not in Syriac.

יישוע: the spelling represents the older pronunciation, the Biblical יֵשׁוּעַ, Ἰησοῦς, the Jacobite Yêšû, over against the Nestorian Išû.

דסתבירא: Prof. Roland G. Kent, to whom I referred this word, has published an elaborate study of it in *JAOS,* 1911, 359. He comes to the conclusion that it means "a handwritten deterrent," from *dast,* "hand" + *bhîra* (Sansk.), "terrifying." The word occurs only here and in No. 33.

5. לטבא: see to 9: 7.

6. The same magical reference appears in No. 32. For the practice see the more perfect form in 9: 6.

הנהון : a unique spelling (occurring also in the parallel, No. 33, along with הנון), for the Syriac *hennôn.* It is an elder form and is to be compared with the Rabbinic אינהו, see Levias, *Grammar,* § 95.

7. איתמר: corresponding to both Syriac and Rabbinic forms.

איתמסר: from a denominative verb, arising from the root אסר. Payne-Smith, col. 2181, gives a citation for מסר, = *vinxit catenis vel compedibus,* with which may be compared ממסרנותא, *actus ligationis, ib.* col. 324. Also cf. מצר, Glossary C.

8. חבילא: also found in 37: 11 and in Lidzbarski, *Mand. Amulet,* l. 33 (de Vogüé volume).

לאפקכן: for the infinitive, cf. 9: 8.

איכין = Syriac *aikannâ;* the good Syriac איך appears in the parallel 34: 4. What follows is not perfectly clear. By the "ancient songs" (שירא rare in Syriac), are meant charms (i. e. *carmina*), such as the master Jesus b. P. once used. But the following clause remains obscure because of the unintelligible דעוטר.

10. אנשא: cf. the Rabbinic אינשי, which Nöldeke (*Mand. Gram.,* 182) understands as *ênâšê,* not *inšê.* The Syriac rarely uses the plural in the sense of "men."

No. 33 (CBS 16019)

פורא רמינא ושקינא (2) עבודא דעביד הוהוא כי הוא (3) דיתיב רב יישוע בר פרחיא וכתב (4) עליהון דסתבירא על כלהון שידא ודיוא וסטנא (5) וללִיתא ולטבא דאית בביתה דדאדבה בר אסמנדוכת (6) תוב כתב עליהון דסתבירא דלעלם בשום אתמדג אתאתות (7) אתו[ת מן נו ת] אתות אתות שמא [ני]ליונא מן גו גיליונא דבהנהון איתכביש (8) שמ[יא וארע]א וטוראּ ובהנון איתמר רמאתא ובהנון איתמסר חרשא שידא (9) ודי[וא וסט]נא וללִיתא ולטבא וב[הנון ע]בר מן עלמא וסליק עליכון למרומא ואיתאל[ה כל] (10) קיבלא חבילא לחבלותא [ואסִ.א] לאפקכון מן ביתה דדאדבה בר אסמנדוכת (11) ומן כול דאיתלה שביקיתון בדסתב[ירא ואסיר ו]חתים ומחתם איכין דשירא קרמיא לא כדיבו (12) ואנשא קדמיא דעוטר לא הוו תוב אסיר חתים ומחתם הנא דסתבירא בשום יהיהיה יהיה יהיה עא (13) אמין אמין סל[ה] ניתחתים וניתנטר ביתה דה[נא דאדבה בר אס]מנדוכת ואנתתה בנה ובנתה וקנינה מן מבכלתא ולוטתא אמין

This inscription is practically contained in No. 32, with a change in the name of the client, who is the same as the one in the Syriac No. 31 and Nos. 12, 16.

Translation

This bowl is designated for the sealing of the house of Mihr-hormizd bar Mâmî (2) by power of the virtue of Jesus the healer, by the virtue of my mighty relative. Charmed is the dwelling, and the abode (3) and the house and the wife and the sons and the daughters of Mihr-hormizd, who is surnamed b. M.; charmed and sealed (4) even as Moses commanded the Red Sea and they (the waters) stood up like a wall on both sides. Charmed and sealed, charmed and sealed, (5) by this word which God

laid upon the earth and the trees which... their tops; charmed and sealed with the seal of the mountains and heights; (6) charmed and sealed (with the spell which is) in the heavens and the earth, the sun and the moon, the stars and (zodiacal) signs, and by the word they are charmed and remain in ward. In the name of (7) Michael the healer and Rofiel the reliever, and Gabriel the servant of the Lord.

Charmed and sealed is all evil that is in the body of Mihr-hormizd b. M. (8) and in his house (and) his wife and his sons and his daughters and his cattle and his property and in all his dwelling, by the signet of Ariôn son of Zand and by the seal of King Solomon son of David, (9) by which were sealed the Oppressors and the *Laṭbê*. And we have sealed with the seal of El Šaddai and Abraxas the mighty lord, and the great seal with which were sealed heaven and earth and all Demons (10) and foul Knots and *Laṭbê*, which contend against him. And a seal is this against Harm and Constraint (?), that they shall not at all enter in. And every *Damḳar* and *Šaiṭ* and *Šarâ* are charmed by the spell of (11) fire and the enchainment of water until the dissolution of heaven and earth. Amen, Amen, Selah. Sealed and guarded be the house and wife and sons and property and body of Mihr-hormizd (12) b. M., and depart from him the Injurer and evil Dreams and the Curse and the Vow and Arts and the Tormentor and Damages and Losses and Failures and Poverty.

And sealed and protected be Bahrôi bath Bath-Sâhdê from the Tormentor and evil Dreams and the Curse and the Vow and Arts and Practices. And charmed be the Tormentor and Lilith and Ban-spirit, who thwarts her in her hand and foot, and may it not approach nor afflict this Bahrôi b. B.

Commentary

The text is of the same order as those immediately preceding. At the end the charm is operated for a woman (with a Christian name), presumably the wife of the chief client of the text.

1. חתומין: the reading is certain, and the word is parallel to חתמתא in the previous inscriptions, but the formation is unique, if it be not an error; חתומי would be a Pael inf.

A Hormizd son of Mâmâ(i) appears in No. 15.

מיחר חורמיזד is the same as Mitr-ôharmazde, or Mihrhormuz, the name of the murderer of Chosroes II; see Justi, p. 216.

2. אסיא: here applied to the sorcerer, but otherwise of God, e. g. 3: 1, or angels, e. g. Michael, l. 7. See introduction to notes on No. 32.

אחני (evidently so written) I take to be for אחיני, "my cousin." The magical tradition was handed down in the sorcerer's family, cf. 8: 11.

משכנותא = משכנא, but of peculiar formation.

4. מושא: a point over א, also in the same name in 35: 6—diacritical for *ê?*

The charm is the effective one used by Moses at the Red Sea, cf. *Ex.* 14: 22. See p. 64 for the magical use of such episodes. But the plural קמו is a reminiscence of *Josh.* 3: 16, and indicates conflation of the two narratives. מן תרויהון ניסין appears to be a confusion for מן תרוי ניסיהון. תרוי is Palmyrene and Rabbinic, not Edessene, but is found in neo-Syriac, Nöldeke, *Mand. Gram.*, § 153.

5. אשכבה: of laying a spell; the same verb for laying a ghost, 16: 11. The Afel is a hebraism. Compare *Is.* 9: 7: "a word Yahwe has sent in Jacob, and it has fallen in Israel"; i. e. the magical word itself is potent.

אילנא וגי: the reference of the noun is obscure as is also the meaning of the following verb. There may be a reference to some myth concerning ancient "big" trees; cf. Isaia's denunciation of "everything high and lifted up," 2: 5 ff., and especially his woe upon the cedars of Lebanon and the אלוני הבשן, v. 13. Then v. 14 is parallel to the טורא ורמאתא of l. 5. The following relative clause is almost unintelligible. The root רדע is found only in Arabic, = "withhold, refuse." The next word I identify with the Biblical אמיר, *Is.* 17: 6 (possibly, with some critics, also in *Gen.* 49: 21). The old tree-myth may have told how the trees flaunted their high tops against the gods. The obscurity of the passage may be due to corruption of the form of the legend. The ׳ of אמריהון appears to be used as one of the *Seyâmê* points.

6. אסירין: n. b. position of the points.

בפוקדנא: a reference to the myth of the restraint of the celestial powers; see the discussion on 4: 5, and cf. *Is.* 24: 21.

7. מדוליה: a unique epithet for Raphael. It is a *pau'el* formation from דלא, and, agreeably to the etymology of Raphael and parallel to the epithet applied to Gabriel, the participle is used in the sense "to relieve," *sc.* the sick. Cf. *Baba Bathra* 16 b, אידלי יומא אידלי קצירא; "when the day is high, the sick man is relieved." In the Syriac the Pael came to be used in the sense of "saving," see Payne-Smith, col. 903.

גבריאיל עבדה דא': Gabriel is especially the messenger of Deity; cf. *Luke* 1, and *Rev.* 19: 10, where the angel who calls himself *σύνδουλος* with the apocalyptist may be Gabriel.

8. בירה: Mandaic form. Several phylacteries for cattle are given in Pradel's collection of Graeco-Italian charms; e. g. p. 18 and references, pp. 125, 127. An exorcism against the "seven accursed brothers" (the Babylonian Seven) who attack and devour the blood of the cattle, is given in Gollancz's Syriac charms, p. 87. According to the Babylonian magic the Seven Spirits "smite both oxen and sheep" (Thompson, *Sem. Magic,* i, 33). The mediaeval belief in the 'hexing' of cattle still flourishes among the Pennsylvania Germans.

ארין בר זנד: this sorcerer's name appears also in No. 19: 13, 17, and the two passages help mutually to identify the words.

9. עשמא: a new species of demons, "the oppressors," ppl. of a common Syriac root.

10. עיקרא (or פ' ?): "Knots," i. e. of magical power. The word corresponds to the Arabic *'uḳdat.*

טמיא: י has usurped the radical א; cf. Nöldeke, *Syr. Gram.,* § 33 b.

מתעזין: Etpa. of עזא, probably metaplastic for עזז.

אבערון: for the prosthetic vowel see Nöldeke, *Syr. Gram.,* § 51, *Mand. Gram.,* § 24 (n. b. the equivalence of לאב' and על ק', as in Mandaic). The word may mean ugliness or some more specific malady. Cf. the charms in the Greek magical papyri for obtaining good looks.

The parallel קמתא must also mean some kind of malady, and may be identified with the Assyrian *kamtu,* "misery" (Muss-Arnolt, *Dict.* 366), which is to be connected with the Hebrew and Aramaic root קמם, "compress" (with dissimilation of the dental); probably some form of contortion.

מיעלא נעילן: the first word is evidently an absolute infinitive from עלל, *plus* â (= *me"ĕlâ* = *me'lâ*, cf. the noun *ma'lâ*). For this formation with final â, Nöldeke offers a Mandaic instance, *Mand. Gram.*, 250, last line, מיקמא. In the form נעילן (if י is to be read) doubling of the second radical appears; cf. the Mandaic form תירינן, cited by Nöldeke, *ibid.*, 249, *ad infra*.

וכל דמקר ושיט ושרא: all three words are obscure. The second may be the שיט of the Ḳrê to *Is.* 28: 15, =שוט, "scourge." The third may be the Rabbinic שרא, "prince, demon"; or the Hebrew *šêrah* (also Aramaic) "chain, necklace," cf. the magical ענקתא. But diseases are apparently intended (cf. אבערן above), and we may identify שיט with the Syriac *Šâiṭâ*, "eye-tumor" (Payne-Smith, col. 4094), and שרא with the Syriac שריא (*ib.*, 4316), "diarrhoea." דמקר may then be understood aas a formation from נקר, "pierce," of *taf'al* form,—*tanḳar* =*tamḳar* (cf. Delitzsch, *Ass. Gram.*, § 59), = *damḳar*. With the root meaning of perforation, cancer or the like may be referred to. The absolute forms are used, as proper names.

11. אסור נורא ובשישלן מיא: fire and water are potent over demons. שישלן is a collective form in *-ân*. Cf. the *catenis igneis* in Wünsch, *Ant. Fluchtafeln*, no. 7.

עדמא למשרא וגי: the demons are to be bound till the end of the present aeon; then will begin a new order, which will include the final destruction of their power; cf. *2 Pet.* 3: 12: *οὐρανοὶ πυρούμενοι λυθήσονται*; also *Enoch*.

12. זינא: "loss"; see Jastrow, p. 393. Payne-Smith, col. 1118. For the personification of all kinds of losses, see p. 94.

בהרוי: hypocoristicon of Bahram? See Nöldeke, *Pers. Stud.*, 387 ff., Justi, 361 ff.

בת סהדא: "Daughter-of-the-Martyrs," a Christian name, cf. Bar-S., in Asseman, *Bibl. Or.*, ii, 403 (Payne-Smith, col. 2536), a bishop of Nineve. Cf. the proper names, "Son-of-Carpenters," "Son-of-Ironsmiths," *ib.* 591, 596.

13. משמתתא וגי: epithets of the Lilith, who is also the Witch, who can "bind" the limbs of her victim; see No. 42 and p. 78. Superior points for the feminine suffix are used here as also in No. 35.

14. תיחטר: switchings by demons are a common theme of magic, see 1: 10; compare the Christian hagiological legends.

Translation

Appointed is this bowl for the sealing and guarding (2) of the house and sons and property and body of Mâidûcht (3) bath Kumbôi, that she may be guarded from Demons, Plagues and Devils and Satans (4) and Seducers and Diaboli, and from any Vows and Invocations and Rites of mankind; in the name of (5) *arši, ardi* and *mâri;* Michael and Nûriel and Šalṭiel and Mantariel and Ḥithmiel. (6) And they were commissioned along with Moses to wardship, and they will guard this Mâidûcht b. (7) K. from all hostile Devils and affrighting Demons, and from every Curse and Vow of mankind, of men (8) and of women, and of Idol-spirits who (are known) and who are not (known) by name. And in the name of ..., Ḥamariel and Šariel (9) ..... of Yah-Adon-Ḳamya; *nâyâ, ô, ô!* Commanded, commanded is it in the name of these angels and letters which will guard (10) and seal this Mâidûcht b. K. from everything evil, for the ages

forever, Amen. Sealed and guarded is Mâidûcht b. K. from (11) the Tormentor and evil Dreams and the Curse and the Vow; and charmed the Tormentor and Lilith and Ban-spirit who thwarts her in her hand and foot; and may it not approach Mâidûcht (12) b. K.

And guarded be the house and wife and son and property of Dînôi son of Ispandarmêd from the Tormentor and evil Dreams and the Curse and the Vow. Amen.

Commentary

Largely a replica of No. 34. It is made out for the wife of the client of No. 33, who is himself given a little space at the end.

1. נטרתא(ל) : noun of intensive formation; cf. the charm *εἰς φρούρησιν*, Reitzenstein, *Poim.* 292.

2. מאידוכת: for the the first element Mâi see Justi, p. 187. The name also appears in the unpublished No. 16093.

3. כומבוי : cf. *Κωφαιος*, *Κυβαι*, *Κομβαφις*, Justi, p. 165.

4. סוטיטא: (a plural-point is not visible) a peculiar formation, evidently to be connected with the theme סוט, סטא, "go astray"—hence "seducing spirits," corresponding to the words before and after. The form may be explained as a Pi'lel participle, with rejection of prefix. Cf. 2 *Ki*, 22: 19 ff., and the *πνεύμασιν πλάνοις καὶ διδασκαλίαις δαιμονίων* of 1 *Tim.* 4: 1.

דיאבולא: some of the characters are uncertain, but the word is sufficiently clear. It appears in Syriac only (in the singular in -ōs) in the Arabic lexicons; see Payne-Smith, col. 868.

קרותא: evidently the same as the common קריתא. Notice the distinction made here between diabolic arts and human machinations.

5. For the assonance, see p. 61. Letters and angels are practically the same; see p. 99. Of these angels, Nuriel is one of the archangels (also Uriel), Manṭariel and Ḥithmiel are unique, Šalṭiel is listed by Schwab as a form of Salṭiel. These were Moses' guardian angels, and so can be effective for the present client.

Translation

... designated is this bowl ... turned away ... (2) of that Murderess, daughter of Murderess. Go away, go away, and depart from before ... The lord (3) Šameš (the Sun) has charged me against thee, Sin (the Moon) has sent me, Bel has commanded me, Nannai has said to me, and ..... and Nirig (Nergal) (4) has given me power to go against the evil spirit, against Dôdîb, whom they call the Strangler, who kills the young (5) in the womb of their mothers, and they are called "Slayer," and their fathers "Destroyer." Go from the presence of these holy angels (6) that sons may come to birth to their mothers and little children to their fathers. Because he has given me a name by which I shall drive thee forth, Evil Spirit. Go from the presence of (7) [these angels] and depart from this engraved seal, and go to the bridal chamber and eat...; moreover drink a libation and [depart from ... daughter of ...]-izdûch and her .... (8) Amen, Amen, Selah.

Commentary

This inscription has a twofold interest. Its magic purpose is the insurance of a bride against the goblin which would destroy her powers of motherhood; the evil spirit is invited to go to the bridal chamber and there

partake of a certain food and drink, which it is to be presumed, would in some way incapacitate his powers; the text is badly obscured, but enough survives to recall the book of Tobit and the charm Raphael performed against the demon which haunted the chamber of Tobias's bride. Magic is full of this lilith witch who destroys love; for an early instance, cf. the *Maḳlu*-series, iii, 1 ff.: "The witch ..... who robs the love of the enamored man, ... of the enamored maid. Looking at her he feels her lascivious charm. She looks on the man and takes away his love; she looks on the maid and takes away her love." Cf. Nos. 13, 28.

The other feature of interest is that the charm is given as though from the old pagan deities, the lord Šameš, Sin, Bel, Nannai, and Nirig, the ancient Nergal. All these except Nannai survived as evil spirits,—the spirits of the seven planets—in the Mandaic religion (see Norberg, *Onom., s. vv.*), but the present charm confesses their benevolent power and is also without any Mandaic trace. (This more antique aspect of these deities appears in the early Mandaic amulet published by Lidzbarski, in the de Vogüé volume, where, l. 247 ff., "Samiš, Bel, Nirig and Kewan have strengthened him.") It is a relic of the religion which survived to a comparatively late date in Harran. The charm is given in the form of an oracle from these deities according to ancient magical use; see p. 100. For these Syrian deities see the list given by Jacob of Sarug, edited by Martin, *ZDMG*, xxix, 110-131, and in general for the material Chwolson, *d. Ssabier u. d. Ssabismus* (1856). For the use made by the Harranian pagans of "magic, conjurations, knots, figures, amulets," etc., see Chwolson's extract from the Fihrist, *ibid.*, ii, 21; for their use of oracles, p. 19.

1. אתחפיך: ח for ה, see § 6.

2. For the demon's artificial names, see p. 77.

2 f. מריא שמיש: in the Mandaic אדוני is the epithet of the Sun, e. g. *Ginza* r., p. 23, l. 15, ed. Peterman; for שמיש, cf. Mandaic שאמיש.

סינא: נ is more likely than ר, and we obtain a form of Sin in the Syriac. The Mandaic has both סין and סירא.

בי: a dialectic form of ביל (Mandaic). For analogies in neo-Punic names (בי, בעי, בע), see Lidzbarski, *Handbuch*, 289; *CIS, Inscr. phoen.*, no. 869; and in Syriac the deity Bêducht (Bel's or Beltis's, daughter), see

discussion in G. Hoffmann, *Auszüge aus syrischen Akten persischer Märtyrer* (Leipzig, 1880), 151 ff.

נגאי : the ancient Babylonian goddess Nanna (see Jastrow, *Religion Babyloniens u. Assyriens* i, 76 ff., 252, 266), daughter of Sin. See at length for the later character of this deity G. Hoffmann, *Auszüge,* 130 ff., 151 ff. (for later literature, Roscher's *Lexicon, s. v.* "Nana"). She combined both Venus- and Diana-like characteristics, and thus appears on coins with a crescent on her head (*ibid.,* 152). This lunar characteristic doubtless explains the gender of the deity in our text, where as the verb shows, he is masculine. In his history the moon god has vacillated between the two genders, and while in later religion the moon's character has generally been defined as female, nevertheless in the Harranian religion the moon was androgynous; see the excursus by Chwolson in his *Ssabier,* i, 399 ff. (Hence the Latin writers express this Mesopotamian deity by *Lunus.*) It may be noticed that in the reference to Antiochos Epiphanes' raid upon the temple of Ναναιας in *2 Mac.* 1: 13, 15, there is found in the Alexandrine Codex the masculine variant Ναναιον.

4. דודיב: the name is obscure, probably equivalent to מדובינא, 37: 10, *q. v.*

חנוקיתא: the normal feminine of this formation, as against קטולתא. The same evil spirit, אמא חנוקתא, "Strangling Mother" (of babes) appears twice in Gollancz's Syriac charms, pp. 81, 83 (in *Actes* of the 11th Congr. of Orientalists, sect. 4). And the like epithet is found in the Greek amulet published by Reitzenstein, *Poimandres,* 298, for Baskania, the Lilith-witch, who is charged with the same murderous functions: *ὁρκίζω σε, Στραγγαλία πολύμορφε, ἡ ἐπερχομένη ἐπὶ τὰ μικρὰ παιδία, ἥτις ἔχεις χεῖρα σιδηρᾶν καὶ σύρεις τὰ παιδία καὶ ἐλέπτεις αὐτὰ καὶ τελευτῶσιν.* And there follow immediately "the names of the holy angels," just as these are referred to in l. 5. See notes on No. 42. With Στραγγαλία cf. the demoniac maladies πνιγαλίων and παιδοπνίκτρια cited by Roscher, *Ephialtes,* 55, 59.

דרטקא = דרדקא 37: 10, דרקא 18: 6, with assimilation of the dental to ק.

ומתקריא וני: Mandaic form of the fem. pl. The best interpretation of the line is that the mischief wrought to the embryo was charged to the parents who so gained the ill-fame of infanticides. Cf. Ginza ii, 98 (ed. Norberg):

"hence have arisen the abortive ones who make abortions and destroy the foetus." The epithets are in the singular, being used distributively.

5. הלין מלאכא: i. e. the deities mentioned above; see above pp. 97, 99.

6. נחין: "come to the birth." Cf. Rabbinic חייתא, "midwife," and the Syriac Afel used of the function of midwives, e. g. Peshitto to *Ex.* 1: 16.

דשמא יהב: the antecedent is uncertain; probably the charm has been abbreviated.

7. נמיפא: for נליפא? Cf. 11: 8.

אזיל לבית חלולא: the ב׳ ח׳ is the common Syriac term for the marriage chamber, or the nuptials in general. The imperative is apparently addressed like the preceding imperative to the demon who is bidden to go, if she dare, to the wedding, and there partake of the magic foods prepared against her.

נקותא: the Syriac *nᵉkâyâ,* "libation."

אישתאי: the spelling represents the Syriac fem. impr.

יזדוך וג׳ ....: probably a Persian feminine name in *-duch,* the bride's name to be filled out here. The following word is obscure, the missing radical may be ס.

Translation

Designated is this bowl for the [salvation and] healing (2) of the house and threshold, the wife, [the sons and] daughters, the cattle, (3) [and all that] is his, and whatsoever shall belong to Zârôi son of ... (4) ... confirmed by the virtue of the word of God, the Mystery of heaven and the Mystery of the assembled waters and the Mystery of earth, (5) ... of this house I will enjoin all that is in it,—Arts and the Tormentor (?) (6) ... [and the Image-spirits] of idolatry, and all the Legions and the Amulet-spirits and the Ishtars and all the Demons ... (7) ... and all mighty Liliths. A word ... I declare unto you, which receiving ... the mysteries of Angels in wrath coming against him and with sabres and sword standing before him and ready to kill him. (9) ... against the word heard (?). He sits in the house, eating and devouring, drinking and quaffing, ... (10) [a slayer of ?] children is he, and Master named; ..... is he, and Jinn (?) named. Peace ... your father ... (11) ... Peace from the male Gods and from the female Ishtars. And victorious peace is set in ..., and destruction is set in the fire ...

Commentary

A badly mutilated bowl with much of the inscription illegible. It is of pagan origin; in the name of God the Mystery of heaven, water and earth, it concludes with a *pax vobiscum* from the gods. The expression "victorious peace," l. 11, recalls the standing Mandaic doxology, "Life is victorious," and the threefold division of the universe may be from the same source. The charm is against a murderous house spirit and is in part parallel to No. 36; here the demon is masculine and is represented as carousing upon the blood of his victims. The quarterings of the circle or seal in the center contain letters of the Tetragrammaton—apparently יה.

1. דרמנא: a Persian word noted by the native Syriac lexicographers, and neo-Syriac; also in Pognon B. See Nöldeke, *Syr. Gram.*, 127.

3. זרוי : cf. Zaroes, name of a Magian, and Zaroi, in Firdausi; the present spelling substantiates *Zar-* against other readings; see Justi, p. 383.

4. אלהא: name of the Light-King in the later Mandaic religion; see Brandt, *Mand. Rel.*, 47. For his following epithet as the Mystery of heaven and earth, cf. "the Great Mystery," who is the helper of Hibil-Ziwa in his descent to hell, *Ginza r.*, p. 140, ed. Petermann; see Brandt, *Mand. Schr.*, 143. For the מיא קבין cf. *Gen.* 1: 10. Other "gods" are named below.

7. פיתנאמא ונ': resumes אימר, l. 5.

8. ראזי מלאכא: either in appositional sense, ראזא used like איסרא, see p. p. 86, or ר' refers to the magical rites conjuring the angels who are called upon against the evil spirit.

עילוהי : the Rabbinic-Mandaic preposition of plur. form, *'elâwê*, but with suffix attached as to a singular form; cf. בנח, "his sons."

9. שמעא : for שמיעא: the incantation *heard?* The following ppls. represent the carousing of the demon over the flesh and blood of his victims. These realistic descriptions were in themselves regarded as prophylactic. מכיל appears to be denominative verb from a noun in מ', formed to rhyme with אכיל.

10. מדובינא = דודיב, a perversion, in 36: 4. The word corresponds to the actual Syriac מדיבנא *tabescere faciens,* Payne-Smith, col. 831.

נ.נא: probably גינא, jinn, see p. 80.

אבוכן : Mandaic "your father."

Translation

Charmed, armed and equipped are the house, (2) the dwelling and mansion and barn, and the sons and daughters, (3) and the cattle and household vessels of Hinduithâ (4) bath Dôdâi and (of) Mârâdâ, even her husband and her sons and daughters.

Charmed art thou, (5) Lilith Yannâi, and all thy Broods, even the three hundred and sixty (6) Broods, by the word and command of the angel Negoznâi, by the mysteries and ordinance (7) of the living God, in the name

of the virtue of strong and mighty Deity, and by the seal (8) of the angel Be'ôdâi, whose word none transgresses.

Charmed are all the Gods and Temple-spirits and Shrine-spirits and Idol-spirits (9) and Ishtars from the body of Mârabbâ and Zâdôyê and Dazaunôyê sons of Hinduîthâ, and from Hinduîthâ and from her house and her bed and from (10) their [wives] and their sons and their daughters and their cattle.

Charmed and confined and restrained and hobbled is the mighty Ištar ..... (11) and the three hundred and sixty Broods, which I have dismissed from her one after the other.

Charmed are all the Amulet-spirits that dwell in the houses of men and waste them; (12) charmed and hobbled and suppressed and covered and squeezed under the foot of Mârabba bar Hinduîthâ and under the foot of Zâdôyê and Dazaunôyê sons of Hinduîthâ, (13) and under the foot of Hinduîthâ b. D. And life, abundance, health and arming and sealing and protection be to their body, and their wives and their sons and their daughters and their cattle (14) and the people of their houses, both those entering and departing with Mârabba and Zâdôyê and Dazaunôyê sons of Hinduîthâ, and with Hinduîthâ b. D. their mother, and her daughters.

Exterior

(15) Holy (?) .....

Commentary

For the language and script of this and the following Mandaic bowls, see § 7.

A charm executed in behalf of a certain woman and her husband. The sons with their families are included by name. The charm is particularly addressed against a specified lilith, with whom "the mighty Ištar" who is named later, may be identical.

1. "House, dwelling," etc.: these four terms occur in Lidzb. 4 and 5. The היכל (which is found in the Mandaic literature in the original meaning) is here reduced from the sense of "temple, palace," as in Babylonian, to that of a private mansion. The word also appears in Hyvernat, l. 15. In 40: 4, בניאנא is the cattle-barn; in general perhaps "outbuilding."

2. בנה for the plur. w. suffix, see Nöldeke, *Mand. Gram.*, § 144.

3. חיוניאתא: "cattle"; it occurs in the sense of "wild beast," in 39: 6; singular חיותא.

אנאתא: the singular would be the equivalent of the Assyrian *ânu*, "vessel," = Heb. אני and Arabic *inâ*^{un}. The word is otherwise unknown in Aramaic, having been replaced by the derivative *mân*. In the Talmud vessels are favorite abodes of the demons. One is tempted to regard the word as a plural of אנא, "sheep," but for the following "of the house."

חינדויתא: i. e. "Indian woman"; cf. חנדו, חינדו, 24: 1; 40: 16.

4. דודאי=דודי, Nos. 15, 21.— מראדא = *mâr*, "lord" + *Adda;* a form of Hadad; or the first element may be the deity Mar, Bir, etc. (see Clay, *Amurru*, 95), so that the name is equivalent to the ancient Damascene name ברהדד (as in Pognon's Zakar inscription), the Biblical Benhadad. With inexact construction, M. is the husband. For ו . . . ו = "both, and," cf. l. 14.

6. ננחנאי : so the probable reading. Notice from the erasure that "lilith" and "angel" are interchangeable titles for this being. Cf. the Lilith בחנאי, 40: 17.

פאקתון: of same root as פקדתא, with assimilation of ד with ת; see Nöldeke, p. 44. The original formation is that of the Syriac noun *pâḳadtâ*.

8. בעודאי: a corruption of עבודיאל?—For עכוריא and פריכיא see p. 72 f. The second word is supplied from 40: 4.

9. מארבא: l. 14 מאראבא, in l. 12 with the second א caretted; an old theophorous name = אב + מר (or רבא + מר ?)

זאדויא : Persian Zâdôê, see Justi, p. 378, quoting a name of the fifth century.

דואונויא : Persian name of a Syrian monk of the seventh century, *ibid.* 82.

10. סדימא: original root סתם (see Nöldeke, § 45); the verb is found in the bowls of Pognon and Lidzbarski, and defines the word as used in the Mandaic literature, thus relieving Nöldeke's doubt. Cf. a like series of passive ppls. at end of Lidzb. 4.

מסאנמא: the reading is almost certain, but I cannot identify the root; probably an error for מסאדמא, as in 40: 21.

רנילא: a denominative from רגל, = Rabbinic רגול. cf. the Arabic *ragala*, "strike, tie (a sheep) on the foot." The word occurs in Lidzb. 4.

11. שביקלה: the passage is identical with 40: 22, except for the latter's reading, שביקילה, "which I have dismissed from him"; the present text is to be so interpreted. For the form see Nöldeke, § 170.

מחרבאלחן = 40: 23. For the fem. pl. in א, see *ibid.*, 162.

12. סיפא = סחיפא, cf. *ibid.* 63; the Pael in 7: 17.

מאתנא: I can suggest only the root עתן, found in the Rabbinic עתין, "olive-press"; but according to Nöldeke, § 45, ע is persistent in Mandaic.

ודוזאונויא: error by dittography for ודזי.

13. זאזיא: the Assyrian *zâzu*, abundance", Muss-Arnolt, *Ass. Hwb.* i, 277, and identical with the Targumic זאזא, "foliage," Targum Job 14: 9. An archangel Zaziel appears in a papyrus published by Wessely, xlii, 65, l. 42.

חתמאתא: for חתאמתא.

14. דואדויא: with change of construction from the preposition על; cf. Nöldeke, § 222.—For omission of relative after בנה see p. 39.

15. (Exterior) קד is sure, perhaps קדש.

Translation

Health and arming and sealing and protection (2) be for ... and the body and soul (3) and the unborn child and womb of Bardesâ whose mother is the daughter of Dâdê. (4) Charmed are the Sorcery-spirits in stocks of iron; charmed the Lilith (5) in chains of lead; charmed the empoisoning male Devils and charmed the empoisoning female Liliths; (6) charmed [the arts of?] evil men and hostile Beasts, (7) and evil Mysteries and the (magic) Circle of malignant Masters and Sages and Doctors, and the melting of Wax figures (8) of him who is alive: from the unborn child and womb of Bardesâ whose mother is Termê b. D.

Charmed the Lilith that appears to her (9) in ...; charmed the Lilith that appears to her in [shape?] of Tâtâ her sister's daughter; charmed all the defiling Ghosts (10) that have entered, which appear to her in Dreams of night and in Visions of day; charmed and sealed with the seal of (11) King Solomon.

Again: Health and arming and sealing be for the womb and the parturition of Bardesâ (12) whose mother is Termê b. D.

Commentary

A charm for a pregnant woman. I may compare the mortuary incantation published by me in *JAOS,* 1911, 272, no. 1, which includes prayers for the unborn child, עולה, of the petitioner. From l. 4 the present charm is very similar to that in Pognon A.

2. דאדיא: so in Pognon B, in Lidzb. 5, דאדע; a feminine form in -ê, cf. תירמיא, l. 8 (the mother's name, overlooked here). Cf. דאדה, 12: 2.

4. סחריא: also Pognon A. In the Mandaic appear the סאחרא, "sorcerers," Norberg, *Onom.,* 110. For the meaning cf. Ass. *sâḫiru;* in this sense the root is not otherwise found in Rabbinic and Syriac.

סאדיא פ׳: Pognon's text, סאדדיא (to be cited to Nöldeke, § 89, 1a),

5. אבארא: the Syriac אברא was used for "lead" and "tin," according to the Syriac lexicographers, who postulate a distinction between *abârâ* and *abrâ,* or *abârâ* and *ebârâ* but dispute which word is applied to which metal (Payne-Smith, col. 19). Both lead and tin were used in magic, the former especially in the *κατάδεσμοι*, like the love-charm from Hadrumetum, the Cypriote *defixiones* (*SPBA,* xiii, 160, etc.), and cf. Index to Wessely, xlii, *μόλιβον, et seq.;* tin was equally used, like all the metals, *ibid., κασσιτερινόν,* and a case in the Testament of Solomon where tin is atropaic, *JQR,* ix, 584. Hence we cannot positively decide whether our *abâr* is lead or tin; but the weight of the former metal may better suit the symbolism of the language. —As to the meaning of the Assyrian *abar* Assyriologists are at variance. Lenormant, in *TSBA,* vi, 337 f., 346, argues correctly from the alloy mentioned in iv R no. 2, rev. 17, that *abar* = lead and *anaku* = tin. However Sayce, *Archaeology of the Cuneiform Inscriptions,* p. 60, denies that the Sumerian or Assyrian word for tin is known. Lyon, in his *Keilschrifttexte Sargons,* 53, 82, makes *anaku* = lead (cft. Heb. אנך) and leaves *abar* untranslated. Hilprecht and Haupt, on basis of chemical analysis, find that *abar* is used of magnesite, Hilprecht, *Assyriaca,* 80 ff., 83. עפרת, the Hebrew equivalent of the Aramaic אברא, is "lead." The Syriac *'ânᵉka* is "tin," whereas its Hebrew equivalent אנך, "plummet" rather suggests the heavier metal lead. The Hebrew for "tin" is בדיל, which however in Zech. 4: 10 may rather be "lead." This confusion between lead and tin in the same word is paralleled by the ambiguous use of *plumbum* in Latin;

p. nigrum is lead, and *p. candidum* tin; see Pliny *H. N.*, xxxiv, 47 (ed. Weise, 1841); so also in Arabic. The different vocalizations *'abrâ* and, עפרת *vs. 'abârâ*, and Heb. *'anâk vs.* Syr. *'ânᵉka*, appear to be attempts at differentiation. עפרת, apparently "lead," appears in W. T. Ellis's bowl-text, which I have edited in *JAOS*, 1912, 434.

5. חוראשיא: amendment after Pognon's parallel, but with the form found in l. 6.

לילא לי: an inadvertent repetition.

6. חוראשאתא for the adjectival formation, see Nöldeke, *Mand. Gram.*, § 105.

חיואניא: possibly absolute pl. (*-â* from *-ân*); or a masc. plural form, cf. חומריא, 38: 11.

7. חזאר: (n. b. construct) for חדאר, as in זיבריא, see Nöldeke, *ibid.*, § 46. I interpret the word of the magic circle, part of the dreaded arts of the necromancer; see p. 88.

רבאניא וני: sorcerers are by tradition "Doctors."

משריא דקיריא: מי may be inf. Peal of שרא, or better, in agreement with the context, Pael ppl. plur; i. e. "dissolution," or "dissolvers." קי is "wax" in Rabbinic, "pitch" in Syriac and Mandaic, at least according to the references in Payne-Smith and Norberg. "Pitch" might be the translation here, but comparing the plural with the Greek κηροί and the Latin *cerai*, I have related the word to the well-known use of wax in Hellenistic magic. Any plastic substance might be used for these simulacra of the enemy in Babylonian sorcery. Tallquist enumerates clay, pitch, honey, tallow, dough (*Maḳlu*, 19, and see his note to ZAL. LU, p. 119); so also Fossey, *Magie ass.*, 80. Wax does not seem to be identified among those substances, though Jastrow and Thompson speak of wax as used. Assyrian *kîru* or *ḳîru* (see Muss-Arnolt, p. 432) = pitch. Is the Latin-Greek word from the same origin, the term having undergone extensive modification in meaning? Its etymology is uncertain, see A. Walde, *Lateinisches etymologisches Wörterbuch*², 1910, *s. v. cera.* For the use of wax in western magic, see the ample notes and bibliography in Abt, *Die Apologie d. Apuleius*, 82.

חו דחיא: cf. the isolated instance given by Nöldeke, p. 344.

8. תירמיא: the first letter is conjectured from a mere remnant; possibly *Θερμία*?

9. In this line a definite family ghost appears. דמותא is used in like sense in earlier bowls, e. g. 7: 14. The word before תאתא is unintelligible.

תאתא: cf. the feminine name Tatâ in Strassmeier, *Inschriften von Darius,* no. 25, 12; also Tatta-dannu, Strassmeier, *Inschriften von Nabonidus,* no. 343, 8, and Tâtû, etc. in Johns, *Assyrian Deeds,* 450, Clay, *BE,* x, Glossary; טאטי 25: 1.

10. סאינאתא: I connect this, as a participle, with the root סין, Arabic *šâna,* which does not appear as a verb in Syriac; from it comes the Syriac *s^{e}yânâ,* "dirt," and with the same is to be connected the Hebrew סאון, "shoe." The same word, masc. and fem., occurs in Pognon A, p. 40, which he would derive from סנא "hate," but without explanation of the form. It might, if a singular instance, be an error for סאניאתא. However n. b. that in Sachau's Elephantine papyri occurs the metathesis סאן for סנא, Pap. 57: 2, 58: 16.

על: 3d fem. pl. of עלל.

יאמיא: a mistake, corrected by the next word. The same note is to be made upon למל in l. 11.

11. תום: doubtless = תוב, "again," so often found on our bowls. Thus Nöldeke's explanation of תום in the Mandaic literature (*Mand. Gram.,* 204) is confirmed.— מודאלה for the form, see *ibid.,* § 67.

Translation

In the name of Life!—that health (2) and armament be to the body and wife and male sons (3) and female daughters, and the house and

abode, the mansion (4) and the barn of the cattle, the ass, bull and goat, the property of (5) Xârô bar Mehanôš, from Life.

I swear and adjure you (6) by Life.

. . . . . .

(12) and I have broken you in the gate of Xaro b. M., the man and his wife. [Health and protection, etc., from] the Liliths, when they appear in the house of Xaro (13) b. M., from Life. And health and armament and healing and guarding [be to] the male sons and female daughters and the house (14) and dwelling and mansion and the barn of the ass, bull and goat, the live (?) property of [Xaro b. M.], from Life. And health and armament (15) be to the body and the male sons and female daughters and the house and dwelling and mansion of (16) Merâthê daughter of Hindû, from Life. And health be to the body of Xârô . . . and the wife and male sons [and female daughters and the house and dwelling] and mansion and building and cattle (17) of Xaro b. M., from Life.

Charmed art thou, Lilith Buznâi, and all the goddesses . . . and the three hundred and sixty Tribes, (18) by the word of the granddaughter of the angel Buznâi, by the adjuration (?) of Life, and by the command of . . . who is (?) with the mighty Buznâi, (19) by the seal of the angel Darwâ (?), whose word none transgresses. Charmed are a[ll the gods . . . and] temple-spirits and shrine-spirits (20) and goddesses from the body and the wife and sons and daughters and the house and dwelling and mansion and barn of Xaro b. (21) M. Charmed, shut up and confined and hobbled is the Ish[tar] . . ., and the three hundred and sixty Tribes, (22) which I have dismissed from him . . . one after [the other. Charmed] are all Amulet-spirits which lodge in their houses (23) and devastate them. Charmed [and hobbled] and suppressed and covered is the Satan (?) and the Plague . . . [from] the body (24) of the man and his wife . . . and the male sons and the female daughters, (25) the house and dwelling and mansion and the barn for cattle, of Xaro b. M., from Life. (26) And Life is victorious!

Commentary

A long and repetitious charm for a certain man and his family and property, including the several kinds of live-stock. About half of the inscription is found on the exterior.

1. With the same invocation begin the sections of the Ginza, also some of Pognon's bowls.

ואסותא: for ו of purpose, see the like phrase in Pognon, e. g. no. 14, and Nöldeke, *Mand. Gram.*, § 293.

4. בינאנא: as the regimen shows, the barn.

חמרא: i. e. *ḥemrâ*, also cited by Syriac lexicographers, see Payne-Smith, *ad loc.*, and used as a collective plural, Nöldeke, *Syr. Gram.*, 91. The following word was written תותא, ר was then caretted above, and finally the word rewritten.

ענזא : to be added to Nöldeke's instances, *Mand. Gram.*, § 68, and now found in Sachau's recently published papyri from Elephantine. ענז is found in names of certain goat-species, Payne-Smith, col. 2934.

חזרא: for חצי, cf. Nöldeke, *ibid.*, § 47. The word is used like the Talmudic חָצֵר, "private property," see Jastrow, *Dict.*, *s. v.* In l. 14 it is supplemented apparently by חייא, = "livestock."

5. כסארו: evidently an old Persian name in *Koseform;* cf. Aχseri, Xšayarša, Artaχsathra, Justi, pp. 12, 173, 34. The א in דאב׳, here and again below, represents the vowel of the prefix, before the vowelless first radical.

מהאנוש = Meh = Mithra, *plus* Anôš, a Persian genius, Justi, pp. 208, 17.

מן חייא: the long period which this phrase concludes is paralleled below.

אלאיכון: this ancient and full form of the preposition appears in Pognon B, but not in Nöldeke, under § 159.

6. אלא חייא: cf. l. 18, בראלאין אלא חייא. א׳ = the preposition just noted, and is used uniquely with a verb of swearing, where in the Semitic ב is found. Cf. the Greek *ἐπί*, representing, as in the English "swear on the Bible," the primitive action of laying the hand on the sacred object.

16. מראתי ?—17. בוכנאי: cf. נגוכנאי, 38: 6.

18. This antagonism of Buznâi's granddaughter to herself is evidently a case of casting out devils by Beelzebub. The sorcerer affects that he has received from one of her brood the proper charms by which to bind her. Observe interchange of מלאכא with לילית.

בדאלאין וכ׳ : "by that which is upon," i. e. "by the adjuration of" Life. For the redoubled preposition, see Nöldeke, § 231 b. For the phrase, see to l. 6.

פקדתאין: for the sing. with אין—, see *ibid.*, § 146.

23. סטאנא: but a feminine is demanded.

מחותא: in agreement with the Syriac; cf. מחתא, 16: 6; in the Ginza, מחיתא.

26. חייא ואביאן: the same doxological formula in Pognon, B, no. 22, and Lidzb. 5.

APPENDIX

No. 41 (CBS 179)

This text is unique,[1] being inscribed on the top of a human skull. Enough is legible to indicate that it is a magical inscription, doubtless of the same order as those on the bowls. The skull is remarkably well preserved, and though badly shattered, almost all the pieces have been recovered. But the text is sadly worn and obscured through the shaling of the surface, and only a few detached words are legible. There are two inscriptions. one running across the length of the left-hand side of the top, from front to back and also filling up some space in the forward part of the right-hand side. The other, shorter, inscription is at the back of the right-hand side, at right angles to the central suture.

In the first line of the longer text are visible the words, רוחין, ללתא; in the second אנת רוח, indicating an address to the evil spirit. The following names are visible: פרוך, cf. 5: 1; (?) מרדכי בן שאל, also spelt מו׳, "Mordecai ben Saul"; and a woman's name (evidently the wife of the first-named man— בעלה can be read in one place), נסבי, so the almost certain reading. I take the name to be a feminine hypocoristic in *-âi* to be connected with Gathaspar, in the *Excerpta barbara* to Eusebius (ed. Schoene, i, app. 228), one of the three Wise Men, the later Gaspar (Caspar, Jaspar), connected by philologists with the Old-Persian Windafarna; Justi, p. 368.

The use of a skull for recording a magical inscription opens up an interesting line of magical practice. The skull has become part of the stock apparatus of the necromancer, and its use in that connection is typical of his power over the dead, while the presence of the gruesome object adds to the awe in which he is held. But all through magic runs the morbid theme of the use of mortuary remains. In the Greek love charms, the texts are buried in the graveyard; in the magic brews for compelling love,

[1] This statement must now be qualified, as I learn through Professor Ranke that two similar skulls are in the Berlin Museum.

human bones are used, and in a late Arabic charm a broom from a cemetery has efficacy in bringing the beloved to the lover's side (see to No. 28). Cf. the burial of Pognon's bowls in a cemetery. Primitive animistic beliefs have survived, which connect the skeleton with the world of spirits; it is a material *point d'appui*, and the skull is especially preferred as the most striking and perhaps most durable part of the anatomy. It may be noticed that in Arabic the word for skull is also used of the soul (Wellh. *Skizzen*, 3, p. 161, 164).[2] There is a reference in the Talmud to the necromantic use of a skull; *Sanh.* 65b: "there are two kinds of necromancy (בעל אוב), the one where the dead is raised by naming him, the other where he is asked by means of a skull (הנשאל בגלגלת)." Joel (*Aberglaube*, i, 44) thinks this refers to some artificial skull-shaped object; but our actual skull illustrates the practice noticed in the Talmud. The use of skulls (*calvaria*) in classical magic is also vouched for in the Apology of Apuleius; see Abt, p. 141. For this practice of "speaking skulls," we may note its special vogue among the Sabians; see Chwolson, *Die Ssabier*, ii, 150, and Dozy and de Goeje, *Actes* of the Leyden (6th) Congress of Orientalists, ii, 365 f., cf. 293.

But the skull was also efficacious as a prophylactic object. James of Edessa notes that a dried human head was used by the heathen Syrians as an amulet (quoted by Robertson Smith, *Religion of the Semites*, 362, referring to Kayser's edition of the *Canones*, p. 142). Especially as part of the skeleton was it efficacious against the evil eye; see Seligmann, *Der böse Blick*, ii, 141, who notes the use in Italy of a tiny skull-charm against the *Jettatura*, and also the use among the ancient Taurians and the tribes of Caucasus of the heads of enemies stuck on poles as a prophylactic; also Elworthy, *The Evil Eye*, 340, notes the use of skeleton-like figures as talismans in Italy; he finds the same talisman in classic times, comparing King, *Gnostics and their Remains*, 213 (ed. 2, 180). The skull therefore falls into the general category of frightful or obscene objects, which had the power of repelling the evil eye in particular and evil spirits in general.

[2] Dr. Speck, of the Museum, informs me that the North American Indians carefully preserve the skulls of the animals they hunt, as a means of the reincarnation of the beasts, and I understand like customs are found over the world.

No. 42

Towards the close of my work on this volume, Professor Richard Gottheil, who had several years ago thought of publishing the bowls, kindly forwarded me some notes and transcriptions which he had made in his preliminary essays. Among the papers was the copy of a text which is not now found in the Museum. It differed so radically from the other inscriptions that I inquired of Prof. Gottheil if it was taken from a bowl. He replied that he knew of no other source whence the text could have come into his set of papers. Accordingly on the hypothesis that the original text was once in the Museum, I venture to publish Prof. Gottheil's copy, and do so the more readily because of its interesting character and the illustration it affords to several points in the texts above. It contains a form of the Lilith legend, widespread in folklore, and a bowl would have been a perfectly proper place for a text of this prophylactic character. I have not however included the text in my Glossaries.

שדי

סנוי סנסנוי סמנגלף אדם יהוה קרמונה חיין לילית

בשם ייי אלהי ישראל יושב הכרובים ששמו חי וקים לעד · אליהו הנביא היה הולך בדרך ופגע בלילית הרשעה ובכל כת דילה אמר לה אן את הולכת טמאה ורוח הטומאה וכל כת דילך טמאים הולכים · ותען ותאמר לו אדוני אליהו אנכי הולכת לבית היולדה מירקאדה ד'מ ויאידה כת דונה לתת לה שינת המות ולקחת את ילדה הנולד לה למצוץ דמו ולמצוץ מוח עצמותיו ולחתם את בשרו ויאמר לה אליהו הנביא ז"ל [זכרו לברכה] בחרם מאת השם יתברך עצורה תהיה וכאבן דומה תהיה · ותען ותאמר לו למען ייי תתירכי מן החרם ואנכי אברח ואשבע לך בשם ייי אלהי ישראל לעזוב הדברים אלו מה יולתת (*sic*) חזאות ומולדה הנולד לה ומכל שכן להזיק וכל זמן שמזכירים או אני רואה את שמותי בתובים לא יהיה לי וכל כת דילי כח להרע ולהזיק ואלו הן שמותי : לילית : אביטר . אביקר : אמורפו הקש אודם : איכפידו : איילו : טטרוטה : אבנוקטה : שטריהה : קלי : תלתוי : ריטשה : והשיב לה אליהו

Accompanying the text are given some inscribed designs and phrases. A rough figure of a hand (prophylactic against the evil eye) contains the Aramaic legend:

אנא מזרעי דיוסף קא (? הא =) אתינא ולא שלטא ביה שנא בישא :

"I am the seed-producer (?) of Joseph; when I come, an evil year cannot prevail over him,"—a play of thought between Joseph as controller of the fertility of Egypt and the fertility of the family, and as a good omen for the expectant mother.

A "David's Shield" contains in the center יאה דונהי, a fanciful form of Adonai, on the left hand שטן, "Satan," in another division אבג and nearby יתין (?), i. e. אבניתין, to be found in Schwab, *Vocab.* Another species of the shield more roughly designed contains יהוה in the center, flanked with יה, etc. and אדני, with מטטרון and סנדלפון on either side. The changes are rung on the possible mutations of ילק, and the scripture Dt. 28: 10 is cited. Similar charms against the Lilith are to be found at the end of *Sefer Raziel* and in Buxtorf's *Lexicon, s. v.*

Translation

Shaddai

Sanui Sansanui Semniglaph Adam YHWH Kadmon Life Lilith

In the name of Y" the God of Israel who besits the cherubs, whose name is living and enduring forever. Elija the prophet was walking in the road and he met the wicked Lilith and all her band. He said to her, Where art thou going, Foul one and Spirit of foulness, with all thy foul band walking along? And she answered and said to him: My lord Elija, I

am going to the house of the woman in childbirth who is in pangs (?), of So-and-so daughter of Such-a-one, to give her the sleep of death and to take the child she is bearing, to suck his blood and to suck the marrow of his bones and to devour his flesh. And said Elija the prophet——blessed his name!—With a ban from the Name—bless it!—shalt thou be restrained and like a stone shalt thou be! And she answered and said to him: For the sake of Y" postpone the ban and I will flee, and will swear to thee in the name of Y" God of Israel that I will let go this business in the case of this woman in childbirth and the child to be born to her and every inmate so as do no injury. And every time that they repeat or I see my names written, it will not be in the power of me or of all my band to do evil or harm. And these are my names: Lilith, Abitar (Abito?), Abikar (Abiko?), Amorpho, Hakaš, Odam, Kephido, Ailo, Matrota, Abnukta, Šatriha, Kali, Batzeh, Taltui, Kitša. And Elija answered and said to her: Lo, I adjure thee and all thy band, in the name of Y" God of Israel, by gematria 613, Abraham, Isaac and Jacob, and in the name of his holy Shekina, and in the name of the ten holy Seraphs, the Wheels and the holy Beasts and the Ten Books of the Law, and by the might of the God of Hosts, blessed is he!—that thou come not, thou nor thy band to injure this woman or the child she is bearing, nor to drink his blood nor to suck the marrow of his bones nor to devour his flesh, nor to touch them neither in their 256 limbs nor in their 365 ligaments and veins, even as she is (= thou art?) not able to count the number of the stars of heaven nor to dry up the water of the sea. In the name of: 'Hasdiel Šamriel has rent Satan.'

Commentary

Only a few detailed notes are necessary. Of the terms at the beginning, סנוי סנסנוי and סמנגלף are common in childbirth charms (see Schwab. *Vocab.*, *s.* יד.). The second is erroneously explained by Schwab; it is שם נ', the inscribed Name, cf. the שם ... גליף in 11: 9. סנוי and its reduplication סנסנוי probably mean "divorced."

N. B. the order of Adam, Yhwh, Kadmon.

מירקאדא ד'מ(ירקאדא) is obscure to me. The root is probably used in the Syriac sense of mourning, hence supplicating; or cf. Heb. חיל, "writhe," as well as "dance."

יאידא כת דונה I would read as אידה בת דינה, the first as the indefinite pronoun fem. *quaequae*, the last as representing the Greek δεῖνα, which is commonly used in the papyri, the actual name being inserted upon use.

חתם = חטף, cf. Arabic קטם.

Of the names of the Lilith the second = Abatur the Mandaic genius (see Glossary A); but the possible reading of the copy, Abito, may be preferable, in view of the Greek parallels; see below; the third is the Greek ἀμορφος.

613: the figure is the gematriac sum of 'the Lord God of Israel,' as also the number of positive and negative commandments of the Law. As Mr. A. Simon, Harrison Fellow of the University, has suggested to me, the preceding abbreviation stands for גימטריא.

The "256 limbs" are 248 in Jewish lore. For the 365 ligaments, cf. the identical expression in a charm given by Reitzenstein, *Poimandres*, 295.

The 10 Books of the Law are the double of the Pentateuch; cf. the Eighth Book of Moses in the Leyden MS. which Dieterich has published at the end of his *Abraxas*.

The very ancient use of epical narrative as an efficient magical charm was described above p. 62; thus the mere narrative of a demon's power, as in the case of Dibbarra, is potent, or, *à fortiori*, the relation of a triumph over the evil spirit from some sacred legend. In the present case we have the added virtue of the revelation of the demon's names, and she swears that whenever they confront her, she will retire; the knowledge of her names binds her (cf. p. 56).

Dr. M. Gaster has published in *Folk-lore* xi (whole number xlvi), 129, an interesting paper entitled "Two Thousand Years of a Charm Against the Child-Stealing Witch." The latter uncanny spirit has already met us in several of our preceding texts (Nos. 11, 18, 36, etc.). Dr. Gaster surveys a wide material of European and Semitic forms of this magical narrative, all of which have evidently the same root. He draws on Slavonic, Roumanian and modern Greek legends, and cites one of Gollancz's Syrian charms, a collection to which I have had frequent occasion to refer,[1] and also quotes

[1] In *Actes* of the 8th International Congress of Orientalists, Sect. 4, p. 77. Most of these charms are in the narrative style. Cf. also a similar Syriac charm given by Hazard, *JAOS*, xv, 286 f.

in translation a Jewish charm of the same order from the *Mystery of the Lord* (in the Hebrew סוד יי, a book I have not been able to obtain).

This Jewish legend is almost identical with ours. It is considerably shorter, concluding with the names of the Lilith and a direction to hang up the names in the room of the woman concerned. The names are almost identical with those in our text; they are: Satrina, Lilith, Abito, Amizo, Izorpo, Koko, Odam, Ita, Podo, Eilo, Patrota, Abiko, Kea, Kali, Batna, Talto, Partasah. My form Amorpho is probably older; Koko =κακός may be preferable to my Kaš.

In both these Jewish forms Elija and the Lilith are the actors. In the Syriac legend quoted by Gaster from Gollancz, it is a saint Mar Ebedishu and the Evil Spirit in the likeness of an ugly woman who are the characters; the latter has for one of her names that of "the Strangling-mother of children" (cf. above to 36: 4). In the European Christian legends, the benevolent actor is the Virgin, Michael, or a certain saint bearing the name Sisoe, or Sisynios. These names are derived from the Jewish סנוי סנסנוי, as Gaster suggests. In the Greek legend the spirit is Gylo, the earlier Γελλω, which appears also in the magical papyri.[2] In all children are the object of the fiend's ravages, in one case the charm is for a boy afflicted with cataract.

There are some other simpler forms of this legend contained in Greek manuscript amulets which were not accessible to Dr. Gaster. In his *Poimandres*, p. 298, Reitzenstein publishes a text which is the earlier prototype of the Roumanian folk-legend published by Gaster, p. 132. It reads: "When the archangel Michael came down from heaven, there met him the impure spirit with her hair down her back and her eyes inflamed. And the archangel Michael said to her: Whence comest and whither goest thou? The impure one answered and said to him: I go to enter the house as a serpent, dragon, reptile, I change into a quadruped, I go to make the plagues of women, to humble their heart, to dry up the milk, to raise the hair of the master of the house .... and then I kill them. For my name is called Paxarea. For when the Holy Mary bore the Word of Truth

[2] Wessely, Vienna *Denkschriften*, xlii, 66, also Γυλον, Reitzenstein, *Poimandres*, 298. For Gello = the Assyrian Gallu, see Frank, *ZA*, xxiv, 161.

I went to deceive her and ..?..[3] And the archangel Michael seized her by the locks on the right hand and said to her: Tell me thy twelve names.[4] And she said: I am called first Gelou, second Morphous, (third, etc.) Karanichos, Amixous, Amidazou, Marmalat, Karane, Selenous, Abiza, Ariane, Maran. Wherever are found my twelve names and thy name, archangel Michael, and thy name Sisinios and Sinodoros, I will not enter into the house of such a one." Compare also the amulet given on the preceding page in Reitzenstein (p. 297), lacking the reference to the Virgin, the demon enumerating her plagues.

A similar legend, in large part identical with both these just named, is given in the Greek-Italian charms published by Pradel.[5] In this Michael descending from Sinai meets the hag Abuzou[6] and the demons cast out of heaven. He inquires where she is going; she answers she crawls into houses like a serpent, dragon, etc., to bring all evils on men, to dry up the mother's milk, to wake the children and kill them. Then, evidently a Christian accretion, she causes faction in the church, sends floods, destroys ships. Michael asks her her name, which is Pataxaro. He asks for her many names. She swears by the throne of God and the eye (= eyes) of the Beasts (cf. the oath in our text) that she will tell the truth. She then gives forty names, the first two of which are Gilou, Morphou.

The legend sometimes ran out into the line of particular diseases, e. g. cataract, as in one of the Roumanian forms; or Beelzebub and other demons are named, as in an amulet in Vassiliev, *Anecdota byzantina*, i, 336. But the story of the wife-hating, child-murdering hag is the original element, as Gaster points out.

We thus possess forms of the legend in Hebrew and Syriac, in Greek texts of eastern and western Europe, and in modern Roumanian and Slavonic folklore, while the heroes of the epic include Elijah, Michael, Christ and various saints known or obscure. The persistency of the form appears also in the charm names. To compare the lists in the two Hebrew texts and in the two of Wendland and Pradel respectively and in Gollancz

[3] Cf. the early Christian myth of the devil's wiles, *Rev.* 12.

[4] The same number is found in the Hekate-Isis legend.

[5] *Griechische u. süd.- italienische Gebete*, 23.

[6] The Avezuba and Avestitza in Gaster's Roumanian legends.

(Syriac), we find that the initial Hebrew Lilith = Greek Gelou or Gilou = Syriac Geos, doubtless = Gelos. The second in the Hebrew, Abito (Abitar?) = Apiton the ninth in the Syriac; the third, Abiko (Abikar?) = Abiza or Abuzou in the Greek texts, and as we observed above Avezuba in the Roumanian. The fourth Amorpho (in our text) = Morphous or Morphou having third place in the Greek texts, and Martlos, 4th in the Syriac. Amorpho is doubtless the Greek ἀμορφος, "shapeless," and our Jewish text alone has preserved the correct form. Eilo and its obscure predecessor in the Hebrew may be found in Pradel's Morpheilaton, and the latter's Phlegumon may translate the Hebrew קלי.

It is impossible to place our phylactery genealogically in such a mass of interrelated material. The Jewish text doubtless depends upon Greek tradition with its magical name Amorpho and its transliteration of δεῖνα, while the later Greek forms have borrowed from the Hebrew in St. Sisynios. But the source of the legend is the common property of mankind, with roots as ancient as the Babylonian Labartu and Gallu. A child-killing demon which sucks babes' blood, etc., is found in Africa; see Budge, *Osiris and the Egyptian Resurrection,* i, 285, a reference pointed out to me by Professor Jastrow. In the Hellenistic magic a classical form of such legend was established out of all the elements that were brought together in that age, and this spread again assuming its variant forms among the peoples and faiths. If our text actually came from Nippur, it is of interest as the earliest form of the Jewish legend and as one which can be dated with approximate accuracy.

Corrections and Additions

P. 20, line 4: read "Berlin" for "British."

P. 20: add to the list of published Mandaic bowls the two photographic plates of bowls (plates 1, 2) in J. de Morgan, *Études linguistiques,* vol. v, part 2, of his *Mission scientifique en Perse.*

P. 105, line 20: the Koran gives to the Mandaeans the same privileges as the Jews and the Christians (see 2: 59; 5: 73; 22: 17).

GLOSSARIES

GLOSSARY A

PERSONAL NAMES AND EPITHETS OF DEITIES, ANGELS, DEMONS, ETC.

GLOSSARY B

PROPER NAMES OF MEN AND WOMEN

GLOSSARY C

GENERAL GLOSSARY

Prefatory Note

Glossary C is arranged according to roots, the other two consonantally. The former indexes only the common nouns.

The citations of other authorities can be understood from § 2. The two publications of Pognon's are cited as "A" and "B", and Pognon's full glossaries will serve to locate all words of his texts. Where lines of texts are given, the reference is to the spiral line if facsimile is given, otherwise to the lines of the printed text. I have not thought it necessary to give the line citation for proper names even in my own texts, as they can be easily identified.

Under Glossary B, the following abbreviations are used: d. = daughter of, f. = father, h. = husband, m. = mother, s. = son, w. = wife.

Where a word appears in my text the first citation may be referred to for any treatment by the editor; references are also added to further discussions in the Introduction. Notes are occasionally added to words found in texts of other editors.

In Glossaries A and B all the occurrences are given with the exception of a few common divine names like יהוה; in Glossary C only typical citations and peculiar forms; also it has been the aim to give citations from the three dialects.

GLOSSARY A

PERSONAL NAMES AND EPITHETS OF DEITIES, ANGELS, DEMONS, ETC.

אבונבאנא evil deity: Pogn B.

אבונדאנא evil deity: Lidz 4, 5 (for these two names, see to 11: 5).

אבדא Destroyer 3.

אבהו divine name?: 7; Myhr.

אבטור Abatur, Mandaic genius: Ellis 1 (א' טורא); Wohls 2417 (אבוטור); see p. 96.

איבול deity (Apollo? Aeon?): 19.

איבולית feminine to above: *ib.*

אביר epithet of God: 8.

אברכס, אברכסים, אברכים Abrasax: 7 (= Myhr), 19, 34 (see pp. 57, 99).

אגדול mystic name: Schw F.

אגזריאל deity or angel: 19.

אגרבים "the holy Agrabis": 14.

אדאניאל angel: Schw I.

אדוני Adonai: 34; Pogn B.

אזדאי angel: Pogn B; Lidz 1.

אזזיאל angel: 19.

אזפא deity?: 19.

אחוד בת איתרא ghost: Wohls 2417.

אלא God: 18.

אלאל divine name: 13.

אלבעבן, אלבנמין mystical name?: Wohls 2422.

אלדדביה וגי mystical name: 5.

אלהא, אי God: 7, 16, etc.

אלהים Elohim: Ellis 1; Hyv.

אליאל angel: 10.

אילסור Ellis 1 (but see to 11: 4).

אל פנים El Panim: 8.

אלפסס name of Gabriel: Wohls 2422.

אל שדי El Shaddai: 8, 34, etc.

אמא demon (bath Imma): Wohls 2426.

אימי name of demon: Wohls 2416 = Stübe (see p. 77).

אמאתעמא a genius: Lidz 5 ("anathema"?).

אננרוס deity: 19.

אנד deity: 19.

אנפרת demon: Schw F (see p. 25).

אסתאנא Satan: Montg.

אספנדסדיוא Cpenta-dewa, name of Solomon's Jinn (see Grünbaum, *Zts. f. Keils.-forsch.*, ii, 224, Nöldeke, *ib.* 297).

אוסרא epithet of angel ("charmer"): Schw, *PSBA*, xii, 298.

אפטוקא Wohls 2422 (=אבטור?).

אצלצל angel: Wohls 2416.

אוקינוס Okeanos (?): 19.

אקף נקף נוקף series of mystical names: Schw F.

ארדיסבא deity: 19.
ארזן deity: 19.
אריאל angel: 19; Schw I.
אוריאל angel: Stübe (Wohls l. חתיאל).
ארין deity?: 19; 34.
ארמים, ארמסא, הרמים Hermes, see to 2: 2.
אירם a deity (Eros, Ares?): 19.
אשתקותקוף infernal genius: Pogn B (cf. Glossary C, שקף; but cf. *Aristikifa,* in Dillmann's text to Enoch 6: 7).
אית ghost: Schw 2417.

בי = Bel: 36.
ביאחיאל (?) angel: Schw G.
בנדאנא, בנדנא deity: 11, 18, 19, Montg.
בוזאי lilith: 40.
בחלבם lilith: 18 (cf. חלבם).
בעודאי angel: 38.
ברחאל angel: Schw N.
ברכעיל angel: Pogn B.
ברקיאל angel: Wohls 2416.

גבריאל, גבריל, גברעיל Gabriel: 7; 34; etc. (see p. 96 f.).
גדריאל angel: 14.

דביא epithet of Hermes: 2.
דבאק angel: Pogn B (cf. טבאק).
דודיב demon: 36.
דליבת Dlibat = Dilbat, goddess of love: 28.
דומה mother of demon: Schw G.
דימיאל angel: Wohls 2416.

דנחיש demon: 19.
דנייל angel: Schw N.
דינימוסיתתא ghost: Schw 2417.
דרוא deity or angel: 40.
דרטוסיאל angel: Schw I.
דרקיאל angel: Schw I.
דושעיל angel: Pogn B.

הדריאל angel: Stübe (Wohls נידריאל).
הפביאל angel: Wohls 2416.
הרמים s. ארמסא.

זגד father of ארין: 19, 34.
זעוא Zeus: 19.
זיקיאל angel: Wohls 2416.
זרני, זארנאי granddam of a lilith: 11 and parallels.

חבובית epithet of אדונאי: Pogn B.
חביאל angel: 13.
חטטריאל angel: Schw *PSBA,* xii, 298.
חיא, חייא Life, Mand. supreme deity: 40; Pogn A, B; Lidz 5.
חיות the Living Creatures: 8.
חיל ביש Evil Potency: 30.
חלבם, חבלסם, חלראם lilith: 11 and parallels.
חאמיאל angel: Schwab, *l. c.*
חומיחיאל angel: Stübe = Wohls חנתיחיאל.
חמוציה demon: Schw G.
חמריאל angel: 35.
חניניאל angel: 13; Stübe.
חסדיאל angel: Schw N.
חושו ghost: Schw 2417.

חתיאל angel: Wohls 2416 (for Stübe's, אוריאל).

חתמיאל angel: 35.

טבק, טאבאק (cf. דבאק) angel: Pogn B.

טלסבוני deity: 19.

טורא see אבטור.

ידיד, יודיד ghosts: Wohls 2417.

יהוה YAHWE *passim*.

יאז, יזדן angel: Pogn B; Lidz 1.

יאזדרן angel: Pogn B.

יאזרויא angel: *ib*.

יחיאל angel, or divine name: 25.

יאנאי lilith: 38.

יופיאל angel, or divine name: 25.

יקרן angel: Lidz 1; Pogn B.

יורבא Mandaic divine name: Pogn B.

יתבא angel, with "eleven names" following: Schw G.

כבשעיל angel: Pogn B.

כיטא the "heat" demon: 30: 2.

כסדיאל angel: Hyv (in כי עיסרא דכישראי; cf. Kasdeya angel of evil arts, *Enoch* 69: 12).

ליויתן Leviathan: 2.

מדובינא demon: 37.

מהפכיאל angel: Wohls 2416.

מחזעיל angel: Pogn B.

מחבלא the Destroyer: 9.

ממנחיל angel: Schw G.

מיטטרון Metatron: 25; Wohls 2416.

מיכאל, מיכאיל Michael: 34, etc. (see p. 96 f.).

מלויאשין Signs of Zodiac: 4.

מללא, מלילא, ממללא the Word: 27, 19, 2 (see to 2: 2).

ממינוש deity?: 11.

מן, מאנא Mandaic genius: 19; Wohls 2422.

מנדינסן deity: 19.

מנטריאל angel: 35.

מנירנש deity: 19.

מיצואה name of God: 29.

מר demon: Wohls 2416 (see p. 81).

Prefatory Note

The concave spherical surface on which the bowl texts are inscribed precluded their reproduction by photography. At the best only a half of the text can be obtained satisfactorily by the camera, as the pair of photographs at the end of the Plates will show. Accordingly the texts had to be copied by hand.

Soon after the bowls came to the Museum, Professor Jastrow, of the University, and Professor Gottheil, of Columbia, undertook their publication. They secured the services of Mr. Horace Frank, Architect, for autographing the plates, a considerable sum of money being raised to meet this expense. Subsequently Drs. Jastrow and Gottheil gave up their plan of publication, and when Professor Hilprecht, then Curator, put the bowls into my hands, I fell heir to Mr. Frank's labors. I found he had prepared about 75 plates, but of these I have been able to use only 23, covering my Numbers 2, 3, 4, 6, 8, 9, 16, 17, 24, 28, 31, 36, 37, 38, 40. His other plates were copies of broken and mutilated bowls which were not worth publishing (see Introduction, § 1). It appears also that not all the good texts were placed in his hands, or else that he did not complete them all.

There is only one drawback in Mr. Frank's excellent reproductions, one which however does not impair their accuracy. Working without much direction and knowing nothing of the language, he often broke a word at the end of the line and carried it over to the next. I have seen no reason to repair this technical error in his copies, but have guarded against it in the work of the later copyists.

There thus remained of the texts which came to be included in this publication twenty-five which still required autographing. Shrinking from this tedious mechanical labor, especially after an expert hand had preceded me, I was very glad to avail myself of the kind cooperation of Professor

Gordon, Director of the Museum, who offered me the expert services of his staff. Consequently, under my direction, the remaining copies were prepared by Mr. William C. Orchard (Nos. 1, 5, 7, 10-15, 19, 21-23, 25, 27, 29, 32, 34, 35), and by Miss M. Louise Baker (Nos. 20, 26, 30, 33, 39).

The style of Mr. Frank's copies conditioned those for which I am responsible. He had abandoned the spiral arrangement of the originals and made his reproductions in straight lines. This method may be faulted as not giving the exact form of the original, but this demerit is small as compared with the advantage to the scholar of having the whole text lying before him at one glance without his being under the necessity of turning a bulky volume around and around to follow the spiral career of the text. I was therefore quite satisfied to retain this method of reproduction.

It may be remarked that all my decipherment was made entirely from the originals; only after my own work was finished did I compare Mr. Frank's copies. In a few cases I was able to improve his facsimiles, in several cases his copies, which were made when the texts were fresher and more legible (they have manifestly faded under exposure to light), have helped me correct or enlarge my readings. The other copyists also worked independently, and then we compared our respective results. The cooperation of others, expert copyists, with the author has thus tended to a full control of the accuracy of the facsimiles and transliterations.

I have finally to speak in the highest terms of the artistic and painstaking labors of these two gentleman and Miss Baker, whose assistance has afforded me so great relief.

CATALOGUE

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
1	1	8693	6.5 + 17	Broken and mended, with two holes. Written inside and out in large coarse script, .5 cm. average height, rude spiral design in center.
2	2	2945	7.2 + 17.4	Broken and mended. Fair, large characters. .4 cm. in height. In center two large figures, one in reverse position to other; one of which appears to be making a sign with his hand (as against the evil eye?), probably the sorcerer, the other with feet hobbled, the demon.
3	3-4	2963	10.3 + 20.5	Broken and mended, with a segment 6 + 12 cm. missing. Flat boss. The rim of the bowl has a double edge. Fair characters, .3 cm. high. In the center figure of a demon, armed with helmet and a sabre and spear in either hand, and his feet manacled.
4	4-5	2923	7.5 + 17.3	Broken and mended, small segment missing. Characters .4 cm. high. In the center figure of the sorcerer waving a magic bough.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
5	6	2952	7 + 18	Slightly broken and mended, with small fragment missing. Characters .4 cm. high. In center rude figure of a demon with four arms and one leg.
6	7	2916	6 + 15.8	Perfect bowl but for a fracture which does not touch the text. Small circle in center. Characters .3 cm. high, rather crabbed.
7	8	16007	5.6 + 15.7	Broken and mended, with a square fragment of text missing. Fine, clear characters, .2 cm. high. In center circle with cross.
8	8-9	9013	8.5 + 16.6	Broken and mended, with two small fragments missing. Characters .2 cm. high. In center obscene picture of a lilith with hands and feet bound.
9	10	9010	6 + 17.7	Perfect bowl. Characters much obliterated, .4 cm. high. Circle in center. On exterior four short lines in Hebrew.
10	11	16014	6.9 + 14.2	Broken and mended with segment missing. Characters .4 cm. high. In center monstrous figure with owl-like head and apparently several breasts, presumably a lilith.
11	12	16022	6.3 + 16.1	Broken and mended, with three fragments of the text missing. Characters carelessly written, .3 or .4 cm. high. In center rude design, probably of a lilith.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
12	13	9009	7.2 + 17.7	Perfect bowl. Characters .4 cm. high, coarse but distinctly formed. In center a demon, with beastlike face and arms and feet bound. Endorsement on exterior.
13	14	8694	7 + 16.2	Broken and mended, with small piece missing. Coarse, clumsy characters, .6 cm. high. In the center a clumsy figure of a demon with caterpillar-like arms. Text continued on the exterior for 6 lines.
14	15	16017	6.8 + 18.7	Broken and mended, with missing segment. Characters .4 cm. high, in a good hand. In center a lilith with hands and feet manacled.
15	16	16087	7.3 + 17.2	Broken and mended. Characters .4 cm. high. In center figure of a serpent with its tail in its mouth.
16	17	2920	6.8 + 16.3	Broken and mended. Characters coarse, .3 cm. high. Rough circle in center.
17	18	2922	7 + 15.7	Broken and mended, with a segment missing. Characters coarse, .4 cm. high. In the center the circle and cross, formed in a peculiar way.
18	19	8695	7.2 + 16.1	Broken and mended, with fragment of about 5 cm. square missing. Coarse characters, .4 cm. high. In center rude and faded design—of a demon?

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
19	20		6.6 + 17.6	Broken and mended. Characters crabbed and obscure, closely written, .3 cm. high. Circle and cross in center.
20	21	16023	7 + 17	Broken and mended, fragment missing. Large, coarse characters, .6 cm. high. Large figure of a demon manacled, with a circle in his breast bisected by two lines. For the magical words accompanying see commentary.
21	22	16054	6.5 + 17	Broken and mended, with two fragments missing, a small one in the text. Script large, .8 cm. high, and rude. In center a rectangular figure divided into three squares, in one of those at the end two large markings like letters.
22	22-23	16006	6.5 + 16	Broken and mended, with two fragments missing. From the same hand as No. 21 and with the same design, the markings in the square suggesting a face.
23	22	16090	7 + 17.2	Broken and mended. From the same hand as Nos. 21, 22, and with similar design.
24	23	2926	7 + 16.8	Broken and mended, small fragment missing. Coarse script, .7 cm. high. In the center a figure of rude concentric circles with radial lines.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
25	24	16009	6.9 + 17.2	Broken and mended, with four fragments missing. Coarse script, .5 cm. high.
26	24	3997	6.9 + 15.5	Broken and mended. Script .4 cm. high. In the center a rough circle bisected by two lines, in each segment a magical word.
27	25	16041	5.6 + 16.6	Broken and mended with two considerable fragments missing. Script fine and fair, .2 cm. high. In the center a circle with cross.
28	25	2972	6.5 + 16.5	Broken and mended, four fragments missing, the text much blurred or obliterated. A fair script,.3 cm. high.
29	26	16055	6.8 + 17	Broken and mended, one fragment missing. Bold and well formed characters .5 cm. high.
30	26	16096	6.5 + 16.8	Broken and mended, small fragment missing. Script .3 to .4 cm. high. In center rude figure of a lilith with tresses flying and hands and feet bound.
31	27	9008	6.6 + 16	Perfect. Syriac script, .3 cm. high. In center a circle divided into four squares each with a cross in it.
32	28	16086	6.9 + 17	Broken and mended, one large and one small fragment missing. Same script and design as in No. 31.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
33	29	16019	6.2 + 15.5	Broken and mended, with two considerable fragments missing. In center cross with circle.
34	30	9012	7.5 + 17.5	Broken and mended. Design as in Nos. 31, 32.
35	31	16097	6.5 + 16.1	Broken and mended, two small fragments missing. Design as in No. 33.
36	32	2933	6.3 + 15.4	Broken and mended, with about half of the two lines on the margin missing.
37	33	2943	6.5 + 17	Broken and frequently repaired, much of the margin missing and a large part of the text obliterated. The script the smallest in the Syriac bowls, .2 to .3 cm. high. In the center circle and cross, each segment containing presumably letters of the Tetragrammaton.
38	34	2941	7 + 17	Broken and mended, with several small holes. Mandaic script average character about .2 cm. high. Small circle in center. A brief phrase written radially near the margin on the exterior.
39	35	9005	6.8 + 17.2	Broken and mended, some fragments missing. Script larger and coarser than in No. 38, .3 cm. high.
40	36-38	2972	7.3 + 17.2	Broken and mended, some large lacunae. Script as in No. 39. The text covers also most of the exterior. Circles in the center.

PREFACE

The primary purpose of this publication was to edit, with translation and necessary notes, the incantation texts inscribed on bowls from Nippur, now in the possession of the Museum. But it soon became apparent that full account should be made of all other published texts of like character, both for my own advantage in securing a larger material for collation and also for the convenience of scholars by presenting in one work a survey of a rather remote and scattered field, in which many have labored but none has attempted a treatment of the subject at large. I have accordingly not only given a description of all the earlier material but also collated it as fully as possible both in the Glossaries and in the references of Introduction and Commentary. The Introduction, thus extended beyond the field of the Nippur texts, has grown to still greater dimensions with the enlarging perception of the intimate relations between the bowl-inscriptions and the broad fields of ancient magical literature. Previous editors, working before the present great development of the study of magic, had taken little notice of these connections with a wider world. Analogies with the Talmud and possible connections with the Kabbalistic lore had been pointed out, but the bowls still remained without definite place or links in the general field of ancient magic. Withal the relations of Jewish magic to the larger whole have not yet been ascertained.

But within the last few decades an immense advance has been made in our knowledge of ancient magic and of its prime importance as a study in the history of mankind. The chief

stimulus to this has come, first, from the anthropologists and the students of comparative religion, who have taught us not to ignore the most primitive or most degraded manifestations of the human spirit. Then there have been the rapid strides in the advance of Egyptology and Assyriology, where at every step the student faces the problem of the identities and differences of magic and religion. Further, the classical philologists have at last condescended to examine the vulgar magical records in the Greek and Latin tongues, and have found an interest in them as revealing how the ancient "man of the street," and wiser men as well, actually talked and thought, in modes different from the traditional standards of the classical civilization. Of this large increase in material and understanding I have been fortunately able to avail myself, with the result of the discovery of innumerable clues proving that the bowl-magic is in part the lineal descendant of the old Babylonian sorcery while at the same time—and this is the more important because a less expected discovery—it takes its place in that great field of Hellenistic magic which pervaded the whole of the western world at the beginning of the Christian era. My chief contribution to the study has been in these two directions, the relations with the cuneiform religious texts and the Greek magical papyri. The writer's knowledge of Egyptian magic was wholly at second hand, and in any case that earlier influence was mediated to this special field through Hellenism. The Christian Syrian literature is shown to have its close connections, being thoroughly infused, as was the early Church, with magical ideas. Magic within Judaism has been the subject of capital monographs by competent Jewish scholars, and in that direction I have not been able to do much more than to appropriate their results, except so far as to show the absolute

community of ideas and terms and practice between Jewish and Gentile sorcery. It remains a subject for an interesting investigation to discover just what Judaism gave to, and what it received from, the Hellenistic magic, but probably a hopeless study, for, as someone has remarked, in the history of magic we must pursue not the genealogical but the analogical method. As a result of these comparisons, the conclusion must be drawn, as indicated in § 15 of the Introduction, that the magic of the bowls, and in a general way, all Jewish magic, has come out of the crucible of the Graeco-Roman world, which, on account of its dominating civilization, we call Hellenistic; it is not Jewish but eclectic.

However, with this broadening of the scope of the work, it has been the fixed purpose not to attempt any general study of magic; this would have been but to confuse my work and cloud my results. With a single eye, the facts of the texts have been illustrated in as objective a way as possible from the phenomena of locally inherited and contemporaneous magic, with the intent of establishing the immediate bonds of connection. My work would be a contribution from a very small and limited field to the study of magical thought and practice within a definite age and region. At least there has come to the writer the satisfaction of finding a place for the *membra disjecta* of these out-of-the-way texts in the huge colossus of that system of magic which was once almost the actual religion of our western civilization.

If I appear to have gone into much detail in the treatment of these non-literary texts, I trust that the results will justify my undertaking; the expansion of the work has proceeded naturally and subtly much beyond the editor's desire and convenience. From the philological point of view these vulgar inscriptions are of as much interest to the Semitist as are the

magical papyri to the classicist. Careful study shows that, with the exception of intentionally unintelligible passages, mystic phrases and the like, the words and the syntax of the texts are the autograph representatives of the language of their writers. Three different Aramaic dialects, each with its own script, and one script a peculiar variety of the Edessene, are offered in the bowls from Nippur, and they are of importance as original documents of the dialectic forms of the speech of Babylonia about the eve of the rise of Islam. Other original monuments are well-nigh lacking for this field; we are confined almost entirely to the school-literatures of religious sects, of the Jews, Christian Syrians and Mandaeans, whose books are preserved mostly in late manuscripts. The Jewish magical literature is all documentarily late or uncertain as to age, and our texts have a historical worth as almost the earliest records in that line which can be exactly dated. Further, the obscure and crabbed condition of the texts compelled an exact philological examination in order to test hypotheses of interpretation. And as to matters beyond philology, it will not, I hope, be set down to wilful acriby if I have attempted to work out very small clues. In such work as this there is no immediate compensation on the surface, and it is only by following out the fine tendrils of connection that results worth while can be obtained. The writer's experience in his study is well expressed by some words of Professor Deissmann: "It may be that hundreds of stones, tiresomely repeating the same monotonous formula, have only the value of a single authority, yet in their totality, these epigraphic results furnish us with plenty of material—only one should not expect too much of them, or too little" (*Bible Studies*, 82).

In regard to the representation of the texts it might have been technically more correct to present them in their several

scripts. But apart from the difficulty of procuring two of these types in American printing houses and compositors who could set them, it must be patent that the general convenience is far better subserved by presenting the texts in the well-known Hebrew character, while those who desire the original scripts can satisfy themselves with the facsimiles published in the second volume. The peculiar Mandaic relative particle is represented, according to convention, by the diacritical ד̄; but I have departed from the usual custom of editing Mandaic texts by representing the pronominal suffix in *-h* by ה and have used ה for the radical ה or ח, which two sounds fall together in the dialect. In the Glossaries words containing this common character are arranged according to its etymological distinction as ה or ח. In the transliterations inferior points indicate doubtful readings, superior points are used for the diacritical marks of the Syriac texts. The numbered lines of the texts represent the spiral lines, taken as beginning from the radius where the inscription begins.

The Prefatory Note to the Plates describes how the facsimiles were made. I have to express my deep obligation to my friend and colleague, the Rev. Dr. R. K. Yerkes, for his careful reading of the volume in proof.

JAMES A. MONTGOMERY.

THE UNIVERSITY MUSEUM, February 2, 1912.

I. SURVEY OF THE MATERIAL

§ 1. The Material in the Museum

The University Museum contains a large number of inscribed earthenware bowls found at Nippur belonging to the category of the so-called "Incantation Bowls." These vessels are generally of the size and shape of a modern porridge-bowl, except that in most cases the bowl is somewhat cone-shaped, so that when set down it balances itself in a state of unstable equilibrium. Some few have the boss expanded into a rim, thus giving a flat surface at the bottom of the bowl. The most common size is of about 16 cm. diameter at top, by 5 cm. full depth. There is one large bowl, 28 x 16 cm.[1]

The bowls are made of a good clay, and are wheel-turned and kiln-dried; they have no surface, slip or glazing of any kind.[2] They were a domestic ware, intended for foods, and in no way differ from the simple vessels which to this day are made in the Orient for household use.

The bowls in the Museum were excavated at Nippur, in Babylonia, by the University of Pennsylvania Expedition; so far as I know, they are finds of the first two campaigns, conducted by Professor Peters in the years 1888, 1889. According to Peters' account,[3] these bowls were found on the top, or in the first strata of the mounds, in several places. They appear generally to have been discovered in the ruins of houses, amidst what Peters suggests were Jewish settlements; the whole surface of one hill, he says "was covered with a Jewish settlement, the houses of which were built of mud-brick, and in almost every house we found one, or more,

[1] Many such large specimens are in the British Museum and at Constantinople.

[2] I am indebted to Mr. D. Randall-MacIver, late of the Museum, for the characterization of the pottery.

[3] See his *Nippur*, the Index to which, *sub* "Jewish incantation bowls" gives the references.

Jewish incantation bowls."[4] At least in one case bowls were found in connection with a cemetery; "we found ourselves in a graveyard..... It was interesting to find, between one and two metres below the surface, in the immediate neighborhood of slipper-shaped coffins, inscribed Hebrew bowls."[5] As for the chronological light thrown upon these bowls, Cufic coins were found in the houses of these "Jewish" settlements,[6] and one of the most extensive finds of inscribed bowls was in the strata above the "Court of Columns," a Parthian building.[7] Peters holds the seventh century to be the latest date for the Jewish settlements where Cufic coins were found.[8]

The Museum Catalogue counts over 150 numbers of this class of specimens, but the enumeration includes a large number of fragments. About 30 of the bowls are what I would call "original fakes"; they are inscribed with letters arbitrarily arranged, or with pot-hooks, or even in some cases with mere scrawls, and I judge that these articles were palmed off on the unlearned public as "quite as good" as true incantations.[9] A still larger number of the bowls are so broken and their inscriptions so defaced, that I have not been able to use them. Others again were inscribed by so illiterate scribes that so far as they can be made out, they offer only some magical jargon, which adds nothing to our knowledge. Again there are a few texts which are fairly written and without those self-betraying combinations of letters that suggest a mock inscription, but which nevertheless are not Semitic. They may be in some non-Semitic tongue, whether, for example, in Pahlavi, I am not able to say. One of the neatest of the bowls, No. 2954, containing only four circular lines of inscription, interested me as presenting a novel alphabet; but I soon came to the conclusion that this is but another "fake," produced we may suppose by some learned impostor—or wag.

[4] ii, 182 f.; cf. p. 194.

[5] i, 245.

[6] ii, 183. On the following page the writer says that Arabic bowls along with Jewish and Syriac were found; but the Museum contains no Arabic specimens.

[7] Hilprecht, *Explorations in Bible Lands*, p. 447.

[8] ii, 153, 183, 186. For further discussion of the date, see § 14.

[9] In many cases the inscriptions were written by laymen, who thus saved themselves the exorcist's fee. Schwab notices some forged bowls at Constantinople, *PSBA*, xiii, 595.

All the relics from Nippur came to the University as the gift of the Sultan of Turkey, and in the matter of these incantation bowls I understand that the best specimens, the largest and fairest, have been retained in the Imperial Museum at Constantinople. At all events those in Philadelphia in almost all cases prevent complete decipherment because of mutilation.[10] A large segment of the spherical surface may be missing, or an extensive portion of the interior, a side, or the upper or lower portion of the bowl may have become illegible, probably through the action of water. The inscription being spiral, such mutilations intrude their annoyance into every line. The damaged nature of this collection has added much to the toil of decipherment, for every break in the text and every effacement necessitates speculation as to the missing contents. On the other hand it is cause for remark and gratitude that these fragile vessels have been preserved as intact as they are, and that the scribes used such excellent ink that what they wrote has largely survived in defiance of "the powers of the air," the elements and the corroding chemical agents.

As a result of the investigation of the whole collection I have selected 40 bowls for publication, to which number should be added the one published earlier by Myhrman (accompanying No. 7). The remaining bowls and fragments are on the whole too illegible or too undecipherable to make it worth while to add them to this material. The languages of the inscriptions are three Aramaic dialects:— (1) the language with which we are familiar from the Babylonian Talmud, to which belong Nos. 1-30; (2) a Syriac dialect, Nos. 31-37; the Mandaic, Nos. 38-40. Each of these has its own script. As an appendix, I publish, as No. 41, a human skull inscribed with a magical inscription of like character to those on the bowls, and No. 42 is a text of peculiar magical contents which has come to my hands, but with its original now lacking in the Museum.

[10] With few exceptions, all the bowls I have deciphered have been put together from fragments into which they had fallen, in the Museum.

§ 2. The Material Hitherto Published, and in Other Collections[1]

The first publication of Mesopotamian incantation bowls appeared in Layard's notable volume, *Discoveries in the Ruins of Nineveh and Babylon.*[2] In describing his finds at Tell Amran, near Hillah, the great explorer tells of discovering "five cups or bowls of earthenware, and fragments of others, covered on the inner surface with letters written in a kind of ink" (p. 509). He notes that like material had been discovered before. Two from the collection of a Mr. Stewart had been deposited in the British Museum, which had also acquired through Colonel Rawlinson eight specimens obtained at Bagdad, their provenance however being unknown. In a later passage (p. 524) Layard records the discovery of a similar bowl, along with many fragments, at Nippur,—the precursor of the collection in Philadelphia.

Layard committed his bowls to Mr. Thomas Ellis, of the staff of the British Museum, whose results are given in Layard's work, appearing pp. 509-523.[3] Layard himself takes up the discussion p. 523 ff. with criticism of Ellis's results. The latter presented five Judaeo-Aramaic bowls, and one in Syriac, with summaries of fragments of others. Of these only four were given in facsimile, nos. 1, 3, 5, 6.[4] Subsequent scholarly investigation has proved not only that Ellis was wild in his interpretations of the bowls, but also that the facsimiles were unreliable. Hence the latter can only be used with caution or with the aid of later

[1] Stübe, *Jüdisch-babylonische Zaubertexte,* 1895, gives a good review of the literature up to date, although requiring some corrections and additions. See also Wohlstein, in *ZA,* viii (1893), 313 f.

[2] London, 1853. There is a German translation by Zenker, the bowls appearing there in Plate xx.

[3] Layard leaves it somewhat indefinite which bowls were treated by Ellis.

[4] Ellis's first bowl turns out to be a duplicate of our No. 11, under which I am able to present the restored text of the former. Was this the bowl which Layard reports was found at Nippur?

copies, while the bowls published without facsimiles are absolutely worthless as scientific copy. Layard's publication therefore did little more than attract the attention of scholars to a fresh field of philology and religious lore.

The first scientific treatment of this new material came from M. A. Levy, of Breslau, who devoted a long essay to Ellis's bowl, no. 1, in the *Zeitschrift d. Deutschen Morgenländischen Gesellschaft* for 1855 (ix, 465).[5] He was the first to grasp the peculiar *lingo* of the inscription, and in his commentary drew largely from Judaistic and Mandaic stores of learning. He also gave an elaborate treatment of the palaeography of the bowl, overthrowing the claims that had been advanced for a pre-Christian origin.

Twenty years later J. M. Rodwell published a bowl from Hillah that had been procured by the British Museum, under the title, *Remarks upon a Terra-Cotta Vase,* with a photographic facsimile.[6] This second English venture at decipherment was no better than the first, its sole merit lying in the fact that the French scholar J. Halévy was induced to take up the same bowl on the basis of the facsimile, and to give it a scholarly transliteration and translation, with commentary, under the title, *Observation sur un vase judéo-babylonien du British Muséum.*[7] Four of the bowls that had been published were presented by the great Hebrew epigraphist Chwolson in his monumental *Corpus inscriptionum hebraicarum.*[8] The first (Chwolson's number, 18) is Ellis no. 1, the second (no. 19) is Ellis no. 3, the third (no. 20) is the bowl published by Rodwell and Halévy; and the

[5] *Über die von Layard aufgefundenen chaldäischen Inschriften auf Topfgefässen. Ein Beitrag zur hebräischen Paläographie u. z. Religionsgeschichte,* with Ellis's facsimile. Levy again treated the same inscription under the title "Epigraphische Beiträge zur Geschichte der Juden," in the *Jahrbuch f. d. Geschichte d. Juden,* ii (1861), 266, 294.

[6] In *TSBA,* ii (1873), 114.

[7] In *Comptes rendus de l'Académie des Inscriptions et Belles-Lettres,* series iv, vol. v (for 1877; Paris, 1878), 288. He re-edited his material in his *Mélanges de critique et d'histoire,* 229.

[8] St. Petersburg, 1882, col. 113 f. The facsimiles are reproduced at the end of the volume. The Russian edition of this work (St. Petersburg, 1884) publishes five bowls and considerably varies from the German edition (so Wohlstein, *ZA,* viii, 315). For nos. 19, 21, Chwolson made use of improved transcripts prepared for him by Halévy. In his review of the *Corpus* in the *Göttingische Gelehrte Anzeige* for 1883, Landauer comments on these bowls (p. 507).

fourth (no. 21) is Ellis no. 5. Chwolson adopted a skeptical position toward the speculations and guesses of his predecessors, and his commentaries are valuable as a restraint upon their theories. Of special interest is his discussion of the age of the bowls from the palaeographic point of view—a subject which I take up in § 5.

The most extensive editor of the material under discussion has been Moise Schwab, the author of the French translation of the Talmud. In 1882 he published, in collaboration with E. Babelon, a bowl in the possession of the French government, under the title *Un vase judéo-chaldéen de la Bibliothèque Nationale*,[9] along with a facsimile and commentary. In 1885 he published a bowl at the Louvre in an article entitled *Une coupe d'incantation*,[10] without facsimile. He then presented a large series of bowls in the *Proceedings of the Society of Biblical Archaeology*, for the years 1891 and 1892.[11] He included several bowls already published, with the old facsimiles, but failed to offer photographic copies of the bowls he brought to light. It seems strange that the English scholarly world rested content with the poor facsimiles of the relics in the British Museum, made almost forty years before, and that Schwab did not avail himself of better texts than his predecessors had used. Between the articles appearing in the two volumes of the *PSBA* Dr. Schwab contributed studies of two bowls to the *Revue d'assyriologie*, etc., under the title, "Deux vases judéo-babyloniens."[12] These he numbered F and G so as to align them with those appearing in the other publications. The material thus presented by Schwab is as follows:

A, in *PSBA*, xii = Ellis, no. 1; Levy; Chwolson, no. 18.
B, in *PSBA*, xii = Ellis, no. 3; Chwolson, no. 19.
C, in *PSBA*, xii = Rodwell; Halévy; Chwolson, no. 20.
D, in *PSBA*, xii = Ellis, no. 5; Chwolson, no. 21.

[9] In *Revue des études juives*, iv (1882), 165.

[10] In *Revue de l'assyriologie et d'archéologie orientale*, i (1886), 117.

[11] In vol. xii, 292: *Les coupes magiques et l'hydromancie daus l'antiquité orientale*, with introductory remarks, and, p. 296, a description of the 22 bowls then in the British Museum; in vol. xiii, 583: *Coupes à inscriptions magiques*. This material was first presented to the French Academy of Inscriptions in the years 1883, 1885, 1891. At the end of the first article is a glossary to the bowls published therein.

[12] ii (1892), 136.

E, in *PSBA,* xii; a bowl in the National Library at Paris, also in *REJ,* iv, (without note in the *Proceedings* that he had published it before).

F, G, in *Rev. d'ass.,* ii; bowls in the Louvre. The exterior inscription on G is given under G in *PSBA* (p. 327).

H, in *PSBA,* xii; a bowl in the British Museum.

I, in *PSBA,* xii; a bowl in the Louvre, also in *Rev. d'ass.,* i (without note that he had published it before).

L, in *PSBA,* xiii; a bowl in the Lycklama Museum at Cannes (other than that published by Hyvernat).

M, in *PSBA,* xiii; a bowl in the Louvre, acquired by Heuzey.

N, O, P, in *PSBA,* xiii; three bowls in the collection Dieulafoy from Susiana.

Q, in *PSBA,* xiii; a bowl in the Musée de Winterthur.

R, in *PSBA,* xiii; a bowl in the coin department of the Bibliothèque Nationale.

Meanwhile there had appeared, in 1885, a study of a bowl in a provincial French museum by H. Hyvernat (now professor in the Catholic University, Washington): *Sur un vase judéo-babylonien du musée Lycklama de Cannes (Provence).*[13] Unfortunately the accompanying photographic facsimiles are barely legible as published; however there is little doubt as to the text and its meaning. [14] Schwab also refers[15] to a bowl published by B. Markaug in the *Zapiski* of the Imperial Russian Society of Archaeology, iv, 83, which I have not been able to procure.

A few years later the collection of incantation bowls at the Royal Museum in Berlin was made the subject of study by two young scholars, working contemporaneously but independently. J. Wohlstein published, under the title, *Ueber einige aramäische Inschriften auf Thongefässen des königlichen Museums zu Berlin,* five bowls, with introduction to the general subject and commentary.[16] And R. Stübe published a Berlin bowl in his

[13] In *Zeitschrift f. Keilschriftforschung,* ii (1885), 113.

[14] This publication received criticism from M. Grünbaum on a subsequent page of the same journal (p. 217), especially for its dependence upon Kohut's notions of Jewish angelology; and on p. 295 Nöldeke expressed some comments on the text, especially animadverting on its age.

[15] *Rev. d. Assyriologie,* ii, 137.

[16] *ZA,* viii (1893), 313, and ix (1894), 11, In vol. viii appears no. 2422; in vol. ix, nos. 2416, 2426, 2414, 2417.

Jüdisch-babylonische Zaubertexte.[17] The text he published, the longest yet edited, is the same as the second given by Wohlstein; his treatment is fuller than that of his contemporary, to whom he is able to refer in his printed notes. Stübe gives a description of nineteen bowls in the British Museum. Unfortunately neither publication is enriched with facsimiles. Subsequently S. Fraenkel contributed some notes to Wohlstein's bowls in the same journal, in part on the basis of his own transcription.[18]

Pognon, French consul at Bagdad, broke the ground of a fresh dialect of bowl-inscriptions with the study of a Mandaic bowl—*Une incantation contre les génies malfaisants en mandaite,* appearing in 1892.[19] The bowl was purchased from Arabs at Bismaya. In 1898 the same scholar published an elaborate work upon bowls found at Khuabir 55 km. NW of Musseyib, on the right bank of the Euphrates; he visited the locality but was unable to reach the site where the bowls were found. His work, entitled *Inscriptions mandaites des coupes de Khouabir,*[20] contains some valuable appendices, of wider interest than the title suggests, and is furnished like the earlier monograph with full apparatus. Five more Mandaic bowls were published by Lidzbarski in his *Ephemeris,* i, 89, "Mandäische Zaubertexte." The fifth of these texts is a duplicate of my No. 11 and is given there in parallelism. Three of the texts are in the Berlin Museum, and two in the Louvre.

Professor Gottheil contributed to Peters' *Nippur* (ii, 182) a translation of one of the bowls at Pennsylvania (= No. 12 below). Dr. Myhrman, of Uppsala, published from the same collection no. 16081, with commentary; his monograph appeared in *Le monde orientale,* Uppsala, 1907-8, and with revision as a contribution to the Hilprecht Anniversary Volume[21] under

[17] Halle, 1895.

[18] *ZA,* ix, 308.

[19] In the *Mémoires de la Société de Linguistique* (Paris), viii, 193, and in separate print.

[20] Paris, 1898, with facsimiles and full glossary; reviewed by Nöldeke, *WZKM,* xii, 141; Lidzbarski, *TLZ,* 1899, col. 171; Schwally, *OLZ,* ii, 7, iii, 458; Chabot, *Revue critique,* xlvi, 43, xlix, 484. Pognon also saw some bowls in the square character, some in Estrangelo, and some which he presumed might be in Pahlavi (p. 1). In my citations to Pognon, I cite his two books as A and B respectively.

[21] Leipzig, 1909; p. 342.

the title *An Aramaic Incantation Text;* this text is given below in parallel with No. 7.

It is in place here to notice the location of incantation bowls in the various museums. Despite a query addressed over a year ago I have not received any information from the authorities as to the number and character of the bowl-texts at the Imperial Museum in Constantinople; its collection from what I hear must be large and fine, and has been particularly enriched from Nippur.

Dr. L. W. King has kindly informed me that the British Museum contains 61 bowls of our class, exhibited in the Babylonian Room. Some of the specimens, I also learn, are of very large size. The texts are in the square script, Syriac, Mandaic and Arabic.

Schwab thus sums up, for the year 1906, the bowl-texts in the French museums:[22] 2 in the National Library, 7 in the Louvre, 2 in the Museum Lycklama, Cannes; also one in private hands.

Through Professor Ranke's kindness I learn that in the Berlin Museum there are 69 bowls with "Hebrew" (i. e. Aramaic?) inscriptions, 9 with Syriac (presumably inclusive of Mandaic). Stübe gives a description of 19 of these. In the same museum there are two inscribed skulls, similar doubtless to the one published below as No. 41.

At the National Museum in Washington are found five bowls, four in square script, one in Estrangelo; but from photographs kindly lent me by Dr. Casanowicz, two of the former are to be designated as "fakes" in the sense used above. These bowls are said to have been found at Hillah. The German *Orient-Gesellschaft* has recently announced the discovery of three bowls at Asshur,[23] and Koldewey, *Tempel von Babylon u. Borsippa,* 58, speaks of numerous Aramaic bowls found at Borsippa.

Of bowls in private hands, I note one unpublished Syriac text in the possession of Professor Hyvernat, of the Catholic University, Washington; and three which Mr. Wm. T. Ellis purchased at Nippur in 1911, one of them containing a Syriac text similar to those published in this volume; this text I have prepared for publication in the Journal of the American

[22] *Journal asiatique,* X, vii, 8.

[23] *Mittheilungen,* no. 43, p. 13.

Oriental Society, where it will shortly appear. A few citations of this text are given in the glossaries under the abbreviation "Montg."[24]

The provenance of this material is thus confined to a small region, extending from Nippur and Bismaya on the south to Asshur on the north, and lying on both sides of the Euphrates.

[24] The "Roman bowl from Bagdad" described by O. S. Tonks in the *Am. Journal of Archaeology*, 1911, 310, on which he would find some magical syllables, has been proved by A. T. Olmstead (*ib.*, 1912, 83) to be a late Arabic forgery. A Pahlavi bowl inscription reported by A. V. W. Jackson, *JAOS*, xxviii, 345, does not belong to our category.

§ 3. Some Notes on the Texts Hitherto Published

I offer in this section some critical notes on the texts described in the last section. The texts would in many cases have been simplified if the editors had recognized that there is no distinction in the script between ה and ח, and most often none between ו and י. The glossary will indicate emendations of simple words, but here I present corrections necessary for the construction.

Ellis 1 has been recovered, as remarked above, through a duplicate in the Pennsylvania collection; see to No. 11. No facsimile is given for Ellis 2.

In Ellis 3 the opening lines should read:[1] דיזחון די פתכרי וי סטני ופתיכרי (2) כולהון מן מהפירוז בר הינדו . . . כל פתיכרי דיכרי ואיסרתא (3) לטתא אסרן נוקבתא ופום כל בני אינשא אסרן כולהון מן מהפרוז בר הינדו ניד[ר]י ולטתא וג'. The discovery of the proper names, Mehpêrôz[2] son of Hindû (see Glossary B), clears up these lines. איסרתא = איסתרתא? but see Glossary C under latter word. After the first word the scribe intended to write דיוי; inadvertently he broke into the word with פ', and then leaving the error uncorrected (as is the rule of these scribes) continued with the first word.—Read in l. 4, משכוניהון (?) for משריניהון; cf. משכונתא in glossary.—In l. 4 f. there is a parallelism to the opening lines of Schwab G:

Ellis 3	Schwab G
בשום הפכה הפיכה סורה (?) שמיה הפיכי	הפכה הפכה הפכה שמיה הפיכה ארעה
כוני והפכי מזלי הפיכה שעיהון דכל בני	הפיכה כוכב הפיכה מזלי הפיכא לוטתא
אנשא תשריה (?) לוטתא דאבא וג'	הפיכה שעותא הפיכא לוטתא דאבא וג'

בשום introduces a magical formula which can accomplish the *bouleversement* (הפיכה) of all things and hence of evil arts. כוני = כוכב, and must

[1] The numbers in the text represent the spiral lines.
[2] This reading is certain in l. 8.

be the Assyrian *kêwân* (biblical כיון), used in the general sense of planet. שעותא, שעיהון, are used in the sense of *derisio*, etc. (see Payne-Smith, *Thes.*, col. 4249 f.).—What follows is to be read thus: "The curse of father and mother, of daughter and daughter-in-law and mother-in-law is loosed (שריא), what is far and what is near, what is found in country or city—what is found in the country is loosed, and what curses (?) in the city is loosed, and what falls by the way."

In Ellis 5, l. 2, read ביתא (for במיא) and the following word possibly מן דשומיה, and translate—"a house, whatever its name (i. e. whoever owns it), let them read and depart from it (ליקרו ליקרו וליפוקו יתיה), even all who dwell in it—(i. e.) any vows," etc.; that is, the evil spirits are to read the *kamea* and depart. The jussive with ל is exceptional.

For the bowl edited by Rodwell, Halévy, Chwolson and Schwab, I give the following transliteration: כל חרשין בישין ועובדין תקיפין ולוטתא ונידרי ואשלמתא ומללתא דרחיקין ודקריבין דלילא ודימאמא דנברי ודינשי דעבדו[3] ליה ודעבדין ליה לברחאיי ולחיותיה[4] ולקיניניה דכוליהון בדלאלה מן יומה דנן ועד עלם וכולהון אילין ואילין משמתין ומנידין[5] נזירין ותבירין עקירין ומפקין ומבטלין מן גופיהון ומן כל הדמי קומתיהון ומן מדרתיהון דחיותיה ודברחאיי ועמיה (for דברחאיי ודעמיה) בדלאלה על אורח חוצי אוי[6]. So much is clear.—Then follows an apostrophe to a certain star, which appears also in Schwab E. With this parallel to our aid I read: אוי כוכבא דעליה רכיבא אסות ניהוא[7] מלפא חרשי לחרשיתא: i. e. "Oh (or, woe), the star on which rides salvation (healing),[8] the one which teaches arts to witches;" that is, some star potent in medicine and black arts, which may be invoked for good or evil.—Towards the end is to be read: בישמיה בר מסוסיא שמא רבא מפורש. "in the name of Bar Mesôsiâ (a master-conjurer evidently), the great Ineffable Name."

For Schwab E, see notes on the bowl just discussed.—In the middle of the inscription for חרמי קומתיה, read הדמי ק'.

[3] Perfect, followed by futuritive ppl.

[4] Not an Arabism, as Halévy suggests.

[5] Pael pass. ppl.

[6] A Syriac interjection; or do these characters belong to חוצי? In the parallel, Schwab E, we have חוציא ל.

[7] Cf. the Rabbinic ניהו.

[8] Cf. *Mal.* 3: 20.

A new collation might contribute much to the understanding of Schwab F. In l. 1, שרירי ("strong one") is an epithet of the "evil spirit." Read אשבעית at end of line.—L. 2, read עליכי אנתי אנפרת, אנ' being the name of the demon, and occurring again below.—L. 3, read כמשחא, "like oil they (the spirits) are dipped into the vessel of his heart," i. e., the man's inwards are suffused with diseases as with oil.—L. 9 again הדמי for חרמי.—L. 10, תהומי for תחומי.—L. 11, עד נמירו זמן ואדן דאבא בינא: "(ye angels go forth from him) until the consummation of time and that time is known,"—with reference to the day of judgment.

In Schwab G, l. 9, עלמא קלה שמעית וג' = "wherefore have I heard a voice? I have heard the voice of a man, Mešarsiâ," etc.

Schwab I, l. 1, read פתיכרי ופתי[כ]רן נוקבתא.—L. 5, כישוף מומין, "sorcery I exorcise."—L. 12, read רשים שמא וג'.: "inscribed is the name whereby heaven and earth are bound."

The transliteration of Schwab M is almost untranslatable. As the first word read מומינא, "I adjure," which disposes of one of Schwab's proofs that these bowls were used in hydromancy.

In Berlin Museum no. 2416, l. 4 (Stübe = Wohlstein, l. 5)* and repeatedly below, דלטיתהון = "whom I have cursed." In l. 20, etc. the demons are bidden to depart from the sorcerer's client and transfer themselves to any persons he has cursed.—For דביה, l. 6 (W. 8), see below, to 2 : 2, and for דיהביה = "of Yahwe," l. 15 (W. 22), see 13 : 7 and 26 : 4.—על רזא, l. 22 (W. 31) = "on ground of, in the name of the Mystery."

In Wohlstein, no. 2422, l. 16, טעותא is plural of the Targumic טעו, "false deity;" the same plural is meant in טעתא, no. 2426, l. 5.—In no. 2417, ll. 3, 6, for דבתי read רבתי. Then אמי רבתי = "my grandmother," and אלהתא ר' = "the great goddess."

* Stübe's text is much the better.

II. SCRIPT AND LANGUAGE

§ 4. Introductory

In the following notes I shall confine myself almost entirely to the bowls at Pennsylvania. The absence of facsimiles or of good ones in a large number of the published texts prevents a proper control over those texts. Moreover there is some advantage in confining the study to a single collection of texts whose age and provenance can be exactly fixed as in the case of the bowls from Nippur. At the same time what is true of these texts is found to hold good for other published inscriptions.

Our material may be divided epigraphically and dialectically into three classes: (1) Of the "Rabbinic" dialect in the square character; (2) of a Syriac dialect, in a novel form of Estrangelo script; (3) of the Mandaic dialect in its peculiar alphabet. Bowl inscriptions of the first and third classes have been published; but so far no Syriac text has appeared with the exception of one essay noted p. 16 and in § 6.

Some apology may be necessary for the term "Rabbinic" dialect. As used here, it does not imply that the rabbis or the Jews in Babylonia had a special dialect,—they spoke the native dialects; nor that there is any unity in the language of the Talmud, which is alive with dialectic varieties.[1] But the Talmud is practically our only source for a certain family of Aramaic dialects in Babylonia, easily distinguished from the two other literary dialects, the Syriac (Edessene) and Mandaic. The name chosen is a convenient handle.[2]

[1] Our texts themselves, as the discussion will show, are frequently of non-Jewish origin.

[2] "Babylonian" or the old-fashioned "Chaldaic," might be used, but each is equally indefinite and the former would be most confusing.

§ 5. The Rabbinic Texts

A. Script and Orthoepy

Ellis, who made the first attempt at decipherment of bowls in the square character, was inclined to find in them a very primitive script, antedating the Christian era.[1] Levy proceeded in a scholarly fashion and analyzed each character—to be sure, with rather scanty epigraphical resources;[2] he came to the conclusion that the bowl he was treating was to be assigned to the seventh century. Chwolson severely criticized Levy's method, and on the basis of the palaeographical material in his *Corpus* assigned the bowls of Ellis to various early dates (col. 118). Ellis 1 he assigned to the first Christian century; for three others he gave a graduated chronology, placing them in the second, third and fourth centuries respectively. But Chwolson's own method is somewhat of a *reductio ad absurdum*.[3] It is hazardous to assign a date for these bowls on palaeographical grounds; it is impossible to relate the various variations of script to each other by a chronological scale. For instance the contemporaneous character of many bowls at Nippur is shown by the recurrence of the same persons and families in the texts; indeed the same persons appear in texts of different dialects, yet these inscriptions differ greatly in script. But there is no reason, at least in the Nippur bowls, to assign them to different ages; from the interrelations between them, personal and phraseological, I am inclined to assign them to the same period. Indeed they might all have been written in the same year, so far as palaeography may say anything. The differences are chirographical, not palaeographical. Some of the scribes wrote a neat, even a beautiful hand; but many were written by careless scribes, and many by illiterate ones, probably often by

[1] In Layard, *op. cit.*, 510; so Layard himself for no. 1, p. 525.

[2] *ZDMG*, ix, 474.

[3] See Hyvernat, p. 140, on Levy and Chwolson's arguments.

laymen, who affected to write their own prescriptions. The comparative plate of characters presented by Levy offers a large number of variations in the forms of many letters: for ב and ר eleven each, for ט eight, for כ and ש six, etc. Now when one short text offers so many varieties in forms, it is impossible for palaeography to give any nice chronological estimate. In fact the ruder the letters are, the more archaic they appear; yet they may be mere degenerations of the standard type or survivals of an elder one persisting in obscure quarters.

One need but take a glance at Euting's alphabetic tables at the end of Chwolson's *Corpus* to recognize that the Hebrew square character has remained essentially the same since near the beginning of the era. The earlier evidence is drawn from monuments, the later from manuscripts, while in the long centuries of scribal reproduction the Jews have developed as it were a conventional *ductus*, whereas earlier there was far more room for variation when this family of the alphabet was not confined as a vehicle of a school of religious scribes. Thus נ is one of the most Protean of forms, but apparently all varieties are found in almost every century of the first millennium, according to Euting's showing.

In the palaeographical table attached to this work I give specimen alphabets drawn from the bowls. But a fine analysis for chronological results would be unprofitable. For a round date the bowls might be placed on palaeographical grounds at about 500 A. C., but this date might be carried further back or further down according as other evidence might be adduced.

The finial letters are used, but with few instances of finial צ. A phenomenon that presents some difficulty is the practical identification of ו and י and of ה and ח. In the case of the former pair, they are often distinguished, the י being then represented by a short stroke or sometimes by a small angle, the ו by a long stroke; but there is no consistency in this differentiation, and the י is easily prolonged into a stroke like ו; within the same text or line or even word, the י may be written both ways. This confusion has led to the barbarous appearance of many of the edited texts, on which Nöldeke has animadverted.[1] The confusion throws doubts on certain vocalizations,—e. g. is it שובטא or שיבטא?—and it is of grammatical

[1] *Zeits. f. Keilschriftforsch.*, ii, 296.

moment in the verbal endings ן and ין, where, because of the recession of the stroke of the ן, the vowel letters are not at all distinguished.

There is no distinction between ח and ה in the Nippur bowls, and the same is true of the other published bowls, so far as I can observe. The ח includes ה. It is the same phenomenon that appears in the Mandaic, where ה has been retained only as a pronominal suffix. This identification is the representation of actual speech, in which our scribes no longer distinguished between the two gutturals, even as in the Mandaic. As the Babylonian Talmud distinguished between them in its text, we may surmise that the better educated preserved the difference at least in spelling.[5]

The final *â*-vowel is expressed by א, less frequently by ה. Some texts use the latter consistently, and there is hardly a text which does not give an instance of this spelling. It is used regularly for certain common words, e. g. לילי‌ה; and especially when the word contains an א, e. g. אנה, אפרה. This is a primitive type of Aramaic orthoepy, but the Samaritan dialect has preserved it, and an early Palestinian amulet, published by me elsewhere, shows the same features.[6] The phenomenon is unique in late Eastern Aramaic.

The vowel letters ו and י are used abundantly, always in terminal syllables and for long vowels, and very commonly for short vowels. Yet there is variation in this respect, even in the same text. On the whole א is sparingly used as a vowel letter, preferably to indicate the feminine plural, e. g. לילי‌אתא, yet indistinguishable לילי‌תא is as frequent.

It goes without saying that there are no vowel points. In one bowl (No. 13) a kind of pothook has been used to separate words, and here and there a point has been used, but this is the extent of the punctuation. Sometimes a scoring is found between the lines of script and by means of vertical lines phrases are blocked off; these are generally magical combinations. In No. 22 one word is written in a clumsy Syriac script and in one of Ellis's bowls a Syriac ח is once used. Quite a peculiar script is found in No. 30, and פ has a unique form in No. 22.

[5] In the elder type of ח, the left leg was attached to the upper bar, hence the confusion with ה was easier. The Rabbis preferred this form; see *Men.* 29b. The close assimilation of the two letters appears in the Assouan papyri of the fifth century B. C.

[6] *JAOS*, 1911, 272.

B. The Language

The grammatical phenomena in the bowls from Nippur can for the most part be exemplified from the Babylonian Talmud, and like the latter they present various dialectic types. On the one hand they have close connections with Mandaic and on the other they show some Syriac idioms.

As in the Mandaic orthoepy the *šewā* is frequently designated by י, a circumstance which throws light upon the minor vocalizations. I may notice אימיהון, ביתיהון, "their mother, house," etc.; ניקיבתא, pl., אילהא; with prefixes: ביפתכרי; לימרומא; דישמלהון, "their left hand;" and with ו, ויבנתא, "and daughters;" וידלא, וילשלהבון (a punctuation appearing also in Targum Onkelos, see to 3: 3).

In the consonants there is the yielding of the harder sounds, e. g. איספנדרמיד, איסכופתא, varying with איסק, איצ; indeed צ has become a very rare character. In general the gutturals are preserved, though ה and ח are no longer distinguished. In one bowl, No. 6, which has other Mandaizing characteristics, are found אחא = עחא, ניפקא, √ פקע; ניבר, √ עבר. The same bowl offers תישילטון, with the intrusion of a new vowel, as is particularly characteristic of Mandaic.[1]

For the pronouns I may refer to the lists at end of Glossary C. For their suffixal forms may be noted בניה, 2: 4, and even בנה, 11: 9 (etc), "his sons," עלה = עלוהי in duplicate texts (see to 11: 9), as common in Mandaic, and appearing also in the Talmud. For the 2nd per. pl. fem. כי- is used for כין-(see to 7: 3).

The masculine plural is in י- and ין- indifferently, even in close association. טוריא 8: 6 and the nouns in 13: 1 ending in יה are probably Mandaic forms of spelling, *ê*.

As for the verb, along with י as dominant prefix in the impf., נ takes its place in Nos. 6, 13 (along with two cases in י), 19, 25, 28. A Nifal with Aramaic ending appears in 25: 2, נסתרתו, along with the ppl. ניסתרין. In 28: 1 appears a Syriac Ethpai'al, נישתיחן. The ת of the reflexive is rarely lost, yet e. g. תירחקון, תיחתמון.

The 1st pers. sing. appears as קטלת or קטלית, for a verb of *i*-stem we have סליקית. There is found a perfect plural, אישתכחון, as in Syriac.

[1] Nöldeke, *Mand. Gram.*, § 25.

Second feminine plurals, which are lacking in the Talmud, are found; unfortunately as the notes show, it is not always possible to decide whether a form is singular or plural, and there is the awkward confusion of ן- and ין-. In 6: 9 תיתכבשון is certainly plural, and doubtless the masculine plural termination (as in Hebrew) is to be understood in preference to *-in,* which would be the singular. It is uncertain whether שקוכי, 11: 8, 26: 6, is fem. singular or plural; in the duplicate text to No. 11, the plural is evident.

For the few cases of the quiescence of ע in verbal forms, see above. In פ"א roots we have, e. g., אתאסרו, תיתסי. Unique is the final loss of the ל of אזל in the participal form אזינא, 6: 6. For forms of הוא we have תיהוי, תיהי (both in the same text), spelt elsewhere תהוי, תהי. The masc. plural of the participle appears as הון, הוי; cf. מחן, רמן, from מחא, רמא.

As to the prepositions there is the interchange of ל and על, as in Mandaic. Also observe the occurrence in the same line of קדמוהי and קדאמיה, 3: 7.

There is almost nothing peculiar in the syntax. I note the occurrence of an old-Aramaic idiom in ביתלהון, "their house," 1: 6; also the unique idiom, if the text is correct,— ו- ועים, "and also," 1: 3 (cf. Latin, *simul ac*).

[8] See Levias, *Grammar of the Aramaic Idiom Contained in the Bab. Talmud,* § 188.

§ 6. The Syriac Texts

In our collection appear seven bowls of Syriac script and language,—the first of this category to be published with the exception of the poor facsimile of a probably similar bowl, accompanied with an unintelligible transliteration, in Layard, *Nineveh and Babylon*, p. 521 f.[1]

A. Script and Orthoepy

The script reveals itself as belonging to the Palmyrene-Syriac type, and that we are dealing not with a mere autographic "sport" is clear from the fact that two or three hands have written our seven texts. It agrees with the Palmyrene and Edessene in pointing ר, and with the former in not distinguishing ד. The Seyâmê or double points are used; this mark is generally written on the last letter, but occasionally, generally for reasons of space, on an earlier character. Once the two points are written vertically, 33: 5; they may include the points of ר, and in 34: 6 ר appears to have the two points one above and one below. The script provides the pronominal fem. suffix ה with an upper point, an ancient distinction in literary Syriac.[2] But there is marked distinction from the Edessene type in the absence of ligature; letters may touch one another, but they are not purposely written together.

In examining the individual characters (see my Alphabetic Tables) we find that נ, ז, ח, ע agree with the types of the Estrangelo alphabet, and ב and מ approximate the latter; but evidently our novel alphabet has had a history independent of Estrangelo.

[1] Chwolson thinks that the script of this bowl is of older type than that of the Edessene MS. of 411 (*CIH*, col. 116).

[2] In 34: 4 מושא, "Moses," is written with a point over א —to represent the *ê* sound?

It reveals a family likeness with the types found in early Edessene inscriptions[3] (where the characters are independent and no points used). But the genealogy for the peculiarities of our script is to be found in the cursive Palmyrene script, with which the Estrangelo is also to be connected. See Euting's alphabetic tables, cols. 17-28, in Chwolson *CIH;* his tables in Nöldeke, *Syrische Grammatik;* the atlas to Lidzbarski's *Handbuch z. nordsem. Epigraphik,* and for the history of the cursive Edessene script, the latter work, p. 193.

This relationship appears in ב (n. b. the curving stroke of the head); in ה (the type in No. 36 is identical with the Palmyrene); in ו (with the head at almost a right angle); in ח (our character is practically identical with the Estrangelo, but the origin of the type is to be found in Palmyrene, and a type in No. 32 is the replica of the angular form presented by Euting, col. 26); in מ; in י reduced to a small stroke or coarse round mark on the line; in ל (with parallels in Euting's table only in cursive Palmyrene, see cols. 24-28); in מ, which tends to a closed figure, and ם; in פ (a small half-oval figure, primitive in form, corresponding most closely to the cursive Palmyrene); in ק; in ש (preserving the ancient type against the Edessene development). צ is not found.

Of the remaining letters, ר is distinguished from ד by the diacritical point as in Palmyrene, but the figure of both characters faces to the right, a unique phenomenon. The character כ is unique, with its long curve extending far to the left, so that this feature becomes the characteristic and the head degenerates to a point;[4] but here again the Palmyrene type may be compared. The letter נ is *sui generis,* the medial character may be related to the Palmyrene; the finial with its long stroke recalls the Estrangelo finial ג, but terminates in a fork. ת also stands by itself. There is a general resemblance between it and the Syriac types presented by Euting, in Nöldeke, cols. viii-xiii, representing the fifth to the seventh century. But those Syriac forms have arisen from the tendency to ligature, whereas our ת is innocent of any such purpose. I am inclined to think

[3] E. g. Sachau, "Edessenische Inschriften," *ZDMG,* 1882, 142; n. b. no. 8.

[4] The nearest approach to this type appears in a similar character with a long tail in the Syriac MS. from Turkestan published by Sachau in the *Sitzungsberichte* of the Berlin Academy, 1905, 964.

that it is to be related to a rather primitive form of ת which consisted of a downward stroke to the left with a crosspiece near the top. Our type has simply reversed this, making the stroke downwards to the right, while the crosspiece comes at the bottom.

This analysis of the script presented in our Syriac bowls exhibits accordingly an older type than the literary Estrangelo and the Edessene inscriptions; its most pronounced relationships are with the cursive Palmyrene, and it is to be regarded as an independent sister of the Edessene script. Withal no character shows a distinctly late type.

Epigraphically then this script is of much interest, as exhibiting an early local form of Aramaic alphabet, of Palmyrene type, existing in Babylonia. It may have been a commercial script which spread from the metropolis Palmyra.[5] In § 14 the age of the bowls will be discussed; the script itself does not stand in the way of an early age, perhaps the fourth century, though other evidence may induce us to date the texts some centuries later.

Since the above paragraphs were finished and regarded as closed, my attention has chanced upon the Turkish Manichaean fragments from Turfan in Chinese Turkestan, and I find a striking resemblance in many characters of the alphabet there used (which is an offshoot of the Syriac script) to those of the Syriac type before us. I may refer here to the discussion of the script by F. W. K. Müller in the *Sitzungsberichte* of the Berlin Academy, 1904, 348 ff., and the facsimiles published in subsequent volumes of the same journal, e. g. that facing p. 1077, in the volume for 1905. In my Alphabetic Tables at the end of this work I shall present the correspondence in parallelism. The Turkish script is very much younger than ours, but has steadfastly preserved the type inherited from Babylonia. Mani came from Babylon, a few miles distant from Nippur, and we must suppose that our script was the local use of that region, which came to be adopted by Mani and his sect as the vehicle of their literature.

[5] It may be worth while to suggest that we possess in this peculiar script the script of the Harranian pagans, vulgarly known as the Sabians. As Chwolson has shown in his monumental work, *Die Ssabier und der Ssabismus*, these heathens spoke a pure Syriac (i, 258 f.), although the peculiar alphabets assigned to them by Arabic writers are fictitious or kabbalistic (ii, 845).

The history of our script is thereby carried back to the third century, by which time it was well established. What was thus a local script came to be perpetuated as the literary instrument of the Manichaean sect,—a fate which has so often happened to various forms of the Aramaic alphabet. I have given further discussion of this matter in articles now in press for the *Museum Journal* and the *Journal of the American Oriental Society*. It may be added that there are no Manichaean traces in the bowls.

In the matter of orthoepy, while the forms without *matres lectionis* abundantly appear (e. g. לילית, plural; פתנמא, etc.), *plene* writings are also frequent, e. g. מלאכא, אימא, מיתקרא, תיזה, חילמא, כאסא, etc. There also occurs at times the confusion of ה and ח, characteristic in the square Aramaic texts and in the Mandaic: ה for ח in מהילין 31: 5, תיזה 38: 3, פרהיא 32: 4; and ח for ה in אימחתהון and אבחתהון 36: 5, איתחפיך 36: 1. The same sorcerer or family appears to have written bowls in both the Rabbinic and Syriac dialects (see Nos. 33-35), and hence the natural contamination of the one by the other.

The extensive use of the *Seyâmê* in all plurals is to be noted: in the pronoun הלין 31: 5, the plural of the verb e. g. נחיין 31: 6, the participle אתין 37: 8, etc.

B. The Language

The dialect belongs to the Edessene type; this is evident from the forms of pronouns and verbs. But there is extensive corruption from the type of dialect which has been literarily preserved in the Mandaic. This appears, as we have seen, in the Mandaic confusion of ה and ח. The 3rd sing. masc. or fem. suffix to a plural appears as ה; e. g. בנה, "his sons," 33: 13 (with *Seyâmê*), the same for "her sons" (with single point over ה), עילוה (with *Seyâmê*), 37: 8, etc. We have observed the same phenomenon in the Rabbinic texts.

For other similar Mandaisms we may note: the equivalence of ל and על, 34: 10; the verbal form נעילון (from עלל), 34: 10 (see my comment); the pronoun עילוה, 37: 8; בירא for בעירא, 34: 8, cf. פורא for פוחרא; אבוכון for אובכין, 37: 10; the construct שום, e. g. 34: 6. There are also some peculiar

forms, e. g. חתומין 34: 1, משכונתא 34: 2, סוטיטא 35: 4; and a few rare or unknown words: דיאבולא (*διάβολοι*), דסתבירא, דרמנא. The numeral with the suffix תרויהון 34: 4, is not classical, but is found in Targumic, Palmyrene, and Neo-Syriac. In 33: 10 לאפקכן is Afel infinitive of נפק.

§ 7. The Mandaic Texts

A. Script and Orthoepy

The script of the Mandaic bowls is exactly similar to that of those published in facsimile by Pognon. The peculiarities of certain characters distinguishing them from those in the MSS. of the fifteenth and following centuries, as noted by that scholar (*Une incantation,* 12 f.), appear likewise in these bowls.[1]

The ב is a large letter dropping its shaft obliquely below the line and recovering itself by an up-stroke at an acute angle. נ is a zigzag figure, or has an open, round flourish at the top. Following the traditions of the early alphabet ד and ר are similar, often indistinguishable; the former tends to a smaller head and a square angle at the top, the latter to a curving form like the end of a loop. ז is ligated at the top with the preceding letter. ח has, in Nos. 39, 40, a long leg to the right. ט appears in angular form, and also in a balloon-shaped figure. כ is a large letter rising well above and dropping below the line, sometimes in a free curve. Except that the drop is vertical, it is similar to ב; we may compare the like similarity in the Palmyrene. In No. 39 ל has the primitive form of two strokes at an angle, but leaning backward, and so allowing of ligature to the left by the foot. The left foot of מ projects itself obliquely in a straight line, and the extended stroke at the top distinguishes the character from ת. In No. 39, ס has the later form, similar to the Arabic ص; with others, the body is fuller, approximating the ק. ע is generally an angle lying upon the line, but in No. 39 it drops below the line, in two rough curving lines. פ has a large head, but does not drop below the line. צ is not found in these

[1] Compare now the early Mandaic amulet published by Lidzbarski in the de Vogüé Memorial Volume, p. 349, and the editor's notes, p. 350. His facsimiles are too indistinct to permit satisfactory comparison.

bowls. ק appears as a closed figure, like a roundish Estrangelo ק, with the left stroke failing to reach the upper line and curving back—probably for distinction from ם. The ש consists of two rough loops, which lie on top, or below, or on opposite sides. The ת has often the simple form of the Hebrew ח.

The suffixal ה (which I represent by the same character in my transliteration) occurs at the beginning of No. 38, and is then dropped by the scribe; it may perhaps be intended in one or two other cases in these bowls. Otherwise it cannot be distinguished from א; however, following the general practice I have always indicated the suffix by ה. A similar uncertainty of distinction appears in Lidzbarski's amulet; in Pognon's bowls the distinction is generally preserved.

The peculiar sign for the relative, דַ, has the shape known from the MSS., except that the vertical stroke at the left hand is often written without attachment to the first part. It always appears as a separate word, as is the case in Codex B of Petermann's edition of the Ginza, and apparently in Lidzbarski's bowls. I have followed the common editorial use of attaching it, like the Aramaic relative in general, to the following word. See the arguments of Nöldeke, *Mand. Gram.*, 92, for regarding the sign as a peculiar development of ד, not as a ligature of די. But it must be asked why such a special sign should have been used. It appears to be a survival of the older Aramaic די, and I would argue that the pronunciation *di* had survived until the formation of the Mandaic script. In these texts, as in the MSS., the relative when internal (e. g. after ו) is expressed by ד; but this does not prove that דַ = ד, only that with the support of a preceding vowel the vowel of the relative was rejected.

The characters are spaced unevenly and in the case of unligated characters it is often difficult to ascertain with which word they are to be combined. The ligation is haphazard, there is no consistent attempt at consecutive chirography as in the later texts.

Apart from the bowl-inscriptions and Lidzbarski's amulets, all the Mandaic texts are preserved in late texts; the former are therefore important as the earliest monuments of the script. In § 14 I give evidence to prove that the Nippur texts are to be dated *circa* 600; at that period then the Mandaeans had elaborated their own alphabet with its peculiarities.

Investigations, which I may not expatiate on here, have led me to the belief that for the most part the Mandaic alphabet represents an early type of the "Syriac" alphabets; it is indeed often closely connected with the Palmyrene and Nabataean scripts. The sect itself must have arisen in the age when Gnosticism was rife in the Orient and before the domination of Christianity, and we have to suppose that it early developed its own peculiar calligraphy, after the wont of the various oriental sects of that age. Compare the remarks on the Manichaean alphabet, § 6.

As Pognon says of his text from Bismaya,[2] the language of the bowls is identical with that of the Ginza and Ḳulasta. The only difference is formal, in the sparse or varying use of the *matres lectionis*.[3] I may cite: חיוניאתא, תלתמא; עבוריא, עי; עמא; חיא; חתמתא, נטרתא, where later א was used in the first or second syllable or both; we actually find זרוזתא, זא, זרא.[4]

B. The Language

We may note the following syntactical peculiarity: the apparent use of the anticipatory pronominal suffix ה without the following relative particle דַּ, the suffix itself creating a kind of construct case-ending, the regimen being in apposition to the suffix. E. g. 40: 3: מנלתה פת פתה ב' "the word of B's granddaughter." A similar construction occurs throughout Nos. 21, 22, 23 (*q. v.*); also a parallel instance in the Palestinian amulet published by the writer in *JAOS*, 1911, see note there, p. 278. In 40: 24 such a "construct" form in ה is used before a plural noun: ביניאנה חיואניאתה. Was it in the way of becoming a stereotyped case?

Apart from the references to "Life," these bowls are not specifically Mandaic in religion. Pognon's bowls are much more colored with Mandaeism. Under No. 11 it is to be observed that the Mandaic text there compared is secondary to the Rabbinic texts; probably in the Nippur community the Mandaeans got their magic from the peoples of other dialects. In Pognon's texts the spirit of the ancient Babylonian magic appears more strongly than in any other of the bowl-inscriptions.

[2] *Une incantation*, 13.

[3] Which Pognon strangely enough regards as "errors."

[4] Nöldeke's expert judgment, in his review of Pognon, p. 143, that the language of the bowls is later than that of the Mandaic classics, may be noted here.

III. THE MAGIC OF THE TEXTS

§ 8. The Purpose of the Inscribed Bowls

The incantation bowls belong, with few exceptions, to one very specialized form of magic. They spontaneously suggest the art of "bowl magic," which, in various forms, is spread over the world, and which has a straight genealogy from Joseph's drinking cup to the spinster's teacup of our own day.[1] Ellis, the first commentator on the bowls, advanced the theory that, following an ancient and widespread therapeutic device, they were filled with a liquid which was drunk off by the patient who thus absorbed the virtue of the written charm.[2] This explanation has been generally given up. Layard objected that then the inscriptions would have been effaced by the liquid,[3]—which argument, though repeated by subsequent scholars, is not conclusive, for the magic vessel may have been preserved as itself a permanent prophylactic. Layard himself thought that they were used in places of sepulture and were charms for the dead, apparently relating them to the utensils placed in primitive graves. A number of Pognon's bowls are in fact endorsed with דבית קבוריא, "for the cemetery,"[4] and Wohlstein's no. 2417 appears to be directed against the ghosts of the dead. But the bowls at Nippur were found in ruined houses, and in no case is a bowl intended for the service of the dead.

Schwab argued for the hydromantic use of the bowls.[5] He makes reference to Babylonian hydromancy,[6] and proceeds to quote a number of

[1] Rodwell expatiates on this kind of magic, *TSBA*, ii, 114.

Talmudic passages referring to Joseph's cup, magical beverages, etc., but he shows no connection between his numerous inscriptions and the method and purpose of hydromancy, which affects to give an oracle to men by the movements of oil or other floating objects in the liquid contained in the cup.[7]

Wohlstein attempted another explanation in the line of a kabbalistic dictum that no work of magic can be effected without the aid of a vessel (כלי).[8] It was Hyvernat however who first, from the field of Jewish demonology, obtained the clue to the right interpretation of the practice we are considering.[9] He refers to the Jewish legends of Solomon's magical ability to confine demons in vases, etc., and the parallel fables in Arabian lore of bottled up jinns, etc.[10] As we shall immediately see, this is the correct explanation.

Pognon did not himself see *in situ* the large collection of bowls which he published in his *Inscriptions mandaites,* but he learnt from a native that such bowls were found buried just below the surface of the earth, and, generally, reversed, the bottom of the bowl uppermost, while at times bowls were found superimposed upon one another, the mouth of the one fitted to the mouth of the other (p. 1 ff.). Pognon does not guarantee the truths of these statements, but suggests in accordance with them the theory that the inverted bowls were prisons for the demons, who were confined by the virtue of the magical praxis. The expeditions of the University of Pennsylvania to Nippur have corroborated this theory by ocular evidence. Referring to the find of bowls above the Parthian temple, Hilprecht reports that "most of the one hundred bowls excavated while I was on the scene were found upside down in the ground,"[11] and he gives a photograph showing some of the bowls in this position. He draws the same conclusion as Pognon concerning the magical use of the vessels.

Finally, one of the Pennsylvania texts demonstrates that this was the conscious purpose of the bowl magic. No. 4 opens thus: מיטלי דלמיכל

[7] For the correction of his hydromantic interpretation of כשוף מומין, see above § 3.

[11] *Explorations,* 447.

מלאכין קדישין וכל רוחי בישתא וג׳: "covers to hold in sacred (accursed) angels and evil spirits," etc.[12] The same inscription announces to the demons that they are "bound and sealed in each one of the four corners of the house."[13] This magical method in fact gives a special name to the bowls; it is called a כיבשא, which literally means a "press." The same term appears in No. 6, which opens as follows: כיבשא דכבשין להון לשידי וג׳ "a press which is pressed down upon demons," etc. The theme is continued throughout the text: "This *press* I press down upon them" (l. 4); "who ever transgresses against this *press*" (l. 11), etc. In a word we have to do with a species of sympathetic magic, the inverted bowls symbolizing and effecting the repression and suppression of the evil spirits.[14]

The quadruple use of the bowls also explains the frequent recurrence of identical inscriptions, e. g. Nos. 21, 22, 23, all made out for the same client. The four charms thus placed at equidistant points, which as cornerstones represented the security of the house, formed a circle of magical influence about the dwelling.[15]

In the Babylonian magic we find a similar use of phylacteries buried under the pavement of the house. Botta, Layard and George Smith discovered under the pavement of buildings small receptacles in which were placed magical figurettes, of composite human and animal form.[16] The use of the circular lip of the bowl is also in line with the magic circle which appears to have been practised by sprinkling a circle of lime, flour, etc. around a group of small images of the gods.[17]

[12] See the commentary to the text.

[13] The binding at the four corners of the house appears also in Pognon, B, nos. 1, 2, 3, 4, 24.,

[14] If my interpretation of the introduction of Nos. 9 and 14 be correct, we have also a reference to the formal depositing of the bowls.

[15] Cf. the cylinder and prism texts deposited at the four corners of great buildings in ancient Mesopotamia.

[17] Zimmern, *Beiträge z. Kenntniss d. bab. Religion*, 169, no. 54, and cf. Thompson, *Semitic Magic*, p. lxiii, translating *uṣurtu* "circle" (Zimmern, "Gebilde"). Cf. the charm with a circle made by a ring presented in the Papyrus Anastasi, Wessely, Vienna *Denkschriften*, hist-phil. Classe, xxxvi, 2, p. 34, and further *PSBA*, xiii, 165. The circle of the magical seal possessed the same efficacy.

But there is proof that the praxis of bowl magic existed in ancient Babylonia. In a passage of the magical *Utukki* series presented by Thompson,[18] we read a ban on an evil spirit: (a demon) "which roameth loose in an upper chamber, with a bason (*kakkultu*) without opening may they cover it." The editor in his note has recognized the form of magic indicated, without comparing it to the later bowls.[19]

The bowl is then primarily a domestic phylactery, to be classed with the abundant forms of this species of magic, e. g. the Jewish Mezuzoth. An exorcism given by Wessely[20] from the papyri recalls much of the very wording of our texts: that evil spirits may not injure the wearer of these exorcisms, hide not "in the earth,"[21] nor under the bed nor under the door nor under the gate nor under the beams nor under vessels nor under holes. The lurking of devils in the house (e. g. 1: 6), in the beams and on the thresholds (e.g.6:4), frequently appears in our texts, as also in the Talmud, Especially is the threshold named as guarded against the intrusions of evil spirits (e. g. 37: 2). The means of entrance are extravagantly detailed in a Babylonian text: by gate, door, bolt, etc., lintels, hinges, etc.;[22] and door and bolt and threshold are exorcised.[23] The bedchamber is the special object of care, and the endorsement on No. 12, "of the room of the hall," may refer to a bowl which was deposited in that apartment.

A different application of the same magic is found in the bowls published by Pognon, which were found in a cemetery, many of them being inscribed "for the cemetery" (דבית קבוריא). This is the worldwide practice of laying the graveyard ghosts. I am inclined to think that duplicate inscriptions were made out, some for the house and some for the

[18] *Devils and Evil Spirits of Babylonia*, ii, 124.

[19] I must leave it open whether the phrase in *B. Meṣ.* 29b (= *Ḥull.* 84b), כסא דחרשין ולא כסא דמשרין (the last word is variously spelt), is a reference to our magical art; it could be translated "the cup of the sorcerers and not the cup of those who break sorcery," i. e. of bowls used for malicious (cf. § 12) or for preventive magic. *Tanḥuma* makes the second cup mean an ill-prepared brew which is ground for divorce; see Levy, *Hwb.*, iv, 151a.

[20] *Denkschriften*, xlii, 2, p. 66.

[21] Was there a duplicate buried in the house?

[22] Jastrow, *Religion Babyloniens u. Assyriens*, i, 377, where the full translation is given.

[23] E. g. Tallquist, *Maqlu*, p. 93, l. 10; Thompson, *Devils*, ii, 123.

graveyard; this would explain the reference to the four corners of the house in Pognon, nos. 1, 2, etc. None of the Nippur bowls are so marked. Wohlstein's bowl no. 2417 is a detailed exorcism of ghosts.

But Nos. 13 and 28 pass from prophylactic to aggressive magic; they are love charms such as we meet in an early age only in the Greek world. I leave their consideration to the commentary, and only note here that a love charm is as much a *κατάδεσμος* or *defixio,* to use the words of classical magic, as a ban of evil spirits. It is interesting to note that the Greek charms for *defixing* a rival in the circus or a lover were often buried in cemeteries, for the powers of evil were in any case invoked.[24]

The bowl itself is called simply, כסא or כוסא, also occasionally קמיעה amulet = *φυλακτήριον*, applied secondarily to a phylactery that is not suspended or worn (√ קמע).[25] For other terms applied to it as a magical instrument, see § 11.

The tradition of this species of bowl-magic has lasted down into Islam, to fairly modern times. In his *Monumens arabes, persans et turcs,* Paris, 1828, Reinaud has given (ii, 337 ff.) a careful description of several Arabic magical bowls of brass and glass, contained at his day in private French collections and at the Vatican. They are talismans (to quote one of the bowls) against snakes, scorpions and dogs, against fever, pangs of childbirth and maladies of nursing, enteric diseases, sorcery and dysentery.[26] They are introduced "in the name of the merciful and compassionate God" (cf. the similar formula in our texts, e. g. 3: 1 and note), and are elaborately provided with quotations from the Koran and with references to holy legend and the power of God (cf. § 11). One reference indicates that they were inscribed at the propitious astrological moment, cf. below, § 11.

This is the only literary reference to bowls of this character I have been able to discover. In the possession of the Hon. Mayer Sulzberger of Philadelphia is a small, finely engraved brass bowl, with Koran quotations in Nashki. The text has been translated by Dr. B. B. Charles, Fellow of

[24] E. g. the Cypriote charms published by Miss L. Macdonald, *PSBA,* xiii, 159, and the Hadrumetum tablet, discussed in No. 28.

[25] See Blau, *Das altjüdische Zauberwesen,* 87, and "Amulet" in *Jewish Encyc.*

[26] So in Schwab L and Q charms against dog-bites, and a reference to scorpions is found in Pognon B; see Glossary C, *s. v.* עקרב.

the University, who has kindly allowed me to present his rendering, as follows:

"This blessed bowl wards off all poisons, and in it are assembled tried virtues; and it is for the sting of the serpent and the scorpion, for fever, for dysentery (?), for indigestion, for the mad dog, for stomachache and colic, for headache and throbbing, for fever of the liver and spleen, for facial contortions, for lack of blood (insufficient blood supply), for annulling magic, and for the eye and the sight, and for use in giving to drink of water or oil, or for harm to enemies and for poison in the conclave of (two) lands, when the imâms of the religion and the orthodox caliphs are thereon agreed for the advantage of the Muslims."

Probably many such phylacteries are to be found in oriental households. Evidently the peculiar practice of the inversion of the bowl has disappeared; the vessel itself with its magical inscription has become "blessed," an efficient phylactery. But the use of the bowl is doubtless a survival of the magic we are discussing.

§ 9. The Exorcists

The exorcist is in general anonymous; his personality is lost in his professional possession of occult powers which range far above personal limitations. By the age of our texts he had long been differentiated from the temple priest, or maintained connection with a cult only in out-of-the-way shrines or in the new theosophic circles that sprang up in the Hellenistic age.[1] A few points however may be noted.

Several of the Nippur texts[2] contain magical formulas worked in the name of Rabbi Joshua ben Perahia (Syriac, Rab Jesus bar P.), who is none other than one of the early Zugoth or Pairs who handed down the Tradition from the Great Synagogue to later ages (see to No. 32). Whether this magical tradition concerning the venerable Joshua be authentic may be dubious;[3] but the case is illustrative of the tendency in magic to appeal to ancient great masters of sorcery, and to use their names as though their full powers were possessed. We may compare the many references in the magical papyri to such ancient masters, whose spells have become the stock in trade of their successors.[4] The assumption of these quacks is well illustrated by a Jewish mortuary charm in which the magician thus introduces himself: "With the wand of Moses and the plate of Aaron and the seal of Solomon and the shield of David and the mitre

[1] For the Babylonian *âšipu* and *mašmašu*, see Zimmern, *Beiträge*, 91; Thompson, *Semitic Magic*, 21.

[2] Nos. 8, 9, 17, 32, 33, 34.

[3] For the Talmudic doctors and others who practised "legitimate" magic, see Blau, *Das altjüdische, Zauberwesen*, 23. In 34: 2 the sorcerer claims to be a "cousin" of Joshua and there is reference to his "house," i. e. school in 8: 11. Compare the inherited magical powers of Choni the Circle-maker, *Taan.*, 19b, 23.

[4] See the list of such magical authorities in Wessely, Vienna *Denkschriften*, xxxvi, 2, p. 37; cf. xlii, 2, p. 10 (I shall hereafter refer to these volumes simply as xxxvi and xlii). Also Apuleius gives a similar list, including Moses, xc, 100, l. 10 (ed. Helm), see Abt, "Die Apologie des Apuleius," 244, in Dieterich and Wünsch, *Religionsgeschichtliche Versuche v. Vorarbeiten*, iv, 2.

of the chief priest" (I perform this spell);[5] and this Palestinian charm has its parallel in our text No. 2: "I Pabak come, clad in iron and fire, vested with garments of Hermes the Logos, and my strength is in him who created heaven and earth." In 7: 12 the authority of Prangin bar Prangin is exercised—some sorcerer of the hazy past, if not a figment of the imagination. 'The great Abbahu' in l. 9 is to be explained in the same way, if it is not a misunderstanding of a Gnostic term, and so too Barmeštael in l. 13, literally the 'son of the oracle-giver.' In some cases, e. g. the latter two and instances in No. 19, it is difficult to decide whether we have to do with men or divinities; the line was not drawn between the sorcerer and the deity, as in the Hermetic identification of Moses with Hermes[6] and in the lively incident in *Acts* 14, where the people of Lystra deify Barnabas and Paul.

In one case, the pagan text No. 36, the exorcist presents his commission from the deities: "The lord Shamash has sent me against thee, Sina (the moon) has sent me, Bel has commanded me, Nannai has said to me..... Nirig has given me power." This is the survival of well known old Babylonian formulas, e. g. the *Maḳlu* series, i, l. 52 ff:[7] "Anu and Antu have commissioned me, ... I am ordered, I go, I am sent, I speak, Against the might of my sorcerers Marduk the lord of incantation has sent me."

I am inclined to think that some of the texts, especially the more illiterate ones, were written by lay people. The "word of power" had become the essential element (see § 11), and like a physician's prescription might be copied by anyone, or even invented—for along with the belief in sorcery always goes a subconsciousness of its hocus-pocus. For instance, No. 2 is a mutual charm in which two men, in the respective halves of the text, exercise each his powers for the other. Are they

[5] Montgomery, *JAOS*, 1911, 272. For the identification with Moses cf. the Hermetic phrase, *ἐγώ εἰμι Μωσῆς*, Wessely, xxxvi, 129, l. 109 ff.; also see Dieterich, *Abraxas*, 68, and Reitzenstein, *Poimandres*, 279. For the Egyptian use, cf. the Harris papyrus, "I am Amon," Brugsch, *Religion u. Mythologie d. alt. Aegypter*, 725. Or the sorcerer may identify himself with some mighty demon; e. g. *Giṭ.*, 69a, "I am Papi Shila son of Sumka," cf. Blau, *op. cit.* 83. Also cf. 27: 9 with 2: 6.

[6] Dieterich, *l. c.*

[7] Tallquist, p. 37. Cf. the commission of the Old Testament prophets, e. g. *Jer.* i, and the adoption of soothsaying formulas; cf. *Num.* 24: 4 and *Is.* 50: 4.

professional magicians or not rather laymen who felt they could make a stronger defence against the powers of evil by standing shoulder to shoulder? The texts are often indited in the first person, e. g. Pognon 24; in No. 27 the clients of No. 7 appear as making the charm, and use the form of No. 2. But in general there is a breaking down of the distinction between personalities in magic; compare the Babylonian rituals, in which priest and suppliant appear to fuse in one another.

In one place Wohlstein calls attention to what appears to be an attestation of the incantation, inserted into the middle of the text.[8] The obscure passage is: קימא דהוא כתיב לי אנן הכא ידעינן אותו. It may be translated: "It is correct for it has been written for me (or קי = קמיעא?), we recognize it here." Cf. the attestations of the scribe in the Babylonian magical texts, e. g. the *Maḳlu* series.

[8] *ZA*, ix, 36.

§ 10. The Clients

Most of the inscriptions are of domestic character, being made out for a married couple, their children, their house, and their property, cattle, etc. Frequently it is the wife and mother who procures the charm, with or without reference to the husband. In many of the inscriptions there is special intention against the evils that disturb the domestic sexual life. And so No. 36 gives an exorcism for the bridal-chamber, No. 24 is a charm for the safe delivery of a pregnant woman. The bed-chamber is often specified (בית מישכבא). There is frequent reference to the demons that slay the unborn babes (e. g. Nos. 36, 37), the charm is often made out for the children that shall be, as well as for those that are. It would seem that where women are concerned, the greater part of magic has to do with the mysteries and maladies of the sexual life. The Lilis and Liliths which predominate in the categories of demons are personifications of sexual abnormalities.

At times the idea of the family is extended to a wider scope, so as to include a large household; No. 29 is a good example; from the long list of male names enumerated, some of them of foreigners, it appears that the woman who procured the charm was landlady of a lodging house. On the other hand sometimes a single individual feels that a whole bowl is necessary for his own maladies; so in the case of the invalid who is the client of Schwab's bowl F.

As the individuals must be exactly specified we have a rich list of names, which is enlarged by the required naming of the mother, more rarely the father of the client.[1] In the Rabbinic texts we find the Aramaic names

[1] *Shabb.* 66b: כל מנייני בשמא דאימא: "all repetitive incantations are in name of the mother." The "sacred" name of a person includes that of his mother with the Mandaeans (Brandt. *Mand. Religion,* 116). The same rule appears in the Greek magic; see Wünsch *Antike Fluchtafeln* (Lietzmann's *Kleine Texte,* no. 20), p. 9 for examples and literary references. The practice is now attributed to the original

familiar in the Talmud, etc., Persian names, probably more frequent than the former, and but few typical Jewish names. In the Syriac and Mandaic texts the names are by a large majority Persian.[2] My texts contain one evidently Greek name, אסטרובא, Astrobas, and a Christian name, בת סהדא, Martyrofilia; the former is paralleled in a text of Lidzbarski's by טימאתיוס, Timotheos, the latter by סעבריא ליעשו, 'His-hope-in-Jesus' in a text of Pognon's. Some of the names of obscure etymology may be of Indian origin; cf. the frequent name Hinduitha.

The large proportion of Persian names even in the Rabbinic texts might lead us to think that the clients were non-Jewish. The argument is somewhat fallacious as the Jews by no means stickled for their native names, in fact seem to have adopted foreign names with great avidity.[3] And so in one family of nine souls the names are Persian, and only one son bears a Jewish name (No. 12). But as we shall have reason to conclude (§ 15), the magic of our bowls is so eclectic that even a "Jewish"-Aramaic text does not imply a Jewish exorcist, nor Jewish clients. We have to think of a *clientèle* partly Jewish, partly non-Jewish, to which the religious affinities of the magic were indifferent.

But the power of the charms is also extended beyond the actual house and its inmates so as to include the whole property of the client. Not only are house and mansion detailed, but also the cattle and possessions in general (קנינא). In like manner Greek phylacteries provide a general property insurance, e. g. that the demons "shall not injure or approach N. or M. or his house or his vineyards or lands or cattle."[4]

matriarchal condition of society rather than to the elder principle, *pater incertus, mater certa.* Naming of the father probably occurs where the mother is unknown; for instances see to 10: 1.

[3] See Glossary B; also Pognon, B, p. 97.

[3] See Zunz. "Die Namen d. Juden," in his *Gesammelte Abhandlungen*, ii.

[4] Reitzenstein, *Poimandres*, 294; such charms are frequent in the Graeco-Italian exorcisms published by Pradel, in *Religionsgeschichtliche Versuche u. Vorarbeiten*, iii, no. 3. For amulets worn by cattle, see Blau, *Das altjüdische Zauberwesen*, 86.

§ 11. The Incantations.

I have discussed in § 8 the particular praxis of our magic—the inversion of the inscribed bowl. There remain for consideration many details, for elaborateness is characteristic of magic and even in our comparatively simple field there are many phenomena which are suggestive links binding it with more complicated magical science.

Magic consists of two elements: the physical operation or praxis, and the incantation, or to use the Egyptian term, "the word of power."[1] They are distinguished in the Babylonian as the *epešu "work"* (also *kikittu*[1a]), and the *šiptu,* words which appear rubrically in the magical texts. In the Greek the terms for the practice are *πρᾶγμα, πρᾶξις, χρεῖαι*; for the incantation (*ἱερὸς*) *λόγος*.[2] So in Latin *facere* is the word for the operation, and it has had an interesting history through *factura, fattura, feitigo* (Portuguese), into *fetich.*

The same distinction and similar terms are found in our magic. The root עבד, "work, serve"[3] (late Hebrew עשה (cf. 14: 1), מעשה) is used of the practice.[4] It is the common root also for the service, the worship of the gods in West-Semitic, and this fact illustrates the parity, often equivalence of religion and magic. Hence the technical terms עבדא (*'ăbâdâ*), עובדא

[1] Budge, *Egyptian Magic,* 26 f.

[1a] E. g. in the Labartu texts, Myhrman, *ZA,* xvi, 141.

[2] For the first two words see indexes in Wessely's two volumes in the *Denkschriften;* for *χρεῖα* , Dieterich *Abraxas,* pp. 136, 160. All three words occur close together in Dieterich's text p. 204 f. For *τελετή* (Dieterich, p. 136) = the אשלמתא of our texts, see § 12.

[3] Cf. Latin, *colo, cultus.* This Hebrew-Aramaic root is more religious than *epešu,* etc., with its idea of service. N. b. Arabic *umrâ,* used of the cult at Mecca, Wellhausen, *Skizzen,* iii, 165.

[4] A magical connotation of this root may exist in *Is.* 28: 2: לעבד עבדתו נכריה עבדתו , where the divine operation is contrasted to the magic arts of the necromancers.

(*'ubbâdâ*), עבודא, מעבדא (*ma'bâdâ*), occurring frequently in the bowls, and in such expressions as עבידנא עבדא (9: 2), and עבודא דעביד הוהו.[5]

The spoken *Word* is represented by מלתא, מילין, "words," etc., also technically by קריתא, once בת קל דקריא 16: 10, = the Greek *ἐπίκλησις* (also *κλῆσις*) used both in magic arts and also in the Christian liturgy (in baptism, eucharist, exorcisms),[6] though as we shall see, most of these words came to be regarded as part of black magic and were avoided by our exorcists. The incantation as written is called a כתיבתא and by the unique word *dastabîra*,[7] and also a רזא, "mystery," 3: 1.[8]

A very large number of terms is used to express different practices and *nuances* of magic, but most of them only in the lists of dreaded black magic (see § 12), and hence they are avoided by our exorcists.[9] The exorcist gives himself none of the technical names, e. g. from the roots כשף, אשף; he speaks of his עבודא, but מעבדא is avoided. His adjuration is a מומיתא, the Babylonian *mamîtu, "ban,"* and he employs the corresponding verb מומינא; a more frequent equivalent is שבע, Afel. Once he uses the root אשף: אשישפנא באישפא דימא, 2: 3. But his favorite terminology for his own practice is derived from אסר, "bind," exactly equivalent to the Greek *καταδεῖν*, Latin *defigere;* the charm is an איסרא, איסורא. Also the synonymous roots are used less frequently: צור, קטר, יסר, מסר, מצר, פכר, חבר. The last root is used of magical practices in this sense in the Old Testament,[10] where also the obscure בסחות, *Eze.* 13: 18, is probably from a Babylonian root of like import.[11] In the Babylonian the "binding" power of magic is as prominent as in the western magic; I cite such passages as

[5] For מעבדין and the Syriac use see Nöldeke, *Z. f. d. Keils.-forsch.*, iii, 296, and Fränkel, *ZA*, ix, 308. A frequent attributive is תקיף.

[6] After summing up the various terms used for exorcism Heitmüller concludes, in his *"Im Namen Jesu,"* p. 212: "Der Ausdruck *κατ' ἐξοχήν* ist *ἐπικαλεῖσθαι τὸ ὄνομα*. Our word קריתא is the liturgical equivalent in the Syriac for *epiklesis*.

[7] See 32: 4, and Kent's discussion in *JAOS*, 1911, 359.

[8] The original use of this word (= *τελετή*) appears in its designation of black arts; see § 12.

[9] Cf. the modern fine distinctions between magic, sorcery, witchcraft, etc.

[10] See Davies, *Magic Divination and Demonology*, 55, as against W. R. Smith's view in *Journ. of Philology*, xiv, 123.

[11] Friedr. Delitzsch, in Baer and Delitzsch' text, p. xiii.

the *Maḳlu*-series iv, l. 9; vii, 66, in which this idea is expressed by several synonymous verbs.

The roots בטל, Pa., "annul," גזר, "prohibit," חרם, "be in taboo," שמת "lay under ban,"[12] frequently appear. Also חתם, Peal and Pael, is frequent with the sense of sealing the demons with the magic word or device engraved on a seal—often with explicit mention of Solomon's Seal; hence the reference to the 70 seals of Solomon (Hyv.), or the seal of the house of Enoch, 19: 17, the seals of the angels of the Most High (Hyv.).[13] Our magicians will work only white magic, and their whole effort is for the אסותא,[14] *salus* of their clients.[15] The great magician Joshua b. Peraḥia is an אסיא רבא, "great healer," 17: 12 = 34: 2. In this prophylactic nature of the magic, our texts differ favorably from the western *κατάδεσμοι* and *defixiones*. The incantations largely consist in the monotonous repetitions of these equivalent roots.

As to the praxis of our magic we have little information additional to that presented in § 8.[16] From Pognon's texts we learn that the bowl was a new one (B. no. 24) and that the sorcerer sat upon an uncleft rock, a survival of primitive religion.[17]

The rude figures and designs which can hardly be said to adorn the bowls are part of the praxis. They come down from the earlier and more realistic age when gods and demons were represented by simulacra and in this wise were manipulated so as to do the sorcerer's will.[18] Most of the

[12] Stübe explains the equivalent שיפורי in his text as denominative from שופר the horn of excommunication.

[13] For sealing as equivalent to placing the magical name on the object, see Heitmüller, *op. cit*, 143, 249, etc.

[14] The charm itself is called an אסותא.—Cf. the New Testament *σώζειν. σωτηρία* is used in the papyri, e. g. Wessely, xlii, 31, l. 341.

[15] This includes their defence, מטרתא, and supernatural arming זרזתא (cf. "the panoply of God," Eph. 6: 13), and involves the breaking of counter charms and wiles of the devils: עקר, שרא, אפך, כרך, בטל, סמר, פשר, etc.; אשכב, "lay a spirit"; כבש, etc. In the Talmud פשר is the technical opposite to אסר; Blau, *op. cit.*, 157.

[16] In No. 12 is a bit of rubric for forming a figure of an angel; see the commentary. And probably at end of No. 13 occurs an aphrodisiac recipe.

[17] Cf. the unhewn altar, *Ex.* 20: 25, and for the primitive aversion to iron, see Elworthy, *The Evil Eye*, 220 ff.

[18] Budge describes how as far back as the third millennium in Egypt pictures came to be used in place of material objects in the magic of the dead (*op. cit.*, 107).

figures represent the demons, generally as bound and hobbled—i. e. רגיל, אסיר, etc., to use the words of the incantation.[19] Especially the liliths are so represented, e. g. No. 8, but also there are masculine figures like the military-looking demon, in Persian style, of No. 3. Some of the gruesome caterpillar-like designs are intended to "raise the hair" as did the demons of elder Babylonia.[20]

In one specimen, No. 15, the figure is the design of the serpent with its tail in its mouth. This is surely of Egyptian origin, doubtless through a Hellenistic medium. Such a figure is described in the "Book of Apep," of Ptolemaic compilation,[21] and prescriptions for drawing this magical figure are found in the Greek papyri.[22] Very common—so in the Syriac bowls—is a circle with a cross in it; or the circle is divided into segments with a cross in each. These signs probably represent the magical seal. There also occur rough rectangular figures divided into compartments, representing the walls of protection which magic casts about the client.[23] Wessely gives a facsimile of such a magical design:[24] a square within a square, the former being divided into three compartments; I suppose after the plan of a double-walled and many-chambered castle, indicating the protective character of the charm.

In one case, no. 8835, a cross-shaped figure may represent a dagger, and so indicate one of the magical forms of *defixio* or fastening down of the evil spirits.[25]

[19] Cf. the operation performed on the figure of the Labartu, Myhrman, *op. cit.*, 150. For Palestine, see the figurettes found in the Seleucidan debris of Tell Sandahannah, in Bliss and Macalister, *Excavations in Palestine*, 154. For Egyptian usage, e. g. Budge, *op. cit.*, 83.

[20] See the description in Myhrman, p. 148; also the seven evil Utukki, Thompson, *Devils*, tablet 16, and ii, p. 149.

[21] Budge, *op. cit.*, 79, 83.

[22] Wessely, xlii, 39 f., 69. The like design appears in a bowl depicted by Hilprecht, *Explorations*, opposite p. 447. Within the circle so formed are a number of magical figures, the most elaborate that appear in the bowls. The specimen is presumably at Constantinople.

[23] For similar sympathetic magic in old Babylonia, see Jastrow, *op. cit.*, i, 303.

[24] *Ibid.* 64.

[25] Pauly-Wissowa, *Real-Encyc.*, "Defixio," col. 2373; Thompson, *Sem. Magic*, 17. For modern instances of this kind of sorcery, see Elworthy, *The Evil Eye*, 53.

In No. 4 it is evidently the sorcerer who is depicted, waving in his hand a magic bough. This is the use we find in Babylonian magic, in which a branch of the datepalm or tamarisk was held aloft to repel the demons.[26]

One detail of universal magic appears in the praxis of our bowls: the assumption of a suitable season for the exorcism. So 6: 5: "this day out of all months, this year out of all years"; cf. the mutilated (and probably misunderstood) form of this formula in 17: 1. In Wohlstein 2422 a day is given: "If you come on the first of Nisan, go away," etc. Nisan 1 was an auspicious day for expelling demons;[27] this was probably due to the belief that the great turning points of the year, the solstices and equinoxes were times of supernatural determinations of human fate, when responsive action on the part of man was especially effective; in the Babylonian calendar Nisan 1 was the day of Destinies, the Jewish New Year's day in Tishri has the same character, and compare the magic time of midsummer night and the Christmas season in more modern superstition.[28] In old Babylonia certain days were propitious for exorcism, and they are listed, as personified, in a Šurpu text, among them the 7th, 15th, 19th, 20th, 25th, 30th, of the month.[29] We have fuller information of this notion from Egypt; papyri are preserved giving all the days in the year according to their character as propitious or unpropitious for magical rites.[30] The same use of seasons appears in the Hellenistic papyri, those continuators of Egyptian magic. Among the numerous passages I note the following: *ἐνιαυτοὺς ἐξ ἐνιαυτῶν, μῆνας ἐξ μηνῶν, ἡμέρας ἐξ ἡμερῶν, ὥρας ἐξ ὡρῶν, ὁρκίζω πάντας τοὺς*

[26] Thompson, *Devils*, p. xlix, and instances pp. 23, 111, 197. Compare the religious use of the *bareçma*, a bunch of datepalm, pomegranate or tamarisk, in the Persian religion; Spiegel, *Eranische Alterthümer*, iii, 571. Thompson in his note draws attention to our design.

[27] Wohlstein, p. 399, with references.

[28] See Carl Schmidt, *Aberglaube des Mittelalters*, 1884, 205 ff. (on *Die Tagewählerei*).

[29] Zimmern, tablet viii, 24 ff. Cf. the exorcism of a demon at full moon, in Lucian, *Philopseudes*, 16.

[30] Budge, *op. cit.*, 224 ff.; *Gods of the Egyptians*, ii, c. xix, for lists of the deities of times and seasons. The earliest appearance of this system among the Jews is the angelic calendar system in *Enoch*, 82.

δαίμονας [31] This is exactly the equivalent of the passage cited above, 6: 5: יומא הדין מיכולהון יומי וירחא הדין מיכולהון ירחי ושתא הדא מיכולהין שני ועידנא הדין מיכולהון עידני, and there can be no reasonable doubt that we have here the reminiscence of the Hellenistic formula. So again in the papyri: ἐν τῇ σήμερον ἡμέρᾳ, ἐν τῇ ἀρτι ὥρᾳ.[32] At least the later magical calendar is connected with astrology; one Greek exorcism adjures "by the God who has the power of the hour."[33] These references to an appropriate magical time are in our texts however quite conventional; we may judge that no horoscopes were cast by our sorcerers.

But the praxis is a minor part of the bowl-magic. In this it differs from the Babylonian in which the praxis was primary, the texts being illuminative of the action. The reasons for this shifting of the center of gravity I shall touch upon in § 15. In the bowls the incantation, the spell, is almost the all in all. It consisted in the utterance or writing of certain phrases, words, syllables, which possessed in themselves a magic power to bind equally the favorable powers and the demons.[34] This use of spells has gone so far that magic appears to have divorced itself from religion; the inversion of the bowl and the monotonously repeated declaration that the demons are "bound, sealed, countersealed, exorcised, hobbled, silenced," etc., e. g. Nos. 2, 4, is in itself sufficient, without invocation of, or reference to, the divine powers.

Generally however appears the formal adjuration of Deity or of deities and other favorable genii, the invocation of their name securing their assistance.[35] This may be specifically the Jewish deity, e. g. No. 14,

[31] Wessely, xxxvi, 53, l. 341 ff. My colleague Professor Heffern sagaciously notes the illumination thus cast upon the difficult reference in *Rev.* 9: 15 to the angels appointed for an hour, day, month, year; the verse is reminiscent of magical phraseology. Note also the phrase, "in a good hour and a good and auspicious day," in the Paris Magical Papyrus, l. 3000 (given by Deissmann, *Light from the Ancient East*, 251, 255).

[32] Wessely, xxxvi, 92, l. 1932 ff. = xlii, 42, l. 665 ff. N. B. the like stress laid upon "this day" in the Babylonian exorcisms, e. g. *Šurpu*-series, iv, l. 65.

[33] Wünsch, *Antike Fluchtafeln*, no. 3, l. 20.

[34] The conscious manipulation of words, phrases, pronunciations to extract their magical sense, appears in 9: 5 = 32: 6.

[35] Even as in earlier times the images of the gods were used; e. g. Fossey, *La magie assyrienne*, 315.—The magical value of the use of the name in religious rites

"in thy name YHWH"; or it may be quite indefinite as in the recurrent introductory formula, "In thy name, O Lord of healings, great Healer of love"; the same form also appears in the pagan text No. 19. I discuss under No. 3 the origin of the phrase.

There is nothing new in the adjuration of many angels[36] or deities along with the appeal to some one Name;[37] the former is the Jewish phase of polytheism, while even with polytheistic adjurations there may be recognition of "God," as in the pagan text No. 19 with its reference to "the one true God," l. 17. Noticeable is the easy passage from the invocation of celestial beings into that of mere names or words; but this illustrates the arrant nominalism into which magic had fallen, losing the religious phase of divine personality. So Abraxas is invoked—though probably here we have a very ancient divine name, inherited from Egypt.[38] Of this "the holy Agrabis" may be a perversion, 14: 2. In 7: 9, as noted in § 9, "the Great Abbahu" may be a magically deified sorcerer.[39] Many of the odd names which are invoked may be kabbalistic (gematriac, etc.) names of angels or gods (see § 13). They may soon have worn down into unintelligible words—just as Αβραξας = 365 becomes אברכים (and other forms) without reminiscence of the numerical value of the letters.[40] We have the

has been established in late years by a series of discussions from scholars working in various fields. I name: K. Nyrop, *Navnets magt* ("the power of the name"), 1887, noted and analyzed by Giesebrecht (see below); F. v. Andrian in *Correspondenzblatt d. deutsch. Gesellschaft f. Anthropologie, Ethnologie u. Urgeschichte,* xxvii (1896), 109-127; F. Giesebrecht, *Die alttestamentliche Schätzung des Gottesnamens u. ihre religionsgeschichtliche Grundlage,* Königsberg, 1901; W. Heitmüller, *'In Namen Jesu,'* Göttingen, 1903 (especially Part II). Cf. also, on the use of the name, Jacob, *"Im Namen Gottes," Vierteljahrsschrift f. Bibelkunde,* i (1903), Heft 1 seq. (which I have not seen in full); J. Boehmer, *Das biblische 'Im Namen,'* Giessen, 1898. (on the philological origins of the baptism formula); and an essay by W. Brandt, "Ὄνομα en de doopsformule in het nieuwe testament," *Theol. Tijdschrift,* 1891.

[36] For the adjuration of angels in Judaism, see Heitmüller, *op. cit.,* 176 ff.

[37] See § 13.

[38] According to Budge, *Egyptian Magic,* 180, originally the name of a form of the sungod; according to Wiedemann, *Magie u. Zauberei* (*D. Alte Orient,* vii, 4), p. 23, the Egyptians from of old worshipped as god "the Magical Formula."

[39] Cf. the early and frequent use of the name Jesus in the papyri magic; and cf. *Acts* 19: 13. For Jesus as a sorcerer in the Talmud, see Blau. *op. cit.* 29.

[40] See Pognon, *Inscr. mand.,* 107. In 34: 19 he is "mighty lord."

same unintelligent invocation of names in the magical papyri, e. g. the exorcism "in the name of Abraham, Isaac, Jacob, Jesus Chrestos, Holy Spirit."[41] This is not Jewish magic, any more than we can say that the erotic charm from Hadrumetum is Jewish in its present form with its barbarous spellings for the patriarchs: Αβρααν, Ιακου, Ισρααμ.[42] These are specimens of eclectic magic with pagan and Jewish elements, overlaid with Christian.[43] It is in this eclectic character of our texts, as in all so-called Jewish magic, that they part company from the old Babylonian magic and relate themselves to occidental conjuration.

The invocation of angelic names in Jewish magic may be regarded as in part the parallel to the pagan invocation of many deities, and in part as invocation of the infinite (personified) phases and energies of the one God.[44] Both Jewish and pagan magic agreed in requiring the accumulation of as many names of the deity or demon as possible, for fear lest no one name exhaust the potentiality of the spiritual being conjured. The aggregation of divine epithets in the Old Testament, as also in the Christian liturgy, goes back to the root-idea of the efficiency of a knowledge of all the names if possible; the fifty names of Marduk, the hundred names of Allah, are similar cases. In the Babylonian magic[45] and also in the Egyptian[46] this practice was established. For Hellenic magic may be cited the many names of Hekate, the λόγοι ἑκατίκιοι.[47] In this accumulation

[41] Wessely, xxxvi, 75, l. 1227. Cf. the list of invocations in a "Christian" amulet: Adonai, Thodonael (= Toth + Adonael), Sabaoth, Emanuel, the holy angels, etc. (Reitzenstein, *Poimandres*, 293).

[42] For the text and literature see to No. 28.

[43] I suppose the formula read originally: "in the name of the God of Abraham," etc. See Heitmüller, *op. cit.*, p. 180 for the invocation of the patriarchs, etc. Origen (*c. Cels*, iv, 35) appears to admit its efficacy.

[44] Cf. the Gaonic maxim that there are many things in which the angels are independent of God, Blau, *op. cit.*, 92; with which contrast the notion of the ephemeral existence of the angels who proceed from the *Dinûr* of God; Weber, *Jüd. Theologie*, 166, Eisenmenger, *Entdecktes Judenthum*, ii, 371—all but Michael and Gabriel according to a dictum of *Bereshith R.* (Lueken, *Michael*, 39). For the equivalent efficiency of divine and angelic names see the magical text, *The Sword of Moses*, published by Gaster, 1896.

[45] Jastrow, *Religion Babyloniens u. Assyriens*, i, 291.

[46] Budge, *op. cit.*, 171.

[47] Wünsch. *Ant. Fluchtafeln*, 6.

of divine names there lurks the uncertainty whether they are names of one being, or, as so many potencies, names of as many beings. This confusion appears in the parallel texts under No. 11, where the second (Myhrman's text) turns the three names of the Jewish God in the first into a polytheistic trinity. But except in the case of accumulated magical syllables, the "barbarous names" of Greek magic, the Deity is not in our texts given many names; this is due to the fact that the reference to the Deity is not much more than a passing compliment. However the names of the demons must be exactly known, and especially is it the Lilith who receives an extravagant accumulation of designations; she is akin to Hekate and the "Hekatian names" are showered upon her. For the demoniac names I refer to § 12.

The use of so-called kabbalistic names—letters,[48] syllables, phrases—as potent charms, may next claim our attention. The roots of this usage are many, and the origin or etymology of specific cases mostly defy explanation. The practice is rare in Babylonian magic,[49] but is common in the sorcery of ancient Egypt[50] and in its lineal descendant the Hellenistic magic,[51] and hence it was reflected to the Jewish sorcery, the Talmud abundantly illustrating the use of these *barbarica onomata*.[52] One primitive source of this usage is the mystery which is thrown about magic rites; "the wizards that squeak and gibber" (Is. 8: 19) are universal; the Babylonian priest generally whispered his formulas (cf. the title *mašmašu*); the solemn parts of Christian rites have likewise tended to inaudible pronounciation. There exists a tendency toward intentional obscuration of the formulae, which by psychological necessity would tend to even greater corruption. But magic is in its purpose a scientific exercise, and we must suppose that in general something intelligible was once expressed by the now unintelligi-

[48] For the mysticism connected with letters see Dieterich's interesting discussion, *Rhein. Mus.*, lvi, 77, "ABC—Denkmäler."

[51] See Heitmüller, *op. cit.* 197 ff.; Abt, *Apuleius*, 152. For the *Ephesia grammata*, see Kuhnert, in Pauly-Wissowa, *s. v.* (the papers of Welcker in his *Kleine Schriften*, iii, and of Wessely in *Program* of the Franz Joseph Gymn., Vienna, 1886, I have not seen).

[52] Blau, *op. cit.*, 61 f.; Grünbaum, *ZDMG*, xxxi, 269 f.

ble term. Much of the later nonsense was the survival of phrases of the lost tongue in which the charms had their rise.[53] Such a part may have been played by Sumerian phrases in later Babylonia, and the great western sorcerer Apuleius recognizes the origins of his magical lingo as *magica nomina Aegyptio vel Babyloniaco ritu,*[54] and the Hellenistic sorcerer is said to *αἰγυπτιάζειν.*

Some of the phrases are still intelligible, such as חוש, "quick" (off with you), with abundant parallels in the Babylonian and the Greek magic (the repeated *ταχύ*),[55] also brief imperatives, as זע, זח, or זה, from זעע, etc., "fly away." But the great majority of the forms are unintelligible. It is to be observed that raucous sounds, e. g. קץ (*ḳaṣ*) and especially sibilants are very frequent; in Pognon's texts ש (*sh*) is often inserted between words.[56] May we compare the hissing implied by the ancient Hebrew sorcery terms, לחש and נחש?

Many such syllables or letters are surrogates for the divine name יהוה, which especially lent itself to this treatment.[57] So we find the changes rung on this word: יה, יוה, יהו, אהעה, etc. Or abbreviations are used like the repeated א, = אדני אל אלהים;[58] in 20: 2 it is extravagantly repeated six times, in 31: 8 eight times. In יאהיהו, 31: 6, we have a play on the three vowels as in Greek magic.

Then there enters in the use of the principle of *Athbash,* in all its various forms, e. g. מצפץ (Stübe, l. 66) = יהוה. Such *prima facie* unintelligible forms themselves became corrupted in course of time; perhaps MṢ MṢ, PṢ PṢ, 14: 2, are from the former theme. Probably too the

[53] See Deissmann's remarks on the distinction between hocus-pocus and survivals of Egyptian and Babylonian magic in the vocabulary of the papyri; *Bibelstudien,* 1 ff.

[54] Abt, *Apuleius,* 152.

[55] See to 14: 4.

[56] In our texts cf. 1: 13, 3: 5, 14: 2, 25: 5, 29: 10.

[57] For extensive magical formulas based on the Name, see Nos. 3, 6, 31, 35. I give a list of these terms at the end of Glossary A.

[58] Cf. the introduction to Schwab's *Dictionnaire d'angélologie;* Blau, *op. cit.,* 117-146. Against Jewish orthodox use, our texts do not hesitate to write יהוה; cf. the Samaritan usage. In one case it is vocalized in a proper name, בריכיהביה, 36: 4, *q. v.* The reminiscence of the ancient pronunciation survived in the lower classes and certain sects, e. g. among the Samaritans, and in magic, cf. the forms Ια*βε*, etc.

principle of (mathematical) gematria may be supposed,[59] of old standing in Judaism,[60] but also found in the theosophy and current use of the Greeks.[61] The passage in 9: 5 f. which speaks of "letter out of letters, name out of names, interpretation out of interpretation," doubtless refers to the abstraction of such hidden meanings and values out of words.

In one case, 15: 4 f., occurs a rhyming "nonsense" couplet used with magical intention. For this as noticed to the passage there is one example in the Assyrian magic. Assonance of succeeding words is found, e. g. 35: 5.[62] Both assonance and rhyme are found in the western magic; e. g. *adam alam betur alam botum;*[63] and

ορθω βαυβω νοηρε κοδηρε
δυσηρε συρε συροε πανκιστη δωδεκακιστη.[64]

Rhyme appears in the lines:

τοῦτο γράφε : εἰς[65] Θυριήλ,
Μιχαήλ Γαβριήλ, Οὐριήλ,
Μισαήλ, Ἰρραήλ, Ἰστραήλ.[66]

I do not find much proof of intentional misspelling; most of the apparent cases are cleared up on inspection of the text. In fact a good deal of care is exercised in this regard (n. b. a case in 4: 4), and erroneous letters or words are often erased or repeated correctly; in form most of the texts compare favorably with the magical papyri.

[59] Schwab, I; a case in No. 42.

[60] Found by ancient tradition in Eliezer = 318; cf. *Gen.* 15: 2 and 14: 14.

[61] Deissmann, *Light from the Ancient East*, 275; Wünsch, *op. cit.*, 23.

[62] The Talmudic *shabriri briri riri ri* is different in character; the gradual peeling off of the word finally destroys the demon.

[63] See Wessely, xlii, 13, from Marcellus, xxviii, 72.

[64] Wessely, xlii, 45, l. 747, = l. 964.

[65] This identification of the angels recalls the assimilation of the gods in the famous Babylonian passage; "Ninib the Marduk of strength, Nergal the Marduk of battles," and similar astrological identifications; see A. Jeremias, *Monotheistische Strömungen*, 26.

[66] Wessely, xxxvi, 90, l. 1814 ff. For assonance and rhyme in Greek magic, see Heim, in Fleckeisen's *Jahrbücher f. classische Philologie*, Supplementband xix (1903), 544 ff.; M. C. Sutphen, "Magic in Theokritos and Vergil," in the *Studies in Honor of B. L. Gildersleeve* (Baltimore, 1902), 318; Abt, *Apologie d. Apuleius*, 154. For similar cases in our texts see 19: 18, 25: 5, 35: 5.

An important part of the Word of Power in developed magic is the use of sacred scriptures, the epics, legends of the people, and the citation of appropriate precedents. Babylonian, Egyptian, Jew, Greek, each had his thesaurus of sacred legend, which age had consecrated as veritable words of Deity and hence in themselves potent.[67] These are "the ancient runes," שירא קדמיא, of 32: 9.[68]

Early house amulets have been found in Assyria inscribed with quotations from the legend of Ura the pest-god;[69] and there are other traces of the use of epic myth in the Babylonian magic.[70] In the same way that portion of the Book of the Dead known as "The Chapters of the Coming Forth of the Day," largely consisting of myth, and the Legend of Ra and Isis, were used in Egypt as magical texts.[71] In the Greek magic we have the prophylactic and divinatory use of the Homeric verses.[72] Nor were the Jews behind their neighbors, with their fast fixed canon of sacred scripture. The book of Deuteronomy ordered or at least suggested the use of the weightiest "word" in the scriptures, the Shemá, as a phylactery to be inscribed on the hands and between the eyes (in place of totemistic tattoo-marks)[73] and on the sideposts and gates of the house (where earlier prophylactic amulets like the Babylonian had hung). Or certain passages appeared palpably appropriate, just as the Ura-legend was used as a prophylactic; so *Ps.* 91, especially v. 5 f.; or the divine *scolding* of the evil spirit, "YHWH rebuke thee, Satan," in *Zech.* 3: 2. A few of the bowls published by Schwab, G (exterior),[74] H, K, O, are mostly or largely

[67] Cf. *Is.* 55: 11.

[68] For עש, cf. ἐπωδαί, carmina, incantamenta, etc. of occidental magic. Cf. the use of the same root in Arabic; עש in *Ju.* 5: 12 has this sense.

[69] King, *ZA*, xi, 50; Fossey, *op. cit.*, 105; Jastrow, *op. cit.* i, 285; Thompson, *Sem. Magic*, 83.

[70] Jastrow, *op. cit.*, i, 363.

[71] Budge, *op. cit.* 125, 137, and p. 141 for remarks on this magic.

[72] See Heim, "Incantamenta magica graeca latina," in Fleckeisen's *Jahrbücher*, as in n. 66 and Wessely, xlii, 2 ff.

[73] Cf. *Eze.* 9: 4, *Is.* 44: 5, *Gal.* 6: 17, *Rev.* 13: 16 f., etc. The practice was continued into Talmudic times, *Sabb.* 120b, etc.; see Blau, *op. cit.*, 119.

[74] *PSBA*, xii, 327.

composed of scripture verses.[75] We find in them the Aaronic blessing, *Num.* 6: 24 ff., *Is.* 44: 25, *Cant.* 3: 7; K contains the whole of *Ps.* 121, *Ex.* 22: 18, *Cant.* 3: 7 f., *Ps.* 16: 1, 17: 8, 32: 7. O is an amalgam of *Dt.* 6: 4 and *Ps.* 91, with the first word of the former followed by the first of the latter, etc. G reads *Dt.* 29: 22 and then reverses the order of the words.[76] But these genuinely Jewish effusions are exceptional, and may be comparatively late. The Nippur bowls are marked by their lack of scriptural quotation and reference. Very frequent is "The Lord rebuke thee, Satan,"[77] at the end of the inscription. No. 26 opens with the first words of the Shemá, followed by *Num.* 9: 23 and *Zech.* 3: 2. *Num.* 9: 23 is of value as containing the root שמר, a frequent and potent theme in Jewish magic. Biblical and of good magical tradition is the use of Amen (generally twice or thrice repeated), Selah,[78] Halleluia. These are also used in Talmudic charms, e. g. *Yoma* 84a: "kanti, kanti, kaloros, Yah, Yah, YHWH, Sabaoth, Amen, Amen, Selah." The magical Halleluia recalls the probable use of Hallel-like forms in incantations.[79] These Jewish terms are not found in the Mandaic texts, in which the sectarian doxology, "Life is victorious" replaces them. In the Greek papyri *αμην* and *αλλελουια* are frequent,[80] and we have a case of syncretism such as this: *φοβηθέντα τὸ ἀμὴν καὶ τὸ ἀλλελουία καὶ τὸ εὐαγγέλιον.*[81]

But this use of scripture is not such as we should expect to find from any Jew even moderately versed in the Old Testament. The spelling is

[75] For biblical verses of prophylactic power approved by the Talmud, see Blau, *op. cit.*, 70 f., 93 f., and his article "Amulets," in *Jewish Encyc.;* also Kayser, "Gebrauch von Psalmen zu Zauberei," *ZDMG,* xlii, 456, presenting a Syriac MS. containing the Psalm verses useful in magic and divination. For the use of Psalms (especially *Ps.* 91) in the late Italian magic, see Pradel, *Griechische u. süditalienische Gebete,* 69.

[76] On this practice in Jewish magic, called מפרץ, see Blau, *op. cit.,* 85; the practice reversed the hostile charm. With the attempt at disguising the plain meaning, cf. the intentional confusion of lines in a Greek *defixio,* published in Wünsch, *Antike Fluchtafeln,* no. 4.

[77] A formula recommended in the Talmud, *Berak.* 5a.

[78] This magical use of Selah is not, I think, noticed in the several modern studies of the word. It appears also as *Σαλα* on an Abraxas gem, *Dict. d'archéologie chrétienne,* i, 144.

[79] Cf. Blau, *op. cit.,* 94 f.

[80] E. g., both together, Wessely, xlii, 28, l. 279.

[81] *Ib.* 66, l. 31.

not Massoretic, the quotations are not exact.[82] There are but two references to the supreme history of the Exodus, 14: 2, 34: 4, and the latter is confused. In the Greek papyri there is far more citation of the sacred history; cf. the "Jewish" text of the Great Magical Papyrus at Paris, published most recently by Deissmann.[83] This contains a brief summary of God's great acts for Israel, although the crossing of the Jordan precedes the passage of the Red Sea.[84] The "Judaism" of our bowls is often less than that of the papyri.[85]

There are several references to ancient myth and apocrypha, especially in the citation of great spells. So 2: 4, "the spell of the sea and the spell of the monster Leviathan"; l. 6, "the curse, etc., which fell on Mt. Hermon, Leviathan, Sodom, Gomorra"; 4: 4, "the seal with which were charmed the Seven Stars and the Seven Signs"; 10: 3, 5, "the seal with which the First Adam sealed his son Seth," or "with which Noah sealed the ark";[86] also see 34: 4 f.

All sacred and legendary history is a series of spells, just as the Babylonian epic literature is magically used, Ea or Marduk appearing as the high priest of exorcism. So also in Egypt the epic of the gods gives assurance of present magical help. "My two hands lie upon this child, the two hands of Isis lie upon him, even as Isis laid her two hands upon her son Horus." "O Isis, save me .... even as thou didst save thy son Horus."[87] And so in the Greek papyri the adjuration is often by the wonderful works of the God of Israel, which are regarded as spells; see the great Magical Papyrus.

[82] I cannot agree with Blau, p. 110, that this paraphrasing and variation in scriptural quotation was intentional; magic which perpetuated the pronunciation of the Great Name would not have hesitated at using the exact words of scripture. The quotations have often come through eclectic mediums.

[83] *Light from the Ancient East*, 250 ff.

[84] Cf. the Talmudic charm against the toothache, *Sabb.* 67a, in which portions of the pericope of the Bush were recited; Blau, *op. cit.*, 69.

[85] "Man kann den Aberglauben der Kaiserzeit nicht in die verschiedenen Kategorieen *heidnisch jüdisch und christlich* einteilen.....Der Aberglaube ist seiner Natur nach synkretistisch"; Deissmann, *Bibelstudien*, 25.

[86] Cf. "the seal which Solomon laid on the tongue of Jeremia," in the great Magical Papyrus, l. 3039, Deissmann, *Light*, p. 257; which has its parallel in the charm with which Enoch's brothers charmed him, 3: 4.

[87] Wiedemann, *Magie u. Zauberei bei den alten Aegyptern*, 1905, 22, 26.

In this connection may be noted a few passages which appear to be derived from apocryphal or kabbalistic literature, fragments snatched to decorate the lean skeleton of incantation. E. g. 8: 13: "holy angels, hosts of light in the spheres, the chariots of El-Panim before Him standing, the beasts worshipping in the fire of His throne and in the water, the cohorts of I-am-that-I-am"; 14: 3: "I adjure you by Him who lodged His Shekina in the temple of light and hail"; or the poetic description of the angels in 12: 7: "They are filled with glory who endure and keep pure since the days of eternity, and their feet are not seen in the dances by the world, and they sit and stand in their place, blowing like the blast, lightening like the lightning."—beneficent Annunaki! These passages, reminiscent both of the Apocalypse and the later kabbalistic literature, are recited with magical intent.[88] An important part of magic was the epic of the god and the praise of his glory; compare the insertion of the Hermetic Κοσμοποιία in the Leyden magical papyrus,[89] and the epic of the attack of the rebel spirits against the gods in the 16th tablet of the *Utukku* series. The story of the god's power or the praise of his glory were "words of power" against the fiends.[90]

There is a dreary monotony in these texts, yet much variation of details. After possibly an invocation, comes the name of the client and family, and then the categories of detested demons and ills. Then follow the various Names in which the spells are invoked. Noticeable is the frequent repetition of the same form, even three or more times (e. g. No. 3). This insipid use has its parallel in the κατάδεσμοι; cf. the examples in Wünsch. *op. cit.*, nos. 3, 4, 5, where with slight changes the exorcism is repeated at least three times. Multiplication increased the efficiency of the charm; it is the βαττολογία of the Gentiles (*Mt.* 6: 7). But the relig-

[88] Cf. the amulet in Reitzenstein, *Poimandres*, 294, where the ranks of the celestial hierarchy are enumerated as standing by the great and lofty Deity.

[89] Dieterich, *Abraxas*, 182. Herodotus notices the use of a theogony or divine history in the incantation of a magus (i, 132); see in general Conybeare, *JQR* ix, 93 f.

[90] Cf. Fossey, *op. cit.*, 96; and for the western magic, Wünsch, *op. cit.*, 13. Scriptural and legendary narratives are found in the Syriac charms published by Gollancz, *Actes du 11ème Congrès International des Orientalistes*, 1887, sect. iv, 77. Cf. also the similar Syriac charms published by W. H. Hazard in *JAOS*, xv (1893), 284 ff.

ious imaginativeness and poetic invention of the ancient Babylonian and Egyptian magic has disappeared. The spell, the ἱερὸς λόγος has suffered its *reductio ad absurdum,* personality human and divine is thrown out of doors.

§ 12. The Objects of Exorcism; the Demons, Etc.

The magic of the bowls is of too late an age to require here a dissertation on the rise and spread of the belief in evil spirits. Our sorcery is *fin de siècle*. When the old-world religions began to decay, and the gods that once were near to men disappeared in the political convulsions which marked the passing of ancient tribe or city and the domination of a world-empire, or suffered under the strokes of philosophy and skepticism, the spirits of ill were not banished, and the superstition that feeds on the fears of men, came to occupy the center of the stage of the spiritual drama. Nor did the rise of the great spiritual religions counteract the tremendous development of the superstition concerning the powers of evil, for they did not deny them, but recognized their existence, often regarded themselves in the negative light of prophylactics and antidotes against the great outstanding fact of evil agencies. The Persian faith was boldly dualistic and magical in its rites for overcoming the powers of ill. Jewish monotheism was too tense, and the cardinal doctrine of the one God was saved by that unfortunate, though possibly necessary, salvage from antique polytheism, in the shape of angels and devils who were nearer and more real to man than distant Deity.[1] The Christian Church followed the tuition of her mother and her pagan converts brought along with them the superstitions of the Graeco-Roman world; the doctrine of the Incarnation seemed to entail the foil of embodied demons, and diabolology entered into the formal Christian theology to an extent unknown in official Judaism.[2]

[1] Cf. Bousset, *Die Religion des Judentums im neutestamentlichen Zeitalter*, 313 ff., 326 ff.

[2] For the diabolology of the Hellenistic world, see the works of Heitmüller, Reitzenstein, Abt, Tambornino, cited in the previous section; also in general P. Wendland, *Die hellenistischrömische Kultur in ihren Beziehungen zu Judentum u. Christentum*, 1907; for Jewish and Christian demonology, see n. 35 for literature.

Our magic is a degenerate survival of the religious and magical developments of ancient Egypt and Babylonia, of the Hellenistic world, of Judaism, and in the study of its demonology, we are dealing with a mass of time-worn and banal demons, which do not promise much for fresh investigation. Nevertheless the analysis of the different kinds of demons may produce here and there a note of interest.

I have noticed above the magical efficacy ascribed to naming the names of deities and demons (§ 11).[3] Personal names for demons, it is true, are not very common; they are generally epithets or generic terms, e. g. "the Killer, the Demon, the Satan," etc. One class of demons however seems always to have enjoyed the privilege of a long list of names which it was the sorcerer's duty to know and to conjure. This is the female demon represented in the old Babylonian texts by the Labartu, in the Jewish by the Lilith, in the Greek by the Gello or Baskania. Our text No. 42 is an exorcism of the evil Lilith and its virtue consists in the knowledge it gives of her many names; I refer to that text for comparative details. Likewise the Labartu has her six (seven?) names, which are to be carefully pronounced.[4] We may also compare the accumulation of epithets attached to demons in 2: 2 f., 8: 2, 24: 13, etc., and recall a like process in the names of Satan in Rev. 9: 11, 12: 9, while Egyptian magic similarly amassed the names of the demon Apep.[5] Also for further identification of the demons the names of their parents, or even granddams are given,[6] for every specification enhances the power of the name. Also the personal description is efficacious, for this indicates that the sorcerer knows exactly whom he is exorcising. Such magical descriptions sometimes rise to almost epic tones, as in the delineation of the Seven Spirits in the Babylonian *Utukki*-series.[7] A reminiscence of these hair-raising pictures appears in the Mandaic bowls published by Pognon and Lidzbarski, in which

[3] Cf. also Origen, *C. Celsum*, i, 24 f., v, 45 f., and the summary of his argument given by Conybeare, *JQR*, ix, 65 f.

[4] See the opening of the Labartu texts as published by Myhrman, *ZA*, xvi, 154; cf. a similar text on an amulet published by Weissbach, *Bab. Miscellen*, 44.

[5] Budge, *Egyptian Magic*, 171.

[6] See below under (1)b.

[7] Thompson, *Devils and Evil Spirits of Babylonia*, i, 51.

the hurtling, scolding, fighting of the Lilith-witches is depicted in uncanny terms. But in general our texts do not extend much beyond the mere registration of categories; this decadent sorcery made up for the lack of poetical imagination by a mathematical tabulation. Superstition in order to be comprehensive encyclopaedically accumulated all the terms of evil; not only the inherited demoniac categories, but all which new races and faiths had to offer were gladly accepted. Hence in our texts the naming of the devils and ills results in the registration of an indefinite number of species.

An analysis of our general category may start from a threefold division, namely: (1) evil spirits, in the strict sense of the term, as personal beings; (2) evil agencies, especially the species of black magic, which have been potentized into almost personal existence; (3) natural evils, especially physical maladies, but also such mental and moral affections as loss, shame, etc.—which are regarded as instigated by demons, or as themselves evils with personality, although often the demoniac element is vague.

This is the order we find generally in our present texts. And it is antique. It appears in the Babylonian, e. g. in a text where the several evil spirits are named (Utukki, etc.), then "the enchantments, sorceries, witchcrafts," then "sickness."[8] All the three categories do not so often appear in the Babylonian magic, more frequently those under (2) and (3) are paired, but here again we find the same order—the bans (*mamîtu*) and then the various human ills.[9] This order appears also on the whole in the Byzantine charms published by Vassiliev:[10] *τὰ ἀκάθαρτα πνεύματα, ἢ βασκανία ἢ φαρμακεία ἢ φοβερισμὸς ἢ φρίκη ἢ πυρετὸς ἢ ἐπίβουλον ἢ συνάντημα πονηρὸν ἢ νοσηρὸν ἢ κωφὸν ἢ τυφλὸν,*— and so on with a list of diseases. Compare a papyrus list, in which are all celestial and terrestial spirits, sins, dreams, bans, witchcraft.[11]

This is the natural order of the evolution of magic: first the animistic fear of demons, then the opposition to mortals who have bound the evil spirits to their malicious purpose, finally the more exact diagnosis of the maladies which are specified in secular terms. At the end of the develop-

[8] Fossey, *La magie assyrienne*, 161.

[9] E. g. *Šurpu*-series, v, l. 55 ff., Zimmern, *Beiträge z. Kenntniss d. babylon. Religion*, 23.

[10] *Anecdota graeco-byzantina*, i, 332.

[11] Wessely, Vienna phil.-hist. *Denkschriften*, xxxvi, 81, l. 1443.

ment this last category may alone remain, as in the Babylonian medical texts or the modern Jewish and Arabic charms. It may here be remarked that the never-ending enlargement of categories of evil spirits, apart from eclectic causes, may be due to Persian influence, although hardly any of the details can be traced to that source.

(1)

(a) The most honorable place in the first division is to be assigned to the ancient gods and the spirits still haunting their temples, which the development of religion and especially the monotheistic trend had depotentized and turned into demons. The religion of yesterday becomes the superstition of to-day. Polytheism died hard. Even with the triumph of the One God in the Old Testament, there survived the belief in the many deities who appear as lieutenants of Yahwe, the בני האלהים (Job, 1), as capable of disobedience and subject to divine wrath (*Gen.* 6: 1 ff., *Ps.* 82), as the planetary spirits (*Dt.* 32: 8 [Greek], *Is.* 24: 21 ff.), as angels,—a more thoroughgoing assimilation with monotheism, though the angels at first have an independence and sovereignty recalling the Sons of God (e. g. *Dan.* 10: 13, 21, and Satan), or finally as evil spirits. The supreme declaration of Second Isaiah that the gods are naught and nothing, unfortunately was not sustained, and even onetime beneficent gods, when banished, returned as demons to vex the faithful. A classic expression of this demonology is found in Paul: "the things which the Gentiles sacrifice, they sacrifice to demons (*δαιμονίοις*,) and not to God" (I *Cor.* 10: 20).[12] The fullest development of this theory is found in Mandaism, where the ancient spirits of the planets have become the chief devils. So also Mohammed reduced the pagan gods to Jinns.

These discarded deities may therefore head the list of evil potencies, and so we find in 38: 8: "Charmed be all gods (אלהיא)[13] and temple-spirits and shrine-spirits and idol-spirits and goddesses (עסתראתא)." The old proper name of the goddess Ištar had already in the Assyrian become a common

[12] So אלילים had become *δαιμόνια* in the Septuagint, and cf. *Baruch* 4: 7: *προσκυνεῖν τὰ δαιμόνια καὶ τὰ εἰδωλα* (also *Rev.* 9: 20).

[13] Cf. the Babylonian *ilâni limnûti.*

name of goddesses in general (*ištarâti*).[14] In the heathen text No. 19 we learn of the sixty gods and the eighty goddesses (l. 8); the former figure is a survival of the ancient sacred number for the fulness of deity, hence the number of Anu;[15] the "eighty" is merely cumulative.[16] Once the rare feminine אלהתא (in the Syriac, Pesh., etc.) is found, used of a female spirit (Wohlstein, 2417: 5).[17]

Probably it is under Mandaic influence that we find the planets regarded as baneful spirits; n. b. the old myth of their fall cited in 4: 6 and the charms against sun, moon, stars, planets, 34: 6. For other demons of Mandaic origin[18] see Pognon's list, *Inscriptions Mandaites*, 93; to these may be added from Ellis 1: 3 נירינ, the Mandaic form of Nergal = the unlucky planet Mars, and אבטור,[19] who here is transformed into an evil genius.[20]

Under this head there is one interesting species, that of demons which are the spirits of the pagan shrines and simulacra, and so are regarded as haunting them.[21] Again the forceful protest of Second Isaiah, of *Ps.* 115,

[14] So *ilâni u. ištarâti*, *KAT*[2], 180. Cf. Heb. עשתרת צאן, *Dt.* 7: 13, etc., of ewes. Also n. b. *Ju.* 2: 13, with Moore's comment.

[15] For the survival of this mystical number in Judaism, see Grünbaum, *Zeits. f. Keilschr.-forsch.*, ii, 222. A list of 50 gods is given in one Babylonian hymn, see Reisner, *Sumerisch-babylonische Hymnen*, no. iv, l. 152 ff.; cf. the *Šurpu*-series (Zimmern, *Beiträge*), no. iv, l. 68 ff., viii, 1 ff. Sometimes the number alone (6, 10, 15, 60) sufficed by way of abbreviation; Jastrow, *Rel. Bab. u. Ass.*, i, 289. In No. 38 are mentioned the 360 broods of evil spirits; cf. the 366 Uthras in the Mandaic religion and the 360 gods which Islamic tradition claimed were housed at Mecca. According to *Pesaḥ.* 111b, seq., a service tree near a city has not less than 60 demons in it.

[16] According to old Semitic use, cf. *Mic.* 5: 4, *Prov.* 30: 15 ff. N. B. "the 7 sealers and the 8 brothers" in the Mandaic amulet published by Lidzbarski in the *Florilegium* to de Vogüé (l. 7 f.). Cf. 19: 4.

[17] I find אלהת in Sayce-Cowley's Elephantine papyri, and two Nabataean inscriptions, see Lidzbarski's glossary; also notice the Arabian goddess al-Lât, = the Babylonian Allât, goddess of the nether-world. For occurrence of אלת in Phoenician, see Baethgen, *Beiträge*, 58 f.

[18] See Brandt, *Mandäische Religion*, 43, n. 2.

[19] Brandt, *ib.*, 51, 199; *Mand. Schriften*, 184.

[20] For a list of these planetary spirits in the Mandaic cf. Lidzbarski's amulet just cited, l. 247 ff.

[21] Cf. Origen, *C. Celsum*, vii, 35 and 64: the localities especially haunted by the demons are temples and shrines where they can enjoy the incense, blood, etc. Also

the satire of Bel and the Dragon, had failed; there was a virtue in the cults and sanctuaries of the old religions. So the *êkûrê* appear in our bowls, as in the Mandaic books,[22] as established deities. The word *ekurru*, once the name for a temple had already in the Assyrian become applied to deities, *ekurrâti*.[23] The temples themselves were personified and practically deified;[24] later superstition retained the idea by regarding the *êkûrê* as the gods of the temples, and so as gods in general; e. g. Lidz., iv: בשום שיתין עבוריא זיכריא, where as the number 60 shows, עבוריא = אלהיא (cf. 19: 8).[25] Of like character are the פתכרי, or פתיכרי, = פאתיכרי (once, in Schwab Q: 5 פתקרי),[26] properly "images, idols," but used at large of gods in general; e. g. we read of "invocations of the gods, פ', and the goddesses."[27] There are פ' of the upper, lower and middle regions.[28] In some of the lists they appear rather far down; e. g. 5: 2, שידי ודיוי ואסרי ופ' ונידרא; cf. the Mandaic passage, quoted from the Ginza, in Pognon B, p. 75, where they occur after the demons, devils, spirits, amulets, liliths, being thus much reduced in grade. Levy translates the word by *Gespenster*;[29] in the eclectic magic of the time the word may have come to be identified with *εἴδωλον*, = both phantasm or ghost, and idol.[30] There is the distinction

in the Talmud the reality of oracles at those shrines is admitted, although explained apologetically; see the argument in *Aboda Z.* 55a, cited by Joel, *Der Aberglaube*, i, p. 86. Cf. I *Cor.* 10: 28.

[22] Brandt, *Mand. Schriften*, 81.

[23] Delitzsch, *Ass. Hwb.*, 21.

[24] Reisner, *Sum.-bab. Hymnen*, iv, l. 165; Jastrow, *op. cit.*, i, 282. *Beth-el* appears in the same use in West Semitic: the god Bait-ilê, *KAT*[2], 437 f., the name Bethel-shar-ezer, *Zech.* 7: 21 and now the many similar names in the new Elephantine papyri published by Sachau.

[25] The word also survived in its original sense, e. g. Pognon, B, no. 13.

[26] For the form, see Nöldeke, *Mand. Gram.*, § 25.

[27] 2: 7, Lidz. 4, Wohls. 2422: 5.

[28] Pogn. B, no. 25, er.d.

[29] *ZDMG*, ix, 467, n. 5.

[30] The Persian word was early introduced into the occident. According to one MS. and Symmachus's testimony (margin of Cod. Marchalianus) *παταχρα* (+ *ειδωλα* as gloss) translates the אלהיו of *Is.* 8: 21, where the unintelligible *πατρια* is generally found. See Nestle in *Transactions of the IXth International Congress of Orientalists*, (1892), ii, 58.

between male and female פ׳ : פתכרי ופתכרתא and פתכרתרין נוקבתא (Schwab I).[30a]

I am inclined to associate with these *patkâras* the פריכיא of 38: 8 and 40: 19, where they are listed between the עבוריא and פתיכריא or the עבוריא and עיסתראתא. The word would then mean "shrine-spirits" (Syriac *p^erakkâ*, Ass. *parakku*). The change of the first vowel (*a* to *i*) is possible.[31] But another etymology may be proposed—from the Persian *pairīkâ* = Pahlavi *parîk* (the modern Persian Perî).[32] These creatures are described as beautiful seductive witches, are connected with comets, and also according to de Harlez are companions of certain genii invoked by magicians. Philologically, this would be the most fitting etymology for our word; but its precedence in the lists indicates a higher rank than that assigned to the little known (so Spiegel) and insignificant Pairîkas.

For the false gods also appears טעתא ,טעותא (sing. טעו), = "error," —used like אליל, etc. in the Old Testament.

(b) I pass now to those groups of demons which immemorially had stood as the evil spirits *par excellence*. Like the *utukki* of the Babylonian religion[33] they mostly appear in tribal groups, without personal distinction. Most constant among these classes are the דיוין and שידין, which may be expressed by "devils and demons," with as much or as little of a definite idea as these English words convey to us. The שדים occur in the Old Testament, the word having an obscure history in connection with the Assyrian *šêdu;* in function the שד is the Babylonian *šêdu limnu*, "evil *šêdu*."[34] In the later Jewish demonology the שידין are the hobgoblins, the

[30a] With פ׳ = a deity or demon, cf. the use of *σῆμα*, "tomb," as grave-demon; so in a Greek amulet published by Reitzenstein, *Poimandres*, 293, and see his note 2. Also in the Syriac גניתא, "shrine" comes to mean a god, a false god, and in Peshitto of I *Sa.* 7: 3 translates עשתרות. In Islam the false gods were called *aṣnâm*, "idols."

[31] Cf. Nöldeke, *Gram. d. neu-syr. Sprache*, § 6, or *Mand. Gram.*, § 20; cf. תליתיכון, 8: 3. Or an assimilation to פתיכרא?

[32] See Spiegel, *Eranische Alterthumskunde*, ii, 138; A. V. W. Jackson in Geiger and Kuhn, *Grundriss d. iranischen Philologie*, iii, p. 665; C. de Harlez, *Manuel du Pehlevi*, 1880), *s. v.* in Glossary.

[33] See, for the Babylonian demons, Fossey, *La magie assyrienne*, c. 2; Jastrow, *Rel. Bab. u. Ass.*, i, c. xvi; Thompson, *Semitic Magic*, 43 ff.

[34] See, *inter al.*, Baudissin, *Studien z. sem. Religionsgeschichte*, ii, 131, and his art. "Feldgeister," in Hauck's *RE*[3]; H. Duhm, *Die bösen Geister im Alten Testament*,

prevailing class of demons; they are the *δαιμόνια* of the Greek, for which the Peshitto returns to the Jewish term.[35]

As Judaism has its feminine שידות, so once we find reference to the שידניאתא, 7: 14.[36] In 11: 5 = 18: 4 = Ellis 1, = Lidz. 5, we learn of a "king of demons and devils," with which compare Asmodaeus, the king of the demons.[37] But in these texts his name is given as אבונדאנא, בנדנא, which is found in 19: 10 as name of an evil deity (בר חבאל), while the plural in the same text, ll. 6, 13, has evidently the meaning demons or deities. In a broken text (Pognon B, no. 24, l. 19), a מלכא דשידיא occurs. In 29: 9 the *šêdîn* are described as בני טולא, "sons of shadow," cf. the טלני of the Targum.

The דיוין inherited a good name from the old Aryan theology (= gods), were depotentized in the Persian system, and came into Semitic currency through the Mandaic and Syriac. (The word does not occur in Targums and Talmud.[38]) In the Peshitto use of the term it appears to apply to the demons of mental and moral disorders, thus indicating something distinct from the *šêdîn*.[39]

The "spirits" or "evil spirits" (רוחין בישין, רוחא בישתא, רוח רעה — both masc. and fem.)[40] form a triad with the preceding species. Levy

49, 20; Thompson, *Semitic Magic*, 43; and the discussions by the students of Assyriological magic, Zimmern (*Beiträge* and *KAT*[3]), Tallquist, Jastrow, Fossey. Fossey, p. 50, quotes IVR 6a, 26, to the effect that the *šedu* is the demon of the evil eye—another proof that demons and their functions were interchangeable.

[35] For these and the following demoniac species in Judaism, see Eisenmenger, *Entdecktes Judentum*, ii, 408 ff.; Grünbaum, in his admirable "Beiträge z. vergleichenden Mythologie aus d. Hagada," in *ZDMG*, xxxi, — esp. 271 ff.; Weber, *Jüdische Theologie*, p. 242 ff.; Edersheim, *Life and Times of Jesus*, ii, 759 ff.; Blau, *Das altjüdische Zauberwesen*, 10 ff.; Levy, *ZDMG*, ix, 482; T. Witton Davies, *Magic, Divination, and Demonology among the Hebrews and their Neighbors* (London, n. d.); the art. "Demonology" in *Jewish Encyc.*; Conybeare, "Demonology of the New Testament," *JQR*, viii, ix; Everling, *Die paulinische Angelologie u. Dämonologie*; also v. Baudissin and H. Duhm as cited above, note 34.

[36] Cf. *δαίμονες δαιμόνισαι*, of the Leyden Papyrus, Dieterich, *Abraxas*, 194, l. 10.

[37] Also simply the king, מלכא, Eisenmenger, *op. cit.*, ii, 422 (a tradition of the "Molek" of the Old Testament?).

[38] According to Levy, not found in Jewish literature, *op. cit.*, 488.

[39] Acc. to Baudissin, *op. cit.*, 131, the Harclean version replaces שאדא of the Peshitto w. דיוא.

[40] Cf. Ellis 5: 4, זכר ונקבה.

and Blau regard them as ghosts,[41] but without warrant, as the Rabbinic, Syriac and Mandaic use of the word shows. They are the *πνεύματα πονηρά*, or *ἀκάθαρτα* of the New Testament, the equivalent of the Babylonian *utukki limnûti*. This development of רוח we may trace in the Old Testament where "a spirit of evil," "the evil spirit," appears as an agent of Jahwe; like the Satan such potencies easily passed into malicious demons.

The *Mazzîḳîn* which are prominent in Jewish lore, where they are the general category for all demons,[42] appear but seldom.

These *devils, demons* and *evil spirits* in their juxtaposition recall the several species so frequently enumerated in Babylonian demonology; e. g. as listed more than once in the *Maḳlu*-series, the *utukku, šêdu, râbiṣu, ckimmu, labartu, labaṣu, aḥḥazu,* followed by the liliths.[43] But beyond the registration of several categories there is no equivalence in name (with one exception), in definite character.[44] A certain amount of distinction can be drawn in the Babylonian field, but in our texts no differentiation exists. Indeed the three species are rather tokens of the several sources of our particular magic, the Hebrew (רוח), Babylonian (שד), Persian (דיוא). The only reference to the "seven spirits" of Babylonian magic is in connection with the מבבלתא (see below).

But it is the Liliths which enjoy the greatest individual vogue in our demonology. Many of the charms culminate in that objective; the other evil spirits are most often merely generical, anonymous, to whom the general compliment of a spell must be paid, but the Liliths are definite terrors, whose malice is specific and whose traits and names are fully known.

[41] *Opp. cit.*, p. 482, p. 14. The view that demons were ghosts of the dead indeed existed; see Justin Martyr, *Apol.*, i, c. 18 and for later Judaism, Eisenmenger, ii, 427. They may have been specialized as the spirits of demoniac possession and moral temptation (see Blau). For the relation of רוחין and *πνεύματα*, see Baudissin in Hauck's *RE*³, vi, 12 f.

[42] So Weber, Blau.

[43] Tallquist, *Die ass. Beschwörungsserie Maqlu*, 1894, no. i, l. 136, v. l. 77, N. B. just seven species.

[44] For the distinctions between the Babylonian spirits, see Jastrow, *op. cit.*, i, 278; Thompson, *Devils*, i, xxiv, *Semitic Magic*, 1, Fossey, *op. cit.*, c. 2.

The genus appears in the Babylonian incantations, as masculine and feminine, *lilu* and *lilit*, along with an *ardat lili*.[45] The two former words survived in Jewish demonology and both occur abundantly in our bowls, though the *Lîlîn* are only pendants to the Liliths. The origin of the word, whether Semitic from לֵיל = "nightmare, nighthag," etc. with Schrader, Halévy, *et al.*, or from the Sumerian *lil*, "storm," with Sayce,[46] Zimmern,[47] R. C. Thompson,[48] lies beyond my present scope. Probably as others have suggested, the resemblance of Sumerian *lil* to לֵיל, "night," may have had its part in shaping the phantom of Lilith and her troop among Semitic-speaking peoples; but I would suggest that the prime connection is not etymological but semantic: *lil* = wind = רוּחַ = spirit;[49] Lilis and Liliths are specialized forms of רוּחִין.[50]

In the Babylonian the Lilith (*ardat lili*) is the ghostly paramour of men, and her realm is the sexual sphere; hence women in their periods and at childbirth, maidens, children, are the special objects of her malice.[51] Hence in the bowl inscriptions, made out for the protection of homes and the peace of family life, most often in the name of the women concerned, it is an amulet against these noxious spirits that is particularly desired. We may say that the Lilis and Liliths are the demons of the family life.

Texts Nos. 1, 6, 8, 9, 11, 17, may be referred to especially for the Liliths. They haunt the house, 1: 6, lurk in the arches and thresholds, 6: 4, one dwells in the house concerned, 11: 5. So in the Talmud they dwell in the beams and crevices, the cesspools, etc.,[52] even as in Greek magic demons

[45] Acc. to Zimmern, *KAT*[3], 459 = paramour of *lilu*. Better Thompson. (*Devils*, etc., i, p. xxxvii, *Semitic Magic*, 65), who regards the *ardat lili* as the more specialized (e. g. marriageable) lilith, hence the original of the Jewish Lilith.

[46] Hibbert Lectures, 145.

[47] *KAT*[3], 460, n. 7.

[48] *Semitic Magic*, 66: if Semitic, from root לָלָה, "be abundant, lascivious."

[49] Cf. רוּחַ in *Job* 4: 15; the wind-draught easily passes into a ghost.

[50] The single appearance of Lilith in the Old Testament, *Is.* 34: 14, represents a more primitive stage of the fable than the Babylonian Liliths. She is just one of the spirits haunting waste ruins.

[51] See Thompson, *l. c. et seq.*, who discusses the demonology of marriages with Jinns, etc.

[52] *Jewish Encyc.*, iv, 516b.—In 29: 6 f. (cf. l. 9) occurs לִיליתָא בִישתָא וכשירָא, "the evil and the decent lilith"; this recalls the good demons of Jewish lore, שִׁידִין טוֹבִין,

are given the like habitat.[53] In No. 1 they are described as generating offspring with human folks, appearing as phantom men and women to women and men by night. Hence the interesting phenomenon of the magic *get*, divorce-writ, by which the sorcerer, like a Jewish rabbi, separates these obscene beings from their prey.[54] Especially do they vent their rage on little children as the detested offspring of human wedlock; they plague them, throttle and devour them, suck their blood (e. g. 11: 8, 18: 6, 36: 9, Lidz. 5). The name for one of these demons, in No. 36, is "Murderess daughter of Murderess," and "strangler." In the Jewish demonology the Liliths have the like fiendish character; *Bemidbar Rabba* 16 affirms that they kill children.[55] In No. 11 the Lilith is associated with the personifications of barrenness and abortion. The figure on No. 8 gives the picture of a typical obscene Lilith; she is depicted with loose tresses, one of the characteristics of the species, cf. 8: 3; cf. *Nidda* 24b, *Erub.* 100b. The later Lilith thus partakes of the nature of the elder *lilit* and of the Labartu, the enemy of children.[56]

The Liliths are intimately known, their own and their parents', even the granddam's names are given, e. g. Nos. 8, 11. At the beginning of Wohlstein's text 2416 (= Stübe) a whole brood of demons is named.[57] Especially in the case of this species most exact descriptions are given of their foul ways and apparitions,[58] for the Liliths were the most developed products of the morbid imagination—of the barren or neurotic woman,

Eisenmenger, ii, 431 f., and the good and bad *šêdu* of the Babylonian—also so the *utukku*, Fossey, *op. cit.*, 449.

[53] Wessely, xlii, 66, l. 19: they are bidden "not to hide in this earth nor under the bed or gate or beams or vessels or holes."

[54] See to 8: 7. The separation had to be legally effected, for the Lilith had her nuptial rights or powers. Cf. the tales of the female Jinns in Arabic folklore.

[55] Cited by Weber, *op. cit.*, 255. So also in the Testament of Solomon, ed. Conybeare, *JQR*, xi, 16. But not in the Talmud, according to Grünbaum, *Zeits. f. Keilschr.-Forsch.*, ii, 226.

[56] See Myhrman, *ZA*, xvi, 147 ff.

[57] See Wohlstein's note; the mother's name אימי, "little mother," throws light on a passage in *Pesaḥ.* 112a. In general these names are epithetical; cf. the demon Ahriman bar Lilit, *B. Bath.* 73a.

[58] See above.

the mother in the time of maternity, of the sleepless child.[59] Somewhat of the elder and biblical notion of the Lilith as denizen of the desert appears in the expressions בנתא דברא, לילית דברה, 17: 3, 27: 7.[60]

A further development of the Lilith is her assimilation with the witch; the descriptions of the species in the Mandaic bowls recall the uncanny scenes of the witches' nights which are the theme of still existent folklore. The Lilith is the Baskania, (i. e. witchery) of the Greek charms.[61] The epithets "cursing," and "undoing," e. g. 34: 13, belong to this phase of the Lilith-idea.

Very interesting is the similarity of the Semitic Lilith, and in course of time her assimilation to the psychological horrors which haunted men elsewhere, especially to the identical forms in the Graeco-Roman demonology. I refer to the Lamia,[62] the Empusa,[63] the Gello,[64] the Marmolyke and Gorgons, and the *incubi* and *succubae*.[65] In connection with the text No. 42 which presents the legend of the Lilith-witch, I take occasion to present the parallel forms of this conception as found in the western world. This developed myth is a later accretion to the ancient inchoate ideas of these monsters.

[59] For the psychological basis and subjective fact of these apparitions, see Roscher, "Ephialtes" c. 1, in *Abhandlungen* of the Saxon Academy of Sciences, vol. xx (1900).

[60] Cf. *ekimmu ḫarbi*, *Maḳlu*-series iv, l. 22 (Tallquist, p. 66), and the exorcism, "evil spirit to thy desert," Thompson, *Devils*, i, 152, ii, 26; cf. i, 167, 191 ff. The banning of the demons into the desert and mountains (cf. *Mt.* 12: 43) is frequent in the magical papyri, e. g. in an amulet published by Reitzenstein, *Poimandres*, 294: *ἵνα ἀπέλθατε ἐν ἀγρίοις ὄρεσιν καὶ ἐκεῖσε φυγαδευθήσετε*. Cf. Wohlstein 2422 (l. 28), "go and fall on the mountains and heights and the unclean beasts." As Wohlstein notes, the latter clause is a most interesting commentary on the anecdote of the Gadarene devils which asked the liberty to enter the swine, *Mt.* 8: 28, etc.

[61] See at length under No. 42.

[62] Daremberg and Saglio, *Dictionnaire*, *s. v.*

[63] Pauly-Wissowa, *RE*, *s. v.*

[64] For Gello as a lilith-name and as probably equal to Ass. *gallu*, see notes to No. 42.

[65] For the *incubi* see Roscher, *Ephialtes*, 60. The special demon which is the subject of this classic treatise corresponds to the male Lili of our texts, but his vogue is far more extended. He is in form goat, satyr, faun, etc., a rural as well as a domestic terror.

A long list of species of demons still remains to be considered, most of which are not much more than names. One of the most frequent and evidently most dreaded is the class of the מבכלין or מבכלתא. Once they are spoken of as the "seven מ׳ of night and day," 16: 7, recalling the Seven Spirits of Babylonian mythology.[66] Stübe (p. 59) suggests derivation from כבל, "bind," and Myhrmann (p. 350) compares Assyrian *kabâlu* used in incantations. I venture to suggest metaplasis with the Syriac לבך, "hold, seize," i. e. "take demoniac *possession* of," so that we may compare this species with the Babylonian *aḥazzu*.[67] Cf. *καταλαμβάνειν*, *Mk.* 9: 18, and the terms *κατεχόμενοι* and *κάτοχοι*. indicative of supernatural possession.[68]

There are the evil angels,[69] who are called קדישין = *sacri*, in 4: 1; the "angels of wrath and the angels of the house of assembly."[70] We read of the ראזי מלאכא, 37: 8, rites in which angels were bound to hellish operations. The word is used of pagan deities in 36: 5 (cf. 19: 13), even as *ἄγγελοι* appears in the papyri.[71] The angel of death who shudders at the Great Name appears in 3: 6, Schwab F.

"The Satan" appears and also "the Satans," as in *Enoch* (40: 7) and Rabbinic[72] and Arabic lore. There is no amplification of the doctrine of

[66] Cf. Thompson, *Semitic Magic*, 47.

[67] *Ibid.*, p. 43, etc.

[68] See Tambornino, *De antiquo daemonismo*, 56.

[69] Cf. *Mt.* 25: 41, *Rev.* 12: 7, "the devil and his angels," and the absolute use of the word in this sense in I Cor. 11: 10, with reference to the myth in Gen. 6. Blau notes, without citation, an evil spirit רוח הקדש, p. 10, n. 2. For evil angels, see Volz, *Jüdische Eschatologie*, § 23.

[70] Wohlstein 2422. The editor makes no comment on this or the parallel phrase in l. 7: איסרי דביה כנישתא. איסרי evidently equals מלאכי (see below, note 112). The "house of assembly" recalls the ancient Semitic idea of the הר מועד, *Is.* 14: 13, the assembly of the gods on the Semitic Olympus,—Walhalla having become a conventicle of demons! (Demons are located in the north by Jewish legend, *Pirḳe R. Eliezer*, iii, and other reff., in Eisenmenger, *op. cit.*, ii, 438.) Or ב׳ כ׳ = *συναγώγη*, *ἐκκλησία*, may refer to the conventicle of a magical cult (cf. "the synagogue of Satan," *Rev.* 2: 9). But the phrase is probably to be interpreted from a passage in a "Christian" amulet published by Reitzenstein, *op. cit.*, 295, top: *ὁρκίζω ὑμᾶς τὰ ἐνακόσια ἑξήκοντα πνεύματα τῆς ἐκκλησίας τοῦ πονηροῦ*.

[71] E. g. Dieterich, *Abraxas*, 192, l. 10; so also in the LXX, e. g. *Ps.* 96: 7, and an inscription cited by Cumont *Oriental Religions*, n. 38, p. 266: *diis angelis*.

[72] *Debarim R.*, c. 11: "Sammael the head of all the Satans," quoted by Weber, *Jüd. Theol.*, 253.

the individual Satan. Once with the Satans (35: 4) are associated the סוטיטא and דיאבולא, the former a class of seducing spirits (metaplasm of √ סטא ?),[73] the latter the almost unique Semitic transliteration of *διάβολοι*. In 2: 3 are mentioned the סני ובעילדבבי, the Fiends and Foes.

The זיקין[74] appear in association with the מזיקין. The Rabbinic and Syriac זיקא is a meteor, blast of wind, etc.; in the Mandaic it has the more general sense of a plague.[75] The Mandaic has inherited an old Babylonian idea of the *zaḳiḳu*, "blast," as a demon, and then death-demon.[76] The Satyrs, שעירים, appear once, 5: 4, a reminiscence, as the form shows, of the Old Testament.[77] The שחורין of Schwab G are *black* devils; cf. the title of Satan *ὁ μελάς*, in Epistle of Barnabas, 4: 9.

In Hyvernat's text occurs the phrase גינא דשלמוה, which Grünbaum most plausibly translates "the Jinn of Solomon."[78] The word would then be one of a few terms in our texts which suggest Arabic connections (see שלניתא, שיקין, below). But the reserve is to be made that, as Nöldeke maintained, the root is common-Semitic, and the spread of the word may well have antedated the Muslim Conquest. We may compare the god Gennaios cited by Cumont in Pauly-Wissowa, vii, 1174. The גנדא of 37: 6 is to be explained from the Mandaic גונדא (Syriac גודא Arabic *jund*), "troop"; devils molest their victims in bands, cf. the name "Legion" assumed by the demoniac in the Gospel, and the "tribes" (שורבתא) of demons in 38: 6; also cf. 13: 1.

[73] Cf. 1 *Tim.* 4. 1, "seducing spirits and doctrines of devils."

[74] So probably read for עקין in Hyvernat, l. 4; in 19: 13, זעקי.

[75] Norberg, *Lexidion*, 55.

[76] Muss-Arnolt, *Dict., ad voc.*, cf. the *šunu ziḳiḳu*, "roaming windblast," Thompson, *Devils*, ii, 4, l. 27. For the simile of demons to storms, see *ibid.*, i, 89, and compare the etymology of lilith (see above). For the word see 12: 8.

[77] But the idea of the hairy goatlike demon which obsesses its victim with mischievous or obscene purpose is universal. Cf. the Arabic *ifrit, azabb*, with the same root-meaning; Wellhausen, *Reste des arabischen Heidentums*, 135; Baudissin, *Studien*, i, 136. The same phenomenon is abundantly vouched for in the Greek demonology; see Roscher, *Ephialtes*, 29 f., for the goatlike form of the Ephialtes, and p. 62 for its epithet *pilosus;* and compare Pan and the Fauns. See Roscher, note 285b, for similar representations in the superstition of India. In 5: 4 the satyrs are represented as haunting a particular stretch of road.

[78] Probably to be read in 37: 10.

In 15: 6 and Myhrman l. 2 are found the ירורין. The second ר is sure in my text; Jastrow's and Levy's lexicons give the word as a variant to ירודא, "ostrich," but doubtless the former is the correct spelling;[79] the root is onomatopoetic (cf. ילל, and English "howl" and "roar"), connoting a howling creature and was applied to the ostrich—so the Tosefta (see Jastrow); but in the Targums it generally translates the Hebrew ציים, תנים, the uncanny creatures typical of desolation. In the Syriac, ירורא is jackal, translating תנים. But the Rabbinic references indicate that it was rather a fabulous than a zoological species, akin to the liliths, satyrs and vampires that haunt ruins, and this connotation appears in the Syro-hexaplar to *Is.* 34: 17, translating לילית by ירורא, while Symmachus gives λαμία.[80] This equation gives the key to our present word. The Babylonians represented their demons in uncouth shapes of birds and animals.[80a]

Besides the use of certain generic terms, such as עשמא, "oppressors," there remain several rare or obscure species: the לטבי, also לטאבי, probably metaplastic for *baṭṭâlâ*, "undoer"; the לטאנא (alongside סטאנא) No. 20, probably from root לוט "curse,"[81] or a form of the Targumic טלנא, "shade-demon." The שפטין in Hyvernat, l. 3, for which Grünbaum (p. 221) cites the Arabic *šifût, species daemonis,* is probably to be read שבטין, "plagues" (see p. 80). For the ניסי, possibly "familiar spirits," see to 6: 2.

There are also names of individual demons. Some can be identified: the חטפיתא, corresponding to the Arabic ghûl (see to 8: 2); מר a depotentized deity.[82] Some are recognizable epithets: אבדא 3: 2, מדובינא 37: 10, שרירי Schw. F. Others defy etymology: אשתקותקוף Pogn. B, דמקר 34: 10 (*q. v.* for a possible interpretation), דנחיש 3: 2, חמועית Schw. G. Long lists of such obscure names are found in Schwab F and G; these are probably on a

[79] According to Jastrow, Lagarde's editions of the Targums have everywhere this form; ילולין appears as a variant in one place.

[80] See Field's Hexapla. N. B. the interpretations of the uncanny creatures in this passage as demons by both the Greek and the Targum.

[80a] This word is to be distinguished from וריר, an eye-disease (see below); because of the uncertainty of the spelling of the two words the וירי at end of Schw. G may be the one or the other word.

[81] Cf. the Syriac שאדנא.

[82] Stübe, l. 4. See Pognon, *Inscriptions sémitiques,* 82; Clay, *Amurru,* 162.

par with the mystical names of the angels (see § 13).[83] Finally we may note the blanket-formulas for demons who are named and who are not named, and which have their parallel in the Babylonian,[84] and in the Greek magic.[85]

There are comparatively few certain references to ghosts; the רוחין, etc., as spirits of the dead, may include them.[86] One case in point is found in No. 39: "charmed the lilith that appears to her .... [in some shape]; charmed the lilith that appears to her in .... [the shape of ?] Tâtâ her niece; charmed all the defiling ghosts, דמואתא, that have entered, which appear to her in dreams of nights and visions of day." Here a definite ghostly apparition is really a diabolic delusion. Also Nos. 20, 25 contain general charms against ghosts. One technical term for ghost possibly appears, שלניתא (see to 8: 2). The last of Wohlstein's series, 2422, appears to be directed against ghosts and is an interesting example of necromantic spell. Familiar names are given to the spirits and they are cajoled to do no harm. Also in Wohlstein, no. 2422 appears the רוח בית קיברא ור' מיתו. There is constant reference to dreams (חילמא) and apparitions (דמותא, חזינא),[87] which are the *milieu* of demoniac and ghostly apparitions, cf. 7: 13; hence ח' שנושי, "disturbing dreams," in which phrase the noun is practically personified—a category of evil spirits. We have such a combination as: חראריא ושואריא וחיזוניא (Pognon A), in which חר' are impure conceptions of the night (cf. חלם in Syriac); the second word, which Pognon does not explain, is doubtless the Talmudic שוור, "leaper," exactly the Ephialtes of the Greeks, a kind of *incubus*.[88] This distinction of the dream from ghost or demon represents a later psychology. Charms against dreams are frequent in the Greek papyri; thus against ὀνείρους φρικτούς,[89]

[83] This giving of unintelligible names to demons may be in imitation of Persian diabolology; see Jackson in Geiger and Kuhn, *Grundriss d. iranischen Philologie*, iii, 659, listing 54 individual demon names.

[84] Thompson, *Devils*, i, 153.

[85] E. g. δαιμόνιον καὶ μὴ ὀνομαζόμενον, Pradel, *Griech. u. südital. Gebete*, 22, l. 2.

[86] For a typical Babylonian incantation against ghosts, see Thompson, *Devils*, i, 37.

[87] For oneirology in later Judaism, see Joel, *Der Aberglaube*, i, 103.

[88] See Roscher, *Ephialtes*, especially p. 48 f. for the etymology.

[89] Wessely, xlii, 31, top.

or a *φυλακτήριον σωματοφύλαξ πρὸς δαίμονας, πρὸς φαντάσματα, πρὸς πάσαν νόσον καὶ πάθος*;[90] another against enemies, robbers, etc. and *φόβους* and *φαντάσματα ὀνείρων*.[91] These dreams and the similar panic fears of day and night are also referred to *in extenso* in Gollancz's Syriac charms..

(2)

Respectable or "white" magic includes not merely the laying of evil spirits but counter magic[92] against the machinations of hostile sorcerers. Just so the Babylonian *Maḳlu*-series devotes itself to the rites of destroying the witch by means of simulacra which are consumed in the fire; the Greek magic has the same defensive purpose. The Mandaic texts recall somewhat of the ancient dread of witches with their description of those uncanny and obscene persons, and, as I have noted above, the witch and the lilith are practically identified.

It was most efficacious if the sorcerer were known so that he could be named and the "tables turned" upon him by casting upon him his malign arts, for no curse "returns empty." Such a case appears in Schwab G; all the evils that have fallen on the victim are bidden to fall on the head of אוסרא בר אמא. But examination of the name reveals that it is fictitious; אוסרא means "spellbinder" and אמא simply means "mother." The writer of the bowl has satisfied his client by assuming that he knows the adverse sorcerer's name. It is nothing else than the legal "John Doe." In like manner, in Wohlstein 2416, all evil works, etc., are commanded to return against their instigator.

But inasmuch as the sorcerer's names are not generally known, the incantations content themselves with listing the various kinds of magical practices and putting them under the potent spell. The *Šurpu*-series illustrates the prophylactic practice; for instance, its third tablet[93] is con-

[90] *Ib.*, 42.

[91] *Ib.*, 64. Dream-magic was highly developed among the Greeks; we have charms for sending dreams, *ὀνειροπομποί*, e. g. Dieterich, *op. cit.*, 191, l. 15. Magic is required as an antidote. Hence dreams are listed with other maleficent agencies, e. g.: *πνεύματα χθόνια, ἁμαρτίαι, ὄνειροι, ὅρκοι, βασκανία*; Wessely, xxxvi, 81, l. 81.

[92] Probably technically expressed by קיבלין.

[93] Zimmern, *Beiträge*, 13.

cerned with breaking every possible kind of ban (*mamît*) that may have befallen a person. Hence a recurring phrase in the praxis of the fifth tablet: "may the curse, the ban, the pain, the misery, the sickness, the grief, the sin, the misdeed, the impiety, the transgression, the sickness, which is in my body, be peeled off like this onion." We mark here the union of curses, etc. with evils of the flesh, just as they occur in our bowls.

Accordingly we find exorcism effected with this prudent intention against מעבדין, etc.;[93a] חרשין (+ בישין),[94] "black arts," perhaps generally with the sense of poisoning, = *φαρμακοποιία*;[95] סחריא, "sorceries," 39: 4;[96] קריתא, "invocations," (the singular קריה in 16: 10), the *ἐπικλήσεις* or *ἱεροὶ λόγοι* of maleficent magic,[97] also termed the בתקלא דק'. There are the various terms or kinds of curses, the *mamît* of the Babylonian, the *ὅρκοι* of the Greek magic; the לוטתא, especially in Pognon's Mandaic bowls, where the authors of these bans are specified, e. g. no. 15: father, mother, prostitute, foetus, laborer, master who has defrauded him, brothers; also the frequent נידרי, maleficent "vows" and the חרימא, which is the Syriac Christian equivalent of *ἀνάθεμα*, perhaps also אלתי (Wohlstein, 2426: 5).[98] This listing of the bans and their originators has its abundant parallel in the Babylonian magic; e. g. the third tablet of the *Šurpu*-series, already cited, in which all possible kinds and origins of curse are listed in 165 lines: of father, mother, grandfather, grandmother, brother, sister, etc., posterity, infant.[99] The unborn child, naturally regarded as homeless and miserable, hence a malignant wraith, is classed in the Babylonian magic

[93a] For this and following technical names for sorcery, see § 11, beginning.

[94] Cf. the Latin equivalents, *nefaria sacra, maleficia, artes nefandae, malae artes;* see Abt, *Die Apologie des Apuleius,* 30.

[95] So in the Syriac, also in 7: 13. But *φάρμακον* survived in a good sense in literature with magical tinge, e. g. in no. 30 of Bishop Serapion's prayers, "Thy name be a *φ.* for health and soundness." For an extensive discussion of the word, see Abt, *Apuleius,* 112. It is formally impossible to distinguish between the words "sorcerers" and "sorceries," except in the Mandaic. Cf. the use of the adjective חוראשא, 39: 6.

[96] For these words see the convenient summary in T. W. Davies, *Magic, Divination and Demonology among the Hebrews and their Neighbors,* 44 ff.

[97] See above, § 11. Pognon was the first correctly to interpret this term, B, p. 19.

[98] In 2: 6 we find גזירתא, שמתא, אחרמתא, used of the "white magician's" own work.

[99] A similar list in Ellis 3 = Schwab B. In the later magic these classes are listed in exorcism of the evil eye.

as in the Mandaic citation with the causes of ban, and so too the hierodule or prostitute.[100] The difference between the Babylonian *mamît* and these לוטתא is that the former has rather the sense of taboo, the latter of a malicious curse effected under foul auspices.[101]

Then there are the "names," e. g. 16: 8, שומהתא, of hostile invocations,[102] and the מילין, "words," curse formulas, including the informal imprecation. Compare "the evil word" of the witch in Babylonian magic,[103] and the current Babylonian phrase, "the evil mouth, the evil tongue, the evil lip."[104] The Talmud has the principle, "None open his mouth to Satan."[105] By a natural passage of thought the tongue and the mouth come in for exorcism, e. g.: "Bound and held be the mouth, and bound the tongue, of curses. .... Bound be the tongue in its mouth, held be its lips, shaken .... the teeth and stopped the ears of curses and invocations."[106] The binding of the tongue is a frequent element in the Greek magic; some thirty of the *κατάδεσμοι* in Wünsch's Appendix of *defixiones* to the *Corpus Inscript. Attic.* are for binding this "unruly member."[107]

Further objects of exorcism are the רזי, "mysteries," the sacramental rites of maleficent cults; the אבמרתא (Stübe, l. 2) and כמרי (Wohlstein, 2426: 5), enchantments effected by priests (כומרין).[108] A unique word in its use in the bowls is אישלמתא, found coupled with the above terms. Halévy and Wohlstein[109] compared form IV of the Arabic verb and rendered it as a delivery to evil. But it is to be compared with the Targumic אשלמו, used

[100] Jastrow, *op. cit.*, i, 367, 373.

[101] So the Greek *κατάδεσμοι*, and the Jewish collection of charms in Thompson, "Folk Lore of Mossoul," *PSBA*, xxviii-ix.

[102] Cf. the names of Hecate in the Greek *κατάδεσμοι*, e. g. Wünsch, *Antike Fluchtafeln*, no. 1.

[103] See Jastrow, *op. cit.*, i, 285.

[104] Fossey, *op. cit.*, 50, with citations.

[105] *Berak.* 19a, 60a, *Ketub.* 8b; see Joel, *Der Aberglaube*, i, 70 (but rationalizing), and Blau, *op. cit.*, 61, with Talmudic instances.

[106] L'dz., 4.

[107] Deissmann, *Light from the Ancient East*, 307. An amulet of later age (Reitzenstein, *Poimandres*, 295) analyzes the evil tongue into the lie, accusation, magic, sycophancy.

[108] So rightly Stübe; the heathen priest was, and at last appeared exclusively to be, a magician. On the second of Wünsch's *Fluchtafeln* is the design of an altar.

[109] *Comptes rendus*, IV, v, 292; *ZA*, viii, 336.

in *Targ. Jer.* to *Lev.* 8: 28, etc., in sense of dedication, = חנוך. Its counterpart is found in the Mandaic system, where the שלמאניא are the *τέλειοι*,[110] and it is the exact equivalent of the Greek *τελετή*, the (magic) rites.[111] Also the usual terms, the איסרי,[112] the קיבלי, "countercharms," the קיטרי, etc., all are listed for exorcism.

More obscure are the סתרתא (Ellis 3: 10) = "hidden arts" —with which may be possibly compared the שדרתא of Schwab R, and Wohlstein, 2426: 6.[113] Also the שיקופתא (once אשתקופתא) have aroused question. Schwab proposed שקף, "envisager," of the evil eye; Stübe, Wohlstein, Lidzbarski, connect with the root "to knock" (cf. שקף used of a Lilith, 11: 6).[114] This meaning is corroborated by the amulet of Lidzbarski's just cited, where it is parallel to חרבא and קריא (l. 11 ff +), wasting and mishap. But from its peculiar intensive form I think the word must have some connection with magic arts; cf. the modern spiritualistic knockings and rappings.

Probably the exorcism in the fragment published by Schwab, *PSBA*, xii, 299, from sin and guilt (חטאתא, אשימא), immediately after "arts" and

[110] Brandt, *Mand. Rel.*, 120, 170; *Mand. Schr.*, 8, n. 5, 36, n. 1; Nöldeke, *Mand. Gram.*, p. xxviii.

[111] Dieterich, *Abraxas*, 136. Stübe (p. 37) first offered the explanation given above. Pognon discusses an obscure phrase in his bowls פתיכרי ואשלמתאנון (B, p. 49), translating "and their adherents." Lidzbarski treating the same phrase (*Eph.* i, 94) rightly takes exception to such a form and translates, "I deliver them," which is unsatisfactory. Probably our noun is to be understood here, reading the nominal suffix ן—for the verbal ינן—. Our word may be a translation of the Greek *τελετή*; but n. b. Robertson Smith's note on the mystery idea involved in *aslama* (he might have added the Hebrew שלמים), *Rel. Sem.*, 80.

[112] Nöldeke, *Z. f. Keils.-forsch.*, ii, 299, animadverting upon Hyvernat holds that איסרא, translated "prince, angel," always means "charm." Now the parallelism in Wohlstein 2422 between איסרי דבית כנישתא, l. 7, and מלאכי דכ' כ', l. 15 (see above, n. 70), appears to approve Hyvernat, while in the Talmud א' = "genius, angel" (e. g. א' דמזוני, angel of nourishment). But Nöldeke's etymology is doubtless right; a genius to be invoked was himself called an *incantamentum*. A proof of this is found in the Mandaic amulet published by Lidzbarski in the *Florilegium* dedicated to de Vogüe, p. 349, in l. 29 f. (not understood by the editor—cf. l. 210), where Hibel Ziwa is the גטרא דכושטא, "the True Charm"; ג' = קיטרא = איסרא. Cf. the Mandaic genius "Great Mystery."

[113] Wohlstein: "böse Schickungen"; or it may be related to Assyrian *satâru, sadâru*, "write," of a written charm.

[114] So in a Babylonian text, of demons: "The man they strike, the women they hit," Fossey, *op. cit.*, 282.

"vows," with which compare the אשעם ביש in his text M 18, is exercised against practices which magically placed "sin" on the shoulders of some innocent person. Compare the symbol in Zecharia's vision of the removal of wickedness and its curse to the land of Shinar (*Zech.* 5). But there is doubtless a reminiscence here of the old Babylonian forms in which a sense of personal guilt appears in the incantations; so frequently in tablets 5 and 6 of the *Šurpu*-series, e. g. 5, l. 77 ff., where the summary is made of "the curse, the ban, the pain, the misery, the sickness, the ailment, the sin (*arni*), the misdeed (*šerti*), the offence (*ḫablati*), the transgression (*ḫiṭiti*)." The above would be the only case then of a sense of sin in our texts, but from the point of view that the sin has been inspired by a demoniac force. Heitmüller pertinently remarks:[115] "Die Sünde ist ein Art Besessenheit." And so sins are listed in the Greek objects of exorcism, e. g. *πνεύματα χθόνια, ἁμαρτίαι, ὄνειροι, ὅρκοι, βασκανίαι.*[116]

The malice (סינתיא = סנאתא) of Lidz. 4 is the enmity which magic could conjure up against an enemy, a dreaded means of revenge, and very frequent in ancient magic. Compare the Jewish charms from Mossoul having this specific object,[117] and for the Greek world the Cypriote leaden tablets published by Miss L. MacDonald,[118] in which the gods are constantly invoked to suppress the wrath and anger and power and might of the adversary.[119] A tablet to provoke such malice against an enemy is no. 2 in Wünsch's small collection.[120] The חיל ביש or חיל בישין (30: 4) is a summing up or personification of all this kind of evil potency.

Particularly dreaded were the material means of sorcery, amulets, etc., which themselves came to be personified into evil spirits. The most frequent of these objects of exorcism are the חומרי (sing. חומרתא),[121] small stones, beads, etc., carried singly, or on strings and necklaces, primarily used as amulets, but coming to possess at least in the Mandaic superstition

[115] *Op. cit.*, 307.

[116] Wessely, xxxvi, 81, l. 1443 ff. (the Paris Papyrus).

[117] Thompson, *PSBA*, xxviii, 106, 108, etc.

[118] *Ib.*, xiii, 160.

[119] Cf. the charm in Wessely, xlii, 60 f.

[120] See the editor's comment, p. 8.

[121] For their character as spirits, see Nöldeke, *Mand. Gram.*, 76.

a baneful influence.[123] We might think of the manipulation of, for instance, an opal to bring another ill-luck; but probably the objects are more obscene, joints of dead men's bones, etc. Their standing epithet is "impious,"—חי זידניתא, and we read of their "tongue," e. g. 2: 7.[123] The ענקתא, "necklace charms" are exorcised in like manner,[124] also the שיבין (15: 6, *q. v.*);[125] כיפא, "pebble," Ellis 3: 11, would belong to the same class, but it is probably to be read כוסא.

The magic bowls themselves are among the evil influences (7: 13, perhaps Ellis *l. c.*), and so the magic knots, קיטרי, 7: 13, and עיקדי (?) 34: 10. There is one reference to the magic circle of the doctors of sorcery, חזאר רבאניא,[126] and to the use of wax, קירא, both in 39: 7 (*q. v.*). The סרני of 7: 11 (*q. v.*) and the גרגלי of Pognon B, no. 27, may be explained like חזאר = circles. The זיפי of 7: 13 (*q. v.*), entered between the "arts" and "bowl," may be the hairs of the victim as used in magic.

[123] The museums of antiquities possess many such necklace charms, which are often composed of stones of the shape of a drop or an eye—prophylactic against the evil eye? See for example, the illustrations to the art. "Amuletum" in Daremberg and Saglio, *Dictionnaire des antiquités grec. et rom;* Elworthy, *The Evil Eye,* fig. 21. For the use of stones in Babylonian magic, see the 3d tablet of the *Labartu*-series and Myhrman's note thereon, *ZA,* xvi, 151; cf. Jastrow, *op. cit.,* i, 338, and Thompson, *Semitic Magic,* p. lxiii. In Syriac חומרא is also used of the joints of the vertebra = the *sappu* of the ass as prescribed in the *Labartu* texts. With this cf. the prescription of *parvum asini freni anulum in digito portandum,* Cyranides ii, 15. 6, ed. Mély and Ruelle, *Les lapidaires grecs,* Paris, 1898, quoted by Tambornino, *De ant. daemonismo,* 83. The mystical properties of stones in Egyptian lore is well known, and they were associated with the metals and planets; see Berthelot, *Les origines d'alchimie,* Paris, 1885, 47, 218 ff., etc. For the use of stones and bones as prophylactics against the evil eye, see Seligmann, *Der böse Blick,* ii, 24, 141 ff. For Hellenistic references and bibliography, see Abt, *Apuleius,* 115. Buxtorf and Levy, in their dictionaries, *s. v.,* and Grünbaum, *ZDMG,* xxxi, 263, understand these charms as pearls or corals.

[123] Cf. the *λίθος μάγνης πνέων*; see Abt, *op. cit.,* 115, 121, and n. b. the *baitulia* described as *λίθοι ἔμψυχοι* by Philo of Byblos, Eusebius, *Praep. evang.,* i, 6.

[124] Once, as though misunderstood, masculinized. אנקי, 12. 9; also אנקתא.

[125] For these articles see Krauss, *Talmudische Archäologie,* i, 203 ff.; Blau, *op. cit.,* 91.

[126] For the Babylonian ideas of the virtue of the circle, see above, § 8. Choni, the famous rainmaker in the Talmud, was called המעגל, the circle-drawer, because of his use of this device, *Taanith* 3: 8; see Blau, *op. cit.,* 33. According to Joel, *op. cit.,* i, 33, Choni was an Essene, but he appears to have stood in good repute with the orthodox.

To that very malignant potency, the Evil Eye—Nature's endowment of sorcery—there is comparatively little reference in the bowls, although in the later magic of East and West it is often the chief, if not the sole object of exorcism.[127] The longest pertinent passage in the Nippur texts is 30: 3 f.: "the eye of man or woman,[128] the eye of contumely, the eye that looks right into the heart." By the word רמאוא Pognon, B, p. 41, thinks is meant one who casts the evil eye. Or from its idea of "beckoning" may it be connected with the malicious "putting forth of the finger," e. g. *Is.* 58: 9 and cf. possibly Code Hammurabi, § 123. Grünbaum is doubtless right in holding[129] that among the Jews the evil eye was of a different character from the western Jettatura, referring rather, as also in the Old Testament (cf. also *Mt.* 20: 15), to the moral powers of envy, hatred, and so forth; the evil eye is rationalized and moralized. Wellhausen also notes the connection of the evil eye and envy in early Arabian thought.[130]

(3)

We come now to those objects of exorcism which to modern science and "common sense" appear as natural physical or psychical maladies, but which ancient thought regarded as actuated by demons, even to the extent that the malady in question was personified as an evil spirit. It is a question how far we have in this phenomenon the survival of ancient animism which peopled the universe with spirits good and evil, and how far in the *fin de siècle* magic of these bowls we have the result of a (poetical?) personification of evil which comes to be taken as real by the superstitious mind. The ancient demonology survives but it is reinforced by the hypostatizations and personifications of the play and fancy of the later mind, working sometimes in the field of a worse superstition, sometimes at the service of the free and philosophic imagination.[131] In the Old Testament the Word, the

[127] For Talmudic notions, see Blau, *Zauberwesen*, 152; Joel, *Aberglaube*, i, 74.

[128] A Palestinian amulet published by the writer in *JAOS*, 1911, 281: "from the eye of his father, mother, women, men, virgins .... ailment and shame and spirit and demons."

[129] *ZDMG*, xxxi, 260 f.

[130] *Reste arab. Heid.*, 143.

[131] Cf. the issue of the Platonic Ideas into the Gnostic Aeons.

Spirit of Yahwe, even his Sword (*Am.* 9: 4, cf. *Gen.* 3: 24), are personified; the evil spirit of Yahwe (1 *Ki.* 22) becomes in the end an evil spirit antagonistic to its origin; the sevenfold gift of the Spirit in *Is.* 11, 2, Greek text, issues in the Seven Spirits about the throne of God, *Rev.* 1: 4. And so the Chariot and the Wheels and the Beasts that accompany God's theophany came under the same treatment of mystical personification.[132] It is a similar phenomenon that we find in the Testament of Solomon; the seven demons brought to book by Solomon give their names as "Deception, Strife, Battle," etc. or the thirty-six elements (στοιχεῖα) are hypostatized into moral essences;[133] and in the same manner the Church personified the Seven Deadly Sins, which the Protestant Spenser dramatized in his perfect poetry. For various psychological reasons there was an increasing multiplication of the evils against which exorcism might be practiced; not only specific demons, like Tiu the Babylonian fiend of headache, but diseases under other names, and social evils such as enemies, loss of property, shame, might be exorcised. Probably the more intelligent man regarded this as a rational substitution for the elder demonology, while to the superstitious it merely meant more demons. At all events in the later magic we find more of the hypostatization of natural ills—how seriously it is to be taken is not always certain, and their commonplace names are simply given, whereas the old Babylonian magic would name the demoniac germ of the malady. Hence in our lists of exorcised ills we have in addition to the actual devils, already catalogued, series of evils which are somewhat on the borderland of diabolology. The old exorcisms still are effective but the old demonology is not ample enough; a man wants to exorcise headache, while he may be skeptical as to the existence of Tiu. Probably too as the exorcist ("medicine man") was also the physician, and medicine was born out of magic rites. we may observe in the naming of the actual maladies an intrusion of the rational spirit.[134]

[132] So the "thrones, dominions, principalities, powers," of Paul (*Col.* 1: 16); not only Gnosticism worked out this line of thought but also the Church took this heavenly hierarchy seriously.

[133] *JQR*, ix, 24, 34. So in Hermas, the vices of the tongue are called δαιμόνια (καταλαλία, etc.) *Mand.*, ii, 2: 3; cf. v, 2: 7; xii, 2: 2.

[134] *Aḫḫazu* becomes the name of a certain fever (a "yellow" fever), Küchler, *Beitr. z. Kenntniss d. ass.-bab. Medezin*, 61. N. B. the assignment of the several

In the Babylonian we find cases in the magical texts of the summarizing of specific maladies along with the demons. A long and interesting example is presented by Jastrow.[135] The series is introduced by a list of physical ills—contortions, broken limbs, affection of liver, heart, gall-bladder, etc. Then follow the evil eye, curses, calumny, etc., and then certain named demons; the text is an interesting predecessor of our inscriptions except that it places the maladies first. Is this the consequence of a rationalistic tendency? In the texts published by Küchler we find semi-magical prescriptions for diseases alone.

The New Testament gives a first-hand insight into the popular demonology of a representative portion of the oriental world at the beginning of our era. We find there devils of dumbness and deafness and blindness (*Mt.* 12: 22,*Mk.* 9: 17, etc.); one woman had "a spirit of infirmity," *πνεῦμα ἀσθενείας*, *Lu.* 13: 11; Simon's mother-in-law was seized with a great fever and Jesus rebuked the fever, *ἐπετίμησεν*[136] *τῷ πυρετῷ*,[137] even as in another case he rebuked the wind. And Jesus gave his disciples power "over unclean spirits to cast them out and heal every disease and every malady," Mt. 10.[138]

In the Egyptian magic there is the like identification of diseases with demons,[139] and the Greek magical papyri are full of it. Cf. the title of a charm given by Wessely, *φυλακτήριον σωματοφύλαξ πρὸς δαίμονας, πρὸς φαντάσματα, πρὸς πάσαν νόσον καὶ πάθος*,[140] So in the samples of Syriac charms published by Gollancz[141] we have the same summarization of "all manners of diseases" along with the demons, e. g. p. 79: Exorcised, etc. be "all demons, devils, phantoms, every practice, all temptations, unclean spirits, cruel dreams, dark

demons, *asakku, namtaru,* etc., to the different parts of the body, head, throat, etc.; Myhrman *ZA,* xvi, 146.

[135] *Rel. Bab. u. Ass.,* i, 367 ff. As Jastrow says, we gain here "a further insight into the connection between the medical calling and that of the exorcist." Other examples, Thompson, *Devils,* i, 17, 145, etc.

[136] = Hebrew גער.

[137] An angel *ἄγγελος*, of fever, *et al.,* appears in Byzantine charms; see Reitzenstein, *Poimandres,* 19. It is the Rabbinic איסרא, discussed above, n. 112.

[138] See at length Conybeare, *JQR,* viii, 583, etc.

[139] Cases cited by Budge, *Egyptian Magic,* 206 ff.

[140] xlii, 39, l. 589.

[141] *Actes du 11ième Congrès des Orientalistes,* Section 4, 77.

apparitions; fear[142] and trembling, terror and surprise, dread, anxiety, excessive weeping; fever-panic, tertian fever, all kinds of fever, febrile ills, inflammations, etc.; when a child troubles its mother with pains of travail;[143] tumors, pestilences, ... all pains and all sicknesses, all wounds and all oppositions, surprises, revenges .... the nine sicknesses," etc. And Vassiliev has published a number of Byzantine charms directed especially against specific diseases,[144] the first of which is a general panacea: *ὁρκίζω ὑμᾶς πάντα τὰ ἀκάρθατα πνεύματα, ἢ βασκανία, ἢ φαρμακεία, ἢ φοβερισμὸς, ἢ φρίκη, ἢ πυρετὸς, ἢ ἐπίβουλον, ἢ συνάντημα*[145] *πονηρὸν, ἢ νοσερὸν, ἢ κωφὸν, ἢ τυφλὸν, ἢ ἄλαλον, ἢ σεληνιακὸν, ἢ μηθεις* (*sic*) *θάνατον, ἢ ἀλλοιούμενον, ἢ μορφούμενον, ἢ ἄρσεν, ἢ θῆλυ, ἢ νοσημάτων* (*sic*).[146]

The most common of the demoniac categories bearing upon physical maladies are those with the general significance of "stroke, plague": נגעא especially epidemic disease, שובטא; פנעי, and n. b. פנעית 16: 10; מחותא, Mand. מחיתא; שיט (שוט?) 34: 10, 39: 4;[147] also the חססא, "sufferings."[148] Cf. *Ps.* 91: 5, a psalm and a verse which the Jews regarded as a valuable phylactery, and *Ps.* 89: 33. The שיקופתא treated above may be included here, = *ῥάπισμα*.

It is a minority of the bowl inscriptions which refer to special diseases. Of our texts Nos. 11, 16, 24, 29, 34, are of this character; so also a clause in Lidzbarski 5; lists of diseases appear in Wohlstein 2422, apparently mostly cutaneous affections,[149] and at the end of Schwab G.

[142] Fears are a frequent object of exorcism in the Greek magic, e. g. Wessely, xlii, 64, l. 25, and collation of the subject by Tambornino, *De ant. daemonismo*, 58, 65 f.; see also Dieterich, *Abraxas*, 86 f.

[143] This in earlier magic would have been ascribed to the jealous Lilith.

[144] *Anecdota graeco-byzantina*, i, 332.

[145] Cf. Dieterich, *Abraxas*, 196, l. 21, etc.; explained by Pradel as of a demon's occurrence, *Süd-ital. Gebete*, 96. So in Schwab G, קריתא, and cf. use of verb = קרא.

[146] For a survey of the Hellenistic personifications of disease, see Tambornino, *op. cit.*, 62 ff.; e. g. insanity = *Mania; Febris*, etc.; also see Reitzenstein, *Poimandres*, 19, Wendland, *Die hellenistisch-römische Kultur*, 125.

[147] Cf. the prayer of the Bishop Serapion directed against *πᾶσα πληγή, πᾶσα μάστιξ*, ... *ῥάπισμα*, in Wobbermin, *Altchristliche liturg. Stücke*, in *Texte u. Untersuchungen*, N. F., xvii, 2, p. 13.

[148] The חסאתא, Schw. M: 17, right after "arts" and before אשעם ביש may refer to tortures inflicted by magical operations.

[149] See Fränkel's criticism of readings, *ZA*, ix, 308.

We find listed general names of diseases, e. g. מארעין, כיבי, כורהני קשיי; a large number of cutaneous diseases: חרסא, חפפותא, חכרכה, חזיזית, גרבא, חרסום;[150] a series in 24: 2: אישיתא, אונא, אזיתא, probably fevers. In Schwab G we read of איקדי (= Wohlstein, יקדי, "fevers"), חבלא, עלמא, אישתא and אישתא (neo-Syriac, malarial fever),[151] ערומא ("swelling"?), שחופתא ("consumption," Rabb. ישחפת) מי ביישי (?).[152] שערתא, 11: 2, is possibly "fever." The demons referred to in 34: 10 (*q. v.*) may be the spirits of cancer, tumor of the eye, dysentery, and in l. 13 palsy of hand and foot.[153] A long list of fevers is presented in the first of Gollancz's Syriac charms.

In the Berlin bowl 2416 Wohlstein reads a certain affection as וריר ביישתא, translating it "böser Fluss"; Stübe reads it וריד ב', interpreting it, by a desperate solution, as the sacrificial jugular vein which he supposes was used as a maleficent charm. Jastrow in his Lexicon gives both וריר and ירוד, = leucoma of the eye (again the same confusion of ד and ר as in the word ירורא discussed above),[154] The correct spelling is וריר and it is closely related to סנורים, "blindness," *Gen.* 19: 11, 2 *Ki,* 6: 18. The root is parallel to ברר "be clear, bright" (cf. the Assyrian);[155] the sense of blindness in connection with this root arose from the fact that the sun produces blindness (eye-diseases are most common in the Orient), or from the dazzling sensation suffered by those affected with certain optical diseases.

No. 29: 7 we have a characteristic magical prescription for a woman who is exorcised from the various categories of devils and charms (ענקתא)

[150] For these and the following terms, see Glossary C.

[151] A disease *ašû* in Assyrian, Küchler, *op. cit.,* 131, 197.

[152] Wohlstein, 2422: 20, dropsy or urinary affection? Fränkel (*ib.,* 309) cft. *Ḥull.* 105b, and explains as "water from which a demon has drunk." It may be the eye-disease known to the Jews as "water," see Preuss (cited in next note), p. 305.

[153] For the diseases in the Bible and Talmud see *Jewish Encyc.* art. "Medicine," and iv, 517 f. for demons of diseases, with bibliography, viii, 413 f.; noteworthy treatments that have since appeared are Krauss, *Talmudische Archäologie,* i, § 104, J. Preuss, *Biblisch-talmudische Medezin,* 1911 (with extensive bibliography), while Fishberg, *The Jews,* 1911, cc. 13-15, may be consulted with profit. Many of the medical terms in the bowls are not to be found in the Jewish literature.

[154] For this "Yarod" disease, see Preuss, *op. cit.,* 308. He notices also the eye-disease ריר, a form of our word, p. 310.

[155] The Talmudic formula against blindness, *Shabriri, briri, riri, ri, Ab. Z.* 12b, etc., is formed from this root.

and then from כיפסא, a menstruation malady (?); then are mentioned מבכלתא ובנתא דברא which are evidently the causes of feminine irregularities, followed by טומי, "pollutions" (fluxes?), and the בר ניפלא, probably epilepsy. In a badly arranged series in No. 16 we find (l. 9) the רוח כרי ונאלי, literally "the spirit (= breath?) of stench and asthma," i. e. of the foul or labored breath symptomatic of diseases (see *ad loc.*). In 11: 3 f., again a charm for a woman, after the list of demons appear עקרתא and תכלתא which we should translate "barrenness" and "bereavement," understanding them as personified.[186] But in the parallel Mandaic text of Lidzbarski's (see to No. 11) bereavement has become a Lilith (תאכלתא ליליתא, ת' = *takkâltâ*). Which is the original of these forms? In 34: 10 אבערן וקמתא might be rendered, "ugliness and distortion," with which compare the charms of the Greek youths in the papyri for health, good looks, etc.[187]

Another class of evils are those of a social nature. So poverty מיסכינותא, figures in 34: 12, but from two other passages we see that it is the hostile witchcraft that would effect poverty in the victim's life which is exorcised: אסרה דמ', "the genius of poverty," 16: 10, and Lidz., 4: תיפוק אקריתא אקתא ומ', where "distress" and "sickness" are epexegetical to "invocations." Again in 34: 12 is found an exorcism against all kinds of losses: זינא יצערי. חורסנא ותוכא in 7: 11 are troubles involving shame.[188]

We mark that the rationalization of maladies had not gone very far; the decadent Babylonians were satisfied with the exorcism of devils and witchcraft and avoided the diagnosis of diseases. For modern magical practice in this field see the collection of Jewish charms published by R. C. Thompson, "Folklore of Mossoul," *PSBA*, 1906-7. In these the spirits have fled, but the ancient magical practices remain effective.

[186] Cf. the constant personification in Greek magic of *βασκανία*.

[187] E. g. Dieterich, *Abraxas*, 197, l. 3.

[188] Cf. the מהוש וצער of my amulet published in *JAOS*, 1911, 281.

§ 13. Propitious Angels, Deities, Etc.

In the Babylonian exorcistic system the beneficent gods and spirits were arrayed and invoked against the demons and ills that affected human kind. Jastrow gives a specimen of such an invocation of some twenty deities[1] and discusses at length these various lists and their orders.[2] In another example, given by Reisner,[3] fifty great gods, seven gods of destiny, 300 Annunaki of heaven and 600 of earth, are invoked. It is not inevitable then that we must go to Persian dualism to discover the origin of the Jewish angelology. Absolute monotheism with its desire that the one God be exalted alone broke down before the specious and alluring argument that there must be more who are with us than those who are against us (*2 Ki.* 6: 16).

It is to be premised that in many of our texts the religious element is very deficient; reliance is placed upon bans and formulas with often no reference to Deity or other personal agencies of friendly character. Those inscriptions in which such supernatural agencies apart from God are invoked may be divided into three classes, representing so many distinct origins. There are those in which the well known names and name-formations of the Jewish angelology appear; although, as remarked above, § 12, the word "angel" is not used in all cases in the usual Jewish sense (often = deity). Then there are the genii of the Mandaic religion, mostly with names of outlandish formation. And finally there are the invocations of evidently pagan origin in which deities are named, although unfortunately most of their names are obscure or perverted by the text tradition. Further these different elements are confused and what appears like a good Jewish text at times admits a pagan deity into its celestial

[1] From the *Šurpu*-series, iv, l. 68 ff.

[2] *Rel. Bab. u. Ass.*, i, 289.

[3] *Sum.-bab. Hymnen*, iv, l. 152 ff.

hierarchy—somewhat as the mediaeval Church came to canonize the Buddha.

(1) We need not dwell long upon the Mandaic genii. Pognon has given a survey of those occurring in his bowls,[4] to which may be added a few more from Lidzbarski's and my texts. Some of the names are patterned after the Jewish angelic nomenclature, e. g. עורפעיל (= רופאל), or have forms in *-ai*, e. g. בעודאי, ננחנאי, called "angels" (No. 38), or we find a name קאטריאוים patterned after the obscure Mandaic principles Piriawis and Sindiriawis. A number of the names are not found in the known Mandaic literature.[5]

(2) The angelology of the apparently Jewish texts and the angelic nomenclature are not as elaborate as we find in later Jewish literature, e. g. the *Sword of Moses*[6] or the *Sefer Raziel*,[7] the bulk of which consists of lists of angelic names.[8] The majority of our texts have no such names. The most common angels are Michael, Gabriel, Raphael. As a rule the names are formed in *-el*, although other formations appear and quite un-Jewish potencies are brought in as angels. Our texts stand on the borderland of Jewish angelology and not within its orthodox development.

Taking up first the known angels, we find that Michael does not have necessary precedence.[9] He sometimes appears in the first place followed by Gabriel, Raphael, Nuriel, *et al.* (e. g. Nos. 14, 34, Hyv.), but as often the order has Gabriel first,—Gabriel, Michael, Raphael (Nos. 7, 20. Myhrman, Wohlstein 2422, 2416), or Gabriel occurs without Michael (e. g.

[4] B, p. 93.

[5] In Ellis 1 the Mandaic genius Abatur is an evil spirit, and is classed among the ghostly spirits in Wohlstein, 2417: 6. N. B. the occurrence of this name as Abyater in an Ethiopic apocryphon, Littmann, *JAOS*, xxv, 28. Afriel, *ib.*, 29, is a form of Raphael, corresponding to the form occurring in the bowls; see Glossary A, *s. v.*

[6] Gaster, *Journ. Royal Asiatic Soc.*, 1896, and in separate imprint.

[7] Composed by Eleazar of Worms, 13th cent.

[8] See, in general, Schwab, *Dictionnaire de l'angélologie*, 1897 (in *Mémoires* of Academy of Inscriptions and Belles-lettres, Series 1, vol. 10, part 2). The Essenes laid great stress on the names of angels, Josephus, *Bell. jud.*, ii, 8: 7.

[9] See Lueken, *Michael*, 1898, especially § 4.

Nos. 10, 15).[10] The latter order is of course that of their appearance in the Jewish literature (Old Testament and *Tobit*). Other angels may precede these or occur without them. Aniel appears as the fourth in a tetrad (Wohlstein 2416).

The title peculiar to Michael in Jewish lore, the Great Prince, השר הגדול (*Dan.* 12, *Aboda Z.* 42b, etc.), appears in 5: 3, but without specific reference, and at the end of No. 7 in the list of angels, which in its occurrence at the beginning of the text names Gabriel first, Armasa is "the great lord"; so the application of the epithet is uncertain. In Hyvernat's text, which appears to be comparatively late, we find Michael's full glory expressed: "the mighty, the king, genius of the law" (גברא מלכא איסרא דאוריתא). In 34: 7 he is called the "healer" (אסיא), Raphael "reliever" (מדוליא), and Gabriel the "servant of the Lord." the title "healer" suggests that the frequent opening invocation, "In thy name, O Lord of salvation (אסותא), great Saviour (אסיא) of love," which is not a regular Jewish form of address to Deity, may refer to Michael;[11] but the supposition is not reinforced by the position Michael takes in these texts. In Wohlstein 2416 kabbalistic surnames are given to Gabriel and Michael, אלפסם and דמותיה (so W. would read), the latter, "likeness of Yah," corresponding to the later Jewish notions concerning Michael as almost θεὸς ἕτερος. Cf. the kabbalistic forms in 24: 4 (of angels?) and the group of seven barbarous names in Schwab M, Dalal, Salal, Malal, etc., presumably standing for the seven archangels.[12] Reference to the latter is made once, in the introduction to Stübe's text (= Wohlstein 2416) where exor-

[10] See for early precedence *ibid.*, p. 36 f.; e. g. in *Enoch* 20: Uriel, Rafael, Raguel, Michael, Sarakael, Gabriel. For Gabriel we may note that the Mandaeans gave him high honor, identifying him with Hibel—Ziwa (Norberg, *Onom.*, 33; Brandt, *Mand. Schr.*, 21), while they appear to have ignored Michael.

[11] Lueken, *Michael*, 11, 87: M. is price of love. For the epithet referred to, see notes to No. 3.

[12] Cf. the dictum of *Sefer Raziel* (quoted by Schwab, *Dictionnaire*, 7) that in divination it is necessary to pronounce the mystic names of the planets. Cf. a form of charm in Wessely, xlii, 65, where the seven angels are named in one column, and parallel to them two rows of barbarous mystical names, the first column containing varying permutations of the seven vowels; e. g. *αεηιουω χυχ μιχαηλ νυσευ*. N. B. the many mystical or magical names of the deities or "angels" in the Harranian philosophy; Dozy and de Goeje, *Actes* of 6th Congress of Orientalists, II, i, 297.

cism is made in the name of Metatron, Hadriel, Nuriel, Uriel, Sasgabiel Hafkiel, Mehafkiel,[12a] "who are the seven angels that go and turn around heaven and earth and stars and zodiac and moon and sea."[12]

In this last series Metatron takes the place that should be given to Michael. Metatron[14] appears earlier as one of the (six) archangels, in Targum Jer. to *Dt.* 34: 6: Michael, Gabriel, Metratron, Jophiel, Uriel, Yephephia. He is really a rival figure to Michael, springing from a different religious concept; Michael is an angel, the patron of Israel, hence the Angel, *par excellence,* the representative of deity.[15] Metatron is in origin an *idea,* Platonic, Philonic, however we may call it, produced by the necessity of a Demiurge, a "second god" between Deity and man.[16] It is interesting to watch the somewhat unlike histories of the rival ideas. Michael remains an angel, but Metatron becomes more and more a mystic being; he is associated with the Enoch and Elija legends, and his identity with these human beings may be described as an assimilation of them to Metatron or as his incarnation in them; he is both divine and human.[17] To the mystic, the kabbalist, such a figure is more sympathetic than the archangel (cf. the argument of the Epistle to the Hebrews!), and so he replaces or absorbs Michael. Hence he is described in terms like those given to Michael. Eisenmenger quotes (p. 396) a long list of appellatives: he is Prince of the Presence, Prince of the Law, Prince of wisdom, Prince of kings, etc. (cf. the titles applied to Michael in Hyvernat's bowl), while elsewhere (Eisenmenger, *ibid.*) he is called the Prince of the world, cf. the title "the great prince" discussed above in connection with Michael.[18] We may

[12a] Most of these names are plays on evident roots.

[12] For references and literature on the planetary angels see Lueken, *op. cit.,* 56; add Eisenmenger, *Entdecktes Judentum,* ii, 383 ff.; Bousset, *Religion des Judentums,* 315 ff.

[14] See Weber, *Jüdische Theologie,* § 37, and for origins of the idea cf. Bousset, *op. cit.,* 348.

[15] For the extremes to which this notion went, see Lueken, *op. cit.,* 36 ff.

[16] Both ideas are associated in Philo's mind; see Lueken, § 7, on the *λόγος ἀρχάγγελος* of Philo.

[17] For later legends see Eisenmenger, ii, 394 ff and the interesting critical discussion of this later (Gaonic) development of Judaism by Joel, *Der Aberglaube,* ii, 15 ff.

[18] Cf. שלימא ברא who stands before "the true God" in the pagan text of No. 19.

suppose that on the periphery of Judaism as well as in its esoteric circles the idea of Metatron would be especially acceptable to those who were not weaned from polytheism.

Comparing Nos. 3, 19, 25, we come upon an interesting identification. ארמסא, which appears in No. 3, is the Greek Hermes, more especially the Hermes of the mystic Egypto-Grecian theosophy (see to No. 3). He is the Word, etc. (No. 19) and in 25 : 4 f., is identified with Metatron.[19] Thus we have here a welding together of the esoteric Jewish Metatron and the equally mystical Hermes of Hellenism. Whether our magicians were aware what ארמסא meant, I know not and I doubt it. It gave them one more mystical name and combination.

Just as Hermes was dragged in, so other names or words were put in the category of angels or intermediate beings. So in 7 : 8 the invocation is in the name of Gabriel, Michael, Rafael, Asiel, Hermes, Abbahu, Abraxas,[20] And so with many terms in these invocations it is impossible to decide what we are dealing with (e. g. Agrabis, 17 : 4), whether a surrogate for a divine name, an intermediate being, a pagan deity, or perhaps a sorcerer's name. The expression "in the name of" was taken seriously only so far as the name was concerned; the name, the word, was the essential thing, not the prosaic object it stood for. The same phenomenon appears in the magical papyri. There we find now an exorcism in the name of Abraham, Isaac, Jacob, Jesus Christ (*χρηστος*) and Holy Spirit (*αγιος πνευμα, sic*)[21]—wherein the exorcist shows bad orthodoxy, whether as Jew or Christian; or again an incantation in the name of *ιαω θεου σαβαωθ θεου αδωναι θεου μιχαηλ θεου σουριηλ θεου γαβριηλ θεου ραφαηλ θεου αβρασαξ, κ. τ. λ.*,[22] where gods, angels and formulas are mixed up just as unintelligently as in the incantations from Nippur.

As for the minor angels most of them can be found in other Jewish literature, and reference for them may be made to Schwab's dictionary of angelology. Glossary A lists the angelic names in the bowls. In their

[19] So Michael was identified with Hermes, Lueken, *op. cit.*, 28, 78 (with reference to Hermes-figures bearing Michael's name).

[20] For some of the angel names in the papyri, see Lueken, *op. cit.*, 71.

[21] Wessely, Vienna *Denkschriften*, xxxvi, 2, 75, l. 1227.

[22] *Ibid.*, 144, l. 144. See above § 11.

formation they follow the general rule of making the first (verbal) element express the object desired in the incantation. Thus in the love-charms Nos. 13 and 28, the angels invoked are Raḥmiel, Ḥabbiel and Ḥanniniel.

(3) It is difficult to say how many of the bowls are Jewish; the presence of Jewish catchwords is not a sufficient criterion. I would call attention to a few of the Nippur bowls which are definitely pagan. Of such nature is the last one cited, No. 28, where along with the angel Raḥmiel appear the mighty (passionate?) Dlibat (a Semitic Venus) and [blank] gods. No. 19 has the longest list of invocations of apparently heathen deities. Only a few of them can be certainly identified. Hermes appears there, probably two words (masc. and fem.) representing the Gnostic Aeons (איבול, איבולית); Bagdana, "with 70 exalted priests," who appears as a demon (Abugdana) in the Mandaic bowls.[25] Other names have a very non-Semitic sound, and we can identify some Greek divinities: Zeus, Okeanos, Protogenos (see the commentary). Also we find angelic names, Aḳzariel, etc., and again Abraxas, and reference to the 60 gods and 80 goddesses. Yet the opening invocation is "in thy name Lord of Salvation," etc., who is also the "true God," l. 17.

Of peculiar interest is No. 36, in which the exorcist declares he has been empowered by certain deities: "The lord Šameš (sun) has charged me, Sina (moon) has sent me, Bel has commanded me, Nannai has said to me [blank], and Nirig (Nergal) has given me power." In quite antique wise the sorcerer (perhaps a priest, בומרא) professes to have received oracles. Apart from the striking parallels of the prophetic commissions in the Old Testament, we find the expression of like assumption by the exorcists in the Babylonian magic. Thus from the *Utukku*-series: "The sorcerer-priest that makes clear the ordinances of Eridu am I; of Marduk sage magician, eldest son of Ea, herald am I, the exorciser of Eridu, most cunning in magic am I";[26] again: "The man of Ea am I, the messenger of Marduk am I, my spell is the spell of Ea, my incantation the incantation

of Marduk."[25] Cf. also the *Maḳlu*-series: "The god and goddess have commissioned me, whom shall I send?," and, "I go on Marduk's command."[26] In our text we have doubtless one of the latest survivals of priestly exorcism in the old forms coming down from the *âšipu* priests of Babylonia; these forms doubtless were cherished long in the Harranian religion.

IV. HISTORICAL CONCLUSIONS

§ 14. Age of the Bowls

Very diverse views as to the antiquity of the bowls have been offered by students. It is unnecessary to consider the hypothesis of their pre-Christian origin.[1] Chwolson as an epigraphical expert submitted the texts he was acquainted with to a careful examination and believed he could assign them, by comparison of the scripts, to different centuries early in this era, from the second to the fourth or fifth. But epigraphical evidence in the case of a formed script like that of the square character is fallacious. Especially in the case of rude popular texts, in which antique forms of writing have survived, no certainty from epigraphy can be obtained. And in general a chronology obtained from epigraphy is most dubious; I may refer to the current opposing arguments over the Siloam inscription and the Gezer calendar tablet, or note the remarkably fluent, almost cursive script of the potsherds from Samaria, which only their certain *provenance* compels us to ascribe to the Omride age.

But most of the students would be inclined to place the bowls considerably later, between the fifth and ninth centuries, although rather by conjecture, from the impression made by the contents, than through positive proofs. Levy and Halévy thought, but fallaciously, that they could detect Arabisms, and were inclined to date the texts after the Arabic conquest.[2] Nöldeke would place Hyvernat's bowl not earlier than the eighth century, basing his opinion on the forms of the Persian names.[3] Schwab assigned his Louvre bowls to the fourth or fifth century.[4]

[1] See above, § 5.

[2] Levy, *ZDMG*, ix, 474; Halévy, *Comptes rendus*, 1877, 292, specifying more exactly, "vers le 9ième siècle."

[3] *Zeits. f. Keilschriftforsch.*, ii, 295.

[4] *Rev. d'ass. et d'arch.*, ii, 136.

It is evident that, in the case of a large number of texts coming from different localities and in most cases not observed *in situ*, it is impossible to take a datum from any one and so fix the chronology of the whole species. Magical literary forms are peculiarly persistent; we may think of the uncertainty as to the age of the Greek magical texts, in which, for instance, a Christian theological phrase may not define the age of the magical formula, can only give a clue to that of the particular document. And so our texts, copied and recopied as precious magical prescriptions, repeated possibly by laymen long after the special school of sorcery had ceased to exist, may have extended over a series of centuries. Some bowls may be considerably later than others, e. g. Hyvernat's with its reference to "Ispandas-Dewa the Jinn of Solomon," and Schwab's H and O composed of biblical verses.

Fortunately more certainty as to a unity of time can be had for the texts from Nippur. These were found by expert scholars *in situ* at certain noted levels of the ruins. While written in three different dialects and as many scripts, nevertheless the appearance of the same persons and families in the three classes tends to show that they all belonged to about the same age. We are not therefore to suppose a stratification of Judaic, Syriac, Mandaic layers, representing so many different ages or even distinct racial elements. Nor do the variants within the texts of the square script compel us to assign them to different ages; these are but calligraphic variations. There is every reason to place the Nippur bowls within rather a brief period, and if one or a few texts threw any light upon the chronology, we could place the age of the whole collection.

The provenance of the bowls from Nippur was described in § 1; they lay above the stratum of the Parthian temple. This building had been destroyed, was covered with sand, and upon the Tell settled small Semitic communities, Jews and Mandaeans, drawn to the deserted place probably by motives of religious community life. Indeed we may suppose that these bodies, separated from the main currents of their larger societies, made a practical use and profit out of their religious prestige in the preparation of magical texts. To speak more exactly of the archaeological conditions, in the "Jewish" houses discovered by Peters an upper stratum contained Cufic coins of the seventh century, a lower stratum only Parthian coins, Jewish bowls being found also in the latter. The lowest

dating then is the seventh century, on the basis of the Cufic coins, and this dating is to be pushed back, if it be modified at all, because of the ease with which small coins slip down through the soil. The archaeological evidence then for the *terminus ad quem* of our texts is the seventh century (probably its beginning), with a fair leeway back into the preceding century.

As I have said, the epigraphical evidence is a weak reed to lean on for chronology.[5] The only new fact I can bring to bear on this feature of the discussion is the novel Syriac script exhibited in seven of our bowls. I have discussed this script in § 6 and there came to the conclusion that it is an early type of the Edessene style of alphabet, a result corroborated by its identity with the Manichaean alphabet. But again this may be a case of survival; certain evidence from epigraphy is *nil*.

There remains the philological testimony. The "Jewish" Aramaic of the texts is just such as we find in the Talmud, and with evidently like dialectical variations; a few forms appear representing the "Palestinian" dialect, remains of which occur in the Babylonian literature. The Mandaic dialect is fully formed, and has exercised its influence, at least in spelling, upon the other two, the Rabbinic and Syriac. There are many words which can be illustrated only from the neo-Syriac dialects, or from the compilations of the Syriac lexicographers. But these words may be old and only by chance have failed to make their appearance in literature. Thus the late Syriac form ʿnwʾ "goat," is now found in the Elephantine papyri. The fact that a Persian word, e. g. *dastabira,* does not appear till later or is a *hapax legomenon,* is not proof of late age unless it can be shown to be of late Persian formation. Nor do I find that any of the proper names compel us to assume a late date. The majority of them are Persian, and do not, to one who is a layman in this branch of science and who must rely mostly upon the authority of Justi's *Namenbuch,* appear to be necessarily late, say toward the end of the first millennium.[6]

[5] It is impossible to make an epigraphical examination of all the bowls published, for in the majority of cases facsimiles are not given, or they are poorly made.

[6] Nöldeke's argument that the element *-duch* for *-ducht* speaks for a late age is not at all stringent for a Semitic dialect which would naturally abhor a termination in a double consonant; the Syriac texts have *-ducht*.

There is one line of negative evidence which is the only clue to a terminus *ad quem* which I can discover on this basis. Despite the variety of names, the list of which includes two Syriac Christian names (סעבריא ליעשו, בת סהדא) and a Greek name (טימאתאיז), also probable Indian names, there is none of Arabic origin. A pair of common nouns and the use of פ for the conjunction in two cases do give us etymological connections in that direction; but פ in this usage is found in the Senjirli inscriptions and the Elephantine papyri and is a spelling *ad aurem*—it is corrected in one of Schwab's texts. As for the two words גינא, Jinn, and שיק (and possibly שלניתא), I cannot grant that these loans must have taken place after the Mohammedan conquest, when sorcery was so eager to include every possible name of evil spirits (n. b. the adoption of διάβολοι) and inasmuch as the good Semitic word may long have been at home on the Arabian frontiers of Babylonia.

My consequent conclusion is that the Nippur texts should be placed in a period not later than the sixth or the beginning of the seventh century, that is, only as a terminus *ad quem*, approximately 600 A. D. The abandonment of the Tell of Nippur may have been caused by the Arabic conquest, which, as we may assume, ultimately drove away the Jewish and Mandaean settlers to other abodes, the latter to their recesses in the south (they were not, I think, recognized as one of "the peoples of a book"), the former to the towns. As for those texts from other quarters that appear to be later, they are but the continuation, which we should expect, of the magic of the elder bowls, and as I have noticed in § 2, towards the end, late descendants of the species.

If my conclusions from the data of the Nippur bowls are justified, they afford us one result of comparative value. While the great mass of magical, and more particularly Jewish magical literature, is known to us only in late documents,—we may but speculate as to the age of the *Sword of Moses*, the *Wisdom of the Chaldaeans*, the *Seal of Solomon*, the elements of *Sefer Raziel*—our texts are contemporary and authentic documents of the late pre-Islamic period in Babylonian history.

§ 15. Origins and Relations of the Bowl Magic

"Jewish incantation bowls" is the title that has been generally applied to our species of magical texts. It arose in consequence of the fact that the first bowls interpreted, as also the majority of those now known, are written in the script and dialectic forms of the speech of the Talmud, and withal appear preponderantly to bear the earmarks of Judaism.[1] The subsequent discovery of similar supplies of texts Mandaic in composition and contents, and now the presentation in this volume of a number of Syriac texts, enlarge our vista concerning the diffusion of this special form of magic among the races and faiths of Babylonia. Further, over against texts of whose Judaism there may be no reasonable doubt, we find a number which are out and out pagan, while the majority are certainly eclectic in their theological tastes. These observations require that we extend our study beyond the domain of Judaism to discover the relations of these bowl-texts to the general field of magic, as we know it for the first centuries of the Christian era, and to the earlier strains which entered into it. What are the historical connections of our texts, and what light do they cast upon the religious or spiritistic thought of cosmopolitan Babylonia in the age of the Sassanian empire?[2]

In the magic-wild age at the beginning of our era, the Jewish magic was recognized as one of the three great schools of sorcery, along with the Chaldaean and the Egyptian. The Jews had inherited the rites and notions of primitive magic from the Arabian Hebrews and from ancient Canaan; despite the severity of an ethical monotheism, which throughout

[1] Hence our rude and vulgar texts are of philological importance as almost the only early contemporary documents of these dialects.

[2] The analogies have been set forth in the preceding sections; in the following paragraphs I can only speculate on the genealogical relations. Cf. Deissmann, *Light from the Ancient East*, 261, n. 2.

its growth had placed a unique ban upon the practice of sorcery, this feature nevertheless survived. While the Second Isaiah is deriding the sorceries of Babylon and exposing their helplessness (c. 47), we have stray glimpses of the persistence of ancient rites closely akin to magic, which still claimed the adherence of renegades (*Eze.* 8; *Is.* 65, 66). In the Book of Tobit are given magical remedies for the expulsion of foul demons with the concurrence of angels; Josephus tells of his sorcerer who could pull the demon out of the nose of the possessed with a root indicated by Solomon.[3] The New Testament gives the first extensive and intimate picture of the magical conditions in Palestine; "If I through the finger of God cast out devils, by whom do your sons cast them out?"—inquires Jesus. In *Acts* we read of well-established sorcerers who bewitched the people and even Gentiles in foreign parts, a Simon Magus and Bar-Jesus Elymas. But apart from the hoary forms of Mezuzoth and Tephillin and some mortuary charms,[4] our first literary specimens of Jewish or Judaizing magic are found in the Greek papyri of the Christian age, and there how much is Greek and how much Jewish we know not. Here appear various forms and anagrams of the Ineffable Name, quotations from the Scriptures, historical references to Solomon and especially to Moses,[5] who came, as the great mystagogue and magician, to be identified with Hermes-Thoth, and was regarded as the teacher of Orpheus.[6] He is made the author of a Hermetic book, through and through Egyptian and Hellenistic, entitled the Eighth Book of Moses, as a continuation of the Pentateuch, which Dieterich has published at the end of his *Abraxas*. Blau and Deissmann have published a delicate erotic charm, composed in true Greek spirit, and yet the former may be right in claiming its phraseology as preponderantly Jewish.[7] In which direction was the give and take, what were the connecting links? Dieterich would find in the Essenes and Therapeutae the bond between

[3] *A.J.*, viii, 2, 5. For a survey of Jewish magic and a large bibliography, see Schürer, *Gesch. d. Jüd. Volkes*, § 32, vii (ed. 3, iii, 294).

Jewish and Hellenic magic.[8] But just wherein lay the peculiar type and particular contribution of Judaism to the world's magical faith, we do not know, for the reason that we have no early magical documents of unimpeachable Jewish origin. And if we possessed documents from the Palestinian life of the Hebrews, how far even then could we decide what was specifically Hebrew and not Canaanitish or borrowed from the spheres of culture to the east and west? What different origins are assigned by the commentators to the occult practices described in Eze. 8.[9]

When we pass to the eastern home of the Diaspora we have that marvellous encyclopaedia, the Talmud, with its glimpses into the common life of the people as well as into the discussions of the schools; magic holds its sway more or less over all, and its existence, if not its legality, is confessed by the spiritual masters, who, if we may contrast successively Mishna, Gemara, the Gaonic period, with one another, came more and more to recognize and legitimatize the practice of magic.[10] We catch in the Talmud and the subsequent authoritative literature some of the magical phrases, learn something of the practices and beliefs in demons, mark the superstitious fears of the people of Babylonia, of the Jews as well as of their neighbors.[11] Our bowls and their inscriptions are rude and unlovely, with none of the sombre dignity of the Babylonian incantations, or of the often lyric beauty of the Greek magical literature;[12] but these bowls are of prime interest as giving us for the first time extensive texts of the eclectic Babylonian magic of the first Christian millennium. They are degenerate successors of the elder incantations of the land, yet they are autograph evidence of the superstitions which Talmud, with caution, and Eisenmenger's *Entdecktes Judenthum,* with malice, reveal, and are precursors of that sea of magical literature which has come down to us under Jewish auspices.

[8] *Ib.,* 137 ff.

[9] See Kraetzschmar, *ad loc.*

[10] See Joel, *Der Aberglaube,* the sections C, D, E (pt. 1, pp. 55, 64; pt. 2, p. 2) for this comparison. For the Talmudic teachers who allowed and practised magic, see Blau, *Das altjüd. Zauberwesen,* 26, 54.

[11] According to Blau, pp. 23, 84, the Babylonian Jews were far more addicted to magic than the Palestinians.

[12] Cf. the noble Hermetic hymn of creation, the "holy word" in the Eighth Book of Moses, in which "God smiled seven times," and each smile was an act of creation; Dieterich, p. 182.

And withal they give a sample of the medley and fusion of peoples and religions in the land which the Jews had long since called Confusion.

The order of the day is to Babylonize, and our evident line of primary investigation is to discover the relationships of the bowls with the ancient Babylonian magic, the literature of which in the last decades has been published in large quantities by the most distinguished Assyriologists.[13] My notes to the texts and the Introduction show how apparently numerous are the connections between the object of our study and the magic of Babylonia. While there is only one instance of the specific bowl praxis in that earlier literature,[14] still its method of defixion is quite congruous with the ancient magical operations. As of yore, the sorcerer appears as the commissioner of Deity or of the gods (§ 9); he follows definite and repetitious formulas, similar to the Babylonian *šiptu* (§ 11). He invokes most frequently, or at least primarily, one chief god, "the Lord of love and healing," just as the Babylonian called on Ea or Marduk, but, as in the elder incantations, other gods or their angelic equivalents are invoked in large accumulation (§ 13). Most striking in the correspondences is the registration of the devils, black arts and maladies to be exorcised; as in the Babylonian, so in our magic these are specified in long detailed lists (§ 12). In fact our spells far outdo the Babylonian repetition of the seven classes of evil spirits. In the Mandaic texts the terror of the witches appears, in others the evil charm is reversed upon the head of the sorcerer, all as in Babylonian magic. Rites and words and the instruments of magic, which are personified, are as much the object of detestation as in the *Maḳlu*-series. Diseases and all human ills are inspired by devils, indeed are devils and are treated as personal essences. The magician's ban, the spell of the mighty god, is laid upon them all, and they are forthwith assumed to be "bound," and "tied," as in older days when simulacra sacramentally sealed the operation. Even the quotation of Scriptures and references to sacred legend have their parallels in the Babylonian incantations, which used the ancient myths as potent charms (§ 11). It is unnecessary to proceed further with the summary of general correspondences, but enough has

[13] See for the literature, Jastrow, *Rel. Bab. u. Ass.*, i, ch. xvi, and his *Religious Beliefs in Bab. and Ass.*, 296 ff.

[14] See p. 43.

been noticed to dispose our minds to the dictum of Zimmern:[15] "Diese (the incantation bowls) im Ausdruck oft überraschend an die alten babylonischen Beschwörungen erinnernden jüdischen Beschwörungstexte, bei denen unter den mit Namen angeführten bösen Dämonen auch Lilith häufig erscheint. liefern in ihrer Weise ebenfalls den Beweis für nachhaltige Einströmen babylonischer dämonologischer Vorstellungen in das Judentum."[16]

Yet the implications that may be drawn from this judgment, even if not intended by the writer, are open to criticism. In the first place, as observed in the preceding sections, similar correspondences with the Greek magic are to be noted in almost every instance. This fact compels us to recognize the possibility of eclectic as well as of immediate Babylonian influence upon the Jewish magic. And then, secondly, marked differences exist between the fields, changes in the center of gravity, omissions, accretions. There still remains a large degree of substantial reason in the opinion earlier expressed by Nöldeke, surveying the material from a different point of view: "Die Verbindung mit altbabylonischen Aberglauben dürfte also ziemlich lose sein."[17] The study of magic is still in its beginnings, and students are too prone to find a genetic relation when we have to bear in mind that we are dealing with parallel workings of the human spirit operating in a universal and amazingly uniform field, while at the same time, particularly for the age when Hellenistic culture was dominant, we must give allowance for the interfusion of factors geographically most distant.

Of the old Babylonian names of demons, only two appear in our texts, the *šedu* and Lilith (with its male counterpart), but these, if originally Babylonian, in ancient times had pervaded the Semitic world. The *utukki limnuti* are the רוחין בישתא, "evil spirits," but these have their biblical precedent.[18] The Babylonian vocabulary has been suppressed by genuine Semitic words. The extensive praxis of the Babylonian has also almost disappeared; the inversion of the bowl, some rudely scrawled designs, and

[15] *KAT*³, 463.

[16] The actual adoption by the Jews of Babylonian magical rites is portrayed in *Eze.* 13: 17 f.

[17] *Z. f. Keilschriftforsch.*, ii, 297.

[18] The שלניתא may be Babylonian, see to 8: 2.

one or two magical prescriptions[19] are all that remain in our texts of the elder practice. The use of the bowl in a love-charm has its parallel only in the Hellenistic κατάδεσμος or *defixio,* likewise buried in the earth. The sorcerer invokes the names of ancient masters (as in the Greek magic again), he no longer is professionally independent like the *âšipu* priest; even laymen borrow and lay the spells. The mere "word" or "name" has replaced the practice; in the Babylonian magic the gods were prayed to for their assistance, and we often question whether we are dealing with magic or religion; here their or the angels' names are simply used, and these are sufficient to invoke their potency, without appeal to the heart or mind of a living deity. The use of a word like Abraxas illustrates the extreme consequence; if a deity can become a name, so a word can become a deity—*numen nomen!* The formula "in the name of" can be used before letters and phrases as well as before divine names. At first sight this name-magic appears more spiritual; it actually proves to be more absurdly mechanical, because it invokes a binding of the gods and heavenly powers by a cheap and easy formula without any of the "service" of the gods, with litany and priest, which the elder rites prescribed.

There is thus a change in the spirit of the magic. The old Babylonian was religious in his incantations; it is only in the so-called medical texts that we find the passage from the religious sphere to that of entirely mechanical operation, which may issue either in empirical science or in absolute magic. The sense of sin lay heavy upon the Babylonian devotee, he needed to dress in sackcloth and wallow in ashes, while the incantation required rites of purification and confession of sins in pathetic and ethical litanies.[20] But any such religious element is entirely wanting in our texts, apart from the stereotyped introductory formula, "Lord of healing, Lord of love" and two obscure, probably traditional references to sin and guilt.[20a] We have in a word a purely magical system, that is, one whose efficacy consists in doing or rather saying certain things without a prayer or lustration or confession.

[19] See Nos. 12, 13.

[20] Cf. the "confessional" in the second tablet of the *Šurpu*-series.

[20a] See p. 86.

It may be further noticed that in the use of the Jewish Scriptures, which is very scanty, the passages of real religious import are not employed (§ 11). This is especially true of the Nippur texts, and often all that we have reminiscent of the Bible or of religion are the stereotyped Amens and Halleluias, common property of the magic of the age. Along with this unreligiousness of the magic goes a certain impression of impersonality throughout; there is a general lack of reference even to personal sorcerers; attention is paid to the operation of witchcraft, regarded itself as a potentiality, and the mechanical danger is met by mechanical means.

In these differentia from the old Babylonian magic we find much that is apparently or evidently Jewish, and again some factors that are not so categorically explained. We may think that the comparative absence of magic rite is due to Jewish influence, as also the large use of name-sorcery. The cultless condition of the Jews since A. D. 70 and the long previous term of six centuries in which the official cult was confined to one sanctuary, must have incapacitated the Jew for the rites of the magician. He dared not make simulacra, many practices were out of question because of their evidently heathen associations ("the ways of the Amorite"). But he had a holy book made up of sacred words, and a god unlike any of the pagans, who might not be seen, who once had spoken (*Dt.* 5), and who in lieu of images and many sanctuaries was revealed in his Names.[21] And so holy words and names became the province of the Jewish sorcery. His religion, when it passed out of the naturalistic or the ethical sphere, found its outlet in logology, in Rabbinism with its logomachies, in magic and kabbalism with their manipulation of words and letters. Even the angels, which were imported as a kind of humanizing mythology into Jewish monotheism, came to be but plays on roots, invocations of the attributes or activities of deity, so that finally angel was merely synonymous with charm.[22]

In these particulars the Jews may have contributed to the later Mesopotamian magic, as well as to that of the Hellenistic world. In our bowls we find Jewish families as the clients, and in the Nippur collection there is a frequent reference to the venerable Jewish master, Joshua b. Perahia, as a revealer of heaven's mysteries; but as he appears also in the

[21] Kabbalism appears as early as the present text of *Ex.* 3, 14.

[22] See § 12, n. 112.

Syriac bowls, which are probably of pagan origin, he may have already become a common traditional figure like Moses in the papyri. Nippur had been since the Exile a center of the Jews,[23] and in Talmudic times it lay just east of the famous Rabbinic school at Sura, between which and Pumbaditha to the north of Babylon the spiritual life of Babylonian Judaism circulated.[24] But Nippur does not appear to have remained a Jewish seat of importance. It is mentioned but once in the Talmud,[25] and the settlement which the Pennsylvania expedition unearthed on the top of its ruins was, at least so far as the bowls testify, a mixed folk, among whom the identical magic flourished under Jewish, Mandaic, pagan forms. This interchange of magical property precludes us from specifically speaking of many texts as certainly Jewish, even while we recognize numerous Jewish elements. It is interesting to observe that the Mandaic texts are truer to the theology of the sect than many of the so-called Jewish bowls. The Jewish magic here in Nippur, as elsewhere, was eclectic. The religion of the Jew cannot admit that it itself is eclectic, and the self-consciousness of the intelligent orthodoxy in rejecting or at least minimizing magic as part of the Jewish system, approves itself when we study our specimens of magic; their science is as much cosmopolitan as native.

I pass now to another clue for the origins of the bowl-magic. I have discussed under No. 3 the frequent references to the genius Armasa, who is identified with Metatron and called the Word, and is none else than the Hermes of the Hermetic theosophy. No. 28 is a magical philtre for a lovesick wife, the terms of which find their closest correspondence in Greek charms; No. 19 names a number of deities, among whose obscure names we can identify Zeus and Okeanos, and perhaps the names of the Aeon-pair. There are other clues of connection with the Greek magic, discussed in the Introduction and the texts; I may refer especially to the

[23] For the river Chebar hard by Nippur, the Kabar of tablets found by the Pennsylvania Expedition, see *BE*, ix, plate 84, l. 2. For the names of the numerous Jewish settlers there see Clay's Murashu texts and his summary in *Light on the Old Testament*, 404, also S. Daiches, *The Jews in Babylonia in the Time of Ezra and Nehemiah according to Babylonian Inscriptions* (Publication no. 2 of the Jews' College, London).

[24] See S. Funk, *Die Juden in Babylonien*, Berlin, 1902, ii, 153 (with no reference to Nippur).

[25] *Yoma* 10b, identified with the biblical Calneh

identical pharaseology in the choice of a certain day out of a month and a year as auspicious for working the charm.[26] Such terms as Abraxas direct our thought to the great western world and the imposing magical fabric of Hellenism.[27] And this system directs us to Egypt.

I have spoken of the permutations made on the Sacred Name as typically Jewish. And yet there was another people which equally cultivated the mystery of ineffable names, a people older than the worshippers of Yahwe, the Egyptians.[28] The Jewish development in this regard was hardly independent of Egypt. However this may be, we find in the Greek magical texts the fusion of the two theosophies, the Jewish Ineffable Name, with all its vowel permutations, and like sacred titles, Sebaoth, Adonai, etc., mixed pell-mell with those of Egyptian origin. And further the accumulation of barbarous syllables, such as appear in our texts, has no known tradition behind it hailing from the Jewish and Babylonian theologies; it must be traced back to the Egyptian magical science.[29] This phenomenon

[26] See p. 55.

[27] The recent rapid development of the study of magic and the increased application to the magical papyri have aroused in various quarters the question concerning the nature of the Jewish magic and its relations to that of the Hellenistic world. This investigation appears to have been first broached in a critical way by Blau (pp. 37 ff., 96 ff.), followed by several writers whose works have been constantly cited in the above pages: Dieterich, Deissmann, Conybeare (who considers the *Testament of Solomon* to be of Jewish origin), Gaster (in introduction to his *Sword of Moses*), Reitzenstein, Heitmüller, Wendland. Our specimens of magic hail from the eastern confines of that world, even from beyond its political borders, and are speaking proofs of the eclectic and cosmopolitan character of Hellenistic magic.

[28] Budge, *Egyptian Magic*, ch. v; Erman, *Egyptian Religion* (1907), 154. For the influence of Egypt in the Hellenistic magic, see the excursus in Heitmüller, *"Im Namen Jesu,"* 218.

[29] In addition to the observations in § 11, see Budge, *l. c.*; Wiedemann, *Religion of the Ancient Egyptians* (1897), 268, quoting Synesius's words: the Egyptian "mumbled a few unintelligible syllables"; also his *Magie u. Zauberei im alt. Ägypten* (1905), 32. The Greek papyri are faithful repeaters of this Egyptian art.—Stübe, remarking on the kabbalistic use of letters (p. 54), thinks that here we have traces of the passage from the Talmud to the beginnings of the development of the Kabbala. But as of Egyptian origin or kinship, the use is not to be dated by the Kabbala. It existed on the periphery of Judaism long before it was taken up by the Jewish doctors. Indeed Chwolson (*CIH*, col. 115) denies any special relation of these texts to Talmudic ideas (against Lenormant, *Essai*, i, 212, who held that our magic was a product of the Babylonian academies). Wohlstein was the first to observe the eclectic character of our magic, *ZA*, viii, 316 f. In matter of fact hardly a trace of technical Kabbalism is to be found in them.

is continued and flourishes with abandonment in the Greek papyri, and there again this form of magical spell falls in with the Jewish currents.

This Egypto-Hellenistic magic is one of the prime sources of our texts, and the impression made upon me in my study is that they resemble much more this form of magic than that of ancient Babylonia. The beginnings of this invasion of western sorcery into Mesopotamia may have begun with Alexander's armies; there can be little doubt but that pervasive Hellenism soon domesticated its magic, as everything else Greek, wherever it settled. It doubtless was reinforced in its development on Babylonian soil by the Hellenistic Jewish magic that had grown into luxuriant life on the theosophic soil of Egypt and thence sent forth its waves of spiritual energy to all the homes of the dispersed race.

It is difficult in the field of magic to decide which is cause and which effect, for the spirit of magic produces like fruits spontaneously everywhere. Our bowl sorcery is connected doubtless by many lineal bonds with ancient Babylonia, but it shows as unmistakable links with the Hellenistic magic, to which the Jews contributed, and from which they received still more. The problem of these texts is the same that confronts us in speculation over the Greek magical papyri. Who wrote these? Egyptian, Jew, Greek, Christian, Gnostic, all contributed each one his magical names, mysterious formulas, bits of sacred history, each outbidding the other in the effort to attain the same ends and arriving at an indistinguishable limbo of monotonous sameness. The texts were written for all who would use them, and those who received their magical traditions adapted them to the changing fancies of age and clime.

Our texts exhibit a like eclecticism. Babylonian, Jewish, Mandaic, Gnostic, Hellenistic, and indirectly Egyptian, elements are there, in various combinations. The Jew contributed a certain quality of monotheism and made it palatable by his angelology; his Divine Name, his Scriptures and apocrypha and liturgy, were storehouses of magical lore. All this was fused with like elements from parallel sources, and the product was useful to any body of magicians, even as it was in demand on the part of every class of clients, pagans, Persians, Jews, Christians, every kind of sect. And what is true of our texts is true of all the Jewish magical literature.

The bowls then are not so much illustrative of a special Jewish magic as of the eclectic religious conditions of later Mesopotamia; here the ancient magic, divorced from its content of real religion, came to be reinforced by new currents of superstition from the West. Whatever be the relation of magic and religion, whether they are twin sisters, or the one the parent of the other, or innate rivals, in our special and confined field we may observe the break-down of the ancient noble religions; gods have become names, rites esoteric and selfish and malignant, holy writings formulas. It is not Judaism we have been studying but a phase of *fin de siècle* superstition.

In recent years so much has been made of Persian origins for western religion, philosophy, and magic,[80] that I am surprised to find hardly a trace even in a word[81] of the Zoroastrian system upon our bowl-magic. This is the more remarkable as it belongs to Persian soil and flourished under the Sassanian empire, while the dualism, demonology and magical practice of Persia would have been so natural a nursing mother to the superstition we have been studying. Had the Zoroastrian influence spent itself and, after it had given itself to the world, did the more virile currents of the original stock and of the West reassert themselves and triumph in Iran's territory? Or has the influence of Persia been overrated?

As to the comparative age, in point of literary tradition, of the three classes, "Jewish," Syriac, Mandaic, it is impossible to decide; all follow common types. In the case of the Mandaic replica to No. 11, the former has the secondary text. The Mandaic charms are closest in spirit to the old Babylonian magical literature, those in the Syriac appear to be expressive of the current paganism (e. g. No. 36).

[80] See Cumont, *The Oriental Religions in Roman Paganism*, esp. nn. 37-39, p. 266 f.; Bousset, *Die Ursprünge der Gnosis*, etc.

[81] N. B. the Ispandas-dewa in Hyvernat's text, and פריכא, possibly the Persian Peri. The arguments for Persian influences advanced by Levy, *ZDMG*, ix, 471 f., are now antiquated by the Babylonian literature. The fashion of interminable lists of demons may come from Persia.

TEXTS, TRANSLATIONS, NOTES

CBS = Catalogue of Babylonian Section University of Pennsylvania.

Numerals in ( ) number the lines of the spiral inscription, starting from the radius where the text begins.

Brackets, [ ], indicate suppletion of lacunae.

Phrases in ( ) in the translation represent amplification or interpretation by the translator.

Inferior points attached to Hebrew characters indicate doubtful readings.

Points on the line indicate missing letters or words.

Superior points, in the Syriac texts, represent the diacritical marks of the original.

TRANSLATION

This the amulet of Ephrâ (2) bar Šabôrdûch, wherein shall be (3) salvation for this Ephrâ b. Š. and also (4) for this Bahmandûch bath Samâ, that there be for them (5) salvation, namely for this Ephrâ b. Š. and for this Bahmandûch b. Š. (6) Amen, Amen, Selah.

This is an amulet against the Liliths that haunt the house of (7) this Ephrâ b. Š. and this Bahmandûch b. Š. (8) I adjure you, all

species of Liliths in respect to your posterity, which is begotten by Demons (9) and Liliths to the children of light who go astray: Woe, who rebel and transgress against the proscription of their Lord; woe, from the blast (10) fast-flying; woe, destroying; woe, oppressing with your foul wounds ...., who do violence and trample and scourge and mutilate (11) and break and confuse and hobble and dissolve (the body) like water; woe, ...; and where you stand, (12) and where you stand (*sic*) fearful and affrighted are ye, bound to my ban,—who appear to mankind, to men in the likeness of women (13) and to women in the likeness of men, and with mankind they lie by night and by day.

With the formula, ṬWM (14) Š·Š GŠ GŠK, have I written against thee, evil Lilith, whatsoever name be thine. We (15) have written. And his name shall save thee, Ephrâ, forever and ever.

Commentary

A phylactery in the name of a man and wife for protection against the liliths and their broods which haunt the home. The same couple are the subjects of the charm in No. 13, in which the woman invokes the love of her husband and the blessing of children. For the general magical details I refer in this and the following texts to the Introduction.

1. אפרה: in No. 13 written with both ה- and א-. The name may be Jewish or Persian, (1) hypocoristic from אפרים, or (2) a hypocoristic reduction from one of the numerous names in *Fra-;* see Justi, *Iranisches Namenbuch,* 101 ff.; for the prothetic vowel, cf. *ibid.* 6. The Persian name of the mother by no means determines the race of the family.

שברדוך = "Sapor's-daughter" not instanced in Justi; *duch* for *ducht;* see above, p. 104, n. 6.

2. תהוי = תיהי, l. 4; both forms in the Rabbinic.

3. ועים ו : unless a scribal error, a unique adverbial development of the preposition, "and withal," = *simul ac,* or ὁμοῦ καί, e. g. Dieterich, *Abraxas,* 147.

4. בהמנדוך: see Justi, p. 374 f.; also in Pognon B.

סמא: in No. 13 also סמאי. A frequent Jewish name; see Heilpren, סדר הדורות (*Seder ha-Doroth*), ed. Maskileison, Warsaw, 1883, ii, 296 f. The two forms are hypocoristic; see Nöldeke, art. "Names," *Enc. Bib.*

§ 50 f., Lidzbarski, *Ephemeris* ii, 7 ff., 13 ff. (For the early form and history of these terminations, cf. the results of Ranke, *Early Babylonian Personal Names,* 7 ff.). The full name was סמיא, "blind," occurring in Jewish and Syriac. It occurs as a feminine name (as here) in Asseman's Catalogue, cited by Payne-Smith, *Thesaurus syriacus,* col. 2655.

6. לילית : pl., also לילאתא . The liliths are the only named objects of exorcism, but masc. ppls., etc. are found in l. 10 ff., probably by technical phraseology.

דבת : √ דבא ; cf. *Pesaḥ.* 111b: דבי פרחי רוחי : "those which haunt caperberries are spirits.

ביתלהון: the pronominal suffix expressed with the intrusion of ל; cf. in the Assouan papyri of Sayce and Cowley, ברלי ובראלי (F, 9).

8. בש[ום] : if a correct restoration, the charm would obviate the demoniac procreation described.

9. "Sons of light": נורא is primarily fire and the term would indicate the angels, expressive of the legend that the angels emanate like sparks (cf. בני רשף , *Job* 5: 7) from the *dînûr,* the stream of fire under God's throne, *Ḥag.* 14a, and other reff. in Eisenmenger, ii, 371 ff. Cf. "the hosts of fire in the sphere," 8: 13. In 16: 7 the demons are "sons of darkness." But as the reference is to demoniac unions with human flesh, the expression appears to be transferred to mankind. It is then parallel to "sons of light," a name given in the Mandaic religion to the Uthras, Brandt, *Mand. Rel.,* 30, and also to men predestined to life, Brandt, *Mand. Schr.,* 13, 19. The redeemed come to share in the light-nature of the angels, cf. *Dan.* 12: 3, *Enoch* 38-39, cf. the *vioì φωτός* of the NT. In the myth of Adam Kadmon, man was originally a being of light (Bousset, *Hauptprobleme d. Gnosis,* 202, etc.; for the Kabbala, Karppe, *Zohar,* 372 ff.). Hence we must suppose that נורא has been reduced from נוהרא "light" (cf. the Arabic), and the expression is to be correspondingly rendered. The predicates following recall the myth of Gen. 6.

מריהון, as in Syriac, but the י is only the šewâ; cf. l. 11.

10. וי מן זיקא פרח פרחין: An interesting parallel to a well-known Talmudic formula against witches, *Pesaḥ.* 110a-b: קרח קרחייבי פרח פרחייבי איבדור תבלונייבי פרחא זיקא למוריקא חדתא, generally translated: "Your head be balder, your crumbs [with which you conjure—cf. the anecdote

of Abaye in *Ḥull.* 105b, Joel, *Der Aberglaube,* i, 69] be blown away, your spices fly off, the wind carry away the fresh saffron."[1] I doubt if so much sense can be made out of the doggerel; following the Talmudic tradition our phrase would mean "your breadcrumbs away with the gust!" By itself the words could simply mean, "be blown away with a gust," with reduplication of the verb. For קרח in the Talmudic passage, see to 18: 9.

The combination in the middle of the line is obscure; a verbal middle noun from רשם? The participles מחבלין וגי portray the fiendish assaults of the demons; the same accumulations in Lidzbarski's Mandaic bowls. Cf. the action of the demon of epilepsy in *Mk.* 9: 14 ff.

11. For the ש see above p. 61.

משגריהן כמין: for the relaxing effects of disease cf. *Ps.* 22: 15, *Eze.* 7: 17.

בתריכן ובתרכון, a dittograph induced by the scribe turning over the bowl to write on the exterior and repeating the word. The ' in the first form represents the šewâ. The meaning is: stay banned where you are!

12. יסירין: metaplastic form of root אסר, found in the Targums, etc. (cf. Heb. מוסר).

מידמין: cf. *Ḳidduš.* 81a, אידמי ליה סטן כאיתתא. The climax of the description is the worst and most obscene of the plagues; the same phrase in Pogn. B, no. 27.

13. בטום: in Ellis 1: 8 טטם appears in conjunction with the Tetragrammaton.

14. ליבי, עליבי: the form is singular, and the phrase refers to the many names of a lilith (see §§ 11, 12 and No. 42).

With לילית it is difficult to determine whether the singular or plural is meant. For "lilith of whatsoever name," cf. 14: 6: demons whose names are mentioned and who are not mentioned. The same indefinite invocation in the Babylonian, e. g. *Utukki*-series (Thompson *Evil Spirits of Babylonia,* i, 153): spirits "that have no name," presenting a *blanket* formula for names not known; cf. *δαιμόνιον καὶ μὴ ὀνομαζόμενον*, Pradel, *Griech. u. südital. Gebete,* 22, l. 2.

15. אל, a Hebrew reminiscence; in general cf. *Ps.* 20: 2 f.

[1] See Blau, *Zauberwesen,* 77. The connection of this Talmudic passage with *Eze.* 13: 17 ff. has not been observed by the commentators.

No. 2 (CBS 2945)

Translation

Again I come, I Pâbak bar Kûfithâi, in my own might, on my person polished armor of iron, my head of iron, my figure of pure fire. (2) I am clad with 'the garment of Armasa (Hermes), Dabya and the Word, and my strength is in him who created heaven and earth. I have come and I have smitten (3) the evil Fiends and the malignant Adversaries. I have said to them that if at all you sin against Abûnâ bar Geribtâ and against Ibbâ bar Zâwithâi, I will lay a spell upon you, the spell (4) of the Sea and the spell of the monster Leviathan. (I say) that if at all you sin against Abûnâ b. G., and against his wife and his sons, I will bend the bow against you (5) and stretch the bow-string at you.

Again, whereinsoever you sin against the house of Pâbak and against his property and all the people of his house, in my own right I Abûnâ bar Geribtâ—or against Ibbâ bar Zâwithâi—(6) will bring down upon you the curse and the proscription and the ban which fell upon Mount Hermon and upon the monster Leviathan and upon Sodom and upon Gomorrha. In order to subdue Devils (7) do I come, I Abûnâ b. G., and all evil Sacra-

ments and the tongue of impious Charm-spirits; I have come and smitten the Demons and Devils and evil Tormentors, the Gods (Idol-spirits) and female Goddesses—standing in serried rows and encamped in camps.

Commentary

A mutual charm of two sorcerers, each invoking his powers in turn in the other's behalf. An almost exact replica of the terms of the charm is found in the first part of No. 27. The two men named appear in No. 3, where Pabak's household is the subject of exorcism.

1. תוב: apparently a formal term of introduction; cf. 26: 3. It generally connects the several members of an incantation series. Cf. the "and" introducing the mortuary charm published by me in *JAOS*, 1911, 273. It may be correlative to תוב in l. 5.

פאבק: the Persian Pâpak, Justi, p. 241; cf. Arabic Bâbek, Greek παμβεκος. The name occurs in late Babylonian, Hilprecht and Clay, *BE*, ix, 68.

כופיתאי: Syriac כופיתא is a water-flask with a small mouth. For the character of the name, cf. Hebrew בקבוק, Χοΐζας, *Lu.* 8: 39 =. כחא "wine-pitcher," etc. For the hypocoristic termination in אי—, see to 1: 4. It is parallel in meaning and form to בקבקיה. *Neh.* 11: 17.

נציצא = נציצתא, 27: 3. Comparing the Rabbinic נִין, "a shining spark," and "white earth, gypsum," and נהין, "polish." I understand this word in the sense of "polished armor."

כלה קומתי דנורא = קומת דנורא, 27: 4; the parallel marks the gradual obscuration of magical formulas. Fire is the potent element against witches and demons, as the ancient means for destroying their arts. In Babylonia the fire-god Gibil was the chief god of exorcism in such magic, Tallquist, p. 25 ff.; for other examples in Semitic magic, see Thompson, *Semitic Magic* in Index. Iron, like the other metals, and excelling them, is a potent means against devils, Blau, p. 159; Thompson, in Index; in the *Testament of Solomon* is an anecdote of a devil afraid of iron (*JQR*, xi, 18); Josephus' exorcist used an iron ring. For the western world, see Pauly-Wissowa, *Real-Encyc.*, i, 50.

2. דכיא I supply from the parallel inscription. After it appear traces of ול, which letters are repeated to make the following word; a fault in the bowl required the rewriting of the characters.

לבישנא לבושא דארמסא: the garment of a potent being carried with it his powers. Compare the assertion by the magician in the charm noted to l. 1, in which he professes to be clad with the magical paraphernalia of Moses, Aaron, David, Solomon, etc., and see above, § 9. There is also to be recalled the magical garment of Marduk in the fourth of the Seven Tablets of Creation, while the magical robe which renders the wearer invisible is common property of folklore.

ארמסא דביא וממללא. ארמסא is found in the parallel bowl No. 27 (along with the rest of this phrase); in 19: 7; in 25: 4 מיטטרון מסא[אר]; in 11: 7 in the spelling ארמים; and in 7: 8, אירמים = Myhrman, l. 4, הירמים. The forms give the clue; ארמים is one of the Syriac spellings for the Greek Ἑρμῆς, e. g. Peshitto to *Acts* 14: 12; הרמים also occurs in Syriac. ארמסא is then the Hermes about whom gathered the extensive mystical cults and literature towards the beginning of the Christian era to which is given the epithet Hermetic. Summary reference may be made here to Reitzenstein's illuminating study *Poimandres* (Leipzig, 1904), also to G. R. S. Mead, *Thrice Holy Hermas,* London and Benares, 1906. The Greek Hermes, the messenger of the gods, was identified with the Egyptian Thot, the divine agent of human illumination—in a word the Logos of the Egyptian religion. This mystical function of Hermes-Thot is evidenced, e. g., by a passage in Justin Martyr: *εἰ γεγενῆσθαι ἐκ θεοῦ λέγομεν Λόγον θεοῦ, κοινὸν τοῦτο ἐστω ἡμῖν τοῖς τὸν Ἑρμῆν λόγον τὸν παρὰ θεοῦ ἀγγελτικὸν λέγουσιν* (*Apol.* i, 22; Migne, *Patrol. gr.,* vi, 57.).

This figure was also adopted in the syncretistic mysticism of the farther East, as the expressions cited from our bowls show. He is the word ממללא (= מלילא, 19: 7),[1] and the Metatron, that mysterious intermediate agency between God and his creation in Jewish Gnosticism (cf. § 13). But this Hermetic theology was not mediated to the Orient through Judaism, but through the Hermetic schools, which appear to have held out, into the twelfth century, in that obstinate center of paganism, Harran. Chwolson has collected the evidence for the survival in that region of the Greek religious philosophies,[2] and Reitzenstein has now trenchantly pointed

[1] The Ἑρμῆς λόγιος or λόγιον: Reitzenstein, *op. cit.,* 43; Abt, *Apologie des Apuleius,* 118.

[2] In his *Die Ssabier und der Ssabismus,* 1856. See now Dozy and de Goeje,

out (p. 166 ff.) the essential Hermetic quality of this last remnant of the old pagan philosophy. The magic of the Euphrates valley has caught up probably from Harran the figure of Hermes and easily identified it with the Jewish Metratron, the biblical Enoch, etc.[3] Hermes was the equivalent of the Babylonian Nebo, and a passage in the Mandaic Ginza throws light upon the expression, "clad with the clothing of Armasa"; in the Ginza we have a tradition that the angels invested Nebo with a dress of fire.[4]

The ממללא of our text is then a proper epithet of ארמסא. What is meant by the preceding epithet דביא? It occurs in the parallel text, and also in Stübe's text, l. 5, thus: מיטטרון מלאכה דביה. I suggest that דביה (דביא) means "who-is-in-Yah," an ancient mystical expression for the Logos; cf. the Johannine *πρὸς τὸν θεόν*, and the description of the Son as "in the bosom of his Father," and, "I am in the Father and the Father in me." Compare also 7: 8, יהו ביהו, and note.

3. מרירי (cf. 4: 4), reminiscent of the biblical קטב מ׳, for which see Joel, i, 100.

אבונא: a name of two Amoras.

גריבתא: "scabby"; cf. Gareb, *2 Sa.* 23: 38, and the Palmyrene גריבא, de Vogüé, *Syrie centrale,* no. 141; also the Arabic Juraib, Jarbâ.

איבא: the same name in *Seder ha-Doroth,* ii, 45. The form is shortened from *Abba,* see Lidzbarski, *Ephemeris,* ii, 8.

זויתאי: so the probable reading of the name here and below. It is hypocoristic from זויתא, "corner"; cf. the biblical name Ribḳa = Aram. רבקא, "stall." Is there here a pious allusion to the daughters of Israel as polished corners (זויות) of the temple, *Ps.* 144: 12?

אשיפנא: the verb is found in the Aramaic only in the Syriac, and but rarely, and in the bowls occurs only here.

Nouveaux documents pour l'étude de la religion des Harraniens, in the *Actes* of the 6th International Congress of Orientalists, II, 1, 281.

[3] Bar-Hebraeus, *Chron.,* ed. Kirsch, p. 5, where Hermes and Enoch are identified "by Greek books"; also a reference in Reitzenstein, p. 172, n. 3, to a Hermetic MS. bearing the name of Idris = Enoch. For this Enoch-theosophy see Joel, *Aberglaube,* ii, 16, 19.

[4] *Ginza,* R, p. 54, ed. Petermann; see Brandt, *Mandäische Schriften,* 89.

אישפא דימא וגו׳: the spell on the sea and Leviathan was mightiest in magical history, for it was the first great act of "white magic"; cf. the Marduk legend. A survival of this mystical aspect of creation appears in *Job* 38: 8-11, which concludes: "And He said: thus far shalt thou come and no farther, and here shall thy proud waves be stayed"; cf. *Jer.* 5: 22, *Ps.* 104: 6 ff., *Job* 38: 8 ff. The subjection of the abyss is a frequent magical allusion in the papyri, e. g. the Great Magical Papyrus of Paris, l. 3062 ff. (Dieterich, *Abraxas,* 140; Blau, p. 113; Deissmann, *Light,* 258). The sealing of Tehôm is referred to in Targ. Jon. *Ex.* 28: 30.

4. חתחטתו: the scribe began to write the perfect, passed into the imperfect (which we should expect here) with the second letter and returned to the perfect termination; he amended his mistake by rewriting the word. In general the scribes aimed at carefulness. A word so corrected is sometimes deleted with a line.

איתתיה: for the various forms, see Glossary, *s. v.* אינתתא.

בבניה: a Mandaic and also Targumic idiom for בנוהי, Nöldeke, *Mand. Gram.,* § 144.

בי קשתא וגו׳: בי a form of -ב found in Targums and Talmud (also in the Palestinian charm cited to l. 1). The terms are reminiscent of Marduk's slaying of Tiamat in the Babylonian creation legend: "Marduk made ready bows .... The bow and the quiver he hung at his side"; cf. the praise of Marduk's bow in the fifth tablet (King, *Seven Tablets of Creation,* ii, 63, 83, and fragment cited, p. 207); also numerous biblical parallels: *Hab.* 3: 9, cf. v. 11; *Ps.* 7: 12-14; *Dt.* 32: 41 (where Gressmann, *Isr.-jüd. Eschatologie,* 78, would read אשפה for משפט). As in l. 1 with the clothing of Deity, so here with his magical arms the magician declares himself invested. But the phraseology may be based on magical practice, a symbolical shooting at simulacra, in the same way as these are burnt, peeled off, mutilated, etc. A very similar passage is to be found in one of the Manichaean texts discovered in Chinese Turkestan, in which the conjurer shoots with his bow and arrow at the demon, who falls dead; *Sitzungsberichte* of the Berlin Academy, 1908, 401.

ניבנא: participial form from נבב; the Peal is unique.

5. חוב: the other part of the mutual charm now begins. The contrast is further expressed by בידידי, "on my part."

או באיבא: this name was omitted in its proper place and is now inserted.

6. אחרמתא: for the prosthetic א see Nöldeke, *Mand. Gram.*, § 24.

על חירמון: a reminiscence of the myth of the confederation of the fallen angels upon Hermon (n. b. √ חרם); see *Enoch* 6: 5 f.: "they named the mount Hermon, because they had sworn and bound themselves by curses upon it"; also 14: 7 ff. Philo of Byblus also connects the Titans with the Lebanons and other mountains of Syria: "These begat sons of greatest size and superiority, whose names were given to the mountains which they occupied, so that some of them are called Kassion and Libanos and Antilibanos and Brathu."[5] And Hilary of Poitiers adds something to our knowledge of the myth: "Hermon is a mountain in Phoenicia, the interpretation of whose name is *anathema*. Moreover it is the tradition—from whose book it comes I know not,—that the angels lusting after the daughters of men, when they descended from heaven, assembled on this very high mountain."[6] Cf. the anointing of Nebo by the evil gods in the Mandaic mythology, Brandt, *Mand. Rel.*, 126 f.

7. סידרי סדרין: construct of accumulation.

רפדי מרפדי: "camping in camps." רפד is very rare in Hebrew and Aramaic, but is frequent in Assyrian, where among several meanings it is found in this sense (cf. the biblical place-name רפידים). מרפד occurs in a MS. cited by Rabbinowicz to *Megilla* 10b: בית מרפידו של אדוני, where מ' = Hebrew שכינה.[7] The variant in 27: 11, מרפדי מרפדי, parallel to סידרי ס', is probably the correct form. The allusion to the serried battalions of the demons is epical, perhaps of mythological origin.

Translation

In thy name, O Lord of salvations, the great Saviour of love.

Designated is this spell and mystery and strong seal for the sealing of the household of this (2) Ardôi bar Hormizdûch, that from him may depart and remove the evil Demon and the evil Satan, who is called SP'SK,

the Mighty Destroyer, who kills (3) a man from the side of his wife and a woman from the side of her husband, and sons and daughters from their father and from their mother,—by day and by night *omo, omo,* walking. (4) I adjure thee that thou do not kill off this Ardôi b. H. from Aḥath his wife, and that thou do not kill off Aḥath bath Parkôi from Ardôi her husband, (5) and that thou do not kill off their sons and their daughters, whether those they have or those they shall have, from this day and forever, neither by night nor by day. In the name of Z'Z'Z', ḤSR, ḤSR, ḤSR, P'SP'SP', TMR, TMR, (6) TMR, NḴṬ, ZHZHZH, ḤSR, P'S, TMR, ḲḲ, 'STW, YWPṬ, YWPṬYH, from the burning fire, SḲSYN, SYN, SYN, SḲYWN; SḲ, his name ḲS his name. This is the great name before which the angel of death is afraid, (7) and when he hears it, frightened he flees and is swallowed up before it and (just so) before this Ardôi b. H. shall he fear and flee ..... [and from] Aḥath his wife, bath P., and from all their sons and from (8) all their daughters, whether those they have or those they shall have. PWṬSS, Amen. In the name of ḲḲ, 'STW, YWPṬ, YWPṬYH, from the burning fire, SḲSN, SḲSYN, SḲYWN, ... [This is] the great name before which the angel of death is afraid and when (9) he hears it, frightened he flees and is swallowed up before it and before this household. Moreover now in this great name of which is afraid [the angel of death, etc.—he shall flee from Ardôi b. H.] and from Aḥath his wife b. P., (10) and from sons and daughters, those they have and those they shall have. PWṬSS, Amen. In the name of 'STW, YWPṬ, etc. [This is the great name] before which the angel of death is afraid, and when he hears it (11) frightened he flees and is swallowed up; so moreover now on the authority of this great name shall fear and flee and go forth the evil Demon ..... (from Ardôi, etc.). PWṬSS. According as it is said: "And YHWH said to Satan: YHWH rebuke thee, Satan; YHWH rebuke thee, who chooses Jerusalem. [Is not this a brand plucked from the burning? Amen. Amen.]"

COMMENTARY

A charm for a man and his family against a murderous spirit. The charm consists in magical syllables constituting "this great name" and the formula is repeated four times; see p. 65.

1. מרי: construct = Syr. מרא. מרי אסואתא וג': a frequent epithet in these bowls of the deity invoked, along with אסיא רבא דרחמי, e. g. 7: 1. Cf. the frequent invocation in Pognon's bowls: אנאת אסיא, אנאת אסיא דמאסיא נישימאתא, etc. The theme אסה is equivalent to σώζω in the New Testament and Latin *salus*, German *Heil*, for which modern English offers no synonym, the good old word "health" having been specialized. The word implies a remedy against evil spirits and black magic. It is also used concretely, of the phylactery, "this א", Wohls. 2426: 1.

The epithets here used are interesting as being probably one of the few survivals in these inscriptions of the ancient Babylonian theological terminology; there we have, in the penitential and magical literature innumerable appeals to the love and curative powers of the deities; thus Marduk is god of love and life,[1] Ea is *a-si-e*.[2] And the exact equivalent of אסיא רבא is found as an epithet of Gula, the consort of Ninib: *azugallatu bêltu rabîtu*, "Great Healer, Mighty Mistress"; and of Bau, who became identified with Gula, e. g. *asîtu gallatu*.[4] Ninib was domiciled at Nippur and these epithets of his consort may have been particularly Nippurian, and so have survived in the bowls coming from that locality. I have not been able to discover the parallel masculine epithet for Ninib.[5] This invocation is doubtless pagan, being distinct from the numerous biblical epithets expressive of the love and power of God. It is never associated with the Jewish Divine Name. Σωτήρ is a common epithet of the Greek gods, Zeus, Apollo, Asklepios, Hermes, and is an epithet of the Deity in the N. T., e. g. I *Tim.* 1: 1. Cf. also the Phoenician בעל מרפא, *CIS*, i, no. 379, and *Ex.* 15: 26, אני יהוה רפאך. Also n. b. the common epithets for

[1] *La magie ass.*, Fossey, 323, 365, 369; n. b. his title *rêménû*.

[2] This reference I have not been able to verify.

[3] III R, 41, col. 2: 29; Delitzsch, *Hwb.*, 197a; Schrader, *KB*, iv, 78.

[4] R. C. Thompson, *PSBA*, 1908, 63.

[5] Radau (*BE* xvii, pt. 1, p. ix) endeavors to find the same title for Ninib in his explanation of the Aramaic rendering of NIN-IB, אנושת (see Clay, *JAOS* xxviii, 1907, 135, and Montgomery, *ibid.*, xxix, 204). He interprets it as = *en-usâti*, "lord of help," our very title (cf. Delitzsch, *Beiträge z. Ass.* i, 219, for equivalence of *AZU* with *âsû*), and with the same root. The interpretation would be very agreeable to me in view of the above remarks, but Radau omits to explain the Aramaic rendering of *s* (or *z*) by ש when the Aramaic has the root אסא, while Clay's explanation appears to me the more satisfactory.

the love of God (√ רחם) in the O. T. and Koran, also in the Palmyrene texts.[6] Pradel has collected in his *Griech. u. südital. Gebete,* 42 f., a number of the epithets denoting the healing and merciful character of God; he is there *ἰατρὸς ψυχῶν, ἐλεήμων,* etc.

מזמן וג׳: a standing introductory formula in these bowls (with כסא, etc.). זמן, Pael, appears to be used in the sense in which the Peshitto has it as the rendering of the Hebrew הקדיש, "sanctify," e. g. *Josh.* 7: 13, *Jer.* 12: 3. Cf. the religious connotation of the parallel root—יעד.

For חתמתא as a *pa"âl* formation see Nöldeke, *Mand. Gram.,* 121. Cf. the Mandaic forms and formula cited by Lidzbarski, *Eph.* i, 96, n. 1: חאתאמתא וזאראזתא ונאטארתא. The "charm, mystery, seal," are identical, and refer to the Great Name of the incantation. For the identity of name and seal, see Heitmüller, *"Im Namen Jesu,"* 143, 150, etc.

2. ארדוי: hypocoristicon in *-ôi,* abundant, with variants in *-âi* and *î,* in these texts (see Nöldeke, *Persische Studien,* in *Sitzungsberichte,* phil.-hist. Class, of the Vienna Academy, 1888, p. 387.). The name is formed from one of the numerous Persian names in *ard-* or *art-;* it occurs in Myhrman's text, see his note, p. 349.

חורמיזדוך: a frequent Persian name see Justi, p. 10.

יזה, or יזה = יזע, from זוע or זעע; but as יזה, from זחח (found in Heb., *Ex.* 28: 28, cf. the Aramaic זוח), see the forms יזרחן, 10: 6, יזחן, 12: 10, אתאזחא, Pognon, B. יזה, 31: 3.

"Demon, Satan, Destroyer," all epithets of the one demon; cf. above pp. 58, 68.

צפעסק: with reversal of the alphabetic order of the first four letters—to indicate the *bouleversement* of the demon?

אבדה גברא: *abbâda gabbârâ, abbâd* not otherwise found; for the formation cf. Nöldeke, *Syr. Gram.,* § 115. Notice that the Hebrew and Greek Abaddon is represented in *Rev.* by *ὁ ἀπολλύων,* as though the original was a noun of agent, not an abstract. The epithet = המלאך המשחית, 2 *Sa.* 24: 16, המשחית, *Ex.* 12: 23, the Samaritan מחבלא, etc.

3. ויבנן: for the vocalization of the conjunction cf. וידלא, 14: 6;

[6] Baethgen, *Beiträge,* 82 f., Lidzbarski, *Handbuch,* 153.

וילשלהיבת, 14: 7, etc. The conjunction is also similarly pointed in *Targum Onkelos,* Dt. 14: 37 (ed. Berliner), ויחלף; see Berliner's note, ii, 140.

אימיהון: the half-vowel after מ is indicated, as in Mandaic.

אומו אומו מתאלך: thus the uncanny stealthy movements of the demon are expressed.

4. אחת: probably the first element in such a name as אחתראבוה, "sister of her father," cf. אחדבוי, "brother of his father," a frequent name in the Talmud. Cf. biblical אחאב, and the Babylonian Aḥatbu, Aḥatšuna, Aḥat-immišu, etc. (Tallquist, *Neubabylonisches Namenbuch,* 3), and similar names in the Glossary.

פרכוי: hypocoristic of Persian Farruchan, Justi, p. 94 ff.

5. דהן = hâwên, cf. מחן, רמן, 6: 4, pl. ppl. with future sense, as common in Syriac.

דנן: appears only in this phrase, so 16: 13, 19: 20, is archaic and seldom in Talmud; for the pronouns see end of Glossary C.

6. "From the burning fire," i. e. of hell. For the threatening of demons with pangs of hellfire, see Pradel, 21, l. 11 ff.; for the threatening of demons in general cf. the Paris Magical Papyrus, l. 1227 ff. (ed. Wessely), and see in general Tambornino, *De ant. daemonismo,* 78.—The angel of death appears in Schw. F. The charm of which he is afraid is *à potiori* more fearful to the demon.

7. יעיריק: for the second י representing the *šewâ,* cf. the Sabbioneta text of *Targum Onkelos,* ed. Berliner, to *Ex.* 21: 13, *Num.* 35: 26. For *u* in ידחול, see Nöldeke, *Mand. Gram.,* 219. N. B. the two prepositional forms קראמוהי and קדמיה along side of each other, the latter attributed to the "Palestinian" dialect by Dalman, *Gram. d. jüd.-pal. Aramäisch,* 181.

The Great Name, or True Name, at which devils and all things created tremble and flee away, is a common thesis in the Greek magic: Wessely, xlii,[1] 65, *ad infra*: the God of Israel whom the heavens bless and (the oceans?) fear and every devil trembles; Dieterich, *Abraxas,* 140, l. 55 ff: the name at which trembles the Gehenna of fire and every mountain trembles; Wünsch, *Antike Fluchtafeln,* no. 4, l. 44 (with editor's notes), and no. 5,

[1] "Neue griech. Zauberpapyri" in *Denkschriften* of the Vienna Academy, phil.-hist. Class, xlii, 2: his earlier publication in vol. xxxvi is cited as "xxxvi."

l. 21. It is not necessarily a Jewish phrase, Wessely, xxxvi, 50, l. 244 ff: "This is the primitive (πρωτευον) name of Typhon at which trembles earth, deep, hell, heaven," etc. Cf. Heitmüller, pp. 148, 231, for citations from the Fathers, and Pradel, p. 40 f., for Greek magic. Dieterich regards this trembling before the Name as of Orphic origin, p. 141.

The bowl CBS 16093 is almost identical in text with this one, and bears the same design. It is about two-thirds as long. Its clients are the couple named in Nos. 32 and 35. Also another bowl (unnumbered) is practically the same as the present text, but shorter, with the same design. also made out for the clients of Nos. 32 and 35.

No. 4 (CBS 2923)

Translation

Covers to hold in sacred Angels and all evil Spirits and the tongue of impious Amulet-spirits. Now you are conquered, you are charmed; charmed, you are charmed and sealed in each one of the four (2) corners of his house. You shall not sin against Pâbak bar Kûfithâi, nor shall any do folly against him, against all the people of his house, either by night nor (3) by day; because I have bound you with an evil charm and a sure [seal]. Again, I have charmed you with the charm with which Enoch was charmed by his wicked brothers. Again I charm you with an evil and galling seal. Again, (4) I charm you with the seal with which were charmed the Seven Stars and the Twelve Signs of the Zodiac unto the great day (5) of judgment, and to the great hour of the redemption of your heads: you shall not ..., nor sin against them, against Abûnâ bar Geribtâ, and none shall at all do folly against them, namely the people of the household of Pâbak (6) b. K., neither by night nor by day, because well sealed is his house and well armed, and with a great wall of

bronze have I surrounded it. *I,* what I desire I grasp, and what I ask I take. (7) *You* are in the place of Abûnâ b. G. and in the place of Pâbak b. K.

Commentary

A general charm against all evil spirits, made out for the Pâbak of No. 3. The introductory lines are of interest as they definitely settle the use of these bowls (§ 8). The design represents the sorcerer waving his bough, see p. 55.

1. מיטלי דלמיכל : מ׳ is to be identified with the plural of the Syriac *mᵉṭallᵉthâ, mᵉtallê,* or *maṭṭᵉlê;*[1] the י probably represents the pronunciation *mcṭṭᵉlê.* The second word מיכל is the infinitive of כול, "contain," whose original meaning is retained in the Hebrew, even in the sense of holding in with force, e. g. *Jer.* 6: 11, over against the later meaning of "measure."

מלאכין קדישין: See p. 79; also cf. חומריא קאדישאתא, *Ginza,* ed. Petermann, p. 231, l. 10, and the Mandaic רוחא דקודשא.

ורוחי: the first letter was written by inadvertence.

זידני זידניתא : case of dittography.

אהשתא: for the prosthetic א, cf. Nöldeke, *Mand. Gram.,* § 32.

3. דאסירי ביה וג׳: we find here the idiom of the active use of the passive participle, as in Neo-Syriac; see Nöldeke, *Gram. d. neusyrischen Sprache,* §§ 103, 143. An approximate use of this participle in verbs meaning "to carry," etc., and also with אסר is found in classical Syriac (Nöldeke, *Syr. Gram.,* § 280). But in these instances the participle is middle voice in meaning; thus אסיר כלילא means, "he bound himself with a crown." In the present case the participle has assumed a completely active sense, with an object other than the subject.

אחנוך : this spelling is found in a passage from the lexicon of Karmsedinoi, quoted by Payne-Smith, col. 266, *s. v.* אנטיכריסטוס.

אחוי : "his brother" and "his brothers" have the same spelling, differing as *-ûhi* and *ôhi;* the forms in *-ûi, ôi* are Mandaic, and also Palestinian.

There is reminiscence here of a cycle of personal legends concerning Enoch which have been preserved only in the Arabic, see Weil, *Biblische*

[1] See Nöldeke, *Syr. Gram.,* § 59.

Legenden der Musselmänner, p. 62, a compilation from manuscript sources.[2] According to these legends Enoch (Idrîs), who foretold the flood, suffered at the hands of the wicked Cainites, even as Abraham was made a martyr for his faith. Our passage must refer to some spell laid upon Enoch by his adversaries. The early Samaritan theologian Marḳa (fourth century) cites a book of the Wars of Enoch, which may have contained these traditions.[3] A spell laid by the wicked on a saint was *à fortiori* potent; see above, p. 64, for other apocryphal examples. For Enoch in incantations, cf. 19: 17.

מלויאשין: the word is written twice; in the first case the scribe omitted the א, then inserted it above the line, and on second thought rewrote the word correctly. It is the Syriac and Mandaic מאלואסא. The first י is unique; it is to be classed with the phenomena noticed by Nöldeke, *Mand. Gram.*, 223, where, e. g. *-yûn* for *-ûn*.

יומא רבא, שעתא רבתי: cf. "the great day," Hexaplaric Syriac to *Is.* 1: 13, the New Testament "that day and that hour," the Syrian Ephrem's expression, "the hour of judgment" (ed. Lamy, iii, 583), and the Arabic "the hour." For the feminine form רבתי, see Nöldeke, *Mand. Gram.*, 145.

In lines 4, 5, we are introduced to an extensive and ancient cycle of myths concerning the relation of the Seven Stars (the planets with sun and moon) and the twelve zodiacal signs, with the creator of the kosmos. There were two distinct developments in this mythology; in the polytheistic development the planets became highest deities. But in what we may call the monotheistic trend of thought, in which one of the gods, like Marduk became monarch, or, as in Israel's faith Yahwe is the sole God, stress is laid upon the antithesis between the Creator-God and those celestial divinities. The present regulated orbits of the planets and the fixed positions of the zodiacal constellations signify that these beings, once autonomous, have been brought into subjection to a higher god. In process of time they came to be regarded as "spirits in prison." Thus Tiâmat became, when slain, the fixed firmament (or the zodiac?), while, according to Zimmern, *KAT*, 502, the eleven Helpers of Tiâmat are the twelve signs of the zodiac, *minus* that of the Bull, the sign of Marduk

[2] For the later Jewish Enoch literature see *Jew. Enc.* i, 676.

[3] See Montgomery, *The Samaritans*, 224.

himself. This unfavorable attitude toward the celestial bodies is thus ancient. The monotheistic trend was native to the Hebrew theology, and in line with it we have the passage in *Is.* 24: 21 ff., according to which "the host of the height on high," as well as the kings of the earth are punished, being bound in prison. For the later theology the Book of Enoch is a good witness; e. g. 18: 13 ff.: "I saw there seven stars as great burning mountains. When I inquired about it, the angel said: This is the place where heaven and earth are at end; this is a prison for the stars and the host of heaven. The stars which revolve over the fires are they which at the beginning of their origin transgressed the command of God for they did not come forth at their time. Then he became angry at them, and bound them for 10,000 years, till the time when their sin is accomplished" (cf. 21: 6). The "spirits in prison" of 1 *Pet.* 3: 18 ff. is in line with the same notion, depending directly upon *Is.* 24: 21 ff., and we may compare the invidious use of "planets" in *Jude* 13, in the expression ἀστέρες πλανῆται.[4]

But our text also bears witness to another development of the myth. The "binding" of the Seven Stars and the zodiacal signs was for a fixed term. According to the passage quoted from *Enoch,* it was for 10,000 years. In the Isaianic passage, a term is fixed: "after many days shall they be visited."[5] In *Peter* the ancient myth is revived in the notion of Christ preaching to the spirits in prison. It is left somewhat obscure what shall take place when "they shall be visited," or when "their sin is accomplished" (with *Enoch*). Exegetes differ over יפקדו in Isaiah, whether the verb is to be understand favorably (of a visitation for release) or unfavorably (of chastisement). Also the Petrine preaching to the spirits in prison is understood by commentators in equally opposite ways. In our text the term of "the great day" and "the great hour" is evidently to be one of release to the stars bound in prison. There appears to be applied here the idea of a universal Apokatastasis. Now for this notion of the redemption of the imprisoned celestial deities we have a basis in Babylonian

[4] See Bousset, *Hauptprobleme der Gnosis,* c. i, "Die Sieben." In the Mandaic system the seven planets and twelve signs have become utterly evil. In this line of thought, taken up by magic, there is, I think, an open anthesis to astrological fatalism.

[5] There is literal reference to this passage in No. 34: 6,— בפוקדנא. There is possibility of confusion between פורקנא and פוקדנא.

mythology. In Tablet vii, l. 27 f. of the Epic of Creation (King, *Seven Tablets of Creation*), among the titles given to Marduk are: "Who had mercy upon the captive gods; who removed the yoke from upon the gods his enemies." And Pinches has now published a text ("Legend of Merodach," in *PSBA*, 1908, 53 ff.) which is a late supplement to that epic, and apparently continues the theme of the release of the captive gods: "He (Marduk) goes down to the prison, he rises to approach the prison. He opened the gate of the prison, he comforts them. He looked upon them then, all of them; he rejoices. Then the captive gods looked upon him. Kindly the whole of them regarded him." The "day of redemption" of our text is therefore in line with this Babylonian myth, and probably the passages from *Isaiah* and 1 *Peter* are also to be explained in consonance with it. This mythical trace probably descends from the Enoch literature.

5. Abuna is intruded awkwardly.— אסכלי for אסכולי.

6. זרוי מזרז: the root זרז (מזרז, זריז) is found elsewhere in these bowls, and also in those of Pognon and Lidzbarski (see Glossary C). It is used in parallelism with אסר, etc., in preventive magic. The verb means in the Aramaic dialects "to arm." But Pognon (B, 74) assumes for the noun זאראזתא the meaning "admonition," and Lidzbarski (*Eph.* i, 96, n.) the sense of "binding up" a letter, etc. But there is no necessity in departing from the common meaning; it refers to the magical armament of persons and things with power to resist the forces of evil; so a passage in the *Ginza*: "Arm yourselves with arms not of iron" (ed. Petermann, p. 25, l. 20). That is, it is the magical equipment of a person or charm against evil. Paul may have been making use of well-known magical language when he exhorted the Ephesians to "put on the panoply of God," *Eph.* 6: 13. The following phrase, "a great wall of bronze," is equally parabolic;, bronze possessed atropaic use in magic, like the other metals; cf. 15: 7, and see Pauly-Wissowa, i, 50; a Talmudic instance, *Sabb.*, 66b.

אנה דבעית וגי׳: our magician displayed the same assurance in No. 2. At least this confidence had its psychological effect on the client.

אתתן בתריה: "hoist with their own petard"!

Translation

Wholly charmed and sealed and bound and enchanted [are ye], that ye go away and be sealed and depart from the house [and property?] of Farrûch bar Pušbî and Nêwândûch bath Pušbî and Abândûch bath Pušbî, and that there depart from them (2) all evil Liliths and all Demons and Devils and Spells and Idol-spirits, and the Vow and the Curse and the Invocation, and evil Arts and mighty Works and everything hostile. Ye are bound with the seven spells and sealed (3) with the seven seals in the name of Eldedabya Abi Ponan, lord of spoil and curse ..... I conjure against you in the name of the great Prince, that thou keep Farrûch b. P. and Nêwândûch b. P. (4) from the Evil Eye and from the mighty Satan, and from ... and from the many Satyrs in the road of Hamad, in the name of YHWH, 'H, B'H. Amen, Amen, Selah. (5) "According

to the mouth of YHWH they would encamp, and according to the mouth of YHWH they would march; the observance of YHWH they kept according to the mouth of YHWH by Moses." "And YHWH said to Satan: YHWH rebuke thee, Satan, YHWH rebuke (6) thee who chose Jerusalem. Is not this a brand plucked from the fire?" Amen, Amen, Selah.

COMMENTARY

A general incantation against evil spirits for a man and his two sisters. The latter half Hebraizes.

1. The duplication of the ppls. is for intensity, "twice charmed." קיטרין error for קטירין. — לחישין, the only instance of this verb in the bowl-texts.

פרוך: cited by Payne Smith, col. 3246; cf. *Farruchan* and composites in *farruch*, Justi, p. 95 f.— פושבי?

אבנדוך, ניונדוך: Justi, pp. 228, 1.

ויתּ: by heedlessness of construction; cf. l. 3.

תנזח: נזח (also Talmudic) = זחח, see to 3: 2.

2. אסרי: the place of the term in the list shows that the charms were regarded as personal entities. Cf. above, p. 86.

"Seven spells," etc.; cf. the fever-remedy in *Sabb.* 66b, "7 twigs from 7 trees, 7 nails from 7 bridges," etc., etc. For this magical number in the Talmud, see Blau, pp. 73, 86, who quotes the Jewish maxim כל השביעין חביבין.

3. אלדרביה וגי: obscure, probably name of a genius; אבי may indicate his paternal relation to another well-known genius. For רביה cf. 2: 2.

"The great Prince": the technical title for Michael (see p. 97). It is to be observed that this bowl is peculiarly Jewish in theological form, while the following adjurations are in Hebrew. The double use of אשבעית introduces a mixed construction here. The verb generally is used of exorcism, with על of the object, = ἐξορκίζω. But at the same time he *adjures* the great Prince, whom he addresses in the second person. All these terms denoting magical binding could be used indifferently of the good and evil genii. The angel is adjured in Hebrew, which according to belief was the only tongue the angels knew.

4. "The hobgoblins in the way of Hamad, the many"; cf. the Rodwell-Halévy bowl in which a geographical location is given, "upon the road to Huṣi," and Wohls. 2417, a demon who dwells in Samki. The reference is to the demons which beset some particular road. For the satyrs see p. 80. הרבים in the text is awkward.

5. Literal quotations from *Num.* 9: 23 (cf. 26: 1 f.). The applicability of this quotation lies in its triple use of the efficacious word שמר (as above in l. 3). Hence the magical use of such Psalms as the 121st, 122d, the Aaronic Blessing, etc. Later Kabbalism, found in the theme the abbreviation of שדים מזיקים רוחות, see Schwab, *Notices et Extraits* of the Paris National Library, xxxvi, 1 (1899), 288.

7. There is no evident sense in these words around the figure. אהעה and אשר are reminiscent of the interpretation of the Name, *Ex.* 3: 14; להלה = "avaunt"?, משה = Moses.

No. 6 (CBS 2916)

Translation

A *press* which is *pressed* down upon Demons and Devils and Satans and impious Amulet-spirits and Familiars and Counter-charms and Liliths male (3) and female, that attach themselves to Adaḳ bar Ḥâthôi and Aḥath bath Ḥâthôi—that attach themselves to them, and dwell (4) in their arch-ways, and lurk by their thresholds, and appear to them in one form and another, and that strike and cast down and kill. And this *press* (5) I *press* down upon them in days and in months and in all years, and this day out of all days, and this month out of all months, and this year (6) out of all years, and this season out of all seasons. And I come and put a spell for them in the thresholds of this their house, and I seal and bind them. Fastened up are their doors (7) and all their roof.

And this *press* I *press* down upon them by means of these seven words, by which heaven and earth are charmed: in the name of the first, *Gišmîn* and *Marbîl;* of the second, *Gišmîn* and *Marbîl;* of the third, *Marbîl;* of the fourth, *Mašbar;* of the fifth, *Môrah;* of the sixth, *Ardibal;* of the seventh *Kibšîn* (presses), with which is *repressed* (9) ..... with them are *repressed* all evil Spirits and impious Amulet spirits and Liliths male and female and Familiars and Counter-charms and Words, that they appear not to Adaḳ b. Ḥ. and to Aḥath b. Ḥ. (10) and to ..... neither in dream by night nor in sleep by day, and that they approach neither their right side nor their left, and that they kill not their children, and that they have no power over their property, what they have (11) and what they shall have, from this day and forever.

And whoever will transgress against this *press* and does not accept these rites, shall split asunder violently and burst in the midst, and the sound of him shall resound with the resonance of brass in the spheres of heaven, (12) and his abode shall be in the seventh (?) hell of the sea, from this day and forever. Amen, Amen, Selah.

Commentary

A charm in behalf of a couple (each with a mother of the same name) and their household; the incantation consists in seven magical words, and concludes with a threat against any who destroy the bowl and ignore its ban.

1. כיבשא: cf. מיטלי, 4: 1, and see § 8. Cf. the verb, l. 5. N. B. similar use of כבש in *Pesiḳta R.* 16 (Jastrow, p. 611): the sacrifices are "presses because they press down the sins."

2. ניסי, also 12: 9, in both places before קיבלי. Out of several possibilities of interpretation I suggest that of נ' in the sense of "side" (cf. 34: 4), and then one who is familiar (Jastrow, *s. v.*), hence = the πάρεδρος or familiar spirit of the Greek magic; e. g. the ὀνειροπομποί and πάρεδροι in Justin Martyr, *Ap.* i, 18, Eusebius, *H. E.,* iv, 7: 9, occurring also in the magical papyri, Dieterich, *Abraxas,* 161, n. They may be the genii invoked by manipulation or rubbing of the amulet as in the Arabian Nights. In Arabic superstition we learn of the "follower," *tâbi'u,* that accompanies the bewitched man, Nöldeke, *ZDMG,* xli, 717. And cf. the

Satan who is a "comrade" to an evil man, *Karîn,* in the Koran (e. g. 41: 24), see van Vloten, *WZKM,* vii, 182 ff., גיסא could be the Syriac word for marauding troop, an appropriate description for a demoniac species, but the meaning given above is more appropriate in the context.

3. אדק: cf. the Persian name Adaces, in Ammianus, see Justi, p. 2, and cf. Nöldeke, *Persische Studien,* 417.

חאתוי: cf. the Syriac name *Ḥâthî,* "my sister," cited by Payne Smith, col. 1408, here with the Persian diminutive ending.

גובתיהן: the Syriac גובא, "transverse beam," hence probably door lintel,—so Payne-Smith, col. 670; radically the word refers to the *arch* of the doorway. For the abodes of the demons, see p. 76.

בדמו דמו: the same phrase in the Mandaic, Nöldeke, *Mand. Gram.,* § 216, 2.

מחן, רמן: cf. *Mk.* 9: 14 ff., *Lu.* 6: 4.

5. For the selection of a special day for the exorcism, see p. 55.

6. אוינא: unique form; אזל is treated in some forms as though אזז, and here metaplastically as אזא.

חברנא: the only occurrence in the bowls of this ancient magical term. —The root צור is used here not in its Aramaic sense.

בתיהן = ביתהן, cf. l. 4.

7. אינרהן: cf. *Pesaḥ.* 111b, רבי אינרי, of the demons.

8. These magical words are wholly obscure; see § 11.

10. "Sleep by day": cf. the special term in 7: 16. The midday siesta was perilous, especially for those in the fields; in the Greek superstition this was the chosen time for attacks by the satyrs and fauns, whose place was taken in Jewish legend by the קטב מרירי a demon representing sun-stroke, etc. See Grünbaum, *ZDMG,* xxxi, 251 f., and Roscher, *Ephialtes.*

Magical protection at right and left hand is frequently referred to in Babylonian sorcery; e. g. the *Utukki*-series iii, 93 (Thompson, i, 11); or four deities surround the sorcerer, in front and back, at right and left, *ibid.,* iii, 142; the *Maḳlu*-series, vi, l. 123 f. Cf. 13: 7.

תישילטון: for the new vowel see Nöldeke, *Mand. Gram.,* § 25.

11. The penalty for infraction of the charm is bombastic enough! For the threatening of demons, see above, on 3: 6.

ניבר, ניפקא: Mandaizing spelling for נעבר, נפקע; also אחא = עחא. A dialectic formula may be used here. N. B. נ of the preformative, ניזם from Syr. זמם, and נינלי is Syriac over against the Rabbinic and Mandaic forms.

12. "In the seventh hell" (with awkward use of the numeral) in contrast to the seventh heaven. For the seven hells, see Eisenmenger, ii, 302, 328 f.

No. 7 (CBS 16007)

This bowl is a replica to that published by Dr. Myhrman of Upssala (No. 16081), see above p. 20. The latter is more perfect than my text, in fact almost the only perfect one in the collection; for this reason and also for the value of comparing the numerous variants I give the two texts in parallel, making such emendations as appear necessary in the first-published text, which amount chiefly to the proper grammatical distinction of *yod* and *waw* and *he* and *ḥeth*. It may be observed that the designs in the two bowls differ: in 16007 merely a circle enclosing a cross, in 16081, a linear figure, the stem surmounted by a head capped, at the other end a pitchfork-like termination (the forked tail of the demon?), while four rays represent the limbs. On either side of the figure are three characters like the Greek Σ, or looked at from the side like ש, with which we may compare the ש's shuffled into Pognon's texts, see p. 60. For convenience of reference I give the same line-numbering to Myhrman's text as to my own.

In the commentary I make such few notes as are necessary on Dr. Myhrman's ably edited text.

Translation

In thy name, O Lord of salvations, (2) the great Saviour of love.

I bind to thee and seal (3) and counterseal to thee, the life, house and property of this Yezidâd (4) bar Izdândûch; in the name of the great God, and with the seal of Shadda El, (5) and by the splendor of Sebaoth, and by the great glory of the Holy One: that all ... Demons and all mighty Satans remove and betake themselves and go out (6) from the house and from the dwelling and from the whole body of this Yezîdâd b. I.

(7) Again I bind to thee (Myhrman, to you) and seal and counterseal to thee (M. to you) the life and house and property and bedchamber of Yezîdâd (8) b. I., in the name of Gabriel and Michael and Raphael, and in the name of the angel 'Asiel and Ermes (Hermes) the great Lord. [In

the name of Yahu-in-Yahu] (9) and the great Abbahu and the great Abrakas (Abraxas), the guardian of good spirits and destroyer of evil spirits, I guard to thee (M. to you) the life, house, dwelling (10) and property of this Yezîdâd b. I. And I seal to thee (M. to you) the life, house and dwelling of this Merdûch bath Bânâi, that there sin not against you (M. them) all evil Arts (11) and all (magic) Circles and all Necklace-spirits and all Invocations and all Curses and all Losses and all ... and all sore Maladies and all evil Satans and all Idol-spirits and all impious Amulet-spirits and all mighty Tormentors, (12) which under my own hand I banish from this house in the name of Pharnagin bar Pharnagin, before whom trembles the sea and behind whom tremble the mountains, in the name of HH, HH, and in the name of (13) Bar-mešteel, whose proscription is proscribed and none trespasses upon his ward.

Lo, this mystery is for frustrating you, Mysteries, Arts, and enchanted Waters and Hair-spirits, Bowls and Knots and Vows and Necklace-spirits and Invocations and Curses (14) and evil Spirits and impious Amulet-spirits. And now, Demons and Demonesses and Lilis and Liliths and Plagues and evil Satans and all evil Tormentors, which appear—and all evil Injurers—in the likeness of vermin and reptile and in the likeness of beast and bird (15) and in the likeness of man and woman, and in every likeness and in all fashions: Desist and go forth from the house and from the dwelling and from the whole body of this Yezîdâd b. I. and from Merdûch his wife b. B., and from their sons and their daughters and all the people of their house, (16) that ye injure them not with any evil injury, nor bewilder nor amaze them, nor sin against them, nor appear to them either in dream by night or in slumber by day, from this day and forever. Amen, Amen, Selah.

And again I swear and adjure (17) thee: May the great Prince expel thee, he who breaks thy body and removes thy tribe. And by the seventy Men who hold seventy sickles, wherewith to kill all evil Demons and to destroy all impious Tormentors,—are they cast prostrate in troops and thrown on their beds. Amen, Amen, Selah, Halleluia.

Commentary

A charm made out for a man, his wife and household, against all manner of demons.

A comparison of these bowls, each written by a facile scribe with a well formed ductus, throws light on the history of the transmission and development of our magical inscriptions. Myhrman's text is shorter, in the other an appendix has also been added addressed against some particular but unnamed demon. The spelling in M. is more archaic, avoiding *matres lectionis,* the masc. pronom. suffix being represented by ה alone, ה is generally used for final *a,* the antique form מהנפיקנא is found (l. 6), as also the true reproduction of Hermes by ה. Also my text is more confused in the arrangement of the exorcised powers, M. follows the historical order. Formally then M. appears to be the elder text, in comparison with which mine is more inflated.

The most interesting point of difference is this: in M. the sealing is done "to you" throughout, but in my text "to thee" (l. 2, etc.). This plural has justly troubled Myhrman, and he suggests three possible explanations. But I believe the only explanation is that his text is polytheistic or rather a product of the common magic religion; in expressing three names of "the great God" Elaha, Shaddai and Sebaoth, the magician regarded them as a trinity of deities, just as in the magical papyri these Jewish (and other) divine names are invoked as so many deities (see § 11).[1] M's text is then of eclectic religious character. My text abjures all such polytheism, but that it is secondary to the other is shown by comparing them in ll. 9 and 10. M. retains its polytheistic plural; my text has clung to the form, but misunderstanding it has read ליבי (i. e. לבון = לבו = לבי = ליבי), and I suppose made it refer to the following feminine נפש, or to some feminine demon. For the same reason it reads, awkwardly, בבון in l. 10 for the correct להון. Thus an eclectic text, or its original, in which the deities invoked are the names of the Jewish God, has fallen into more orthodox hands and produced our monotheistic

[1] Cf., among the seven planetary spirits of the Ophites (Origen, *C. Cels.,* vi, 31) Ιαω, Σαβαωθ, Αδωναιος, Ελωαιος; the "angels" Αδωναι, Βασημμ, Ιαω, Dieterich, *Abraxas,* 182, l. 12; also in Pradel's Christian texts, *Sabaoth* and *Adonai* are found among angel-names (p. 47).

text, leaving but a trace or two of its original source. Such are the complications of this magic!

1. The opening singular invocation does not agree with the following plural in M.

יזידאד: name of a Nestorian writer, Payne Smith, col. 1586; Justi, p. 149, thinks the Syriac form an error, but our text confirms it. Our word could be Semitic = יזיד דד. Also note Izeddad in Justi, p. 147.

4. איזדנדוך: Justi, p. 146.

With אספנז, M, cf. in addition to his reference to Ašpenaz, *Dan.* 1: 3, the name Ašpazanda, Clay, *BE,* x, 41.

5. ציצי: plural, "the rays of light." This and the following term represent Hebrew כבוד.

יזעון: with expression of the half-vowel, as in cases cited earlier; cf. Stübe, l. 62. For the following Hithpalpel, s. Jastrow, p. 407.

ירורין, M: so the spelling surely, see above, p. 81.

6. "from the body": cf. the *φυλακτήριον σωματοφύλαξ*, London Papyrus, l. 589, Wessely, xlii, 39.

8. For the angels, see § 13; for four angels (cf. the four gods surrounding the magician in Babylonian magic; see above, on 6: 10) see Luekken, *Michael,* 34 f. Nuriel-Uriel is generally the fourth. In Stübe, l. 58, עניאל takes this place. עסיאל occurs in *Sefer Raziel,* s. Schwab, *Vocabulaire,* 214, and probably in a text of Pradel's (p. 22, l. 16), where *ασα* and *αφα* doubtless = Asael and Raphael. N. B. the care with which the scribe rewrites the name of Asiel; all four names are made to terminate in *-iel.*

אירמים = M. הרמים (the latter the closest to the Greek of our spellings) = Hermes, see to 2: 2. Myhrman's suggestion, which I originally (and independently) favored, that the word is Hormiz = Ahura-mazda, is ruled out by the fact that that element in our proper names is given by הורמיז.

יהו ביהו: cf. Stübe, l. 15 יהביה ביישמיה; Pognon B, no. 5, יה ביא; דביא, above 2: 2 (*q. v.*); יהו ביה, 13: 7. יהו ancient form of the divine Name, appearing (apart from biblical proper names and probable Babylonian forms) in the Assouan papyri, in the Greek magical papyri (Deissmann, *Bibelstudien,* 4 ff, Blau, p. 128 ff.) as Ιαω, surviving among the modern

Samaritans (Montgomery, *JBL,* 1906, 50, n. 5), and used in the magical texts current at Mossoul (*PSBA,* xxviii, 97). I think the doubled term here is theosophic: Yah-in-Yah; cf. the Christian Logos-doctrine and its terms, and Kabbalism. It is possible that Stübe's יהביה = Yahbēh (Ιαβη) = Yahweh. At all events this spelling-out of the full Tetragrammaton occurs in a proper name below, 26: 4.

9. אבהו, and פרנגין below, l. 12, probably correctly diagnosed by Myhrman as exalted sorcerers' names; see above p. 47. For the two Amoraim Abbahu, see *Jew. Enc., s. v.* A suggestion in another line is possible for Abbahu. King in his *Gnostics and their Remains,*[2] London, 1887, 246, says that the Pantheus or representation of the pantheistic Deity of the Gnostics, appearing on the Gnostic gems, "is invariably inscribed with his proper name ΙΑΩ and his epithets ΑΒΡΑΞΑΣ and ΣΑΒΑΩΘ and often accompanied with invocations such as .... ΑΒΛΑΝΑΘΑΝΑΛΒΑ, 'thou art our Father.'" Our Abbahu may represent this epithet and the passage would accordingly preserve three of the Gnostic designations of Deity: Yahu, Father, Abraxas. For Abraxas see above, p. 57, and for treatments of the subject and bibliographies the articles "Abrasax" in Hauck's *Realencyk., Jewish Encyc.,* and especially the splendid monograph by Leclercq, in *Dictionnaire de l'archéologie chrétienne,* etc. Variants in the bowls are אברכסיס and אברכיס. These forms represent *Abraxas* as against the original form Abrasax, hence I use the former word in the present volume. Myhrman remarks (p. 345): "As over against the view of Blau-Kohler (*Jew. Enc.* i, 130b) this would prove to be at least 'a single reliable instance' of this name occurring in Hebrew"—or at least in a Jewish document, as my text is. Abraxas is found in *Sefer Raziel,* 5a.

מחבלנא, מנטרנא: instances of the Syriac nominal formation from derived stems.

רוחי טבאתא: recalling the Jewish "good demons," see above, p. 76. The expression is also reminiscent of the Greek *ἀγαθὸς δαίμων*, frequent in magic.

מנטרנא (2d): ppl. w. suffix. It is represented by three ppls. in M., the second = מנחרנא, which M. translates, with a query, "pierce." This is impossible; I would suggest to read ה for ח, and understand the Afel,

= (Rabb.) Heb. הזכיר, of naming a person to a deity and so placing him under his protection.

10. מירדוך: Mer-dûcht, = Mithra-dûcht, Justi, p. 208, *Bemerk.*

באנאי = באנא 27: 8; a masc. name among the Jews, *Sefer ha-Doroth* ii, 84. But these names appear to be indifferently masc. and fem.; cf. 1: 4. The same name בני is found in Nabataean and Palmyrene inscriptions, Lidzbarski, *Handbuch,* 238, and = the frequent Babylonian Bâni-ia, cf. the name lists in Clay, *BE,* viii, pt. 1, pp. ix, x.

11. סרנין אפיקי, occurring frequently in the unpublished No. 2918. I interpret this from the Syriac סרנא, as of the magic circle, cf. חזאר רבאניא, 39: 7, and see p. 88. The circle was used particularly for necromancy and devil-raising. Cf. Eliphas Lévi, *Dogme et rituel de la haute magie,* Paris, 1856, ii, l. 14. The objection to this interpretation is the entire obscurity of אפיקי.

יצערי: for איצערי, *iṣ'âr,* cf. Maclean, *Dict. of Vernacular Syriac,* 193b; for the meaning, see p. 94, above.

For the epithet קשיי, cf. the epithets *χαλεπός, violentus,* etc., of the demons; cases cited by Tambornino, *De ant. daemonismo,* 15, 23.

12. "under my own hand": there is much imitation of legal forms in magical formulas.

פרנגין: evidently a Persian name; Myhrman as from *farna,* "good fortune," and *gin* (?) comparing Pharnakes, etc., Justi, p. 92-96. I may compare the Persian name Frenanh, Justi, p. 105b.

זיעין, זע, parallel to M's זעיין, זעא, in the latter as from root זעא.

13. בר משתאל = M. בר משתאיל, translated there "son of the inquirer of the oracle." We must go to the Assyrian for the explanation. There the corresponding form *muštâlu* means one who gives an oracle upon being asked, i. e. an oracle-giver, and is an epithet of deity. See Jastrow, *JBL,* xix, 99, and the reff. in Delitzsch, *Ass. Hwb., s. v.* שאל. The expression has the connotation of deciding the fates, with which cf. the following phrase in our text בר דנזירתיה נזירא may here be used like the Arabic *ibn,* without modifying its regimen. Or may the phrase = *bârû muštâlu,* "oracle-giving seer"? Some ancient phrase has been conventionalized and

personified. For the following expression concerning the inviolability of the "decree," cf. 38: 8.

מי מחראשי: ppl. pass. The root חרש came to be used particularly of poisoning. The זיפי are probably "hairs," Syriac *zeppâ*. Any portion of a person's body, especially hairs, nails, etc., as detachable, could be used in magic directed against him. See Thompson, *Sem. Magic*, Index, *s. v.* "hair," and with abundant citation of comparative magic, Abt, *Apuleius*, 179 ff.; also Blau, p. 161.

14. For the appearance of devils in animal forms, cf. the reply of the demon to St. Michael in a text of Pradel's (p. 23): "I enter their houses metamorphosed as snake, dragon, vermin, quadruped."

15. גיונין = *gᵉwânîn*, cf. l. 16, vs. M. גונין *gawwânîn* or *gaunîn* (?).

16. תיחבלן, תישנן: Paels, with י for preformative half-vowel. I understand תישנן and תיפרדן, of the demoniac bewilderment of the victim (see Jastrow, *s. vv.*), or actual insanity. M. has for these verbs "לא תידרון in their house"; Myhrman's translation, "shall not dwell," would require תדורן. It looks as if תידרון is for תיפרדן, or an error for תירדן, from פרד = רדא.

שחרתא: so also 8: 11, but generally in parallel occurrences, e. g. Myhrman's text, שינתא. The same noun is found in the Mandaic, שנתא וש' (*Ginza*, Norberg's text, ii, 18, l. 12), and the verb. שחר ושכב (*ib.*, l. 19). It means to "snore, sleep profoundly" (cf. Heb. תרדמה) = Arabic *šaḥara*. Cf. 6: 10.

17. סרא רבא: cf. 5: 31 and see p. 97. מפסים: cf. Ass. *pasâsu*.

"70 men holding 70 sharp sickles": i. e. the 70 angels or shepherds, representing the 70 nations, *Enoch* 89: 59 (originally regarded as good angels, Schürer, *GJV*⁴, iii, 198, n. 32, Lueken, *Michael*, 14, but later legend regarded them as fallen). The "sharp sickles" are an echo of *Rev.* 14: 14 ff., where the Peshitto uses the same words as here. This coincidence (cf. also *Mt.* 13: 37 ff.) argues for a common source of ideas.

שיציה: inf. of שיצי, Targumic but not Talmudic.

מסחפין: Pael pass. ppl., of the Syriac and Mandaic root "prostrate." Or possibly cf. the Rabbinic meaning "put on a cover," with reference to the inverting of the bowls, see to 4: 1, 6: 1. The "beds" are metaphorical of weakness and subjection, cf. *Is.*, 50: 11.

TRANSLATION

In the name of the Lord of salvations.

Designated is this bowl for the sealing of the house of this Geyônâi bar Mâmâi, that there flee (2) from him the evil Lilith, in the name of 'YHWH El has scattered'; the Lilith, the male Lilis and the female Liliths, the Hag (ghost?) and the Ghul, (3) the three of you, the four of you and the five of you; [naked] are you sent forth, nor are you clad, with your hair dishevelled and let fly behind your backs. It is made known to you, (4) whose father is named Palḥas and whose mother Pelaḥdad: Hear and obey and come forth from the house and the dwelling of this Geyônâi b. M. and from Rašnôi his wife (5) bath Mârath.

And again, you shall not appear to them in his (*sic*) house nor in their dwelling nor in their bedchamber, because it is announced to you, whose father is named Palḥas and whose mother (6) Pelaḥdad,—because it is announced to you that Rabbi Joshua bar Peraḥia has sent against you the ban. I adjure you [by the glory (= name)] of Palḥas your father (7) and by the name of Pelaḥdad your mother. A divorce-writ has come down to us from heaven and there is found written in it for your advisement and your terrification, in the name of Palsa-Pelîsa ('Divorcer-Divorced'), who renders to thee thy divorce and thy separation, your divorces (8) and your separations. Thou, Lilith, male Lili and female Lilith, Hag and Ghul, be in the ban .... [of Rabbi] Joshua b. P.

And thus has spoken to us Rabbi Joshua b. P.: (9) A divorce writ has come for you (thee?) from across the sea, and there is found written in it [against you], whose father is named Palḥas and whose mother Pelaḥdad, ... they hear from the firmament (10) .... Hear and they and go from the house and from the dwelling of this Geyônâi b. M. and from Rašnôi his wife b. M.

And again, you shall not appear to them (11) either in dream by night nor in slumber by day, because you are sealed with the signet of El Shaddai and with the signet of the house of Joshua b. Peraḥia and by the Seven (?) which are before him. Thou Lilith, male Lili and female

Lilith, Hag and Ghul, I adjure you by the Strong One of Abraham, by the Rock of Isaac, by the Shaddai of Jacob, by Yah (?) his name .... by Yah his memorial .... I adjure (13) you to turn away from this Rašnôi b. M. and from Geyônâi her husband b. M. Your divorce and writ (?) and letter of separation .... sent through holy Angels .... the Hosts of fire in the spheres, the Chariots of El-Panim before him standing, (14) the Beasts worshipping in the fire of his throne and in the water, the Legions of I-am-that-I-am, this his name .... And by the adjuration of holy Angels, by ....el the great angel, and by 'Azriel the great angel, (15) and by Ḳabḳabḳiel the great angel, and by 'Aḳariel the great angel, I uproot the evil Necklace-spirits. Moreover you evil Liliths, evil Counter-charms, ... and the letter of divorce (16). And again, do not return to them from this day and forever. Amen, Amen, Selah. Sealed upon him .... Gabriel (?).

Again (I adjure you), evil Lilith and evil Spirit .... (17) .... or kill .... depart from this Rašnôi b. M. And be they preserved for life! Amen, Amen, Selah, Halleluia.

Commentary

A charm for a man and his wife, particularly against the Liliths (a picture of one of which obscene creatures decorates the bowl), made out in the form of a divorce-writ. The inscription is very indistinct and towards the end becomes almost illegible. No. 17 is in large part an abbreviated and mutilated replica.

1. גיונאי: Gewânâi (cf. 7: 15), or Ge(y)ônâi (from גאון, or גון, "color"?). Cf. גיונאי appearing in Bar Bahlul's Syriac-Arabic lexicon, where it is equated with *wald*, etc., to which Payne-Smith adds, "vox corrupta ex *γόνος*," *Thes.*, col. 708.

מאמי, and below מאמאי, in No. 15 מאמא: one of the most frequent feminine names in these texts; see Nöldeke, *WZKM*, vi, 309, Lidzbarski, *Eph.* i, 75 f., 97, n. 3; ii, 419. Budge in his edition of Thomas of Marga's Book of Governors (ii, 648) gives a note contributed by Jensen that Mami is a name of *bêlit ilâni*, the mother-goddess.

2. לילית בישתא: the generic lilith is differentiated into several different species, the male and the female, the ghost and the vampire, hence "the

3, the 4, and the 5 of you" below. In the following text it is a question whether the 2d per. sing. or plur. should be read in many places. The two numbers are clearly distinguished in l. 7, end. But the obscurity consists in the equivalence of לכי and לכין, like the case of the loss of ן in the verbal forms in תין in later Aramaic, e. g. חתימיתי, l. 11; also אנתי, l. 15, is plural, as בישאתא shows. Also the confusion of ו and י in our script renders the distinction between masc. and fem. uncertain. Do the imperatives in l. 10 terminate in *î* or *û*, the latter a masculine form (inclusive of the feminine), the former possibly to be compared with the Syriac? My English "you" covers the uncertainty between sing. and pl.

בישמיה דפזר י' אל: a prophylactic "word," like the magical quotations from Scriptures; cf. a similar case at end of No. 42.

At end of l. 2 are named the five different "modes" of the lilith. שלניתא and חטפיתא are unique demoniac names, found only here and in No. 17. The probable identity of ח' with the Arabic Ghul suggests connecting ש' with the Arabic *si'lât;* Lane, *Lexicon,* 1365, and at length his *Arabian Nights,* c. 1, n. 21, and also van Vloten, *WZKM,* vii, 179, who quotes an Arabic author to the effect that the Si'lât is the witch of the feminine Jinns. (The Arabic root sa'ala, "cough," = Syriac שעל.). We have then to account for the loss of the ע. The form would be comparable to שאדניתא. Another possibility is = Assyrian *šûlû,* "ghost," Muss-Arnolt, *Dict.* 1036 (from עלה?), the formation being originally *šêlânîtu* (cf. *êlânu* from עלה). The witch or Ghûl is preferable in the context, however in No. 39 the Lilith appears as the ghost of a dead relative, so that the context does not determine the etymology.

חטפיתא, or חטיפיתא No. 17, "ravager," represents the Heb. תחמס ("ostrich"?—such is the tradition in Onkelos and LXX) in Targum Jer. to *Lev.* 11: 16, *Dt.* 14: 15 (where these two spellings also are found), among the unclean birds. Horrible bird-like forms were given to the demons by the Babylonian imagination, Jastrow, *Rel. Bab. u. Ass.,* i, 281; also cf. *Utukki*-series, B, 35 f. The ostrich itself even in the rationalizing Old Testament is half demoniac; cf. the notes on the ירורין, p. 81. Probably the ח' is exactly the Arabic Ghul, which is thus described by Doughty: "A Cyclops' eye set in the midst of her human-like head, long beak of jaws, in the ends one or two great sharp tushes, long neck; her arms like

chickens' fledgling wings, the fingers of her hands not divided; the body big as a camel but in shape like as the ostrich; the sex is only feminine. She has a foot as the ass' hoof and a foot as an ostrich," etc. (*Arabia Deserta,* i, 53, quoted by Thompson, *Sem. Magic,* 60).

3. תליתיכין : for the sharpening of the vowel, *t*^{e}*lîttâi* from *t*^{e}*lâttâi,* see my notes on פריכא, p. 73.

ערטילן: supplied from 17: 5, as also other bracketed passages. סעריכין is sing., as סתיר shows. Nakedness and dishevelled hair are standing descriptions of the lilith, witch, etc. See references above, p. 77; add Kohut, *Jüdische Angelologie,* 88, and for Arabic legend, Wellhausen. *Skizzen,* 3, p. 32. The picture presents the abandoned character of the lilith—e. g. the Labartu is called a whore—, and also her shameful, outlawed position.

שמיע עליכין: על = ל as constantly in these texts and as in Mandaic. The naming of the demon's forbears has a compelling power, as part of name-magic; see p. 58. Cf. the naming of the parents of the demon Βαινχωωχ in the invocation of his appearance in a charm of Wessely's (xlii, 60, from Brit. Mus. Pap. cxxiii). The same names distorted and applied *vice versa* appear in No. 17; similar names also in No. 11.

פוקי: often along with synonymous verbs, איתרחק, זוע, etc. Cf. the Babylonian *ištu bîti ṣî* (*Utukki*-series, iii, 158), the long series of imperatives in *Maḳlu*-series, v, 166 ff., etc.; *Mk.* 9: 25, *Acts* 16: 18; in Gollancz's Syriac charms; in the Greek, e. g. Reitzenstein, *Poimandres,* 295, 298 (where the demon is also bidden not to disobey).

4. רשנוי: probably hypocoristic from Rašnu, name of a Zoroastrian genius, see Justi, p. 259. Cf. the names ראשנינדוך, רישינדוך, in Glossary.

5. מארת = מרתא (15: 2), "Martha."

6. "Rabbi J. b. P.": see commentary No. 32, and below, l. 7.

"by the *glory* of your father": hardly an appeal to the demon's sense of honor. יקר must be equivalent to "name," cf. the parallelism and the equivalence of the Name and the Glory in the Old Testament, where כבוד is also used of the human personality.

7. ניטא נחית לנא: the separation of the lilith from her victim is expressed in terms of a divorce-writ. This was a happy thought of the

magicians, who thus applied the powers of binding and loosing claimed by the rabbis to the disgusting unions of demons and mortals. The logic of the procedure was very simple—if only the liliths were as submissive to divorce as their human sisters. The decree is frequent in these bowl incantations,, and first appeared in Ellis's bowl, no. 1. But I do not know of any case of the occurrence of this magical *Get* outside of the bowls.

The magical writ affects the same forms and formalism as that of the divorce court.[1] In the parallel bowl, No. 17, a form of date is given (l. 1 יומא הדין), which was a requisite in the legal *Get*. The names of both parties are exactly given, hence the parents of the liliths are here specifically named. The very terms of divorce are repeated in 17: 2: שביקת ופטרית ותרכית יתיבי; cf. the facsimile of a *Get* given as a frontispiece in Amram's work (פטרית שבקית ותריכית יתיבי). It was necessary that the writ should be properly served on the divorcée, hence in 26: 6, שקולי גיטבי: "take thy writ," a sentence consummating the process, and then the divorced demon must betake herself from her victim's property, as commanded by the peremptory; "Hear, obey and go forth" (l. 10). But there is a difference; against spiritual powers divine authority was necessary. And so it is affected that the writ has come down from heaven (l. 7), that is, it belongs to the category of writs from foreign countries for which there were special forms; hence the גיטא אתא מן עיבר ימא, l. 9. The commissioners and witnesses are the holy angels, etc., l. 9 f. A rabbi is also at hand to seal as notary the divine decree, none other than the famous master-magician Joshua b. Perahia. For a further phase of this "divorce-writ" see to 11: 7. In l. 7, both the sing. and pl. are carefully used, so as to include both the definite lilith and also the whole brood.

7. חידוריכין, שימועיכין: Pael infinitives with first syllable in *i*.

פלסא פליסא: the root = "split asunder."

מתיב (?) may be ppl. from תוב in sense of Latin *reddere*.

11. "the house of Joshua": i. e. of the school of sorcery; in 34: 2 the sorcerer calls himself "J.'s cousin."

[1] See D. W. Amram, *Jewish Law of Divorce* (Philadelphia, 1896), esp. c. xiii; *Jewish Encyc., s. vv. Divorce, Get.*

בשבעה: "by the Seven"?—i. e. the seven angels, genii, etc.? The seven planets are so called simply in Syriac.

12. באביר אברהם וגי: cf. *Is.* 49: 24, יעקב אי; for the Rock of Isaac, cf. *Is.* 30: 29, Rock of Israel. The "Shaddai of Jacob" is unique. The scribe was not mighty in the Scriptures. But cf. *Ecclus.* 51: 2: "give thanks to the Shield of Abraham, ... to the Rock of Isaac, ... to the Mighty One of Jacob."

13. אינרת שיבוק: another term for the divorce-writ.

From l. 13 to end the text is largely mutilated or illegible; this is the more unfortunate as there are traces of interesting apocryphal or kabbalistic passages. Viz. "the hosts of fire in the spheres"; "the chariots of El-Panim"; "the beasts worshipping in the fire of his throne and in the water," with which cf. the glassy sea of Revelation. The following term דיגלי ("banners," then "cohorts") is a common word in the Targumic literature for the angelic hosts, according to *Shemoth Rabba* 15, = צבאות. (But the phrase may mean, "who is revealed as.") The language is Hebrew and the allusions are taken doubtless from apocalyptic literature.

14. עזריאל is known as an angel of the divine chariot, Schwab, *Vocabulaire, s. v.*, and עקריאל is found *ibid.*; n. b. play with עקרית.

15. The reference to the ענקתא indicates that witchcraft is behind these devilish manifestations; the lilith and the witch are practically identical, see p. 78.

17. "may they be established for life"; cf. the finale of the Mandaic texts, "Life is victorious." The same expression in 12: 3, and the negative wish against devils in Wohlstein 2426: 9; but in his no. 2417: 22 the verb is used of the resurrection. At least the vague idea of immortality may be contained in the phrases.

Translation

The bowl I deposit and sink down, and the work (2) I operate, and it is in [the fashion of] Rabbi Joshua (3) bar Perahia. I write for them divorces, for all the Liliths who appear to them, in this (house of ?) (4) Bâbanôš bar Ḳâyômtâ and of Saradust bath Širin his wife, in dream by night and in slumber (5) by day; namely a writ of separation and divorce; in virtue of letter (abstracted) from letter, and letters from letters, (6) and of word from words, and of pronunciation from pronunciations; whereby are swallowed up heaven and earth, the mountains are uprooted, and by them the heights melt away.

(7) Oh, Demons, Arts and Devils and Laṭbê, perish by them from the world! Therefore (?) I have mounted up over them (you?) to the celestial height, and I have brought against you (8) a destroyer to

destroy them (you) and to bring you forth from their house and their dwelling and their threshold and all .... place of the bedchamber of Bâbanôš b. Ḳ. (9) and of Saradust b. Š. his wife. And again, do not appear to them, neither in dream of night nor in sleep of day .... I dismiss you (10) .... letters of separation .....

(11, exterior) In thy name have I wrought, YHWH, God, Sebaoth, Gabriel and Michael and Raphael. Thy seal is upon this besealment and upon this threshold. Amen, Amen.

COMMENTARY

A charm for a man and his wife. The inscription is illiterate, and is largely parallel to (doubtless dependent upon) the Syriac text No. 32 = No. 33; also cf. No. 8.

1. פורא רמינא ושקינא: the same phrase appears in 32: 3 and 33: 1, whence the third word in the present text can be restored. It is very obscure and I propose the following explanation. פ׳ is a synonym for כוסא "bowl," and is the Syriac and Mandaic פוחרא (*puḥrâ*) which came to mean "symposium," but goes back to the root פחר, giving the words for the potter and his art, i. e. originally it was a potter's vessel. For the loss of the guttural in our present word, cf. Mandaic שורא for שוחרא, etc. רמינא I take in the common Syriac sense of laying a foundation; the bowl was placed, as we have seen, at one of the four corners of the house. For שקינא, we must assume a parallel significance, and it is to be derived from שקע, treated as ל״א, in the similar sense "to sink" (the 1st Form is used as an active in Rabbinic). As the phrase appears in our Syriac bowls, which are largely colored by Mandaic idioms, the reference to this dialect is justifiable.

עובדא: see p. 51; in the parallels עבורא דעבוד.

2. In the lacuna מיתדמנותא might be read. הוא הוא is a Syriac idiom, taken from the Syriac parallel.

3. בהדין: awkward; probably for בהדין ביתיה ד׳; cf. 32: 5.

4. בבנוש probably באבנוש in l. 8. The first element is *bâbâ* or *pâpâ* (Persian *p* often = Semitic *b*), Justi, pp. 54, 241, the second the Persian genius-name Anôš.

קיומ[תא] : ת was legible to the original copyist of these bowls in l. 8. The name signifies *patrona*. The masc. קיומא appears in Pognon B.

סרדוסת : apparently a form of Zarathuštra; see Justi, p. 379 f., where the frequent spelling *Zaradušt* is cited in names. But strange is the application of this masculine name to a woman.

שירין: cf. the name *Sîrîn*, Tabari's Chronicles, ed. de Goeje, i, 4, p. 100, l. 3.

דניטא דפיטורין דשבוקין: the repeated ד defies construction; cf. l. 6. The terms all appear in No. 8.

5. בשום אות מתוך אות וגי: a parallel phrase appears in 32: 6; here the words are Hebrew. The general sense of these obscure phrases is clear; they refer to the magical use of letters and words and the manipulation of their pronunciations, such for instance as we find in the treatment of יהוה and in the Greek magic of the seven vowels. Cf. Pradel, p. 35, l. 9, "in the name of these angels and letters."

6. ונקב וגי : this root appears in the Bible where it passes from the physical "prick, prick out," to the sense "distinguish," that is, in speech, "pronounce clearly." It is the question in *Sanh.* 56a whether נקב שם יהוה is so used or in the sense "blaspheme." In the present case it means "pronounce," and is synonymous to the Piel פריש as that appears in שם המפורש.[1] Mystic or traditional renderings of the Tetragrammaton are doubtless referred to, but all this is only mysteriously suggested here; the magician does not offer us samples of his rare art. There is a garbled form of these phrases in 32: 6.

דיבהן יתבלעו: cf. 7: 12.

טוריא: a Mandaic spelling for the plural in *ê*.

7. לטבי a category appearing only in the bowls, see above p. 81, and Glossary.

בכין: probably the Targumic "therefore."

This and the following line are difficult by reason of an inconsequent use of the pronouns; the scribe was writing by rote. Light is thrown

[1] For this discussion see Dalman, *Der Gottesname Adonay*, 44 ff.

on the passage from 32: 8 f. (*q. v.*), where is given the tradition of Joshua b. Perahia's ascent to heaven, by which he obtained mastery over all evil powers. Our scribe boldly turns the 3d person of the legend into the first person—of himself,—an instance of the attempted identification of the magician with deity or master-magician.

לימרומא: so the parallel demands.

איתיתי: appears to be Afel; תי- is hebraizing.

8. מחבלא = המשחית, Ex. 12: 23; in the parallel the abstract חבילא.

11. For the asyndeton connection of the angelic names with that of Deity, see above, pp. 58 f, 99, and note the Greek parallels. Sebaoth appears to replace one of the four archangels; cf. the personification of S. in Myhrman's text.

No. 10 (CBS 16014)

דנא קמיעה לאסותה דהדא ניונדוך בת כפני וכפני בעלה בר שרקוי וזדו ברה וביתה ואיסקופתה כולה בשום יה יהו אה . . . . . Translation

This amulet is for the salvation of this Nêwândûch bath Kaphnî, and Kaphnî her husband bar Šarḳôi, and Zâdôi her son, and her house and her whole threshold, in the name of Yah, Yahu, Ah, ... (2) Sealed, and countersealed are this house and this threshold .... in the name of LLZRyôn and Šabiel and Gabriel and Eliel ..... (3) And sealed are these, Zâdôi and Nêwândûch, with that seal with which the First Adam sealed Seth his son and he was preserved from Demons (4) and Devils and Tormentors and Satans. Again sealed and countersealed are these, the son of Šarkôi and Nêwândûch his wife b. (5) K. and Zâdôi her son, with that seal with which Noah sealed the ark from the waters of the Deluge. (6) And may they fly and cease and go forth and remove from them and from their house and their abode and their bed-chamber, from this day and forever.

Commentary

A charm for a woman and her family. It is decorated with a figure having a beaked, bird-like face.

קמיעה: see Introduction, p. 44.

ניונדוך: for the name see to 5 : 1; the same person appears in No. 11.

כפני : probably for *Kafnâi,* "the hungry one." The woman's husband and father had the same name. This is a case of the father's name being given, against the rule; for other examples, see 12: 1, Pognon B, p. 98, and the name פאפא, in Lidzbarski 5.

שרקוי: cf. the Persian name *Serkoh* Justi, p. 296.

(י)זרוי: the full spelling appears in l. 5; for the name, *ibid.*, p. 382. A *Z*ârôi appears in 37: 3.

2. אינחור ונו': I can make nothing out of these words.

For Šabiel and Eliel, see Schwab, *Vocabulaire,* 251, 57. The first name is probably mystical.

3. בה הוא: emphatic use of הוא; cf. *Dan.* 7: 15.

For these apocryphal references to the seal of Adam and Noah, cf. p. 64, and for the Jewish legends see *Jew. Enc.,* s. v., "Seth," "Noah." It is in the Babylonian story not the Biblical that the hero shuts himself in.

5. טופנא: found in Targ. Onk. to *Gen.* 6: 17, = τυφῶν, frequent in the Greek magical vocabulary.

No. 11 (CBS 16022)

A charm for a woman and her household, in terms of a divorce from the evil spirits.

The text would be legible only for a half, but for the interesting fact that it is one of four almost duplicate inscriptions. The longest and clearest of these is the Mandaic bowl, no. 5, published by Lidzbarski. Another is, remarkably enough, the first inscription of this category ever published, Ellis no. 1, in Layard, *Nineveh and Babylon*, 512 ff.; see § 2.[1] The latter is given in poor facsimile, and none has taken the trouble to collate afresh the bowl in the British Museum, a simple task which doubtless would have allayed the difficulties.

Of this text the bowl from Nippur is practically a duplicate, and, with the help of Lidzbarski's inscription, I am able to restore almost the entire text not only of our bowl but also of that in the British Museum.

There is also a fourth duplicate, No. 18. It can be read only by comparison with the three presented here, and so I have left it in its original place in my arrangement of these inscriptions, especially as it contributes nothing further to the understanding of their contents.

I have thought it worth while to present the three texts in parallel columns. This process facilitates the verification of emendations, while the variations which present themselves throw interesting light upon the natural history of magical inscriptions. We mark how magical terms which once had a meaning become blurred and obscured at the hands of generations of sorcerers and copyists, until sense becomes nonsense, or simple word or phrase receives a kabbalistic interpretation. The Mandaic appears to have the latest type of text, having evidently transferred its material from another script and dialect. Cf. the parallel texts in No. 7.

In the following texts I have slightly abbreviated the names in the 2d and 3d columns, and omitted a few unimportant phrases in the 3d (always so noted). It is not necessary to give a translation of Ellis's

[1] As suggested in that section, n. 4, this was the bowl obtained by Layard from Nippur.

bowl, as the text is now almost entirely intelligible. The enumeration of lines in Ellis's text is according to the spiral lines.

Translation

Salvation from Heaven for this Nêwândûch bath Kaphnî, that she be saved (2) by the love of Heaven from the Lilith and the Tormentor. Amen. Amen. Again, fly and refrain (3) and remove from Nêwândûch b. K., the Lilith and the Tormentor and Fever and Barrenness (4) and Abortion; in the name of him who controls the Demons and Devils and Liliths, and in the name of "I-am-that-I-am."

For the binding of (5) Bagdânâ, their king and ruler, the king of Demons and [Devils], the [great] ruler of Liliths. I adjure thee, Lilith Halbas, granddaughter of Lilith Zarnî, [dwelling] in the house and dwelling of Nêwândûch b. K. and [plaguing] boys and girls, (7) that thou be smitten in the courses (?) of thy heart and with the lance of ...., who is powerful .... over you.

Behold I have written for thee (i. e. a divorce), and behold I have separated thee [from N. b. K. etc.], [like the Demons] (8) who write divorces for their wives, and do not return to them. Take thy divorce from Nêwândûch b. K. and do not appear to her, neither by night nor by day, and do not lie [with her]. And do not (9) kill her sons and daughters. In the name of Memintaš (?) keeper of Habgezîg (?). Yô, Yad, Yaṭ, Yaṭ, Yaṭ. By the seal on which is carved and engraved the Ineffable Name, since the days of the world, the six days of creation.

Commentary

1. Nêwândûch b. Kaphnî: the same as in No. 10; here without mention of a husband. It is also the name of the mother of the client in Ellis's bowl.

2. רחמי שמיה: cf. "the great Lord of love." "Heaven" is used here and in parallel passages as surrogate for Deity, after ancient Jewish use; the same use in 18: 1 and Wohlstein 2422: 3.

3. שערתא : a new word. I would connect it with the Arabic root *s'r* (Heb. שער, סער), with the meaning "be hot, rage," etc. See the various derivative nouns in Lane, *Arabic-English Lexicon*, 1363: *sa'r*, "burning, shooting," *su'r*, "demoniacal possession, madness, mange"; *sa'rat* (our very form!) "cough," etc. Possibly fever, or poison. The Arabic *su'r* connotes infection.

4. תכלתא: "bereavement," then used of abortion, the reference being to a mischievous killing by magic of the unborn child.

It is unfortunate that in the first line of Ellis's inscription, the name following נירך, i. e. "Nirig" is indecipherable from the facsimile. For נירך = נירנ, cf. נכל, on the Nêrab inscriptions, = Nin-gal. In אבטור טורא, the second word is a careless repetition of the first.

5. At the end of this line begins the parallelism with the two other inscriptions. Our very first word, which appears as one in a series of divine names, e. g. El-sûr, is explained from the parallel which shows that אל איסור was meant; the unusual form אל (= על) was taken to be = "god," and the passage became hopeless. The same process of corruption will be found below on the Mandaic side.

בגדנא: so in Ellis, but in the Mandaic bowl אבונדאנא (= אבונבאנא in Pognon B). See Lidzbarski's attempts at explanation. But our בגדנא is the elder form; see on 19: 6, 13, where ב' is both generic and personal.

מליכיהן: the first י is an error as the subsequent spelling shows; the second represents the half-vowel. The scribe in our text has been confused and repeated his words here. For the "king of demons," see p. 74.

חלבס = חבסלס = חלדאס, in the three texts; cf. the names in the parallel texts Nos. 8 and 17: פלחס and פלחדד, פלחדד and פלחן. Proof of the impossibility of etymologizing on these forms! The accompanying lilith in the Mandaic, תאכלת, must be connected with our תכלתא above; abortion is personified. The granddam of the lilith appears to be better known as it is identical in all three inscriptions. The two liliths in the Mandaic are interpreted by Ellis's text; they are the male and female respectively; cf. below, l. 8, לא תשכבין עימה.

7. טורפס = טופרס = טאפרוס: these various forms throw no light on the word. It looks as if it were a corrupted Greek anatomical term.

לילביכין = ליבבכי (Ellis): our text explains the reading of the elder bowl לבב = ללב, the former a metaplasis of the latter; the same form in 18: 7.

קאטריאוים = תיקס = ?: the latter has, as Lidzbarski recognizes, a peculiar Mandaic form. I am inclined again to hold that the parallel shorter forms are more original. The reading in our bowl is different from the other two. For תיקס נברא cf. אברא נ', 3: 2.

הא כתבית: explained by the second column, where *plus* בכתבא i. e. the divorce-writ. Curiously enough the Mandaic has taken the interjection הא as a pronoun[2] and rendered it by האזין.

פטרית: cf. Ass. *paṭâru*, "break a charm."

כמא שידי דכתבין ניטי: cf. 8: 7. The additional thought appears here that inasmuch as demons divorce their spouses, divorce-writs must be as effective on them as among human kind. Cf. also No. 18. It may be noticed here that the first and third texts address a special lilith in the singular, the second goes over into the plural; the same uncertainty in No. 8.

9. בנה: (= plural) Mandaism; so also below עלוהי = עלה.

בישום ממינתש = Mand. אמאתעמא, the second text obscure. Again no light! There is considerable similarity in the following magical syllables.

בעזקתיה ונ': with the help of the parallels we can make out the reading. It and Ellis's inscription are almost identical. The Mandaic gives here a striking instance of perversion. The prepositional phrase עלה (or its equivalent) was understood as "God" and turned into אלהא; this took with it the ppls. ציר and גליף, which were raised to divine dignity to accommodate the epithet אלהא. The invention appears to have been prized, as the deity *Sîr-Geliph* is also introduced above in the same inscription. The שם מפורש is thus reduced to a travesty! The well-known Jewish phrase appears also in Schwab, E.[3]

[2] Cf. Nöldeke, *Mand. Gram.* § 81.

[3] For the true explanation of this term, see Arnold, *Journ. of Biblical Lit.*, 1905, 107 ff.

Solomon's magic ring (first mentioned by Josephus) inscribed with the Tetragrammaton is the subject of Haggada in *Giṭṭ.* 68a, b. Later legend, especially Arabic, developed the wonders of this magic ring.[4] According to the end of our inscriptions this seal engraved with the divine Name was in existence since the week of creation (= בראשית). This is an addition to the ten things which according to *Pirḳê Abôth,* 5: 8, were created on the eve of the first Sabbath—among which were the alphabetic script and the tables of the Law.

[4] See *Jewish Encycl.,* xi, 438 ff., 448; for the Greek magic, Dieterich, *Abraxas,* 139, l. 28, and at length, p. 141 f.; for bibliography, Schürer, *GJV,* iii, 303.

COMMENTARY

A charm for a man and his wife and their seven named children, in the form of an adjuration of a certain potent angel. There is rubrical reference to a magical operation for compelling this angelic assistance. The same family appears also in No. 16 and the Syriac Nos. 31, 33. Prof. Gottheil has presented a tentative translation in Peters, *Nippur,* ii, 182.

1. דדבה: probably abbreviated from *Dâdbuyeh;* see Justi, p. 75.

אסמנדוך: see *ibid.,* p. 281, the Armenian name Samandûcht.

שרקוי: see 10: 1.

2. דאדה· Justi, p. 75, *Dâdâ.* The name is Semitic, e. g. Palmyrene and Syriac דאדא, from root דוד. The name looks like a masculine (for the use of the father's name see to 10: 1), but may equal דאדיא, 39: 2.

4. שובטי: for the form cf. Nöldeke, *Mand. Gram.,* § 19, and for the species, p. 80 f., above.

5. כד גביל ונ׳ (read דמות for דמת): a rubric directing an operation compelling the presence of the angel through a simulacrum and its manipulation. The insertion of the rubric into the text of incantation appears in the Babylonian magic, see King, *Babylonian Magic,* p. xxviii. It may be queried whether our sorcerer is not reciting a form unintelligible to him;

cf. the intrusion of rubrics into the Psalms. The ancient charm was for binding the good spirits as well as the evil; the incantation as well as the exorcism was a *κατάδεσμος* (see Heitmüller, *"Im Namen Jesu,"* 2d part). In the early Babylonian magic images of the favorable gods were made and used in the rites; a good example is found in Zimmern's *Šurpu* series, no 54 (p. 169 = Thompson, *Sem. Magic,* p. lviii). Probably idolatry has its basis in this magical idea. Reverence gradually obscured the idea that the gods were thus bound, it survived only in the word-magic. But in the present case a "horn" (symbol of power?), probably a cone of wax or the like is kneaded, and honey poured upon it, with which we may compare the antique anointing of the sacred stone or *bethel,*[1] wherein the suppliant literally "smooths" the face of of deity (Heb. חלה).[2] The rubric is, I think, unique in Jewish magic. For the magical use of honey, see Thompson in Index, *s. v.*

6. מרוה: for the plural, cf. instance in Jastrow, *Dict.,* 834b; or the form may be regarded as parallel to אבוהי.

We have here a bit of poetic lore about the angels, describing their worship and service of the Almighty. It appears to be a quotation from some Midrash. Who the angel invoked is, does not appear,—Michael? The terms סמו, ישאו, are probably mysterious utterances to awe the hearer; cf. *ômô, ômô,* 3: 3 (from שמע, "hear," נשא "lift up in worship"?). For the description "blowing like the blast," etc., cf. *Ps.* 104: 4.

7. ציציה: cf. ציצי דצבאות, 7: 5. The description passes to a plural subject here.

נינריהון: a Rabbinical form; נגר = לגר = רגל, "foot." For ל = נ cf. Nöldeke, *Mand. Gram.,* 54.

8. The choric dances of the angels are a pretty fancy, cf. *Job* 38: 7.

[1] Small conical stones are found in the oriental explorations, doubtless domestic *baitylia;* see Vincent, *Canaan d'après l'exploration récente,* 177, and Scheil, *Mémoires de la Délégation Perse,* vii, 103, 112 f. (Fig. 34-37, 340 ff, 374, 381).

[2] For an extensive collation of like instances in Graeco-Roman magic see Abt, *Die Apologie des Apuleius, 222* ff., *227.* May the term in Apuleius, *βασιλεύς,* the magic-god whose image is formed for purposes of sorcery, (a term much disputed by the commentators) = מלך = מלאך, the word used here?

9. For the ניסי and שיקופתא, see 6: 2 and p. 86. אנקי is a masculinized form of ענקתא (see p. 88).

11. הוניק: I cannot identify. The Glossary shows two other men of the same name.

יסמין: a Persian name, = "jasmine," cf. Justi, p. 145.

בופיתי: the same name in No. 2 (in אי-).

מהדוך: cf. Syr. מהדוכתי, Justi, p. 186.

פנוי: the Arabic Fannuyeh; see Nöldeke, *Persiche Studien,* 405.

שילי hypocoristic of שילא, name of several Amoraim; see *Seder ha-Doroth,* ii, 347. Cf. biblical שלה, from שאלה. שלא, שלי, also occurs in the Nabataean, *CIS,* ii, nos. 185, 208, 221. Nöldeke (in Euting, *Nab. Inschriften,* 74) vocalizes the name Sullai, and Berger (see to No. 208) compares the Nabataean name Sullaios. But Lidzbarski (*Eph.,* ii, 16) rejects this derivation and derives the hypocoristic from שלם.—Note that among these nine souls only one strictly Jewish name appears.

12. The scriptural quotation is from Psalm 121,—a psalm admirably adapted for a charm. Cf. note to 5: 5.

13. The two words: "of the room (recess, bedchamber, etc.), of the hall (also, cavern)" evidently refers to the place where the bowl was to be placed. The first word may be in construct state, or the two terms may be parallel, as the words might mean the same thing. אידרון = Ass. *idrânu,* and is current in the Aramaic dialects. Jastrow defines אספלידא as especially a "sitting room in the shape of an open hall"; for some discussion of its etymology, see Payne-Smith, col. 315.

(13) A preparation (?) .... leaven, press it (?) .... Amen, Amen, Selah. Salvation and peace from Heaven, forever and ever and ever.

Commentary

A charm for a certain woman against the reproach of barrenness, that her husband may love her and she may have children by him. The couple is the same that figures in No. 1, which is particularly a charm against the liliths; these are supposed to have prevented the natural fruit of the human union, affecting not only the woman but also the man's love and virility. At the end probably is given an aphrodisiac recipe.

This text and No. 28 are unique among early Semitic incantations, for they are love-charms. In this they bear the closest relation to the Greek erotic incantations, on which I will speak more particularly under No. 28. But in the present text it is the barren forsaken wife who speaks, not the passionate lover, as in No. 28 and the Greek charms. The incantation has a Jewish cast in its address to certain angels, whose names are expressive of love and in its use of biblical divine names. Apparently the text is shortened from a longer model. It is illiterate in style and script, and contains numerous Hebraisms. A feature is the use of a wedge-shaped sign (indicated in the transliteration by a comma), occurring as a separator between words, but without consistency.

1. סברי : for סכירי.

עממיה תנממיה ולישניה: either antique emphatic plurals, or else = Mandaic plural in יא—(see to 9: 6). The second word is an artificial enlargement of the Syriac *tegma* (τάγμα) for the sake of assonance with ע (spelt in the usual archaic Syriac fashion). The passage is reminiscent of *Dan.* 3: 4. Do the words refer to classes of mankind, and the taking away of the woman's reproach among men? Or not rather to ranks of demons?—to whom we expect some reference; cf. p. 80. The closing of their mouths means forstalling their curses, cf. p. 85. תנמא is particularly

used of the cohorts of evil (Payne Smith, *s. v.*) and in the Peshitto translates the "legions of angels" in *Mt.* 26: 53.

3. The three angels appear (upon some reasonable emendation) to have names corresponding to the verbs in the next lines. Angels were chosen, or invented, for the pregnant meaning of their names; so Raphael became the patron of healing. Raḥmiel is the genius of love in No. 28, and in one of Thompson's Hebrew charms from Mossoul (*PSBA,* 1906-1907), which contain many incantations for love, love between man and wife, and also for breaking marital love; once we find a philtre in which the angels invoked are Ahabiel, Šalbabiel, Opiel, names signifying love and its passion (1907, p. 328, no. 80). חביאל and חננאל are found in Schwab's *Vocabulaire,* and the latter also in Stübe, l. 56.

5. The line is obscure; it appears to present a dramatic scene in which the sorcerer and his client, in the presence of the adversaries, shall obtain judicial vindication of love from the favoring angels. The reference to Adam and Eve's offspring has a sympathetic value.

6. מילבוש וגי assimilation of מן, as in Hebrew; for the idea cf. 2: 2.

מיעיל חיסדא: a common Semitic idiom; cf. *Is.* 61: 10, *Eph.* 6: 11; in the Samaritan, אלביש אימנותא, בגד כפר ללבש (Heidenheim, *Bibliotheca sam.* ii, pp. xlii. 197, § 24); actual investing with "grace" occurs in the newly-found Odes of Solomon, 4: 7: מנו גיר נלבש טיבותך.

7. מיזיה מיזי: again Hebraic. The following word may be a dittograph, or a Pael of זוח. For this protection on right and left, cf. 6: 10.

For יהוה ביה see to 7: 8. אלאל, in the Mandaic religion, epithet of the sun-deity (Norberg, *Onom.,* 9, Brandt, *Mand. Schr.,* 31), also found in the Greek magic, Wessely, xlii, 67. It may be a magical reduplication; but cf. the reduplication of אל in the South-Arabic plural, and the Hebrew אליל, probably once a divine name—to be connected with Ellil of Nippur? —see Clay, "Ellil, the God of Nippur," *AJSL,* 1907, 269.

8. כל אסו: cf. 15: 2.

דריסת: this spelling occurs also in a neo-Syriac manuscript published by Lidzbarski (*Die neu-aramäischen Handschriften der königl. Bibliothek z. Berlin,* Weimar, 1896, 447); otherwise דרוסת = צרוצת. For a discussion of the word and its origin see Nöldeke, *Neusyrische Gram.,* 386.

קים ושריר: the same formula in Lidz. 5.

At the end of this line which is on the edge of the bowl, the scribe has attempted to continue and has written a few characters; he then started afresh on the exterior.

9. קל קלא : קל is used like the Hebrew קול. The piteous plaint of the sufferer is thus expressed, to move the sympathy of the celestial ones. In the same way the Babylonian magical texts preface their rites with a description of the plight of the patient; also the biblical Psalms often commence in like manner. A similar phrase appears in a bowl of Pognon's, B 20, but there the reference is to the curses of unfortunate souls which alight on the living. There may be the reference here to such a ban—of a virgin gone to her death without children. In this case חסי (= biblical חם, Syriac חם), would refer to the stilling of her "tongue." (Cf. the magical use of *σιγή* in a text of Wessely's xlii, 60 f.). But the repetition in l. 11 inclines me to the view that the virgin who "travails and does not bear" is the wife, subject perhaps to miscarriage or feminine maladies. Then חסי would be from חום = חוש, "hasten," and so = "quickly," cf. Ass. חסא; the word would then correspond to the frequent *ἠδη ἠδη ταχὺ ταχύ* as at the end of the Hadrumetum love charm (see to No. 28), and see note to 14: 4.

נחבי נחבי וניתי: the verb used for "love" is חבא, where we expect חבב; cf. Heb. אהב. For this triple adjuration, see No. 28.

10. לגוף ביתיה וגי : I have tried in my translation to express the difficult word גוף, which primarily "body," comes to mean the essence, essential thing. The reference is sexual, and the word has such connotations (see Jastrow, *s. v.*).

11. כי אבליתי: this appears to be an error for בתולתא, as in l. 9; or possibly ppl. fem. in *-tê*, "mourner"? כי ... כי are used correlatively, and we must suppose a lacuna: as she (was) in the joyless condition of childlessness, so (her future state shall be symbolized by) fresh myrtle for crowns. Some literary form has been so rubbed down as to be almost unintelligible. For this correlation of כי ... כי, see some, as yet unnoticed cases in the Hebrew, e. g. *Gen.* 18: 20.[1] Myrtle as sacred to the goddess of love (Baudissin, *Studien*, ii, 198 f.) makes an appropriate simile.

[1] See my notes in *JBL*, 1912, p. 144.

12. אפרפרט וג׳: this line is provokingly obscure. Since a magical philtre is here prescribed, I venture to suggest that פ׳ = Latin *praeparatum* (the verb being used by Pliny for preparing drugs, foods, etc.). Or it may be the Rabbinic פרפרת, "hash, salad" (which however does not explain the ט). חאמין is leaven, which as a ferment would be appropriate to an aphrodisiac. אעיקיהי is fem. imperative, "press it." Aphrodisiac herbs, used magically or medicinally, are common in all erotic praxis.

And in the name of Michael and Gabriel..... (5) in the name of Sariel, in the name of Seraphiel, Sûriel and Sarsamiel, Gadriel, Peniel, Nahriel. And all Blast-demons (6) and evil Injurers, whose names are recorded in this bowl and whose names are not recorded in this bowl,— oh, (7) oh, avaunt, sit down there! And ye shall be cast down, sitting within the glowing light and fiery flame (8). Amen, Amen, Selah.

Commentary

A charm for a certain woman, in the name of YHWH and the angels, against some definite (now obscure) demon in particular, and against the devils in general.

2. מץ מץ: the syllable is *Athbash* for יה; cf. מצפץ = יהוה, Stübe, l. 66 and p. 63. אנרביס is probably also a mathematical anagram for the divine name or power; cf. Abraxas, = אברכיס, etc. (see p. 57, and to 7: 9), of which the present form may be a corruption. The syllable סף seems to have suggested the sea of סוף. יהוק is for יהוה.

3. דויד: the lacuna makes the reference obscure; a reference to one of the Psalms of David, or, by error to the Song of Moses?

דאשרי שבינתיה: the Targumic phrase, e. g. *Dt.* 12: 5.

בהיכל נורא וברדא: hail and fire are frequently found together in the Old Testament as manifestations of the divine presence; e. g. *Ps.* 18: 13 f. *Ezek.* 38: 22. But cf. especially *Rev.* 11: 19: "Then was opened the temple of God that is in heaven; and there was seen in his temple the ark of the covenant; and there followed lightnings and voices and thunders and earthquake and great hail."

4. אחושיה, יחוש, יחוש: cf. יא חוש, l. 7; Yâ = interjection "Oh." Reitzenstein has called attention to the equivalence of these expressions (commenting on Stübe, l. 14, *Poimandres*, 292, n.), to the ἤδη ἤδη ταχὺ ταχύ of the Greek magic, as applied to demons in the sense of "at once avaunt." For examples, see the endings of nos. 3, 5, 6 in Wünsch, *Antike Fluchtafeln*, and the editor's note p. 13. Cf. a Christian charm in Pradel's, p. 72: *veniat sanatio celeriter, abeat abeat abeat malum.*

5. All these angel names are found in Schwab's *Vocabulaire*, our סרסמיאל being probably the same as the סרמיאל there. For magical references to Suriel, see Lueken, *Michael*, 71.

6. The sorcerer spares himself the trouble of naming the evil spirits by applying a "blanket" charm to them all; cf. 1: 14.

וידלא: see to 3: 3.— אידכרית: evidently a confusion between the passive and the 1st person active.

ההין: the only instance in these bowls of this rare demonstrative; elsewhere here הדין

7. תרמן: probably Etpeel.—For the curse at the end cf. 7: 17.

Translation

In thy name and in thy word, Lord of all healing, God of love. (2) Salvation of Heaven for the house of Hormiz bar Mâmâ and for the dwelling of Dôd(â)i bath (3) Marthâ and for Bar-gelâl bar Dôdâi and for Bar-šibebî bar Cirâzâd, even for all her house and dwelling (4).

Lâs min selîḳ: waṭrefê dâs min mena

Enaš lâs lâ selîḳ: waṭrefê dâs enâš (5) *menâ*

Bhybdyn

Wenaš lâs lâs lâ selîḳ: waṭrefê dâs enâš menâ.

I scan and rhyme (?) against you, Spirits and Goblins (6) and Plagues and Howlers and Strokes and Circlet-spirits and evil Arts and mighty Works and Idol-spirits and the evil Lilith (7)..... And I bind you with bonds of brass and iron and seal you with the figure of a seal of fire, ... (8) ..... And I banish you from Hormiz b. M. and Dôdâi b. [M. and] Bar-gelâl b. D. and Bar-šibebî b. C. (9) ..... and Mehôi bar Dôdâi, in the

name of Rophiel and Suriel and Gabriel [and ...] and Raḥmiel and .ḥatiel and Suriel .... and Serariel . And by the seal of YHWH Sebaoth is it established forever. Amen, Amen, Amen.

COMMENTARY

A charm for several persons, whose relations to each other are not definite. They may be members of one household—a kind of *Pension.* The virtue of the charm lies in the use of a doggerel couplet. The figure in the center of the bowl is a serpent with its tail in its mouth; see p. 54.

1. הורמיז: for this abbreviated form of Ahura-mazdah, see Justi, p. 98, the same name in Lidz.

מאמא = מאמאי, מאמי, as in No. 8.

דודי: 38: 4, דודאי; hypocoristicon from דוד, "friend, uncle," etc.; cf. the biblical name דודו and its variant דודי, also Dâdâ, 12: 2. The present name is feminine; may it mean the *dûdâi,* "love-apple"? Justi, p. 86, lists a Dûday.

2. מרתא: a Jewish name found in the Gospels and in a Palestinian ossuary inscription (Lidzbarski, *Handbuch,* 318) = מארת, 8: 5.

ברגלל: a proper name after Arabic formation? גלל = "round lump, excrement," etc. Galal is a biblical name.

ברשיבבי: שי is a form of necklace charm, see to l. 6. The mother has named her child after the amulet whose virtue she supposed gave to her or protects the babe.

טשיהראזד: the Persian Cihrâzâd; see Justi, p. 163. The טש is an attempt to represent the Persian hard *ch.* The name is the same as that of the famous *raconteuse* of the Arabian Nights.

3. ביתה: doubtless referring to Dodai, who appears to have procured the charm for the household.

4. לאם מן סליק וג': this and the following line contain a magical incantation expressed in a rhyming doggerel couplet. (In the first occurrence of ואטרפי, the ר was first omitted, then written above, and finally the word was rewritten that there might be no infraction of the charm.) First of all, there is a couplet rhyming at the caesuras and at the end;

then the last line is repeated in l. 5, introduced by the obscure combination ביהיבדין. A similar doggerel formula is presented by Myhrman in his edition of the Babylonian magical *Labartu* series (*ZA*, xvi, 188; cf. Jastrow, *Rel.*, i, 339). It is there called a *šiptu*, "incantation," and runs thus (following Jastrow's arrangement):

ki | rišti libiki | rišti la libiki | la libi | piš | pišti ša anzišti | ša anziš | šu anziš | anziš.|

For Greek parallels see p. 61. The repeated מנא of the couplet is taken up by כינתי ומניתי. The roots מנא and כן may refer to the scansion of the couplet.

5. שיקין = the Arabic demon *šiḳḳ*—sometimes interpreted as one-half (*šiḳḳ*) man, one-half demon, but probably a demon of weariness; see Lane, *Arabian Nights*, c. 1, n. 21, van Vloten, *WZKM*, vii 180.

6. ירורין: see p. 81; here between categories of maladies, in Myhrman between "devils" and "spirits."

שיבין: the Targumic שבבין (Jastrow, p. 1510), a feminine ornament, some kind of pendant chain, see Krauss, *Talm. Archäologie*, i, 204 and note; belonging to the category of חומרי, ענקתא, etc., see p. 87 f. Cf. the name above ברשיבבי, where the uncontracted form survives.

7. Brass, lead, fire, all potent against demons. Cf. the "chains of lead," 39: 4 f. The bonds of hell are called *catenae igneae* in a Latin charm, Wünsch, *Ant. Fluchtafeln*, no. 7; also the "adamantine chains" in Paris Papyrus, Wessely, xxxvi, l. 1227 ff.

9. Mehôi: hypocoristic, cf. Mehducht, etc.

Translation

Salvation from Heaven for Dâdbeh bar Asmandûch (2) and for Šarḳôi bath Dâdâ his wife and for Hônik and Yasmin (3) and Kufithâi and Mehdûch and Pannôi and Abraham and Šilâi the children of Šarkôi, (4) and for their house and their property, and that they may have children and may live long and be established, and that (5) no Injurer in the world may touch them.

And in his great name, whereby the holy God is called—wherein are arts (?)—(6) which suppresses darkness under light, plague under healing, destruction under construction, injury (7) under ban, anger under repose: suppressed are all the sons of darkness under the throne of God, in whose (?) name (8) are bound, suppressed Devils; gripped likewise are evil Spirits and impious Amulet-spirits and Names and Princes of (9)

darkness and the Spirit (breath) of foulness and fatigue and the Tormentors of night and day and Curses and Necklace-charms and Words and Adjurations (10) and Knockings and Rites, the Plague and the she-Plague and the voice of Invocation, and the Spell of poverty and Demons and Devils and Satans (11) and Idol-spirits and Liliths and Arts and mighty Works and the seven Tormentors of night and day. They are bound, suppressed and laid, (12) away from Dâdbeh, etc. (as in ll. 1 ff.), (13) and from all their house and from their property and from all their abode, from this day forever. Amen, Amen, (14) Selah. "And YHWH said to Satan," etc.

COMMENTARY

A charm for the large family that appeared in No. 12. It contains an extensive and repetitious list of demoniac species.

5. בישמיה וג׳: I have translated literally; the original form may have been: ב׳ ר׳ דאלהא ק׳ דקרי חרשי ליה "the great name ... which magicians invoke."

6. כביש: ppl. act.

7. "Sons of darkness": contrast the "sons of light," 1: 9.

8. רברבי דחשוכא: cf. the Pauline *τοὺς κοσμοκράτορας τοῦ σκότους τούτου*, *Eph.* 6: 12.

רוח סרי ונאלי: lit. "foul and laboring spirit" (breath; in *Bekor.* 44b (an obscure passage) there is a disease or demon called נאלא, which is interpreted as "asthma" (Jastrow, *s. v.*). Foulness of breath was cause for divorce, Krauss *Talm. Enc.* i, 256. Cf. the בר ניפלה of 29: 7, which is found in the same passage from *Bekoroth.*

10. בתקלא דקריה: see pp. 52, 84.

11. משכבין: Af.; cf. English "lay a ghost."

אסרה דמיסכינותא: cf. the Rabbinic דמזוני א׳, "genius of nourishment," and see pp. 79, n. 70, and 86, n. 112.

Translation

This day above any day, years and generations of (2) the world, I Kômêš bath Maḥlaphta have divorced (3) separated, dismissed thee, thou Lilith, Lilith of the Desert, (4) Hag and Ghûl. The three of you, the four of you, the five of you, (5) naked are ye sent forth, nor are ye clad, with your hair dishevelled behind your backs. (6) It is announced to you, whose mother is Palḥan and whose father (Pe)laḥdad, ye Liliths: Hear and go forth and do not trouble (7) Kômêš b. M. in her house. Go ye forth altogether from her house and her dwelling and from Kallethâ and Artašria (8) her children. I have warded against you with the curse which Joshua bar Perôhiâ (*sic*) sent against you. I adjure you by the honor (name) of your father (9) and by the honor of your mother, and take your divorces and separations, thy divorce and thy separation, in the ban which is sent (10) against you by Joshua b. Peraḥia, for so has spoken to thee Joshua b. P.: A divorce has come to thee from across the sea. There is found written (in it), ye whose mother is (11) Palḥan and whose father

Pelaḥdad, ye Liliths: And now flee and go forth and do not trouble Kômêš b. M. in her house and her dwelling.

I bind (12) and I seal with the seal of El Shaddai and with the seal of Joshua b. Peraḥia the healer, healing and release from Heaven for Abâ and Yazdid and Hônik sons of Kômêš. Thwarted and frustrated are all Injurers, whom we have removed by the ban upon them. Amen, Amen, Selah.

Commentary

A charm effected by a woman for herself and her children, who appear in two different groups, in the name of Joshua b. Peraḥia. It is an abbreviated and often incorrect replica of No. 8.

1. For the corrupted formula, cf. 6: 5 and see p. 55. The full form appears in no. 16020 (unpublished) "this day out of all days. I Honik," etc.

2. כומיש, l. 7 כמיש: the name obscure; cf. Κομοσαρνη, Justi, p. 165.

מחלפתא: for this name, frequent in these bowls, and its equivalents, see Nöldeke, *Encyc. Bib., s. v.* "Names," § 62.

שביקית: Peal, the following verbs Pael.

3. For the singular and plural number, see to 8: 2. The word lilith is spelt badly. For the לי דברא cf. 29: 7, and see p. 78; the parallel has לילי דיברא.

5. The correct grammatical forms are found in 8: 3; the lilith names following are also mangled.

6. תסיסון: Afel of נסס.

7. כלתא, i. e. "bride"; cf. the Babylonian name Ina-ekur-kallatu, cited to me by Prof. Clay.

ארתשריה: a form of Artachšathra, and cf. Αρταξηρις, Justi, p. 35.

8. פרוחיה: so l. 12, but the correct spelling in l. 10; probably assimilation to Persian *farruch.*

For "glory" = "name," see on 8: 8, and n. b. the equivalent πατέρων δόξαι, *Wisdom,* 14: 24.

9. סיב: f. pl. impr. of נסב; but שמעו in l. 6. The following דאת שלחתן is a perversion.

10. לכא = ליכי.

11. פמטו = מוטו, cf. פק, l. 7, *plus* conjunction פ; for another instance see Glossary; probably a dialectic survival. פ appears in the Senjirli inscriptions and the Elephantine papyri.

12. אסיא: the same title in 34: 12.

פטרתא: formation from Pael, = Rabbinic פטורא.

אבא: frequent Talmudic name, *Seder ha-Doroth,* ii, 3-18.

יודיד: probably error for יודד, see 7: 3.

13. פירקן: Pael, 1st pers. plural.

No. 18 (CBS 8695)

Commentary

This inscription is yet another duplicate to the three collated under No. 11. It is badly written and mutilated, and would be in large part unintelligible without the other texts. It presents little that is new and a translation is not necessary.

1. The name of Ephrah's father is uncertain. From what appears here, it may be איהי; cf. בראיהי, in *Seder ha-Doroth* ii, 47. In l. 9 it looks like איי, i. e. *Ayê?* But the strokes may be for abbreviation.

2. A prayer for offspring is here expressed.— איצפנדוי: hypocoristicon for איצפנדרמיד, see 26: 4.

5. בחלבם: again this name differs; but the tradition of the granddam's name is accurate.

באבה דא: i. e. דאפרה.

6. דאביה: ppl. of דבא.

דירקי: if not an error, this is a further development of a word with a history: *daḳdaḳ* = *dardaḳ* = *daraḳ*.

מיצה מימי ציתא: the probable reading. ציתא is biblical. The dirty habits of these foul demons appear in the Babylonian magic; they are compared to pariah dogs and are exorcised by the spirit of foul streets, see *Utukki* series, B, 46; cf. v. col. 5. l. 21.

8. הפטרית: for הא פ׳.

9. קרחו: if we read so, we may compare the magic formula in *Pesaḥ.* 110a, קרחייבי קרח (see to 1: 6). The verb = ערק, by transposition, common especially in Mandaic. Lidzbarski in his parallel (see to No. 11) reads קדא and translates "spring up"; but read there קרא = קרח.

TRANSLATION

In thy name, O Lord of salvations, the great Saviour (2) of love.

Charmed and sealed and countersealed is the whole (3) person and the bedchamber of this Mešaršiâ, surnamed (4) Goldsmith, bar Maḫlaphtâ, with the seven spells which may not be loosed, and with the eight seals (5) which may not be broken.

In thy name, lord Ibbôl, the great king of the Bagdâni; and in thy name, our lady Ibbôleth, (6) the great queen of the goddesses (she-demons?), and in the name of Ṭalasbôgî the great lord of the Bagdâni; and in the name of Sahnudmuk; (7) and in the name of Ibbôl son of Palag; and in the name of Angarôs; and in the name of the Lord, the Word and Leader and Armasa (Hermes); and in the name of Azpâ and 'Alîm; (8) and in the name of Naḳderôs the lord of ...; and in the name of Seraphiel, lord of judgment and of (divine) beck; and in the name of the 60 male gods (9) and the 80 female goddesses; and in the name of Ardisaba (*or* Ardî) the most ancient of his colleagues; and in the name of Anad the great lord ..... (10) cast above (him) iron and bronze, and fastened to him fetters (?) of lead and the 70 exalted priests of Bagdânâ; and in the name of Bagdânâ son of Habâl (destruction). (11) ...; and in the name of Palnînî and Mandinsan and Menirnaš ...; and in the name of Iras son of Hanas; and in the name of Abrakîs (Abraxas); and in the name of Agzariel, who is without compassion; (12) and in the name of Arzan and ..., *rôs berôs delterôs;* and in the name ... to Ariel he sent a message: "Lift up" (?), ... to the great Ruler before him; and in the name of ...; and in the name of lord Ibbôl (13) the great angel of the Blast-demons, and in the name of the great God and the great Lord of the Bagdâni; in the name of Ariôn son of Zand: Ye are charmed and armed and equipped.

Against all Demons, Devils and evil Satans, this charm (14) and bowl is sure and its seals established against them, from whose charm none ever goes forth and from whose control none sallies forth.

In the name of these charms are bound there Demon and Danḫiš and the evil Lilith (15) which are in the body of this Mešaršiâ, surnamed Goldsmith, b. M., by charms in earth and by seals in heaven.

Again, (ye are) charmed with a charm and sealed a second time away from the body of this Mešaršiâ, (16) etc., Amen.

Again, charmed are the Demon and Devil and Danḥiš and Amulet-spirit and Idol-spirit, which are upon the body of this Mešaršia, etc., by Ibbôl, (17) and sealed by Ibbôleth.

Again, charmed by Šînas and Manâ, and sealed by fire.

Again, charmed by the great gods and sealed by Ariôn son of Zand.

Again, charmed by the seal of the family of Ḥanûn, and sealed by the great ... of Zeüza (Zeus).

Again, charmed by the true God, and sealed by the great Ruler (18) who is before him, away from the body of this Mešaršiâ, etc.

In the name of Paṭragenôs, Okînoš (Okeanos), Šunḳâ, Ḳôsâ, Kapâ, Azaziel ..... (19) ..... his constellation (?), that this Mešaršiâ, etc., be sealed from the top (?) of his head to the toes of his feet ..... they shall not be, nor this house of Mešaršiâ, (20) etc., shall they enter nor approach, nor appear therein, neither by night nor by day, from this day and forever. .....

Commentary

A charm made out for a certain man whose body is infested with evil spirits; with great elaboration of incantations they are exorcised from him and his house. The inscription is thoroughly pagan, and is interesting because of its invocation, for over half its length, of an extensive list of deities. Cf. a similar long list in Wünsch, *Ant. Fluchtafeln*, no. 4. Unfortunately by reason of the coarseness of the script and its general illegibility, most of these names are obscure. Some of them are definitely Greek,—Zeus, Protogonos, Okeanos, and perhaps the Aeons, male and female, may be made out; several others are of Greek formation. Others again are of Persian origin, and some are purely charm-words, "mystical" names. Some forgotten cult may have given certain of the names; notice the reference to the 70 priests of Bagdana.

2. חיתמא: error for חתימא.

3. קומתיה: the word = "stature," then, as here, "body," as is shown by the phrase, in a similar connection, in bowls published by Schwab (E)

and Stübe (ll. 56, 64): the demon depart, etc., from the 248 הדמי קומתיה of such a one (the word is not recognized by either editor). The same word occurs in the interesting magical passage in *Eze.*, 13: 18.

משרשיה: also in Schwab, G; a frequent Talmudic name (see *Sefer ha-Doroth,* ii, p. 276).

4. דהבאי: this surname appears as a proper name in *Ḥagiga* 2a.

"Seven spells .... eight seals": for this cumulative expression, cf. Mica 5: 4; see 5: 2.

5. בשמיך: cf. 28: 1.

איבול: also below, ll. 7, 16. In l. 7 he is בר פלג, and his consort איבולית is "our lady." Professor Clay has cited to me a divine name Ubbulti appearing in a Cassite tablet, in the name *Ubbulti-lišir.* אובול might also be read, and I am inclined to make the word = Syriac *ubbâlâ,* "generation," etc., and so Αἰων. For a discussion of Aeon as supreme deity, god of time, etc., see Reitzenstein, *Poimandres,* 269 ff. The Aeons appears in the magical texts, e. g. Dieterich, *Abraxas,* 140, l. 51; 192, l. 21; 203, l. 18. The syzygies of Aeons were male and female—cf. the names in Origen's list at the beginning of his work *Adv. haer.,* and איבולית would be a formation to express the female Aeon. Derivation from Apollo also suggests itself, but the feminine is not thereby explained.

6. בגדני: Comparing what precedes, the word means some class of deities or demons. In l. 13 בגדנא is a divine name, = the demon in 11: 5 (*q. v.*). It is then a word like אלהא, etc., which can be used individually or generically. It evidently contains the Indo-European element *bâga,* "god." It is difficult to decide whether Bagdana is a propitious or maleficent demon (as in No. 11); in the latter case he is charmed to work the good of the sorcerer's client, as in the Greek incantations, e. g. Hekate. In W. T. Ellis's Syriac text (see § 2) appears שמחיזא מריא בגדאנא, "Šamhiza the lord Bagdana," or "the lord god"? The spelling gives the vocalization of the penultimate vowel. For Š. cf. the Enochian Samaeza.

7. אנגרום: the ending -ום in this and other names recalls Greek formations. May this word = ἄγγελος?

מלילא: in Syriac, "logical," etc., and used nominally = *τὸ λογικόν*. It is here associated with ארמסא, both being names of a potency; the passage is parallel to *2*: *2*, *q. v.*

מרנלא: if the reading is correct, the Rabbinic רנל, Afel, may give the interpretation,—"leader," which would be a fitting epithet of Armasa-Hermes, "the shepherd" *par excellence*. Cf. the idea in the late Hellenistic religion of a deity, especially Hermes, as a guide, *ἡγέμων*, of souls; see Cumont, *The Oriental Religions in Roman Paganism*, n. 63 p. 253. It may be noticed that מ׳ is used in the Talmud of a "traditional word or saying" (Jastrow), i. e. = *logos?*

8. סרפיאל: also 14: 8. In his epithet, רימזא appears to be used, as in the Syriac, of the divine nod or intimation, i. e. "command."

9. ארדיסבא: or the name is to be read ארדי, followed by סבא סבתא קשישא קשיש; why the fem. סבתא?

10. In this and the following line most of the words can be read, but in consequence of the failure of the context the text defies interpretation. The three metals may be referred to as having magical properties, and this may give the clue to סיליתא דאבדא (סיליתיה written first erroneously). Comparing the Mandaic text in 39: 5, בשושלאתא דאבארא (עסירא), the equation suggests that our סיליתא = "chains"; possibly סילתא "basket," and here used of a metal cage.

בר חבאל: = "Son of destruction"?; cf. בר חנם, l. 11, בר זנד l. 13; these deities are given a parentage like איבול, l. 7. Possibly חנם is הנם, the verb used in the Nerab inscriptions, and so = חבאל.

11. אירס:=Ἔρως, or Ἄρης?—אברכים: cf. 7: 9.

אנזריאל: נזריאל is found in Schwab, *Vocabulaire*. Is אכזריאל "God's cruel one," meant?

12. The accumulation of words in *ros* is a charm formula; see p. 61.

13. מלאבא = מלכה, l. 5.— זעקי: the זיקי with Mandaic spelling.

אריך בר זנד: found also in 34: 8, which determines the reading here.

אתן וג׳: the plural is problematic, as there is but one client to this charm; it may have been used inadvertently. חליצי is not Aramaic in its present sense.

14. דנחיש: this obscure demon appears again in l. 16; it is evidently the דניש listed with the planets in Libzbarski's Mandaic amulet in the de Vogüé *Florilegium*, l. 251.

17. שינאם: cf. the Mandaic סיניאוים, name of an angel, Lidzbarski, *Ephemeris*, i, 104, n. 2.

זעוא: Zeus, = Syriac זו, in Jacob of Sarug (Martin, *ZDMG*, xxix, 110, l. 50), otherwise זיוס and זום.

מנא = the Mandaic genius Mana? See Norberg, *Onom.* 96.

בית חנן: the family or school of some magician like that of Joshua b. Perahia, see p. 46.

18. אוקינוס = Ὠκεανός, the parent deity in magical theosophy (cf. Ea in the Babylonian); see index of Dieterich, *Abraxas*. The preceding name recalls Protogonos who appears with Aeon as son of Kolpia and Baau in Sanchuniathon's cosmic genealogy, Eusebius, *Praep. ev.*, i, 10.

19. לילבי: cf. 11:7. מלואשיה: an astrological reference?

טורפת רינליה ... מין: the same phrase in Pognon B, except that the word זימתא, "hair," appears there.

Ṭardi bath Onî (2) Hormisdar Ṭardi. In the name of AAAAAA, exorcised and sealed (3) are the Demon and the Devil and the Satan and the Curse-spirit and the evil Liliths (4) which appear by night and appear by day, and appear (to) Ṭardi bath [Onî, etc.]. (5) In the name of Gabriel, Michael, and Rophiel. Amen, Amen, Amen, Amen, Hallelia, Selah. According to AAAAAA.

Commentary

A charm against ghosts. The interest of this bowl lies in the figure decorating the center. It represents a demon with arms and legs manacled. On either side of the figures is an enclosed space, that on the figure's right hand bearing the inscription אסורא, that on its left, רשוא, i. e. prohibition and permission. In the lower part of the body on the former side is inscribed the names of the sorcerer's client. The pictures thus graphically presents the idea that the demon has no power over the lady in question. The picture is of better quality than the inscription, which is very illiterate. The spelling is most careless.

1. The connection of the proper names is uncertain, as also the character of the names themselves. For הרמסדר I might compare the Pahlavi Ormazdyâr, Justi, p. 10a.

2. For the repeated א, see p. 60.

3. לטאנא: probably an artificial form; cf. שידנא, טלנא, סטנא.

4. מיתחזא has Mandaic fem. pl. ending.—In באלליא the first א has a point over it—to mark error? cf. the Massoretic Niḳḳudim.

5. רופיאל: the first vowel as in *Enoch* and in Mandaic, representing the Hebrew active ppl., parallel to the equivalent Aramaic form in *Raphael*.

הלליה: for similar perversions see 24: 4, 31: 8, 32: 12; cf. *αλληλου* in the Paris Magical Papyrus, l. 3032, and הללו ליה in a Jewish charm, *JAOS*, 1911, 274.

Translation of No. 22

Sealed and countersealed are the house and threshold of Dôdî bath Aḥath from all evil Plagues, from all evil Spirits, (2) and from the Tormentors, and from the Liliths, and from all Injurers, that ye approach not to her, to the house and threshold of (3) Dôdî b. A., which is sealed with three signets and countersealed with seven seals from every kind of

Lilith and from all (4) Injurers, that ye approach not to her, to the house and threshold of Dôdî [b. A.], and from all evil Spirits and from all evil Injurers, (5) from this day and forever. Amen, Amen, Selah.

Commentary

Three identical bowls, out of the four which were deposited at the corners of the charmed house; see § 8. There are slight variations in the inscriptions; in No. 22 the writer found more room and made a longer inscription. All three are most roughly and illegibly written; the characters ו, ז, י, נ are indistinguishable, and ם has a peculiar form. The word transliterated דינן, 22: 5, is written in a clumsy Syriac script.

An interesting grammatical peculiarity is the omission of ד after a genitive with the personal suffix. This appears at the beginning of l. 3 in No. 22, and throughout, in the same combination, in the other two. This might be taken for haplography before דודי; but the same phenomenon appears in the Mandaic bowls published below; see the Introduction, § 5 B.

For the injunction in l. 4 not to approach, cf. the like prohibition in a late Greek charm (Reitzenstein, *Poimandres*, 294): *τοῦ μὴ ἀδικῆσαι ἢ βλάψαι ἢ προσεγγίσαι*, κ. τ. λ.; cf. also a Syriac charm of Gollancz's, p. 93.

Commentary

A charm for three daughters of a certain woman, made out in their names severally and for specific maladies. The misspellings are numerous.

1. הנדו: the same name appears in 40: 14; it is hypocoristic of הנדויתא 38: 3, i. e. "Indian woman."

2. אשיתא is doubtless fever, in neo-Syriac = malarial fever, cf. the general name for fever with the Jews, אשתא (Preuss, *Bib.-talm. Med.*,, 184). and n. b. the disease *ašû* in Assyrian, Küchler, *Beiträge*, 131, 197. For the next word the root אזא suggests a sweating disease. אונא may be another kind of fever. In general see above, p. 93 f.

3. קאקי: also in Hyvernat's bowl. The name occurs as that of an Egyptian sorceress in a Syriac biography of Rabban Hormizd (c. 600), cited by Budge in his edition of *The Book of Governors,* i, p. clxiv. Our word is probably the Syriac *ḳâḳâ,* "pelican," while the Egyptian name may represent *κακή* (for a similar adoption of this Greek word, see Payne Smith, col. 3709).

4. For the "disturbing dreams," see p. 82.

5. Zarinkaš: cited by Justi, p. 382.

Translation

Salvation from Heaven for Gurôi bar Ṭâṭî and for Aḥath bath Dôdâ his wife, that there vanish from them in their dw[elling the Demons and Dev]ils by the mercy of Heaven. Whoever here has dead, who shall become alive to them here, and shall approach (2) and are found to be (actually) dead—from these you are kept and these are kept (from you). In the name: Thou- ..... send (to) them, Hadarbadû bar ..... (3) .. the contentions of them all. Behold, ... Blessed art thou, YHWH on account of the name of ..... (4) Yophiel thy name, Yehiel they call thee, Šasangiel, YHWH, and so ..... names ..... [Ar]masa Metatron Yah, in the name of Tigin, Trigis, Balbis, Šabgas, Šadrapas. These are the angels who bring salvation to all the children of men. They (6) will come and go forth with the salvation of this house and property and dwelling of his, and of his sons and daughters and all the people in his house—(7) of this Gurôi b. Ṭ. from this day even for the sphere of eternity. Amen, Amen, Selah, Halleluia.

Commentary

The inscription is of interest because it is directed against the apparition of family ghosts. In this respect it is to be compared with No. 39 and Wohlstein's bowl, no. 2417; see above p. 82.

1. גורוי: identified by Justi, p. 356, as a new-Persian form of *Warôê*. The *Seder ha-Doroth* lists a number of Talmudic persons named גוריא and גוריון (ii, 89); also a famous Syriac martyr Gurias is recorded. Apart from the Persian hypocoristic ending, the word could be explained from the Semitic (גוריא, Syriac, "whelp"). Cf. also the Palmyrene גורא, Lidzbarski, *Handbuch*, 249.

טאטי: Ṭaṭâ is a feminine name found in Syriac, in Asseman's *Bibliotheca Orientalis* and Wright's *Catalogue of the British Museum;* see Payne Smith, col. 1456. Cf. תאתא, 39: 8.

2. אילי, אלי, and אילה l. 5: the Aramaic pronoun with loss of י, cf. similar cases cited to 8: 2,—if not a Hebraism.

ניסתרתו, ניסתרי: Hebrew Nifals with Aramaic inflection.

שלח להום להדרבדו: the idea apparently is that a message be sent to the dead to cause them to cease their contentions (ריביהון) with the living, then one of these departed spirits is named. The name is not recognizable as a proper name, and evidently, as in Wohlstein's bowl, referred to above, it is a fancy name. (There we have such names as *Yodid, Muth, Dabti, Ith.*)

4. יופיאל: One of the six angels in Targ. Jer. to *Dt.* 34: 6, along with Metatron, and, in Schwab, *Vocab.*, 145, a companion of M. and prince of the Law. יופי is a Talmudic surrogate for יהוה, see Blau, *Zauberwesen*, 131.

יחיאל or יהואל: cf. יהואל, Schwab, p. 141. The following name is unknown. These angels are invoked as phases or names of Deity; cf. p. 58.

Hermes-Metatron: for the identification, see to 2: 2; here identified with Yah.

5. These magical words are mystical names of the angels; see p. 97. They are dominated by sibilant terminations for which see p. 60.

מלאכיה: Mandaic plural spelling.

6. יתן = יאתון.

7. גליל עלם: cf. Syriac שנתא זבנא גינל; also of a cycle.

Translation

"Hear, Israel: YYYY our God is one YYYY." "According to the mouth of YYYY they encamped, and according to the mouth of YYYY they marched (2). The observance of YYYY they observed according to the word of YHWH through Moses." "And YYYY said to Satan: YYYY rebuke (3) thee, Satan, YYYY rebuke thee, who chose Jerusalem. Is not this a brand plucked from the fire?"

Again, bound and held art thou, (4) evil Spirit, and mighty Lilith, that thou appear not to Berîk-Yahbêh bar Mâmê and this Ispandarmêd bath H..dôrâ, (5) neither by day nor by night, nor at any evening or morning, nor at any time whatsoever, nor at any seasons whatsoever. But flee (6) from their presence and take thy divorce and thy separation and thy writ of dismissal. [I have divorced] thee, [even as demons write] divorces for their wives and return not (to them). (7, 8) .....

Commentary

This charm, against the evil Lilith, is introduced by three quotations from the Scriptures. The first is the opening sentence of the *Shemá*, which still remains the contents of the Mezuzoth, or house phylacteries of the

Jews. The other two have occurred in previous texts; see 5: 5. Unfortunately the last two lines are too broken and obscure to be read. I have merely reproduced here the evident characters. In the segments of the circle at the bottom of the bowl appear words, some of which are forms of the divine Names יה, יהו, איאה; also אילור (?) and יאיהו (?)

1. יויי: for יהוה. Cf. the common scribal abbreviation, יי or יוי; also such forms as יוו and ויו, in Schwab O.

בד משה: for ביד, as in No. 5.

3. תוב: cf. 2: 1.

4. בריכיהביה: there is no doubt as to the reading of this name and it is remarkable enough. The second and divine component of the name—which was an ordinary [ברכ]יה, [ברוכ]יה, or [בריכ]יה, has been expanded so as to give the awful pronunciation of the Ineffable Name. We cannot suppose that the name was thus ordinarily spelt or pronounced, but the scribe has taken it upon himself to give this interpretation (פירוש) of his client's name. Here then is a clear survival of the ancient magical signification and use of the personal name (cf. Heitmüller, *"Im Namen Jesu,"* 159 ff.), as also of the pronunciation of the name itself. It may be retorted that יה—would hardly be used to represent *ê*, and that the original pronunciation was *Yahwè*, not—*é* (see Arnold's valuable discussion, *JBL*, xxiv, 152). The latter thesis is right, but I think that the tradition represented here connects with the Hellenistic magic, in which, among various forms, Ιαη occurs several times (Deissmann, *Bibelstudien*, 7),[1] although I have not found a case of Ια$\beta\eta$. Further, in the Talmud (*Sanh.* 56a) יוסה appears as a surrogate for the Name, which Dietrich, *ZATW*, iv, 27, would vocalize as Yosê. Blau (*Zauberwesen*, 131) objects to *ê*, but adduces from the Mishna, *Sukk.* 45a, the surrogate יופי which he identifies with the Greek magical term $\iota\omega\phi\eta$ (citing Paris Pap. ll. 1896, 2746). This would be further proof for η in the current magical pronunciation. As for יה- = -*ê*, we have not only the masc. pron. suffix for a parallel but also the plural -*ê* represented in the same way in some of our texts, e. g. 9: 6, 12: 1, 25: 5, and also the proper name דדביה 31: 2.

[1] Also on an Abraxas gem, see *Dict. de l'archéologie chrétienne*, i, 141.

I can find no other interpretation of this unique name-form. A note upon it was published in the *Museum Journal* of the University, 1910 no. 2, which called forth some private criticisms from scholars (along with assents), but no better explanation has been offered. (Is there a possible explanation in the יהביה noticed to 7: 8?). In the first amulet in my paper "Some Early Amulets from Palestine," *JAOS,* 1911, *272,* line 16, יהביה is apparently to be read for the divine Name, a proof of western connections for the present form.

איצפנדרמיד: cf. Glossary B for other forms. The name occurs in Ellis 1, where it was first recognized by Levy, *ZDMG,* ix, 470, 486, its correct interpretation (as Spenta-Armaita, a daughter of Ahuramazda) being given by G. Hoffmann, "Auszüge aus syrischen Acten," *Abhandlungen f. d. Kunde d. Morgenlandes,* 1880, 128; see also Justi, p. 308. For the mother's name Prof. Kent suggests to me comparison with Ἑρμόδωρος, see Fick, *Griech. Personennamen,* 112.

8. פשיטנא: cf. 2: 5.

Commentary

After the introductory appeal, "In thy name, O Lord of salvations," etc., the inscription for lines 2b-11 is practically identical with No. 2. This portion does not need translation and commentary. The remaining lines, 13-24, are so mutilated or obscure, that I can make out but few connected passages in them, and hence I do not present them.

There are a few slight differences between the parallel texts, this one being probably more correct. The most considerable variation in text is in l. 9, where the sorcerer says that *he* laid the ban upon Hermon; cf. my note to 2: 6. The same Yezîdâd bar Izdandûch and his wife Merdûch bath Banâi, appear in No. 7. There they are the subjects of the charm, here Yezîdâd operates magic in his own name. Cf. the mutual character of the charm in No. 2. In l. 8 the wife also takes up the exorcism.

Amen, Amen, ...

Commentary

A love-charm—such is the import of this sadly mutilated but interesting bowl. It belongs to the same class of magic as No. 13, but is more romantic, for there we find a charm for a childless, neglected wife, here one for a passionate woman to bring her lover to her side. For the use of a bowl for such a *defixio* see above p. 44. The first copyist was able to

read more than I can now, as, since it was in his hands, the bowl has been cracked and then repaired. The lacunae in the text are tantalizing.

So far as the text is legible, the charm which names the two parties adjures the passion of the beloved. Some praxis is described, a simulacrum is evidently used, for "his heart is to be torn in pieces," and on this image is to be scattered some kind of salad of hot herbs expressive of love's passion, while the beloved's name is to be formally pronounced.

Blau has collected the Talmudic material on philtres in his *Zauberwesen,* 24, 52, 158, 167; n. b. the recitation of Bible verses over the love-apple, p. 52, n. 2 (with literature). In the Old Testament we have mere references to this aphrodisiac (*Gen.* 30: 14 ff., *Cant.* 7: 14) without any note as to magical manipulation. For later Jewish use, see the numerous philtres prescribed in Thompson, "Folk Lore of Mossoul," *PSBA,* 1906-7.

But it is from the classical and Hellenistic field that we have most knowledge of this amatory magic, and the connections of the present text are found in that direction. Of course Theocritus's second Idyll comes to mind, in which the love-lorn maiden casts the various philtres into the fire with adjurations of Hecate. For this classical field I may refer to the monograph of O. Hirschfeld, *De incantamentis et devinctionibus amatoriis apud Graecos Romanosque* (Ratisbon, 1863); see p. 42 for aphrodisiac herbs; also see section 8 (p. 233) of Abt, *Die Apologie des Apuleius.*

In the magical papyri numerous erotic incantations are preserved, e. g. in the Paris Papyrus in Wessely, Vienna *Denkschriften* hist.-phil. Class, xxxvi, l. 2622 ff., xli, p. 52, l. 976 ff.[1] But the most graceful and famous of these charms is that inscribed on a lead plate found at Hadrumetum, N. Africa,—buried in a necropolis, just as our bowl was buried in the earth. First edited by Maspero, it has been since frequently published: Wünsch, *CIA, App. continens defixionum tabellas,* p. xvii; Audollent, *Defixionum tabellae,* no. 271; Deissmann, *Bibelstudien,* 21, and *Bible Studies,* 271; Blau, *op. cit.* 96; Wünsch, *Ant. Fluchtafeln,* no. 5. It is Blau's merit to have specially pointed out the Jewish connection of this text. Now, between this Hellenistic charm and our bowl we find an almost literal

[1] I may add now F. Boll, "Griechischer Liebeszauber aus Aegypten auf zwei Bleitafeln," in *Sitzungsberichte* of the Heidelberg Academy, phil.-hist. Class, 1910, no. 2.

correspondence in the trinity of terms for the passion adjured in the lover. With our invocation that the man "be enflamed and kindled and burn after" the girl, compare the longing of the Greek maiden Domitiana that her lover come *ἐρῶντα μαινόμενον βασανιζόμενον*, or *ἐρῶντα μαινόμενον βασανιζόμενον*, or *ἐρ. βασ. ἀγρυπνοῦντα* —repetitions like those in our texts. With this probably technical formula compare the second of the charms cited above by Wessely: May X do naught until *ἐλθοῦσα πρός με τὸν δεῖνα πληροφοροῦσα ἀγαπῶσα στεργοῦσα εμέ, κ. τ. λ.* Also in our l. 4 there is an echo of Domitiana's wish that he come *ἐν τῇ φιλίᾳ καὶ ἐρωτι καὶ ἐπιθυμίᾳ*, while the formula "to the name," l. 1, and the use of "heart," l. 2, indicate Greek connections.

How much Jewish, how much Grecian, the Hadrumetum tablet is, it is difficult to determine. Our text shows manifest ties with the love-magic of the Hellenistic world and is the eastern representative of the philtres of which the North African text is the most notable western example. The spirit of both these texts is Greek rather than Semitic; but the fame of Jewish magic appears to have made its solemn formulas eligible for the desires of passion. Our text, it is to be noticed, is not at all Jewish in religion, is of more simple original type than the African charm.

For the praxis of our text I may compare a Moorish love-charm cited by Doutté, *Magie et religion dans l'Afrique du Nord*, Algiers, 1908, p. 253: "A woman who wishes to gain the love of a man should procure the following materials from neighbors with whom she has never eaten: coriander, caraway, gum of terebinth, lime, cummin, verdegris, myrrh, some blood of an animal whose throat has been cut, and a piece of a broom hailing from a cemetery. On a dark night she is to go into the country with a lighted brazier and throw these different articles one after another into the fire speaking these words: O coriander, bring him mad! O caraway, bring him wandering without success! O mastic, raise in his heart anguish and tears! O white lime, make his heart wakeful in disquietude! O cummin, bring him possessed! O verdegris, kindle the fire of his heart! O myrrh, make him spend a frightful night! O blood of the victim, lead him panting! O cemetery broom, bring him to my side." Etc.

1. לישמיה = *εἰς τὸ ὄνομα*, and see Heitmüller, *"Im Namen Jesu,"* 95 ff., and his definition of the phrase as indicating "die Zueignung an eine Person

unter irgend welchem Gebrauch ihres Namens" (p. 107, and at length, pp. 100-110). As he shows, the usage before us is not Semitic or even Septuagintal. Cf. also Böhmer, *Das biblische "Im Namen,"* 4.

נבאזך, אנור..ך: ?

2. כבשי עלמא: I translate the words without any certain sense. For the noun כ׳ see to 7: 1. If צלמא might be read, the reference could be to a moulded (כבש, "press") figure representing the lover. Below in l. 4 the space before the man's name may have contained "image of," or the like. The latter part of the line is most obscure. The "heart" (also l. 5) appears as the seat of sexual affection. This is a Greek usage, not Semitic (with the possible exception of the Hebrew phrase דבר על לב, used five times with a woman as the object). See Andry, *Le coeur,* 5, for the Greek idea of the heart as the amatory organ, p. 15 ff., for the late Semitic use. P. 17 he quotes a Spanish Arabic poet who speaks gallantly of being wounded to the heart, but the metaphor is that of a mortal wound.[3]

3. I translate the ppl. נסבין, as also פסקין l. 5, as imperatives; cf. Rabbinic and Syriac usage.

חרך וג׳: to this list of aphrodisiacs the clue is given by גורייא (יא- = pl. ending, as in Mandaic), which is the *piper candidus* (Payne Smith, col. 2303); its pungency was evidently regarded as possessing erotic power and symbolism. Then חרך, if the reading be correct, and אחרוניתא are to be explained in the same way from their roots, חרך, חרה, "burn." ענני שימשא doubtless lies in the same circle of ideas. May מטללן be mushrooms? Loew's *Aramäische Pflanzennamen* does not contain these words. The "rites of love" are the magical practices.

4. שיחאה: I compare Syriac שיחנותא (*sub* שוח). "boldness, lasciviousness"; the ending *â'â* for *âyâ?*

5. פסקין מין ליביה: פ׳ a noun, or better a ppl. like נסבין, l. 3. The phrase is simplest interpreted as a reference to the lady's slowly tearing to pieces the facsimile of her lover's heart, with the intent that he perish of love; cf. again Theocritus's second Idyll.

[3] Cf. the phrase quoted in Lane's *Dictionary,* 782: "she has overturned my heart and torn my midriff."

דוכרניה: the lover's name is to be pronounced. For the angel Raḥmiel see to No. 13.

דליבת : one of the Mandaic forms of Dilbat, a name of the Babylonian Ishtar, especially in her stellar capacity as Venus. For the Mandaic forms, see Brandt, *Mand. Schr.*, 45, 85; also in Hesychius as Δελεφατ, and in Bar Baḥlul as דלבת.[3] For this form, see Nöldeke,, *Mand. Gram.* § 25. For the Babylonian use see Jensen, *Kosmologie,* 18, and the latest discussion by Jastrow, *ZA,* 1908, 155. As the goddess of love her patronage is appropriate. The epithet עזיזתא (cf. 38: 7) recalls the Babylonian *ezzu,* a frequent epithet of gods, while Ishtar especially appears as the raging goddess, whether of war, in Assyria, or of love, in the Izdubhar epic. The same epithet became the old Arabian name of the morning-star, al-'uzza, (Wellhausen *Skizzen,* III, 41, Nöldeke, *ZDMG,* xli, 710, the identification denied by W. R. Smith, *Rel. Sem.*, 57). The Edessene עזיז was originally the morning-star, Lagrange, *Études,*[3] 135; cf. the Aramaic names עשתרעזא and עשתרתעז (Lidzbarski, *Handbuch,* 347 f.).

[3] So also to be explained דלפת in Schwab, *Vocab.*, 403.

[This bowl is appointed in the name of?] (2) YHWH Sebaoth for the salvation [and sealing? of Metâniš] (3) bath Rêšân ..... (4) ..... and sealed (5) for Metâniš b. R.,—an amulet in the name of YHWH Sebaoth for Metâniš b. R. And bound (6) from her, from her children, from her house, from all her dwelling, are the evil Plagues and evil Demons and the evil and the decent Lilith and the Necklace-spirits and ... Menstruation and Tormentors and the Hags of the wild and Impurities and Epilepsy (?).

We adjure you (8) whatsoever evil thing lodges in the house and dwelling of Ḥaliphâi bar Šiššîn ... and Darši the foreigner and Astrôbâ ..... (9) ..... Leprosy, Plague, Stroke, the kindly and ... Lili, and the Demons, ghostly Shades, and all Goblins and evil Injurers whose names I have mentioned and whose names [I have not] (10) mentioned: I exorcise and adjure and make fast and bind and make fast (*sic*) upon you, in the name of MW, of ḲṢ, ŠṢ, MṢ, BṢ, KṢ, KṢ, BṢ, ... (11) I-am-that-I-am, the great God, Meṣôâh his name. He is God, the Lord of all Salvation, whose throne is established between the ethers and his eternity (world?)

is established for ..... (12) in YHWH and for his praise and the faith in him and his service. He is the great, the mighty God.

COMMENTARY

A charm made out for two different parties, (1) a woman Metâniš and her household, and (2) for several men and their house and quarters. These may be lodgers in the woman's house. One of the men is a "foreigner." The tone of piety in the charm is superior to that of the other texts; the incantation is in the name of YHWH Sebaoth alone, whose praises are dwelt upon in almost liturgical fashion.

1. The charm appears to have a double introduction. Most of ll. 3, 4 is unintelligible.

5. מתאניש:?—ראשן: possibly the father's name, Syriac ראשנא, "prince." One is tempted to compare the name of the famous Roxane; the masc. parallel Roxanes = Persian Rôšan, Justi, p. 262. But the *ô* should be indicated.

6. לי בי וכשירה: see above, p. 76. בי may be euphemistic and then have developed into a distinct species. Cf. the epithet טאבא in l. 9.

7. כיפסא: Syriac *kepsâ*.—בנתא דברא: cf. 17: 3.—טומי: Syriac טאומא.

בר ניפלא: one might think, in the context, of abortion. But in the Talmud בן נפילים is a demon of nervous trouble or epilepsy, *Bekor.* 44b; see Grünbaum *ZDMG*, xxxi, 332 for some discussion of the word. Epilepsy was a most common disease in antiquity; n. b. the miracles in the New Testament, and for the Hellenic world cf. Tambornino, *De antiquorum daemonismo*, 57: often equivalent to insanity. It has been generally supposed that the Jews were particularly subject to this disease; M. Fishberg in *The Jews*, London and New York, 1911, denies this, but admits the nervous pathology of the race (chap. xv). Cf. 16: 8 for another disease cited in *Bekor.* 44.

8. דרתיה: alongside of דירי, l. 6; the form appears in the Syriac and Mandaic bowls.

חליפאי = Palmyrene חלימי; for signification, cf. מחלפתא.

שישין : cf. the Persian (?) names Sisines, Sisinnios, Šišôi, Justi, p. 303; on the etymology of Sisines see Nöldeke, *Pers. Studien*, 404, no. 1.

Cf. the Jewish names שישא and שישנא, *Seder ha-Doroth,* ii, 348 f. Also in Pognon B (where שעשין) it is the name of the parent—mother or father? Is שידא an additional name? Of רשי we learn only that he is a foreigner. Also אסטרובא is evidently a Greek name.

9. אינגע: the demon offspring of Adam are called בני אדם נגעי in the Zohar, Eisenmenger, ii, 422.

חרסום: for this formation, see Levias, *Grammar of the Aramaic Idiom ... in the Bab. Talmud,* § 975. For similar eruptive diseases named in these texts, see p. 93.

בני טילא: epithet of the goblins; Rabb. טולא, Syr. *ṭellâ,* "shadow." Cf. the טלני, Targ. *Cant.* 3: 8, etc.

The lacuna at end of the line is supplied by help of 14: 6.

10. For the dominance of sibilants in these magical words cf. p. 60. At the begining and end of the series are characters enclosed in square lines.

11. בי: for בין, as also in the Talmud. There follows a lapse into Hebrew—probably a citation.

שחקים: one of the seven heavens of Kabbalism.

12. תושבחיה: for תושבחתיה?

עובריה: it is strange to find this word of magical connotation used of true worship in a Jewish text.

Bound and sealed are the house and the life of this Išpîzâ bar Arhâ, and Yandundišnaṭ bar (2) Ispandarmêd, and ... bath Simkôi, from the Sun and Heat, from the Devil, the Satan, the male Demon (3) the female Lilith, evil Spirits, the impious Amulet-spirit, the lilith-Spirit male or female; the Eye of man (or) (4) woman; the Eye of contumely; the Eye which looks right into the heart; the mystery which belongs to the evil Potency, that impious lord; from the evil hateful Potency; from disturbing Vision; from evil Spirits; from that impious Lord, in the name of .....

Commentary

A charm for two men and a woman from certain specified diseases and demons. The inscription is illiterate and the script particularly difficult, the writer using a very individual chirography; n. b. the מ, the non-distinction of ד and ר, the א which often consists of but two upright strokes, and the use of one form for internal and finial נ except in the word מן, where a finial is used.

1. אסר: for אסיר.

אישפיזא: cf. the Syriac אשפז (Ašpâz) for the Hebrew אשפנז in Dan. 1: 3. (אספנז occurs in Myhrman, l. 1, to which I cite the Babylonian

Ašpazanda.). The Persian אשפוא is "house," and אישפיזכיא "steward." May it be an abbreviated form of the latter word?[1]

ארחא: cf. the biblical Araḥ, a post-exilic name.

ינדונדישנט: so the most likely reading of the name.

2. סימכוי: the characters are uncertain. Cf. Σειμεικος in a Greek inscription from the Don, = Persian simikos, "silver"; Justi, p. 294.

שאמיש וכיטא: the first word is the Mandaic spelling for "the Sun," which also in the Mandaic religion is regarded as an evil genius. כיטא = קיטא, see Nöldeke, *Mand. Gram.*, § 42. Cf. Ps. 121: 6, 91: 6, and see Grünbaum's discussion of the קטב מרירי, the demon of the midday sun, *ZDMG*, xxxi, 251 f.

דכירא: an error for דיכרא (cf. l. 3), or intended for assonance with נקיבתא. Cf. the unabashed spellings in Samaritan literature to produce rhymes. Or is there a play on the roots, דכר and נקב being used in the sense of "name"?—i. e. the named spirits.

3. רוח לילית: cf. N. T. *πνεῦμα δαίμονος*.

עינאנא: the last two letters are dittography. There follows a list of various kinds of "evil eye," for which see p. 86.

4. עינא חאסדניתא: so the most likely reading; cf. Lidz. 4, end, עינא חוסראנא (?).

"The eye that sees (or of those that see) within the heart" is a reference to the uncanny effect of the evil eye.

In what follows some corrections are necessary. דאו = דהו ?; for חיל בישין read ח׳ ביש as farther on, and correct זנותא to זאדנותא with l. 5. There is evidently a repetition of phrases. The חיל ביש (like the עין בישא) is the personification of the power operating these psychological wonders. Cf. the Rabbinic כחות (Joel, *Der Aberglaube*, i, 80), the New Testament *δυνάμεις*.

חזינא טרודא = חלמי שנושי, 24: 4.

At the end of l. 5 comes a long series of characters which do not appear to form words.

[1] According to Karmsedin's Lexicon, quoted by Payne-Smith under the latter word; *in lingua Nabathaea est oeconomius et viatorum exceptor*, etc. Observe the accompanying name ארחא.

Translation

This bowl is designated for the sealing (2) of the house of this Dâdbeh bar Asmandûcht, (3) that from him and his house may remove the Tormentor (4) and the Curse and the very evil Dreams. Charmed; fortified and confirmed, (5) corroborated, strengthened and sealed and guarded are these bowls for the sealing (6) of the house of this Dâhbeh b. A., that they may not lodge together (with them). In the name of Yâhihû (7) NHRBTMW, S, MR'S, MRMR, 'oth Šašbiboth, Astar, Mûtâ. YŠHN'H, Ah, Ah, Ah, Ahah, (8) AAAAAAA, Amen, Amen, Selah, Hallulia.

Sealed and guarded shall be the house (9) and wife and sons of this Dâdbeh b. A., that there may remove from him and his house the Tormentor and the Curse and evil Dreams. Amen.

Commentary

For a general discussion of the epigraphy and language of this and the following Syriac bowls (Nos. 31-37), see Introduction, § 6. The crosses in l. 8 are the same as those which occur in the center "seals" of these Syriac bowls.

1. מזמן וגי: cf. 8: 1, and see to 3: 1.

2. Dâdbeh son of Asmanducht appears also in Nos. 12 and 16. Here the latter name appears in full Persian form, *-dûcht*.

3. תיזה = תיזח: see to 4: 6.

4. מזרזין: see to 4: 6.

5. מהילין: for מח׳.-באסא הלין with reference to the four duplicate bowls.

6. יאהיאו: a play on the Tetragrammaton, with the three primary vowels; cf. the magical use of the seven vowels in Greek; there αηω is also found, Paris Pap., l. 3019 ff.

No. 32 (CBS 16086)

Translation

This bowl is designated for the sealing of the house and the wife (2) and the children of Dinôi bar Ispandarmêd, that there remove from him the Tormentor (3) and evil Dreams.

The bowl I deposit and sink down, a work which has been made (4) like that which Rab Jesus bar Perahia sat and wrote against them,—a ban-writ against all the Demons and Devils (5) and Satans and Liliths and *Laṭbê* which are in the house of Dinôi b. I. Again: he wrote against them a ban-writ which is for all time, (6) by the virtue of 'TMDG, Atâtôt Atôt, within T(?), Atôt Atôt the name, a writing within a writing. Through which (words) were subjected (7) heaven and earth and the mountains; and through which the heights were commanded; and through which were fettered Arts, Demons and Devils and Satans and Liliths and *Laṭbê;* (8) and through which he passed over from this world and climbed above you

to the height (of heaven) and learned all counter-charms, a ruin to destruction, and ... to bring you forth (9) from the house of Dînôi b. I., and from all that is in his house, I have dismissed you by the ban-writ. And charmed and sealed and countersealed is it, even as ancient runes fail not, (10) and (like) ancient men who are not ... Again: charmed and sealed and countersealed is this ban-writ by the virtue of YHYHYHYHYH, YHYH, YHYH, A'. Amen, Amen, Selah.

(11) Sealed and protected are the house and dwelling of Dînôi b. I. from the Tormentor and evil Dreams and the Curse. And sealed and protected be [his wife and son] (12) from the Tormentor and evil Dreams and Curse and Vows and ..... Hallela, Amen.

Commentary

Nos. 32 and 33 certain practically identical inscriptions, except that they are made out in the name of different clients, and that No. 32 has additional matter at the beginning and the end. This identity is fortunate for the interpretation of the two bowls, for the lacunae in each one can be almost wholly supplied from the other. Also No. 35 is made out for the wife of the client of the present charm. The chirography of all three bowls is the same, being more cursive than the script of No. 31.

The charms effected in this and the following bowl are attributed to a certain master magician, Jesus bar Perahia, evidently the Joshua ben Perahia, who appears in the same capacity in Nos. 8, 9, and 17. Now Joshua ben Perahia is one of the several *Zugoth* or Pairs, who handed down the tradition of the Law from the Great Synagogue; and he flourished in the reign of Alexander Jannaeus, in the early part of the first century B. C. The Mishnaic reference to him is found in *Pirke Aboth* 1: 7, where the following *dictum* is attributed to him: "Make unto thyself a master, and possess thyself of an associate, and judge every man on the scale of merit."

Further, an interesting Talmudic tradition concerning the same Joshua appears in uncensored editions, according to which he fled into Egypt to escape the cruel persecution instituted by Alexander against the Pharisees, culminating in the crucifixion of eight hundred of that faction, *circa* 88

B. C.[1] The tradition is of added interest because it connects Joshua with a certain ישו whose identity with Jesus of Nazareth is generally recognized.[2]

The passage in *Sanh.* 107b reads as follows: The rabbis taught: The left hand should always push away, and the right hand receive favorably. Not like Elisha, who drove away Gehazi with both hands, nor like Joshua b. P. who drove off Jesus (in the Munich MS., and in *Soṭa* ישו חנוצרי, i. e. Jesus the Nazarene)..... How was that? When king Jannaeus killed the rabbis, R. Joshua b. P. and Jesus went to Alexandria of Egypt. When peace was established, Simeon b. Šeṭaḥ sent a message to him: From Jerusalem the Holy City to thee Alexandria of Egypt, my sister: My husband is lodged in thee, and I sit desolate.—He (Joshua) arose, and came, and lodged at a certain inn, where they paid him great respect. He said: How fair is this inn (*aksania*). He (Jesus) said to him, Rabbi, her eyes (as though by *aksania* the landlady was meant!) are too bleary. He replied to him: Thou knave, thou busiest thyself with such stuff! He brought forth four hundred horns and excommunicated him. He (Jesus) came in his presence many a time, and said, Receive me; he took no notice of him. One day he was reading the Shema, Jesus again presented himself, thinking he would receive him. He made a sign to him with his hand, he thought that he had utterly rejected him. He went off and erected a tile and worshipped it. Joshua said to him, Repent. He replied, I have been taught by thee that every sinner and seducer of the people can find no opportunity for repentance. And so it was said: Jesus bewitched and seduced and drove off Israel.

It is of interest that the Jesus of our texts is given a title which became the epithet of the Nazarene Jesus with whom Talmudic tradition connected him: ישוע אסיא, 34: 2, = Ἰησοῦς σωτήρ. Is there in this magical reference to Jesus b. Perahia a confusion with Jesus Christ?

We find then in these magical bowls an independent tradition concerning an early hero of the Law, who appears as endowed with magic powers, and who furthermore was able to make the ascent of the soul to heaven. He was accordingly one of the earliest to attain that spiritual

[1] See Schürer, *GJV*[4], i, 288.

[2] The anecdote is found in *Sanhedrin* 107b = *Soṭa* 47a; cf. Jerusalem Talmud *Ḥagiga*, ii, 2, *Sanh.* vi, 8. Dalman, in Laible's *Jesus Christus im Talmud*[2], Appendix, p. 8 ff., gives the texts of the first three passages, with critical apparatus, and Strack, *Jesus, die Häretiker u. d. Christen*, 1910, § 8, gives the texts from *Ḥagiga*, and the Bab. *Sanhedrin*. Through the kindness of Dr. Julius H. Greenstone, I have also had access to his rare copy of the Constantinople edition, 1585, of *Sanhedrin*. Dalman quotes the Venetian editions of the two Talmuds, and the *Jewish Encyclopaedia, s. v.* "Joshua b. P." cites the Amsterdam and Berlin edition of 1865 for the passage in *Soṭa*. On the criticism of the legend concerning Jesus, see Laible, p. 40 ff., and Strack, *ad loc.* The Jerusalem Talmud names Juda b. Tabai in place of Joshua (they were contemporaries) and omits mention of Jesus. Cf. Blau, p. 34, for some points of interpretation. The introduction of Jesus is a sheer anachronism.

privilege, which was the claim of apocalyptists from the author of *Enoch* down. See in general Bousset, "Die Himmelreise d. Seele," in *Archiv f. Rel-wissenschaft,* iv (1901), 136 f., 229 f. Such a claim is made for Akiba, who alone of four friends succeeded in penetrating Paradise, *Ḥagiga* 14b (see Bousset, p. 145), and this mystical claim was asserted by the Kabbalists for Moses and especially for R. Ishmael; see full references in Bousset, p. 151 ff., cf. Graetz, *Gesch.* v, 231 and Joel, *Aberglaube,* ii, 35. The Talmudic tradition has unfortunately not preserved for us enough of the mystical side of the early teachers; Akiba could not have been alone in his mysticism. Joshua was possibly one of the good company of apocalyptists and our magic tradition may preserve a true reminiscence of his personality and claims.

2. בנה: plural with masc. sing. suffix, as in the texts above and in Mandaic.

דינוי: s. Nöldeke, *Persische Studien,* 403.

3. פורא רמינא וג': see to 9: 1. I may now add the Syriac פוחרא, "earthenware figures" (of the gods), occurring in Overbeck, *Ephraemi Syri ... opera,* 13, l. 24. Compare also the Assyrian *pûru,* "bowl," see Zimmern, *Beiträge,* 147, note k, and *KAT*[3], 518: but my etymology contravenes that of Zimmern.

עבורא: so also in No. 33; elsewhere עברא, עובדא, מעבדא.

הוהוא: a duplicated form of the pronoun, found in the Syriac.

4. כי: a preposition appearing in the Rabbinic dialect, not in Syriac.

יישוע: the spelling represents the older pronunciation, the Biblical יֵשׁוּעַ, Ἰησοῦς, the Jacobite Yêšû, over against the Nestorian Išû.

דסתבירא: Prof. Roland G. Kent, to whom I referred this word, has published an elaborate study of it in *JAOS,* 1911, 359. He comes to the conclusion that it means "a handwritten deterrent," from *dast,* "hand" + *bhîra* (Sansk.), "terrifying." The word occurs only here and in No. 33.

5. לטבא: see to 9: 7.

6. The same magical reference appears in No. 32. For the practice see the more perfect form in 9: 6.

הנהון : a unique spelling (occurring also in the parallel, No. 33, along with הנון), for the Syriac *hennôn.* It is an elder form and is to be compared with the Rabbinic אינהו, see Levias, *Grammar,* § 95.

7. איתמר: corresponding to both Syriac and Rabbinic forms.

איתמסר: from a denominative verb, arising from the root אסר. Payne-Smith, col. 2181, gives a citation for מסר, = *vinxit catenis vel compedibus,* with which may be compared ממסרנותא, *actus ligationis, ib.* col. 324. Also cf. מצר, Glossary C.

8. חבילא: also found in 37: 11 and in Lidzbarski, *Mand. Amulet,* l. 33 (de Vogüé volume).

לאפקכן: for the infinitive, cf. 9: 8.

איכין = Syriac *aikannâ;* the good Syriac איך appears in the parallel 34: 4. What follows is not perfectly clear. By the "ancient songs" (שירא rare in Syriac), are meant charms (i. e. *carmina*), such as the master Jesus b. P. once used. But the following clause remains obscure because of the unintelligible דעוטר.

10. אנשא: cf. the Rabbinic אינשי, which Nöldeke (*Mand. Gram.,* 182) understands as *ênâšê,* not *inšê.* The Syriac rarely uses the plural in the sense of "men."

No. 33 (CBS 16019)

פורא רמינא ושקינא (2) עבודא דעביד הוהוא כי הוא (3) דיתיב רב יישוע בר פרחיא וכתב (4) עליהון דסתבירא על כלהון שידא ודיוא וסטנא (5) וללִיתא ולטבא דאית בביתה דדאדבה בר אסמנדוכת (6) תוב כתב עליהון דסתבירא דלעלם בשום אתמדג אתאתות (7) אתו[ת מן נו ת] אתות אתות שמא [ני]ליונא מן גו גיליונא דבהנהון איתכביש (8) שמ[יא וארע]א וטוראּ ובהנון איתמר רמאתא ובהנון איתמסר חרשא שידא (9) ודי[וא וסט]נא וללִיתא ולטבא וב[הנון ע]בר מן עלמא וסליק עליכון למרומא ואיתאל[ה כל] (10) קיבלא חבילא לחבלותא [ואסִ.א] לאפקכון מן ביתה דדאדבה בר אסמנדוכת (11) ומן כול דאיתלה שביקיתון בדסתב[ירא ואסיר ו]חתים ומחתם איכין דשירא קרמיא לא כדיבו (12) ואנשא קדמיא דעוטר לא הוו תוב אסיר חתים ומחתם הנא דסתבירא בשום יהיהיה יהיה יהיה עא (13) אמין אמין סל[ה] ניתחתים וניתנטר ביתה דה[נא דאדבה בר אס]מנדוכת ואנתתה בנה ובנתה וקנינה מן מבכלתא ולוטתא אמין

This inscription is practically contained in No. 32, with a change in the name of the client, who is the same as the one in the Syriac No. 31 and Nos. 12, 16.

Translation

This bowl is designated for the sealing of the house of Mihr-hormizd bar Mâmî (2) by power of the virtue of Jesus the healer, by the virtue of my mighty relative. Charmed is the dwelling, and the abode (3) and the house and the wife and the sons and the daughters of Mihr-hormizd, who is surnamed b. M.; charmed and sealed (4) even as Moses commanded the Red Sea and they (the waters) stood up like a wall on both sides. Charmed and sealed, charmed and sealed, (5) by this word which God

laid upon the earth and the trees which... their tops; charmed and sealed with the seal of the mountains and heights; (6) charmed and sealed (with the spell which is) in the heavens and the earth, the sun and the moon, the stars and (zodiacal) signs, and by the word they are charmed and remain in ward. In the name of (7) Michael the healer and Rofiel the reliever, and Gabriel the servant of the Lord.

Charmed and sealed is all evil that is in the body of Mihr-hormizd b. M. (8) and in his house (and) his wife and his sons and his daughters and his cattle and his property and in all his dwelling, by the signet of Ariôn son of Zand and by the seal of King Solomon son of David, (9) by which were sealed the Oppressors and the *Laṭbê*. And we have sealed with the seal of El Šaddai and Abraxas the mighty lord, and the great seal with which were sealed heaven and earth and all Demons (10) and foul Knots and *Laṭbê*, which contend against him. And a seal is this against Harm and Constraint (?), that they shall not at all enter in. And every *Damḳar* and *Šaiṭ* and *Šarâ* are charmed by the spell of (11) fire and the enchainment of water until the dissolution of heaven and earth. Amen, Amen, Selah. Sealed and guarded be the house and wife and sons and property and body of Mihr-hormizd (12) b. M., and depart from him the Injurer and evil Dreams and the Curse and the Vow and Arts and the Tormentor and Damages and Losses and Failures and Poverty.

And sealed and protected be Bahrôi bath Bath-Sâhdê from the Tormentor and evil Dreams and the Curse and the Vow and Arts and Practices. And charmed be the Tormentor and Lilith and Ban-spirit, who thwarts her in her hand and foot, and may it not approach nor afflict this Bahrôi b. B.

Commentary

The text is of the same order as those immediately preceding. At the end the charm is operated for a woman (with a Christian name), presumably the wife of the chief client of the text.

1. חתומין: the reading is certain, and the word is parallel to חתמתא in the previous inscriptions, but the formation is unique, if it be not an error; חתומי would be a Pael inf.

A Hormizd son of Mâmâ(i) appears in No. 15.

מיחר חורמיזד is the same as Mitr-ôharmazde, or Mihrhormuz, the name of the murderer of Chosroes II; see Justi, p. 216.

2. אסיא: here applied to the sorcerer, but otherwise of God, e. g. 3: 1, or angels, e. g. Michael, l. 7. See introduction to notes on No. 32.

אחני (evidently so written) I take to be for אחיני, "my cousin." The magical tradition was handed down in the sorcerer's family, cf. 8: 11.

משכנותא = משכנא, but of peculiar formation.

4. מושא: a point over א, also in the same name in 35: 6—diacritical for *ê?*

The charm is the effective one used by Moses at the Red Sea, cf. *Ex.* 14: 22. See p. 64 for the magical use of such episodes. But the plural קמו is a reminiscence of *Josh.* 3: 16, and indicates conflation of the two narratives. מן תרויהון ניסין appears to be a confusion for מן תרוי ניסיהון. תרוי is Palmyrene and Rabbinic, not Edessene, but is found in neo-Syriac, Nöldeke, *Mand. Gram.*, § 153.

5. אשכבה: of laying a spell; the same verb for laying a ghost, 16: 11. The Afel is a hebraism. Compare *Is.* 9: 7: "a word Yahwe has sent in Jacob, and it has fallen in Israel"; i. e. the magical word itself is potent.

אילנא וגי: the reference of the noun is obscure as is also the meaning of the following verb. There may be a reference to some myth concerning ancient "big" trees; cf. Isaia's denunciation of "everything high and lifted up," 2: 5 ff., and especially his woe upon the cedars of Lebanon and the אלוני הבשן, v. 13. Then v. 14 is parallel to the טורא ורמאתא of l. 5. The following relative clause is almost unintelligible. The root רדע is found only in Arabic, = "withhold, refuse." The next word I identify with the Biblical אמיר, *Is.* 17: 6 (possibly, with some critics, also in *Gen.* 49: 21). The old tree-myth may have told how the trees flaunted their high tops against the gods. The obscurity of the passage may be due to corruption of the form of the legend. The ׳ of אמריהון appears to be used as one of the *Seyâmê* points.

6. אסירין: n. b. position of the points.

בפוקדנא: a reference to the myth of the restraint of the celestial powers; see the discussion on 4: 5, and cf. *Is.* 24: 21.

7. מדוליה: a unique epithet for Raphael. It is a *pau'el* formation from דלא, and, agreeably to the etymology of Raphael and parallel to the epithet applied to Gabriel, the participle is used in the sense "to relieve," *sc.* the sick. Cf. *Baba Bathra* 16 b, אידלי יומא אידלי קצירא; "when the day is high, the sick man is relieved." In the Syriac the Pael came to be used in the sense of "saving," see Payne-Smith, col. 903.

גבריאיל עבדה דא': Gabriel is especially the messenger of Deity; cf. *Luke* 1, and *Rev.* 19: 10, where the angel who calls himself *σύνδουλος* with the apocalyptist may be Gabriel.

8. בירה: Mandaic form. Several phylacteries for cattle are given in Pradel's collection of Graeco-Italian charms; e. g. p. 18 and references, pp. 125, 127. An exorcism against the "seven accursed brothers" (the Babylonian Seven) who attack and devour the blood of the cattle, is given in Gollancz's Syriac charms, p. 87. According to the Babylonian magic the Seven Spirits "smite both oxen and sheep" (Thompson, *Sem. Magic,* i, 33). The mediaeval belief in the 'hexing' of cattle still flourishes among the Pennsylvania Germans.

ארין בר זנד: this sorcerer's name appears also in No. 19: 13, 17, and the two passages help mutually to identify the words.

9. עשמא: a new species of demons, "the oppressors," ppl. of a common Syriac root.

10. עיקרא (or פ' ?): "Knots," i. e. of magical power. The word corresponds to the Arabic *'uḳdat.*

טמיא: י has usurped the radical א; cf. Nöldeke, *Syr. Gram.,* § 33 b.

מתעזין: Etpa. of עזא, probably metaplastic for עזז.

אבערון: for the prosthetic vowel see Nöldeke, *Syr. Gram.,* § 51, *Mand. Gram.,* § 24 (n. b. the equivalence of לאב' and על ק', as in Mandaic). The word may mean ugliness or some more specific malady. Cf. the charms in the Greek magical papyri for obtaining good looks.

The parallel קמתא must also mean some kind of malady, and may be identified with the Assyrian *kamtu,* "misery" (Muss-Arnolt, *Dict.* 366), which is to be connected with the Hebrew and Aramaic root קמם, "compress" (with dissimilation of the dental); probably some form of contortion.

מיעלא נעילן: the first word is evidently an absolute infinitive from עלל, *plus* â (= *me"ĕlâ* = *me'lâ*, cf. the noun *ma'lâ*). For this formation with final â, Nöldeke offers a Mandaic instance, *Mand. Gram.*, 250, last line, מיקמא. In the form נעילן (if י is to be read) doubling of the second radical appears; cf. the Mandaic form תירינן, cited by Nöldeke, *ibid.*, 249, *ad infra*.

וכל דמקר ושיט ושרא: all three words are obscure. The second may be the שיט of the Ḳrê to *Is.* 28: 15, =שוט, "scourge." The third may be the Rabbinic שרא, "prince, demon"; or the Hebrew *šêrah* (also Aramaic) "chain, necklace," cf. the magical ענקתא. But diseases are apparently intended (cf. אבערן above), and we may identify שיט with the Syriac *Šâiṭâ*, "eye-tumor" (Payne-Smith, col. 4094), and שרא with the Syriac שריא (*ib.*, 4316), "diarrhoea." דמקר may then be understood aas a formation from נקר, "pierce," of *taf'al* form,—*tanḳar* =*tamḳar* (cf. Delitzsch, *Ass. Gram.*, § 59), = *damḳar*. With the root meaning of perforation, cancer or the like may be referred to. The absolute forms are used, as proper names.

11. אסור נורא ובשישלן מיא: fire and water are potent over demons. שישלן is a collective form in *-ân*. Cf. the *catenis igneis* in Wünsch, *Ant. Fluchtafeln*, no. 7.

עדמא למשרא וגי: the demons are to be bound till the end of the present aeon; then will begin a new order, which will include the final destruction of their power; cf. *2 Pet.* 3: 12: *οὐρανοὶ πυρούμενοι λυθήσονται*; also *Enoch*.

12. זינא: "loss"; see Jastrow, p. 393. Payne-Smith, col. 1118. For the personification of all kinds of losses, see p. 94.

בהרוי: hypocoristicon of Bahram? See Nöldeke, *Pers. Stud.*, 387 ff., Justi, 361 ff.

בת סהדא: "Daughter-of-the-Martyrs," a Christian name, cf. Bar-S., in Asseman, *Bibl. Or.*, ii, 403 (Payne-Smith, col. 2536), a bishop of Nineve. Cf. the proper names, "Son-of-Carpenters," "Son-of-Ironsmiths," *ib.* 591, 596.

13. משמתתא וגי: epithets of the Lilith, who is also the Witch, who can "bind" the limbs of her victim; see No. 42 and p. 78. Superior points for the feminine suffix are used here as also in No. 35.

14. תיחטר: switchings by demons are a common theme of magic, see 1: 10; compare the Christian hagiological legends.

Translation

Appointed is this bowl for the sealing and guarding (2) of the house and sons and property and body of Mâidûcht (3) bath Kumbôi, that she may be guarded from Demons, Plagues and Devils and Satans (4) and Seducers and Diaboli, and from any Vows and Invocations and Rites of mankind; in the name of (5) *arši, ardi* and *mâri;* Michael and Nûriel and Šalṭiel and Mantariel and Ḥithmiel. (6) And they were commissioned along with Moses to wardship, and they will guard this Mâidûcht b. (7) K. from all hostile Devils and affrighting Demons, and from every Curse and Vow of mankind, of men (8) and of women, and of Idol-spirits who (are known) and who are not (known) by name. And in the name of ..., Ḥamariel and Šariel (9) ..... of Yah-Adon-Ḳamya; *nâyâ, ô, ô!* Commanded, commanded is it in the name of these angels and letters which will guard (10) and seal this Mâidûcht b. K. from everything evil, for the ages

forever, Amen. Sealed and guarded is Mâidûcht b. K. from (11) the Tormentor and evil Dreams and the Curse and the Vow; and charmed the Tormentor and Lilith and Ban-spirit who thwarts her in her hand and foot; and may it not approach Mâidûcht (12) b. K.

And guarded be the house and wife and son and property of Dînôi son of Ispandarmêd from the Tormentor and evil Dreams and the Curse and the Vow. Amen.

Commentary

Largely a replica of No. 34. It is made out for the wife of the client of No. 33, who is himself given a little space at the end.

1. נטרתא(ל) : noun of intensive formation; cf. the charm *εἰς φρούρησιν*, Reitzenstein, *Poim.* 292.

2. מאידוכת: for the the first element Mâi see Justi, p. 187. The name also appears in the unpublished No. 16093.

3. כומבוי : cf. *Κωφαιος*, *Κυβαι*, *Κομβαφις*, Justi, p. 165.

4. סוטיטא: (a plural-point is not visible) a peculiar formation, evidently to be connected with the theme סוט, סטא, "go astray"—hence "seducing spirits," corresponding to the words before and after. The form may be explained as a Pi'lel participle, with rejection of prefix. Cf. 2 *Ki*, 22: 19 ff., and the *πνεύμασιν πλάνοις καὶ διδασκαλίαις δαιμονίων* of 1 *Tim.* 4: 1.

דיאבולא: some of the characters are uncertain, but the word is sufficiently clear. It appears in Syriac only (in the singular in -ōs) in the Arabic lexicons; see Payne-Smith, col. 868.

קרותא: evidently the same as the common קריתא. Notice the distinction made here between diabolic arts and human machinations.

5. For the assonance, see p. 61. Letters and angels are practically the same; see p. 99. Of these angels, Nuriel is one of the archangels (also Uriel), Manṭariel and Ḥithmiel are unique, Šalṭiel is listed by Schwab as a form of Salṭiel. These were Moses' guardian angels, and so can be effective for the present client.

Translation

... designated is this bowl ... turned away ... (2) of that Murderess, daughter of Murderess. Go away, go away, and depart from before ... The lord (3) Šameš (the Sun) has charged me against thee, Sin (the Moon) has sent me, Bel has commanded me, Nannai has said to me, and ..... and Nirig (Nergal) (4) has given me power to go against the evil spirit, against Dôdîb, whom they call the Strangler, who kills the young (5) in the womb of their mothers, and they are called "Slayer," and their fathers "Destroyer." Go from the presence of these holy angels (6) that sons may come to birth to their mothers and little children to their fathers. Because he has given me a name by which I shall drive thee forth, Evil Spirit. Go from the presence of (7) [these angels] and depart from this engraved seal, and go to the bridal chamber and eat...; moreover drink a libation and [depart from ... daughter of ...]-izdûch and her .... (8) Amen, Amen, Selah.

Commentary

This inscription has a twofold interest. Its magic purpose is the insurance of a bride against the goblin which would destroy her powers of motherhood; the evil spirit is invited to go to the bridal chamber and there

partake of a certain food and drink, which it is to be presumed, would in some way incapacitate his powers; the text is badly obscured, but enough survives to recall the book of Tobit and the charm Raphael performed against the demon which haunted the chamber of Tobias's bride. Magic is full of this lilith witch who destroys love; for an early instance, cf. the *Maḳlu*-series, iii, 1 ff.: "The witch ..... who robs the love of the enamored man, ... of the enamored maid. Looking at her he feels her lascivious charm. She looks on the man and takes away his love; she looks on the maid and takes away her love." Cf. Nos. 13, 28.

The other feature of interest is that the charm is given as though from the old pagan deities, the lord Šameš, Sin, Bel, Nannai, and Nirig, the ancient Nergal. All these except Nannai survived as evil spirits,—the spirits of the seven planets—in the Mandaic religion (see Norberg, *Onom., s. vv.*), but the present charm confesses their benevolent power and is also without any Mandaic trace. (This more antique aspect of these deities appears in the early Mandaic amulet published by Lidzbarski, in the de Vogüé volume, where, l. 247 ff., "Samiš, Bel, Nirig and Kewan have strengthened him.") It is a relic of the religion which survived to a comparatively late date in Harran. The charm is given in the form of an oracle from these deities according to ancient magical use; see p. 100. For these Syrian deities see the list given by Jacob of Sarug, edited by Martin, *ZDMG*, xxix, 110-131, and in general for the material Chwolson, *d. Ssabier u. d. Ssabismus* (1856). For the use made by the Harranian pagans of "magic, conjurations, knots, figures, amulets," etc., see Chwolson's extract from the Fihrist, *ibid.*, ii, 21; for their use of oracles, p. 19.

1. אתחפיך: ח for ה, see § 6.

2. For the demon's artificial names, see p. 77.

2 f. מריא שמיש: in the Mandaic אדוני is the epithet of the Sun, e. g. *Ginza* r., p. 23, l. 15, ed. Peterman; for שמיש, cf. Mandaic שאמיש.

סינא: נ is more likely than ר, and we obtain a form of Sin in the Syriac. The Mandaic has both סין and סירא.

בי: a dialectic form of ביל (Mandaic). For analogies in neo-Punic names (בי, בעי, בע), see Lidzbarski, *Handbuch*, 289; *CIS, Inscr. phoen.*, no. 869; and in Syriac the deity Bêducht (Bel's or Beltis's, daughter), see

discussion in G. Hoffmann, *Auszüge aus syrischen Akten persischer Märtyrer* (Leipzig, 1880), 151 ff.

נגאי : the ancient Babylonian goddess Nanna (see Jastrow, *Religion Babyloniens u. Assyriens* i, 76 ff., 252, 266), daughter of Sin. See at length for the later character of this deity G. Hoffmann, *Auszüge,* 130 ff., 151 ff. (for later literature, Roscher's *Lexicon, s. v.* "Nana"). She combined both Venus- and Diana-like characteristics, and thus appears on coins with a crescent on her head (*ibid.,* 152). This lunar characteristic doubtless explains the gender of the deity in our text, where as the verb shows, he is masculine. In his history the moon god has vacillated between the two genders, and while in later religion the moon's character has generally been defined as female, nevertheless in the Harranian religion the moon was androgynous; see the excursus by Chwolson in his *Ssabier,* i, 399 ff. (Hence the Latin writers express this Mesopotamian deity by *Lunus.*) It may be noticed that in the reference to Antiochos Epiphanes' raid upon the temple of Ναναιας in *2 Mac.* 1: 13, 15, there is found in the Alexandrine Codex the masculine variant Ναναιον.

4. דודיב: the name is obscure, probably equivalent to מדובינא, 37: 10, *q. v.*

חנוקיתא: the normal feminine of this formation, as against קטולתא. The same evil spirit, אמא חנוקתא, "Strangling Mother" (of babes) appears twice in Gollancz's Syriac charms, pp. 81, 83 (in *Actes* of the 11th Congr. of Orientalists, sect. 4). And the like epithet is found in the Greek amulet published by Reitzenstein, *Poimandres,* 298, for Baskania, the Lilith-witch, who is charged with the same murderous functions: *ὁρκίζω σε, Στραγγαλία πολύμορφε, ἡ ἐπερχομένη ἐπὶ τὰ μικρὰ παιδία, ἥτις ἔχεις χεῖρα σιδηρᾶν καὶ σύρεις τὰ παιδία καὶ ἐλέπτεις αὐτὰ καὶ τελευτῶσιν.* And there follow immediately "the names of the holy angels," just as these are referred to in l. 5. See notes on No. 42. With Στραγγαλία cf. the demoniac maladies πνιγαλίων and παιδοπνίκτρια cited by Roscher, *Ephialtes,* 55, 59.

דרטקא = דרדקא 37: 10, דרקא 18: 6, with assimilation of the dental to ק.

ומתקריא וני: Mandaic form of the fem. pl. The best interpretation of the line is that the mischief wrought to the embryo was charged to the parents who so gained the ill-fame of infanticides. Cf. Ginza ii, 98 (ed. Norberg):

"hence have arisen the abortive ones who make abortions and destroy the foetus." The epithets are in the singular, being used distributively.

5. הלין מלאכא: i. e. the deities mentioned above; see above pp. 97, 99.

6. נחין: "come to the birth." Cf. Rabbinic חייתא, "midwife," and the Syriac Afel used of the function of midwives, e. g. Peshitto to *Ex.* 1: 16.

דשמא יהב: the antecedent is uncertain; probably the charm has been abbreviated.

7. נמיפא: for נליפא? Cf. 11: 8.

אזיל לבית חלולא: the ב׳ ח׳ is the common Syriac term for the marriage chamber, or the nuptials in general. The imperative is apparently addressed like the preceding imperative to the demon who is bidden to go, if she dare, to the wedding, and there partake of the magic foods prepared against her.

נקותא: the Syriac *nᵉkâyâ,* "libation."

אישתאי: the spelling represents the Syriac fem. impr.

יזדוך וג׳ ....: probably a Persian feminine name in *-duch,* the bride's name to be filled out here. The following word is obscure, the missing radical may be ס.

Translation

Designated is this bowl for the [salvation and] healing (2) of the house and threshold, the wife, [the sons and] daughters, the cattle, (3) [and all that] is his, and whatsoever shall belong to Zârôi son of ... (4) ... confirmed by the virtue of the word of God, the Mystery of heaven and the Mystery of the assembled waters and the Mystery of earth, (5) ... of this house I will enjoin all that is in it,—Arts and the Tormentor (?) (6) ... [and the Image-spirits] of idolatry, and all the Legions and the Amulet-spirits and the Ishtars and all the Demons ... (7) ... and all mighty Liliths. A word ... I declare unto you, which receiving ... the mysteries of Angels in wrath coming against him and with sabres and sword standing before him and ready to kill him. (9) ... against the word heard (?). He sits in the house, eating and devouring, drinking and quaffing, ... (10) [a slayer of ?] children is he, and Master named; ..... is he, and Jinn (?) named. Peace ... your father ... (11) ... Peace from the male Gods and from the female Ishtars. And victorious peace is set in ..., and destruction is set in the fire ...

Commentary

A badly mutilated bowl with much of the inscription illegible. It is of pagan origin; in the name of God the Mystery of heaven, water and earth, it concludes with a *pax vobiscum* from the gods. The expression "victorious peace," l. 11, recalls the standing Mandaic doxology, "Life is victorious," and the threefold division of the universe may be from the same source. The charm is against a murderous house spirit and is in part parallel to No. 36; here the demon is masculine and is represented as carousing upon the blood of his victims. The quarterings of the circle or seal in the center contain letters of the Tetragrammaton—apparently יה.

1. דרמנא: a Persian word noted by the native Syriac lexicographers, and neo-Syriac; also in Pognon B. See Nöldeke, *Syr. Gram.*, 127.

3. זרוי : cf. Zaroes, name of a Magian, and Zaroi, in Firdausi; the present spelling substantiates *Zar-* against other readings; see Justi, p. 383.

4. אלהא: name of the Light-King in the later Mandaic religion; see Brandt, *Mand. Rel.*, 47. For his following epithet as the Mystery of heaven and earth, cf. "the Great Mystery," who is the helper of Hibil-Ziwa in his descent to hell, *Ginza r.*, p. 140, ed. Petermann; see Brandt, *Mand. Schr.*, 143. For the מיא קבין cf. *Gen.* 1: 10. Other "gods" are named below.

7. פיתנאמא ונ': resumes אימר, l. 5.

8. ראזי מלאכא: either in appositional sense, ראזא used like איסרא, see p. p. 86, or ר' refers to the magical rites conjuring the angels who are called upon against the evil spirit.

עילוהי : the Rabbinic-Mandaic preposition of plur. form, *'elâwê*, but with suffix attached as to a singular form; cf. בנח, "his sons."

9. שמעא : for שמיעא: the incantation *heard?* The following ppls. represent the carousing of the demon over the flesh and blood of his victims. These realistic descriptions were in themselves regarded as prophylactic. מכיל appears to be denominative verb from a noun in מ', formed to rhyme with אכיל.

10. מדובינא = דודיב, a perversion, in 36: 4. The word corresponds to the actual Syriac מדיבנא *tabescere faciens,* Payne-Smith, col. 831.

נ.נא: probably גינא, jinn, see p. 80.

אבוכן : Mandaic "your father."

Translation

Charmed, armed and equipped are the house, (2) the dwelling and mansion and barn, and the sons and daughters, (3) and the cattle and household vessels of Hinduithâ (4) bath Dôdâi and (of) Mârâdâ, even her husband and her sons and daughters.

Charmed art thou, (5) Lilith Yannâi, and all thy Broods, even the three hundred and sixty (6) Broods, by the word and command of the angel Negoznâi, by the mysteries and ordinance (7) of the living God, in the name

of the virtue of strong and mighty Deity, and by the seal (8) of the angel Be'ôdâi, whose word none transgresses.

Charmed are all the Gods and Temple-spirits and Shrine-spirits and Idol-spirits (9) and Ishtars from the body of Mârabbâ and Zâdôyê and Dazaunôyê sons of Hinduîthâ, and from Hinduîthâ and from her house and her bed and from (10) their [wives] and their sons and their daughters and their cattle.

Charmed and confined and restrained and hobbled is the mighty Ištar ..... (11) and the three hundred and sixty Broods, which I have dismissed from her one after the other.

Charmed are all the Amulet-spirits that dwell in the houses of men and waste them; (12) charmed and hobbled and suppressed and covered and squeezed under the foot of Mârabba bar Hinduîthâ and under the foot of Zâdôyê and Dazaunôyê sons of Hinduîthâ, (13) and under the foot of Hinduîthâ b. D. And life, abundance, health and arming and sealing and protection be to their body, and their wives and their sons and their daughters and their cattle (14) and the people of their houses, both those entering and departing with Mârabba and Zâdôyê and Dazaunôyê sons of Hinduîthâ, and with Hinduîthâ b. D. their mother, and her daughters.

Exterior

(15) Holy (?) .....

Commentary

For the language and script of this and the following Mandaic bowls, see § 7.

A charm executed in behalf of a certain woman and her husband. The sons with their families are included by name. The charm is particularly addressed against a specified lilith, with whom "the mighty Ištar" who is named later, may be identical.

1. "House, dwelling," etc.: these four terms occur in Lidzb. 4 and 5. The היכל (which is found in the Mandaic literature in the original meaning) is here reduced from the sense of "temple, palace," as in Babylonian, to that of a private mansion. The word also appears in Hyvernat, l. 15. In 40: 4, בניאנא is the cattle-barn; in general perhaps "outbuilding."

2. בנה for the plur. w. suffix, see Nöldeke, *Mand. Gram.*, § 144.

3. חיוניאתא: "cattle"; it occurs in the sense of "wild beast," in 39: 6; singular חיותא.

אנאתא: the singular would be the equivalent of the Assyrian *ânu*, "vessel," = Heb. אני and Arabic *inâ*^{un}. The word is otherwise unknown in Aramaic, having been replaced by the derivative *mân*. In the Talmud vessels are favorite abodes of the demons. One is tempted to regard the word as a plural of אנא, "sheep," but for the following "of the house."

חינדויתא: i. e. "Indian woman"; cf. חנדו, חינדו, 24: 1; 40: 16.

4. דודאי=דודי, Nos. 15, 21.— מראדא = *mâr*, "lord" + *Adda;* a form of Hadad; or the first element may be the deity Mar, Bir, etc. (see Clay, *Amurru*, 95), so that the name is equivalent to the ancient Damascene name ברהדד (as in Pognon's Zakar inscription), the Biblical Benhadad. With inexact construction, M. is the husband. For ו . . . ו = "both, and," cf. l. 14.

6. ננחנאי : so the probable reading. Notice from the erasure that "lilith" and "angel" are interchangeable titles for this being. Cf. the Lilith בחנאי, 40: 17.

פאקתון: of same root as פקדתא, with assimilation of ד with ת; see Nöldeke, p. 44. The original formation is that of the Syriac noun *pâḳadtâ*.

8. בעודאי: a corruption of עבודיאל?—For עכוריא and פריכיא see p. 72 f. The second word is supplied from 40: 4.

9. מארבא: l. 14 מאראבא, in l. 12 with the second א caretted; an old theophorous name = אב + מר (or רבא + מר ?)

זאדויא : Persian Zâdôê, see Justi, p. 378, quoting a name of the fifth century.

דואונויא : Persian name of a Syrian monk of the seventh century, *ibid.* 82.

10. סדימא: original root סתם (see Nöldeke, § 45); the verb is found in the bowls of Pognon and Lidzbarski, and defines the word as used in the Mandaic literature, thus relieving Nöldeke's doubt. Cf. a like series of passive ppls. at end of Lidzb. 4.

מסאנמא: the reading is almost certain, but I cannot identify the root; probably an error for מסאדמא, as in 40: 21.

רנילא: a denominative from רגל, = Rabbinic רגול. cf. the Arabic *ragala*, "strike, tie (a sheep) on the foot." The word occurs in Lidzb. 4.

11. שביקלה: the passage is identical with 40: 22, except for the latter's reading, שביקילה, "which I have dismissed from him"; the present text is to be so interpreted. For the form see Nöldeke, § 170.

מחרבאלחן = 40: 23. For the fem. pl. in א, see *ibid.*, 162.

12. סיפא = סחיפא, cf. *ibid.* 63; the Pael in 7: 17.

מאתנא: I can suggest only the root עתן, found in the Rabbinic עתין, "olive-press"; but according to Nöldeke, § 45, ע is persistent in Mandaic.

ודוזאונויא: error by dittography for ודזי.

13. זאזיא: the Assyrian *zâzu*, abundance", Muss-Arnolt, *Ass. Hwb.* i, 277, and identical with the Targumic זאזא, "foliage," Targum Job 14: 9. An archangel Zaziel appears in a papyrus published by Wessely, xlii, 65, l. 42.

חתמאתא: for חתאמתא.

14. דואדויא: with change of construction from the preposition על; cf. Nöldeke, § 222.—For omission of relative after בנה see p. 39.

15. (Exterior) קד is sure, perhaps קדש.

Translation

Health and arming and sealing and protection (2) be for ... and the body and soul (3) and the unborn child and womb of Bardesâ whose mother is the daughter of Dâdê. (4) Charmed are the Sorcery-spirits in stocks of iron; charmed the Lilith (5) in chains of lead; charmed the empoisoning male Devils and charmed the empoisoning female Liliths; (6) charmed [the arts of?] evil men and hostile Beasts, (7) and evil Mysteries and the (magic) Circle of malignant Masters and Sages and Doctors, and the melting of Wax figures (8) of him who is alive: from the unborn child and womb of Bardesâ whose mother is Termê b. D.

Charmed the Lilith that appears to her (9) in ...; charmed the Lilith that appears to her in [shape?] of Tâtâ her sister's daughter; charmed all the defiling Ghosts (10) that have entered, which appear to her in Dreams of night and in Visions of day; charmed and sealed with the seal of (11) King Solomon.

Again: Health and arming and sealing be for the womb and the parturition of Bardesâ (12) whose mother is Termê b. D.

Commentary

A charm for a pregnant woman. I may compare the mortuary incantation published by me in *JAOS,* 1911, 272, no. 1, which includes prayers for the unborn child, עולה, of the petitioner. From l. 4 the present charm is very similar to that in Pognon A.

2. דאדיא: so in Pognon B, in Lidzb. 5, דאדע; a feminine form in -ê, cf. תירמיא, l. 8 (the mother's name, overlooked here). Cf. דאדה, 12: 2.

4. סחריא: also Pognon A. In the Mandaic appear the סאחרא, "sorcerers," Norberg, *Onom.,* 110. For the meaning cf. Ass. *sâḫiru;* in this sense the root is not otherwise found in Rabbinic and Syriac.

סאדיא פ׳: Pognon's text, סאדדיא (to be cited to Nöldeke, § 89, 1a),

5. אבארא: the Syriac אברא was used for "lead" and "tin," according to the Syriac lexicographers, who postulate a distinction between *abârâ* and *abrâ,* or *abârâ* and *ebârâ* but dispute which word is applied to which metal (Payne-Smith, col. 19). Both lead and tin were used in magic, the former especially in the *κατάδεσμοι*, like the love-charm from Hadrumetum, the Cypriote *defixiones* (*SPBA,* xiii, 160, etc.), and cf. Index to Wessely, xlii, *μόλιβον, et seq.;* tin was equally used, like all the metals, *ibid., κασσιτερινόν,* and a case in the Testament of Solomon where tin is atropaic, *JQR,* ix, 584. Hence we cannot positively decide whether our *abâr* is lead or tin; but the weight of the former metal may better suit the symbolism of the language. —As to the meaning of the Assyrian *abar* Assyriologists are at variance. Lenormant, in *TSBA,* vi, 337 f., 346, argues correctly from the alloy mentioned in iv R no. 2, rev. 17, that *abar* = lead and *anaku* = tin. However Sayce, *Archaeology of the Cuneiform Inscriptions,* p. 60, denies that the Sumerian or Assyrian word for tin is known. Lyon, in his *Keilschrifttexte Sargons,* 53, 82, makes *anaku* = lead (cft. Heb. אנך) and leaves *abar* untranslated. Hilprecht and Haupt, on basis of chemical analysis, find that *abar* is used of magnesite, Hilprecht, *Assyriaca,* 80 ff., 83. עפרת, the Hebrew equivalent of the Aramaic אברא, is "lead." The Syriac *'ânᵉka* is "tin," whereas its Hebrew equivalent אנך, "plummet" rather suggests the heavier metal lead. The Hebrew for "tin" is בדיל, which however in Zech. 4: 10 may rather be "lead." This confusion between lead and tin in the same word is paralleled by the ambiguous use of *plumbum* in Latin;

p. nigrum is lead, and *p. candidum* tin; see Pliny *H. N.*, xxxiv, 47 (ed. Weise, 1841); so also in Arabic. The different vocalizations *'abrâ* and, עפרת *vs. 'abârâ*, and Heb. *'anâk vs.* Syr. *'ânᵉka*, appear to be attempts at differentiation. עפרת, apparently "lead," appears in W. T. Ellis's bowl-text, which I have edited in *JAOS*, 1912, 434.

5. חוראשיא: amendment after Pognon's parallel, but with the form found in l. 6.

לילא לי: an inadvertent repetition.

6. חוראשאתא for the adjectival formation, see Nöldeke, *Mand. Gram.*, § 105.

חיואניא: possibly absolute pl. (*-â* from *-ân*); or a masc. plural form, cf. חומריא, 38: 11.

7. חזאר: (n. b. construct) for חדאר, as in זיבריא, see Nöldeke, *ibid.*, § 46. I interpret the word of the magic circle, part of the dreaded arts of the necromancer; see p. 88.

רבאניא וני: sorcerers are by tradition "Doctors."

משריא דקיריא: מי may be inf. Peal of שרא, or better, in agreement with the context, Pael ppl. plur; i. e. "dissolution," or "dissolvers." קי is "wax" in Rabbinic, "pitch" in Syriac and Mandaic, at least according to the references in Payne-Smith and Norberg. "Pitch" might be the translation here, but comparing the plural with the Greek κηροί and the Latin *cerai*, I have related the word to the well-known use of wax in Hellenistic magic. Any plastic substance might be used for these simulacra of the enemy in Babylonian sorcery. Tallquist enumerates clay, pitch, honey, tallow, dough (*Maḳlu*, 19, and see his note to ZAL. LU, p. 119); so also Fossey, *Magie ass.*, 80. Wax does not seem to be identified among those substances, though Jastrow and Thompson speak of wax as used. Assyrian *kîru* or *ḳîru* (see Muss-Arnolt, p. 432) = pitch. Is the Latin-Greek word from the same origin, the term having undergone extensive modification in meaning? Its etymology is uncertain, see A. Walde, *Lateinisches etymologisches Wörterbuch*², 1910, *s. v. cera.* For the use of wax in western magic, see the ample notes and bibliography in Abt, *Die Apologie d. Apuleius*, 82.

חו דחיא: cf. the isolated instance given by Nöldeke, p. 344.

8. תירמיא: the first letter is conjectured from a mere remnant; possibly *Θερμία*?

9. In this line a definite family ghost appears. דמותא is used in like sense in earlier bowls, e. g. 7: 14. The word before תאתא is unintelligible.

תאתא: cf. the feminine name Tatâ in Strassmeier, *Inschriften von Darius,* no. 25, 12; also Tatta-dannu, Strassmeier, *Inschriften von Nabonidus,* no. 343, 8, and Tâtû, etc. in Johns, *Assyrian Deeds,* 450, Clay, *BE,* x, Glossary; טאטי 25: 1.

10. סאינאתא: I connect this, as a participle, with the root סין, Arabic *šâna,* which does not appear as a verb in Syriac; from it comes the Syriac *s^{e}yânâ,* "dirt," and with the same is to be connected the Hebrew סאון, "shoe." The same word, masc. and fem., occurs in Pognon A, p. 40, which he would derive from סנא "hate," but without explanation of the form. It might, if a singular instance, be an error for סאניאתא. However n. b. that in Sachau's Elephantine papyri occurs the metathesis סאן for סנא, Pap. 57: 2, 58: 16.

על: 3d fem. pl. of עלל.

יאמיא: a mistake, corrected by the next word. The same note is to be made upon למל in l. 11.

11. תום: doubtless = תוב, "again," so often found on our bowls. Thus Nöldeke's explanation of תום in the Mandaic literature (*Mand. Gram.,* 204) is confirmed.— מודאלה for the form, see *ibid.,* § 67.

Translation

In the name of Life!—that health (2) and armament be to the body and wife and male sons (3) and female daughters, and the house and

abode, the mansion (4) and the barn of the cattle, the ass, bull and goat, the property of (5) Xârô bar Mehanôš, from Life.

I swear and adjure you (6) by Life.

. . . . . .

(12) and I have broken you in the gate of Xaro b. M., the man and his wife. [Health and protection, etc., from] the Liliths, when they appear in the house of Xaro (13) b. M., from Life. And health and armament and healing and guarding [be to] the male sons and female daughters and the house (14) and dwelling and mansion and the barn of the ass, bull and goat, the live (?) property of [Xaro b. M.], from Life. And health and armament (15) be to the body and the male sons and female daughters and the house and dwelling and mansion of (16) Merâthê daughter of Hindû, from Life. And health be to the body of Xârô . . . and the wife and male sons [and female daughters and the house and dwelling] and mansion and building and cattle (17) of Xaro b. M., from Life.

Charmed art thou, Lilith Buznâi, and all the goddesses . . . and the three hundred and sixty Tribes, (18) by the word of the granddaughter of the angel Buznâi, by the adjuration (?) of Life, and by the command of . . . who is (?) with the mighty Buznâi, (19) by the seal of the angel Darwâ (?), whose word none transgresses. Charmed are a[ll the gods . . . and] temple-spirits and shrine-spirits (20) and goddesses from the body and the wife and sons and daughters and the house and dwelling and mansion and barn of Xaro b. (21) M. Charmed, shut up and confined and hobbled is the Ish[tar] . . ., and the three hundred and sixty Tribes, (22) which I have dismissed from him . . . one after [the other. Charmed] are all Amulet-spirits which lodge in their houses (23) and devastate them. Charmed [and hobbled] and suppressed and covered is the Satan (?) and the Plague . . . [from] the body (24) of the man and his wife . . . and the male sons and the female daughters, (25) the house and dwelling and mansion and the barn for cattle, of Xaro b. M., from Life. (26) And Life is victorious!

Commentary

A long and repetitious charm for a certain man and his family and property, including the several kinds of live-stock. About half of the inscription is found on the exterior.

1. With the same invocation begin the sections of the Ginza, also some of Pognon's bowls.

ואסותא: for ו of purpose, see the like phrase in Pognon, e. g. no. 14, and Nöldeke, *Mand. Gram.*, § 293.

4. בינאנא: as the regimen shows, the barn.

חמרא: i. e. *ḥemrâ*, also cited by Syriac lexicographers, see Payne-Smith, *ad loc.*, and used as a collective plural, Nöldeke, *Syr. Gram.*, 91. The following word was written תותא, ר was then caretted above, and finally the word rewritten.

ענזא : to be added to Nöldeke's instances, *Mand. Gram.*, § 68, and now found in Sachau's recently published papyri from Elephantine. ענז is found in names of certain goat-species, Payne-Smith, col. 2934.

חזרא: for חצי, cf. Nöldeke, *ibid.*, § 47. The word is used like the Talmudic חָצֵר, "private property," see Jastrow, *Dict.*, *s. v.* In l. 14 it is supplemented apparently by חייא, = "livestock."

5. כסארו: evidently an old Persian name in *Koseform;* cf. Aχseri, Xšayarša, Artaχsathra, Justi, pp. 12, 173, 34. The א in דאב׳, here and again below, represents the vowel of the prefix, before the vowelless first radical.

מהאנוש = Meh = Mithra, *plus* Anôš, a Persian genius, Justi, pp. 208, 17.

מן חייא: the long period which this phrase concludes is paralleled below.

אלאיכון: this ancient and full form of the preposition appears in Pognon B, but not in Nöldeke, under § 159.

6. אלא חייא: cf. l. 18, בראלאין אלא חייא. א׳ = the preposition just noted, and is used uniquely with a verb of swearing, where in the Semitic ב is found. Cf. the Greek *ἐπί*, representing, as in the English "swear on the Bible," the primitive action of laying the hand on the sacred object.

16. מראתי ?—17. בוכנאי: cf. נגוכנאי, 38: 6.

18. This antagonism of Buznâi's granddaughter to herself is evidently a case of casting out devils by Beelzebub. The sorcerer affects that he has received from one of her brood the proper charms by which to bind her. Observe interchange of מלאכא with לילית.

בדאלאין וכ׳ : "by that which is upon," i. e. "by the adjuration of" Life. For the redoubled preposition, see Nöldeke, § 231 b. For the phrase, see to l. 6.

פקדתאין: for the sing. with אין—, see *ibid.*, § 146.

23. סטאנא: but a feminine is demanded.

מחותא: in agreement with the Syriac; cf. מחתא, 16: 6; in the Ginza, מחיתא.

26. חייא ואביאן: the same doxological formula in Pognon, B, no. 22, and Lidzb. 5.

APPENDIX

No. 41 (CBS 179)

This text is unique,[1] being inscribed on the top of a human skull. Enough is legible to indicate that it is a magical inscription, doubtless of the same order as those on the bowls. The skull is remarkably well preserved, and though badly shattered, almost all the pieces have been recovered. But the text is sadly worn and obscured through the shaling of the surface, and only a few detached words are legible. There are two inscriptions. one running across the length of the left-hand side of the top, from front to back and also filling up some space in the forward part of the right-hand side. The other, shorter, inscription is at the back of the right-hand side, at right angles to the central suture.

In the first line of the longer text are visible the words, רוחין, ללתא; in the second אנת רוח, indicating an address to the evil spirit. The following names are visible: פרוך, cf. 5: 1; (?) מרדכי בן שאל, also spelt מו׳, "Mordecai ben Saul"; and a woman's name (evidently the wife of the first-named man— בעלה can be read in one place), נסבי, so the almost certain reading. I take the name to be a feminine hypocoristic in *-âi* to be connected with Gathaspar, in the *Excerpta barbara* to Eusebius (ed. Schoene, i, app. 228), one of the three Wise Men, the later Gaspar (Caspar, Jaspar), connected by philologists with the Old-Persian Windafarna; Justi, p. 368.

The use of a skull for recording a magical inscription opens up an interesting line of magical practice. The skull has become part of the stock apparatus of the necromancer, and its use in that connection is typical of his power over the dead, while the presence of the gruesome object adds to the awe in which he is held. But all through magic runs the morbid theme of the use of mortuary remains. In the Greek love charms, the texts are buried in the graveyard; in the magic brews for compelling love,

[1] This statement must now be qualified, as I learn through Professor Ranke that two similar skulls are in the Berlin Museum.

human bones are used, and in a late Arabic charm a broom from a cemetery has efficacy in bringing the beloved to the lover's side (see to No. 28). Cf. the burial of Pognon's bowls in a cemetery. Primitive animistic beliefs have survived, which connect the skeleton with the world of spirits; it is a material *point d'appui*, and the skull is especially preferred as the most striking and perhaps most durable part of the anatomy. It may be noticed that in Arabic the word for skull is also used of the soul (Wellh. *Skizzen*, 3, p. 161, 164).[2] There is a reference in the Talmud to the necromantic use of a skull; *Sanh.* 65b: "there are two kinds of necromancy (בעל אוב), the one where the dead is raised by naming him, the other where he is asked by means of a skull (הנשאל בגלגלת)." Joel (*Aberglaube*, i, 44) thinks this refers to some artificial skull-shaped object; but our actual skull illustrates the practice noticed in the Talmud. The use of skulls (*calvaria*) in classical magic is also vouched for in the Apology of Apuleius; see Abt, p. 141. For this practice of "speaking skulls," we may note its special vogue among the Sabians; see Chwolson, *Die Ssabier*, ii, 150, and Dozy and de Goeje, *Actes* of the Leyden (6th) Congress of Orientalists, ii, 365 f., cf. 293.

But the skull was also efficacious as a prophylactic object. James of Edessa notes that a dried human head was used by the heathen Syrians as an amulet (quoted by Robertson Smith, *Religion of the Semites*, 362, referring to Kayser's edition of the *Canones*, p. 142). Especially as part of the skeleton was it efficacious against the evil eye; see Seligmann, *Der böse Blick*, ii, 141, who notes the use in Italy of a tiny skull-charm against the *Jettatura*, and also the use among the ancient Taurians and the tribes of Caucasus of the heads of enemies stuck on poles as a prophylactic; also Elworthy, *The Evil Eye*, 340, notes the use of skeleton-like figures as talismans in Italy; he finds the same talisman in classic times, comparing King, *Gnostics and their Remains*, 213 (ed. 2, 180). The skull therefore falls into the general category of frightful or obscene objects, which had the power of repelling the evil eye in particular and evil spirits in general.

[2] Dr. Speck, of the Museum, informs me that the North American Indians carefully preserve the skulls of the animals they hunt, as a means of the reincarnation of the beasts, and I understand like customs are found over the world.

No. 42

Towards the close of my work on this volume, Professor Richard Gottheil, who had several years ago thought of publishing the bowls, kindly forwarded me some notes and transcriptions which he had made in his preliminary essays. Among the papers was the copy of a text which is not now found in the Museum. It differed so radically from the other inscriptions that I inquired of Prof. Gottheil if it was taken from a bowl. He replied that he knew of no other source whence the text could have come into his set of papers. Accordingly on the hypothesis that the original text was once in the Museum, I venture to publish Prof. Gottheil's copy, and do so the more readily because of its interesting character and the illustration it affords to several points in the texts above. It contains a form of the Lilith legend, widespread in folklore, and a bowl would have been a perfectly proper place for a text of this prophylactic character. I have not however included the text in my Glossaries.

שדי

סנוי סנסנוי סמנגלף אדם יהוה קרמונה חיין לילית

בשם ייי אלהי ישראל יושב הכרובים ששמו חי וקים לעד · אליהו הנביא היה הולך בדרך ופגע בלילית הרשעה ובכל כת דילה אמר לה אן את הולכת טמאה ורוח הטומאה וכל כת דילך טמאים הולכים · ותען ותאמר לו אדוני אליהו אנכי הולכת לבית היולדה מירקאדה ד'מ ויאידה כת דונה לתת לה שינת המות ולקחת את ילדה הנולד לה למצוץ דמו ולמצוץ מוח עצמותיו ולחתם את בשרו ויאמר לה אליהו הנביא ז"ל [זכרו לברכה] בחרם מאת השם יתברך עצורה תהיה וכאבן דומה תהיה · ותען ותאמר לו למען ייי תתירכי מן החרם ואנכי אברח ואשבע לך בשם ייי אלהי ישראל לעזוב הדברים אלו מה יולתת (*sic*) חזאות ומולדה הנולד לה ומכל שכן להזיק וכל זמן שמזכירים או אני רואה את שמותי בתובים לא יהיה לי וכל כת דילי כח להרע ולהזיק ואלו הן שמותי : לילית : אביטר . אביקר : אמורפו הקש אודם : איכפידו : איילו : טטרוטה : אבנוקטה : שטריהה : קלי : תלתוי : ריטשה : והשיב לה אליהו

הנביא ז"ל ואמר לה הריני משביעך ולכל בת דילך בשם ייי אלהי ישראל גי"ם תרינ אברהם יצחק ויעקוב ובשם שכינתו הקדושה ובשם עשרה שרפים אופנים וחיות הקדש ועשרה ספרי תורה ובכח אלהי הצבאות ב"ה שלא תלכי לא את ולא מכת דילך להזיק את היולדת הזאת או את ולדה הנולד לה לא לשתות את דמו לא למצוץ מח עצמותיו ולא לחתם את בשרו ולא ליגע בחם לא ברו"ג אבריהן ולא בשם"ה גידיהן וערקיהן כמו שאינה יכולה לספור את כוכבי השמים ולא להוביש את מי הים בשם קרע שטן חסדיאל שמריאל

Accompanying the text are given some inscribed designs and phrases. A rough figure of a hand (prophylactic against the evil eye) contains the Aramaic legend:

אנא מזרעי דיוסף קא (? הא =) אתינא ולא שלטא ביה שנא בישא :

"I am the seed-producer (?) of Joseph; when I come, an evil year cannot prevail over him,"—a play of thought between Joseph as controller of the fertility of Egypt and the fertility of the family, and as a good omen for the expectant mother.

A "David's Shield" contains in the center יאה דונהי, a fanciful form of Adonai, on the left hand שטן, "Satan," in another division אבג and nearby יתין (?), i. e. אבניתין, to be found in Schwab, *Vocab.* Another species of the shield more roughly designed contains יהוה in the center, flanked with יה, etc. and אדני, with מטטרון and סנדלפון on either side. The changes are rung on the possible mutations of ילק, and the scripture Dt. 28: 10 is cited. Similar charms against the Lilith are to be found at the end of *Sefer Raziel* and in Buxtorf's *Lexicon, s. v.*

Translation

Shaddai

Sanui Sansanui Semniglaph Adam YHWH Kadmon Life Lilith

In the name of Y" the God of Israel who besits the cherubs, whose name is living and enduring forever. Elija the prophet was walking in the road and he met the wicked Lilith and all her band. He said to her, Where art thou going, Foul one and Spirit of foulness, with all thy foul band walking along? And she answered and said to him: My lord Elija, I

am going to the house of the woman in childbirth who is in pangs (?), of So-and-so daughter of Such-a-one, to give her the sleep of death and to take the child she is bearing, to suck his blood and to suck the marrow of his bones and to devour his flesh. And said Elija the prophet——blessed his name!—With a ban from the Name—bless it!—shalt thou be restrained and like a stone shalt thou be! And she answered and said to him: For the sake of Y" postpone the ban and I will flee, and will swear to thee in the name of Y" God of Israel that I will let go this business in the case of this woman in childbirth and the child to be born to her and every inmate so as do no injury. And every time that they repeat or I see my names written, it will not be in the power of me or of all my band to do evil or harm. And these are my names: Lilith, Abitar (Abito?), Abikar (Abiko?), Amorpho, Hakaš, Odam, Kephido, Ailo, Matrota, Abnukta, Šatriha, Kali, Batzeh, Taltui, Kitša. And Elija answered and said to her: Lo, I adjure thee and all thy band, in the name of Y" God of Israel, by gematria 613, Abraham, Isaac and Jacob, and in the name of his holy Shekina, and in the name of the ten holy Seraphs, the Wheels and the holy Beasts and the Ten Books of the Law, and by the might of the God of Hosts, blessed is he!—that thou come not, thou nor thy band to injure this woman or the child she is bearing, nor to drink his blood nor to suck the marrow of his bones nor to devour his flesh, nor to touch them neither in their 256 limbs nor in their 365 ligaments and veins, even as she is (= thou art?) not able to count the number of the stars of heaven nor to dry up the water of the sea. In the name of: 'Hasdiel Šamriel has rent Satan.'

Commentary

Only a few detailed notes are necessary. Of the terms at the beginning, סנוי סנסנוי and סמנגלף are common in childbirth charms (see Schwab. *Vocab.*, *s.* יד.). The second is erroneously explained by Schwab; it is שם נ', the inscribed Name, cf. the שם ... גליף in 11: 9. סנוי and its reduplication סנסנוי probably mean "divorced."

N. B. the order of Adam, Yhwh, Kadmon.

מירקאדא ד'מ(ירקאדא) is obscure to me. The root is probably used in the Syriac sense of mourning, hence supplicating; or cf. Heb. חיל, "writhe," as well as "dance."

יאידא כת דונה I would read as אידה בת דינה, the first as the indefinite pronoun fem. *quaequae*, the last as representing the Greek δεῖνα, which is commonly used in the papyri, the actual name being inserted upon use.

חתם = חטף, cf. Arabic קטם.

Of the names of the Lilith the second = Abatur the Mandaic genius (see Glossary A); but the possible reading of the copy, Abito, may be preferable, in view of the Greek parallels; see below; the third is the Greek ἀμορφος.

613: the figure is the gematriac sum of 'the Lord God of Israel,' as also the number of positive and negative commandments of the Law. As Mr. A. Simon, Harrison Fellow of the University, has suggested to me, the preceding abbreviation stands for גימטריא.

The "256 limbs" are 248 in Jewish lore. For the 365 ligaments, cf. the identical expression in a charm given by Reitzenstein, *Poimandres*, 295.

The 10 Books of the Law are the double of the Pentateuch; cf. the Eighth Book of Moses in the Leyden MS. which Dieterich has published at the end of his *Abraxas*.

The very ancient use of epical narrative as an efficient magical charm was described above p. 62; thus the mere narrative of a demon's power, as in the case of Dibbarra, is potent, or, *à fortiori*, the relation of a triumph over the evil spirit from some sacred legend. In the present case we have the added virtue of the revelation of the demon's names, and she swears that whenever they confront her, she will retire; the knowledge of her names binds her (cf. p. 56).

Dr. M. Gaster has published in *Folk-lore* xi (whole number xlvi), 129, an interesting paper entitled "Two Thousand Years of a Charm Against the Child-Stealing Witch." The latter uncanny spirit has already met us in several of our preceding texts (Nos. 11, 18, 36, etc.). Dr. Gaster surveys a wide material of European and Semitic forms of this magical narrative, all of which have evidently the same root. He draws on Slavonic, Roumanian and modern Greek legends, and cites one of Gollancz's Syrian charms, a collection to which I have had frequent occasion to refer,[1] and also quotes

[1] In *Actes* of the 8th International Congress of Orientalists, Sect. 4, p. 77. Most of these charms are in the narrative style. Cf. also a similar Syriac charm given by Hazard, *JAOS*, xv, 286 f.

in translation a Jewish charm of the same order from the *Mystery of the Lord* (in the Hebrew סוד יי, a book I have not been able to obtain).

This Jewish legend is almost identical with ours. It is considerably shorter, concluding with the names of the Lilith and a direction to hang up the names in the room of the woman concerned. The names are almost identical with those in our text; they are: Satrina, Lilith, Abito, Amizo, Izorpo, Koko, Odam, Ita, Podo, Eilo, Patrota, Abiko, Kea, Kali, Batna, Talto, Partasah. My form Amorpho is probably older; Koko =κακός may be preferable to my Kaš.

In both these Jewish forms Elija and the Lilith are the actors. In the Syriac legend quoted by Gaster from Gollancz, it is a saint Mar Ebedishu and the Evil Spirit in the likeness of an ugly woman who are the characters; the latter has for one of her names that of "the Strangling-mother of children" (cf. above to 36: 4). In the European Christian legends, the benevolent actor is the Virgin, Michael, or a certain saint bearing the name Sisoe, or Sisynios. These names are derived from the Jewish סנוי סנסנוי, as Gaster suggests. In the Greek legend the spirit is Gylo, the earlier Γελλω, which appears also in the magical papyri.[2] In all children are the object of the fiend's ravages, in one case the charm is for a boy afflicted with cataract.

There are some other simpler forms of this legend contained in Greek manuscript amulets which were not accessible to Dr. Gaster. In his *Poimandres*, p. 298, Reitzenstein publishes a text which is the earlier prototype of the Roumanian folk-legend published by Gaster, p. 132. It reads: "When the archangel Michael came down from heaven, there met him the impure spirit with her hair down her back and her eyes inflamed. And the archangel Michael said to her: Whence comest and whither goest thou? The impure one answered and said to him: I go to enter the house as a serpent, dragon, reptile, I change into a quadruped, I go to make the plagues of women, to humble their heart, to dry up the milk, to raise the hair of the master of the house .... and then I kill them. For my name is called Paxarea. For when the Holy Mary bore the Word of Truth

[2] Wessely, Vienna *Denkschriften*, xlii, 66, also Γυλον, Reitzenstein, *Poimandres*, 298. For Gello = the Assyrian Gallu, see Frank, *ZA*, xxiv, 161.

I went to deceive her and ..?..[3] And the archangel Michael seized her by the locks on the right hand and said to her: Tell me thy twelve names.[4] And she said: I am called first Gelou, second Morphous, (third, etc.) Karanichos, Amixous, Amidazou, Marmalat, Karane, Selenous, Abiza, Ariane, Maran. Wherever are found my twelve names and thy name, archangel Michael, and thy name Sisinios and Sinodoros, I will not enter into the house of such a one." Compare also the amulet given on the preceding page in Reitzenstein (p. 297), lacking the reference to the Virgin, the demon enumerating her plagues.

A similar legend, in large part identical with both these just named, is given in the Greek-Italian charms published by Pradel.[5] In this Michael descending from Sinai meets the hag Abuzou[6] and the demons cast out of heaven. He inquires where she is going; she answers she crawls into houses like a serpent, dragon, etc., to bring all evils on men, to dry up the mother's milk, to wake the children and kill them. Then, evidently a Christian accretion, she causes faction in the church, sends floods, destroys ships. Michael asks her her name, which is Pataxaro. He asks for her many names. She swears by the throne of God and the eye (= eyes) of the Beasts (cf. the oath in our text) that she will tell the truth. She then gives forty names, the first two of which are Gilou, Morphou.

The legend sometimes ran out into the line of particular diseases, e. g. cataract, as in one of the Roumanian forms; or Beelzebub and other demons are named, as in an amulet in Vassiliev, *Anecdota byzantina*, i, 336. But the story of the wife-hating, child-murdering hag is the original element, as Gaster points out.

We thus possess forms of the legend in Hebrew and Syriac, in Greek texts of eastern and western Europe, and in modern Roumanian and Slavonic folklore, while the heroes of the epic include Elijah, Michael, Christ and various saints known or obscure. The persistency of the form appears also in the charm names. To compare the lists in the two Hebrew texts and in the two of Wendland and Pradel respectively and in Gollancz

[3] Cf. the early Christian myth of the devil's wiles, *Rev.* 12.

[4] The same number is found in the Hekate-Isis legend.

[5] *Griechische u. süd.- italienische Gebete*, 23.

[6] The Avezuba and Avestitza in Gaster's Roumanian legends.

(Syriac), we find that the initial Hebrew Lilith = Greek Gelou or Gilou = Syriac Geos, doubtless = Gelos. The second in the Hebrew, Abito (Abitar?) = Apiton the ninth in the Syriac; the third, Abiko (Abikar?) = Abiza or Abuzou in the Greek texts, and as we observed above Avezuba in the Roumanian. The fourth Amorpho (in our text) = Morphous or Morphou having third place in the Greek texts, and Martlos, 4th in the Syriac. Amorpho is doubtless the Greek ἀμορφος, "shapeless," and our Jewish text alone has preserved the correct form. Eilo and its obscure predecessor in the Hebrew may be found in Pradel's Morpheilaton, and the latter's Phlegumon may translate the Hebrew קלי.

It is impossible to place our phylactery genealogically in such a mass of interrelated material. The Jewish text doubtless depends upon Greek tradition with its magical name Amorpho and its transliteration of δεῖνα, while the later Greek forms have borrowed from the Hebrew in St. Sisynios. But the source of the legend is the common property of mankind, with roots as ancient as the Babylonian Labartu and Gallu. A child-killing demon which sucks babes' blood, etc., is found in Africa; see Budge, *Osiris and the Egyptian Resurrection,* i, 285, a reference pointed out to me by Professor Jastrow. In the Hellenistic magic a classical form of such legend was established out of all the elements that were brought together in that age, and this spread again assuming its variant forms among the peoples and faiths. If our text actually came from Nippur, it is of interest as the earliest form of the Jewish legend and as one which can be dated with approximate accuracy.

Corrections and Additions

P. 20, line 4: read "Berlin" for "British."

P. 20: add to the list of published Mandaic bowls the two photographic plates of bowls (plates 1, 2) in J. de Morgan, *Études linguistiques,* vol. v, part 2, of his *Mission scientifique en Perse.*

P. 105, line 20: the Koran gives to the Mandaeans the same privileges as the Jews and the Christians (see 2: 59; 5: 73; 22: 17).

GLOSSARIES

GLOSSARY A

PERSONAL NAMES AND EPITHETS OF DEITIES, ANGELS, DEMONS, ETC.

GLOSSARY B

PROPER NAMES OF MEN AND WOMEN

GLOSSARY C

GENERAL GLOSSARY

Prefatory Note

Glossary C is arranged according to roots, the other two consonantally. The former indexes only the common nouns.

The citations of other authorities can be understood from § 2. The two publications of Pognon's are cited as "A" and "B", and Pognon's full glossaries will serve to locate all words of his texts. Where lines of texts are given, the reference is to the spiral line if facsimile is given, otherwise to the lines of the printed text. I have not thought it necessary to give the line citation for proper names even in my own texts, as they can be easily identified.

Under Glossary B, the following abbreviations are used: d. = daughter of, f. = father, h. = husband, m. = mother, s. = son, w. = wife.

Where a word appears in my text the first citation may be referred to for any treatment by the editor; references are also added to further discussions in the Introduction. Notes are occasionally added to words found in texts of other editors.

In Glossaries A and B all the occurrences are given with the exception of a few common divine names like יהוה; in Glossary C only typical citations and peculiar forms; also it has been the aim to give citations from the three dialects.

GLOSSARY A

PERSONAL NAMES AND EPITHETS OF DEITIES, ANGELS, DEMONS, ETC.

אבונבאנא evil deity: Pogn B.

אבונדאנא evil deity: Lidz 4, 5 (for these two names, see to 11: 5).

Prefatory Note

The concave spherical surface on which the bowl texts are inscribed precluded their reproduction by photography. At the best only a half of the text can be obtained satisfactorily by the camera, as the pair of photographs at the end of the Plates will show. Accordingly the texts had to be copied by hand.

Soon after the bowls came to the Museum, Professor Jastrow, of the University, and Professor Gottheil, of Columbia, undertook their publication. They secured the services of Mr. Horace Frank, Architect, for autographing the plates, a considerable sum of money being raised to meet this expense. Subsequently Drs. Jastrow and Gottheil gave up their plan of publication, and when Professor Hilprecht, then Curator, put the bowls into my hands, I fell heir to Mr. Frank's labors. I found he had prepared about 75 plates, but of these I have been able to use only 23, covering my Numbers 2, 3, 4, 6, 8, 9, 16, 17, 24, 28, 31, 36, 37, 38, 40. His other plates were copies of broken and mutilated bowls which were not worth publishing (see Introduction, § 1). It appears also that not all the good texts were placed in his hands, or else that he did not complete them all.

There is only one drawback in Mr. Frank's excellent reproductions, one which however does not impair their accuracy. Working without much direction and knowing nothing of the language, he often broke a word at the end of the line and carried it over to the next. I have seen no reason to repair this technical error in his copies, but have guarded against it in the work of the later copyists.

There thus remained of the texts which came to be included in this publication twenty-five which still required autographing. Shrinking from this tedious mechanical labor, especially after an expert hand had preceded me, I was very glad to avail myself of the kind cooperation of Professor

Gordon, Director of the Museum, who offered me the expert services of his staff. Consequently, under my direction, the remaining copies were prepared by Mr. William C. Orchard (Nos. 1, 5, 7, 10-15, 19, 21-23, 25, 27, 29, 32, 34, 35), and by Miss M. Louise Baker (Nos. 20, 26, 30, 33, 39).

The style of Mr. Frank's copies conditioned those for which I am responsible. He had abandoned the spiral arrangement of the originals and made his reproductions in straight lines. This method may be faulted as not giving the exact form of the original, but this demerit is small as compared with the advantage to the scholar of having the whole text lying before him at one glance without his being under the necessity of turning a bulky volume around and around to follow the spiral career of the text. I was therefore quite satisfied to retain this method of reproduction.

It may be remarked that all my decipherment was made entirely from the originals; only after my own work was finished did I compare Mr. Frank's copies. In a few cases I was able to improve his facsimiles, in several cases his copies, which were made when the texts were fresher and more legible (they have manifestly faded under exposure to light), have helped me correct or enlarge my readings. The other copyists also worked independently, and then we compared our respective results. The cooperation of others, expert copyists, with the author has thus tended to a full control of the accuracy of the facsimiles and transliterations.

I have finally to speak in the highest terms of the artistic and painstaking labors of these two gentleman and Miss Baker, whose assistance has afforded me so great relief.

CATALOGUE

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
1	1	8693	6.5 + 17	Broken and mended, with two holes. Written inside and out in large coarse script, .5 cm. average height, rude spiral design in center.
2	2	2945	7.2 + 17.4	Broken and mended. Fair, large characters. .4 cm. in height. In center two large figures, one in reverse position to other; one of which appears to be making a sign with his hand (as against the evil eye?), probably the sorcerer, the other with feet hobbled, the demon.
3	3-4	2963	10.3 + 20.5	Broken and mended, with a segment 6 + 12 cm. missing. Flat boss. The rim of the bowl has a double edge. Fair characters, .3 cm. high. In the center figure of a demon, armed with helmet and a sabre and spear in either hand, and his feet manacled.
4	4-5	2923	7.5 + 17.3	Broken and mended, small segment missing. Characters .4 cm. high. In the center figure of the sorcerer waving a magic bough.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
5	6	2952	7 + 18	Slightly broken and mended, with small fragment missing. Characters .4 cm. high. In center rude figure of a demon with four arms and one leg.
6	7	2916	6 + 15.8	Perfect bowl but for a fracture which does not touch the text. Small circle in center. Characters .3 cm. high, rather crabbed.
7	8	16007	5.6 + 15.7	Broken and mended, with a square fragment of text missing. Fine, clear characters, .2 cm. high. In center circle with cross.
8	8-9	9013	8.5 + 16.6	Broken and mended, with two small fragments missing. Characters .2 cm. high. In center obscene picture of a lilith with hands and feet bound.
9	10	9010	6 + 17.7	Perfect bowl. Characters much obliterated, .4 cm. high. Circle in center. On exterior four short lines in Hebrew.
10	11	16014	6.9 + 14.2	Broken and mended with segment missing. Characters .4 cm. high. In center monstrous figure with owl-like head and apparently several breasts, presumably a lilith.
11	12	16022	6.3 + 16.1	Broken and mended, with three fragments of the text missing. Characters carelessly written, .3 or .4 cm. high. In center rude design, probably of a lilith.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
12	13	9009	7.2 + 17.7	Perfect bowl. Characters .4 cm. high, coarse but distinctly formed. In center a demon, with beastlike face and arms and feet bound. Endorsement on exterior.
13	14	8694	7 + 16.2	Broken and mended, with small piece missing. Coarse, clumsy characters, .6 cm. high. In the center a clumsy figure of a demon with caterpillar-like arms. Text continued on the exterior for 6 lines.
14	15	16017	6.8 + 18.7	Broken and mended, with missing segment. Characters .4 cm. high, in a good hand. In center a lilith with hands and feet manacled.
15	16	16087	7.3 + 17.2	Broken and mended. Characters .4 cm. high. In center figure of a serpent with its tail in its mouth.
16	17	2920	6.8 + 16.3	Broken and mended. Characters coarse, .3 cm. high. Rough circle in center.
17	18	2922	7 + 15.7	Broken and mended, with a segment missing. Characters coarse, .4 cm. high. In the center the circle and cross, formed in a peculiar way.
18	19	8695	7.2 + 16.1	Broken and mended, with fragment of about 5 cm. square missing. Coarse characters, .4 cm. high. In center rude and faded design—of a demon?

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
19	20		6.6 + 17.6	Broken and mended. Characters crabbed and obscure, closely written, .3 cm. high. Circle and cross in center.
20	21	16023	7 + 17	Broken and mended, fragment missing. Large, coarse characters, .6 cm. high. Large figure of a demon manacled, with a circle in his breast bisected by two lines. For the magical words accompanying see commentary.
21	22	16054	6.5 + 17	Broken and mended, with two fragments missing, a small one in the text. Script large, .8 cm. high, and rude. In center a rectangular figure divided into three squares, in one of those at the end two large markings like letters.
22	22-23	16006	6.5 + 16	Broken and mended, with two fragments missing. From the same hand as No. 21 and with the same design, the markings in the square suggesting a face.
23	22	16090	7 + 17.2	Broken and mended. From the same hand as Nos. 21, 22, and with similar design.
24	23	2926	7 + 16.8	Broken and mended, small fragment missing. Coarse script, .7 cm. high. In the center a figure of rude concentric circles with radial lines.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
25	24	16009	6.9 + 17.2	Broken and mended, with four fragments missing. Coarse script, .5 cm. high.
26	24	3997	6.9 + 15.5	Broken and mended. Script .4 cm. high. In the center a rough circle bisected by two lines, in each segment a magical word.
27	25	16041	5.6 + 16.6	Broken and mended with two considerable fragments missing. Script fine and fair, .2 cm. high. In the center a circle with cross.
28	25	2972	6.5 + 16.5	Broken and mended, four fragments missing, the text much blurred or obliterated. A fair script,.3 cm. high.
29	26	16055	6.8 + 17	Broken and mended, one fragment missing. Bold and well formed characters .5 cm. high.
30	26	16096	6.5 + 16.8	Broken and mended, small fragment missing. Script .3 to .4 cm. high. In center rude figure of a lilith with tresses flying and hands and feet bound.
31	27	9008	6.6 + 16	Perfect. Syriac script, .3 cm. high. In center a circle divided into four squares each with a cross in it.
32	28	16086	6.9 + 17	Broken and mended, one large and one small fragment missing. Same script and design as in No. 31.

TEXT	PLATE	CATALOGUE NUMBER	SIZE in centimetres, height by diameter	DESCRIPTION
33	29	16019	6.2 + 15.5	Broken and mended, with two considerable fragments missing. In center cross with circle.
34	30	9012	7.5 + 17.5	Broken and mended. Design as in Nos. 31, 32.
35	31	16097	6.5 + 16.1	Broken and mended, two small fragments missing. Design as in No. 33.
36	32	2933	6.3 + 15.4	Broken and mended, with about half of the two lines on the margin missing.
37	33	2943	6.5 + 17	Broken and frequently repaired, much of the margin missing and a large part of the text obliterated. The script the smallest in the Syriac bowls, .2 to .3 cm. high. In the center circle and cross, each segment containing presumably letters of the Tetragrammaton.
38	34	2941	7 + 17	Broken and mended, with several small holes. Mandaic script average character about .2 cm. high. Small circle in center. A brief phrase written radially near the margin on the exterior.
39	35	9005	6.8 + 17.2	Broken and mended, some fragments missing. Script larger and coarser than in No. 38, .3 cm. high.
40	36-38	2972	7.3 + 17.2	Broken and mended, some large lacunae. Script as in No. 39. The text covers also most of the exterior. Circles in the center.

SEFER MAR ʾOT HA-ẒOVE ʾOT 1

PREFACE

Writing to Ḥayyim Naḥman Bialik in 1925, Gershom Scholem outlined a plan for research into kabbalistic literature.[1] He listed important works that lay in manuscript, awaiting their redemption, and proposed a program of publication and textual analysis. Among the MSS on that list were those of R. David ben Yehudah he-Ḥasid, a Spanish kabbalist of the early fourteenth century. Scholem noted that R. David was the first author after Moses de León to rely heavily on the Zohar.

Since the date of that letter, a new and ancient field has been cultivated. Thanks to Scholem and his school, we now have a clear picture of the basic development of Kabbalah; the profound symbol systems of mystical Judaism have begun to yield fruit. Still, several of the projects outlined in Scholem's letter have not been completed or even undertaken. Until now, for example, none of the works of R. David ben Yehudah has been published. This volume provides a critical edition of R. David's *Book of Mirrors, Sefer Mar>ot ha-Ẓove>ot.*

The Book of Mirrors is a composite work: an anthology of Kabbalah and an original commentary on the Torah. R. David copies freely, and almost always without acknowledgment, from several prominent kabbalists of the thirteenth century: Ezra and Azriel of Gerona, Todros Abulafia, Joseph Gikatilla, and Moses de León. An important feature of *The Book of Mirrors* is the large number of Zohar passages that R. David translates into Hebrew from the original Aramaic. His renderings represent the first lengthy translations of the Zohar; through them we see how the work was read and understood by a fourteenth-century kabbalist. R. David did not regard the Zohar as an ancient midrash; he appropriates its pseudepigraphic style to introduce his own teachings. A generation after its appearance, the Zohar has become a model for mystical exegesis.

This critical edition of R. David's *Book of Mirrors* was prepared as a Ph.D. dissertation in the Department of Near Eastern and Judaic Studies at Brandeis University in 1976-77. I want to thank my advisers, Profs. Alexander Altmann and Marvin Fox, for their guidance. A number of colleagues, friends, and teachers read the Introduction; I thank them for their criticism and suggestions: Profs. Michael Fishbane, Naḥum Glatzer, Amos Goldreich, Arthur Green, Moshe Idel, Alfred Ivry, Yehuda Liebes, and Gershom Scholem.

I am grateful to the National Foundation for Jewish Culture and the Memorial Foundation for Jewish Culture for providing me with grants in 1976-77.

A number of libraries extended their facilities to me. I thank the people who tend the books at: Brandeis University, Harvard University, the University of California, the Graduate Theological Union, the Jewish Theological Seminary, the Institute of Microfilmed Hebrew Manuscripts at the Jewish National and University Library, Jerusalem, and the Library at the Monastery of San Lorenzo de El Escorial, Spain.

Finally I thank those who have helped me polish *The Book of Mirrors* for *Brown Judaic Studies:* Profs. David Blumenthal, Baruch Bokser, Jacob Neusner, and Claude Welch; Bill Tuthill and the computer consultants at UC Berkeley; the staff at Scholars Press and my editor, Davis Perkins; my friends Beverly Todd and Tom Rose, Paul Schwartz, and Ana Massie.

[1]The letter appears in Scholem, *Devarim be-Go,* 1:59-63.

INTRODUCTION

1. R. DAVID BEN YEHUDAH HE-ḤASID

1.1. His Identity

Little is known about R. David ben Yehudah he-Ḥasid. In 1874 H. Gross conjectured that he was the son of the famous German mystic, Yehudah ben Shemu ᵓel he-Ḥasid of Regensburg.[1] S. D. Luzzatto already doubted this identification,[2] and A. Epstein confirmed his judgment, suggesting that David's father was a later Yehudah he-Ḥasid.[3] A. Marmorstein, who wrote the first article devoted to R. David, adopted this view and argued that David was born a German Jew but later lived in Spain. He based this conclusion on statements found in R. David's *ᵓOr Zaruᶜa,* a kabbalistic commentary on the liturgy (see below, § 1.2.). There the author praises Ahkenazic customs, giving them precedence over Spanish customs. At one point he states: "I have learned from my teachers in France...."[4]

A year after Marmorstein's article appeared, G. Scholem published a study on R. David as one of his "Chapters of the History of Kabbalistic Literature."[5] He disputed Marmorstein's contention that David was born in Germany. There is no doubt, argued Scholem, that he traveled there and to other countries. He states in *The Book of Mirrors* that he carried a certain holy name "on all the roads I traveled," and that "due to the tribulations of travel I lost it."[6] In his *ᵓOr Zaruᶜa* he says, "I have seen *siddurim* in Ashkenaz...."[7] However, there is no indication that R. David was German by birth. The order of prayers in *ᵓOr Zaruᶜa* cannot be adduced as proof of his native country; David simply copied whatever he saw, adopting both Spanish and Ashkenazic readings.[8] In one passage R. David traces a tradition back to his father: "The great Rabbi Shimᶜon received this secret from our father *[min beit ᵓav shellanu],* Rabbi Yehudah he-Ḥasid."[9] The secret transmitted here is Spanish Kabbalah; it could not have originated in Germany.

Unfortunately, the most explicit references to R. David's genealogy come from an unreliable source. Oxford MS 2292 contains a "Treatise on the Secrets of the Alphabet" that is attributed to R. David.[10] After a few pages of these secrets the MS reads:

---

[9]*ᵓOr Zaruᶜa,* f. 98a-b; see Scholem, p. 304, who suggests that R. Shimᶜon was a student-friend of R. David's father; cf. Amos Goldreich, *"Sefer ha-Gevul le-R. David ben Yehudah he-Ḥasid"* (Master's thesis, Tel Aviv University, 1972), p. 2 (hereafter cited as *"Sefer ha-Gevul"*).

[10]Oxford MS 2292, f. 32a; see Adolph Neubauer, *Catalogue of the Hebrew Manuscripts in the Bodleian Library,* p. 800; Scholem, *"Peraqim,"* p. 303.

> The awareness of this generation is limited; they cannot comprehend in depth nor are they worthy to do so. If this were not the case, I would transmit more of the profound, sealed mysteries and the marvelous wonders from the secrets of He who dwells in the heights, from what I have received from my grandfather, the great rabbi, our master, Moses son of Naḥman, may his memory be a blessing.[11]

It appears that R. David's grandfather was none other than R. Moses son of Naḥman, the Ramban (1194-1270). At the end of the same MS the genealogy is described more explicitly:

> From the son of Naḥman, Moses the Prince, I have received it; I have gathered it from his vineyard. I am David; he is my grandfather...the father of Rabbi Yehudah Ḥasid.[12]

These two statements, both worded in the first person, seem to prove that R. David was the grandson of the Ramban. However, this conclusion is highly suspect, for, as Efraim Kupfer has pointed out, the "Treatise on the Secrets of the Alphabet" was not written by R. David. Its real author was Yom Tov Lipmann Muelhausen, the fifteenth-century rabbi and kabbalist, author of *Sefer Niẓẓaḥon.* [13] In the other extant versions of the "Secrets"' neither the two autobiographical passages nor the attribution of the work to R. David is to be found.[14] Apparently a certain scribe chose to attribute R. Yom Tov's work to R. David ben Yehudah he-Ḥasid. In addition to inserting references to R. David and his genealogy, this editor was careful to delete any telltale signs of the real author, R. Yom Tov.[15]

To what extent can we rely on the statements in the Oxford MS? On the one hand, they are forgeries and thus suspect. On the other hand, it should be noted that a certain scribe had a tradition that R. David, the author of *The Book of Mirrors,* was the grandson of the Ramban. This observation cannot be adduced as proof.

Leaving aside the curious and perplexing Oxford MS, there are certain other pieces of information that bear on the question of R. David's relation to the Ramban:

---

[11] *Maʾamar ʿal Sodot ha-ʾAlef Beit,* Oxford MS 2292, ff. 33b-34a; cf. Scholem, *"Peraqim,"* p. 303.

[12] *Maʾamar,* f. 36b; Scholem, *"Peraqim,"* pp. 305-6. Apparently, the Ramban did have a son named Yehudah. His oldest son was Naḥman; he had a second son, Shelomoh. Ḥ Chavel postulates that there was a third son who was a courtier in Castile. To him is addressed the Ramban's letter on how to conduct oneself in the royal court. See *Kitvei ha-Ramban,* ed. Ḥayyim Chavel, 1:369-71; Chavel, *Rabbeinu Mosheh ben Naḥman* (Jerusalem, 1967), pp. 34-5, n. 39; p. 207; cf. Salo Baron, *A Social and Religious History of the Jews,* 9:282, n. 38. In Chavel's edition of this letter (based on Solomon Schechter's edition in *JQR* 5 [O.S.] (1892-93): 115-9) the son's name is not provided. However, in a version of the letter published by Reuven Margaliot (*Vikkuaḥ ha-Ramban,* p. 48) the letter is titled: *Ha-ʾIggeret she-shalaḥ ha-Ramban bi-heyoto be-ʾErez Yisraʾel li-veno Yehudah le-Qaʾṣṭilyaʾ bi-heyot beno ʿomed li-fenei ha-melekh.* See Scholem, *Kiryat Sefer* 6 (1929-30): 400, n. 1; cf. Isaac Unna, *Rabbi Mosheh ben Naḥman,* p. 91; Isaac Baer, *Toledot ha-Yehudim bi-Sefarad ha-Noẓrit,* 1:71.

[13] R. Yom Tov's treatise was first printed at the end of Shimson ben Eliezer's *Barukh She-ʾAmar* (Shklov, 1804), pp. 17ff.; see the edition in *Qoveẓ Sifrei Setaʾm,* ed. Menaḥem Mendel Meshi-Zahav, 1:197ff. Kupfer has not yet published this discovery; he informed me of it in Jerusalem in the spring of 1977. In the *Sodot* R. Yom Tov refers several times to his *Sefer ha-ʾEshkol;* these references fit well into the context of the *Sodot* and are not a later interpolation. (Cf. *Qoveẓ Sifrei Setaʾm,* pp. 197ff. with *Sefer ha-ʾEshkol,* ed. Judah Kaufman, Introduction, p. 170.) The signature at the end of the *Sodot, tʾv yomʾi* (*Barukh She-ʾAmar,* p. 24a; Oxford MS 2292, f. 36b), is R. Yom Tov's: see *Sefer ha-ʾEshkol,* p. 175; cf. Moritz Steinschneider, *Jewish Literature,* p. 305.

[14] See *Barukh She-ʾAmar,* pp. 22b, 23a, 24a; *Qoveẓ Sifrei Setaʾm,* pp. 197ff.

[15] All of the references to R. Yom Tov's *Sefer ha-ʾEshkol* (see above, n. 13) are deleted in the Oxford MS. How far this anonymous editor is willing to go in his project is demonstrated on f. 36a of the MS, where he replaces R. Yom Tov's reference to *Sefer ha-ʾEshkol* with a reference to *Sefer Meʾorot ha-Ẓefuḥot Peirush ha-Torah* (a scribal corruption of *Marʾot ha-Ẓoveʾot*). Cf. *Barukh She-ʾAmar,* p. 23d; the parallel in *Sefer ha-ʾEshkol,* p. 168; and *MhẒ* 178:30ff. We can only speculate as to the reason for this curious example of scribal license. One possible explanation is that the scribe actually believed that R. David was involved with the original composition of the "Treatise." R. Yom Tov states at the beginning of his *Sodot* that he drew on many sources: teachers, scribes, and books (*Barukh She-ʾAmar,* p. 17b). We do possess a different "Treatise on the Alphabet" by the real R. David (see below, § 1.2.), and though the two works are distinct, there are certain parallels between them: cf. letters *g, h, s, r, sh* in R. David's authentic treatise (preserved in Paris MS 841, ff. 138a-41a) with the same letters in R. Yom Tov's *Sodot.* It is possible that among R. Yom Tov's sources was this work of R. David. Our scribe may have felt that R. David was the original author of, or at least a contributor to, R. Yom Tov's "Treatise"; he may have decided to make the changes that would restore authorship to him.

(1) In a collection of kabbalistic secrets entitled *Shorshei ha-Shemot,* by R. Moses Zacuto, there appears the following tradition copied, according to the author, from R. Ḥayyim Vital:

> *Zoʾt qabbalah me-ʿʾb shemot ha-Rydʾʾʿa [R. Yiẓḥaq de-min ʿAkko]*
> *ʾasher qibbelah me-R. David ben meʾor ha-golah ha-Ramban zʾl.* [16]

Here R. David is identified as the son of the Ramban. There is no evidence that the Ramban had a son named David; the reading may be the result of a scribal error by which the phrase *ben beno shel* was reduced to *ben.* It should be noted that there is considerable evidence in *The Book of Mirrors* of R. David's knowledge of divine names and the seventy-two-letter name in particular.[17]

(2) In his only autobiographical reference in *The Book of Mirrors* R. David mentions a certain divine name that he carried with him in all his journeys as a means of protection (see above, n. 6). According to a kabbalistic tradition preserved elsewhere, this same name was used by the Ramban and sent by him to his son in Barcelona.[18] Can we assume that this son was R. David's father or uncle, who passed the name on to R. David, who carried it as an amulet?

These two pieces of evidence support the view that R. David was descended from the Ramban. However, we should make note of the following: (1) in his *ʾOr Zaruʿa* R. David once cites the Ramban without mentioning any familial relationship;[19] (2) in *The Book of Mirrors* the influence of the Ramban is rather minimal.

Was R. David a grandson of the Ramban? There are several indications that he was, though the clearest of these is suspect. There are also certain problems with such a conclusion. More evidence may surface from the mass of unpublished kabbalistic MSS. For now, the question must remain open.

As to the dates of his life, here too we have little information. Marmorstein estimated that he wrote the *ʾOr Zaruʿa* between the years 1270 and 1300.[20] The former year must be rejected as too early, for in that work R. David already draws heavily on the Zohar (see below, § 1.2.). *The Book of Mirrors* was probably written in the early fourteenth century.[21]

1.2. His Other Writings

As is the case with many kabbalists, we have better knowledge of R. David's writings than of his life. He composed at least three major works and a number of smaller treatises and commmentaries. He is the first author, aside from Moses de León, to base almost all of his books on the Zohar.

Moshe Idel has identified Zohar translations by R. David in Vatican MSS 62 and 186. The material comprises most of Zohar on Genesis beginning at 1:30b; *Midrash ha-Neʿelam*

---

[16] *Shorshei ha-Shemot,* end of *ʾOt Vav.* This work is extant in many MSS, e.g., Jerusalem MS 8° 2454; Sassoon MS 272.

[17] See *MhẒ* 45:22; 104:3; 117:1; 190; 196:20; 197:2; 240:17; 247-8; and concerning the seventy-two-letter name: 56:22; 104:2; 183-4 (from the Zohar); 224:21. Isaac of Acre says, concerning a certain teaching, *"Qibbalti mi-ben beno shel ha-Ramban ha-sofer"* (*Oẓar ha-Ḥayyim,* JTS Adler MS 1589). There are indications in *The Book of Mirrors* that R. David was a scribe: *MhẒ* 54:3; 58:20; 146:9; 250:6; 252:12.

[18] *Toledot ʾAdam* (Villamars Darf, 1734), p. 23a-b; Scholem, *"Peraqim,"* pp. 319-20. In Oxford MS 1539, f. 95 this same name is called *Shivʿah ʾEtin le-ha-Ramban.* For references to this name in Islamic literature see Hans Winkler, *Siegel und Charaktere in der muhammedanischen Zauberei.*

[19] See Scholem, *"Peraqim,"* p. 304. In *The Book of Mirrors* too there are several references to the Ramban (*MhẒ* 169:14; 170:20; 173:6; 182:7). All of these, however, are part of R. David's long selection from *Shaʿar ha-Razim* by Todros Abulafia (see below, § 2.6.) and are thus not directly relevant to the question at hand.

[20] Marmorstein, "David ben Jehuda Ḥasid," p. 40.

[21] See below, § 2.2.; cf. the reference to a David ben Yehuda residing in Haro, a town in northern Castile, in 1294: Francisco Cantera, "La Judería de Miranda de Ebro," *Sefarad* 1 (1941): 96, 112.

and *Sitrei Torah* do not appear. Idel shows that several of these translations were revised and incorporated into David's later writings, including *The Book of Mirrors.* [22]

R. David's *Sefer ha-Gevul* is extant in eight MSS, only three of them complete.[23] It presents a translation of, and commentary on, large sections of the *ʾIdra ʾ Rabba ʾ* of the Zohar (3:127b-145a). R. David describes the kabbalistic system "from the Ancient of Ancients to the world of nature." He says: "My friend, you must realize that from the earth...to the sky...there is no empty space. Rather, it is all filled, like the layers of an onion clinging one to the other."[24]

ʾOr Zaru ʿa is a kabbalistic commentary on the liturgy, extant is four MSS. R. David states that he composed it for friends "who urged me and forced me."[25] It represents a radical "kabbalization" of the liturgy and was frequently quoted until Lurianic Kabbalah undertook a new approach to mystical prayer. In this work too R. David makes abundant use of the Zohar without referring to it directly.[26]

A short treatise on the alphabet, included in a kabbalistic anthology entitled *Sefer ha-Malkhut,* was identified by Efraim Gottlieb as belonging to R. David. Moshe Idel has discovered other such treatises, written under the influence of Joseph ben Shalom Ashkenazi.[27]

Maʿaseh Bereʾshit Zuṭa ʾ is a non-kabbalistic work describing the heavenly spheres and the elements. *Maʿaseh Bereʾshit Rabbah* treats of the worlds beyond the spheres and includes many angelic names. *Maʿaseh Merkavah* describes the different levels of the World of the Chariot, the thrones, and the classes of angels. It draws heavily on the work of Joseph ben Shalom Ashkenazi.[28]

R. David also wrote a commentary on *Sefer Yeẓirah.* Only one selection from it has been identified; it appears in *The Book of Mirrors* (*MhẒ* 44:21). Here too R. David has been influenced by Joseph ben Shalom.[29]

[22]Moshe Idel, *"Targumo shel R. David ben Yehudah he-Ḥasid le-Sefer ha-Zohar u-ferushav la-ʾalfa ʾ beita ʾ," Alei Sefer* 8 (1980): 60-73; 9 (1981): 84-98; 10(forthcoming). The title of the Zohar translations may be *ʾAggan ha-Sahar;* see *"Targumo shel R. David,"* p. 67. In the second article the author displays evidence of R. David's translations of Zohar on Leviticus-Deuteronomy.

[23]For a description and analysis of *Sefer ha-Gevul* see Goldreich, *"Sefer ha-Gevul."*

[24]See Goldreich, *"Sefer ha-Gevul,"* p. 93; Scholem, *"Peraqim,"* p. 308; cf. Maimonides, *Mishneh Torah, "Hilkhot Yesodei ha-Torah,"* 3:2; Joseph Gikatilla, *Shaʿarei ʾOrah,* p. 6; Steinschneider, *Jewish Literature,* p. 186.

[25]Scholem, *"Peraqim,"* pp. 320-1.

[26]Ibid., pp. 321-2. On the Lurianic doctrine of *yiḥudim* see Lawrence Fine, "Techniques of mystical meditation for achieving prophecy and the Holy Spirit in the teachings of Isaac Luria and Ḥayyim Vital" (Ph.D. diss., Brandeis University, 1975); R. J. Zwi Werblowsky, "Mystical and Magical Contemplation: The Kabbalists in Sixteenth-Century Safed," *History of Religions* 1 (1961): 9-36.

[27]Efraim Gottlieb, *Meḥqarim be-Sifrut ha-Qabbalah,* pp. 249-50 (hereafter cited as *Meḥqarim*); Moshe Idel, *"Targumo shel R. David (part 3)," Alei Sefer* (forthcoming). These treatises are to be distinguished from Oxford MS 2292, discussed above.

[28]Scholem, *"Peraqim,"* pp. 310-1. See *MhẒ* 119:10.

[29]Scholem, *"Peraqim,"* pp. 322-4.

2. THE BOOK OF MIRRORS: *SEFER MARʾOT HA-ẒOVEʾOT*

2.1. Description of the MSS

The Book of Mirrors is extant in five MSS:

1) Escorial MS G-I-15. The first 131 folios contain *The Book of Mirrors* from *Parashat ʾAḥarei Mot* until the end of the Torah. This portion was completed in 1468 in Tlemcen, Algeria. The rest of the MS contains a supercommentary on the Ramban's *Commentary on the Torah* and Zohar on the Book of Numbers, apparently by the same scribe. The entire MS extends to 261 ff. It is written in Spanish cursive script and on the whole is very clear. One orthographic peculiarity should be noted: the scribe often employs a *yod* to denote a *segol.* [30] The MS is described by José Llamas in his article "Los Manuscritos Hebreos de el Escorial," though he attributes *The Book of Mirrors* to the Ramban.[31]

This copy of *The Book of Mirrors* has an interesting history. It was originally written for R. Natan Sholal (1437-1502), one of the leading rabbis of North African Jewry.[32] Shortly after the MS was completed R. Sholal left Algeria, traveling to Italy and then on to Jerusalem. He later moved to Egypt, where he was appointed to the office of *nagid* in approximately 1484. All this time he had the MS of *The Book of Mirrors* in his possession. After his death in 1502 the MS was inherited by Natan's relative, Isaac Sholal, who succeeded him as the last *nagid* of Egyptian Jewry; he befriended the Spanish exiles. When the Turks conquered Egypt in 1517 Isaac settled in Jerusalem, where he died seven years later. Now the MS passed into the hands of Abraham Sholal, Isaac's orphaned son. It was purchased from Abraham's guardian, David ibn Shoshan, by R. David ibn Zimra, the famous kabbalist and teacher of Isaac Luria.[33] Ibn Zimra, born in Spain shortly before the Expulsion, had followed the well-traveled route across North Africa, ending up in Cairo, where he joined the *bet din* of Isaac Sholal.[34] Later he too settled in Jerusalem. Included in his extensive library was this MS of *The Book of Mirrors.* [35]

2) Cambridge MS Add. 664. This MS contains 93 folios and extends from *Parashat ʾAḥarei Mot* until the end of the Torah. It was completed on *Lag ba-ʿOmer,* 5261 (1501)[36] and written in Spanish cursive script in North Africa. The colophon contains this statement:

[30]*MhẒ* 36:5; 72:6; 169:4; 179:5; 213:18. For a similar scribal practice cf. Moses de León, *Mishkan ha-ʿEdut* (Berlin Or. MS 833), f. 6a: *Ve-ʾEineinnu ki laqaḥ ʾoto ʾElohim* (Gen 5:24).

[31]*Sefarad* 1 (1941): 24-6. He may have misunderstood the note at the end of the MS: *Zeh Sefer Va-Yiqraʾ u-Be-Midbar ve-ʾElleh ha-Devarim mi-Marʾot ha-Ẓoveʾot u-Veiʾur Sodot ha-Torah le-RM B"N u-Be-Midbar Sinai le-R. Shimʿon ben Yoḥai.*

[32]See the colophon: *MhẒ* 273:14.

[33]See Ibn Zimra's note, included in the critical apparatus to *MhẒ* 273:16. The handwriting matches the autograph of Ibn Zimra that is reproduced at the beginning of Israel Goldman, *The Life and Times of Rabbi David ibn Zimra;* cf. Goldman's comments on Ibn Zimra's signature, p. 3. It should be noted that Ibn Zimra quotes extensively from *The Book of Mirrors* in his *Migdal David;* see below, § 2.9. On David ibn Shoshan see *Kiryat Sefer* 44 (1969): 554, n. 8.

[34]Goldman, *Rabbi David ibn Zimra,* p. 200, n. 35.

[35]On Ibn Zimra's library see ibid., pp. 32-3. Did Isaac Luria study from this MS? We know from a statement by Samuel Vital that Luria copied material from *The Book of Mirrors* onto the margin of his own Zohar; see *Shaʿar Maʾamarei Rashbi,* p. 150; Scholem, *Kiryat Sefer* 19 (1942-43): 193. Since his teacher owned this MS, it seems plausible that Luria at some time studied from it. However, the passage cited by Vital is not found in the extant *Book of Mirrors;* see below, § 2.3.

[36]In the colophon (transcribed in the critical apparatus to *MhẒ* 273:12) the scribe writes that he finished the book *be-yom hʾ lʾg ba-ʿomer shenat harʾeni naʾ ʾet kevodekha.* The *gimaṭriyyaʾ* of the dotted letters is 266, corresponding to the year 1506; this is the date recorded on the flyleaf at the beginning of the MS and mentioned by Luzzatto, "Bibliothèque," p. 98. However, in 1506 *Lag ba-ʿOmer* fell on a Tuesday, not a Thursday. The confusion disppears once we realize that the *h* of *harʾeni* stands for 5000, not 5; thus the letters add up to 5261, corresponding to the year 1501, when *Lag ba-ʿOmer* did fall on a Thursday. Cf. Herbert Loewe, "Handlist of the Hebrew and Samaritan Manuscripts in the Library of the University of Cambridge" (unpublished), pp. 39-40; Scholem, *"Peraqim,"* p. 311 and n. 1. For a similar phenomenon see Gottlieb, *Ha-Qabbalah be-Sof ha-Meʾah ha-Shelosh ʿEsreh,* p. 8.

> Blessed be he who reads this and finds a mistake. Do not blame me, for most of the mistakes are from the book that I copied. Thus it appears to me.[37]

The MS has some errors and is occasionally unclear, but on the whole it provides a good text. Scholem based his survey of *The Book of Mirrors* on this MS.[38]

3) Sassoon MS 978. This MS contains 69 folios and extends from *Parashat ʾAḥarei Mot* until the beginning of *Parashat ʾElleh ha-Devarim;* then it breaks off (see *MhZ* 232:23). It was written in the fifteenth century in Spanish cursive script. Parts of the MS are illegible.[39]

4) Jewish Theological Seminary Microfilm MS 1783 (Hyman G. Enelow Collection). This MS contains only 32 ff., breaking off before the end of *Parashat ʾAḥarei Mot.*[40] It was written in the fifteenth century in Spanish cursive script. The MS abounds in mistakes, some of them rather humorous.[41]

5) Jerusalem MS 8° 1958 (formerly Livorno MS 16). This MS contains only 38 ff. It begins at *Parashat Be-Haʿalotekha* and extends until *Parashat Va-ʾEtḥannan* (*MhZ* 156:29; 234:29); then a number of folios are missing and the text continues for a short section near the end of *The Book of Mirrors* (*MhZ* 268:15–270:14). The date of the MS is unknown; it is written in Spanish cursive script.

These five MSS may be divided into two families. The Escorial and Cambridge MSS belong to one family; they are nearly identical in their versions of the text and share certain spelling errors, omissions, and dittographies.[42] The Sassoon, New York, and Jerusalem MSS belong to another family. They coincide on variant spellings and readings and also share mistakes, including omissions due to homoioteleuton.[43]

Of the five MSS, the Escorial and Cambridge MSS are the only ones that extend all the way from *Parashat ʾAḥarei Mot* until the end of the Torah.[44] Of these two, the Escorial MS offers a better version of the text; it is also older and more legible. Therefore it has been selected as the basis for this critical edition.

2.2. Date of Composition

When was *The Book of Mirrors* written? The exact date is not known. We do know, however, that R. David had already written *Sefer ha-Gevul* and his *Commentary on Sefer Yeẓirah,* for he refers to both of these works in *The Book of Mirrors.*[45] On the other hand, he had not yet written *ʾOr Zaruʿa,* for in that work he refers to *The Book of Mirrors.*[46] *The Book of Mirrors* was thus composed in the middle of R. David's literary activity.

[37] Critical apparatus to *MhZ* 273:12. Note the error in the apparatus to *MhZ* 1:21.

[38] *"Peraqim,"* pp. 311-20.

[39] See David Sassoon, *ʾOhel David,* 2:1001-6.

[40] *MhZ* 71:2. One folio (in between 22b-23a) has fallen out of the MS.

[41] See, e.g., the apparatus to *MhZ* 15:21; 18:30.

[42] See, e.g., the apparatus to *MhZ* 43:8,22; 66:19; 154:26; 130:3. On the method of using common mistakes as a criterion for determining the relationship between various MSS see Louis Finkelstein, "The *Mekhilta* and Its Text," *PAAJR* 5 (1933-34): 3-54, especially 17-21.

[43] For variant readings common to the Sassoon and New York MSS see the apparatus to *MhZ* 60:8; 69:11. For those common to the Sassoon and Jerusalem MSS see the apparatus to 166:13; 204:20. For omissions common to the Sassoon and New York MSS see the apparatus to *MhZ* 38:26; 69:22. For those common to the Sassoon and Jerusalem MSS see the apparatus to 189:22; 209:9. The introductory formula *Ve-ʾAzʾl (Ve-ʾAttah ẓarikh la-daʿat)* is consistently rendered by all three MSS: *Ve-ʾAzʾl;* see the apparatus to *MhZ* 12:26; 79:14; 172:23.

[44] On the question of whether *The Book of Mirrors* originally covered the entire Torah see below.

[45] *MhZ* 212:24; 44:21.; cf. 119:9-11.

[46] *ʾOr Zaruʿa,* f. 92b, copied onto the flyleaf of the Cambridge MS of *The Book of Mirrors;* see Scholem, "Peraqim," p. 303, n. 1.

R. David borrows several phrases from *Sefer Taʿamei ha-Miẓvot* by Joseph of Hamadan, which was written no earlier than 1291.[47] He also makes extensive use of Joseph Gikatilla's *Shaʿarei ʾOrah,* which was completed by 1291.[48] *The Book of Mirrors* refers to R. Meir of Rothenburg as deceased: *zʾlʾ;*[49] he died in 1293. The marked influence of Joseph ben Shalom Ashkenazi on R. David suggests that *The Book of Mirrors* was written in the early fourteenth century.[50]

2.3. Was The Book of Mirrors Originally Longer?

The Book of Mirrors is a commentary that seems to begin in the middle of the Torah, at *Parashat ʾAḥarei Mot.* Was the work originally longer, covering the entire Torah?

Turning first to the internal evidence, there are several indications that *The Book of Mirrors* originally comprised a complete commentary. Twice R. David seems to refer to earlier portions. In *MhZ* 128:3 he says:

> *"Ve-ʾAshmah ha-nefesh ha-hiʾ"* (Num 5:6). *Ki ha-ʾasham talui ba-nefesh ha-ḥoṭeʾt she-hiʾ ha-nefesh she-hizkarnu be-sod bereʾshit.*

Do the words *be-sod bereʾshit* refer to an earlier portion of the book that interprets *Parashat Bereʾshit?* The Cambridge and Sassoon MSS read here: *be-seder bereʾshit.* However, R. David may be referring not to a commentary on Genesis but to his work entitled *Maʿaseh Bereʾshit Rabba,* where he mentions *nefesh ha-ḥiyyuni she-ba-galgal.*[51] Several pages later (*MhZ* 133:13) R. David states:

> *Kisseh be-giʾ [be-gimaṭriyyaʾ] sukkah she-hiʾ ha-sukkah she-hizkarnu be-khamah meqomot be-zeh ha-ḥibbur.*

There are only incidental references to *sukkah* in our text (*MhZ* 87:13; cf. 84:7); this line probably refers to earlier sections of *The Book of Mirrors* preceding *Parashat ʾAḥarei Mot.*[52]

The scribe who wrote the Escorial MS apparently had a tradition that the work was originally longer. He begins the book with the title *Parashat ʾAḥarei Mot min Marʾot ha-Ẓoveʾot,* and in the colophon he writes: *Nishlam lequṭot Sefer Marʾot ha-Ẓoveʾot.*[53] However, this evidence is also not conclusive. Our scribe does not name R. David as the author; we cannot be certain that he knew the full story of the text that he was copying. Perhaps he or an earlier scribe was merely struck by the fact that the book begins in the middle of the Torah and therefore added a personal judgment in the title and colophon. It should be noted that the other MSS contain no such statement.

Four of the MSS begin at *Parashat ʾAḥarei Mot.*[54] The Sassoon MS opens: *Be-ʿEzrat YY Ẓevaʾot athil li-khtov Sefer Marʾot ha-Ẓoveʾot;* the New York MS reads: *Sefer Marʾot ha-Ẓoveʾot* (Apparatus to *MhZ* 1:1).

[47] See below, § 2.8.; Alexander Altmann, *"Li-sheʾelat baʿaluto shel S. Taʿamei ha-Miẓvot," Kiryat Sefer* 40 (1965): 276.

[48] See below, § 2.6. In his *Sefer ha-Gevul* R. David also draws on *Shaʿarei ʾOrah;* see Goldreich, *"Sefer ha-Gevul,"* p. 5. Gottlieb proved that Baḥya ben Asher made use of *Shaʿarei ʾOrah* in his *Commentary on the Torah;* see his *Ha-Qabbalah be-Khitvei R. Baḥya ben ʾAsher,* pp. 148-68 (hereafter cited as *R. Baḥya*). The *Commentary* was completed in 1291, which becomes a *terminus ad quem* for *Shaʿarei ʾOrah.*

[49] *MhZ* 190:13; see Scholem, *"Peraqim,"* p. 306. The Sassoon MS omits *zʾlʾ;* it is possible that a later scribe added the formula; cf. Isaiah Tishby, *Sinai* 6 (1945): 163; Scholem, *Ursprung und Anfänge der Kabbala,* p. 352 (hereafter cited as *Ursprung*); Gottlieb, *R. Baḥya,* p. 168, n. 4.

[50] See below, § 2.8.; cf. Scholem, *"Peraqim,"* p. 317; *Major Trends,* p. 188; *Kabbalah,* p. 236; cf. Tishby, *Mishnat ha-Zohar,* 1:112 (Introduction).

[51] Scholem, *"Peraqim,"* p. 310.

[52] Ibid., p. 316.

[53] *MhZ* 1:1; 273:12; cf. above, n. 31.

[54] The Jerusalem MS begins much later; see above, § 2.1.

If we examine the length of each *parashah,* we see that *Parashat ʾAḥarei Mot* extends to seventy pages, while the next longest *parashah* is thirty-one pages, and the average length is ten-and-a-half pages. It seems appropriate that the first *parashah* would be the longest; this is the case, for example, in the Zohar. Furthermore, the title may have some connection with *Parashat ʾAḥarei Mot* (see below, n. 70).

The first fourteen pages of text comprise one long series of Zohar translations; subsequent translations are scattered throughout the book (see the table below, § 2.7.). R. David relies heavily on the Zohar; it would not be unreasonable for him to begin *The Book of Mirrors* in this manner.

However, despite these structural considerations, there is clear external evidence that *The Book of Mirrors* was originally longer. There exist three later quotations of Zohar translations from *The Book of Mirrors* that do not appear in our text. Two of these are found in Meir ibn Gabbai's *ʿAvodat ha-Qodesh* (1568).[55] The other is recorded by both Ḥayyim Vital and his son, Samuel, who learned of the passage from Isaac Luria, who copied out a Zohar translation from *The Book of Mirrors* onto the margin of his own Zohar.[56]

Further evidence comes from an anonymous collection of kabbalistic teachings contained in Sassoon MS 596, which dates from the late fifteenth or early sixteenth century.[57] As one of his selections, the author-editor copies eight pages of a kabbalistic commentary on *Parashat Terumah,* without naming the original author. By examining this passage and comparing it with the extant *Book of Mirrors,* the reader is brought to the conclusion that the commentary on *Parashat Terumah* is a remnant of the complete original text of *The Book of Mirrors.* [58] The parallels in content, language, and method are so close as to leave no doubt.[59] I have therefore added this fragment onto the body of the Hebrew text: *MhZ* 274-82.

At some early date, the first part of *The Book of Mirrors* was lost or destroyed; only a few pages of it survived. Based on the structural considerations noted above, we could hypothesize that R. David composed *The Book of Mirrors* in two halves, our present text representing the second half, a unit in itself. However, since we have hardly any knowledge of the first half of the commentary, such a conclusion is premature; we should content ourselves with the determination that *The Book of Mirrors* was originally longer and probably extended over the entire Torah.

2.4. The Title

The title, *Sefer Marʾot ha-Ẓove ʾot,* is based on Exodus 38:8:

Va-Yaʿas ʾet ha-kiyyor neḥoshet ve-ʾet kanno neḥoshet
be-marʾot ha-ẓove ʾot ʾasher ẓave ʾu petaḥ ʾohel moʿed.

[55] *ʿAvodat ha-Qodesh,* 1:11,24. The passages are translations of Zohar 1:50b-51a.

[56] See the selection from *Derekh ʾEmet* printed in Margaliot's edition of the Zohar, 1:77a. Samuel Vital quotes the same passage in *Shaʿar Maʾamarei Rashbʿi,* p. 150; see Scholem, *Kiryat Sefer* 19 (1942-43): 193.

[57] Sassoon, *ʾOhel David,* 1:427-9.

[58] Scholem pointed this out in *Kiryat Sefer* 10 (1933-34): 170, having seen only the few sentences quoted by Sassoon in *ʾOhel David.*

[59] For parallels in content cf. *MhZ* 275:8 with 81:14; 275:15 with 81:25; 276:4 with 15:23; 278:12 with 19:27; 278:27 with 248-50; 279:12 with 249:24; 282:7 with 104:5. For parallels in language cf. 275:5 with 273:7; 277:21 with 236:3; 277:26 and 281:10 (see the note in the apparatus) with 12:26; 79:14 (see the apparatus and above, n. 43). For parallels in method see 275:4; 276:9; and below, § 2.8.

He made the laver of copper and its stand of copper
from the mirrors of the women who served
at the entrance of the Tent of Meeting.

There is a rich midrashic tradition connected with this verse, of which R. David was certainly aware.[60] The significance of the title, however, is not to be found in the realm of *midrash.* We must examine the use of the phrase *marʾot ha-ẓoveʾot* in medieval literature, especially in Kabbalah, in order to understand its meaning for R. David.

A clue appears in Solomon ibn Gabirol's *Keter Malkhut,* written around the middle of the eleventh century. Describing the state of bliss experienced by souls in "the world that is coming," Gabirol writes:

Ve-Sham maʿamadot u-marʾot
la-nefashot haʿomedot be-marʾot ha-ẓoveʾot
ʾet penei haʾadon li-rʾot u-le-heraʾot. [61]

The *marʾot ha-ẓoveʾot* enable elevated souls to see and be seen by God. They are mirrors reflecting visions of the soul and God back and forth to each other. The word *marʾah* means "mirror" and "vision";[62] the image reminds the reader of another: *ʾispaqlareyaʾ hameʾirah* ("the mirror that shines"), employed in rabbinic literature to describe Moses' prophetic vision.[63] The two phrases are linked in an early kabbalistic text dating from the first third of the thirteenth century:

Z' margaliyyot
ba-hennah u-va-hennah sitrei ha-nevuʾot be-marʾot ha-ẓoveʾot
ve-khol shesh ha-sefirot kulam muẓhavot
ve-khulan mabbiṭim peneihem be-ziv ha-shʿy [ha-shem yitbarakh]
she-hiʾ ʾispaqlareyaʾ ha-meʾirah. [64]

The *marʾot ha-ẓoveʾot* contain prophetic secrets and are connected with the lower *sefirot.* The *sefirot* themselves gaze into the *ʾispaqlareyaʾ ha-meʾirah,* the divine effulgence.

By the thirteenth century the phrase *marʾot ha-ẓoveʾot* described spiritual bliss and prophetic vision. As Kabbalah developed over the next half-century, the *mishkan* was envisaged as an earthly representation of the *sefirot;* [65] within this scheme the *marʾot ha-ẓoveʾot* occupied a specific place.

The sefirotic symbolism of these mirrors is described in the works of two contemporaries of R. David: Joseph ben Ṣhalom Ashkenazi and Joseph Gikatilla. Both of these kabbalists influenced our author (see below, §§ 2.6., 2.8.).

[60] See *Tanḥumaʾ, Fequdei,* § 9; Menaḥem Kasher, *Ḥummash Torah Shelemah,* 23:50-2; cf. Ramban, *Commentary,* on Exod 38:8; Zohar 2:4a. The *Tanḥumaʾ* is one of R. David's main rabbinic sources; see below, § 2.8.

[61] Solomon ibn Gabirol, *Keter Malkhut,* ed. Y. A. Zeidmann, p. 55; see the editor's note.

[62] See Gen 46:2; Num 12:6; Ezek 1:1; 43:3.

[63] BT, *Yevamot* 49b; *Va-Yiqraʾ Rabbah,* 1:14; cf. *Targum Yonatan* on Exod 19:17; the commentary ad loc., printed in the Warsaw (1860-66) edition of *Miqraʾot Gedolot;* Itamar Gruenwald, *"Ha-ʾIspaqlareyah ve-ha-ṭekhniqah shel ha-ḥazon ha-nevuʾi ve-ha-ʾapoqalipṭi, Beit Mikra* 40 (1970): 95-7; Idel, *"Le-Gilguleha shel ṭekhniqah qedumah shel ḥazon nevuʾi bi-ymei ha-beinayim, Sinai* 86 (1979): 1-7. The last two articles discuss gazing into a mirror as a technique for attaining prophetic vision.

[64] *Teshuvat ha-Rav ha-Gaʾon R. Yequtiʾel,* published by Adolf Jellinek, *Beiträge zur Geschichte der Kabbala,* 2:25; see Scholem, *Ursprung,* p. 289, n. 238.

[65] See, e.g., Zohar 2:232a; 3:14a; Gikatilla, *Shaʿarei ʾOrah,* p. 16; Moses de León, *"Sefer ha-Mishqal,"* ed. Jochanan Wijnhoven (Ph.D diss., Brandeis University, 1964), p. 108. Another work by Moses de León is entitled *Mishkan haʿEdut* (Berlin Or. MS 833). See *MhZ* 275:24–276:8; 279:29-32; 280-2. The idea that the structure of the *mishkan* symbolizes the heavenly abode is found in Philo, Josephus, and the Midrash; see Isaac Heinemann, *Philons griechische und jüdische Bildung* (Berlin, 1932), pp. 43-81; E. R. Goodenough, *By Light, Light* (New Haven, 1935), pp. 95-120; Avigdor Aptowitzer, *Tarbiẓ* 2 (1931): 148, 266-72. For a discussion of the transition from these sources to the kabbalistic scheme see Tishby, *Mishnat ha-Zohar,* 2:183-92.

Joseph ben Shalom, in his *Commentary on Sefer Yeẓirah,* states that *Malkhut* contains all of the *mar ʾot ha-ẓove ʾot:*

Ki vah yera ʾu khol ha-mar ʾot ha-ẓove ʾot
ve-khol ha-ʾispaqlarya ʾot ve-khol ha-nimẓa ʾot
ke-derekh she-nir ʾim ha-ẓurot be-ʾispaqlareya ʾ. [66]

Malkhut is a cosmic mirror reflecting all of the higher *sefirot,* the forms of being. Since She contains and displays them, She Herself is called *mar ʾot ha-ẓove ʾot.* [67]

According to Joseph Gikatilla, *mar ʾot ha-ẓove ʾot* refers to the two *sefirot Neẓaḥ* and *Hod.* These mirrors are the source of vision for all prophets except Moses, who connected directly with the higher *sefirah, Tifʾeret: ʾispaqlareya ʾ ha-meʾirah.* [68]

R. David draws on both of these formulations in *The Book of Mirrors.* He says that *Malkhut* contains all of the upper lights, colors, and mirrors:

She-hiʾ keneset yisraʾel she-ha-kol nirʾim bah
ki khol ha-madregot ve-ha-ʾispaqlarya ʾot ve-ha-mar ʾot kullam nirʾim bah. [69]

The phrasing dovetails with that of Joseph ben Shalom. On the other hand, R. David copies Gikatilla in referring to *Neẓaḥ* and *Hod* as *mar ʾot ha-ẓove ʾot.* [70]

In R. David's circle this biblical phrase alluded to prophecy and sefirotic vision. By calling his work *Sefer Mar ʾot ha-Ẓove ʾot,* R. David may be indicating that he too had gazed into the mirrors and wished to record his reflections.

2.5. Literary Structure of The Book of Mirrors

The Book of Mirrors is presented as a commentary on the Torah. To the unsuspecting reader, it appears as a unified whole. Upon analysis, however, we find that the author has combined his own teachings with midrashic and kabbalistic material. Woven together, these strands form a series of complicated patterns. It is often difficult to unravel and identify the individual threads. R. David rarely discloses his sources and sometimes disguises teachings by placing them in the mouth of a talmudic rabbi, his favorite being R. Ḥiyya.[71] This is a clear imitation of zoharic style.

The division into *parashiyyot* is essential for a commentary on the Torah. Yet, at times in *The Book of Mirrors* this division is imposed on the material rather than providing a natural framework for commentary. For example, the beginning of *Parashat Be-Haʿalotekha* interrupts material copied from Todros Abulafia's *Shaʿar ha-Razim* that begins in the preceding

[66] Printed under the name of the Raʾbad, *Sefer Yeẓirah,* p. 30a.

[67] Ibid. Cf. the passage from Joseph's *Commentary on the Book of Psalms,* cited by Scholem, *Peraqim,* p. 296. Moshe Idel has suggested that R. Joseph's use of the phrase is an allusion to a kabbalistic technique of color visualization; see his *"Ha-Shimmush be-ʾorot u-ẓevaʿim bi-tefillat ha-mequbbalim," Proceedings of the Eighth World Congress of Jewish Studies (1981);* cf. *MhẒ* 48:13-5; above, n. 63. Cf. Moses de León's wording: *ha-meʾorot ha-ẓove ʾot* and the context in his *Sheqel ha-Qodesh,* p. 123.

[68] Gikatilla, *Shaʿarei ʾOrah,* pp. 65-6, 70-2. Cf. Baḥya ben Asher, *Commentary on the Torah,* Num 12:6; Moses de León, *Sheqel ha-Qodesh,* p. 58; idem, *Shushan ʿEdut,* pp. 337, 378-9; Zohar 2:257b.

[69] *MhẒ* 15:23; cf. 19:21; 24:9; 93:6.

[70] *MhẒ* 34:17; cf. 104:8. In *"Sefer Taʿamei ha-Miẓvot"* by Joseph of Hamadan (ed. Menaḥem Meier, Ph.D. diss., Brandeis University, 1974), p. 199, *Neẓaḥ* and *Hod* are identified with Aaron's two sons Nadav and Avihu, who were killed (see Lev 10). This interpretation is offered as the kabbalistic meaning of the first verse of *Parashat ʾAḥarei Mot* (Lev 16:1); cf. Altmann, *Kiryat Sefer* 40 (1965): 269. R. David draws from *Sefer Taʿamei ha-Miẓvot* several times; see below, § 2.8. Did this interpretation influence his choice of where to begin the second half of *Sefer Mar ʾot ha-Ẓove ʾot?*

[71] *MhẒ* 33:2; 102:6; 121:32; 236:6. R. David also introduces his own teachings in R. Ḥiyya's name; see below, § 2.8.

portion and resumes following the interruption.[72] Similarly, the title of *Parashat Reʾeh* serves only to break the sequence between two selections from Joseph Gikatilla (*MhẒ* 236:21). Apparently, R. David wanted to include a certain amount of material and felt free to divide it up among different *parashiyyot.* His own teachings, though, are usually based on specific verses or midrashic selections pertaining to each *parashah.* Here the traditional divisions of the Torah provide an organic framework for kabbalistic exegesis.

The Book of Mirrors is a composite work: an anthology of Midrash and thirteenth-century Kabbalah and an original kabbalistic work. We will first identify the kabbalistic sources included in the anthology, then examine the Zohar translations, and finally turn to R. David's own teachings.

2.6. Kabbalistic Sources in the Anthology

R. David copies from the works of at least five well-known kabbalists of the thirteenth century: Ezra and Azriel of Gerona, Todros Abulafia, Joseph Gikatilla, and Moses de León. He does not identify his sources, though once, in quoting from R. Azriel, he begins: *Ve-Raʾiti ʾani be-fei' [be-feirush] qeẓat min ha-mequbbalim* (*MhẒ* 144:6). The talmudic figures R. Ḥiyya and R. Shimʿon are each assigned two of the kabbalists' teachings (*MhẒ* 121:32; 154:13; 236:6; 267:20).

Following is a list of the sources:

	MhẒ
Ezra of Gerona	
Commentary on the Song of Songs [73]	136:2–143:23
	269:14-24
Azriel of Gerona	
Short Treatises [74]	121:32–124:25
	144:6–145:16
	267:20-6[75]

[72] *MhẒ* 156:29. The selection from Abulafia begins at 154:13 and resumes at 158:17; see Scholem, *Peraqim,* p. 317.

[73] *Le Commentaire d'Ezra de Gérone sur le Cantique des Cantiques,* ed. Georges Vajda, pp. 106-37; also published under the name of the Ramban: *Kitvei ha-Ramban,* ed. Ḥayyim Chavel, 2:493-4, 505-18; cf. Scholem, *Peraqim,* p. 316.

[74] Scholem edited these two passages in *Maddaʿei ha-Yahadut* 2 (1927): 231-40; see idem, *Ursprung,* pp. 330-1 and n. 24, where he identifies the author as Azriel. Cf. the selections from Azriel in idem, *"Seridim ḥadashim mi-kitvei R. ʿAzriʾel mi-Gerona," Sefer Zikkaron le-ʾAsher Gulak ve-li-Shemuʾel Klein,* pp. 206, 218-9. R. David's first selection is shorter and in different order than the version published by Scholem in *Maddaʿei ha-Yahadut.*

[75] This passage is a repetition of the first selection under a different pseudonym!

Todros Abulafia
Sha ᶜar ha-Razim [76] 154:13–182:26

Moses de León
Kabbalistic Responsa [77] 146:15–152:30

In the final seventy pages of *The Book of Mirrors* R. David makes extensive use of Gikatilla's *Sha ᶜarei ᵓOrah.* He copies, often at length, from seven of the book's nine chapters; he never mentions his source. The selections cover some sixteen pages of *The Book of Mirrors,* including the entire *Parashat Masᶜei.* At times R. David is careless and forgets to delete phrases such as *kemo she-beᵓarnu* or *kemo she-perashnu.* [78] In Gikatilla's work these phrases refer to earlier chapters; they are quite out of place in *The Book of Mirrors.* Usually, though, R. David is careful to remove such telltale expressions. Once he changes Gikatilla's wording in order to refer to his own writings. [79]

Following is a list of the passages that R. David borrows from *Sha ᶜarei ᵓOrah:* [80]

MhẒ	*Sha ᶜarei ᵓOrah*
206:10-3,18-22	208
207:4-16[81]	201
207:29-31	202
208:1–209:19	202-4
209:22-8	204
209:29–210:3	207-8
210:6–212:6	198-201
212:15-30	208
222:13–223:27	135-7
228:21-9	102
229:13–230:21	159-62
230:22-31	165-6
230:32–231:21	169-70
232:10-3	52
232:14-29	59-60
232:30–234:6	73-4
236:7-16	86
236:17-20	40
236:21-7	42-3
239:17–240:15	111-2
250:8–251:2	105-6
253:25–254:3	147
254:29–255:3	167
255:4–256:20	170-2
261:16–264:11	178-81
264:12-6	185
264:17–267:2	187-9

[76] *Sha ᶜar ha-Razim* is a commentary on Ps 19 extant in Munich MS 209, dated 1298; see Moritz Steinschneider, *Die Hebraeischen Handschriften der K. Hof- und Staatsbibliothek in Muenchen* (Munich, 1895), pp. 90-1. R. David copies most of it, disguising his source. He begins with the words *R. Shimᶜon pataḥ* (*MhẒ* 154:13). Several pages later he interrupts Abulafia's teaching with the beginning of *Parashat Be-Haᶜalotekha;* there now follow two pages of Midrash and Zohar translation corresponding to this *parashah* (*MhẒ* 156:29–158:16), after which Abulafia's text resumes. Later other isolated verses from the *parashah* are grafted onto Abulafia's teachings: *MhẒ* 165:14; 165:29; 168:21; 171:31; 181:13. In three instances R. David inserts his own teachings: 170:7-8; 172:23-6; 178:6-9. Occasionally he adds introductory formulae: 156:25; 170:4,31. At times R. David deletes passages from *Sha ᶜar ha-Razim;* cf. *MhẒ* 161:17; 162:6; 163:7; 164:17,23; 168:21; 181:13 with *Sha ᶜar ha-Razim* (Munich MS 209), ff. 48b-50a; 50a-56a; 57b-65a; 66b-69a; 69a-71a; 75a-76a; 93a-94a.

[77] Moses de León, *Sheᵓelot u-Teshuvot be-ᶜInyenei Qabbalah,* ed. Isaiah Tishby, *Qovez ᶜal Yad,* n.s. 4 (1950): 15-38; cf. Scholem, *Peraqim,* p. 316. R. David's version is shorter and in different order than Tishby's edition.

[78] *MhẒ* 262:11,28; 223:3; corresponding to *Sha ᶜarei ᵓOrah,* pp. 179, 180, 136, respectively. See the curious example at 208:15, where Gikatilla's phrase *kemo she-beᵓarnu be-shaᶜar zeh* is reduced by R. David to *be-shaᶜar zeh* and retained in the sentence.

[79] See *MhẒ* 212:23 (corresponding to *Sha ᶜarei ᵓOrah,* p. 208), where Gikatilla's reference to a future literary project on *Sefirat Keter* is deleted; one line later R. David refers to his own *Sefer ha-Gevul.* Cf. 208:5; 251:2-4 (corresponding to *Sha ᶜarei ᵓOrah,* pp. 202, 106).

[80] *Sha ᶜarei ᵓOrah* (Warsaw, 1883; reprint: Jerusalem, 1960).

[81] Note how R. David blends the first selections into his own commentary.

2.7. Zohar Translations

To the student of Kabbalah, the most significant source of R. David's *Book of Mirrors* is the Zohar. Writing shortly after its composition (see above, § 2.2.), R. David translates numerous Zohar passages from the original pseudo-Aramaic into Hebrew. His renderings are the first lengthy translations of the Zohar. [82] From them one can extract information about the original text of the Zohar. One sees how a Spanish kabbalist read and understood the work and what difficulties he had with its peculiar syntax and language.

In offering his Zohar translations, R. David never mentions his source. [83] He simply presents the material as part of *The Book of Mirrors.* Usually Zohar passages are selected from the *parashah* in the Zohar that corresponds to the *parashah* in *The Book of Mirrors.* In fact the first fourteen pages of the extant *Book of Mirrors* are one long series of Zohar translations from *Parashat ᵓAḥarei Mot.* In later sections R. David does not always hold to this plan.

Following is a list of the translations, which comprise approximately forty pages of *The Book of Mirrors:*

[82] See Scholem, *Kabbalah,* pp. 236, 239; Tishby, *Mishnat ha-Zohar,* 1:112 (Introduction). On R. David's *Sefer ha-Gevul* see above, § 1.2. Around 1290 Baḥya ben Asher translated several Zohar passages in his *Commentary on the Torah;* see Gottlieb, *R. Baḥya,* pp. 167-93. Asi Farber has identified Hebrew Zohar translations in Gikatilla's *Commentary on the Merkavah* and *Sha ᶜarei ᵓOrah;* see *"ᶜIqvotav shel Sefer ha-Zohar be-khitvei R. Yosef G'iqaṭilah," Alei Sefer* 9 (1981): 40-53.

[83] The New York and Sassoon MSS often read *kemo she-katuv ba-zohar* after either the opening lemma or a portion of the translation, deleting the rest; see the apparatus to *MhẒ* 4:31; 13:10,28; 14:17; 79:27; 89:1; 90:1; 91:24; 114:1; 216:32. This formula is the addition of a later copyist, not a source reference by R. David; see Goldreich, *"Sefer ha-Gevul,"* pp. 96-101. The Jerusalem MS often omits the Zohar translations altogether; see the apparatus to 182:27; 191:18; 194:6; 200:13.

MhZ	Zohar
1:2–12:25	3:56a,57b,59a-b, 60a,64a,65a-69b
13:10–14:25	3:69b-70a
32:16-32	3:70a
63:27–64:10	3:76a
70:9–71:25	3:76b-77a
71:26–72:3	3:77a
72:16–74:1	3:78a-b
78:25-9	3:85b
83:15-23	3:88b-89a
86:9-26[84]	3:72a
89:1–90:21	3:91b-92b
90:22-4	2:32a
91:14-23	3:96b
91:24–92:12	3:100b
92:13-25	3:102a
96:17-27	3:104a-b
96:27–97:2	1:220a-b[85]
98:8–99:17	3:104b-105b

201:18–202:3	3:183b
214:3-14	3:206b-207a
214:27–218:9	3:207a-208b
267:27–268:23	*ZḤ* 21a *(MhN)*

[84]This passage is a translation and paraphrase.

[85]In the Cremona edition of the Zohar (1558-60) this section (1:219b-221a) is included in *Parashat ʾEmor* (ff. 50-1, cols. 199-202); cf. the note in the Mantua edition (reproduced in Margaliot's edition), 3:104b.

[86]*Zohar Ḥadash* is cited according to Margaliot's edition (Jerusalem, 1953). All of the passages from *Zohar Ḥadash* transcribed in *The Book of Mirrors* are part of *Midrash ha-Neʿelam (MhN)*, the earliest stratum of the Zohar (see Scholem, *Major Trends in Jewish Mysticism,* pp. 181-6). Their original language is Hebrew, except for the passage in *ZḤ* 8a.

These translations were written soon after the Zohar and thus reflect a valuable early copy of the original. In a number of cases the translations offer a different Zohar reading, not found in any of the printed editions.[87] In a few instances they preserve readings superior to the printed Zohar.[88] Often the translations help the reader determine whether to substitute, delete, or add a variant reading found in the printed editions.[89] Not surprisingly, they support certain readings shared by the Mantua and Cremona editions of the Zohar as against readings found in later editions.[90] In four other instances the reading in *The Book of Mirrors* agrees with the Cremona text as against both the Mantua text and later editions.[91]

A question to consider is whether R. David possessed parts of the Zohar that have since been lost. The Zohar was originally circulated in small portions by Moses de León. Over 250 years later, when the first printed editions were prepared in Mantua and Cremona, the editors assembled whatever MSS were available and tried to produce as full a text as possible. No complete MS of the Zohar existed then; none has been discovered since. It is plausible that certain passages or sections simply did not survive. This hypothesis is strengthened by the fact that several kabbalists contemporaneous with the Zohar, among them Menaḥem Recanati, transmit teachings in the name of the Zohar that do not appear in our printed editions.[92]

Similarly, *The Book of Mirrors* appears to contain a number of passages that read like Zohar translations and yet are not found in the printed editions. Do these represent authentic Zohar passages? One must be cautious here.[93] Most of them are imitations or expansions.[94] The following three selections reveal a Hebrew awkwardness that may betray an Aramaic original: *MhZ* 145:17-21; 157:30–158:2;[95] 196:20-30.[96]

[87]Cf. *MhZ* 9:28; 83:18; 90:19; 98:16; 215:18 with the corresponding Zohar passages.

[88]See *MhZ* 73:18; 99:15; 216:18; and the apparatus; cf. Idel, *"Targumo shel R. David,"* pp. 69-70.

[89]Cf. *MhZ* 8:6; 9:13,17,24; 11:1; 32:21; 70:20; 71:6,19; 72:30,31; 73:20; 89:8; 91:19; 97:2; 99:16; 201:28; 202:3; 217:32 with the corresponding Zohar passages.

[90]See the notes in the apparatus to: *MhZ* 2:8; 7:26; 10:7; 12:18; 70:29; 71:17; 186:2; 201:14; 214:28; 214:31; 215:1.

[91]See the notes in the apparatus to: *MhZ* 6:5; 9:6; 11:10; 96:27; cf. above, n. 85. R. David's *Sefer ha-Gevul* also supports the readings of the Cremona text at times; see Goldreich, *"Sefer ha-Gevul,"* p. 4.

[92]See Scholem, *Kabbalah,* p. 236; Tishby, *Mishnat ha-Zohar,* 1:35,37,109-10 (Introduction).

[93]Scholem originally thought that R. David transmitted many such passages; see *Peraqim,* pp. 302, 312, 315. However, he suggested to me in December, 1975 that I be careful in examining these supposed translations. Certain passages that he had identified as originating from the Zohar actually go back to older rabbinic sources or are R. David's creations.

[94]In the passage beginning at 14:26 R. David employs his favorite pseudonym: R. Ḥiyya. Although the phrase *Heʿemiduhu u-fereshuhu ḥavrayya ʾ* sounds zoharic, R. David's own Hebrew style soon takes over: 15:3: *ʾeḥad mini ʾalef* (cf. 226:31); 15:5: *ha-maḥshavah haʿamuqqah* (cf. 15:28; 39:28). The passage beginning at 68:1 seems to fall into this category too; cf. 79:25 and the apparatus ad loc. The passage beginning on 55:9 is transmitted in the name of R. Elʿazar, and the first line reads like an exact translation of the Aramaic *Hakha ʾ ʾit le-ʾistakkala ʾ be-raza ʾ di-meheimanuta ʾ*. There are also some untranslated Aramaic phrases in the following lines. In l. 11, however, R. David's hand is evident. Cf. 56:19, where Elʿazar's name is invoked to introduce a teaching that is clearly not from the Zohar. See also 57:23-30; 254:22; and below.

[95]Note the word *miyyad* on 157:32 (see below) and the apparatus to 157:30,31. The syntax of the final phrase (158:1-2) is characteristic of the Zohar and foreign to R. David's Hebrew style.

[96]See Idel, *"Targumo shel R. David,"* pp. 84, n. 105; 88-9.

Let us return to the translations of Zohar passages we do possess. R. David is generally loyal to the text of the Zohar. He does, however, introduce certain changes. At times he leaves out names[97] or adds them.[98] He also removes certain narrative sections and discussions between various rabbis.[99] Formulae such as *ve-haʾ ʾoqimnaʾ* and *ke-mah de-ʾoqimna* are often deleted,[100] though R. David occasionally adds phrases such as *Ve-Haven zeh* or *Ve-Dai ba-zeh le-khol mevin.*[101] The translator apparently sought to pare the Zohar's style, remove it from the realm of mystical novel, and integrate it into his commentary.

R. David interprets as he translates: he fills in the context, clarifies expressions, and spells out certain sefirotic allusions of the Zohar; at times he elaborates.[102] His translations are of good quality. Given the difficult syntax of zoharic Aramaic, they are remarkably clear and accurate.[103] Still, the translator ran into some difficulties and in a number of cases misunderstood the Zohar.

At times R. David leaves out difficult words and phrases[104] or copies the original Aramaic, e.g., *zaḥutaʾ*.[105] He can translate too literally, producing an awkward or unintelligible Hebrew phrase, for example, when he renders *laʾ ʾit millah* as *loʾ yesh davar.*[106] Occasionally he misunderstands the syntax of the Zohar.[107] The expression *ke-dein* is almost always translated *miyyad;* its zoharic meaning is *ʾaz.*[108] The root *z-kh-y* is rendered as a noun (meaning *zaddiq*) even when it appears in the Zohar as a verb or adjective.[109] The word *ʾinnun* in the Zohar can mean either "they" or "those"; R. David picks the wrong translation in several cases.[110] The verbs *neṭal, sherei,* and *kenash* are occasionally mistranslated, while the verb *beʿei,* which means both "want to" and "have to," is at times misconstrued.[111]

[97]Cf. *MhZ* 1:22; 4:29; 185:15 with the corresponding Zohar passages.

[98]Cf. *MhZ* 1:28; 32:16; 72:16 with the corresponding Zohar passages.

[99]Cf. *MhZ* 1:18,28; 2:3; 64:10; 92:4,13; 99:2; 215:8; 268:17 with the Zohar. The narrative is retained on 11:18; 92:2; 98:21. In his *Sefer ha-Gevul* R. David consistently deletes zoharic dialogues, names, and connections between homilies; see Goldreich, *"Sefer ha-Gevul,"* pp. 26, 50-62, 101.

[100]Cf. *MhZ* 2:21; 5:32; 12:21; 73:27,29; 91:23; 98:11; 109:15; 115:10; 182:29 with the Zohar; cf. above, § 2.6., regarding similar phrases in Gikatilla's *Shaʿarei ʾOrah.*

[101]*MhZ* 5:32; 6:9; 185:29; 214:29.

[102]Cf. *MhZ* 2:14; 5:26,32; 6:18; 7:4,6,10; 10:15; 11:21; 12:7; 70:26; 89:10,12,16; 115:13; 120:5; 192:32; 196:9-10,16-7; 201:22; 214:10-1; 267:31 with the Zohar. R. David often indicates the name of a particular *sefirah* above a word symbolizing that *sefirah.* These sefirotic identifications are characteristic of his writings and also appear in Joseph ben Shalom Ashkenazi's *Commentary on Sefer Yeẓirah.* There is confusion among the MSS of *The Book of Mirrors* in regard to the identifications. I have not recorded them except in cases where they were already incorporated into the body of the text; see, e.g., *MhZ* 109:115 and the apparatus to 23:29; 35:13,16; 65:18-24. On the identifications see Gottlieb, *Meḥqarim,* p. 249; Goldreich, *"Sefer ha-Gevul,"* pp. 74-8; Idel, *"Targumo shel R. David,"* pp. 63, 72-3. For examples of elaboration see 12:26–13:9; 14:15-17; 70:14-6; 72:3,5-11; 86:9-26; 196:2-6; above, n. 84.

[103]Cf. Scholem, *Peraqim,* p. 302. Goldreich takes a negative view of R. David's ability as a translator; see *"Sefer ha-Gevul,"* p. 38. He notes, however (p. 46), that in *The Book of Mirrors* the translations are of better quality.

[104]Cf. *MhZ* 2:32; 7:17; 92:16; 192:24; 193:3 with the Zohar; see *Peraqim,* p. 315; and *Major Trends,* p. 166, where Scholem notes Moses de León's tendency to coin neologisms with the letters *ṭ, s, q;* cf. Menaḥem Ẓ Kaddari, *Diqduq ha-Lashon ha-ʾAramit shel ha-Zohar,* p. 56 (hereafter cited as *Diqduq*).

[105]*MhZ* 216:1; cf. 9:8; 12:20; Scholem, *Major Trends,* pp. 165; 388, n. 47; 389, n. 49.

[106]*MhZ* 73:32; cf. 98:24; 99:5; 216:2 with the Zohar.

[107]Cf. *MhZ* 10:8-9; 194:9,17 (all involving the preposition *de-*); 4:6 with the Zohar.

[108]*MhZ* 2:25; 6:30; 8:13; 71:9; etc.; see Scholem, *Major Trends,* p. 388, n. 36; Kaddari, *Diqduq,* p. 66. In one case (109:20) R. David translates it correctly.

[109]In *MhZ* 10:28 the zoharic clause *zeʿirin ʾinnun de-zakkaʾin* (3:68b) is translated: *meʿaṭim hem ha-ẓaddiqim;* the correct rendering is: *meʿaṭim hem she-zokhim.* Cf. *MhZ* 11:15 with the Zohar.

[110]In *MhZ* 10:28 the Zohar's clause *ʾanshei shem ʾinnun* (3:176b) is translated: *ʾanshei shem ʾotam;* the correct translation is *ʾanshei shem hem;* cf. *MhZ* 191:30; 217:17 with the Zohar.

[111]*Neṭal* is mistakenly rendered as *nasaʿ* instead of *laqaḥ* several times: *MhZ* 92:8,10,11; 184:8. The two meanings of *sherei* ("dwell, begin") are confused in *MhZ* 4:23, where the Zohar's clause *kad sheraʾn be-ʾarʿaʾ* is translated: *ke-she-hem maṯḥilin ba-ʾarez;* the correct translation is: *ke-she-hayu shorim ba-ʾarez.* Cf. *MhZ* 4:18; 115:20 with the Zohar. The verb *kenash* is sometimes understood as *nikhnas* when *ne-ʾesaf* would be more correct; cf. *MhZ* 200:29; 201:11 with the Zohar. The verb is correctly translated on 201:4; cf. *Targum ʾOnqelos* on Deut 32:50. On *beʿei* cf. 4:32; 32:32; 90:14; and especially 216:5 with the Zohar; cf. 14:5-9; 42:20.

R. David's translations demonstrate how a contemporary kabbalist read, understood, and at times misunderstood the Zohar. The commentator is obviously impressed by the work; yet he does not regard it as dating back to R. Shimʿon bar Yoḥai. Though he usually presents the teachings in their original form, he feels free to delete passages, add pseudonyms, interpretations, and comments, and even insert long elaborations into the text.[112] He also employs R. Shimʿon's name to introduce non-zoharic Spanish Kabbalah (see above, § 2.6.). Such an independent style of translation and editing would be inconceivable for one who believed in the ancient authorship of the Zohar.

The Zohar is important for R. David not because it represents the teachings of R. Shimʿon bar Yoḥai and his circle but rather because it offers him a model for mystical exegesis of the Torah. This will come into sharper focus as we turn to R. David's appearance in his *Book of Mirrors.*

2.8. R. David's Method

In his own parts of the commentary R. David quotes material from the Babylonian and Jerusalem Talmuds, the *Pesiqtot, Sifrei, Bereʾshit Rabbaʾ, Va-Yiqraʾ Rabbah, Be-Midbar Rabbah, Qohelet Rabbah,* and *Tanḥumaʾ*. He refers explicitly to *Midrash Tehillim* (*MhZ* 127:23), *Tanḥumaʾ* (129:30), *Bereʾshit Rabbaʾ* (135:23), and *Be-Midbar Rabbah* (128:1). *Sefer Yeẓirah* is referred to as both *mishnah* and *haggadah.*[113]

His main kabbalistic sources are the Zohar[114] and Joseph ben Shalom Ashkenazi, a contemporary of the author.[115] R. David also draws on *Sefer ha-Bahir* (*MhZ* 15:28; 86:6), Isaac the Blind (15:28; 58:5), Azriel of Gerona (18:32; 52:31), Moses de León's Hebrew writings,[116] and Joseph of Hamadan.[117]

In the extant text of *The Book of Mirrors* R. David's first independent piece appears after more than a dozen pages of Zohar translation.[118] Several features here are characteristic of his teachings in *The Book of Mirrors.* First of all, there is clear imitation of zoharic style: the *ḥavrayyaʾ* are mentioned near the beginning of the passage (*MhZ* 14:28), and the whole discourse is attributed to R. Ḥiyya, a talmudic sage who appears frequently in the Zohar.[119] It is no accident that this teaching appears in the mouth of R. Ḥiyya. Over the next 250 pages, this figure is destined to become R. David's favorite pseudonym.[120] R. David is eager to have his alter ego accepted into the circle of *ḥavrayyaʾ;* he concludes the passage with words of praise

[112]See above; cf. Scholem's comments on Moses de León's method of citing and using the Zohar in his Hebrew writings: *Major Trends,* pp. 196-201; *Qovez ʿal Yad,* n.s. 8 (1976): 327-8.

[113]*MhZ* 14:17; 131:31; cf. 53:2.

[114]See the Index of Sources, s.v. *Zohar.* Sometimes (e.g., *MhZ* 45:28; 48:5; 49:4; 227:25) R. David introduces these teachings with the words *Ve-Zehu sod* or *Ve-ha-Sod ba-zeh.*

[115]See above, § 2.4.; below, §§ 3.2., 3.8. Cf. *MhZ* 18:19; 38:11,14 with Joseph's *Commentary on Sefer Yeẓirah,* p. 10a; *MhZ* 44:21 with *Commentary,* p. 22b; *MhZ* 252:28 with *Commentary,* p. 106b. In his other works too R. David draws on this kabbalist; see above, § 1.2.; Goldreich, *"Sefer ha-Gevul,"* pp. 78, 81, 85-6; Scholem, *Peraqim,* pp. 294, 313, 320, 322-4.

[116]See the Index of Sources, s.v. Moses de León.

[117]See Scholem, *Kabbalah,* p. 60; *Peraqim,* pp, 309, 321; Altmann, *Kiryat Sefer* 40 (1965): 408. R. David appears to borrow several phrases from him: *le-qayyem demut ha-shalshelet* (cf. *MhZ* 28:4 with *Sefer Taʿamei ha-Miẓvot,* p. 439); *le-hishtammesh be-sharviṭo shel melekh* (in a mystical sense; cf. *MhZ* 48:16; 241:9 with *Taʿamei ha-Miẓvot,* pp. 291, 293-4, 434-5); *bein ha-ʾulam ve-la-mizbeaḥ* (in a mystical sense; cf. *MhZ* 202:4 with *Taʿamei ha-Miẓvot,* p. 434). See also *MhZ* 95:25; 110:2; 260:26; and the apparatus.

[118]*MhZ* 14:26–18:8. The passage from 12:26–13:9 is an elaboration on the Zohar.

[119]E.g., Zohar 1:155b, 221b; 2:3b-4a, 14a; 3:44a.

[120]R. Ḥiyya introduces R. David's teachings nine times: *MhZ* 52:13; 60:29; 85:11; 99:18; 100:14; 109:22; 111:31; 127:28. He also introduces a Zohar translation (32:16), several *Tanḥumaʾ* passages (33:2; 102:6; 213:25), and a long quotation from R. Azriel (121:32; cf. 267:20, where the same passage is repeated in the name of R. Shimʿon). R. Shimʿon (93:2) and his son, R. Elʿazar (56:19; 86:5), also introduce R. David's teachings.

from the master, R. Shim ᶜon bar Yoḥai:

> R. Shim ᶜon said to R. Ḥiyya, "You are worthy; everything you have spoken is fine. The Ancient-of-Days will watch over you!"[121]

Having set the stage with a series of Zohar translations, R. David now adopts zoharic style. The master has given his imprimatur; R. David dives into kabbalistic exegesis. He comes back to the surface often, however: over the next one hundred pages, *The Book of Mirrors* alternates between translations of Zohar and R. David's teachings. Apparently the author still needs the support and example of R. Shim ᶜon.[122]

Returning to R. Ḥiyya's opening discourse, we note another feature that typifies R. David's method. The verse expounded by R. Ḥiyya (Qoh 9:2) is not quoted in any of the preceding Zohar translations. R. David copied it from the beginning of *Midrash Tanḥuma* ᵓ on *Parashat* ᵓ*Aḥarei Mot.* Throughout *The Book of Mirrors* he turns back to the *Tanḥuma* ᵓ, sometimes for isolated verses,[123] more often for passages of midrash.[124] He builds his commentaries on these verses and passages.[125] Usually he quotes from the section of the *Tanḥuma* ᵓ corresponding to the *parashah* that he is interpreting.[126] Often he distinguishes his mystical interpretation from the *Tanḥuma* ᵓ by introducing the former with the phrase ᵓ*Aval sod ha-davar* [127] or his favorite expression: *Ve-*ᵓ*Attah ẓarikh la-da* ᶜ*at;* [128] sometimes the interpretation is wedded to the text.[129]

As *The Book of Mirrors* proceeds, R. David gradually relies less on the *Tanḥuma* ᵓ and comments directly on verses from the Torah.[130] He occasionally connects each word in a verse with a particular *sefirah* [131] and does not hesitate to offer different interpretations of the same word, identifying it first with one *sefirah,* then with another.[132] He is especially attracted to personal names and their sefirotic correspondences.[133] In one passage he offers this view of mystical exegesis:

> All the names in the entire Torah refer to a supreme secret. If all the oceans were ink, every person a scribe, and earth and heaven sheets of parchment, it would still be impossible to write even one-thousandth of what should be written for every single verse of the Torah.[134]

[121] *MḥZ* 18:7-8; cf. Zohar 3:129b (ᵓ*Idra* ᵓ *Rabba* ᵓ*): Amar R. Shim* ᶜ*on: "Ya*ᵓ*ut hu* ᵓ *ve-*ᶜ*Attiq Yomin yifqaḥ* ᶜ*eina* ᵓ *da* ᵓ ᶜ*alakh be-sha*ᶜ*ata* ᵓ *de-tiẓterikh leih."* In *Sefer ha-Gevul* (Jerusalem MS 8° 3921), f. 31a R. David omits this sentence when translating this section of the ᵓ*Idra* ᵓ *Rabba* ᵓ*;* see Goldreich, *"Sefer ha-Gevul,"* pp. 51, 59. The phrase "Ancient-of-Days" derives from Dan 7:9 and here designates Keter; cf. *Sha*ᶜ*arei* ᵓ*Orah,* p. 211.

[122] Gradually a more independent attitude appears. In *MḥZ* 90:25, after translating Zohar for three pages, he begins his own teaching with: ᵓ*Aval ba*ᵓ*ti le-hodi*ᶜ*akha.* On 119:5-12, leading up to a translation from *Midrash ha-Ne*ᶜ*elam,* he alludes to three of his works and refers to them obliquely as *ne*ᶜ*elamim.* Later kabbalists were convinced that R. David's creations were part of *Midrash ha-Ne*ᶜ*elam;* see below, § 2.9.; cf. Scholem, *Major Trends,* p. 393, n. 104. For other examples of zoharic imitation see idem, *Kabbalah,* pp. 59-61; Tishby, *Mishnat ha-Zohar,* 1:39-40 (Introduction).

[123] *MḥZ* 14:26; 251:5. On 236:6-20 he cites one verse from the *Tanḥuma* ᵓ on *Parashat* ᶜ*Eqev,* adds R. Ḥiyya's name, and then copies two passages from *Sha*ᶜ*arei* ᵓ*Orah;* this brief mélange is all there is to R. David's commentary on the *parashah.*

[124] *MḥZ* 18:9; 22:1; 33:1; 101:4; 112:13; see Index of Sources, s.v. *Tanḥuma* ᵓ.

[125] Sometimes (e.g., *MḥZ* 186:5ff.; 187:11ff.) R. David copies out a *Tanḥuma* ᵓ passage without adding a mystical interpretation; he then proceeds to interpret verses from the *parashah.*

[126] For exceptions to this norm see *MḥZ* 34:9; 108:21; 112:13.

[127] *MḥZ* 21:6; 34:13; 108:24; cf. the zoharic expression *raza* ᵓ *de-millah.*

[128] *MḥZ* 33:15; 79:14; 271:1.

[129] *MḥZ* 20:18ff.; 24:26ff.; 251:5ff.

[130] This transition is quite apparent in *Parashat* ᵓ*Emor.*

[131] *MḥZ* 40:23; 93:2; 190:22; 223:32; cf. David ibn Zimra, *Migdal David,* p. 23c.

[132] *MḥZ* 34:20,23; 39:8,11; 52:17,22; 81:13,25; 85:19,22; 87:5,17; 110; 112-3; 117:9,11; 189:22,24; 221:6,8; 243:26,31. In these cases R. David often employs the expression *d"*ᵓ*a [davar* ᵓ*aḥer].*

[133] *MḥZ* 117:14; 224:4; 226:2-7.

[134] *MḥZ* 226:29; cf. ᵓ*Aqdamut Millin;* BT, *Shabbat* 11a.

The Book of Mirrors is punctuated with a tone of urgency, with the frequently recurring *Ve-*ᵓ*Attah ẓarikh la-da* ᶜ*at,* "You must realize...."[135] In the words of Moses de León, "Only recently has this spring of mystery begun to flow through the land." R. David is one of those who feels impelled to reveal some of the secrets: "But I will lead you into the depth of this secret...." (*MḥZ* 114:4); "But I have come to arouse your awareness *[le-*ᶜ*orerekha]* ...."[136]

The kabbalist is aware of the esoteric nature of his material and the delicacy of his role as interpreter and guide. At times he provides only hints and then says: "If you are among those who understand, a little hint is sufficient."[137] At one point he refers to the dangers of mystical search.[138] He knows "there are things grasped and attained by thought that the mouth cannot express."[139] Nevertheless, R. David is eager to transmit what he can express and what he feels permitted to reveal. His eagerness to publicize the secrets leads him, as we have seen, to cull material from a number of kabbalists. The charge of plagiarism is not relevant; it was common practice among medieval authors to borrow without mentioning the source.[140] R. David's sense of mission is not limited to his own formulations; he employs the phrase *Ve-*ᵓ*Attah ẓarikh la-da* ᶜ*at* to introduce the teachings of others too.[141] He feels free to copy their words, which flow from the same source as his, the *ma* ᶜ*ayan ha-sod* that has recently overflowed.

2.9. References to The Book of Mirrors in Kabbalistic Literature

The following list of authors who cite *The Book of Mirrors* is undoubtedly incomplete and can be supplemented once more kabbalistic works of the fourteenth-sixteenth centuries have been edited.[142]

Abraham Adrutiel, in his ᵓ*Avnei Zikkaron* (written in the first half of the fifteenth century), quotes three passages from *The Book of Mirrors,* two of which appear in the extant text.[143]

An anonymous work entitled *Pardes ha-Ḥokhmah* quotes one of the same passages.[144]

[135] *MḥZ* 12:26; 33:15; 76:26; 79:14; 81:25; 85:4; 100:21; etc. The phrase is found in numerous contemporary texts, but R. David employs it with fervor; see below.

[136] *MḥZ* 187:18; cf. 208:5; 229:23; Scholem, *Major Trends,* p. 388, n. 39. The quotation from Moses de León is from *Sefer ha-Mishqal,* p. 137: *Mi-yamim mu* ᶜ*aṭin nitpashsheṭ me-*ᶜ*inyan ha-sod ha-zeh ba-*ᵓ*arez* The Basle (1608) edition reads: *nitpashsheṭ ma* ᶜ*ayan ha-sod.* Cf. *Sefer ha-Mishqal,* p. 93: *Ve-Sod sitrei ha-ḥakhmah meḥayyevet be-gillui me* ᶜ*aṭ min ha-nistarot.*

[137] *MḥZ* 243:15; cf. 236:30—237:3; 272:21; below, § 3., passim; Zohar 3:105b; and the remark by the sixteenth-century kabbalist Shim ᶜon Labi, who, after transmitting a teaching on the original nature of Adam, writes: *Ve-Lo* ᵓ *ᵓukhal le-haṛḥiv bo ki khen ẓuvveiti* (*Ketem Paz,* p. 121b).

[138] *MḥZ* 119:5-12; cf. Moses de León's words of caution in *Shushan* ᶜ*Edut,* p. 347.

[139] *MḥZ* 181:15 (from Todros Abulafia's *Sha*ᶜ*ar ha-Razim*).

[140] See Scholem's comments in *Madda* ᶜ*ei ha-Yahadut* 2 (1927): 238, n. 8.

[141] Todros Abulafia: *MḥZ* 155:1; 156:25; 170:4; 172:9. Gikatilla: 210:14; 212:26; 230:24,30; 232:14; 262:14. Cf. *MḥZ* 174:6 with *Sha*ᶜ*ar ha-Razim* (Munich MS), f. 83a; and 170:10 with *Sha*ᶜ*ar ha-Razim,* f. 78a; here R. David deletes Abulafia's words of hesitation and inserts: *Ve-*ᵓ*Attah ẓarikh la-da* ᶜ*at.*

[142] See, e.g., Idel, *"*ᶜ*Od* ᶜ*al R. David ben Yehudah he-Ḥasid ve-ha-*ᵓ*Ari," Da* ᶜ*at* 7 (1981): 71, who notes that Ovadiah Hamon of Ẓefat draws on *The Book of Mirrors* several times in Oxford MS 1597.

[143] See Scholem, *Kiryat Sefer* 6 (1929-30): 269-70. The first passage is a discourse on the *Shemiṭṭot* (*MḥZ* 102:9—103:12; ᵓ*Avnei Zikkaron* [British Museum, Gaster MS 956], f. 50b). The others are interpretations of *Ha-Yesh bah* ᶜ*eẓ* ᵓ*im* ᵓ*ayin* (Num 13:20; not found in the extant *Book of Mirrors*) and *YHVH* ᵓ*ori ve-yish*ᶜ*i* (*MḥZ* 68:19—70:8; ᵓ*Avnei Zikkaron,* [Jerusalem MS 8° 404], ff. 76b-77b). The first passage is introduced by Adrutiel with these words: *U-Mah she-*ᵓ*aḥz"l [she-*ᵓ*ameru ḥakhameinu zikhronam li-verakhah] be-Midrash ha-Ne*ᶜ*elam be-Mar*ᵓ*ot ha-Ẓove*ᵓ*ot;* the other two are also cited from *Midrash ha-Ne*ᶜ*elam,* though all three passages are R. David's creations. Adrutiel was convinced by R. David's imitations of the Zohar.

[144] *Pardes ha-Ḥokhmah* (Oxford MS 1919), f. 17a, citing *MḥZ* 68:19ff.; cf. Scholem, *Peraqim,* p. 314; Idel, *"Targumo shel R. David,"* p. 91.

Meir ibn Gabbai, in *ʿAvodat ha-Qodesh* (1568), quotes two Zohar translations from *The Book of Mirrors,* neither of which appears in the extant text.[145]

David ibn Zimra, who owned the MS later housed in the Escorial (see above, § 2.1.), quotes *The Book of Mirrors* eleven times in his *Migdal David.* All of the citations are found in the extant text.[146]

Solomon Alkabez, in his *Berit ha-Levi,* cites one Zohar translation and one of R. David's teachings from *The Book of Mirrors;* both are found in the extant text.[147]

Moses Cordovero, a student of Alkabez, refers to *The Book of Mirrors* several times in his writings, though he misnames the author.[148]

Ḥayyim Vital and his son Samuel record a Zohar translation from *The Book of Mirrors* that does not appear in the extant text; they learned of the passage from Isaac Luria (see above, n. 56).

Two anonymous kabbaistic compositions from the sixteenth or seventeenth century cite passages from *The Book of Mirrors.* One is an anthology of short kabbalistic works contained in Sassoon MS 919 that includes three selections.[149] The other is a Moroccan commentary on the liturgy, found in Sassoon MS 921, that cites one selection.[150] All of these appear in the extant text.

None of these writers mentions R. David; apparently by the middle of the fifteenth century, his name was no longer associated with the work. *The Book of Mirrors* and its Zohar translations were studied by Cordovero and Luria, but they were not aware that the author was David ben Yehudah he-Ḥasid. In adopting the pseudonym of R. Ḥiyya, he had hidden his identity too well.

[145] *ʿAvodat ha-Qodesh,* 1:11,24, citing translations of Zohar 1:50b-51a; see above, § 2.3. The first passage is introduced with these words: *U-ve-Sefer Marʾot ha-Ẓoveʾot be-ʿinyan ha-yiḥud ve-huʾ mi-Midrasho shel Rashbʿi [R. Shimʿon bar Yoḥai].*

[146] *Migdal David,* p. 3a (quoting *MhZ* 101:31–102:3); 7d (68:1-18); 17d (103:27–104:24); 20c (153:9-21); 22a (102:19-22); 23b-c (112:23–113:12); 32b (1:22-8 [a Zohar translation]); 35d (132:12-9); 37a (252:9ff.); 56b (164:4-10); 65a (116:15-21). After the passage cited on p. 23b-c Ibn Zimra writes: *ʿAkʿl [ʿAd kaʾn leshon] Marʾot ha-Ẓoveʾot ve-nirʾeh she-huʾ min ha-Midrash ha-Neʿelam.*

[147] *Berit ha-Levi,* pp. 7c, 21a (quoting *MhZ* 1:13ff. [a Zohar translation]; 80:8ff.

[148] In *Shiʿur Qomah,* p. 80, he gives the author's name as R. Isaac. He refers to the work in his commentary on the Zohar (see *ʾOr ha-Ḥammah,* p. 44c) and in his *Commentary on the Song of Songs* (Jerusalem MS 4° 74), f. 94a; see Scholem, *Peraqim,* p. 325.

[149] The MS is described in *ʾOhel David,* p. 1012. One passage (*MhZ* 240:4-18) appears on p. 72, and two others (236:28–237:16; 252:2-21) on p. 49, where *The Book of Mirrors* is ascribed to Joseph Gikatilla; the editor or his source was misled by R. David's widespread use of *Shaʿarei ʾOrah.*

[150] See *ʾOhel David,* p. 895. The selection is from *MhZ* 90:25–91:23 and appears on ff. 146b-47a of the MS.

3. ASPECTS OF R. DAVID'S KABBALAH

3.1. A Name for the Infinite

ʾEin Sof, the Infinite, is referred to by R. David as *ʿIllat ha-ʿIllot, causa causarum.*[151] It is beyond the scope of human comprehension and is "the most hidden" (*MhZ* 53:20; 224:19). The Infinite must include the entire universe: R. David applies to it the midrashic statement "He includes the world; the world does not include Him."[152] The ten *sefirot,* which flow out of the Infinite, remain united with it "because that which is emanated is not separate from the Emanator."[153]

The Infinite cannot be described or named; some kabbalists held the view that *ʾEin Sof* is not mentioned or even alluded to in the Bible.[154] R. David, however, identifies certain words and names in the Torah as referring to *ʿIllat ha-ʿIllot* (*MhZ* 53:19; 84:2; 87:24). In one passage (227:15-23) he discusses the difference between the Infinite and the ten *sefirot:*

> *"Ben Menasheh"* (Num 27:1) alludes to *ʿIllat ha-ʿIllot,* who is called Menasheh. Why is *ʿIllat ha-ʿIllot* called Menasheh? Because He is a place to which forgetting and oblivion *[nishshayon]* pertain, as in the expression "For God has made me forget" *[ki nashshani ʾelohim]* (Gen 41:51).
>
> Why? Because concerning all the levels and sources (the *sefirot*), one should search for their reality from the depth of Supernal Wisdom. From there it is possible to understand one thing from another.[155] However, concerning *ʿIllat ha-ʿIllot,* there are no aspects (lit., "sides") anywhere to search, to probe; nothing can be known of Him; for He is hidden and concealed in the mystery of Absolute Nothingness.[156]
>
> Therefore forgetting pertains to Him, as regards comprehension of this place. So open your eyes and see this great and awesome secret. Happy is he whose eyes shine from this secret, in this world and the world that is coming.

The Infinite cannot be comprehended; it is inaccessible to the human mind. The language is cryptic, however. Why the word "forgetting"? What is forgotten? A lack of knowledge is different than forgetting. What is the great and awesome secret that enlightens the adept? Is it simply recognizing that there are limits beyond which human knowledge cannot advance?

Perhaps R. David is indicating a more profound truth. The *sefirot* are stages of contemplative ascent; each of them serves as an object and focus of mystical search. In tracing the reality of each *sefirah,* the mystic uncovers layers of being within himself and throughout the

[151] *MhZ* 44:26. The phrase entered medieval Hebrew through the translations of Judah ibn Tibbon; see, e.g., *Ḥovot ha-Levavot, Shaʿar ha-Yiḥud,* chap. 2. R. Abraham ben David and other Provençal kabbalists employ it, as does the author of *Raʿaya Meheimnaʾ* and *Tiqqunei Zohar,* though the Zohar itself avoids it; see Scholem, *Ursprung,* pp. 187, 197; Tishby, *Mishnat ha-Zohar,* 1:100,112; cf. Moses de León, *Shushan ʿEdut,* p. 337; Zohar 1:72b. R. David may have picked up the phrase from Joseph ben Shalom Ashkenazi; cf. the latter's *Commentary on Sefer Yeẓirah,* pp. 53, 55.

[152] *Bereshit Rabbaʾ* 68:9, pp. 777-8; *MhZ* 124:28.

[153] *MhZ* 131:4; cf. Ramban's *Commentary* on Num 11:17: *ʾAẓilut be-khol maqom leshon ʿiqquv.*

[154] See the statement by the anonymous author of *Maʿarekhet ha-ʾElohut,* p. 82b: *Ve-Daʿ ki ha-ʾein sof ʾasher zakharnu ʾeinennu ramuz loʾ va-torah ve-loʾ va-nevi ʾim ve-loʾ va-ketuvim ve-loʾ ve-divrei rzʿl, ʾakh qibbelu vo va ʿalei ha-ʿavodah qeẓat remez.*

[155] *Mevinin davar mi-tokh davar.* In BT, *Ḥagigah* 14a this kind of understanding defines a *navon;* cf. *Shabbat* 31a. Isaac the Blind (ca. 1160-1235) alters the wording to *hitbonenut davar mi-tokh davar* in describing contemplative vision of the *sefirot;* see his *Commentary on Sefer Yeẓirah* (appendix to Scholem, *Ha-Qabbalah be-Provans*), p. 5. Azriel of Gerona employs a similar phrase in his *Shaʿar ha-Kavvanah;* see Scholem, "Der Begriff der Kawwana in der alten Kabbala," *MGWJ* 78 (1934): 511-2; *Ursprung,* pp. 368-71. Gikatilla employs the phrase in the closing lines of *Shaʿarei ʾOrah* (p. 197). In all these instances *davar* implies *sefirah;* see *Ursprung,* pp. 233, 388; Tishby, ed., *Perush ha-ʾAggadot le-Rabbi ʿAzriʾel,* pp. 35, 107, 110 (hereafter cited as *Perush ha-ʾAggadot*); *MhZ* 119:22.

[156] *Be-Sod ha-ʾayin ve-ha-ʾefes;* cf. *MhZ* 44:27. On the concept of *ʾayin* see Scholem, *Ursprung,* p. 178; *Major Trends,* pp. 217-9; *Kabbalah,* pp. 94-5; *Ueber einige Grundbegriffe des Judentums,* pp. 53-89 (hereafter cited as *Grundbegriffe*).

cosmos. This is the knowledge that the kabbalist strives for, supernal wisdom. However, there is a higher level, a deeper realm, beyond this step-by-step approach. At the ultimate stage the kabbalist no longer understands one thing from another. Discursive thought, with all its distinctions and connections, is annihilated;[157] the term knowledge no longer applies.[158] Here the mystic stands at the mouth of the abyss and confronts absolute nothingness, the stark swirl of being. Overwhelmed, he forgets everything finite and specific, including his ego. Oblivion is the only word that pertains.[159]

The kabbalist returns to the finite. His experience cannot be expressed, communicated, or fully recalled. In this sense too "forgettting pertains to Him, as regards comprehension of this place." Nevertheless his eyes shine from the secret; he has caught a glimpse of the Infinite.

3.2. ʿIllat ha-ʿIllot and Keter

The relationship between *ʾEin Sof* and *Keter* was a controversial topic among kabbalists of the late thirteenth and early fourteenth centuries. Some identified the two, while others held that *Keter* was a distinct *sefirah* emanated from *ʾEin Sof.*[160] In the Zohar *ʾEin Sof* and *Keter* are not identical; yet unlike the other *sefirot, Keter* is never described as emanating from *ʾEin Sof. Keter* and *ʾEin Sof* are coeternal.

In R. David's scheme *ʿIllat ha-ʿIllot* is beyond *Keter.*[161] However, they are described together as "hidden and secret" (*MhZ* 224:26), as the "two depths" (*MhZ* 53:19); they stand over against the lower *sefirot* as kings and elders (*MhZ* 23:15; 258:3). Twice in *The Book of Mirrors* R. David says of these two realms: "There is no difference between the cause and that which is caused except that one is the cause and other, caused. He who is enlightened *[ha-maskil]*[162] will understand and hold his silence before God."[163] The primal cause is by definition prior to *Keter;* yet the two realms are otherwise identical. *Keter* is the aspect of the Infinite that reveals itself. It "causes its goodness and love to flow out from *ʿIllat ha-ʿIllot,* from the channel of the secret, hidden pool" (*MhZ* 114:13). *ʿIllat ha-ʿIllot* is the hidden root of emanation; *Keter,* the subtle beginnings of growth. *Keter* "is bound in the bond of *ʿIllat ha-ʿIllot,* for there is no separation or division there; all is completely whole" (*MhZ* 98:1). *Keter,* in fact, shares in the designation *ʾEin Sof* when the flow of emanation is described.[164]

[157] Azriel speaks of the annihilation of thought *(ʾafisatah)* that occurs at the highest levels of contemplation. He calls *Keter: ʾafisat ha-maḥshavah;* see *Perush ha-ʾAggadot,* pp. 40, 116; Scholem, *Teʿudah ḥadashah le-toledot reʾshit ha-qabbalah," Sefer Bialik,* p. 160; idem, *Reʾshit ha-Qabbalah,* pp. 116-7. Moses de León employs the phrase in *Shushan ʿEdut,* p. 334; cf. *MhZ* 279:6-8.

[158] Isaac the Blind says that the essence of being cannot be known, only imbibed; see Scholem, *Ursprung,* pp. 246-7; and Isaac's *Commentary on Sefer Yeẓirah,* p. 1: *Ve-Hen havayot penimiyyot ve-daqqot, ʾein beriyyah yekholah le-hitbonen ʾella ʾ ha-yoneq mimmennah she-huʾ derekh hitbonenut derekh yeniqato ve-loʾ derekh yedi ʿah.*

[159] Cf. the statement by the ninth-century Sufi Abu Yazid al-Bistami: "When He brought me to the brink of divine unity, I divorced myself and betook myself to my Lord, calling upon Him to help me. 'Master,' I cried, 'I beseech Thee as one to whom nothing else remains.' When He recognized the sincerity of my prayer and how I had despaired of myself, the first token that came to me proving that He had answered this prayer was that He caused me to forget myself utterly and to forget all creatures and dominions" (al Sahlaji, *Kitab al-Nur* [ed. Badawi], p. 119; translated in Arthur J. Arberry, *Revelation and Reason in Islam* [London, 1957], p. 96). On the doctrine of *fanaʾ,* developed by Abu Yazid, see Annemarie Schimmel, *Mystical Dimensions of Islam,* pp. 47-8, 142-5.

[160] See Tishby, *Mishnat ha-Zohar,* 1:107-11; Scholem, *Kabbalah,* p. 51.

[161] *MhZ* 235:4-7; cf. *Sefer ha-Gevul,* f. 27b: *Keter ʿelyon she-huʾ neʾeẓal me-ʿillat ha-ʿillot.* Cf. Joseph ben Shalom Ashkenazi, *Commentary on Sefer Yeẓirah,* p. 55; Goldreich, *"Sefer ha-Gevul,"* p. 86.

[162] Cf. Daniel 12:3; *Bahir,* § 139 (Scholem, *Das Buch Bahir,* § 95; idem, *Ursprung,* p. 172); Zohar 1:15a; 2:2a,23a.

[163] *MhZ* 80:11; cf. 131:15; 224:19; Joseph ben Shalom Ashkenazi, *Commentary on Sefer Yeẓirah,* 2c; 28b.

[164] *MhZ* 129:3,11; 131:8; cf. Gikatilla, *Shaʿarei ʾOrah,* p. 63; Goldreich, *"Sefer ha-Gevul,"* pp. 86-8.

3.3. The Ten Ẓaḥẓaḥot

The first hints of emanation appear within *Keter;* on this most Spanish kabbalists agree (see, e.g., Zohar 1:15a). R. David holds a theory concerning these primordial stages that is barely mentioned before him and that reappears in different form in fifteenth-and-sixteenth-century Kabbalah. This is the doctrine of the ten *ẓaḥẓaḥot,* dazzling lights that precede the emanation of the *sefirot.*

It is difficult to ascertain from whom R. David acquired this theory. His formulations on the ten *ẓaḥẓaḥot* are usually brief and obscure. A similar theory may be referred to by Isaac the Blind in his *Commentary on Sefer Yeẓirah* (p. 3):

Ve-ha-Devarim yesh lahen middot ve-shiʿur
ʾukh ha-maḥshavah ʾein lah shiʿur
u-lekhakh ḥolekhot be-ʿeser ʿeser
lefikhakh min ha-daqqot ha-reshumot
kiʿ ʿeser me-ʿeser
daqqot mi-penimiyyut ha-daqqot.

In his analysis of this passage, Scholem wonders whether Isaac is referring to a secret decade within *Maḥshavah (Keter)* that represents a prior stage of emanation.[165]

In a responsum written in Provence shortly after Isaac's commentary, though attributed to Hai Gaon, it is stated that above all the *sefirot* there exist three hidden lights: *ʾor penimi qadmon, ʾor mezuḥẓaḥ,* and *ʾor ẓaḥ.* These constitute one essence and precede the emanation of the *sefirot.*[166]

In the extant *Book of Mirrors* R. David refers to the ten *ẓaḥẓaḥot* eleven times. Two of the references consist of no more than the phrase itself and a proof text from Isaiah 58:11: *Ve-Hishiʿa be-ẓaḥẓaḥot nafshekha* (*MhZ* 24:31; 68:12). Several of the other passages are also cryptic. By fitting the pieces together, we can construct a coherent picture of R. David's speculation.[167]

The ten *ẓaḥẓaḥot* are parallel to the ten *sefirot:*

> *"ʿAsser teʿasser"* (Deut 14:22). Why two times [the root *ʿsr*]? Because here lies a deep, hidden secret that the mouth cannot speak nor the ear hear. You already know that *ʿasser* alludes to the ten lower *[sefirot].* Until here I have permission to explain. If you are one of the enlightened, you will understand this great secret, utilizing your intellect to its fullest; you will surely not let it out of your mouth.... [*MhZ* 236:29–237:3]

The ten *sefirot* are lower than the ten *ẓaḥẓaḥot,* which in another passage are called "ten upper *sefirot*" (*MhZ* 100:18). The ten *ẓaḥẓaḥot* are located in *Keter* and are said to belong to it. As opposed to the lower *sefirot,* "You cannot comprehend anything about the ten *sefirot* of *Keter ʿElyon*" (*MhZ* 252:16).

The role of the ten *ẓaḥẓaḥot* is clarified in another passage:

> "God's words are pure words" (Ps 12:7). The secret is that these are the ten statements by which the world was created. These statements are ten inner, hidden levels, namely, ten *ẓaḥẓaḥot* expanding within *Keter ʿElyon*.... By these ten statements all existence was created. Everything that emanates from *Keter ʿElyon* and below is drawn forth and emerges from these ten springs. Therefore it is written: "God's words are pure words." [*MhZ* 81:4-11]

The ten *ẓaḥẓaḥot* are the source of emanation within *Keter;* they give rise to the *sefirot* and then to all created being.

[165] *Ursprung,* pp. 240-3.

[166] The responsum is translated and discussed by Scholem in *Ursprung,* pp. 308-14; cf. idem, *Kabbalah,* pp. 95-6. R. David copies several lines of it as part of his selection from Todros Abulafia's *Shaʿar ha-Razim: MhZ* 170:15.

[167] Moshe Idel has published a responsum by R. David that sheds more light on the theory and indicates the anthropomorphic structure of the *ẓaḥẓaḥot;* see his *"Demut ha-ʾadam she-meʿal ha-sefirot," Daʿat* 4 (1980): 41-55.

The theory of the ten *ẓaḥẓaḥot* was debated in fifteenth-and-sixteenth-century Kabbalah.[168] In Cordovero's system it was supplanted by the doctrine of three *ẓaḥẓaḥot,* which exist within *ʾEin Sof.* [169] Moshe Idel has suggested that R. David's formulation contributed to Luria's conception of *ʾAdam Qadmon.* [170]

Why is R. David so secretive about the ten *ẓaḥẓaḥot?* There are a number of factors involved. Since the theory describes the subtle beginnings of emanation, he probably felt that it was too delicate to expose. As he often writes in *The Book of Mirrors: Kevod ʾelohim haster davar* (Prov 25:2).[171] There are few explicit references to the ten *ẓaḥẓaḥot* in this period;[172] R. David may have imposed self-censorship in order to avoid criticism. Finally, his own contemplative vision was inseparable from his theorizing; he would have been hesitant to publish the intimate details of his mystical experience.[173] Striving to discover the roots of emanation, R. David was dazzled by ten flashes. He connected his experience to, or was guided to it by, Isaiah 58:11, which now meant: "He will refresh your soul with *ẓaḥẓaḥot.* "

3.4. Keter as Maḥshavah

Keter is the vessel through which all emanation proceeds. R. David calls it by many names: the spring of the stream, the spring of the highest river, the highest pool, the highest river whose waters never cease.[174] He also applies to it the more standard kabbalistic expressions Will and Nothingness.[175] His favorite designation of *Keter* is *ʿolam ha-maḥshavah,* "the world of thought."[176] The variations include: the deep thought, the high secret of thought, the thought of the hidden, and the quality of thought.[177]

This designation has a history. In *Sefer ha-Bahir,* edited in Provence in the late twelfth century, *Maḥshavah* is the name for *Keter.* [178] Isaac the Blind adopted this view,[179] but as Kabbalah spread from Provence to Spain, a change occurred. Certain kabbalists of the Gerona school, among them R. Azriel, applied the designation *Maḥshavah* to the second *sefirah: Ḥokhmah.* [180] For them, *Raẓon* (Will) occupied prime position. The prominence accorded the

[168]Judah Ḥayyat, in his commentary on *Maʿarekhet ha-ʾElohut,* speaks of ten *ziḥẓuḥim* within *ʾEin Sof* and three within *Keter;* see *Maʿarekhet ha-ʾElohut,* pp. 44-5. Elḥanan ha-Levi, an Italian kabbalist living at the turn of the sixteenth century, follows Ḥayyat's view; see Gottlieb, *Meḥqarim,* pp. 397-476. Both of these kabbalists identify the ten "upper *sefirot* " with *ʾAdam de-ʾAẓilut;* cf. David ibn Zimra, *Migdal David,* p. 37a, who quotes from *The Book of Mirrors* (see above, § 2.9.). The entire theory is criticized by R. Isaac mar Ḥayyim; see Yael Nadav, *"ʾIggeret ha-mequbbal R. Yiẓḥaq mar Ḥayyim ʿal torat ha-ẓaḥẓaḥot," Tarbiẓ* 26 (1957): 440-58.

[169]Moses Cordovero, *Pardes Rimmonim, Shaʿar ha-Ẓaḥẓaḥot,* Chap. 7; see Joseph Ben-Shlomo, *Torat haʾElohut shel R. Mosheh Cordovero,* pp. 174-87.

[170]See Idel, *"Demut ha-ʾadam she-meʿal ha-sefirot,"* pp. 48-9; cf. idem, *"ʿOd ʿal R. David ben Yehudah he-Ḥasid ve-ha-ʾAri."*

[171]See the Index of Sources, ad loc.; cf. above, § 2.8.; and *MhẐ* 237:2: *ʿAd hennah yesh li reshut le-faresh.*

[172]See Idel, *"Demut ha-ʾadam she-meʿal ha-sefirot";* cf. Zohar 1:65a; 2:210b; Liebes, *"Peraqim be-Millon Sefer ha-Zohar,"* pp. 175, 320.

[173]In his *Commentary on the Merkavah* (ed. Scholem, *Tarbiẓ* 2 [1931]: 203) Isaac ben Jacob ha-Kohen offers a reference to the thirty-two paths of wisdom and then explains why he will say no more; the reasons suggested above are spelled out: *Ve-ʾAl teqavveh yoter mimmenni le-farsem ve-li-khtov u-le-gallot bi-khetivah ki huʾ khe-noten ʾeẓbaʿ ba-ʿayin, zulati peh ʾel peh she-loʾ yiheyeh ka-matarah la-ḥeẓ le-khol yavoʾ, ki khamah she-ʿamelu khol ḥasidei ʿolam kol yemeihem ʾein raʾui le-khotevo ve-firsum be-yadayim.*

[174]*MhẐ* 16:28; 34:17; 36:24; 58:23; 59:5,7; 74:29.

[175]*MhẐ* 61:24; 65:18; 93:11; see above, n. 156. *Keter* is also called *loʾ* (259:17; 260:32) because He cannot be comprehended.

[176]*MhẐ* 28:28; 38:7; 77:11; 93:12; etc.; cf. Zohar 3:220b.

[177]*MhẐ* 15:28; 34:13; 39:28; 40:9; 44:26; 45:11; 51:25.

[178]*Sefer ha-Bahir,* § 70 (Scholem, *Das Buch Bahir,* § 48; cf. idem, *Ursprung,* pp. 112-6).

[179]Scholem, *Ursprung,* pp. 238-43.

[180]See Azriel, *Perush haʾAggadot,* p. 81; and index, s.v. *maḥshavah;* cf. p. 93: *Ve-ha-Maḥshavah khe-marʾah she-ha-roʾeh vah roʾeh ẓurato ve-tokhah ve-savur she-hem shetei ẓurot ve-ʾeinan ʾellaʾ ʾaḥat.*

volitional character of the Divine helped kabbalists harmonize the Plotinian conception of an infinite One (corresponding to *ʾEin Sof*) with traditional Jewish monotheism. Gabirol's doctrine of the Will may have influenced them.[181]

Most kabbalists of the thirteenth and fourteenth centuries accepted this new nomenclature. The Zohar too identifies *Keter* as Will, though there is some intertwining of will and thought.[182] R. David, though, clearly posits *Maḥshavah* at the top of the sefirotic ladder. He sets up the following analogy between *Keter* and human thought:

> Since He *[Keter]* is secret and hidden from comprehension, He is called *Maḥshavah,* like the *maḥshavah* that is secret and hidden in the human being and that no one can see or describe as [one can describe] the other qualities. Rather she, namely, the *maḥshavah,* sees everything that exists and is herself not seen. Similarly, *Keter ʿElyon* sees, observes, and looks at everything that exists, while He himself is neither seen nor comprehended by any creature in the world. Therefore He is called *Maḥshavah.* Do not read [the word as] *maḥshavah,* but rather: *moaḥ she-bah,* the holy brain that is inside *Keter ʿElyon,* sitting in a clear, pure aura that cannot be comprehended by intellect or idea.[183]

3.5. The Personification of Keter

In the Zohar, the crystallization of thirteenth-century Kabbalah, *Keter* is abstract and depersonalized. Nothing can be predicated of this *sefirah;* it acts on no object.[184] Most of the Zohar's descriptions of *Keter* are vague and ethereal, e.g., "the luster on high," "the subtle aura on high that is not known" (Zohar 1:15a; 3:2a). Only in the *ʾIdrot* of the Zohar, which abound in bold anthropomorphisms, is *Keter* described more directly and concretely. *Keter* and *ʾEin Sof* together comprise *ʿAttiqa ʾ Qaddishaʾ,* the Holy Ancient One. Even in these sections, however, the aloofness and absolute otherness of *Keter* are conveyed by style and setting.[185]

R. David often describes *Keter* as hidden and unknowable; the name *Maḥshavah* affirms the abstract quality of this *sefirah.* [186] Yet the author also personifies *Keter:*

> You must realize: 'high priest' (Lev 21:10) alludes to *Keter ʿElyon,* who is called High Priest because He is priest and lord over all the levels...,for He annoints all the lower priests with the annointing oil that flows from the spring of the stream. [*MhẐ* 81:25-7]

[181]Scholem, *"ʿIqvotav shel Gabirol ba-qabbalah," Meʾassef Soferei ʾEreẓ Yisraʾel,* pp. 160-78; idem, *Grundbegriffe,* pp. 9-52 (on Gabirol see p. 19); idem, *Kabbalah,* pp. 91-4.

[182]Scholem, *Grundbegriffe,* pp. 47-51; Tishby, *Mishnat ha-Zohar,* 1:132. Gikatilla applies both Will and Thought to *Ḥokhmah;* see *Shaʿarei ʾOrah,* pp. 188, 190. Moses de León equates *Maḥshavah* and *Ḥokhmah* in his *Shushan ʿEdut,* p. 375.

[183]*MhẐ* 38:15-22; cf. 171:29 *(Shaʿar ha-Razim).* The final expression is an expansion of: *ʾavir she-ʾeino nitpas (Sefer Yeẓirah* 2:6). Azriel uses the phrase to refer to *Keter;* see *Perush ha-ʾAggadot,* p. 107. The Zohar renders it: *ʾawira ʾ ʿila ʾah deqiq de-laʾ yediʿa* (3:2a). Moses de León also employs it in his Hebrew writings; see Altmann, *Studies in Religious Philosophy and Mysticism,* p. 174 (hereafter cited as *Studies*).

[184]See Tishby, *Mishnat ha-Zohar,* 1:132.

[185]Ibid., 1:110-1. R. David's *Sefer ha-Gevul* is based on the *ʾIdra ʾ Rabbaʾ;* see above, § 1.2. In *The Book of Mirrors* traces of the *ʾIdra ʾ* appear; see the Index of Sources, and cf. Zohar 3:128b *(ʾIdra ʾ Rabbaʾ)* with *MhẐ* 15:16; 50:12; 74:3; 221:19.

[186]See *MhẐ* 208:6, where R. David adds the words *be-ʿomek ha-maḥshavah* to Gikatilla's description of *Keter: Ha ʾ nisteret ve-neʿelemet.*

Keter is "master of the levels" (*MhZ* 234:17), in charge of the *sefirot.*

"How can one pursue a thousand?" (Deut 32:30).

This means that the One, *Keter ʿElyon,* runs after a thousand levels emanated from Him[187] and warns and urges them concerning the *miẓvot* of the Torah, saying, for example: "Justice, justice shall you pursue" (Deut 16:20). Thus the Quality of One *[Keter]* is like a rabbi running after his students, urging them on, to sharpen and stimulate their minds, so that they will understand wisdom.[188]

R. David does not limit his personifications of *Keter* to descriptions involving the other *sefirot. Keter* "made and created everything that exists" (*MhZ* 259:11); "He is our God; He created us and all the worlds" (*MhZ* 188:12). Sometimes *Keter* is identified simply as *ʾEl* or the Holy One, blessed be He.[189] He is also called *Yaʿaqov Savaʾ, Yisraʾel Savaʾ,* and *Mosheh Savaʾ.*[190]

By describing *Keter* as the God of Creation and the Holy One, blessed be He, R. David includes the highest realm of the *sefirot* within the framework of tradition. This is a typical kabbalistic response to the conflict between the God of Plotinus and the God of the Bible (cf. above, § 3.4.). *Keter* is hidden in the depth of Thought, yet responsive to human prayer: "We ask for water on these days *[Sukkot]* so that the Holy One, blessed be He, *Keter ʿElyon,* will pour out His fountains to us limitlessly" (*MhZ* 96:15-6).

3.6. Keter and Malkhut

The personification of *Keter* finds expression in another role: its direct relationship with *Malkhut.* This relationship highlights the dynamic nature of the *sefirot.*

Malkhut is described as a loyal subject of Her God:

Keneset Yisraʾel [Malkhut] does not accept upon Herself any of the powers of the outside forces [*ha-ḥiẓoniyyot,* i.e., the demonic realm] but rather *Keter ʿElyon.* She bows down to Him and accepts Him as God. [*MhZ* 40:2-4]

Malkhut is the laborer; *Keter,* the *baʿal ha-bayit* (*MhZ* 77:17). She is subservient to Him yet thereby receives the flow of emanation: "She includes everything[191] and receives from the All, the quality of deep Thought *[Keter].* "[192] This flow is the source of *Malkhut*'s dominion over the lower worlds: "When She receives from the *ʾAlef* on high, She reigns and rules over all the levels beneath Her."[193]

Keter and *Malkhut* are "the upper eye" and "the lower eye."[194] One is *huʾ;* the other, *she-hu ʾ* (*MhZ* 234:27-8). The similarity in names inidicates a close relationship, as demonstrated in the following passage:

"*ʿAṭarot....*" (Num 32:3)

You must realize: *ʿAṭarot* alludes to two crowns: the upper crown and the lower crown. For just as He is called *Keter ʿElyon,* so *Malkhut* is called *ʿAṭeret,* which means "crown"....When *ʿAṭeret Yisraʾel* joins Herself with *Keter ʿElyon* and rises up to *ʾEin Sof,* they are called *ʿAṭarot.*[195]

The depiction of the *hieros gamos* is a striking feature of the Zohar.[196] Scholem notes that its appearance represents a reemergence of myth within Judaism.[197] Under the proper conditions, *Tifʾeret,* the masculine aspect of God, and *Malkhut,* the feminine, unite; their union provides blessing and harmony to all the lower worlds (see, e.g., Zohar 3:214b).

R. David adopts this view and in several places (e.g., *MhZ* 189:20; 241:26) speaks of the joining of these two *sefirot.* However, in other passages it appears that *Tifʾeret* is not so much partner of *Malkhut* as Her channel, conducting the flow from above: "*Tifʾeret* conducts the flows and the various types of emanation to the Queen" (*MhZ* 238:31).

The Holy One, blessed be He *[Tifʾeret]* prays before *Keter ʿElyon* and *ʿIllat ha-ʿIllot*[198] and draws the abundant flow from the depth of the spring, *Keter ʿElyon,* to *Keneset Yisraʾel [Malkhut].* Thus *Keneset Yisraʾel* is blessed through Him . [*MhZ* 110:4-6]

The source of the flow is in *Keter; Tifʾeret,* representing Him, transmits the flow and brings about the union. Once R. David says that *Keter* himself marries *Malkhut:*

"He *[ve-huʾ]* shall marry a woman in her virginity" (Lev 21:13)....

But according to the way of truth, *ve-huʾ,* that is, *Keter ʿElyon,* who is called *Huʾ*...."A woman in her virginity" alludes to the *Maṭronitaʾ.* [*MhZ* 87:28-32]

It is a sin to break the connection between *Keter* and *Malkhut* (*MhZ* 243:28-30). The downward flow of emanation creates a path that can be climbed through contemplation of the *sefirot:* "By means of *Zoʾt, Keneset Yisrael,* one can ascend and probe the reality of the Intellect, *Keter ʿElyon*" (*MhZ* 45:6-7).

3.7. The Independent Aspect of Malkhut

The concept of *Malkhut,* or *Shekhinah,* is one of the most significant ideas of the Kabbalah.[199] The notion of a feminine aspect of God, formulated by the Jewish mystics of the twelfth and thirteenth centuries, became a keystone of all kabbalistic thought and had a profound effect on the Jewish masses from the fourteenth century on.

According to the Zohar, which abounds in images of *Shekhinah,* this *sefirah* "has nothing at all of Her own."[200] Yet because of this quality, She receives and reflects the other *sefirot:*

[187] The decade of *sefirot* is sometimes squared or cubed by R. David and others; cf. *MhZ* 68:10; 101:8; 186:19; 272:20; Zohar 1:209b; 2:200a.

[188] *MhZ* 260:21-4. This novel description of the *yeshivah shel maʿlah* is part of R. David's commentary on *Parashat Haʾazinu,* which abounds in imaginative interpretations. In ll. 25-6 R. David concludes that the *sefirot* themselves perform the *miẓvot;* cf. Scholem, *Kabbalah,* p. 102.

[189] *MhZ* 96:15; 116:5; 221:15. The Zohar refers to *Tifʾeret,* not *Keter,* as the Holy One, blessed be He.

[190] *MhZ* 82:31; 206:9,15; 210:5. The Midrash applies the name *Yisraʾel Savaʾ* to Jacob; see *Bereʾshit Rabbaʾ* 68:11, p. 784, and Theodor's note; Louis Ginzberg, *Legends of the Jews,* 5:276, n. 35. In the Zohar *Yisraʾel Savaʾ* refers to *Tifʾeret;* see Zohar 1:233a; 2:216a; 3:119b.

[191] *Hiʾ kholelet ha-kol;* cf. *Bahir,* § 156 (Scholem, *Das Buch Bahir,* § 104); idem, *Von der mystishcen Gestalt der Gottheit,* p. 166. The phrase *ha-kallah ha-kelulah min ha-kol* appears often in thirteenth-century Kabbalah.

[192] *MhZ* 15:6-7. In earlier kabbalistic literature *kol* refers not to *Keter* but to *Yesod,* situated directly above *Malkhut;* see *Bahir,* § 22 (Scholem, *Das Buch Bahir,* § 14); Azriel, *Perush ha-ʾAggadot,* p. 57. Gikatilla (*Shaʿarei ʾOrah,* p. 57) and the Zohar follow this tradition. The identification is often connected with 1 Chr 29:11. By substituting *Keter* for *Yesod,* R. David highlights the direct relationship between the first and last *sefirot.*

[193] *MhZ* 225:28-30. *ʾAlef* symbolizes *Keter* and *Maḥshavah* in the *Bahir;* see, e.g., § 70 (Scholem, *Das Buch Bahir,* § 48); cf. *MhZ* 58:10.

[194] *MhZ* 188:21. On the open eye of *Keter* see 207:23-4; 212:9; 245:10; 259:27-30; 271:32; Zohar 3:129b-130a (*ʾIdraʾ Rabbaʾ*).

[195] *MhZ* 228:18-20;29-30. The complete union of the two *sefirot* ushers in the Messiah; see the middle section of the passage (ll. 20-9), deleted in the translation above. This middle section is copied from Gikatilla's *Shaʿarei ʾOrah,* p. 102, where the subject is the union of *Tifʾeret* and *Malkhut.* R. David employs the material to demonstrate the union of *Keter* and *Malkhut;* cf. *MhZ* 113:21-4.

[196] In the *Bahir, Shekhinah* is primarily God's daughter; see Scholem, *Von der mystischen Gestalt der Gottheit,* p. 164: "Zu dieser Symbolik *[hieros gamos]* ist es noch nicht wieder vorgestossen, oder soll ich sagen: zurückgekehrt!?"

[197] Ibid., pp. 164, 177; idem, *Major Trends,* pp. 225-30; idem, *On the Kabbalah and Its Symbolism,* pp. 104-5.

[198] The idea that the *sefirot* pray to God is also expressed by Joseph ben Shalom Ashkenazi; see Scholem, *Kabbalah,* p. 102; cf. above, n. 188.

[199] On the evolution of the concept see Scholem, *Von der mystischen Gestalt der Gottheit,* pp. 135-91 (*Pirqei Yesod be-Havanat ha-Qabbalah u-Semaleha,* trans. Joseph Ben-Shlomo, pp. 259-307).

[200] *Leit lah mi-garmah kelum* (Zohar 1:181a; cf. 2:218b). The phrase derives from medieval astronomers' description of the moon; see Scholem, *Qoveẓ ʿal Yad,* n.s. 8 (1976): 338, 381.

She includes everything (see above, n. 191). When bestowing blessing upon the world, She "is called masculine, like the male who provides blessings for the female."[201] From the perspective of the lower worlds, She is a powerful governess; from a higher perspective, She is simply transmitting divine blessing or chastisement.[202]

R. David too says that *Shekhinah* "has nothing at all of Her own" (*MhZ* 77:18). All the lights and colors of the upper *sefirot* are reflected in Her (an image to which the title of the book alludes; see above, § 2.4.). R. David, though, emphasizes the active element within *Shekhinah* and stresses the independent aspect of Her nature. This is apparent in his first original piece of writing in the extant *Book of Mirrors,* an elaboration on a Zohar passage:

> "....This is why we say [in *Ne ʿilah* on *Yom Kippur*] "Seal"; "Seal us." Because *ʿAṭeret [Malkhut]* ascends to the Palace of the King *[Binah],* who brings out the documents to be sealed. Then She *[Malkhut]* receives the documents and brings them down with Her and seals them for life, namely, the righteous, and the wicked for death. That is why we pray, "Seal for life." We are praying before *ʿAṭeret,* who is *Ne ʿilah,* that She seal us for life.
>
> A parable. To what may this be compared? To a king who came to sign decrees against his subjects, imposing burdensome taxes upon them because they had rebelled against him. The king's viceroy pleaded for the subjects, asking that the king lighten his decrees. Finally he [the viceroy] took the decrees from his hand and sealed them with the royal signet ring. The secret is: "...and [that which is] sealed with the king's ring cannot be reversed" (Esth 8:8). Enough for one who understands![203]

Malkhut, who is also *Keneset Yisraʾel,* the mystical embodiment of the community of Israel, pleads for Her people before the King. As the crucial hour draws near, She takes matters into Her own hands and independently insures Israel's well-being.

The power of life and death are in Her hands (*MhZ* 261:13-5). "She is the judge who sits at the royal gates" (*MhZ* 34:23-4). "She is in charge of all the punishments of the King on high and inflicts all blows and plagues on the world."[204]

Basically, *Malkhut* does not act on Her own; She expresses and interprets divine thought:

> "Who knows the interpretation of a thing?" (Qoh 8:1).
>
> The quality of *ʿAṭeret* interprets the meaning of the depth of Thought *[Keter]* before it is actualized....This is the secret meaning of "the interpretation of a thing." [*MhZ* 205:16-8]

Malkhut is the medium for expressing what has arisen in the depth of *Maḥshavah.* The primal thought emanated by *Keter* is incommunicable in itself; it is nothing but an unspoken *ʾalef.*[205] *Malkhut* interprets this flowing essence as it moves toward actualization; She spells it out to the lower worlds. It is at this point that Her independent quality comes into play.

R. David conveys this creative aspect of *Malkhut* with two images: one, his own formulation; the other, an elaboration of a zoharic expression.

> "Do not boast of tomorrow, for you do not know what a day may bring forth" (Prov 27:1).
>
> Indeed, what a day may bring forth. That well-known day, *Keneset Yisraʾel,* one of the seven days of the week produced by Him[206] during the six days of Creation. That divine quality receives the decree from world of Thought *[Keter]* to determine the decree according to the supreme judgment, and She can alter that decree for good or evil, as She desires. This is the secret meaning of: "*YHVH* repented of the evil" (Exod 32:14) and similarly, "His heart was saddened" (Gen 6:6). All this refers to the quality of *Malkhut,* who is called Secret of the Possible *[Sod ha-ʾEfshar].*[207] She gives birth to whatever She wishes to bring down[208] to the world. Therefore it says, "for you do not know what a day may bring forth." Indeed![209]

Shekhinah is the field of all possibilities. Spanning the upper and lower worlds, She translates divine thought into life on earth:

> "The wages of a laborer shall not remain with you until morning" (Lev 19:13)....
>
> But the secret meaning is that the laborer *[poʿel]* is *Keneset Yisraʾel.* She is called "laborer" because everything that comes out of the world of deep Thought *[Keter]* moves from potential being *[min ha-koaḥ]* into actuality *[ʾel ha-poʿal],* which is *ʿAṭeret Yisraʾel [Malkhut].* She forms and transforms everything as seems right to Her. For She is called the Potter: just as a potter who shapes and fashions clay vessels makes them wide or narrow while the potter's wheel[210] turns and spins in his hand, so *Keneset Yisraʾel* fashions all creatures as if they were on a potter's wheel, as it is written: "Like clay in the hand of the potter [so are you in My hand, O house of Israel]" (Jer 18:6). [*MhZ* 77:9-16]

The Secret of the Possible and the potter's wheel are mirror images; they appear twice in the same context (*MhZ* 53:3-9; 198:28-30). As *Shekhinah* conveys the flow of the Divine, She draws on an infinite array of images and forms, for She encompasses all imagery and form.[211] The artist transforms divine thought into creation; the universe comes to life. To the human mind it seems random, as if God were changing His mind back and forth. But that is the secret of the possible: as the wheel spins, as the imagination of *Shekhinah* unfolds, no one knows what the day may bring forth.

3.8. The Attack of the Temurot

The independent creativity of *Shekhinah* reflects one aspect of Her nature. From another perspective She is receptive, a channel for the higher *sefirot.* She is in a delicate position because She possesses nothing of Her own (see above, n. 200). *Shekhinah* is pure openness, "the mouth of His qualities" (*MhZ* 82:13). She welcomes emanation but is vulnerable to the demonic, which threatens to defile Her with the venom of the serpent.[212] The Zohar refers to

[201] Zohar 1:232a; cf. Scholem, *Von der mystischen Gestalt der Gottheit,"* pp. 180-1.

[202] See Zohar 3:187a, where *Ḥokhmah* and *Binah* urge *Malkhut* to provide for Her household, the world; cf. 2:51a.

[203] *MhZ* 13:1-9; cf. 250:26-9 (from *Shaʿarei ʾOrah,* p. 106).

[204] *MhZ* 248:21; 249:1; cf. Zohar 2:186a; 3:11b,150a.

[205] See above, n. 193; cf. Scholem, *On the Kabbalah and Its Symbolism,* pp. 29-31.

[206] *She-hem peʿalav;* the JTS and Sassoon MSS read: *she-huʾ paʿal.* The seven lower *sefirot* are pictured as having been formed by God during the six days of Creation and are therefore called "days"; see *Bahir,* § 57 (Scholem, *Das Buch Bahir,* § 39); cf. Gikatilla's statement (*Tarbiṣ* 36 [1967]: 78): *sefirot ha-belimah she-hem peʿalav;* and Meir ibn Sahula's comment on *va-yehi ʾor* in his *Beʾur le-Ferush ha-Ramban, ʾOṣar Mefareshei ha-Torah* (Jerusalem, 1973), p. 3d. The reading of the Cambridge MS, however, can be pointed: *she-hem paʿalu,* i.e., the *sefirot* performed during the six days of Creation; cf. *Bahir,* § 158 (Scholem, *Das Buch Bahir,* § 105); *MhZ* 129:4; 227:5; 230:4,20; and Isaac the Blind's phrase (Scholem, *Reʾshit ha-Qabbalah,* p. 110): *devarim ha-metaqqenim ha-meẓiʾut.*

[207] Cf. Philo, *De Opificio Mundi* § 46: "He has no need of His heavenly offspring on which He bestowed powers but not independence; for like a charioteer grasping the reins or a pilot the tiller, He guides all things in what direction He pleases as law and right demand, standing in need of no one besides: for all things are posssible to God." Azriel designates *Ḥokhmah* as *koaḥ mah she-ʾefshar li-heyot,* which is Aristotle's definition of hylic matter; see Azriel, *Perush ha-ʾAggadot,* p. 84; cf. Maimonides, *Guide of the Perplexed,* 3:20; Emil Fackenheim, "The Possibility of the Universe in Al-Farabi, Ibn Sina and Maimonides," *PAAJR* 16 (1946-47): 39-70; N. L. Rabinovitch, *Ha-Mussag ʾefshar be-mishnato shel ha-Rambam," Tarbiṣ* 44 (1975): 159-71; Aviezer Ravitzky, *"ʾEfsharut ha-meẓiʾut u-miqriyyutah be-hirshanut ha-Rambam be-meʾah ha-y"g," Daʿat* 2-3 (1978-79): 67-97. For other references to *sod ha-ʾefshar* in *MhZ* see 52:24; 53:9; 198:28; 209:20 (an interpretation of a passage from Gikatilla); cf. 153:11; 191:13. See also BT *Ketubbot* 111b, *Soṭah* 14a, and Gikatilla's comment in *Shaʿarei ʾOrah,* p. 166: *U-Mah she-ʾameru rz"l: Ve-Khi ʾefshar le-ʾadam le-hiddaveq ba-shekhinah? ʾEfshar ve-ʾefshar!*

[208] The JTS MS reads: *le-holid* rather than *le-horid.*

[209] *MhZ* 28:25–29:1, an elaboration on *Tanḥuma ʾ, ʾAḥarei Mot,* § 6.

[210] *Ṭiqla ʾ,* a word apparently fashioned by Moses de León; see Scholem, *"Peraqim,"* p. 314; Liebes, *"Peraqim he-Millon Sefer ha-Zohar,"* pp. 327-35; cf. Zohar 1:109b, and Shim ʾon Labi, *Ketem Paz,* ad loc. In *MhZ* 53:2-10 *Malkhut* is identified as the *ṭiqla ʾ* on which all souls revolve.

[211] *Shekhinah* is described as *deyoqna ʾ di-khelil kol deyoqnin* (Zohar 1:13a) and *dimyona ʾ di-khelil kol dimyonin (Zohar Ḥadash,* 59a *[Midrash ha-Neʿelam]);* cf. *MhZ* 152:8: *ha-temunah ha-kolelet kol ha-temunot;* see Scholem, *Von der mystischen Gestalt der Gottheit,* pp. 173-4; Tishby, *Mishnat ha-Zohar,* 2:615.

[212] See *MhZ* 249:9-11; Zohar 3:79a; cf. BT, *Shabbat* 146a. On the relationship between the demonic and *Shekhinah* see Tishby, *Mishnat ha-Zohar,* 1:223-6; 285-307.

the demonic realm as *Sitra ʾAḥra*, the Other Side.[213] It is the counterpart of the Divine, the dark face of Evil, intent on overwhelming *Shekhinah.*

R. David does not employ the term *sitra ʾaḥra*.[214] His name for the demonic is *temurot,* forces that are opposite and parallel to the seven lower *sefirot.*[215] He may have learned the image from Joseph ben Shalom Ashkenazi.[216]

The *temurot* are produced by *Keter:*

> "The palm tree *[ha-temarah]* produces both dates *[temarim]* and thorns; whoever tries to steal the dates is tyrannized by the thorns...." (*Tanḥuma ʾ, Be-Midbar,* § 15).
>
> But the secret meaning is that the palm tree alludes to *Keter ʿElyon,* highest of the high. As the palm tree is higher than all other trees, so *Keter* is higher than all the levels *[sefirot].*
>
> "Produces both dates and thorns." Dates are the holy levels; thorns are their opposites *[ʾel temuroteihen],*[217] called thorns and thistles. [*MhZ* 63:17-25]

According to the Zohar, the forces of evil are rooted in *Gevurah,* the *sefirah* of strict judgment.[218] Isaac ben Jacob ha-Kohen, of the Gnostic school, propounded a theory of the emanation of the left side; the source of this counter-emanation was *Binah.*[219] R. David traces the *temurot* back to *Keter,* implying that the roots of evil coexist with those of emanation. In one passage he mentions "the highest *temurot,* opposite *Keter ʿElyon* " (*MhZ* 249:24-5), though elsewhere he states: "There, there is neither *temurah* nor enemy, rather the world of Compassion and the world of Tranquility" (*MhZ* 271:26-7).

The *temurot* constitute an emanation parallel and opposite to the seven lower *sefirot.*[220] R. David identifies each of them near the end of *The Book of Mirrors* (*MhZ* 248-50 [on the *tokheḥah*]; 260:8-16). Together they are called: enemies, outside forces, and *qelippot.*[221]

Though their source is the highest *sefirah,* the *temurot* are not nourished well. Only "the drippings of the channels are conducted toward the *temurot* " (*MhZ* 259:16). "They eat everything through the holes and pits" (*MhZ* 250:1). These crumbs do not satisfy them. Since *Malkhut* receives the divine flow and with it rules over the world, the *temurot* seek to overwhelm Her, snatch Her power, and establish their own dominion:

[213] It has been pointed out that the correct grammatical form is *sitra ʾaḥarina;* see Kaddari, *Mi-Yerushat Leshon Yemei ha-Beinayim,* p. 72.

[214] In his Zohar translations he renders it: *ha-ẓad ha-ʾaḥer.*

[215] In biblical and rabbinic usage *temurah* denotes the "exchange" of one sacrificial animal for another; see Lev 27:10,33; *Mishnah, Temurah* 1:1. *Sefer Yeẓirah* 4:1 describes the letters *b, g, d, k, p, r, t* as *sheva ʿkefulot...she-hen temurot.* On *temurah* as letter permutation see *Mekhilta ʾ di-Sheloshim u-Shenayim Middot,* § 29: *temurat ha-ʾotiyyot; Sefer Yeẓirah* 2:2: *hemiran;* cf. Saul Lieberman, *Yevanit ve-Yavnut be-ʾEreẓ Yisraʾel,* p. 203; Scholem, *Major Trends,* p. 100. *Midrash Temurah,* redacted near the end of the twelfth century, declares (*Battei Midrashot,* ed. Solomon A. Wertheimer, 2:189): *Kol davar ve-davar yesh lo shuttaf ve-yesh lo temurah, ve-lulei zeh lo ʾ hayah zeh.* Isaac the Blind states: *Ha-Temurah holekhet mi-sibbah le-sibbah* (*Commentary on Sefer Yeẓirah,* p. 8). A punitive element appears in Azriel's writings; see *Madda ʿei ha-Yahadut* 2 (1927): 235: *Ve-Kheivan she-ḥata ʾ...ve-niddon be-khol darekhei ha-temurot....* (This passage is missing in R. David's quotation of the text: *MhZ* 123.) Cf. *Sha ʿar ha-Kavvanah* (ed. Scholem, *MGWJ* 78 [1934]: 512): *U-Min ha-noṭim mi-darko ha-ʾor she-huʾ mit ʿallem u-mithapekh mi-davar li-temurah be-tokheḥot musar u-ve-yosher.* See also *Madda ʿei ha-Yahadut,* 2:233-7; *MhZ* 122:11-2; 123:3; BT, *Nedarim* 20b; Zohar 1:155a.

[216] See his *Commentary on Sefer Yeẓirah,* pp. 96-8; Scholem, *"Peraqim,"* p. 300.

[217] The Escorial MS often reads *ʾel* rather than *ʾellu;* cf. *MhZ* 39:19; 73:5; 90:32; 99:26; and the apparatus.

[218] Tishby, *Mishnat ha-Zohar,* 1:295-8; cf. *Bahir,* § 162 (Scholem, *Das Buch Bahir,* § 109); idem, *Ursprung,* pp. 130-3; Idel, *"Ha-Maḥshavah ha-raʿah shel ha-ʾel," Tarbiẓ* 49 (1980): 356-64.

[219] See the text published by Scholem and his analysis in *Madda ʿei ha-Yahadut* 2 (1927): 182-5; 193-7; 244-64; cf. idem, *Kabbalah,* pp. 122-4; *Von der mystischen Gestalt der Gottheit,* pp. 55-6. Isaac's student, Moses of Burgos, demotes the source of evil to *Gevurah;* the Zohar follows this view. R. David often speaks of *Binah* as the source of judgment (e.g., *MhZ* 69:31; 186:22; 206:26), but the *temurot* have a higher source.

[220] No *temurot* are specified or named for *Ḥokhmah* and *Binah;* cf. Joseph ben Shalom, *Commentary on Sefer Yeẓirah,* p. 99.

[221] *MhZ* 84:8; 86:13,16; 189:15; 246:27; 272:11. On the origin of the term *qelippot* see Altmann, *Studies,* pp. 172-9.

> The *temurah* of *Malkhut...* is called the mystery of the serpent who rides on those asses that stand beneath him. He is forever pursuing *Malkhut beit David* to destroy Her and establish his own *malkhut.* [*MhZ* 19:27-9]

Malkhut is protected by *Keter* and *Tifʾeret;*[222] so there is usually no danger. At times, though, She is left unguarded and becomes vulnerable to the outside forces. Such a state is brought about by the perpetration of sin in the human realm, the consequent arousal of the demonic (see Zohar 3:79a), and the abandonment of *Malkhut* by *Tifʾeret.* The stage is set for the attack of the *temurot.* R. David reads this cosmic drama into and out of the passage in Deuteronomy concerning a wife suspected of infidelity:

> "He gives her a bad name *[shem ra ʿ]* " (Deut 22:14).
>
> This means, as if it were possible, that He *[Tifʾeret]* gives Her *[Malkhut]* a bad name *[shem ra ʿ].* Do not read [the words as] *shem ra ʿ,* but rather: *sam ra ʿ,* the deadly poison of the *temurot* injected into Her through the walls. A man does not leave his house until people slander his wife; yet his leaving brought upon Her *shem/sam ra ʿ.* Understand all this! [*MhZ* 242:4-7]

Tifʾeret leaves because, due to human sin and the arousal of evil, *Malkhut* has already been tainted. *Tifʾeret* cannot dwell in an impure place. In removing himself, however, He leaves the door open to the *temurot;* they defile the denfenseless Queen.

In another passage R. David describes a raid on the riches of emanation: "The outside forces snatch and grab the flow on the paths [of the *sefirot*] before it reaches the treasure house *[Malkhut]* " (*MhZ* 249:15-6).

Normally, the *temurot* are not in control of *Malkhut* or Her treasures. On the contrary, they are instruments used by Her to punish wicked souls:

> Those souls who have been created in this world and have caused themselves to be expelled to the world of *temurot* are immediately cut off and expelled by the expelling power from one quality to the next until *Malkhut.* From there he is drawn outside until he is punished.[223]

Malkhut banishes the soul to the *temurot;* the realm of evil is accorded its proper place in the divine plan. Elsewhere, though, as we have seen, the demonic threatens to take over and rule the world. R. David apparently wrestled with two different conceptions: (1) that God created both good and evil (see Isa 45:7) and uses them as instruments of reward and punishment; (2) the gnostic view that good and evil are two opposing principles battling for control of the cosmos.[224] In one scenario *Malkhut* plays the role of judge, dispensing reward and punishment; in the other She is the kingdom for which the forces of good and evil contend.

3.9. The Shemiṭṭot

The doctrine of the *shemiṭṭot* concerns cosmic cycles of time. It was based on astrological ideas mediated to the kabbalists through the writings of Abraham bar Ḥiyya.[225] The foreign ideas were assimilated by the kabbalists to certain aggadic statements, in particular the dictum of Rav Qatina: "For six thousand years the world exists; for one thousand it lies destroyed" (BT, *Sanhedrin* 97a).

[222] See *MhZ* 40:2; 77:17; 241:26.

[223] *MhZ* 204:1-3. The passage is connected to a line from the *Tanḥuma ʾ*. Cf. Azriel's statement, above, n. 215. R. David may be referring to reincarnation, which in the early history of Kabbalah was seen as a punishment rather than a cosmic principle; see the end of the passage: 204:6-7; cf. 67:25-6; 105:2; 221:21-3; 248:25-8; Moses de León, *Shushan ʿEdut,* ed. Scholem, p. 349; see, however, Scholem's n. 157.

[224] See Hans Jonas, *The Gnostic Religion,* pp. 206-37. The Zohar also presents these two opposing schemes; see Tishby, *Mishnat ha-Zohar,* 1:285-95.

[225] In his *Megillat ha-Megalleh* he speaks of "philosophers" who believed in a series of cyclical creations; see Scholem, *Kabbalah,* p. 120. On the doctrine see ibid., pp. 120-2; idem, *Ha-Qabbalah shel Sefer ha-Temunah ve-shel ʾAvraham ʾAbul ʿafiyah,* pp. 1-84; *Ursprung,* pp. 407-19.

The kabbalistic theory was articulated in an anonymous fourteenth-century work entitled *Sefer ha-Temunah.* [226] In accord with kabbalistic teaching, the first three *sefirot* are said to be hidden. *Binah* gives birth to the seven lower *sefirot,* each of which rules over one cosmic cycle of six thousand years. In the seventh millennium there is a *shemiṭṭah,* a term borrowed from Deut 15. During this period the sefirotic powers cease to function and the world returns to the womb of *Binah.* The entire seven-thousand-year cycle, not just the last millennium, is called one *shemiṭṭah.* The cycles follow one another until, at the end of seven *shemiṭṭot,* there is a *yovel.* This is the basic unit of history: the fifty-thousand-year jubilee.

Since each *sefirah* rules over one *shemiṭṭah,* the cosmic cycles reflect different qualities. According to *Sefer ha-Temunah,* we are now in the *shemiṭṭah* dominated by *Gevurah;* that is why the world appears as it does. In the previous *shemiṭṭah,* ruled by *Ḥesed,* a golden age pervaded the universe. Furthermore, each *shemiṭṭah* receives and conveys a revelation of Torah befitting its nature; the exact combination of the letters of the Torah differs in each cycle. In the previous *shemiṭṭah,* corresponding to *Ḥesed,* the Torah was read very differently: it did not contain prohibitions, which are the result of the mediation of *Gevurah.* This aspect of the theory relativizes the Torah.[227] Four hundred years later the disciples of Shabbetai Ẓevi realized the antinomian implications of these teachings.. Perhaps because of such implications the theory was not accepted by many kabbalists. The Zohar ignores it; Moses de León criticizes it; Joseph ibn Ẓayyaḥ, Cordovero, and Luria reject it as mistaken or unnecessary.[228]

R. David accepts it wholeheartedly, referring to the *shemiṭṭot* more than a dozen times in the extant *Book of Mirrors.* It should be noted, though, that he does not allude to those aspects of the doctrine that speak of the Torah and its manifold readings. The longest passage on the *shemiṭṭot* appears at the beginning of *Parashat Behar,* which in the Torah opens with a discussion of the seven (not seven-thousand) -year cycle:

> You must realize that the secret of the *shemiṭṭah* is a wondrous and hidden matter. I have made you aware of several of its aspects in various places; now I come to remind you and benefit you concerning the secret of the holy *shemiṭṭah.*
>
> The secret of the *shemiṭṭah* is: "A generation goes and a generation comes, and the earth lasts forever" (Qoh 1:4). This means: a *shemiṭṭah* goes and a *shemiṭṭah* comes, while the earth, namely, the world on high called "earth's expanse" (Job 38:18) *[Binah]* ...[lasts forever].
>
> As each *shemiṭṭah* leaves, the next one comes, for each *sefirah* rules over one *shemiṭṭah.* Like the *sefirah,* so the *shemiṭṭah.* If the *sefirah* [leans] toward Judgment, the *shemiṭṭah* is Judgment; if the *sefirah* is Compassion, the *shemiṭṭah* is Compassion; if it is Justice, so is its *shemiṭṭah.* The true *kabbalah* that we have received, one from the mouth of another, back to Moses our Rabbi (peace unto him) is that the last *shemiṭṭah* was of *Ḥesed,* while the *shemiṭṭah* we are now in belongs to *Gevurah.* That is why so many harsh decrees, severe judgments, persecutions (due to our many sins), and the harshness of exile have been aroused during this *shemiṭṭah.* Indeed, this harsh exile is an indication of *Gevurah,* who is now ruling.
>
> When six thousand years pass, which is [the cycle of] the world, twilight will immediately set in. The righteous will sit with their crowns on their heads, basking in the splendor of *Shekhinah;* they will adorn themselves to enter the Great Sabbath, Mother of the Children *[Binah].* When the Sabbath begins, all the worlds, levels, and chariots will be drawn up to *Binah,* as it is written: "For dust you are, and to dust you shall return" (Gen 3:19).[229]

According to the doctrine expounded in *Sefer ha-Temunah,* at the end of each *shemiṭṭah* the world returns to *Binah* and is destroyed. The *sefirot* remain in their positions; only at the *yovel* are they recalled by the Divine Mother.[230] R. David teaches that after each *shemiṭṭah* the *sefirot* are absorbed into *Binah:*

[226] Moshe Idel has proven this dating; see his forthcoming study in *Alei Sefer.*

[227] See Scholem, *On the Kabbalah and Its Symbolism,* pp. 77-86.

[228] See Moses de León, *Sefer ha-Mishqal,* p. 94; Scholem, *Kabbalah,* p. 122.

[229] *MhZ* 102:9-27. This passage appears in Abraham Adrutiel's *ʾAvnei Zikkaron;* see above, § 2.9.

[230] Scholem, *Kabbalah,* p. 120.

> When the time arrives for the *shemiṭṭah* to begin, at twilight, all these rivers [the lower *sefirot*] return to the ancient stream *[Binah],* the stream that flows out of the depth of Thought *[Keter],* as it is written: "For dust you are, and to dust you shall return," for the quality of *Binah* is called Dust.[231]

At the *yovel* the culmination of the entire cycle is marked by the return of all being to *Keter:*

> *Keter* is called *Bela ʿ* (Gen 46:21) because He absorbs and swallows *[bole ʿa]* all the levels and everything that exists in the year of the *shemiṭṭah* that is the great jubilee, as it is written: "For dust you are, and to dust you shall return," for *Keter ʿElyon* is also called Dust.[232]

In BT, *Sanhedrin* 97a two opinions are offered on the destruction of the world: R. Qatina said, "For six thousand years the world exists; for one thousand it lies destroyed...." Abbaye said, "For two thousand it lies destroyed." R. David resolves the conflict by explaining that the thousand-year interval pertains to the *shemiṭṭot,* while the two thousand years applies to the *yovel.* This accords with the calculations.[233]

In the *yovel* each human soul returns to its upper root:

> "It shall be a jubilee for you: each of you shall return to his holding; each of you shall return to his family" (Lev 25:10).
>
> "His family," indeed! For everyone will return to his family on high, to the place from which he was hewn[234] and emanated. The secret is: "The spirit will return to God who gave it" (Qoh 12:7).
>
> You already know that all creatures are prefigured above in the exact form that they will occupy in this world,[235] whether it be the face of a human, a lion, an eagle, or an ox. Each one, as he is below, so he is above. Thus each soul has a source from which she is hewn from the place on high. When the fiftieth year arrives, namely, the *yovel,* all souls ascend to see God's face; all of them return to their holding and their family, indeed, to the place from which they were emanated and hewn, as it is written: "In this year of *yovel* each of you shall return to his holding" (Lev 25:13). Understand this well! [*MhZ* 107:20-9]

3.10. Sod ha-Malbush

The author of the Zohar develops the image of the *ḥaluqa ʾ,* a garment woven for a righteous human being out of the good deeds he has performed.[236] This *ḥaluqa ʾ,* or *malbush,* is kept in store for him; when he dies, he is arrayed in the garment and enters paradise. R. David displays the *malbush* near the beginning of the extant *Book of Mirrors.* The context is the death of Aaron's two sons, referred to in the opening verses of *Parashat ʾAḥarei Mot.* R. David elaborates on a line from the *Tanḥuma ʾ* that offers an explanation of their death: Aaron's sons were killed "because they entered without [their priestly] garments...."

[231] *MhZ* 104:20-3; cf. 104:30; 200:4.

[232] *MhZ* 224:10-2; cf. 113:21. On 106:13 R. David adopts the more standard view; cf. Gottlieb, *R. Baḥya,* pp. 333-7; Altmann, *Kiryat Sefer* 40 (1965): 268-9; Idel, *Alei Sefer* 6-7 (1979): 79.

[233] *MhZ* 106:13. The years from 48,000 to 49,000 constitute the destruction period of the seventh *shemiṭṭah;* another thousand years must be reckoned for the *yovel,* bringing the total to fifty thousand.

[234] On this image see Zohar 1:113a, 126b; *Zohar Ḥadash* 10b (all from *Midrash ha-Neʿelam*); Werblowsky, "Philo and the Zohar," *JJS* 10 (1959): 39.

[235] See Zohar 2:161b; Scholem, *Von der mystischen Gestalt der Gottheit,* pp. 173-4.

[236] Zohar 1:66a; 210a; 224a; cf. Moses de León, *Sefer ha-Mishqal,* p. 56; *MhZ* 241:23-5. Scholem traced the origins of the theme in *"Levush ha-neshamot ve-ḥaluqa ʾ de-rabbanan," Tarbiẓ* 24 (1955): 290-306. Moses de León's source was Nissim of Kairouan's *Ḥibbur Yafeh min ha-Yeshuʿah.* David Baneth identified an Islamic tradition that may represent the indirect source of R. Nissim's tale; see his *"Ḥaluqa ʾ de-rabbanan, Hibbur Yafeh min ha-Yeshuʿah, u-masoret ʾislamit," Tarbiẓ* 25 (1956): 331-6. Scholem (*op. cit.,* p. 305) cited older parallels in Persian eschatology and also in Mahayana Buddhism, where it is said that upon reaching nirvana, Buddha "has, as it were, a special body created from his good deeds."

But the secret meaning is that Aaron's two sons were not yet fully clothed with the clothes on high.[237] For every *ẓaddiq* has a certain garment that he will wear when he is released to his eternal home. He will find that garment arrayed for him and will dress himself in it properly. If, however, his deeds have not been perfected and he is not worthy of that garment, he will not find it arrayed for him.

That garment is woven from *miẓvot,* acts of *ẓedaqah,* and good deeds, as it is written: "He donned *ẓedaqah* like a coat of mail" (Isa 59:17). This garment is prepared only for one who is complete below and has fulfilled the image of the chain[238] in this world by engendering new life with a partner. He is then complete both above and below, and that garment is prepared for him. If, however, he has not been perfected below and is not married and is blemished for not having engendered new life, this garment, as if it were possible, is not prepared for him; it is stripped off of him from above.

So it was with Aaron's two sons, who "entered without garments," namely, the garments on high, for they were not married and had not engendered new life; so they were stripped of those garments. They had not yet made themselves like their Creator;[239] yet they entered to perform the divine service. Therefore they were punished from above, as it is written: "Fire came forth from before *YHVH* and consumed them" (Lev 10:2). This means the fire on high, *Malkhut,* who is called Fire, as it is written: "For *YHVH* your God is a consuming fire" (Deut 4:24). [*MhZ* 27:30–28:12]

[237] Cf. Moses de León, *Sefer ha-Mishqal,* p. 56: *ʿAdayin loʾ nishlam ḥaluqo shel peloni.*

[238] *Ve-Qiyyem demut ha-shalshelet.* The phrase appears in Joseph of Hamadan's contemporary work, *Sefer Taʿamei ha-Miẓvot,* p. 439: *ve-yaʿaseh vanim vi-yqayyem demut ha-shalshelet;* cf. p. 294: *U-ke-she-ʾAdam meqayyem ha-miẓvot noten qiyyum la-shalshelet ha-qedoshah ve-ha-ṭehorah;* cf. pp. 152, 293; Moses de León, *Shushan ʿEdut,* p. 354: *ve-ʾeino mishtaddel le-qayyem ha-peri;* see Altmann, *Kiryat Sefer* 40 (1965): 274; Scholem, *Einige kabbalistische Handschriften im Britischen Museum,* p. 17. The *shalshelet* is the chain of *sefirot;* Joseph spells this out in *Sefer Tashaq,* ed. Jeremy Zwelling (Ph.D. diss., Brandeis University, 1975), p. 52: *ʿeser sefirot she-huʾ shalshelet ha-qodesh;* cf. pp. 62, 72, 80: *shalshelet ha-qedoshah ve-ha-ṭehorah.* The author mentions (p. 62) that this designation is a kabbalistic tradition. For other references to the *sefirot* as a chain see *MhZ* 174:4-5 (from Abulafia's *Shaʿar ha-Razim*); 197:1; Moses de León, *Sefer ha-Mishqal,* pp. 102, 115; cf. *Shushan ʿEdut,* p. 354; Zohar 2:136b; Meir ibn Sahula, *Beʾur le-Ferush ha-Ramban,* p. 4c; Arthur Lovejoy, *The Great Chain of Being,* pp. 67-98; On *demut* cf. BT, *Yevamot* 63b: *Kol mi she-ʾein ʿoseq bi-feriyyah u-reviyyah...ke-ʾillu memaʿeṭ ha-demut.* Cf. Zohar 1:13a; 3:217a; Ezra of Gerona, *Commentary on the Song of Songs* (Altona, 1764), p. 14a: *she-loʾ le-hakhrit u-le-maʿeṭ demuto min ha-temunah ha-kolelet kol ha-temunot* (see above, n. 211); Abraham Joshua Heschel, *Torah min ha-Shamayim ba-ʾAspaqlareyah shel ha-Dorot,* 1:220-3.

[239] R. David employs this phrase elsewhere: *MhZ* 56:12; 237:4; 241:19. Here the point is that a human being must imitate the divine union of *Tifʾeret* and *Malkhut.* Conversely, one who is not married is "half a body"; see *MhZ* 57:25-6; Zohar 3:7b,57b (referring to Aaron's two sons), 296a (*ʾIdraʾ Zuṭa*).

Concluding Remarks

A third of the extant *Book of Mirrors* consists of selections from the works of thirteenth-century kabbalists: Ezra and Azriel of Gerona, Todros Abulafia, Joseph Gikatilla, and Moses de León. Their writings were R. David's curriculum. His *Book of Mirrors* appears in the form of a commentary on the Torah, but it is also a workbook of Kabbalah. David copies, translates, edits, and then adds: "You must realize...."

The components of *The Book of Mirrors* help us to reconstruct R. David's kabbalistic education. Gikatilla's *Shaʿarei ʾOrah* guided him through the symbology of the *sefirot,* facilitating his understanding of the Zohar, as it has for many kabbalists since. R. David demonstrates his reliance on Gikatilla's primer by copying repeatedly from it in the last portion of *The Book of Mirrors,* as the Zohar translations wane.[240] The translations themselves reflect a student wrestling with the cryptic vocabulary and syntax of the Zohar's Aramaic. R. David makes mistakes, deletes difficult words, and dismantles narrative frameworks; yet he produces a fairly accurate Hebrew version of selected Zohar passages, one which was consulted and esteemed by later kabbalists.[241]

R. David had been a translator of Zohar from early on in his career. In *The Book of Mirrors* he emerges from the maze with his own pseudonym, eager to transmit. When R. Ḥiyya delivers his first piece of kabbalistic commentary after a dozen pages of Zohar translation, R. Shim ʾon, the Holy Light of the Zohar, responds with words of praise (see above, § 2.8.); David has been initiated into the art of mystical exegesis.

R. David's theosophical system derives mainly from the Zohar and Joseph ben Shalom Ashkenazi. He was attracted to a number of theories that were ignored or criticized by others, e.g., the *Shemiṭṭot* and the *Ẓaḥẓaḥot.* He emphasizes the dynamic nature of the *sefirot* by espousing a direct relationship between *Keter* and *Malkhut* as well as an independent dimension of *Malkhut:* the Secret of the Possible. David was less innovator than expounder of Kabbalah. A number of Jewish mystics were convinced that his zoharic imitations were part of *Midrash ha-Neʿelam.* This confusion, engineered by the author, reveals the significance of *The Book of Mirrors* as a record of the impact of the Zohar on a Spanish kabbalist of the next generation.

[240] Cf. the beginning of the table in § 2.6. with the end of the table in § 2.7.

[241] See above, §§ 2.7., 2.9; cf. Idel, *"Targumo shel R. David,"* p. 98. In *Kerem Ḥemed* 7 (1843): 79, Samuel David Luzzatto describes the *The Book of Mirrors* as *Sefer ha-Zohar meturgam bi-leshon ha-qodesh* and notes: *Yesh bo pitron ve-ḥesron mi-Sefer ha-Zohar ha-ʾarami ha-nidpas.*
